Lifeguarding will prepare students to respond to emergencies, promote safety in aquatic environments, and may even appeal to a future employer looking for a proven leader. Throughout the course, students will work towards American Red Cross certification requirements, including lifeguarding, CPR/AED, and First Aid. This class will also place an emphasis on professionalism, communication, teamwork, problem solving, and emergency response.

Recommended: Intermediate swimming skills, confidence in deep water.

Credit Only Granted for: KNES151 or KNES154W.

Formerly: KNES154W.

Additional Information: Students may obtain a lifeguard certificate/credential by passing a separate exam and skills test from the certifying organization. This is optional, and not required to earn course credit in the KNES151 course.

KNES156 Pickleball (1 Credit)

Provides students with a comprehensive overview of pickleball. This course will help students to better understand the basic skills and etiquette of pickleball, how to score and play in tournament situations, how to apply and articulate the basic rules of pickleball during singles and double play, and explain the health benefits of pickleball.

Restriction: Must be in a major within the Kinesiology department.

KNES173 Beginner BJJ & Martial Arts (2 Credits)

This is a coed physical activity course which introduces students to Brazilian Jiu-Jitsu through physically participating in fundamentals of the Art. Brazilian Jiu-Jitsu (BJJ) is a Brazilian martial art derived from the Japanese style, with a focus on grappling with particular emphasis on ground techniques. Students will learn basic escapes/submissions from ground positions. The student will learn and develop rudimentary skills necessary to progress in the above mentioned style. The course is taught at a beginner level and sparring (rolling) will not be permitted.

KNES180 Volleyball (1 Credit)

This course is intended for students with some volleyball experience.

It will provide students with a comprehensive overview of the sport by integrating volleyball skills and tactics with a historical/sociocultural appreciation and value of the sport and its function or benefit in the greater sport world. Students will learn the rules and etiquette of volleyball, and implement their understandings in a series of skill & formation practices or tests, written assignment or exam, and tournament activities.

Restriction: Must be in a major within the SPHL-Kinesiology department.

Credit Only Granted for: KNES180 or KNES160N.

Formerly: KNES160N.

KNES182 Soccer (1 Credit)

Provides students with a comprehensive overview of the sport by integrating fundamental and beginning soccer skills with a historical appreciation for and current cultural importance of the sport. Students will learn the rules of soccer, basic soccer-specific training activities and use their understanding of rules and concepts in game related activities.

Restriction: Must be in a major within the SPHL-Kinesiology department.

Credit Only Granted for: KNES182 or KNES152N.

Formerly: KNES152N.

KNES186 Basketball (1 Credit)

Basketball will provide students a comprehensive overview of the sport by integrating fundamental and advanced basketball skills with a historical appreciation for the sport and its function in the greater sporting world. Students will learn the rules of basketball, proper techniques and the basic principles of team offense and defense and implement their understanding of each in a series of informal and formal activities.

Restriction: Must be in a major within the SPHL-Kinesiology department.

KNES190 Flag Football (1 Credit)

Introduction to Flag Football will provide students with an overview of the game, terminology, rules, skills, and strategies. Students will develop and refine motor skills and movement patterns as they relate to flag football, as well as apply flag football concepts and strategies while focusing on team communication. Students will recognize and discuss the value of physical activity for health, enjoyment, challenge, inclusivity, confidence, fitness, and social interaction, specifically as it relates to flag football and NFL FLAG.

Restriction: Must be in a major within the SPHL-Kinesiology department.

KNES200 Introduction to Kinesiology (3 Credits)

Kinesiology is the interdisciplinary study of physical activity that includes seven sub-disciplines: 1) exercise physiology; 2) biomechanics; 3) sport psychology; 4) motor development; 5) motor control; 6) sport history; and 7) sport sociology. This course will examine these areas of study within Kinesiology from scientific and applied perspectives.

Restriction: Must be a Kinesiology major within first 2 semesters; or must not be in Kinesiology program and have less than 45 credits.

Credit Only Granted for: KNES200 or KNES201.

KNES201 Kinesiological Principles of Physical Activity (1 Credit)

An introduction to Kinesiology, the study of human movement, through the experience of learning a specific motor skill or being engaged in physical activity. Emphasis on the theories and knowledge underlying the learning and performance of all motor and sport skills.

Corequisite: Any physical activity course, e.g., KNES 100-190; or permission of SPHL-Kinesiology department.

Restriction: Must be in a major in SPHL-School of Public Health.

Credit Only Granted for: KNES200 or KNES201.

KNES214 Science and Methods of Personal Fitness Instruction (3 Credits)

Basic concepts of human anatomy, exercise physiology, applied kinesiology, nutrition and the physiology of exercise training. Includes the CORE knowledge required for the American Council on Exercise (ACE) Personal Trainer certification.

Credit Only Granted for: KNES214 or KNES210 and KNES211, or KNES210 and KNES212, or KNES289N.

Formerly: KNES210/KNES211, KNES210/KNES212, and KNES289N.

KNES218 Laboratory in Teaching (1 Credit)

The course is designed to prepare the student for the student teaching experience by assisting in a class.

Prerequisite: Permission of SPHL-Kinesiology department.

Repeatable to: 2 credits.

KNES222 Gambling in the New Millennium: Poker, The Preakness, Pointspreads, Powerball and Public Policy (3 Credits)

Is gambling in the public interest? Students will critically examine the various implications of "what it means to gamble" through investigations of various gambling forms, different sectors of the gambling industry and the related economics, along with consumer behavior, sport, public policy and public health in this context.

Recommended: ENGL101 and COMM107.

KNES225 Hoop Dreams: Black Masculinity and Sport (3 Credits)

Has sport disadvantaged African American males? This course critically examines sport as a site where notions of black masculinity are publicly debated, critiqued, challenged, celebrated, and also transformed. Utilizing an interdisciplinary approach, this course explores how sport has been invoked across the political and ideological spectrum to interrogate a number of issues impacting the life chances of young, African Americans males including educational attainment, poverty, social mobility, racism, cultural production, and notions of masculinity.

Credit Only Granted for: KNES289R OR KNES225.

Formerly: KNES289R.

KNES226 The Cybernetic Human (3 Credits)

Can the profound and rapid technological advances experienced in the 21st century change what it means to be human or the nature of humanity? Emergent technologies, new materials, increased computer power, engineering innovations, and groundbreaking work in the sciences of cognition and action provide myriad opportunities for repairing and enhancing the human body and brain. Examines the ethical, social, and technological implications of an increasing synergism of technology and the body in sports and the arts, at work or home, rehabilitating the body and the brain, and society at large.

Credit Only Granted for: KNES289W OR KNES226.

Formerly: KNES289W.

KNES235 Swimming Pool Management (2 Credits)

Analysis of the position of the swimming pool manager. The systematic treatment of swimming pool water; swimming pool first aid; and laws pertaining to swimming pool operation. Qualifies the student for a pool operator's license in most Maryland counties.

Credit Only Granted for: KNES235 or KNES335.

Formerly: KNES335.

KNES243 Sports Finance & Business Intelligence (3 Credits)

As society has evolved with advances in technology, so have the financial and analytical fundamentals of spectator sports leagues. In this course, students will examine modern business principles in for-profit sports leagues, understand current practices for successful operation and revenue generation, and explore how analytics and emerging categories play a crucial role in an organization's growth and competitiveness in their respective markets.

KNES246 Transformational Leader in Sport: The Art and Science of Coaching (3 Credits)

Highlights the expectations and ethical problems facing developmental sport programs and youth athletic coaches today. Explores the continuum of coaching from Buttermaker (Bad News Bears) to Belichick (New England Patriots). We first examine the issues of sports, physical inactivity and obesity from a physiological, psychological, social, political, and economic perspective. Next, we will focus on how transformational leadership behaviors, knowledge, and communication influence changes in intrapersonal, interpersonal, and environmental aspects. Finally, we will employ a practical, manageable method for coaches to develop their athletes and programs.

KNES260 Science of Physical Activity and Cardiovascular Health (3 Credits)

Course details (1) the public health importance of and the processes underlying cardiovascular disease, (2) the risk factors for cardiovascular disease and the methods whereby they were identified, and (3) the principles of the scientific evidence supporting the use of physical activity to prevent cardiovascular disease.

KNES264 Foundations of Food, Physical Activity, and Health (3 Credits)

Designed for both kinesiology majors and non-majors to explore the basics of nutrition, activity & exercise, and human health. What is a calorie? What is metabolic rate? How do our daily activities alter our metabolism? What are the short- and long-term benefits of exercise? How do equity and access to food and physical activity affect health? Is sedentary behavior a greater health risk than being overweight? This blended course allows students to investigate nutrition and physical activity they encounter in their everyday life, as well as examine how differences in equity and access can affect health.

Credit Only Granted for: KNES264, KNES289F or NFSC100.

Formerly: KNES289F.

KNES265 Mathematical, Physical, & Statistical Basis of Kinesiology (3 Credits)

Mathematical, physical, and statistical foundations for human movement quantification, analysis, and evaluation. Upon successful completion, this course is expected to better prepare students for the science Core courses, such as biomechanics, exercise physiology, and motor control, that are required for Kinesiology majors.

Credit Only Granted for: KNES265 or KNES289P.

Formerly: KNES289P.

KNES282 Basic Care and Prevention of Athletic Injuries (3 Credits)

Theoretical and practical foundations of the prevention, treatment and rehabilitation of athletically related injuries. Topics include: physical conditioning, preventive taping, recognition of injuries, first aid and CPR.

Restriction: Must be in a major within the SPHL-Kinesiology department.

KNES285 History of Physical Culture, Sport, & Science in America (3 Credits)

Examines the history of physical culture in America, focusing on the period from the end of the Civil War to the Cold War. Physical culture refers to a broad range of movement practices including sport, play, rehabilitative exercise, health and fitness training, and recreation and leisure. More specifically, we challenge the idea that historical physical culture practices--and the scientific processes from which they were derived--were 'neutral' or 'objective'; rather, we explore the cultural, social, political, and economic contexts shaping physical culture knowledge, study, structures, and policies across American history. The goal is for you to learn and apply techniques of historical analysis to develop a critical understanding of how knowledge about, and practices of, physical culture supported a particular social order via the construction of difference, norms, and/or hierarchies, and ultimately contributed to some of the inequalities that endure today.

Restriction: Restricted to majors or non-majors with less than or equal to 60 credits.

Credit Only Granted for: KNES285 or KNES293.

KNES286 Empowering Healthy Physical Activity (3 Credits)

Learn evidence-based techniques that health professionals use to promote physical activity programs that meet the needs of diverse populations. Develop and implement an intervention plan targeting a specific population.

KNES287 Sport and American Society (3 Credits)

Sport will be related to such social problems as delinquency, segregation, collective behavior, and leisure; to social processes such as socialization, stratification, mobility, and social control; and to those familiar social institutions the family, the school, the church, the military, the economy, the polity, and the mass media.

Recommended: Minimum grade of C- in KNES285.

KNES289 Topical Investigations (1-6 Credits)

Independent study by an individual student or a group of students in special areas of knowledge not covered by regularly scheduled courses.

Repeatable to: 6 credits.

KNES293 History of Sport in America (3 Credits)

The growth and development of sport in America. The transformation of sport within the perspective of American history, including class sport, professionalization, amateurism, and international involvement.

KNES300 Biomechanics of Human Motion (4 Credits)

The study of human movement and the physical and physiological principles upon which it depends. Body mechanics, posture, motor efficiency, sports, the performance of a typical individual and the influence of growth and development upon motor performance.

Prerequisite: Minimum grade of C- in BSCI201; and minimum grade of C- in MATH113 or higher.

Recommended: KNES265 or PHYS121.

Restriction: Must be in a major within SPHL-Kinesiology department.

KNES305 Principles & Application of Exercise Rehabilitation (3 Credits)

In-depth analysis of the basic principles of rehabilitation and exercise programming for common injuries encountered in a clinical setting. Basic assessment techniques, ranges of motion, muscular anatomy, rehabilitative protocols, and exercise modalities are a major focus.

Prerequisite: Minimum grade of C- in BSCI201 and BSCI202; and 1 course with a minimum grade of C- from (KNES300, KNES350, KNES360, KNES370, KNES385).

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

Credit Only Granted for: KNES498T or KNES305.

Formerly: KNES498T.

KNES306 Prosthetics for Limb Amputations (3 Credits)

Introduction to the science of prosthetics and the artificial devices that are designed, developed and fit to replace the missing body part or parts lost through trauma, disease or congenital conditions.

Prerequisite: Minimum grade of C- in BSCI201, BSCI202, and KNES300.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

Credit Only Granted for: KNES306 or KNES498W.

Formerly: KNES498W.

KNES320 Physiological Basis of Physical Activity and Human Health (4 Credits)

A study of the responses and chronic adaptations to physical activity and exercise, with particular emphasis on the interaction between human health and physical activity. The laboratory component of course will focus on the assessment of physical activity and measurement of physiological adaptations to exercise. Students are expected to gain an understanding and appreciation for the benefits of physical activity and exercise in the context of public health.

Prerequisite: Minimum grade of C- in BSCI201 and BSCI202.

Restriction: Must be in Public Health Science program.

Credit Only Granted for: KNES360 or KNES320.

KNES332 Exercise Testing & Prescription for Fitness Professionals (3 Credits)

Practical applications of exercise physiology and psychology to target fitness instruction for the general adult population. Includes discussion of certification standards and professional development as well as evaluation of program safety and current trends.

Prerequisite: Minimum grade of C- in KNES360.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

Credit Only Granted for: KNES332 or KNES389G.

Formerly: KNES389G.

KNES333 Motor Development and Fitness for Individuals with Disabilities (3 Credits)

Implications of Federal and State regulations for planning and implementing motor development and physical fitness programs for individuals with disabilities. Evaluation strategies for assessing motor performance and fitness levels in educational programs for these individuals.

Prerequisite: Minimum grade of C- in KNES370.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 60 credits.

KNES334 Adapted Physical Activity: Empowering People with Disabilities to Lead a Healthy and Active Lifestyle (3 Credits)

Study of the field of adapted physical activity and its impact on the health and wellness of individuals with disabilities. Students will design an adapted physical activity program proposal and develop the skills needed to empower people with disabilities to participate in physical activity and sports programs. Students will explore their own perceptions towards disability and how people with disabilities are portrayed in our society. They will study the etiology of disabling conditions and the implications for participating in physical activity.

Prerequisite: KNES370; or students not in the Kinesiology major may contact the instructor for permission.

Restriction: Must have earned a minimum of 75 credits.

KNES342 Sport, Commerce, and Culture in the Global Marketplace (3 Credits)

The Sport, Commerce, and Culture in the Global Marketplace study abroad program is designed for students who are interested in the relationship between sport, culture, and the contemporary global economy.

Recommended: KNES287.

Credit Only Granted for: KNES389A or KNES342.

Formerly: KNES389A.

KNES346 Sport for Development (3 Credits)

Examines how sport-based programs and organizations are used by governments, multinational corporations, and non-government organizations (NGO's) to reach personal, community, national and international development objectives; focuses on theorizing the histories of international development and contemporary global issues; contextualizes the interrelationship of theory, institutions, and practices of domestic and international sport for development and peace programming.

Prerequisite: Must have earned a minimum grade of C- in KNES287.

Recommended: KNES485.

Restriction: Must be a major within the SPHL-Kinesiology department and must have earned a minimum of 75 credits.

Credit Only Granted for: KNES389D or KNES346.

Formerly: KNES389D.

KNES347 Sport Economics (3 Credits)

Through combining fantasy football with a sports business simulation, students will develop a better understanding of the sports industry through the application of economic concepts. Topics include: sports teams and leagues, public finance of stadiums and sports events, and labor issues in sports.

Prerequisite: Minimum grade of C- in KNES287.

Recommended: KNES355, ECON111, and ECON200.

Restriction: Must have earned a minimum of 75 credits.

Credit Only Granted for: KNES347 or KNES389I.

Formerly: KNES389I.

KNES350 The Psychology of Sports & Exercise (3 Credits)

An exploration of personality factors, including but not limited to motivation, aggression and emotion, as they affect sports participation and motor skill performance.

Restriction: Must have earned a minimum of 45 credits.

KNES352 Global Perspectives of Physical Activity (3 Credits)

Introduces global perspectives of physical activity to students within the School of Public Health who are studying abroad. Students will be able to creatively explore the physical activity culture in their host city by engaging in a variety of assignments, including a group podcast and data uploads. Additionally, students will demonstrate overall knowledge gained from the course by writing a case study report that focuses on how they are physically active abroad versus at home, tying in key concepts of public and global health.

Prerequisite: Minimum grade of C- in SPHL100 and any KNES Core course.

Restriction: Must be in a major in SPHL-School of Public Health.

KNES355 Sport Management (3 Credits)

Application of concepts and issues related to management principles and business concerns across various sections of the sport industry. Principles pertaining to the management of sport organizations.

Prerequisite: Minimum grade of C- in KNES287.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES360 Physiology of Exercise (4 Credits)

A study of the physiology of exercise, including concepts of work, muscular contraction, energy transformation, metabolism, oxygen debt, and nutrition and athletic performance. Emphasis on cardiovascular and respiratory function in relation to physical activity and training.

Prerequisite: Minimum grade of C- in BSCI201 and BSCI202; or permission of SPHL-Kinesiology department.

Restriction: Must be in one of the following programs (Kinesiology; Public Health Science).

KNES370 Motor Development (3 Credits)

Motor development across the life span. The developmental sequences of motor skills from birth to old age; neuromaturation of neuromuscular system; analysis of the underlying mechanisms of motor skill development; and correlates of motor development.

Restriction: Must be in a major within SPHL-Kinesiology department.

KNES385 Motor Control and Learning (4 Credits)

This introductory course investigates how humans control and adapt their movements to perform and learn a variety of motor skills, ranging from activities of daily living to elite athlete performance. This course examines the underlying cognitive, sensory and motor processes of control and adaptation of human movements both at the behavioral and neurophysiological levels. Relevant applications to movement rehabilitation as well as performance optimization are employed to illustrate the concepts discussed in class. The cognitive, sensory and motor mechanisms underlying motor control are explored first and then in a motor learning context.

Prerequisite: Minimum grade of C- in BSCI201, and a minimum grade of C- in MATH113 or higher.

Recommended: KNES265 or PHYS121.

Restriction: Must be in a major within SPHL-Kinesiology department.

KNES386 Service Learning in Kinesiology (3 Credits)

Provides students practical experiences by applying classroom concepts and skills to real-world situations in the local community. Students will serve as volunteer coaches and mentors with a community organization focused on promoting physical activity and social-emotional learning/well being.

Prerequisite: Must have completed three KNES core classes.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits; and must have permission from the Kinesiology department.

Additional Information: Coaching days and times will vary by the community organization, and some locations may be off-campus.

KNES389 Topical Investigations (1-3 Credits)

Independent study by an individual student or a group of students in special areas of knowledge not covered by regularly scheduled courses.

Repeatable to: 6 credits.

KNES400 The Foundations of Public Health in Kinesiology (3 Credits)

An investigation of the role of physical activity and inactivity in relation to health and well-being through a public health perspective. Past and current perspectives on health promotion, health education, and social policies and approaches will be examined for various populations.

Prerequisite: Minimum grade of C- in KNES287.

Restriction: Senior standing or higher; and must be in a major within the SPHL-Kinesiology department.

KNES401 Zip Code: Prediction of Physical Activity & Health (3 Credits)

An exploration of the relationship and impacts of built and other social environments on health, including physical activity, social equity, gentrification, and many others.

Prerequisite: Minimum grade of C- in SPHL100.

Restriction: Must have earned a minimum of 75 credits; and must be in a major within, SPHL-Kinesiology department.

KNES402 Biomechanics of Sport (3 Credits)

Mechanical determinants influencing sport techniques. A quantitative, scientific basis for sport analysis with emphasis on the application to numerous sport activities. Evaluation and quantification of the filmed performance of athletes.

Prerequisite: Minimum grade of C- in KNES300.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES405 Principles & Techniques of Manual Muscle Testing (3 Credits)

It is critical for sports medicine and sport performance specialists to understand the location and inter-relationships of the structures of the body that impact human movement. Thus, the primary purpose of this course is to facilitate an in-depth, understanding of the muscles of the body. Specifically, students will learn the origins, insertions, primary and secondary functions, as well as nervous innervations of the major muscle groups of the body. In addition, students will develop palpation skills and learn to grade the function of each muscle through manual muscle testing techniques. These skills form the foundation for assessing functional movement as well as performing safe and effective manual therapy techniques. Thus, while the focus of the class will be to develop sound, introductory palpation and manual muscle testing skills, basic principles of functional movement and manual therapy will also be addressed through hands-on application as well as case study.

Prerequisite: Minimum grade of C- in BSCI201 and BSCI202; and 1 course with a minimum grade of C- from Kinesiology core courses at the 300-level or higher.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

Additional Information: This course emphasizes hands-on application of skills. Course participation is critical.

KNES440 Psychology of Athletic Performance (3 Credits)

Examines the psychological factors, mechanisms, and processes in athletic performance. Utilizes a social psychological approach to focus on the study and review of individual performance in both the interpersonal and social context.

Prerequisite: Minimum grade of C- in KNES350.

Restriction: Must have earned a minimum of 75 credits.

KNES442 Psychology of Exercise and Health (3 Credits)

Examines the antecedents and consequences of exercise behavior. Explores motivation, attitude, control, socialization. Proposes intervention strategies at the individual, organizational and societal levels.

Prerequisite: Minimum grade of C- in KNES350.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES445 Exercise and Brain Health (3 Credits)

Examines the evidence for exercise to affect brain function and brain health in children, in adults, and in old age. Covers the adaptations to acute and chronic exercise within brain networks related to emotion, stress reactivity, memory, and executive function, and the effectiveness of physical activity and exercise as treatments for depression, anxiety disorders, and cognitive impairment.

Prerequisite: Minimum grade of C- in KNES350.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES450 From the Olympics to the Rehabilitation Clinic: Mental Skills Training Applications (3 Credits)

The examination and application of the major concepts of human performance psychology in, and beyond, the professional, collegiate, amateur and youth sport athletic spaces to allied health practitioner (PT, OT, OR, PA, RN), athletic and personal training, and tactical athlete (i.e., military, law enforcement, and firefighting) environments. An essential component of the class will be the reliance on reading and reviewing both classic articles and the recent evidence-based research in which applied strategies and techniques are based. Students will be taught to critically analyze the research by 1) understanding the purpose of the research, 2) identifying the experimental design and how it contrasts the difference between experimental and control conditions, 3) understanding the outcome of the research, and 4) understanding how the outcome of the research may be applicable to the human performance and allied health environments.

Prerequisite: Minimum grade of C- in KNES350.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

Credit Only Granted for: KNES498G or KNES450.

Formerly: KNES498G.

KNES451 Children and Sport: A Psychosocial Perspective (3 Credits)

Examination of youth sports from a psychosocial perspective, including the impact of highly structured sports on young athletes and the complex social network of coaches, parents and peers.

Prerequisite: Minimum grade of C- in KNES350.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES455 Scientific Bases of Athletic Conditioning (3 Credits)

An examination of physical fitness/athletic conditioning programs stressing the practical application of exercise physiology theory for enhancing athletic performance. Cardiovascular considerations, strength and power development, nutrition, speed, muscular endurance, environmental considerations and ergogenic aids.

Prerequisite: Minimum grade of C- in KNES360.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES457 Managing Youth Programs: Educational, Fitness and Sport (3 Credits)

An examination of the basic functions involved in managing physical education, fitness, and youth sports programs. Focus on leadership skills, organizational management, and techniques for applying learned skills in a variety of organizational settings that serve the nation's youth.

Prerequisite: Minimum grade of C- in KNES350 and KNES370.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES460 Physiology of Aging and the Impact of Physical Activity (3 Credits)

Biology of the aging process in healthy individuals and those with chronic disease, the effects of acute exercise and exercise training on the physiological decline that occurs in humans, and the role that regular physical activity plays on enhancing the quality of life and activities of daily living in individuals.

Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).

Restriction: Must be in one of the following programs (Kinesiology; Public Health Science); and must have earned a minimum of 75 credits.

KNES461 Exercise and Body Composition (3 Credits)

An in-depth overview on how body composition is measured, what it is composed of, and the physiological and biochemical signals that change it. The effects of acute and chronic exercise on food storage, breakdown, and use as an energy source, is the major focus. This information is applied to important issues in public health and athletic performance.

Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).

Restriction: Must be in one of the following programs (Kinesiology; Public Health Science) ; and must have earned a minimum of 75 credits.

KNES462 Neural Basis of Human Movement (3 Credits)

An introduction to the neural substrates which underlie postural and volitional movement. Neuroanatomical and neurophysiological basis of motor functioning; past and present conceptualizations of motor control and coordination; movement disorders; and maturation of the neuromuscular system.

Prerequisite: Minimum grade of C- in BSCI201, BSCI202, and KNES385; or permission of SPHL-Kinesiology department.

Restriction: Must have earned a minimum of 75 credits.

KNES463 Principles and Methods of Physical Activity Interventions (3 Credits)

Understanding of the planning, implementation, and evaluation of physical activity interventions. Intervention methods and practical strategies fo formulate well-conceived physical activity interventions across a variety of settings and participant populations.

Prerequisite: Minimum grade of C- in KNES350 and KNES360.

Restriction: Must have earned a minimum of 75 credits.

KNES464 Exercise Metabolism: Role in Health and Disease (3 Credits)

Examines the role of metabolism in kinesiology, especially as it relates to physical inactivity, health and disease. Includes bioenergetics, substrate utilization, cell signaling, and metabolic gene expression and their impact on chronic health conditions or disease.

Prerequisite: Minimum grade of C- in KNES360.

Restriction: Must have earned a minimum of 75 credits.

KNES465 Physical Activity and Disease Prevention and Treatment (3 Credits)

Critically examines the scientific evidence that supports the use of physical activity to prevent and treat age-related diseases, including cardiovascular disease, diabetes, abnormal lipoprotein-lipid levels, hypertension, obesity, osteoporosis and cancer.

Prerequisite: 1 course with a minimum grade of C- from (KNES320, KNES360).

Restriction: Must have earned a minimum of 75 credits.

KNES466 Graded Exercise Testing (3 Credits)

Functional and diagnostic examination of the cardiovascular responses to graded exercise testing. Emphasis on electrophysiology, mechanisms of arrhythmias, normal electrical activation of the heart, axis termination and the normal 12-lead electrocardiogram.

Prerequisite: Minimum grade of C- in KNES360.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES467 Genetics in Physical Activity and Sport (3 Credits)

Dedicated to understanding the role of genetics in kinesiology, especially within the contexts of physical activity and sport. Specific genes and phenotypes will be explored.

Prerequisite: Minimum grade of C- in KNES360. And must be concurrently enrolled in STAT100 or have completed STAT100 with a minimum grade of C-; or students who have taken courses with comparable content may contact the department.

Restriction: Must have earned a minimum of 75 credits.

KNES474 Quantitative Methods in Cognitive Motor Behavior - MATLAB (3 Credits)

Includes basic computer programming, algorithm, and quantitative techniques for time-series data with an emphasis on, but not limited to, human movement. These topics will be taught using MATLAB, a programming language and environment for numerical computation, data analysis, and visualization.

Prerequisite: MATH115 or equivalent; or permission of Kinesiology department.

Recommended: MATH240.

Restriction: Must have earned a minimum of 75 credits.

KNES476 Honors Thesis Proposal (3 Credits)

Development of honors thesis proposal based on preliminary research and literature review. Presentation of formal proposal to the thesis committee and fellow honors students.

Corequisite: KNES478.

Restriction: Must be a KNES Honors student; and senior standing.

KNES477 Honors Thesis (3 Credits)

Advisement will be on the individual basis. Thesis must be defended in the honors seminar.

Prerequisite: KNES476.

Corequisite: KNES478.

Restriction: Must be a KNES Honors student; and senior standing.

KNES478 Honors Seminar (1-3 Credits)

Guided discussion of research topics of current interest.

Restriction: Must be a KNES Honors student; and junior standing or higher.

Repeatable to: 4 credits if content differs.

KNES482 Socio-behavioral Aspects of Human Movement (3 Credits)

Derivation, formulation, and application of research in the socio-behavioral aspects of human movement.

Prerequisite: KNES293, KNES350, and KNES287.

KNES483 Sport Marketing and Media (3 Credits)

Industry practices in sport marketing and media. Marketing strategies and consumer behavior in different sport contexts. Critical examination of selected social and economic issues related to the buying and selling of sport.

Prerequisite: Minimum grade of C- in KNES287.

Recommended: KNES355.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES484 Sporting Hollywood (3 Credits)

Popular representations of sport within the film media related to wider social discourses on bodies and the politics of various categories of subjectivity (gender, sex, race, class and nationality).

Prerequisite: Minimum grade of C- in KNES285 and KNES287.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES485 Sport and Globalization (3 Credits)

Examination of sport culture from a global perspective; focuses on theorizing the similarities and differences between various national sporting cultures.

Prerequisite: Minimum grade of C- in KNES287.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES487 Women, Sports and Culture (3 Credits)

A study of the historical barriers to women's participation in physical activity, efforts to dismantle those barriers, and the differentiation that exists in women's sport and physical culture today. Exploration of the historical and contemporary factors involving female athletes in U.S. culture.

Prerequisite: Minimum grade of C- in KNES287.

Restriction: Must be in a major within the SPHL-Kinesiology department; and must have earned a minimum of 75 credits.

KNES497 Kinesiology Senior Seminar (3 Credits)

Discussions of contemporary issues vital to the discipline, critiques of research in the student's area/areas of special interest, completion of a major project where the student will be asked to demonstrate the ability to carry out investigative processes in problem solving and critical writing under faculty direction.

Prerequisite: A professional writing course with a minimum grade of C-; and must have completed 6 KNES core courses and 2 KNES option courses, all with a C- or higher; and must have completed STAT100 with a C- or better.

Restriction: Senior standing or higher; and must be in Kinesiology program; and permission of department.

KNES498 Special Topics in Kinesiology (3 Credits)

Topics of special interest in areas not covered by regularly scheduled courses.

Prerequisite: Permission of SPHL-Kinesiology department.

Repeatable to: 99 credits if content differs.

KORA - Korean

KORA101 Elementary Korean I (3 Credits)

Introduction to the Korean language. Primary emphasis on oral skills, but Hangul, the Korean alphabet, will also be introduced.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score; and permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must be a non-Heritage student with no background in Korean.

KORA102 Elementary Korean II (3 Credits)

Continued training in elementary spoken and written Korean.

Prerequisite: KORA101; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must be a non-Heritage student; and permission of instructor required for new students.

KORA201 Intermediate Korean I (3 Credits)

An intermediate-level course designed for non-Heritage students. It begins the second year of instruction in the University's two-track Korean Program.

Prerequisite: KORA102; or permission of instructor.

KORA202 Intermediate Korean II (3 Credits)

The second stage of an intermediate-level course designed for non-Heritage students. It continues the second year of instruction in the University's two track Korean Program.

Prerequisite: KORA201; or permission of instructor.

KORA241 History of the Korean Language (3 Credits)

The origins of the Korean language and its development from earliest recorded times to the present. The relationship of Korean to other languages. Taught in English.

KORA269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

KORA345 Korean Language and Linguistics (3 Credits)

An exploration of Korean language and society, in particular the role and nature of the alphabet, Korean sounds, lexical and grammatical structures, and usage in today's South Korea.

Prerequisite: KORA102 or KORA211; or permission of ARHU-School of Languages, Literatures, and Cultures department.

KORA369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

KORA398 Special Topics in Korean Studies (3 Credits)

Study of particular aspect of Korean language, literature, and/or culture. Topic and language of instruction to be announced when course is offered.

Repeatable to: 9 credits if content differs.

KORA499 Independent Study Korean (1-3 Credits)

Independent study under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

LACS - Latin American and Caribbean Studies

LACS148 Special Topics in Latin American and Caribbean Studies (3 Credits)

Topics to be announced when offered.

Repeatable to: 6 credits if content differs.

Formerly: LASC148.

LACS234 Issues in Latin American and Caribbean Studies I (3 Credits)

Interdisciplinary study of major issues in Latin America and the Caribbean, including Latin America's cultural mosaic, migration and urbanization. Democratization and the role of religions. Taught in English.

Cross-listed with: PORT234, SPAN234.

Credit Only Granted for: LASC234, PORT234, SPAN234, or LACS234.

Formerly: LASC234.

LACS235 Issues in Latin American and Caribbean Studies II (3 Credits)

Major issues shaping Latin American and Caribbean societies including the changing constructions of race, ethnicity, gender and class as well as expressions of popular cultures and revolutionary practices. Taught in English.

Cross-listed with: PORT235, SPAN235.

Credit Only Granted for: LASC235, PORT235, SPAN235, or LACS235.

Formerly: LASC235.

LACS248 Special Topics in Latin American and Caribbean Studies (3 Credits)

Topics to be announced when offered.

Repeatable to: 6 credits.

Formerly: LASC248.

LACS250 History of Colonial Latin America (3 Credits)

Introductory survey of the history of Latin America from pre-Columbian Indian cultures to the beginning of the wars for independence (ca. 1810), covering cultural, political, social, and economic developments. Major themes include conquest, colonialism, indigenous culture, African slavery, religion, race and ethnicity, and gender ideologies.

Cross-listed with: HIST250.

Credit Only Granted for: LASC250, HIST250, OR LACS250.

Formerly: LASC250.

LACS251 Latin America Since Independence (3 Credits)

Introductory survey of the history of Latin America from the era of independence (c. 1810-1825) through the early 1980s. Major themes include independence and sovereignty, postcolonialism and neocolonialism, nation- and state-building, liberalism, citizenship, economic development and modernization, social organization and stratification, race and ethnicity, gender relations, identity politics, reform and revolution, authoritarianism and democratization, and inter-American relations.

Cross-listed with: HIST251.

Credit Only Granted for: HIST251, LASC251, or LACS251.

Formerly: LASC251.

LACS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: LASC269.

LACS286 Internship in Latin American/Caribbean Studies (1-6 Credits)

Internship experience with an organization that works with or studies Latin American and/or the Caribbean. This is an experiential learning course that provides semester-long training that enriches the student's academic field of study and the LASC Certificate. Students submit a final written report of how the experience ties into their major field of study.

Prerequisite: LASC234, SPAN234, LASC235, SPAN235, LACS250, HIST250, LACS251, or HIST251; and permission of Latin American and Caribbean Studies Center required.

Restriction: Minimum cumulative GPA of 2.5; and cannot have more than 60 credits total.

Credit Only Granted for: LASC286 or LACS286.

Formerly: LASC286.

Additional Information: The course is primarily intended for students seeking the Certificate in Latin American and Caribbean Studies, but exceptions will be considered for students with educational or career interests which lie in this area. Student internships must be approved by the Director and students must secure an appropriate faculty mentor to supervise the internship course.

LACS348 Special Topics in Latin American and Caribbean Studies (3 Credits)

Topics to be announced when offered.

Repeatable to: 6 credits if content differs.

LACS348E Caribbean Literature in English (3 Credits)

Political and literary traditions that intersect in the fiction, poetry, and drama written in English by Caribbean writers, primarily during the 20th century.

Cross-listed with: ENGL362.

Credit Only Granted for: ENGL362, LASC348E, or LACS348E.

LACS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: LASC369.

LACS370 Education, Technology and Society: Ecuador in Context (3 Credits)

Set in the UNESCO World Heritage site of Cuenca, Ecuador, students in this short-term study abroad course use theory from Science and Technology Studies (STS) to explore, discuss and critique the design, development and implementation of technology-based social programs in Ecuador. The program looks at education and technology throughout multiple lenses and contexts. Collaboration with the University of Cuenca, participating students have the opportunity for both university and field-based research and practice. UMD students work alongside students and faculty from the leaders and practitioners from UCuenca, government agencies, nongovernmental organizations, small business and local communities.

Recommended: 1 course from (ENES240, ENES200, or ENEE200).

Cross-listed with: ENES359T, CPSS370.

Restriction: Minimum cumulative GPA of 2.5.

Credit Only Granted for: ENES259T, ENES359T, CPSP279T, LASC269T, CPSS370, or LACS370.

Formerly: ENES259T.

LACS448 Special Topics in Latin American and Caribbean Studies (3 Credits)

Intensive study of a selected topic related to Latin American and Caribbean Studies.

Restriction: Junior standing or higher.

Repeatable to: 6 credits if content differs.

LACS458 Senior Capstone Course in Latin American and Caribbean Studies (3 Credits)

Capstone course for advanced students in the Latin American and Caribbean Studies Certificate Program or other students with appropriate preparation. Interdisciplinary topics will vary each semester.

Prerequisite: LASC234 and LASC235; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must be in Latin American and Caribbean Studies Certificate program; and senior standing.

LACS486 Internship in Latin American/Caribbean Studies (1-6 Credits)

Internship experience with an organization that works with or studies Latin American and/or the Caribbean. This is an experiential learning course that provides semester-long training that enriches the student's academic field of study and the LACS Certificate. Students submit a final written report of their experience, including critical analysis of the institutional relevance to their major field of study and to Latin American and Caribbean Studies. Students will also be asked to give an oral presentation.

Prerequisite: Student must have completed at least two LACS courses, one of which must be a required/core course (LACS/SPAN234, LACS/SPAN235, LACS/HIST250, or LACS/HIST251); and permission of Latin American Studies Center required.

Restriction: Minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits.

Credit Only Granted for: LASC486 OR LACS486.

Formerly: LASC486.

Additional Information: The course is primarily intended for students seeking the Certificate in Latin American and Caribbean Studies, but exceptions will be considered for students with educational or career interests which lie in this area. Student internships must be approved by the Director, and students must secure an appropriate faculty mentor for the internship course. An internship course will be approved only if a faculty supervisor is available.

LACS499 Independent Study in Latin American and Caribbean Studies (1-3 Credits)

Independent Study in Latin American and Caribbean Studies.

Restriction: Permission of instructor.

Repeatable to: 6 credits.

Formerly: LASC499.

LARC - Landscape Architecture

LARC121 Computer Visualization in Design (3 Credits)

Students are provided with the opportunity to 1) explore basic design principles and practice, 2) explore and apply computer concepts and principles, 3) learn and apply basic computer tools used in landscape architecture and allied disciplines, and 4) demonstrate competency in design vocabulary and computer applications through demonstrated deliverables used in the built environment design fields.

LARC131 Computer Visualization I (3 Credits)

Provides the opportunity to 1) explore basic design principles and practice 2) explore and apply computer concepts and principles, 3) learn and apply basic computer tools used in landscape architecture and allied disciplines and 4) demonstrate competency in design vocabulary and computer applications through demonstrated deliverables used in the built environment design fields.

Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and must be in Landscape Architecture program.

Credit Only Granted for: LARC120 or LARC131.

Formerly: LARC120.

LARC140 Graphic Fundamentals Studio (4 Credits)

Basic techniques and application of various media for graphic communication associated with landscape architecture.

Recommended: Concurrently enrolled in LARC160.

Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and must be in Landscape Architecture program.

LARC151 Urban Agriculture: Designing and Assessing Edible Landscapes (3 Credits)

Students will examine the growing development of urban agriculture and edible landscapes. Urban agriculture has seen a recent growth and interest in cities across the globe. From Paris to New York, from Baltimore to Detroit, urban agriculture is an emerging land use to address a variety of needs. Redevelopment, food deserts, community engagement and environmental justice are just some of the issues and topics that are connected to the recent growth of urban agriculture. This course will take a critical examination of urban agriculture's contribution to the food system, its input and outputs in the urban landscape, and the planning and design of urban agriculture and edible landscapes.

LARC152 Greening Cities: Who Wins, Who Loses, and Who Cares? (3 Credits)

"Greening Cities" can have many interpretations: improving or adding urban economic activity, realizing energy efficiency, greening urban transport systems, etc. An important component of livable and sustainable cities and metropolitan ecosystems are the plants and landscapes that are inhabited by plants. With the majority of humans now living in cities, a survey of urban ecosystem principles and an examination of design and planning strategies for plant and landscape resources in urban and metropolitan regions is critical.

Credit Only Granted for: LARC152 or PLSC289I.

Formerly: PLSC289I.

LARC160 Introduction to Landscape Architecture and Environmental Design (3 Credits)

History, theory, philosophy and current practice of the profession of landscape architecture. Explores the interactive relationship between humans and their environment by examining people's perceptions of and changing attitude towards the landscape, as well as, an examination of how these are related to ecological and cultural influences. Topics include urban, ecological, community and creative design.

LARC162 Environmental Justice: Same World, Different Built Environment (3 Credits)

Environmental Justice will be explored in the context of the built environment. What unequal public built environmental threats exist? How can these threats be prevented or eliminated? Public schools, public parks, access to clean water, air pollution, tree coverage are among the built environments examined in the course.

LARC188 Special Topics in Landscape Architecture (1-3 Credits)

A lecture course for students interested in Landscape Architecture to cover topics not formally taught in existing courses. An introductory class on a group of closely-related topics for students with an interest in this discipline.

Repeatable to: 6 credits if content differs.

LARC220 Landscape Visualization II (4 Credits)

Basic techniques and application of various media for graphic communication associated with landscape architecture.

Corequisite: LARC230.

Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and sophomore standing or higher; and must be in Landscape Architecture program.

Credit Only Granted for: LARC489R or LARC220.

Formerly: LARC489R.

LARC221 Digital Design Tools (3 Credits)

The development and application of computing skills as used by the landscape architecture profession. This Computer-Aided Design and Drafting (CADD) course develops computer drafting using a variety of software programs. It also introduces students to Geographic Information Systems (GIS) mapping technologies.

Prerequisite: LARC120 and LARC141.

Recommended: LARC240 and LARC265.

Restriction: Sophomore standing or higher; and must be in Landscape Architecture program.

LARC230 Design Fundamentals Studio (5 Credits)

Introduction to the fundamentals of basic design focusing on creative problem solving associated with landscape architecture. Here you will explore design with different geometries, organizing principles, concept development, spatial definition, land formation, structures and plants. Emphasis will be given on how to represent design ideas using measured drafting techniques and presentation board organization. A series of foundational exercises will culminate in the redesign of a small public space.

Prerequisite: Must have completed or be concurrently enrolled in LARC265 and LARC266.

Corequisite: LARC220.

Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and sophomore standing or higher; and must be in Landscape Architecture program.

Credit Only Granted for: LARC141 or LARC230.

Formerly: LARC141.

LARC231 Site Planning and Design Studio (5 Credits)

An examination of the influence of landscape character and site features (natural and cultural) on landscape architecture, architecture and planning through application in the studio setting.

Prerequisite: LARC220, LARC265, LARC266, and LARC230.

Corequisite: LARC411 and LARC221.

Restriction: Must be in Landscape Architecture program; and sophomore standing or higher.

Credit Only Granted for: LARC340 or LARC231.

Formerly: LARC340.

LARC240 Graphic Communication and Design Studio (4 Credits)

Exploration of graphic presentation techniques and original concept development for landscape architecture planning and design.

Prerequisite: LARC141 and LARC263.

Corequisite: LARC221 and LARC265.

Restriction: Sophomore standing or higher; and must be in Landscape Architecture program.

LARC263 History of Landscape Architecture (3 Credits)

A survey of landscape architecture history from the ancient Western civilizations to the twentieth century with consideration of parallel developments in the Eastern World, European Africa and the Americas.

LARC265 Site Analysis and Ecological Principles (3 Credits)

Principles and methods of site analysis with an emphasis on the application of ecological principles in landscape architecture, architecture and planning.

Prerequisite: LARC141.

Corequisite: LARC240 and LARC221.

Restriction: Permission of AGNR-Plant Science & Landscape Architecture department; and sophomore standing or higher; and must be in Landscape Architecture program.

Credit Only Granted for: LARC265 or ARCH460.

LARC266 Site and Landscape Ecology Field Studies (1 Credit)

Field Excursions that are essential to apply theory and principles explored in the LARC265 to real world environments.

Prerequisite: Must have completed or be concurrently enrolled in LARC230 or LARC640.

Corequisite: LARC265.

Restriction: Sophomore standing or higher; and must be in Landscape Architecture program.

Additional Information: This course requires field trips.

LARC320 Principles of Site Engineering (3 Credits)

The study and application of landscape construction principles as applied to grading, drainage, site layout, storm water management, and vehicular and pedestrian circulation.

Prerequisite: LARC221.

Corequisite: LARC340.

Restriction: Must be in Landscape Architecture program; and junior standing or higher.

LARC321 Landscape Structures and Materials (3 Credits)

An examination of the use, properties, and detailing of materials used in landscape construction. The use and design of structures in the landscape.

Prerequisite: LARC320; and LARC340.

Restriction: Must be in Landscape Architecture program.

Credit Only Granted for: LARC321 or PLSC321.

LARC330 Urban Design Studio (5 Credits)

The landscape architect's role within the interdisciplinary urban design process, focusing on urban site design issues. Pedestrian friendly site design and the future of sustainable development will be studied.

Prerequisite: LARC411 and LARC231.

Corequisite: LARC412.

Restriction: Junior standing or higher; and must be in Landscape Architecture program.

Credit Only Granted for: LARC330 or LARC440.

Formerly: LARC440.

LARC331 Regional Design and GIS Studio (5 Credits)

An examination of the landscape architect's role within the interdisciplinary regional design field incorporating GIS technologies, spatial modeling, and the regional design process.

Prerequisite: LARC330 and LARC412.

Corequisite: LARC413.

Restriction: Must be in Landscape Architecture program.

Credit Only Granted for: LARC341 or LARC331.

Formerly: LARC341.

LARC388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Prerequisite: Must be in the AGNR Honors Program.

Repeatable to: 6 credits if content differs.

LARC389 Internship in Landscape Architecture (3 Credits)

A supervised internship where students earn credit for work experience related to their career goals. Each student must keep a work log, work on a special project, and produce a report related to this project. An evaluation from the external supervisor of the project is required. Participation requires application to the internship advisor in the preceding semester.

Prerequisite: LARC221; and LARC240; and LARC265.

Restriction: Must be in Landscape Architecture program; and junior standing or higher.

Repeatable to: 6 credits.

LARC398 Seminar (1 Credit)**LARC411 Construction Technology I: Principles of Site Engineering (4 Credits)**

First of three courses in the landscape architecture engineering and construction sequence that focuses on the principles, procedures, and applications of site grading. Included in this subject area are the topics of relief visualization and representation, slope and contour calculations, grading objectives and methodology, structure siting principles, drainage principles, contour manipulation procedures, stormwater management, horizontal and vertical road alignment, and cut-fill calculations.

Corequisite: LARC231 or LARC641.

Restriction: Must be in Landscape Architecture program.

Credit Only Granted for: LARC320, LARC411 or LARC720.

Formerly: LARC320.

LARC412 Construction Technology II: Materials and Structures (4 Credits)

Second of three courses in the landscape architecture engineering and construction sequence focuses on site construction, soil and water-centric Best Design Practices (BDPs). Included in this subject area are the topics of construction operations and earthwork, soil erosion and sediment control, retaining wall, soil and constructed media, shoreline construction, bioretention and planting systems and green roofs

Prerequisite: LARC411.

Corequisite: LARC330 or LARC642.

Restriction: Must be in Landscape Architecture program.

Credit Only Granted for: LARC321, LARC412 or LARC721.

Formerly: LARC321.

LARC413 Construction Technology III: Water Soil-Centric Practices (4 Credits)

Third of three courses in the landscape architecture engineering and construction sequence focuses on site construction, soil and water-centric Best Design Practices (BDPs). Included in this subject area are the topics of construction operations and earthwork, soil erosion and sediment control, retaining wall, soil and constructed media, shoreline construction, bioretention and planting systems and green roofs.

Prerequisite: LARC412.

Restriction: Must be in Landscape Architecture program.

LARC420 Professional Practice (3 Credits)

An introduction to and comparative study of the professional concerns of design firms. Focus on planning, legal, ethical, marketing and management considerations of interdisciplinary practices.

Prerequisite: LARC321.

Restriction: Must be in Landscape Architecture program.

LARC421 Computer-Aided Design and Drafting (CADD): Urban Construction (3 Credits)

This Computer-Aided Design and Drafting (CADD) course applies computer drafting using AutoCAD. It focuses on providing the technical skills for students who are working in built environment professions. Drawing types may include (but not be limited to) site plan drawings, construction detailing, grading plans, site layout plans and sheet layout conventions.

Credit Only Granted for: LARC4890 or LARC421.

Formerly: LARC4890.

LARC430 Community Design Studio (5 Credits)

Studio that emphasizes the integration of critical thinking skills and methodologies introduced throughout the landscape architecture curriculum. Students apply design and analysis methodologies, evaluate alternative solutions, involve community residents and engage in final design development, using the master plan and site design process, report writing, and oral and graphic presentations. Final presentations are open to the university and the community.

Prerequisite: LARC331 and LARC413; and must have completed or be concurrently enrolled in LARC420.

Restriction: Senior standing; and must be in Landscape Architecture program.

LARC440 Urban Design Studio (5 Credits)

The landscape architect's role within the interdisciplinary urban design process, focusing on urban site design issues. Pedestrian friendly site design and the future of sustainable development will be studied.

Prerequisite: LARC321; and LARC340; and LARC341.

Restriction: Must be in Landscape Architecture program.

LARC451 Sustainable Communities (3 Credits)

Explores concepts, strategies and examples of community design which address the needs of a growing population while preserving the environment and its resources.

LARC452 Green Infrastructure and Community Greening (3 Credits)

A critical look and exploration of green infrastructure (GI) elements in the built environment in contributing to ecosystems services and the sustainability of the built environment. The course explores the science, issues, challenges, and the policy, planning and design solutions offered by green infrastructure.

Prerequisite: PLSC110 and PLSC111; or (PLSC112 and PLSC113); or permission of instructor.

Restriction: Junior standing or higher.

Credit Only Granted for: LARC489G or LARC452.

Formerly: LARC489G.

LARC453 Introduction to GIS and Hydrologic Modeling (3 Credits)

Introduction to Geographic Information Systems (GIS) and their application to hydrologic modeling. Basic GIS skills are used to manipulate and analyze spatial data to populate NRCS TR-55 hydrologic model for use in sizing constructed wetlands, bio-retention cells, and minor flood zones. No prior knowledge of GIS or hydrologic modeling is required. Stormwater and erosion control permitting as well as basic design principles for Maryland Environmental Site Design standards are introduced.

LARC454 Principles for Planting Design (3 Credits)

Emphasis will be placed on the analysis of natural systems of the landscape as they relate to visual thinking and to the rigor of the design process. Planting Design will familiarize you with native habitats, reinforce the application of design principles, and assess human response to the built environment in terms of developing a planting scheme. Students will acquire an understanding of and an appreciation for complex, interdependent relationships that exist in a healthy plant community. Students will graphically represent planting plans as communication tools suitable for client and contractor discussion as well as the basic construction documentation process through plant schedules, details, technical specifications, soil analysis, cost estimating, site preparation, and landscape maintenance procedures.

Prerequisite: PLSC253 or equivalent; and LARC220 or LARC620.

Restriction: Permission of Landscape Architecture program; and must be in Landscape Architecture program; or permission of Landscape Architecture program.

Credit Only Granted for: LARC454 or LARC489E.

Formerly: LARC489E.

LARC461 People and the Environment (3 Credits)

Focus is placed on human and environmental interactions. Students will look at both natural and built environments and how they influence human health and well-being. Many environmental settings will be examined. These include hospitals, public housing neighborhoods, school settings, retirement communities, transportation corridors and green spaces. We will also explore how racial and socio-economic factors affect living and working environmental conditions. Ultimately, students will be using this knowledge to create environments that support individuals, families and various community groups' health and well-being.

Credit Only Granted for: LARC489K or LARC461.

Formerly: LARC489K.

LARC470 Landscape Architecture Seminar (3 Credits)

A combination of self-directed study, seminar, and lecture formats. An introduction to aspects of research methods, critical analysis, and proposal writing with a focus on urban and community design.

Prerequisite: LARC321; and LARC341.

Corequisite: LARC440.

Restriction: Senior standing; and must be in Landscape Architecture program.

LARC471 Capstone Praxis Studio (5 Credits)

A capstone experience with projects of varied thematic content that emphasize the integration of critical thinking skills and methodologies introduced throughout the landscape architecture curriculum. Students apply design and analysis methodologies, evaluate alternative solutions, involve community residents and engage in final design development, using the master plan and site design process, report writing, and oral and graphic presentations. Final presentations are open to the university and the community.

Prerequisite: LARC430.

Restriction: Senior standing; and must be in Landscape Architecture program.

LARC489 Special Topics in Landscape Architecture (1-4 Credits)

Credit according to time scheduled and organization of course. A lecture and/or studio course organized as an in-depth study of a selected specialization of landscape architecture not covered by existing courses.

Prerequisite: Permission of AGNR-Plant Science & Landscape Architecture department.

Repeatable to: 4 credits if content differs.

LARC499 Independent Studies in Landscape Architecture (1-4 Credits)

Independent studies in landscape architecture including field, studio or library research under the direction of a faculty member.

Prerequisite: 12 credits in LARC courses; or permission of AGNR-Plant Science & Landscape Architecture department.

Restriction: Must be in Landscape Architecture program; or must be in Plant Sciences program.

Repeatable to: 4 credits if content differs.

LASX - Certificate in Latin American Studies Education Abroad

LASX301 Human Rights and Cultural Representations (3 Credits)

The cultural and human responses to the violence of genocide politics in the Holocaust will serve as an excellent start point to analyze political repression in Latin America (focus on Guatemala, Uruguay, Argentina and Chile). This course discusses not only the impact of trauma, the legacy of memory and the role of the national states during dictatorships in these countries, but also how to make these experiences productive to reconstruct selves and societies.

Additional Information: This course is offered as part of the Maryland-in-Buenos Aires study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/miba. Education Abroad processes registrations for this course on behalf of students.

LATN - Latin

LATN101 Elementary Latin I (4 Credits)

Additional Information: A student who has two units of Latin in high school may register for LATN101 for the purposes of review, but ordinarily not for credit.

LATN102 Elementary Latin II (4 Credits)

Prerequisite: Must have completed LATN101 at University of Maryland, College Park; or permission of ARHU-Classics department.

LATN120 Intensive Latin (4 Credits)

Elements of Latin grammar and vocabulary; elementary reading. The first year's study of Latin compressed into a single semester.

Prerequisite: Permission of ARHU-Classics department.

Restriction: Must not have completed LATN102.

LATN201 Intermediate Latin (4 Credits)

Prerequisite: Must have completed LATN102 at University of Maryland, College Park; or permission of ARHU-Classics department.

Formerly: LATN203.

LATN269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

LATN301 Plautus (3 Credits)

Plautine drama. Literary, linguistic and socio-cultural aspects. Readings are in Latin.

LATN302 Ovid (3 Credits)

Major works of Ovidian poetry. Literary and moral atmosphere of Augustan age. Readings are in Latin.

LATN303 Petronius (3 Credits)

Reading and analysis of Petronius' Satyricon with an emphasis on the literary climate of the Neronian Age and on the emergence of the novel as a literary genre. Readings are in Latin.

LATN304 Cicero and Sallust (3 Credits)

Selected speeches of Cicero and selections from the historian Sallust. Rhetorical, social and political context. Readings are in Latin.

Prerequisite: LATN201; or students who have taken courses with comparable content may contact the department.

LATN351 Horace and Catullus (3 Credits)

Readings are in Latin.

Prerequisite: LATN201; or students who have taken courses with comparable content may contact the department.

LATN369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

LATN386 Experiential Learning (3-6 Credits)

Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

LATN388 Special Topics in Latin Language and Literature (3 Credits)

Readings in Latin at the intermediate level.

Prerequisite: LATN201; or permission of the department.

Repeatable to: 6 credits if content differs.

LATN405 Lucretius (3 Credits)

Readings are in Latin.

LATN410 Latin Historians (3 Credits)

Latin historical writing as a literary genre. Influences, style, and literary techniques. Readings are in Latin.

LATN415 Vergil's Aeneid (3 Credits)

Vergil's Aeneid: readings of selections in Latin and of the entire epic in English translation along with critical essays.

Formerly: LATN305.

LATN472 Historical Development of the Latin Language (3 Credits)

An analysis of the development of the Latin language from archaic times to the Middle Ages.

Credit Only Granted for: LATN472 or LING431.

LATN488 Latin Readings (3 Credits)

The reading of one or more selected Latin authors from antiquity through the Renaissance. Reports.

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

Additional Information: Readings are in Latin.

LATN499 Independent Study in Latin Language and Literature (1-3 Credits)

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

LBSC - Library Science

LBSC208 Special Topics in Information Studies (3 Credits)

Special topics in aspects of information use, technology, and policy.

Repeatable to: 6 credits if content differs.

LBSC386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

LBSC499 Workshops, Clinics, and Institutes (1-9 Credits)

Workshops, clinics, and institutes developed around specific topics or problems. Primarily for practicing librarians.

Repeatable to: 9 credits.

LEAD - Leadership Education and Development

LEAD217 Introduction to Leadership (3 Credits)

Surveys the study and practice of leadership and provides students with a variety of experiences to wrestle with large leadership questions. What is leadership? Who can be a leader? How is leadership an important aspect of understanding self and others? Students will explore and respond to these questions through a variety of leadership theories and models, self-assessments, critical reflection, active-learning, group projects, and research. The course will introduce students to critical theory and critical perspectives of leadership to help students broaden their perspectives on leadership and develop more complex thought and practice of leadership.

Restriction: Freshman standing; or sophomore standing.

Credit Only Granted for: LEAD217 or HESI217.

Formerly: HESI217.

LEAD305 Leadership and Ethics (3 Credits)

Encourages students to explore the ethical demands of leadership. Through the examination of moral and ethical frameworks, students will develop their efficacy in analyzing multiple perspectives, decision-making, and navigating complexity. This course focuses on values-based leadership and one's responsibilities and commitments in the context of leadership for the common good and for purposeful change. The course assists students in identifying and examining ethical leadership as it relates to values, authenticity, context, controversy, and dilemmas.

LEAD315 Leadership in Groups and Organizations (3 Credits)

Assists students in acquiring and integrating leadership knowledge within group and organizational contexts. Individual (self), relational (others), and contextual (context) influences on leadership will be examined using theories and frameworks that will help students learn to navigate complex organizational environments and practice leadership that is process-based and relationship-oriented. Through hands-on activities, personal exploration, and critical analysis of leadership within groups and organizations, students will gain greater insight into the historical, cultural, and environmental elements of leadership.

Prerequisite: LEAD217 or HESI217.

Credit Only Granted for: LEAD315 or HESI315.

Formerly: HESI315.

LEAD320 Social Action Seminar (2 Credits)

The purpose of the Social Action Sequence (LEAD 320 & LEAD 321) is to examine the connections between leadership and social change, and learn how our own leadership knowledge and practice can be used to advance progress toward more just and equitable communities. In LEAD 320 (2-credits), students will have the opportunity to conduct a semester-long project to increase their knowledge and understanding of a social issue of their interest, and design resources and an action plan for engaging in work related to this social issue in their own communities.

Prerequisite: HESI217 or LEAD 217; and HESI315 or LEAD315.

Restriction: Must be in the Leadership Studies Minor or Leadership Studies Certificate program.

Credit Only Granted for: HESI320 or LEAD320.

Formerly: HESI320.

Additional Information: May fulfill a requirement for the Leadership Studies Certificate only if taken sequentially with LEAD321 course.

LEAD321 Advanced Social Action Seminar (1 Credit)

The purpose of the Social Action Sequence (LEAD 320 & LEAD 321) is to examine the connections between leadership and social change, and learn how our own leadership knowledge and practice can be used to advance progress toward more just and equitable communities. Together we will explore socially-responsible approaches to leadership as the groundwork for this sequence. In LEAD 321 (1-credit), students will implement their action plan for regular engagement in their community related to their chosen social issue, practicing leadership approaches and skills to advance social change within their spheres of influence.

Prerequisite: HESI217 or LEAD217; and HESI315 or LEAD315; and HESI320 or LEAD320.

Restriction: Must be in the Leadership Studies Minor or Leadership Studies Certificate program.

Credit Only Granted for: HESI321 or LEAD321.

Formerly: HESI321.

Additional Information: May fulfill a requirement for Leadership Studies Certificate only if taken sequentially with LEAD 320 course.

LEAD417 Leadership Studies Capstone (3 Credits)

As the final academic experience in the Leadership Studies Minor/Certificate, this seminar is designed to be both retrospective and integrative, encouraging you to synthesize relevant concepts and experiences and to formulate your own informed perspective on the implications of leadership. This course will serve as a place to critically think about the field of leadership studies and the implications of leadership in multiple settings for life-long practice. You will be expected to demonstrate skill in analysis of pertinent literature, write with purpose and clarity, facilitate the learning and development of others, and engage in thoughtful group discussion. In this seminar, you will submit scholarly products to demonstrate a mature understanding of your leadership trajectory in past, present and future contexts.

Prerequisite: HESI217 or LEAD217; and HESI315 or LEAD315.

Restriction: Permission of Counseling, Higher Education, and Special Education department required; Restricted to students in Leadership Studies Minor and Certificate only .

Credit Only Granted for: LEAD417 or HESI417.

Formerly: HESI417.

LGBT - Lesbian Gay Bisexual Transgender Studies

LGBT200 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)

An interdisciplinary study of the historical and social contexts of personal, cultural and political aspects of LGBT life. Sources from a variety of fields, such as anthropology, history, psychology, sociology, and women's studies, focusing on writings by and about LGBT people.

Credit Only Granted for: LGBT200.

LGBT264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)

Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word "quare" invites us to do), Quare/Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.

Cross-listed with: AAAS264, WGSS264.

Credit Only Granted for: LGBT264, AASP264, AAAS264, WMST264 or WGSS264.

LGBT265 LGBTQ+ Literatures and Media (3 Credits)

A study of literary and cultural expressions of queer and trans identities, positionalities, and analytics through an exploration of literature, art, and media. We will examine historical and political power relations by considering the intersections of sexuality and gender with race, class, nation, and disability. Topics include the social construction and regulation of sexuality and gender, performance and performativity, intersectionality, and the relationship between aesthetic forms and queer/trans subjectivity. Our interpretations will be informed by queer and trans theories.

Cross-listed with: ENGL265.

Restriction: Must not have completed LGBT265.

Credit Only Granted for: ENGL265 or LGBT265.

LGBT298 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)

Study of particular themes and issues in LGBT studies.

Repeatable to: 9 credits if content differs.

LGBT310 Transgender Studies (3 Credits)

Introduces students to the interdisciplinary field of transgender studies, providing a history of the field and engaging current debates within it. Students will explore the emergence and consolidation of trans identities, practices, cultures, and knowledges across medical, historical, sociological, cultural, and artistic contexts, paying particular attention to dynamics of race, class, and ability, to global and transnational difference, and to the implications of transgender studies for understanding gender and sexuality overall.

Cross-listed with: WGSS310.

Credit Only Granted for: LGBT310, WMST310 or WGSS310.

LGBT327 Lesbian, Gay, Bisexual, and Transgender Film and Video (3 Credits)

Comparative analysis of forms, themes, and the politics of representation in film and video by and/or about LGBT people.

Cross-listed with: ENGL359F.

Restriction: Junior standing or higher.

Credit Only Granted for: LGBT327 or ENGL359F.

LGBT350 LGBTQ+ Public Speaking and Facilitation (3 Credits)

Guides students through oral communication skills around LGBTQ+ topics. The course centers the experiences of minoritized intersectional LGBTQ+ communities, and students will use speaking, presentation, and facilitation skills to educate the UMD community about sexual orientation and gender identity and expression through panel discussions in classes, residence halls, and other university settings. Students who have received training for this purpose enter into these discussions prepared to disseminate accurate information, to answer questions that students, staff, and faculty may have about the realities of LGBTQ+ lives. Students will receive training that is rooted in queer theory and social justice education, building on the prerequisite course LGBT 200.

Prerequisite: LGBT200.

Restriction: Must have permission of LGBT Studies Program.

LGBT359 Special Topics in LGBTQ+ Literatures and Media (3 Credits)

Selected study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.

Cross-listed with: ENGL359.

Repeatable to: 9 credits if content differs.

LGBT386 Lesbian, Gay, Bisexual, and Transgender Community Organization Internship (3-6 Credits)

Supervised internship experience with a community organization that expressly serves lesbian, gay, bisexual, and transgender people. Students will be expected to relate course material to experience in an analysis of an organization's activities.

Prerequisite: 9 credits in LGBT courses.

Restriction: Permission of LGBT Studies Program.

LGBT398 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)

In-depth study of particular themes and issues in LGBT studies.

Prerequisite: LGBT200.

Restriction: Sophomore standing or higher.

Repeatable to: 9 credits if content differs.

LGBT448 Special Topics in Lesbian, Gay, Bisexual, and Transgender Studies (3 Credits)

In-depth study of particular themes and issues in LGBT studies.

Prerequisite: LGBT200; or permission of LGBT Studies Program.

Restriction: Junior standing or higher.

Repeatable to: 9 credits if content differs.

LGBT448W Sex, Gender, and Jewish Identity (3 Credits)

An exploration of Jewish embodiment, including dynamics related to biological sex, culturally-framed gender, and sexuality. Topics of discussion may include transgender and intersex Jews, stereotypes and gender performance, modesty, genetics, and body alteration. Focus is on contemporary Jewish culture, framed within the larger historical and textual tradition.

Prerequisite: 1 course in WGSS; or 1 course in JWST; or 1 course in LGBT; or permission of instructor.

Cross-listed with: JWST492, WGSS492.

Credit Only Granted for: JWST492, JWST409G, LGBT448W, WMST498W or WGSS492.

Formerly: WMST498W and JWST409G.

LGBT459 Selected Topics in Sexuality and Literature (3 Credits)

Detailed study of sexuality as an aspect of literary and cultural expression.

Prerequisite: Must have completed two lower-level English courses, at least one in literature.

Repeatable to: 9 credits if content differs.

LGBT488 Seminar in Lesbian, Gay, Bisexual, and Transgender Studies (1-3 Credits)

Developments in theories and methods of LGBT Studies, with emphasis upon interaction between the humanities and the social sciences in the elaboration of this interdisciplinary area of scholarship.

Prerequisite: 9 credits in LGBT courses; and permission of LGBT Studies Program.

Recommended: LGBT200. And ENGL265; or CMLT291.

Repeatable to: 9 credits if content differs.

Formerly: CMLT498Y.

LGBT499 Independent Study (1-3 Credits)

Directed research and analysis in LGBT Studies on a topic selected by the student.

Prerequisite: LGBT200; and permission of LGBT Studies Program.

Restriction: Senior standing.

Repeatable to: 6 credits if content differs.

LGBX - Lesbian Gay Bisexual Transgender Studies Education Abroad

LGBX200 Gender, Equality, and Sexuality in Scandinavia (3 Credits)

Sweden is one of the most gender equal countries in the world and is well-known for its progressive culture supported by forward-thinking laws and legislation. This course explores how concepts of gender, body, sexuality and race intersect in current debates about changing family structures, children's rights, and new ethical dilemmas in a changing Scandinavia.

Cross-listed with: WMSX200.

Credit Only Granted for: WMSX200 or LGBX200.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

LGBX201 Sex Education and Sexual Reform in Europe (3 Credits)

Provides insight to the ways in which sexual reform and sex education has shaped not only the history of sexuality in Europe, but also the very core of the various national identities. We will look into the different movements, campaigns, policies, and public debates regarding sexuality. We will discover the ways in which sex and sexuality are conveyed in sexual education aimed at children and youth by reading and watching examples of sex educational material.

Cross-listed with: WMSX201.

Credit Only Granted for: WMSX201 or LGBX201.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

LGBX202 Transgender in Scandinavia (3 Credits)

This course explores the history of trans activism with a special focus on Sweden, and how legislative and medical discourses change how we think about gender identities and rights. We also explore topics such as transphobia, gender disclosure and HIV criminalization laws, reproductive rights, gender-neutral pronouns, transgender children and their families, and how race and class intersect with being trans.

Cross-listed with: WMSX202.

Credit Only Granted for: WMSX202 or LGBX202.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

LING - Linguistics

LING200 Introductory Linguistics (3 Credits)

An exploration of the nature of human language. Introduction to the basic concepts and methodology of modern linguistic analysis (sound systems, word formation, sentence structure). Examination of the factors that contribute to dialect differences and the social implications of language variation. Additional topics may include: semantics, pragmatics, language change, writing systems, typology, language universals, comparison with other communication systems.

Credit Only Granted for: HESP120 or LING200.

Additional Information: This course serves as the prerequisite for further courses in linguistics.

LING240 Language and Mind (3 Credits)

The study of language as a cognitive phenomenon. Ways of representing people's knowledge of their native language, ways in which that knowledge is attained naturally by children, and how it is used in speaking and listening. Additional topics may include: animal communication, language and the brain, language and thought.

Prerequisite: Minimum grade of C- in LING200.

Additional Information: Required for Linguistics majors and recommended for students in related fields.

LING248 Introduction to Laboratory Research in Linguistics (2-3 Credits)

Individualized, collaborative research course aimed at developing skills for laboratory research in language acquisition, sentence processing or neurolinguistics. Learning to conduct research in laboratory linguistics as part of a research team that will create original research in the field.

Recommended: LING200 or LING240.

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

Additional Information: A two-semester commitment is required, i.e. Ling248 is followed by Ling448.

LING260 Meaning through Language: Why are we so good at it? (3 Credits)

What is it about us humans and our languages that allows us to communicate in ways unmatched by other animals or powerful AI models? The question is ancient, but recent decades have seen great progress in the cognitive science of language, while expanding the diversity of languages investigated. We know much more about how languages vary, how they develop in children, how they are encoded in the mind, and relate to other domains of cognition. Major developments in statistical computation and research on animal cognition also illuminate what is (not) possible without the particular structure of the human mind. We bring this all to bear on our Big Question: What makes human language special from the viewpoint of meaning? Students will come to understand the major features of language as a vehicle for complex thought and a tool for communication. They will use this understanding in analyzing common semantic patterns and everyday conversational dynamics.

LING262 HERITAGE LANGUAGES AND THEIR SPEAKERS (3 Credits)

An interdisciplinary examination of the phenomenon of heritage language (a bilingual's home language which is distinct from the dominant language of the wider society). Relationship between linguistic structure, cultural and social aspects of language use, and language change. Interpretations of experimental and theoretical work. Relevance of heritage languages for linguistic theory, language policy, and education. **Additional Information:** One class per week will be in-field instruction in collecting data from heritage speakers.

LING269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

LING272 Biophysics of Language (3 Credits)

Examines the nature of mental representation of language in the physiology of the mind/brain, how it evolved, how it emerges in learners' minds, and how it decays through injury and illness. Insights from linguistics, cognitive psychology, neuroscience, animal behavior, molecular biology, and biophysics are brought to bear on how an abstract systematic behavior can arise within an animal brain.

LING311 Syntax I (3 Credits)

Basic concepts, analytical techniques of generative syntax, relation to empirical limits imposed by viewing grammars as representations of a component of human mind. Aspects of current theories.

Prerequisite: LING240.

LING312 Syntax II (3 Credits)

Continuation of LING311. Development of theories of syntax. Criteria for revising theories. Methods and strategies of scientific efforts to explain natural phenomena.

Prerequisite: LING311.

LING320 Phonetics (3 Credits)

Representations and models of acoustic and articulatory phonetics. Develops concepts and skills for description, measurement and scientific analysis of the sound systems of human languages, including various varieties of English.

Prerequisite: Minimum grade of C- in LING200 or LING240.

Additional Information: This course counts as a core course for the linguistics major. Only one of Ling320 or HESP403 can be used to count towards the Linguistics major.

LING321 Phonology I (3 Credits)

Properties of sound systems of human languages, basic concepts and analytical techniques of generative phonology. Empirical limits imposed by viewing grammars as cognitive representations. Physiological properties and phonological systems; articulatory phonetics and distinctive feature theory.

Prerequisite: LING240.

LING322 Phonology II (3 Credits)

Continuation of LING321. Further investigation of phonological phenomena and phonological theory. Revising and elaborating the theory of the phonological representation; interaction of phonology and morphology.

Prerequisite: LING321.

LING330 Historical Linguistics (3 Credits)

A traditional presentation of language change. Language types and families, sounds and writing systems, grammatical categories. Reconstruction of proto-languages by internal and comparative methods.

Prerequisite: LING321.

Recommended: LING311.

LING350 Philosophy of Language (3 Credits)

The nature and function of language and other forms of symbolism from a philosophical perspective.

Prerequisite: LING311; or 2 courses in PHIL and (PHIL170 or PHIL370); or permission of ARHU-Philosophy department.

Cross-listed with: PHIL360.

Credit Only Granted for: LING350 or PHIL360.

LING369 Special Topics in Study Abroad (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

LING386 Experiential Learning (3-6 Credits)

Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

LING410 Grammar and Meaning (3 Credits)

The basic notions of semantic theory: reference, quantification, scope relations, compositionality, thematic relations, tense and time, etc. The role these notions play in grammars of natural languages. Properties of logical form and relationship with syntax.

Prerequisite: Permission of instructor; or LING311.

LING419 Topics in Syntax (3 Credits)

Topics vary.

Prerequisite: LING311.

Repeatable to: 12 credits if content differs.

LING420 Word Formation (3 Credits)

Examination of shape and meaning of possible words, both across languages and within particular languages. Interaction between principles of word formation and other components of a grammar: syntax, logical form and phonology.

Prerequisite: LING321 and LING311.

LING429 Topics in Phonology (3 Credits)

Advanced seminar in phonology. Topics vary.

Prerequisite: LING322.

Repeatable to: 6 credits if content differs.

LING439 Topics in Diachronic Linguistics (3 Credits)

Repeatable to: 6 credits if content differs.

LING440 Grammars and Cognition (3 Credits)

Relationship between the structure, development and functioning of grammars and the structure, development and functioning of other mental systems. Interpretations of experimental and observational work on children's language, aphasia, speech production and comprehension.

Prerequisite: LING321 and LING311.

LING444 Child Language Acquisition (3 Credits)

Examines language acquisition in infancy and early childhood: the nature of children's linguistic representations and how these develop naturally. Role of (possible) innate linguistic structure and interaction of such structure with experience. Evaluation of methods and results of current and classic research leading to contemporary models of language development.

Prerequisite: LING311.

LING448 Advanced Laboratory Research in Linguistics (2-3 Credits)

Individualized, collaborative research course aimed at developing skills for laboratory research in language acquisition, sentence processing or neurolinguistics. Conducting a research project in laboratory linguistics as part of a team creating original research relevant to current issues in linguistics.

Prerequisite: LING248; and (LING200 or LING240).

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

Additional Information: This course is part of a two-semester sequence. Ling248 is a prerequisite. Ling248 and Ling448 must be completed in the same laboratory.

LING449 Topics in Psycholinguistics (3 Credits)

Critical evaluation of primary research in psycholinguistics. Relating theoretical hypotheses to experimental hypotheses and predictions. Evaluation of experimental results. Emphasis on hands-on experience and experimental methodologies. Specific topics vary.

Prerequisite: LING321 and LING311; or permission of ARHU-Linguistics department.

Repeatable to: 6 credits if content differs.

LING451 Grammars and Variation (3 Credits)

Grammars and the use of language in a variety of styles: formal, casual, literary, etc. Consequences for concepts of grammars. Variation theory. Literary styles.

Prerequisite: LING311.

LING460 Diversity and Unity in Human Languages (3 Credits)

Fundamentals of grammatical typology as they relate to issues in social attitudes towards language. Linguistic structure of standard and non-standard languages and dialects. Relationship of different writing systems to linguistic structure. Issues in bilingualism and multilingualism.

Prerequisite: LING240 or LING200.

LING499 Directed Studies in Linguistics (1-3 Credits)

Independent study or research on language under the supervision of a faculty member.

Prerequisite: Permission of ARHU-Linguistics department.

Repeatable to: 6 credits if content differs.

MATH - Mathematics

MATH107 Introduction to Math Modeling and Probability (3 Credits)

A goal is to convey the power of mathematics as shown by a variety of problems which can be modeled and solved by quantitative means.

Also included is an introduction to probability. Topics include data analysis, equations, systems of equations, inequalities, elementary linear programming, Venn diagrams, counting, basic probability, permutations, combinations, tree diagrams, standard normal and normal distributions. The mathematics of finance is covered. The course includes problem solving and decision making in economics, management, and social sciences.

Prerequisite: Must have math eligibility of MATH107 or higher; and math eligibility is based on Math Placement Exam or successful completion of MATH003 with appropriate eligibility.

Restriction: Not open to students majoring in mathematics, engineering, business, life sciences, and the physical sciences; must not have completed STAT100, MATH113, MATH120, MATH135, MATH136 or MATH140 with a C- or better; must not have completed any MATH or STAT course with a prerequisite of MATH120, MATH136, or MATH140.

Formerly: MATH110 and MATH111.

MATH113 College Algebra and Trigonometry (3 Credits)

Topics include elementary functions including graphs and applications of: polynomial, rational, exponential, and logarithmic functions. Systems of equations and applications. Trigonometric functions: angle and radian measure, graphs and applications.

Prerequisite: Must have math eligibility of MATH113 or higher; and math eligibility is based on the Math Placement Exam or the successful completion of MATH 003 with appropriate eligibility.

Restriction: Must not have completed MATH115, MATH120, MATH135, MATH136 or MATH140 with a grade of C- or higher; and must not have completed any course with a prerequisite of MATH120, MATH130, MATH136, or MATH140.

MATH115 Precalculus (3 Credits)

Preparation for MATH120, MATH135 or MATH140. Elementary functions and graphs: polynomials, rational functions, exponential and logarithmic functions, trigonometric functions. Algebraic techniques preparatory for calculus.

Prerequisite: Must have math eligibility of MATH115 or higher; and math eligibility is based on the Math Placement Exam or the successful completion of MATH003 with appropriate eligibility. Or MATH113.

Restriction: Must not have completed MATH140 with a grade of C- or better; and must not have completed any MATH or STAT course with a prerequisite of MATH140 or MATH141.

MATH120 Elementary Calculus I (3 Credits)

Basic ideas of differential and integral calculus, with emphasis on elementary techniques of differentiation and applications.

Prerequisite: 1 course with a minimum grade of C- from (MATH113, MATH115). Or must have math eligibility of MATH120 or higher; and math eligibility is based on the Math Placement Test.

Restriction: Not open to students majoring in mathematics, engineering, the biological sciences, biochemistry, chemistry, or the physical sciences; Must not have completed MATH130, MATH136 or MATH140 with a grade of C- or higher.

Formerly: MATH220.

MATH121 Elementary Calculus II (3 Credits)

Trigonometric functions, techniques of integration, infinite series, differential equations, probability.

Prerequisite: MATH120, MATH130, MATH136, or MATH140.

Restriction: Not open to students majoring in mathematics, engineering, the biological sciences, biochemistry, chemistry, or the physical sciences; Must not have completed MATH141 with a grade of C- or higher.

Formerly: MATH221.

MATH130 Calculus I for the Life Sciences (4 Credits)

Basic ideas of differential integral calculus, with emphasis on elementary techniques and applications to the life sciences.

Prerequisite: Minimum grade of C- in MATH115.

Restriction: Must be in a major in CMNS-Biological Sciences UG Program; and not open to students majoring in mathematics, engineering, or the physical sciences.

Credit Only Granted for: MATH120, MATH130, MATH220, or MATH140.

MATH135 Discrete Mathematics for Life Sciences (4 Credits)

Basic discrete mathematics, with emphasis on relevant models and techniques to the life sciences.

Prerequisite: Minimum grade of C- in MATH113 or MATH115; or must have math eligibility of MATH120 or higher; and math eligibility is based on the Math Placement Test.

Restriction: Must be in the Biological Sciences or Neuroscience major; and not open to students majoring in mathematics, engineering, or the physical sciences.

MATH136 Calculus for Life Sciences (4 Credits)

Continuation of MATH135, including basic ideas of differential and integral calculus, with emphasis on elementary techniques and applications to the life sciences.

Prerequisite: Minimum grade of C- in MATH135.

Restriction: Must be in the Biological Sciences or Neuroscience major; Must not have completed MATH140 with a grade of C- or higher.

MATH140 Calculus I (4 Credits)

Introduction to calculus, including functions, limits, continuity, derivatives and applications of the derivative, sketching of graphs of functions, definite and indefinite integrals, and calculation of area. The course is especially recommended for science, engineering and mathematics majors.

Prerequisite: Minimum grade of C- in MATH115.

MATH141 Calculus II (4 Credits)

Continuation of MATH140, including techniques of integration, improper integrals, applications of integration (such as volumes, work, arc length, moments), inverse functions, exponential and logarithmic functions, sequences and series.

Prerequisite: Minimum grade of C- in MATH140.

MATH199 Special Topics in Mathematics (3 Credits)

Many games have a mathematical component. We will introduce several games, play them, and investigate the underlying mathematics. Students will work in teams on projects that involve developing strategies for new games.

Prerequisite: Permission of CMNS-Mathematics department.

MATH206 Introduction to Matlab (1 Credit)

This course is intended to prepare students for subsequent courses requiring computation with MATLAB. Covers basics of MATLAB including simple commands, variables, solving equations, graphing differentiation and integration, matrices and vectors, functions, M-files and fundamentals of programming in the MATLAB environment. When offered in Winter and Summer terms, the course is offered in a format suitable for online distance learning.

Prerequisite: 1 course with a minimum grade of C- from (MATH136, MATH140).

MATH212 Elements of Numbers and Operations (3 Credits)

Reviews and extends topics of arithmetic and number theory related to the elementary school curriculum, particularly number systems and operations with natural numbers, integers, and rationals.

Prerequisite: Must have completed one year of college preparatory algebra.

Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).

MATH213 Elements of Geometry and Measurement (3 Credits)

Properties of geometric objects in two and three dimensions; parallel lines, curves and polygons; ratio, proportion, similarity; transformational geometry and measurement, constructions, justifications and proofs.

Prerequisite: MATH212.

Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).

MATH214 Elements of Probability and Statistics (3 Credits)

Permutations and combinations; probability; collecting and representing data; using statistics to analyze and interpret data.

Prerequisite: MATH212.

Restriction: Must be in one of the following programs (Early Childhood Education; Special Education; Elementary Education).

MATH240 Introduction to Linear Algebra (4 Credits)

Basic concepts of linear algebra: vector spaces, applications to line and plane geometry, linear equations and matrices, similar matrices, linear transformations, eigenvalues, determinants and quadratic forms.

Prerequisite: 1 course with a minimum grade of C- from (MATH131, MATH141).

Credit Only Granted for: MATH240, MATH341, or MATH461.

MATH241 Calculus III (4 Credits)

Introduction to multivariable calculus, including vectors and vector-valued functions, partial derivatives and applications of partial derivatives (such as tangent planes and Lagrange multipliers), multiple integrals, volume, surface area, and the classical theorems of Green, Stokes and Gauss.

Prerequisite: Minimum grade of C- in MATH141.

Credit Only Granted for: MATH241 or MATH340.

MATH243 Introduction to Linear Algebra and Differential Equations (4 Credits)

The basics of linear algebra and differential equations, with an emphasis on general physical and engineering applications. Aimed at students who need the material for future coursework but do not need as much depth and rigor as provided by MATH240 and MATH246.

Prerequisite: Minimum grade of C- in MATH141.

Credit Only Granted for: ENEE290 or MATH243.

Additional Information: Does not satisfy requirements for the Mathematics or Computer Science major. Does not satisfy prerequisite requirements for courses requiring MATH240 or MATH246.

MATH246 Differential Equations for Scientists and Engineers (3 Credits)

An introduction to the basic methods of solving ordinary differential equations. Equations of first and second order, linear differential equations, Laplace transforms, numerical methods and the qualitative theory of differential equations.

Prerequisite: Minimum grade of C- in MATH141.

Credit Only Granted for: MATH246 or MATH341.

MATH274 History of Mathematics (3 Credits)

An overview of aspects in the history of mathematics from its beginning in the concrete problem solving of ancient times through the development of abstraction in the 19th and 20th centuries. The course considers both mathematical ideas and the context in which they developed in various civilizations around the world.

Prerequisite: MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.

MATH299 Selected Topics in Mathematics (1-3 Credits)

Topics of special interest under the general guidance of the departmental committee on undergraduate studies.

Prerequisite: Permission of CMNS-Mathematics department.

MATH310 Introduction to Mathematical Proof (3 Credits)

To develop the students' ability to construct a rigorous proof of a mathematical claim. Students will also be made aware of mathematical results that are of interest to those wishing to analyze a particular mathematical model. Topics will be drawn from logic, set theory, structure of the number line, elementary topology, metric spaces, functions, sequences and continuity.

Prerequisite: Minimum grade of C- in MATH141; and must have completed or be concurrently enrolled in MATH240, MATH341, or MATH461; and must have completed or be concurrently enrolled in MATH241 or MATH340.

Restriction: Must be in a major within the CMNS-Mathematics department; or permission of the CMNS-Mathematics department.

Additional Information: Math majors may not use this course to satisfy an upper-level requirement.

MATH312 Mathematical Reasoning and Proof for Pre-Service Middle School Teachers (3 Credits)

Reasoning and proof as addressed in the middle school curriculum.

Topics include proportional reasoning, logic and proof, types of numbers, field axioms, Euclidean and non-Euclidean geometry.

Prerequisite: MATH212 and MATH213.

Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).

MATH314 Introduction to Probability, Data, Analysis and Statistics for Preservice Middle School Teachers (3 Credits)

Analysis of bivariate data, probability and randomness, law of large numbers, central limit theorem, probabilities for independent and dependent events, counting techniques, random variables and probability distributions, expected values, sampling distributions, and confidence intervals.

Prerequisite: MATH214.

Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).

Credit Only Granted for: MATH314 or STAT100.

MATH315 Algebra for Preservice Middle School Teachers (3 Credits)

Algebraic concepts and techniques developed in the middle grades, with their larger mathematical context. Equations, inequalities and functions (linear, polynomial, exponential, logarithmic), with multiple representations of relationships. Common misconceptions of beginning algebra students.

Prerequisite: MATH212.

Restriction: Must be in one of the following programs (Elementary Education; Special Education; Middle School Education).

Credit Only Granted for: MATH113 or MATH315.

MATH340 Multivariable Calculus, Linear Algebra and Differential Equations I (Honors) (4 Credits)

First semester of the MATH340-341 sequence which gives a unified and enriched treatment of multivariable calculus, linear algebra and ordinary differential equations, with supplementary material from subjects such as differential geometry, Fourier series and calculus of variations. Students completing MATH340-341 will have covered the material of MATH240, MATH241, and MATH246, and may not also receive credit for MATH240, MATH241 or MATH246.

Prerequisite: MATH141 and MATH140; and permission of CMNS-Mathematics department; and permission will be granted only to incoming freshmen.

Credit Only Granted for: MATH241 or MATH340.

MATH341 Multivariable Calculus, Linear Algebra, Differential Equations II (Honors) (4 Credits)

A continuation of MATH340.

Prerequisite: Minimum grade of C- in MATH340.

Restriction: Open to second semester Freshmen only.

Credit Only Granted for: MATH240, MATH246, MATH341 or MATH461.

MATH386 Experiential Learning (3-6 Credits)

Prerequisite: Must have learning proposal approved by the CMNS Mathematics Department.

MATH401 Applications of Linear Algebra (3 Credits)

Various applications of linear algebra: theory of finite games, linear programming, matrix methods as applied to finite Markov chains, random walk, incidence matrices, graphs and directed graphs, networks and transportation problems.

Prerequisite: 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341).

MATH402 Algebraic Structures (3 Credits)

For students having only limited experience with rigorous mathematical proofs. Parallels MATH403. Students planning graduate work in mathematics should take MATH403. Groups, rings, integral domains and fields, detailed study of several groups; properties of integers and polynomials. Emphasis is on the origin of the mathematical ideas studied and the logical structure of the subject.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Restriction: Must not be in any of the following programs (Mathematics (Master's); Mathematics (Doctoral)).

Credit Only Granted for: MATH402 or MATH403.

MATH403 Introduction to Abstract Algebra (3 Credits)

Integers; groups, rings, integral domains, fields.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH340); and 1 course with a minimum grade of C- from (MATH341, MATH241); and minimum grade of C- in MATH310. Or

students who have taken courses with comparable content may contact the department.

Credit Only Granted for: MATH402 or MATH403.

MATH404 Field Theory (3 Credits)

Algebraic and transcendental elements, Galois theory, constructions with straight-edge and compass, solutions of equations of low degrees, insolubility of the quintic equation, Sylow theorems, fundamental theorem of finite Abelian groups.

Prerequisite: Minimum grade of C- in MATH403.

MATH405 Linear Algebra (3 Credits)

An abstract treatment of finite dimensional vector spaces. Linear transformations and their invariants.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and minimum grade of C- in MATH310.

MATH406 Introduction to Number Theory (3 Credits)

Integers, divisibility, prime numbers, unique factorization, congruences, quadratic reciprocity, Diophantine equations and arithmetic functions.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH241, MATH246, MATH340, MATH341, MATH461); or permission of CMNS-Mathematics department.

MATH410 Advanced Calculus I (3 Credits)

Subjects covered: sequences and series of numbers, continuity and differentiability of real-valued functions of one variable, the Riemann integral, sequences of functions and power series.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241); and minimum grade of C- in MATH310.

MATH411 Advanced Calculus II (3 Credits)

Continuation of MATH410. Topics include: The topology of sets in \mathbb{R}^n , the derivative matrix, the general chain rule, inverse and implicit function theorems with applications, smooth curves and surfaces in \mathbb{R}^3 , Lagrange multipliers. Additional topics may include: Metric spaces, the contraction principle, the existence and uniqueness theorem for nonlinear first order differential equations, the Riemann integral of \mathbb{R}^n , introduction to integration on curves and surfaces, Green's theorem.

Prerequisite: Minimum grade of C- in MATH410; and permission of CMNS-Mathematics department.

MATH416 Applied Harmonic Analysis: An Introduction to Signal Processing (3 Credits)

Introduces students to the mathematical concepts arising in signal analysis from the applied harmonic analysis point of view. Topics include applied linear algebra, Fourier series, discrete Fourier transform, Fourier transform, Shannon Sampling Theorem, wavelet bases, multiresolution analysis, and discrete wavelet transform.

Prerequisite: Minimum grade of C- in MATH141; and 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and familiarity with MATLAB is required.

MATH420 Mathematical Modeling (3 Credits)

The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and 1 course with a minimum grade C- from (STAT400, STAT410); and 1 course with a minimum grade C- from (CMSC106, CMSC131).

Cross-listed with: AMSC420.

Credit Only Granted for: AMSC420 or MATH420.

MATH423 Linear Optimization (3 Credits)

Mathematical formulation of linear programming, graphical solutions, simplex method, duality, transportation problems, assignment problems, and game theory.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH401, MATH461, or MATH341).

Credit Only Granted for: MATH423 or MATH498T.

Formerly: MATH498T.

MATH424 Introduction to the Mathematics of Finance (3 Credits)

Introduction to the mathematical models used in finance and economics with emphasis on pricing derivative instruments. Designed for students in mathematics, computer science, engineering, finance and physics. Financial markets and instruments; elements from basic probability theory; interest rates and present value analysis; normal distribution of stock returns; option pricing; arbitrage pricing theory; the multiperiod binomial model; the Black-Scholes option pricing formula; proof of the Black-Scholes option pricing formula and applications; trading and hedging of options; Delta hedging; utility functions and portfolio theory; elementary stochastic calculus; Ito's Lemma; the Black-Scholes equation and its conversion to the heat equation.

Prerequisite: Minimum grade of C- in MATH141; and 1 course with a minimum grade of C- from (STAT400, STAT410); and permission of CMNS-Mathematics department.

Recommended: MATH246, MATH240, MATH241, MATH340, or MATH341.

Credit Only Granted for: BMGT444, MATH424.

MATH430 Euclidean and Non-Euclidean Geometries (3 Credits)

Hilbert's axioms for Euclidean geometry. Neutral geometry: the consistency of the hyperbolic parallel postulate and the inconsistency of the elliptic parallel postulate with neutral geometry. Models of hyperbolic geometry. Existence and properties of isometries.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

MATH431 Geometry for Computer Applications (3 Credits)

Topics from projective geometry and transformation geometry, emphasizing the two-dimensional representation of three-dimensional objects and objects moving about in the plane and space. The emphasis will be on formulas and algorithms of immediate use in computer graphics.

Prerequisite: 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341).

MATH432 Introduction to Topology (3 Credits)

Metric spaces, topological spaces, connectedness, compactness (including Heine-Borel and Bolzano-Weierstrass theorems), Cantor sets, continuous maps and homeomorphisms, fundamental group (homotopy, covering spaces, the fundamental theorem of algebra, Brouwer fixed point theorem), surfaces (e.g., Euler characteristic, the index of a vector field, hairy sphere theorem), elements of combinatorial topology (graphs and trees, planarity, coloring problems).

Prerequisite: Minimum grade of C- in MATH410.

MATH436 Differential Geometry of Curves and Surfaces I (3 Credits)

Curves in the plane and Euclidean space, moving frames, surfaces in Euclidean space, orientability of surfaces; Gaussian and mean curvatures; surfaces of revolution, ruled surfaces, minimal surfaces, special curves on surfaces, "Theorema Egregium"; the intrinsic geometry of surfaces.

Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH461, MATH240, MATH341); and must have completed two 400-level MATH courses with a minimum grade of C- (not including MATH461, and 480's).

MATH437 Differential Forms (3 Credits)

Introduction to differential forms and their applications, and unites the fundamental theorems of multivariable calculus in a general Stokes Theorem that is valid in great generality. It develops this theory and technique to perform calculations in analysis and geometry. Topics include an introduction to topological spaces, the Gauss-Bonnet Theorem, Gauss's formula for the linking number, and the Cauchy Integral Theorem. Applications include Maxwell's equations of electromagnetism, connections and gauge theory, and symplectic geometry and Hamiltonian dynamics.

Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Recommended: MATH405, MATH403, MATH436, MATH410, or MATH432.

MATH445 Elementary Mathematical Logic (3 Credits)

Elementary development of propositional and predicate logic, including semantics and deductive systems and with a discussion of completeness, incompleteness and the decision problem.

Prerequisite: Minimum grade of C- in MATH141.

MATH446 Axiomatic Set Theory (3 Credits)

Development of a system of axiomatic set theory, choice principles, induction principles, ordinal arithmetic including discussion of cancellation laws, divisibility, canonical expansions, cardinal arithmetic including connections with the axiom of choice, Hartog's theorem, König's theorem, properties of regular, singular and inaccessible cardinals.

Prerequisite: 1 course with a minimum grade of C- from (MATH403, MATH410).

MATH452 Introduction to Dynamics and Chaos (3 Credits)

An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.

Prerequisite: MATH341; or MATH246 and one of (MATH240 or MATH461).

Cross-listed with: AMSC452.

Credit Only Granted for: AMSC452 or MATH452.

MATH456 Cryptography (3 Credits)

The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.

Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor.

Cross-listed with: CMSC456, ENEE456.

Credit Only Granted for: MATH456, CMSC456 or ENEE456.

MATH461 Linear Algebra for Scientists and Engineers (3 Credits)

Basic concepts of linear algebra. This course is similar to MATH240, but with more extensive coverage of the topics needed in applied linear algebra: change of basis, complex eigenvalues, diagonalization, the Jordan canonical form.

Prerequisite: Minimum grade of C- in MATH141; and must have completed a MATH or STAT course with a prerequisite of MATH141.

Credit Only Granted for: MATH240, MATH341, or MATH461.

Additional Information: This course may not be used towards the upper level math requirements for MATH/STAT majors.

MATH462 Partial Differential Equations (3 Credits)

Linear spaces and operators, orthogonality, Sturm-Liouville problems and eigenfunction expansions for ordinary differential equations. Introduction to partial differential equations, including the heat equation, wave equation and Laplace's equation. Boundary value problems, initial value problems and initial-boundary value problems.

Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341).

MATH463 Complex Variables (3 Credits)

The algebra of complex numbers, analytic functions, mapping properties of the elementary functions. Cauchy integral formula. Theory of residues and application to evaluation of integrals. Conformal mapping.

Prerequisite: 1 course with a minimum grade of C- from (MATH241, MATH340).

MATH464 Transform Methods (3 Credits)

Fourier transform, Fourier series, discrete fast Fourier transform (DFT and FFT). Laplace transform. Poisson summations, and sampling. Optional Topics: Distributions and operational calculus, PDEs, Wavelet transform, Radon transform and applications such as Imaging, Speech Processing, PDEs of Mathematical Physics, Communications, Inverse Problems.

Prerequisite: 1 course with a minimum grade of C- from (MATH246, MATH341).

MATH470 Mathematics for Secondary Education (3 Credits)

An advanced perspective on some of the core mathematics underlying high school mathematics courses. Topics include number systems, functions of one variable, equations, inequalities, trigonometric functions, curve fitting, and polynomials. The course includes an analysis of alternate approaches to mathematical ideas and problems, and makes connections between ideas that may have been studied separately in different high school and college courses.

Prerequisite: MATH141 and MATH140; and must have completed one 400-level MATH course (not to include MATH461, 478, and 480's).

Restriction: Must be in the Secondary Math Education major.

MATH475 Combinatorics and Graph Theory (3 Credits)

General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and permission of CMNS-Mathematics department. Cross-listed with CMSC475.

Credit Only Granted for: MATH475 or CMSC475.

MATH478 Selected Topics For Teachers of Mathematics (1-3 Credits)

Prerequisite: Permission of CMNS-Mathematics department.

Additional Information: Math majors may not use this course to fulfill the upper-level math requirement.

MATH480 Algebra for Middle School Teachers (3 Credits)

Prepares teachers with elementary certification to teach Algebra 1 in middle school. Focuses on basic algebra concepts and related theoretical ideas.

Prerequisite: MATH214.

Restriction: Must be a middle school teacher; and permission of CMNS-Mathematics department.

Credit Only Granted for: MATH480 or MATH483.

Additional Information: Not applicable to MATH/STAT major or minor requirements.

MATH481 Statistics and Data Analysis for Middle School Teachers (3 Credits)

Prepares teachers with elementary certification to teach simple data analysis and probability in middle school. Focuses on understanding basic statistics, data analysis, and related theoretical ideas.

Prerequisite: MATH214.

Restriction: Must be a middle school teacher; and permission of CMNS-Mathematics department.

Credit Only Granted for: MATH481 or MATH485.

Additional Information: Not applicable to MATH/STAT major or minor requirements.

MATH484 Geometry for High School Teachers (3 Credits)

Focuses on concepts related to geometry, including several geometry axiom schemes, transformations, and similarity. Includes constructions with Geometer's Sketchpad.

Prerequisite: MATH141; or students who have taken courses with comparable content may contact the department.

Restriction: Senior standing.

Credit Only Granted for: MATH482, MATH484, or MATH498E.

Formerly: MATH498E.

MATH487 Number for Middle Grades Teachers (3 Credits)

The rational number and proportional reasoning concepts developed in the middle grades and the larger mathematical context for these. Multiple representations of relationships, including verbal descriptions, diagrams, tables, graphs, and equations. Common misconceptions.

Prerequisite: Must have admission to M.A. or M.Ed. with concentration in Mathematics Education; or permission of CMNS-Mathematics department.

Restriction: This course may not be used towards the upper level math requirements for the MATH/STAT major.

Credit Only Granted for: MATH487 or MATH498K.

Formerly: MATH498K.

MATH489 Research Interactions in Mathematics (1-3 Credits)

Students participate in a vertically integrated (undergraduate, graduate and/or postdoctoral, faculty) mathematics research group. Format varies. Students and supervising faculty will agree to a contract which must be approved by the department. Up to three credits of MATH489 may be applied to the mathematics degree requirements. See the department's MATH489 online syllabus for further information.

Prerequisite: Permission of CMNS-Mathematics department.

Repeatable to: 10 credits if content differs.

MATH498 Selected Topics in Mathematics (1-9 Credits)

Topics of special interest to advanced undergraduate students will be offered occasionally under the general guidance of the departmental committee on undergraduate studies.

Repeatable to: 9 credits if content differs.

MEES - Marine-Estuarine-Environmental Sciences

MEES432 Physiological Ecology of Animals (3 Credits)

An examination of the influence of environmental constraints on animal function and energetic efficiency in the context of abiotic conditions in the habitats occupied by individuals.

Prerequisite: BSCI361; or students who have taken courses with comparable content may contact the department; or permission of instructor.

Credit Only Granted for: MEES498E, MEES698E, MEES432, or MEES632.

Formerly: MEES498E.

MEES498 Topics in Marine-Estuarine-Environmental Sciences (1-4 Credits)

Lecture and/or laboratory series organized to study a selected area of marine-estuarine-environmental sciences not otherwise considered in formal courses.

MIEH - Maryland Institute for Applied Environmental Health

MIEH240 Global Health Projects: Addressing Health Needs with a focus on Reciprocity and Relationships (3 Credits)

Explore the needs of global communities, design interventions, and reflect on the potential outcomes in improving health in the communities served, while also focusing on students' own subjective experiences. Students will explore their roles as learners and the role of community members as local experts.

MIEH300 A Public Health Perspective: Introduction to Environmental Health (3 Credits)

Environmental health is that branch of public health that deals with the human health effects of exposure to chemical, physical, and biological agents in the community, workplace, and home. Activities within Environmental Health Sciences are associated with recognizing, assessing, understanding, and mitigating the impacts of chemical, physical, and biological agents as well as understanding how human behavior and action impacts the environment. This course focuses on the central concepts, principles, issues, and applications of the essential scientific components and strategies of control of major environmental health problems.

Prerequisite: Minimum grade of C- in CHEM131 and CHEM132; and must have completed or be concurrently enrolled in SPHL100 or PHSC300.

Restriction: Must have earned a minimum of 60 credits; and must be in Public Health Science program; or permission of SPHL-School of Public Health.

Credit Only Granted for: SPHL498N or MIEH300.

Formerly: SPHL498N.

MIEH309 Environmental Health Research (1-3 Credits)

This research-based course will provide undergraduates with the opportunity to work closely with one of the faculty researchers in the Maryland Institute for Applied Environmental Health (MIAEH) within the School of Public Health. Our research covers multiple fields within the environmental health sciences (e.g. environmental epidemiology, exposure science, risk assessment, environmental microbiology, environmental microbial genomics, food toxicology, airborne infection transmission, environmental justice, and children's environmental health) that involve either laboratory-based research or non-laboratory based studies. Students will not only gain invaluable research and interpersonal skills but also contribute to MIAEH's ongoing environmental health research programs.

Restriction: Must have completed a minimum of 45 credits; and must have permission of instructor.

Repeatable to: 9 credits if content differs.

MIEH321 Environmental Determinants of Emerging Infectious Diseases (3 Credits)

Examines the influences of environmental factors, economic development, migration, and land use changes on emergence and reemergence of infectious diseases. Explores how population growth, development, and climate change impact natural reservoirs of infectious diseases and how they are transmitted through human populations. Includes historical accounts, newly emerging and reemerging diseases.

Prerequisite: Must have completed or be concurrently enrolled in SPHL100.

MIEH325 Introduction to Clinical Research Methods (3 Credits)

Introduces you to the importance of clinical research, including how studies are developed, structured, and implemented. You will also get hands-on experience with a variety of clinical sample collection methods. We will broadly review topics important to clinical research, including an overview of bioethics in research, the basics of clinical study structure and design, data collection, and the importance of good record keeping. You will apply this knowledge by developing your own clinical research project and creating a proposal in the structure of a grant funding application. You will also learn about topics related to clinical sample collection, including basic anatomy, the tools and procedures used, and the appropriate application of these procedures, as well as learning how to collect some basic clinical samples such as nasal swabs and blood samples.

MIEH330 Environmental Justice, Racism, and Environmental Health Disparities: How where you live can kill you (3 Credits)

Examination of environmental justice history, theory and science; discussion of linkages between the physical, natural, and social environments and environmental injustice; analysis of how environmental injustice can lead to adverse health conditions and environmental health disparities; discuss environmental justice case studies; and understanding of tools that can be used to understand and address environmental justice issues.

Prerequisite: Minimum grade of C- in MIEH300.

Restriction: Must be in a major in SPHL-School of Public Health.

Credit Only Granted for: MIEH210 or MIEH330.

Formerly: MIEH210.

MIEH331 The Built Environment, Sustainability, and Public Health: The Good, the Bad, and the Ugly (3 Credits)

Provides students with a fundamental understanding of theory, concepts, and issues related to the built environment; how the built environment influences behaviors and health outcomes; and opportunities to improve the built environment through planning, zoning, and community development initiatives that can make communities healthier, just, and more sustainable.

Prerequisite: Minimum grade of C- in MIEH300; or permission of instructor.

Credit Only Granted for: MIEH215 or MIEH331.

Formerly: MIEH215.

MIEH333 Every Drop Counts: Water, Food and Global Public Health (3 Credits)

In-depth interdisciplinary study of the public health issues related to water use for global food production. Topics will include accessibility and availability of safe water for agriculture worldwide, potential microbiological and chemical hazards in agricultural water, alternative water sources such as reclaimed wastewater and return flows, food safety approaches to managing agricultural water, and agricultural influences on surface and groundwater quality. Political, social, and economic factors relating to agricultural water will be addressed, with special focus on regions that are leaders in innovative water management and regions where access to clean water for agriculture is a major challenge.

Prerequisite: ENSP101 or MIEH300; or permission of department.

Cross-listed with: ENSP360.

Credit Only Granted for: MIEH333 or ENSP360.

MIEH400 Introduction to Global Health (3 Credits)

Exploration of theoretical frameworks and practical perspectives on issues shaping the global health panorama. Determinants examined through: biological and epidemiological; social, cultural and economic; environmental and geographic; multi-section, legal and institutional perspectives with synopsis of how these issues are addressed by international and community organizations in developing countries.

Prerequisite: Minimum grade of C- in MIEH300; and 1 course with a minimum grade of C- from (SPHL100, PHSC300).

Restriction: Must be in the Public Health Science program or must have permission of the program director; and must have completed 60 credits.

Credit Only Granted for: MIEH400 or SPHL498A.

Formerly: SPHL498A.

MIEH407 One Health: Food Safety and Security (3 Credits)

This is a collaborative course with the University of Maryland and Cairo University, Cairo, Egypt to explore the One Health Foundation and its application to improving international food safety and security. The purpose of this global undergraduate class is to disseminate knowledge on One Health and its application to improving global food safety and security. Students will apply principles of One Health to ensure food safety and food security in Egypt.

Jointly offered with: MIEH607.

Restriction: Must have earned at least 75 credits .

Credit Only Granted for: MIEH607 or MIEH407.

MIEH480 Introduction to Occupational Health (3 Credits)

Through in-person site visits, hands-on activities and case studies, students will learn about healthy workplaces and their critical role in public health. The course will center on the field of occupational health and safety. Site visits will enable students to hear firsthand from workers, local health & safety professionals, and former students now in the field. Case studies will allow students to explore today's critical work hazards across various work environments and industries. Students will develop and apply essential skills, such as conducting a safety walk-through in a worksite, leading a worker safety training, and writing a safety plan for an employer. Upon course completion, students will be prepared to address traditional workplace problems, as well as emerging hazards like extreme heat, poor indoor air quality, and the mental health challenges of today's workplace.

Prerequisite: Minimum grade of C- in MIEH300 and EPIB301.

Recommended: BSCI201.

MITH - Maryland Institute for Technology in the Humanities

MITH301 Digital Publishing with Minimal Computing: Humanities at a Global Scale (3 Credits)

In this Global Classrooms course, students of the University of Maryland and Universidad del Salvador, Buenos Aires, will come together to learn how to create and assess websites from a critical and humanities-focused perspective. Specifically, the course will introduce "minimal computing" approaches, which privilege the use of open technologies, ownership of data and code, reduction in computing infrastructure and, consequently, environmental impact. The course is structured around a group project with students from both universities. You will collaborate virtually to create a multilingual (Spanish and English) digital edition of a colonial era text, while learning about Digital Humanities approaches to literary studies, digital publishing, history, and postcolonial studies.

Credit Only Granted for: MITH301, ENGL378M, CMLT398M, or LACS348C.

Additional Information: Knowledge of the Spanish language is not required as teaching and collaboration will be conducted in English. In the spirit of fostering a multilingual approach, however, we will not discourage the use of Spanish among students and instructors; mutual respect and cooperation are paramount to the success of your course project.

MITH388 Digital Humanities Research Assistantship (1-3 Credits)

An applied introduction to the theory and practice of digital research. The internship includes regular meetings with MITH staff, including designers, developers, information professionals, project managers, and faculty, to gain knowledge of existing digital scholarship and resources within the arts and humanities. Students may contribute to existing MITH projects or propose a small, independent research project on which they will receive support from MITH staff.

Restriction: Permission of instructor.

Repeatable to: 6 credits.

MITH498 Special Topics in Applied Digital Humanities (3 Credits)

An introduction to special topics, and technical approaches, for theoretically grounded humanities and social sciences digital research. Class meetings will introduce students to a variety of technical approaches potentially applicable to the specific topical foci; the theoretical basis for selecting, evaluating, and modifying technical approaches; and best practices in project management.

Repeatable to: 9 credits if content differs.

MLAW - MPower Undergraduate Law Programs

MLAW100 Justice and the Law (3 Credits)

An exploration into the relationship between justice and law, including psychological, philosophical, political and legal approaches to justice, as well as an analytical framework for understanding human rights.

Restriction: Course enrollment is restricted to students in the College Park Scholars Justice and Legal Thought Program (CPJT).

MLAW150 Law in a Just Society (3 Credits)

An exploration of the theoretical questions relating to such fundamental questions of jurisprudence as "what is law?" and "how can law be deployed as both an enemy and ally of justice?"

Restriction: Must be in the College Park Scholars - Justice and Legal Thought program.

MLAW217 Mock Trial (3 Credits)

Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theory.

Cross-listed with: GVPT217.

Credit Only Granted for: MLAW217, GVPT217, or GVPT319A.

Formerly: GVPT319A.

MLAW298 Special Topics in Legal Studies (1-3 Credits)

Substantive and experiential approaches to legal phenomena. Topics vary.

Repeatable to: 6 credits if content differs.

MLAW304 Introduction to Law and Social Inquiry (3 Credits)

An exploration of the relationship between law and society from an interdisciplinary perspective. Major themes cover the impact of law on society, society on law and social change.

Restriction: Must be in the Law and Society (MLAW) minor.

MLAW305 Law and Legal Institutions in Social Context (3 Credits)

An exploration of case law, statutes, and regulations separately and together in their social context.

Prerequisite: MLAW304.

Restriction: Must be a student in the Law and Society Minor.

MLAW315 Citizenship and Naturalization in America (2 Credits)

Notions of who is an American - and who is not - are deeply rooted in the American ethos. Although the United States has long been praised for its inclusiveness vis-a-vis citizenship - including a policy of jus soli, or birthright citizenship - a closer look reveals a difficult history involving the categorical exclusion of many groups from American citizenship. We will examine this history, focusing particularly on Black and Native Americans and immigrants, and drawing upon legal cases, historical texts, and personal narratives detailing the lived experiences of those seeking American citizenship. We will trace this history to the present and explore the current process and requirements for becoming an American citizen. Students will have an opportunity to engage guests and discussions from the Maryland Carey School of Law and other experts.

Restriction: Must be in the Law and Society minor (MLAW); or must be in College Park Scholars Justice and Legal Thought (CPJT).

MLAW325 Naturalization Workshop Practicum (1 Credit)

The focus of this Practicum is a naturalization workshop whereby students will assist eligible Marylanders in applying for citizenship. Students will work with faculty and law students to design, plan, and implement a naturalization workshop, to take place on a Saturday in the spring semester. Students will work directly with law students and faculty.

Prerequisite: MLAW315 or by permission of the department.

MLAW358 Selected Topics in Law and Society (3 Credits)

An interdisciplinary exploration of topics in law and society. Major scholarly interpretations of specific substantive fields of law.

Restriction: Must be in the Law and Society Minor.

Repeatable to: 6 credits if content differs.

MLAW359 Undergraduate Teaching Assistant Experience (3 Credits)

Designed to engage experienced Law and Society students as mentors and class leaders. Students will be involved in lesson planning, course design, field trips, and class discussion as they develop their leadership and public speaking skills.

Prerequisite: MLAW304.

Restriction: Must be enrolled in the Law and Society minor; and permission of program.

Repeatable to: 6 credits.

Formerly: MLAW355.

MLAW377 The Legal Profession (3 Credits)

Designed to introduce students to a variety of legal fields. The course is designed to combine social science literature about the legal profession with real world experiences with lawyers and legal workers. It will address questions about law as a profession, field of advocacy and as a business.

Restriction: Must be in the Law and Society Minor.

MLAW378 Special topics in Law and Society (3 Credits)

An interdisciplinary examination in law and society, relying on scholarly interpretations of specific substantive topics of law

Recommended: MLAW304.

Restriction: Must be in Law and Society Minor.

Repeatable to: 6 credits if content differs.

MLAW388 Law and Society Internship (1-4 Credits)

Participation in the Law and Society Internship (LASI) offers students the opportunity to enhance their education through practical skill building in the realm of law-related professionals.

Repeatable to: 7 credits.

MLAW404 Law & Society Capstone (3 Credits)

An exploration of the implications of technology on law and society from a variety of perspectives. Significant issues will be taken from contemporary scholarship and court cases.

Restriction: Student must be enrolled in the Law and Society minor.

MLAW411 Appellate Advocacy I (3 Credits)

By the end of this class, and with proper supervision, students should be able to competently brief and argue an appeal before any appellate court in the country. The skills taught in this class also transfer to other contexts that demand clear legal analysis, efficient and comprehensive legal research, excellent writing and effective oral advocacy. For students interested in pre-law skills, whether they plan to go to law school or some career that requires analytical reasoning, persuasive writing, and advocacy skills.

Recommended: MLAW304.

MLSC - MD Language Science Ctr

MLSC250 Lol that's not funny: Language change and linguistic creativity in online communication (3 Credits)

Recent developments in technology, from texting to Zoom, have created new environments for human language use. Examining how communication is changing in these environments highlights humans' endless linguistic ingenuity – ranging from new vocabulary and punctuation conventions to the use of hashtags, emoji and memes. At the same time, these linguistic innovations exemplify broader patterns of language change and diversity that have been documented and studied by language scientists. In this course, we will engage with the study of language variation and change through a survey of language use in different online environments, and will apply insights from linguistic research to analyze our own and others' language use in more nuanced ways.

MLSC308 PULSAR Language Science Research Seminar (1 Credit)

Research seminar for students in the PULSAR language science program. Weekly presentations and discussions on diverse topics in language science research, as well as on developing research skills.

Restriction: Must be in PULSAR program or have permission of the instructor.

Repeatable to: 4 credits.

Credit Only Granted for: BSOS338P or MLSC308.

Formerly: BSOS388P.

MUED - Music Education

MUED155 Fundamentals for the Classroom Teacher (3 Credits)

The fundamentals of music theory and practice, related to the needs of the classroom and the kindergarten teacher.

Restriction: Must be in one of the following programs (Early Childhood Education; Elementary Education) ; or must be a Pre-Elementary Education major; or must be a Pre-Early Childhood Education major.

MUED186 Pre-professional Experiences I (2 Credits)

An orientation into the role of the music teacher in the school and community. On-site school visits at elementary, middle and high school levels form the basis for discussion and exploration of all facets of the music education profession.

Restriction: Must be in Music Education program.

Additional Information: Fulfills the College of Arts and Humanities requirement for ARHU158.

MUED187 Pre-Professional Experiences II (1 Credit)

Regular on-site school visitation at elementary, middle and high school levels arranged to expand student understandings and reflections of music instruction in classroom settings.

Prerequisite: MUED186.

Restriction: Must be in Music Education program.

MUED213 String Technique and Pedagogy I (2 Credits)

A study of violin, viola, cello and bass technique and pedagogy; beginning level. Emphasizes group process playing and teaching.

Restriction: Must be in Music Education program.

MUED214 String Technique and Pedagogy II (2 Credits)

A study in violin, viola, cello and bass technique and pedagogy; intermediate to advanced level. Emphasizes group process playing and teaching, chamber music and individual technique development.

Restriction: Must be a major in Music Education-instrumental option.

MUED215 Woodwind Technique and Pedagogy (2 Credits)

Playing experience on instruments of the woodwind family. Historical and acoustical background. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.

Restriction: Permission of ARHU-School of Music department.

MUED216 Percussion Technique and Pedagogy (2 Credits)

Playing experience on percussion instruments. Historical and acoustical background. Scoring for percussion. Principles of improvisation. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.

Restriction: Must be in Music Education program.

MUED217 Brass Instrument Technique and Pedagogy (2 Credits)

Playing experience on instruments of the brass family. Historical and acoustical background. Principles of improvisation. Basic concepts of teaching. Methods and materials. Techniques of individual and class instruction.

Restriction: Must be in Music Education program.

MUED269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUED305 Marching Band Techniques (2 Credits)

Designed to aid the student in learning how to prepare, organize, teach, and rehearse the contemporary high school marching band. Through class discussions, practical assignments, guest lecturers and audio/visual aids, students will gain a command of the terminology, pedagogy, and structure of a marching ensemble and its potential.

Restriction: Must be in Music Education program.

Credit Only Granted for: MUED499M or MUED305.

Formerly: MUED499M.

MUED311 Teaching Elementary Instrumental Music I (2 Credits)

Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to teach fundamental musical skills at the elementary level.

Prerequisite: MUED187.

Restriction: Must be in Music Education program.

MUED320 Teaching Secondary Instrumental Music I (2 Credits)

Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to extend secondary-level musical skill through planned instruction and development of teaching materials.

Prerequisite: MUED187.

Restriction: Must be in Music Education program.

MUED322 Teaching General Music I (2 Credits)

Teaching General Music I is designed as a fundamental music methods course for students who are preparing for a career in general music. This course will focus on developmentally appropriate teaching practices for building musicianship in a general music setting.

Prerequisite: MUED187 and MUED186.

Restriction: Must be in Music Education program.

Credit Only Granted for: MUED222 or MUED322.

Formerly: MUED222.

MUED333 Classroom Vocal Pedagogy (2 Credits)

An introduction to the fundamentals of group vocal pedagogy for the choral and general classroom teacher, including the teaching of posture, breathing, resonance, registration, articulation and foreign language diction as appropriate to needs of the child or adolescent singer in K-12 classroom settings.

Prerequisite: MUED187 and MUED186.

Restriction: Must be in Music Education program.

MUED342 Technology for Music Education (2 Credits)

Technology has profoundly remade nearly every facet of music, musicianship, and audience experience, including the education of music students. From the impact of recording, to the informational revolution of the internet, to the global economy, technology has accelerated the rate of change in our society and will likely continue to play a central role in the evolution of humanity. This course explores the broad dimensions of technology as they impact the lives of teachers and students in music education.

Restriction: Must be in Music Education program.

Credit Only Granted for: MUED342 or MUED499T.

Formerly: MUED499T.

MUED369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUED386 Experiential Learning (3-6 Credits)

Prerequisite: Must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

MUED411 Teaching Elementary Instrumental Music II (4 Credits)

Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to develop and/or maintain an exemplary curricular-oriented, research-based, comprehensive elementary instrumental music program.

Prerequisite: MUED320 and MUED311.

Restriction: Must be in Music Education program.

MUED420 Teaching Secondary Instrumental Music II (4 Credits)

Prepare instrumental-emphasis music education majors to synthesize the knowledge and skills that will enable them to develop and/or maintain an exemplary, curricular-oriented, research-based, comprehensive secondary instrumental program.

Prerequisite: MUED320 and MUED311.

Restriction: Must be in Music Education program.

MUED422 Teaching General Music II (4 Credits)

Designed as an advanced music methods course and field experience for students who are preparing for a career in general music. The field experience is a practicum that is co-supervised by the university instructor and a general music educator.

Prerequisite: MUED322 and MUED333.

Restriction: Must be in Music Education program.

Credit Only Granted for: MUED422 or MUED471.

Formerly: MUED471.

MUED433 Teaching Choral Music (4 Credits)

Preparation for teaching choral classes through the integration of conducting technique, vocal pedagogy, knowledge of repertoire, and the application of appropriate instructional strategies in the context of peer teaching and field experience assignments.

Prerequisite: MUED422.

Restriction: Must be in Music Education program.

Credit Only Granted for: MUED472 or MUED433.

Formerly: MUED472.

MUED473 Teaching General Music for Instrumentalists (2 Credits)

Introduction to current trends, materials and approaches in general music instruction.

Prerequisite: MUED311; and MUED320.

Restriction: Must be in Music Education program.

MUED474 Field Experiences: Pre-Student Teaching (2 Credits)

Field experiences to fulfill teaching requirements in K-12 music teacher education program.

Prerequisite: MUED420 and MUED411; or (MUED472 and MUED471).

Restriction: Permission of ARHU-School of Music department; and senior standing.

MUED484 Student Teaching in Elementary School: Music (6 Credits)

Fulfills elementary teaching requirements in K-12 music teacher education program. Limited to music education majors who have previously applied.

Corequisite: MUED494.

Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.

MUED489 Field Experiences (1 Credit)

Series of field experiences in K-12 settings.

Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.

Repeatable to: 6 credits.

MUED494 Student Teaching in Secondary School: Music (6 Credits)

Fulfill secondary teaching requirements in K-12 music teacher education program. Limited to music education majors who have previously applied.

Corequisite: MUED484.

Restriction: Permission of ARHU-School of Music department; and must be in Music Education program.

MUED499 Workshops, Clinics, Institutes (1-3 Credits)

Innovative and experimental dimensions of music education offered to meet the needs of music teachers and music supervisors allowing students to individualize their programs.

Repeatable to: 6 credits if content differs.

MUET - Ethnomusicology

MUET269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUET369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUSC - School of Music

MUSC102 Class Piano (2 Credits)

Functional piano training for beginners. Development of techniques for school and community playing. Basic piano techniques; chord, arpeggio and scale techniques; melody and song playing; simple accompaniments, improvisation for accompaniments and rhythms; sight reading and transposition and playing by ear.

MUSC103 Beginning Class Piano II (2 Credits)

Functional piano training for beginners. Development of techniques useful for school and community playing. Basic piano techniques; chord, arpeggio, and scale techniques; melody and song playing; simple accompaniments, improvisation for accompaniments and rhythms; sight reading and transposition, and playing by ear. MUSC103 is a continuation of MUSC102; elementary repertoire is begun.

Prerequisite: MUSC102; or permission of ARHU-School of Music department.

MUSC106 Beginning Classical Guitar (2 Credits)

Introduction to classical guitar notation, technique, literature and performance. No previous musical experience required.

MUSC123 Movement for Singers (1 Credit)

Systematic exercises, improvisations and dances in conjunction with artistic vocal expression. Performance and critique of stage department, gestures and recital techniques.

Prerequisite: Permission of ARHU-School of Music department.

MUSC126 Vocal Diction: English (1 Credit)

An introduction to the fundamentals of phonetics and sound production as applied to singing English vocal literature through detailed work with IPA, the International Phonetic Alphabet.

Prerequisite: Permission of ARHU-School of Music department.

MUSC127 Vocal Diction: Italian (1 Credit)

Augmentation of private voice study. Phonetics and diction for singers of Italian vocal literature.

Prerequisite: Permission of ARHU-School of Music department.

Restriction: Must be in a major within the ARHU-School of Music department.

MUSC128 Sight Reading For Pianists (2 Credits)

A course to give the piano major an opportunity to develop proficiency in sight reading at the keyboard.

Repeatable to: 4 credits.

MUSC129 Ensemble (1 Credit)

Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC130 What Does Music Mean? (3 Credits)

An examination of how music creates meaning in different eras, through studying musical sound, biography, and social history.

Restriction: Must not be in any of the following programs (Music (Professional Program); Music Education).

MUSC140 Music Fundamentals I (3 Credits)

Introductory theory course. Notation, scales, intervals, triads, rhythm, form and basic aural skills.

Restriction: Must not be in any of the following programs (Music (Professional Program); Music Education).

MUSC150 Theory of Music I (3 Credits)

A study of basic concepts and skills in tonal melody and harmony through analysis and composition.

Prerequisite: Departmental audition and entrance examination.

Restriction: Must be in one of the following programs (Music (Liberal Arts Program); Music (Jazz Performance Option); Music (Winds & Percussions Performance Option); Music (Voice Performance Option); Music Composition; Music (Professional Program); Music (Piano Performance Option); Music Performance-Winds and Percussion; Music Theory and Composition; Music Performance-Piano; Music Performance-Jazz Studies; Music Performance-Voice; Music Performance-Strings; Music (Strings Performance Option)).

MUSC151 Theory of Music II (3 Credits)

A continuation of MUSC150, including study of more advanced harmonic techniques of the eighteenth century, such as modulation and chromatic harmonies. Emphasis on sight singing, ear training, analysis and compositional skills.

Prerequisite: Minimum grade of C- in MUSC150.

MUSC202 Intermediate Class Piano I (2 Credits)

Advanced keyboard techniques. Continuation of skills introduced in MUSC103. Transposition, modulation and sight reading; methods of teaching functional piano.

Prerequisite: MUSC103; or must have equivalent piano training.

MUSC203 Intermediate Class Piano II (2 Credits)

Advanced keyboard techniques. Continuation of skills introduced in MUSC202. Transposition, modulation and sight reading; methods of teaching functional piano. Development of style in playing accompaniments and in playing for community singing. More advanced repertory.

Prerequisite: MUSC202; or must have equivalent piano training.

MUSC204 Popular Music in Black America (3 Credits)

Traces black popular music in the U.S. with a special focus on spirituals, ragtime, the blues, early jazz, RB, Motown, funk, soul, and rap. Examines how these styles have been borrowed by the American music industry.

MUSC205 History of Popular Music, 1950-Present (3 Credits)

A historical survey of rock music (blues, rock, soul, metal, rap, etc.) from circa 1950 to the present, with emphasis on popular music as music and popular music as social history.

MUSC210 The Impact of Music on Life (3 Credits)

Music as a part of culture. Materials drawn from traditions throughout the globe to illustrate issues of historical and contemporary significance, including the impact of race, class and gender on the study of music.

Credit Only Granted for: MUET210 or MUSC210.

Formerly: MUET210.

MUSC215 World Popular Musics and Identity (3 Credits)

Focus on popular musics in different cultures with an emphasis on cross-cultural comparisons and analysis of how musics and identity intersect.

Credit Only Granted for: MUET200 or MUSC215.

Formerly: MUET200.

MUSC220 Selected Musical Cultures of the World (3 Credits)

A critical and comparative exploration of musical practices from around the world in their social, political and economic contexts.

Restriction: Must not be in any of the following programs: (Music (Professional Program); Music Education).

MUSC226 Vocal Diction: French (1 Credit)

Augmentation of private voice study. Phonetics and diction for singers of French vocal literature.

Prerequisite: Permission of ARHU-School of Music department.

Restriction: Must be in a major within ARHU-School of Music department.

MUSC227 Vocal Diction: German (1 Credit)

Augmentation of private study. Phonetics and diction for singers of German vocal literature.

Prerequisite: Permission of ARHU-School of Music department.

Restriction: Must be in a major within ARHU-School of Music department.

MUSC228 Introduction to Accompanying for Pianists (2 Credits)

A course to introduce the piano major to accompanying at an intermediate level of difficulty. Class instruction will center on rehearsal and coaching geared toward performance, and will be supplemented by experience working as an accompanist in voice classes or applied studios.

Prerequisite: Permission of ARHU-School of Music department.

Restriction: Must be in a major within ARHU-School of Music department.

Repeatable to: 10 credits.

MUSC229 Ensemble (1 Credit)

Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC240 Elements of Music Composition for Non-Majors (3 Credits)

Emphasizes learning concepts and techniques of music composition through the study of music theory and structure used in both classical and popular music forms. Students will compose music using computer assisted and composition tools. These tools include cloud based digital audio workstations and music notation programs. Compositions will be written in these musical styles but not limited to classical, jazz, and popular. Students will also explore methods of sharing their compositions on various digital platforms.

Prerequisite: MUSC 140, or by permission of instructor.

Recommended: Ability to read music on a grand staff (treble and bass clef).

Restriction: Must not be in any of the following programs: (Music (Professional Program); Music Education).

Credit Only Granted for: MUSC240 or HONR218M.

Formerly: HONR218M.

MUSC248 Selected Topics in Music (1-3 Credits)

Designed to allow a student of theory or music history to pursue a specialized topic or project under the supervision of a faculty member.

Prerequisite: Permission of ARHU-School of Music department.

Repeatable to: 6 credits if content differs.

MUSC250 Advanced Theory of Music I (4 Credits)

A continuation of MUSC 151, with further study of chromatic and modulatory techniques of the nineteenth century. Emphasis on sight singing, ear training, analysis and compositional skills.

Prerequisite: Minimum grade of C- in MUSC151.

MUSC251 Advanced Theory of Music II (4 Credits)

A continuation of MUSC250, concentrating on late nineteenth-century chromatic harmony and an introduction to twentieth-century melody and harmony. Emphasis on sight singing, ear training, analysis and compositional skills.

Prerequisite: Minimum grade of C- in MUSC250.

MUSC260 Music as Global Culture (3 Credits)

Explores how and why people create, transform, and move music around the globe. Taking a comparative approach to Western art musics and other musics of the world, course will examine a variety of musical practices in their social, political, and economic contexts. Experiential knowledge will be developed through hands-on ethnographic research.

Prerequisite: MUSC151.

Restriction: Must be in a major within the ARHU-School of Music department.

Credit Only Granted for: MUSC220 or MUSC260.

MUSC269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUSC289I Exploring the Power of Musical Performance in Social Engagement (3 Credits)

Explores the ways people, across cultures and times, have drawn on music's power to further causes such as revolution and social change or to bring attention to injustices such as discrimination, exclusion, or oppressive working conditions.

MUSC328 Introduction to Chamber Music for Pianists (2 Credits)

A course to introduce the piano major to chamber music at a moderately difficult level. Class instruction will center on actual rehearsal and coaching geared toward performance, and will be supplemented by further experience in applied instrumental studios.

Prerequisite: Permission of ARHU-School of Music department.

Repeatable to: 10 credits.

MUSC329 Ensemble (1 Credit)

Rehearsal and performance of selected works for small ensembles of instruments, piano, or small vocal groups. After two registrations in MUSC129, the student will elect MUSC229 for two additional semesters and MUSC329 thereafter.

MUSC330 Music History III (3 Credits)

A historical study of Western music from 1800 to present.

Prerequisite: MUSC320; and permission of ARHU-School of Music department.

MUSC339 Honors in Music (3 Credits)

The production of one or more recitals or lecture-recitals; one or more compositions; or one or more honors theses in addition to regular degree requirements. Two semesters required.

Prerequisite: Permission of ARHU-School of Music department.

Corequisite: MUSC349.

Repeatable to: 6 credits.

MUSC349 Honors Seminar in Music (1 Credit)

Group discussion of projects undertaken in MUSC339. Two semesters required.

Corequisite: MUSC339.

Repeatable to: 2 credits.

MUSC360 Music in Western Culture Before 1900 (3 Credits)

Course will be looking at roughly 800 years of Western art music in Europe and America (ca. 1100-1900) through the lens of selected "moments"—intersections of historical space and time, observing music as an art form practiced in a public eye, both as a social event and a cultural practice.

Prerequisite: MUSC260.

Restriction: Must be in a major within the ARHU-School of Music department.

Credit Only Granted for: MUSC310 or MUSC360.

MUSC361 Music in Western Culture After 1900 (3 Credits)

Continuation of MUSC360. A historical study of Western classical music, popular music, and jazz since 1900.

Prerequisite: MUSC360.

Restriction: Must be in a major within the ARHU-School of Music department.

Credit Only Granted for: MUSC330 or MUSC361.

MUSC369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUSC379 Opera Workshop (1 Credit)

Open to music and non-music majors (by audition). Operatic production and performance, performance techniques and coaching, stage direction, set design, costume design and make-up. Repertory will include smaller operatic works, excerpts or scenes.

Restriction: Must complete a departmental audition.

Repeatable to: 4 credits.

MUSC386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of ARHU-School of Music department.

Restriction: Junior standing or higher.

MUSC388 Music Internship (3 Credits)

Pre-professional field work in music.

Prerequisite: Permission of ARHU-School of Music department.

Corequisite: MUSC389.

Repeatable to: 6 credits.

MUSC389 Music Internship Analysis (1 Credit)

Documentation and evaluation of field work experience.

Corequisite: MUSC388.

Repeatable to: 2 credits.

MUSC400 Music Pedagogy (3 Credits)

Conference course. A study of major pedagogical treatises in music, and an evaluation of pedagogical techniques, materials, and procedures.

Prerequisite: MUSP315; and permission of ARHU-School of Music department.

MUSC420 Introduction to Ethnomusicology (3 Credits)

Study of principal concepts and methods in ethnomusicology, covering history of field, linguistics and anthropology, music in various settings, musical cognition and ethnography of performance.

Prerequisite: MUSC210 and MUSC130; or permission of ARHU-School of Music department.

Restriction: Junior standing or higher.

MUSC428 Repertoire Coaching of Vocal or Chamber Music (2 Credits)

A course for piano students who wish to go further than the work offered in MUSC128, MUSC228 and MUSC328 by becoming specialists in the areas of vocal coaching or chamber music coaching. Elements of pedagogy, conducting and responsible artistic decision-making for the entire musical production.

Prerequisite: Must have completed or be concurrently enrolled in MUSC328.

MUSC436 Jazz: Then and Now (3 Credits)

Major styles and influential artists of the past 75 years of jazz.

MUSC438 Area Studies in Ethnomusicology (3 Credits)

Advanced study of musics in selected parts of the world.

Repeatable to: 9 credits if content differs.

MUSC439 Collegium Musicum (1 Credit)

Open to undergraduates and graduates, music majors and non-majors. Procurement, edition and performance of music not belonging to a standard repertory: early music, compositions for unusual performing media, works which demand reconstruction of their original circumstances of performance. Outcome of a semester's work may be one or more performances for the public.

Prerequisite: Permission of ARHU-School of Music department.

Repeatable to: 5 credits.

MUSC442 Creating Historic Woodwinds (3 Credits)

In this class, students will learn the art of woodworking and blend techniques of modern and historic instrument-making methods. Using wood lathes, metalworking tools, 3d scanners and selective laser sintering 3d printers. Student teams will first train to acquire the skills needed to use fabrication equipment. Each mixed team will then share their individual discipline's skills to help contribute to the creation of a completed musical instrument. Along the way, we'll explore the historical and cultural context of instrument making and the musical period.

Cross-listed with: ENES442.

Credit Only Granted for: MUSC442 or ENES442.

MUSC443 Solo Vocal Literature (3 Credits)

The study of solo vocal literature from the Baroque Cantata to the Art Song of the present. The Lied, Melodie, vocal chamber music and the orchestral song are examined.

Prerequisite: MUSC330 and MUSC331; or students who have taken courses with comparable content may contact the department.

MUSC444 Wind and Percussion Literature (1 Credit)

Recital program notes and written projects in wind or percussion literature.

Prerequisite: Permission of ARHU-School of Music department.

Corequisite: MUSP420 or MUSP419.

MUSC445 Survey of the Opera (3 Credits)

A study of the music, librettos and composers of the standard operas.

Prerequisite: MUSC330 and MUSC331; or students who have taken courses with comparable content may contact the department.

MUSC446 String Literature (1 Credit)

Recital program notes and written projects in string literature.

Prerequisite: MUSP316; and permission of ARHU-School of Music department.

MUSC448 Selected Topics in Music (1-3 Credits)

Prerequisite: Permission of ARHU-School of Music department.

Repeatable to: 6 credits if content differs.

MUSC448E Arts Entrepreneurship and the Creative Profession (3 Credits)

Introduces students to arts entrepreneurship in preparation for diverse and ever-changing careers in the creative fields. Students will practice and develop their entrepreneurial mindsets and learn about different frameworks for audience engagement. Topics include financial management, revenue development, business planning, and the "need-to-knows" of the gig economy. Throughout the semester, students will have the opportunity to learn from a variety of entrepreneurs in the arts and to evaluate their future career paths.

Recommended: ARHU240.

Cross-listed with: ARHU340.

Credit Only Granted for: ARHU340 or MUSC448E.

MUSC450 Musical Form (3 Credits)

A study of the principles of organization in music with emphasis on eighteenth and nineteenth century European music. Reading and analysis of scores exemplifying the musical forms.

Prerequisite: MUSC251.

MUSC451 Analysis of Music (3 Credits)

A course in the analysis of music. Discussion of individual works, with emphasis on their unique characteristics and on the relation of analysis to performance.

Prerequisite: MUSC450; or permission of instructor.

MUSC453 Jazz Improvisation I (3 Credits)

Jazz theory, notational conventions, improvisation techniques, reading and analysis of music, and performance in small combo format.

Prerequisite: MUSC251; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.

Credit Only Granted for: MUSC345 or MUSC453.

Formerly: MUSC345.

MUSC454 Jazz Improvisation II (3 Credits)

Continuation of MUSC453 including scoring and transcription.

Prerequisite: MUSC453; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.

Credit Only Granted for: MUSC346 or MUSC454.

Formerly: MUSC346.

MUSC455 Theory of Jazz (3 Credits)

Analysis of jazz harmony, with emphasis on principles of substitution, reharmonization, and syntax. Topics may also include chord/scale relationships, phrasing and articulation, notation, and introductory arranging concepts such as orchestration and form.

Prerequisite: MUSC250; or permission of ARHU-School of Music department.

Restriction: Must be in a major within ARHU-School of Music department.

MUSC456 Jazz Arranging (3 Credits)

A comprehensive approach to jazz arranging. Topics to include chord scale theory, voicing techniques, part and score layout, and formal construction of an arrangement.

Prerequisite: MUSC455; and permission of ARHU-School of Music department.

Credit Only Granted for: MUSC448N or MUSC456.

Formerly: MUSC448N.

MUSC460 Tonal Counterpoint I (3 Credits)

A course in Eighteenth-Century contrapuntal techniques, analysis and original composition of two-voice dances, preludes, and inventions. Includes an introduction to the study of fugue and canon.

Prerequisite: MUSC251; or permission of ARHU-School of Music department.

MUSC461 Theory and Analysis of Atonal and Twelve-tone Music (3 Credits)

An advanced technical introduction to theory and analysis of atonal and twelve-tone music, with an emphasis on music by Schoenberg, Webern, Bartok, and Stravinsky.

Prerequisite: MUSC251 and MUSC450; and permission of ARHU-School of Music department.

Restriction: Must be in Music Theory and Composition program. Jointly offered with MUSC661.

Credit Only Granted for: MUSC461 or MUSC661.

MUSC463 Technology and a Career in Music (3 Credits)

A hands-on introduction to technology as it applies to music creation and recording. Digital audio workstations, music notation software, and cloud-based music technology are used to create and manipulate musical examples with an eye toward their practical applications for professional musicians.

Recommended: Ability to read music on a grand staff (treble and bass clef).

Additional Information: No previous experience with technology is required.

MUSC464 The Theories of Heinrich Schenker (3 Credits)

An advanced analysis course in tonal music with specific emphasis on the theories of the early 20th century theorist Heinrich Schenker. Specific analyses of music by Bach, Mozart, Haydn, Beethoven, Chopin, and Brahms.

Prerequisite: MUSC251 and MUSC450; and permission of ARHU-School of Music department.

Restriction: Must not have completed MUSC651.

Credit Only Granted for: MUSC464 or MUSC651.

MUSC467 Piano Pedagogy I (3 Credits)

A study of major pedagogical treatises in music, and an evaluation of pedagogical techniques, materials, and procedures.

Prerequisite: Permission of ARHU-School of Music department.

MUSC468 Piano Pedagogy II (3 Credits)

Application of the studies begun in MUSC467 to the actual lesson situation. Evaluation of results.

Prerequisite: MUSC467; and permission of ARHU-School of Music department.

Repeatable to: 6 credits.

MUSC469 Orchestral Excerpts for String Players (1 Credit)

In-depth study of the orchestral excerpts required for professional orchestra auditions.

Restriction: Permission of ARHU-School of Music department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: MUSC469, MUSC448B, MUSC448Q, MUSC448V, or MUSC448X.

Formerly: MUSC448B, MUSC448Q, MUSC448V, and MUSC448X.

MUSC470 Harmonic and Contrapuntal Practices of the Twentieth Century (3 Credits)

A theoretical and analytical study of twentieth century materials.

Prerequisite: MUSC251; or students who have taken courses with comparable content may contact the department. And permission of ARHU-School of Music department.

MUSC471 Contemporary Compositional Techniques (3 Credits)

Continuation of MUSC470, with emphasis on the analysis of individual works written since 1945.

Prerequisite: MUSC470; or permission of ARHU-School of Music department.

MUSC472 Music Composition for Music Majors (3 Credits)

A course for music majors who wish to develop skills and creative abilities in music composition. Student writing projects will be discussed in class and models of compositional techniques will be studied in literature from diverse styles and style periods.

Prerequisite: MUSC450 or equivalent; and permission of instructor.

Restriction: Registration restricted to music majors who are not majoring in music composition (cannot be in Major code: 1004B).

Credit Only Granted for: MUSC4480 or MUSC472.

Formerly: MUSC4480.

MUSC481 Music in the Renaissance (3 Credits)

Survey of western music from 1450 to 1600.

MUSC482 Music in the Baroque Era (3 Credits)

Survey of western music from 1600 to 1750.

MUSC484 Music in the Romantic Era (3 Credits)

Survey of western music from 1820 to 1900.

MUSC486 Orchestration I (3 Credits)

A study of the ranges, musical functions and technical characteristics of the instruments and their color possibilities in various combinations. Practical experience in orchestrating for small and large ensembles.

Prerequisite: MUSC251; and permission of ARHU-School of Music department.

MUSC490 Conducting (2 Credits)

Vocal and instrumental baton techniques.

Prerequisite: MUSC251.

MUSC491 Conducting II (2 Credits)

Baton techniques applied to score reading, rehearsal techniques, tone production, style and interpretation.

Prerequisite: MUSC490; or students who have taken courses with comparable content may contact the department.

MUSC492 Keyboard Music I (3 Credits)

The history and literature of harpsichord and solo piano music from its beginning to the romantic period. Emphasis is placed on those segments of repertory which are encountered in performance and teaching situations at the present time.

Prerequisite: Permission of ARHU-School of Music department.

MUSC493 Keyboard Music II (3 Credits)

The history and literature of harpsichord and solo piano music from the Romantic period to the present. Emphasis is placed on those segments of repertory which are encountered in performance and teaching situations at the present time.

Prerequisite: MUSC492; and permission of ARHU-School of Music department.

MUSC499 Independent Studies (1-3 Credits)

Independent research on a topic chosen in consultation with the instructor, which may culminate in a paper or appropriate project.

Prerequisite: Permission of ARHU-School of Music department.

Additional Information: May be repeated once for credit.

MUSP - Music Performance

NOTE ABOUT MUSP COURSES

Undergraduate Music Performance Courses are available in three series:

1. **Minor Series:** 2-credits each course. *Prerequisite: permission of department chairperson. Limited to music majors studying a secondary instrument and to non-music majors. Each course in the series must be taken in sequence. The initial election for all new students, both freshman and transfer, is MUSP 102. Transfer students are evaluated for higher placement after one semester of study. One-half hour private lesson per week plus assigned independent practice. MUSP 102, MUSP 103 Freshman Courses. MUSP 202, 203 Sophomore Courses. MUSP 302, 303 Junior Courses. MUSP 402, 403 Senior Courses.*
2. **Principal Series:** 2-4 credits each course. *Prerequisites: departmental audition, entrance examination, and permission of department chairperson. Limited to majors in music programs other than performance and composition. Each course in the series must be taken*

in sequence. The initial election for all new students, both freshman and transfer, is 109. Transfer students are evaluated for higher placement after one semester of study. One-hour private lesson per week plus assigned independent practice. Courses 109, 208, and 409 may be repeated once for credit, but only one successful attempt in each course may be applied towards baccalaureate degree requirements. MUSP 109, 110, Freshman Courses. MUSP 207, 208 Sophomore Courses. MUSP 305, 306 Junior Courses. MUSP 409, 410 Senior Courses. Recital required in MUSP 410.

3. **Major Series:** 2-4 credits each course. Prerequisites: departmental audition, entrance examination, and permission of department chairperson. Limited to majors in performance and composition. Each course in the series must be taken in sequence. The initial election for all new students, both freshman and transfer, is 119. Transfer students are evaluated for higher placement after one semester of study. One-hour private lesson per week plus assigned independent practice. Courses 119, 218, and 419 may be repeated once for credit, but only one successful attempt in each course may be applied towards baccalaureate degree requirements. MUSP 119, 120 Freshman Courses. MUSP 217, 218 Sophomore Courses. MUSP 315, 316 Junior Courses. MUSP 419, 420 Senior Courses. Recital required in MUSP 420.

Instrument designation: Each student taking a music performance course must indicate the instrument chosen by adding a suffix to the proper course number, such as: MUSP 102A music performance: A–piano; B–voice; C–violin; D–viola; E–cello; F–bass; G–flute; H–oboe; I–clarinet; J–bassoon; K–saxophone; L–horn; M–trumpet; N–trombone; O–tuba; P–euphonium; Q–percussion; T–composition; U–world instruments; V–harp; W–electronic composition; X–hist inst - keyboard; Y–hist inst - strings; Z–hist inst - winds.

MUSP102 Music Performance (2 Credits)

MUSP269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUSP302 Music Performance (2 Credits)

MUSP303 Music Performance (2 Credits)

MUSP369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

MUSP386 Experiential Learning (3-6 Credits)

Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

MUSP402 Music Performance (2 Credits)

Senior course, in the minor series.

MUSP403 Music Performance (2 Credits)

Senior course, in the minor series.

MUSP409 Music Performance (2-4 Credits)

Senior course in the principal series.

MUSP410 Music Performance (2-4 Credits)

Senior course in the principal series. Recital required.

MUSP419 Music Performance (2-4 Credits)

Senior course in the major series.

MUSP420 Senior Recital (4 Credits)

Senior course in the major series. Recital required.

NAVY - Navy

NAVY100 Introduction to Naval Science (3 Credits)

Introduction to the naval profession and concepts of sea power. Major topics explored are the mission, strategy, organization, and descriptions of the U.S. Navy and Marine Corps. Students will gain a basic understanding of warfighting capabilities, required leadership skills, training and education, and the duties and responsibilities of a U.S. Navy and Marine Corps Junior Officer. The student will learn Naval courtesy and customs, military justice, and nomenclature as well as the professional competencies required to become a naval officer.

NAVY101 Sea Power and Maritime Affairs (3 Credits)

Introduces the student to the key themes of naval and maritime history. Curriculum presents an analysis through lectures, reading, and student discussion of the relationship of sea power to American history. Classical concepts and contemporary employment of sea power are examined by viewing historic and current naval and maritime developments.

NAVY108 Naval Science Leadership Lab (1 Credit)

Introduces the student to a variety of instructional sessions and/or activities that will develop the leadership component of the Naval ROTC program. The Naval Science leadership lab may include, but not be limited to, close-order drill, physical fitness training, ceremonial functions, Department of the Navy policy, guest lecturers, general military training (GMT), Anti-Terrorism Force Protection (ATFP), traffic safety, nutrition, stress management, prevention of sexual harassment, and operations security. Corequisite: 1 course from NAVY100-402 course range.

Corequisite: 1 course from NAVY100-402 course range.

Restriction: Permission of UGST-Navy ROTC.

Repeatable to: 8 credits.

NAVY200 Leadership and Management (3 Credits)

Introductory course designed to familiarize students with the theories, processes, and behaviors that enable effective leadership and managerial competence. Students will engage in analytical discussions, review leadership development and education, and Navy/Marine Corps-based case study discussions in order to develop their understanding of personal strengths, values and growth opportunities in the context of team, group and organizational leadership.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY201 Navigation (3 Credits)

Introduces the student to a broad yet thorough education in basic surface ship navigation. Curriculum presents an overview of tools of the modern naval watch officer, and topics include celestial navigation, rules of the nautical road, piloting, practical chartwork, tides, instruments, publications, records, and electronic navigation systems. Instructional sessions and/or activities develop the maritime proficiency core competency of the Naval Reserve Officer Training Corps (NROTC) program.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the University of Maryland NROTC program.

NAVY300 Naval Ship Systems I (Engineering) (3 Credits)

Introduces the student to a comprehensive fundamental understanding of United States naval engineering principles and systems. Topics include thermodynamics, incompressible fluid flow, electrical theory, hydraulics and pneumatics, power train components, fluid/lube oil systems, desalination, fundamentals of nuclear power, propulsion systems (internal combustion, gas turbines, and steam), electrical distribution, ship stability and control and damage control. Students will also examine case studies to apply and analyze course topics within naval ships systems contexts.

Recommended: MATH140 and MATH141.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY301 Naval Ship Systems II (Weapons) (3 Credits)

Introduces the student to a comprehensive fundamental understanding of United States naval weaponry. Includes theory and employment of weapons systems, including the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. Radar and sonar systems and major weapon types, including capabilities and limitations. Facets of command, control, and communications as means of weapons system integration. Curriculum presents an in-depth review of surface, sub-surface, aviation, and Marine Corps weapons and platforms.

Recommended: MATH140, MATH141, and PHYS161.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY302 Evolution of Warfare (3 Credits)

Traces the development of warfare, from earliest recorded history to the present, with focus on the impact of major military theorists, strategists, tacticians, and technological developments. The student acquires an intermediate sense of strategy and develops an understanding of military alternatives and the impact of historical precedent on military thought and actions.

Recommended: NAVY100 and NAVY101.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students in the NROTC program.

NAVY400 Naval Operations and Seamanship (3 Credits)

Capstone course for senior NROTC Navy-option midshipmen in advanced navigation, communications, naval operations, and naval warfare. Students learn through simulation in a computer classroom known as the Maritime Skills Simulator (MSS), in addition to lectures, discussions, and qualitative and quantitative tests/examinations. Students will engage in discussions regarding the moral and ethical responsibilities of military leaders, as well as the essential attributes of character required for effective leadership.

Recommended: NAVY201.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY401 Leadership and Ethics (3 Credits)

Integrates an intellectual exploration of Western moral traditions and ethical philosophy with military leadership, core values, the Uniform Code of Military Justice, and Navy regulations. The course provides students with a basic understanding of major moral traditions including Relativism, Utilitarianism, Kantian Ethics, Natural Law Theory, Divine Command Theory, and Virtue Ethics.

Recommended: NAVY200.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority enrollment will be given to students enrolled in the NROTC program.

NAVY402 Fundamentals of Maneuver Warfare (3 Credits)

A detailed study of the characteristics of modern warfare and their interactions with maneuver warfare doctrine, with a focus on the United States Marine Corps. Throughout the course, there is a strong focus on leadership, as the fundamental purpose of this course is to develop the skills, knowledge, leadership background and mentality necessary for a successful future leadership and service, whether in the military or the civilian sector.

Recommended: NAVY100, NAVY101, NAVY200, and NAVY108.

Restriction: Permission of UGST-Navy ROTC.

Additional Information: Priority in enrollment will be given to students in the NROTC program.

NEUR - Neuroscience

NEUR200 Introduction to Neuroscience (3 Credits)

In an evolutionary sense, the job of the nervous system is to produce, control, and coordinate behaviors that help an animal survive and reproduce. Neuroscience is the study of how the nervous system does that. Provides a broad introduction to neuroscience, always keeping the behavioral consequences in view.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171.

Cross-listed with: PSYC202.

Credit Only Granted for: PSYC309U, NEUR200, PSYC202 or PSYC301.

Formerly: PSYC309U.

NEUR238 Special Topics in Neuroscience Student Initiated Courses (1 Credit)

Student Initiated Course (STIC) in Neuroscience. Course will be student initiated and taught in a "journal club" style under close supervision of a faculty mentor. Student instructor and faculty mentor must generate proposal and have approval of the Neuroscience Program to offer a NEUR238 STIC. NEUR238 cannot be applied to the degree requirements of any neuroscience major.

Repeatable to: 5 credits if content differs.

NEUR305 Neural Systems and Circuits (3 Credits)

Overview of the fundamental principles underlying the systems and circuits of the human nervous system, with a focus on cognitive processes and how these systems interact. Students will engage in the analysis of case studies, apply their knowledge of the neural circuitry to explain everyday phenomena, hypothesize ways to further investigate the nervous system, and propose how knowledge of neural circuits can be used in human society and the resulting implications.

Prerequisite: Minimum grade of C- in MATH120 or higher MATH course; and a minimum grade of C- in NEUR200 or BSCI353; or equivalent.

NEUR306 Cellular and Molecular Neuroscience (3 Credits)

Students will gain an appreciation of neuroscience as the nexus of chemistry, physics, and biology. Additionally, they will gain an understanding of how: both individual and networks of neurons function as variable electrical circuits; our nervous systems transduce signals from the outside world and sets-off molecular cascades; the behavior of a neuron can be changed and or remain the same in response to changing variables. Techniques used to study the nervous system at a cellular and molecular level will be discussed.

Prerequisite: 1 course with a minimum grade of C- from NEUR200, BSCI207 or BSCI330.

Corequisite: Must have completed or be concurrently enrolled in PHYS132 or equivalent course.

Cross-listed with: BSCI353.

Credit Only Granted for: NEUR306 or BSCI353.

NEUR329 Instructional Assistance Practicum (1-3 Credits)

Students serve as instructional assistants in selected undergraduate neuroscience courses. Roles and responsibilities and pre/co-requisites are determined on a course- specific basis and approved by the Program Curriculum Committee.

Repeatable to: 9 credits.

Additional Information: Course not acceptable toward major requirements in the Neuroscience.

NEUR379 Special Topics: Research in Neuroscience (1-3 Credits)

Research and/or integrated reading in a topic related to neuroscience, under the direction and close supervision of a member of the University of Maryland faculty.

Recommended: At least a 3.0 neuroscience track GPA and no records of academic misconduct.

Restriction: Permission of Neuroscience Program.

Repeatable to: 12 credits.

NEUR398 Neuroscience Honors Seminar (1 Credit)

This seminar provides an opportunity for the honors students to share their research projects and sharpen their communication skills through presentations, discussions, and peer-review thesis writing. Guest speakers will be invited to provide additional information and insights into various topics in professional development practice, graduate school info and application, etc.

Prerequisite: NEUR200.

Corequisite: NEUR379, NEUR479, or equivalent research credit with instructor permission.

Repeatable to: 4 credits.

NEUR405 Neuroscience Laboratory (3 Credits)

Students will utilize neurophysiological techniques to examine fundamental principles of neurons and neural circuits. This course will reinforce content from prerequisite NEUR courses. Students will also strengthen skills in experimental design and scientific writing.

Prerequisite: NEUR306 or BSCI353; and PHYS132.

Recommended: NEUR305.

Cross-listed with: BSCI455.

Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

NEUR479 Advanced Research in Neuroscience (1-3 Credits)

Research and/or integrated reading in neuroscience under the direction and close supervision of a faculty member.

Prerequisite: Complete at least 3 credits of NEUR379 (or equivalent) with the same faculty member as NEUR479 credit.

Recommended: Minimum neuroscience track GPA of 3.0.

Restriction: Permission of the Neuroscience Program.

Repeatable to: 12 credits.

NFSC - Nutrition and Food Science

NFSC100 Elements of Nutrition (3 Credits)

Fundamentals of human nutrition. Nutrient requirements related to changing individual and family needs.

Credit Only Granted for: KNES264, KNES289F or NFSC100.

NFSC103 Nutrition and Sports Performance (3 Credits)

Nutrition and Sports Performance would give students a brief overview of positive health-related outcomes of a physically active lifestyle. Students would design a fitness regimen and be able to describe when and how glycogen, blood glucose, fat, and protein are used to meet energy needs during different types of physical activity. They would be able to differentiate between anaerobic and aerobic use of glucose, and identify advantages and disadvantages of each. This course would outline how to estimate and athlete's calorie need and discuss the general principles for meeting overall nutrient requirements in the training diet. The problems associated with rapid weight loss by dehydration and the importance of water and/or sports drinks during exercise would be examined. An understanding of the importance of staying well-nourished with carbohydrate, protein, and various vitamins and minerals before, during, and after training would be discussed.

NFSC112 Food: Science and Technology (3 Credits)

Introduction to the realm of food science, food technology and food processing. An overview of the largest industry in the U.S. with emphasis on the science of food and the technology of food preservation from harvest through processing and packaging to distribution and consumer utilization.

NFSC220 Diet: Is it a cause or a solution (3 Credits)

If diet is such a straightforward topic, then why and how does this simple matter result in complicated health problems? This course delves deeply into a Big Question at the intersection of diet and health. Diet is a topic that most people know but few people understand. In addition, diet has become one of the most important lenses for looking at a variety of social, economic, and cultural issues. Since the concept of diet is a continuum and has multifaceted aspects, we need to understand it from broad and multidisciplinary perspectives including social, cultural, and economic aspects.

NFSC298 Sports Nutrition Internship Practicum (1 Credit)

This internship allows students to gain hands on experience working in collegiate athletics. Students interact with an interdisciplinary team including registered dietitians, coaches, trainers, physicians and others to develop and enhance nutrition-related knowledge and skills. They also gain invaluable experience and exposure to the day-to-day duties of a collegiate sports dietitian. Students participate in a weekly 50-minute discussion that is held by two sports nutrition dietitians, and complete 9 hours per week hands on activities at Gossett Football Team House, Xfinity Center, and Varsity Team House.

Prerequisite: Must have completed or be concurrently enrolled in NFSC100; and permission of instructor; or students who have taken courses with comparable content may contact the department.

Repeatable to: 8 credits if content differs.

NFSC315 Nutrition During the Life Cycle (3 Credits)

A study of how development throughout life, including prenatal development, pregnancy, lactation, adolescence and aging, alter nutrient requirements. Students will apply this knowledge to the dietary needs and food choices of these different groups.

Prerequisite: Minimum grade of C- in NFSC100.

NFSC350 Foodservice Operations (5 Credits)

Introduction to management. Responsibilities in quantity food production and purchasing in a foodservice operation. Laboratory experience in planning, preparation, and service of meals which meet the nutritional needs of the consumer.

Prerequisite: Minimum grade of C- in BSCI223 and BMGT364.

Restriction: Must be in Nutrition and Food Science: Dietetics program.

NFSC380 Methods of Nutritional Assessment (3 Credits)

Methods of assessing human nutritional status of populations and individuals. These methods include dietary, anthropometric, clinical evaluations and biochemical measurements.

Prerequisite: Minimum of C- in NFSC315 and BCHM461.

Restriction: Must be in Nutrition and Food Science: Food Science program.

NFSC386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of AGNR-Nutrition and Food Science department.

Restriction: Junior standing or higher.

Formerly: FDSC386 and NUTR386.

NFSC388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Restriction: Must be admitted to AGNR Honors Program.

Repeatable to: 6 credits if content differs.

NFSC398 Seminar (1 Credit)

Presentation and discussion of current literature and research in food science.

Formerly: FDSC398.

NFSC399 Special Problems in Food Science (1-3 Credits)

Designed for advanced undergraduates. Specific problems in food science will be assigned.

Formerly: FDSC399.

NFSC412 Food Processing Technology (4 Credits)

Provides in-depth study of the major industrial modes of food preservation. It integrates aspects of the biology, microbiology, biochemistry and engineering disciplines as they relate to food processing technology and food science.

Prerequisite: CHEM241, CHEM242, NFSC431, NFSC414, and NFSC434.

Corequisite: NFSC421 and NFSC423.

Recommended: MATH120; or completion of MATH220 recommended.

NFSC414 Mechanics of Food Processing (4 Credits)

Applications in the processing and preservation of foods, of power transmission, hydraulics, electricity, thermodynamics, refrigeration, instruments and controls, materials handling and time and motion analysis.

Prerequisite: PHYS121.

Credit Only Granted for: ENBE414 or NFSC414.

Formerly: ENBE414.

NFSC416 Food Safety System (2 Credits)

Focuses on identifying and reducing biological, chemical and physical risks in food manufacturing and thereby reduce outbreak incidences and improve public health. The course is based on the US FDA recognized curriculum on 'Hazard Analysis and Risk Based Preventive Controls' (HARPC) regulations for manufacturing human foods. A successful completion of this course will result in students becoming 'preventive controls qualified individuals' as defined by the US FDA.

Restriction: Permission of AGNR-Nutrition and Food Science department.

Repeatable to: 0 credit.

Credit Only Granted for: NFSC498T, NFSC416, NFSC679T, or NFSC616.

Formerly: NFSC498T.

NFSC420 Nutritional Biochemistry (4 Credits)

This is a comprehensive course that integrates aspects of biochemistry, nutrition, and molecular biology. This course deals with (1) structure and function of biochemical macromolecules including carbohydrates, proteins, lipids, and nucleic acids; (2) transcriptional and translational regulation focusing on how gene expression is controlled at the level of transcription and translation, particularly in response to nutritional factors; (3) nutritional principles covering impact of digestion and absorption; (4) biochemical metabolism on emphasis of how the body processes nutrients and how metabolic pathways are regulated.

Prerequisite: NFSC315 and BCHM461.

NFSC421 Food Chemistry (3 Credits)

Basic chemical and physical concepts are applied to the composition and properties of foods. Emphasis on the relationship of processing technology to the keeping quality, nutritional value, and acceptability of foods.

Prerequisite: BCHM461.

NFSC422 Food Product Research and Development (3 Credits)

A capstone course for FDSC majors. A study of the research and development of new food products. Application of food technology, engineering, safety and packaging are integrated by teams of students to develop a new food product from concept to pilot plant scale-up. Students will travel to nearby food processing plants on two to four Saturdays during the semester.

Restriction: Senior standing; and must be in a major within AGNR-Nutrition and Food Science department; and permission of AGNR-Nutrition and Food Science department.

Formerly: FDSC422.

NFSC423 Food Chemistry Laboratory (3 Credits)

Analysis of the major and minor constituents of food using chemical, physical and instrumental methods in concordance with current food industry and regulatory practices. Laboratory exercises coincide with lecture subjects in NFSC421.

Prerequisite: Must have completed or be concurrently enrolled in NFSC421.

NFSC425 International Nutrition (3 Credits)

Nutritional status of world population; consequences of malnutrition on health and mental development; and local, national, and international programs for nutritional improvement.

Prerequisite: Must have completed one course in basic nutrition.

NFSC426 Current Topics in Nutrition and Chronic Disease (3 Credits)

Analysis of current topics related to diet, nutrition, and human health at cellular, molecular and biochemical level. Further, this course will provide overview of the current methods, and in vitro and in vivo model systems used in nutrition research. Syllabus includes topics relevant to dietary regulation of genes/proteins and their impact on both physiological and pathological conditions including hyperlipidemia, hyperglycemia, fibrosis, food allergy, nutraceuticals, inflammatory diseases (IBD), cardiovascular diseases (atherosclerosis and stenosis), and oncogenesis. This course is designed to help students to understand and apply current scientific concepts and research methods, and to obtain necessary skills in evaluation and interpretation of evidence based scientific data.

Jointly offered with: NFSC621.

Credit Only Granted for: NFSC498F, NFSC426, NFSC678F, or NFSC621.

Formerly: NFSC498F.

NFSC427 Current Topics on Diet, Gut Microbiota Health and Metabolic Disease (3 Credits)

A review of current science linking the gut microbiota/microbiome with general and public health. It covers the composition of a healthy gut microbiota, its acquisition, how it is studied and analyzed; Gut microbiota changes with diet, specific foods, immigration and globalization and exercise; Its links to obesity, liver disease, insulin resistance and diabetes and cardiovascular disease; Links to the immune system; Targeting the gut microbiota composition and function to protect against or treat metabolic diseases. This course will be of use to public health and health care professionals, Food and/or Nutrition scientists, Dieticians, and those generally interested in understanding the health relevance of news reports or scientific reports on the microbiome.

Recommended: BCHM461.

Jointly offered with: NFSC627.

Credit Only Granted for: NFSC678K, NFSC498K, NFSC427, or NFSC627.

Formerly: NFSC498K.

NFSC430 Food Microbiology (3 Credits)

A study of microorganisms of major importance to the food industry with emphasis on food-borne outbreaks, public health significance, bioprocessing of foods, disease control, and the microbial spoilage of foods.

Prerequisite: BSCI223; or permission of instructor.

Credit Only Granted for: ANSC430 or NFSC430.

Formerly: FDSC430.

NFSC431 Food Quality Control (4 Credits)

Definition and organization of the quality control function in the food industry; preparation of specifications; statistical methods for acceptance sampling; in-plant and processed product inspection. Instrumental and sensory methods for evaluating sensory quality, identity and wholesomeness and their integration into grades and standards of quality. Statistical Process Control (SPC).

NFSC434 Food Microbiology Laboratory (3 Credits)

A study of techniques and procedures used in the microbiological examination of foods.

Prerequisite: Must have completed or be concurrently enrolled in NFSC430.

Credit Only Granted for: NFSC434 or ANSC434.

Formerly: FDSC434.

NFSC436 Diet and Optimal Human Health (3 Credits)

Focuses on maintaining optimal health and preventing diseases in humans with attention to diet. Reviews the main causes (nutritional/behavioral/lifestyle/ environmental/genetic factors) of diseases and nutrient needs, sources, functions and interactions, and deals with the benefits of healthy diets and nutraceutical/pharmaceutical option on human health. The emphasis will be on developing conceptual knowledge, critical thinking and problem solving skills and the application of nutrition in the health promotion.

Prerequisite: NFSC100, BSCI170, and BSCI171 .

Jointly offered with: NFSC636.

Credit Only Granted for: NFSC498L, NFSC678L, NFSC436, or NFSC636.

Formerly: NFSC498L.

NFSC440 Advanced Human Nutrition (4 Credits)

A critical study of physiologic, molecular and metabolic influences on utilization of carbohydrates, lipids, proteins, vitamins, macro-and micro-minerals, and nonnutritive components of food. Interactions of these nutrients and food components will be examined relative to maintaining health.

Prerequisite: Minimum of C- in NFSC100, BCHM462 and BSCI440.

NFSC450 Food and Nutrient Analysis (3 Credits)

Methods and practices of the analysis of foods and nutrients. An overview of the principles and basic mechanisms used in many of the analytical procedures commonly used in food and nutrition research. Emphasis will be placed on hands-on development of skills necessary to complete each analytical procedure; and on the accurate and concise description of the methodology and results from their application and on the regulations governing food analysis for nutritional labeling.

Prerequisite: BCHM461 and NFSC100.

Formerly: NUTR450.

NFSC455 Medical Nutrition Therapy I (4 Credits)

Advanced clinical nutrition course for dietetics or nutrition science majors. Modifications of the normal adequate diet to meet human nutritional needs in acute and chronic diseases and metabolic disorders. Includes energy balance and weight management, nutritional genomics, nutrition counseling, autoimmune disease, nutrition for pediatric conditions.

Prerequisite: NFSC380.

Corequisite: NFSC440.

NFSC456 Medical Nutrition Therapy II (4 Credits)

Modifications of the normal adequate diet to meet human nutritional needs in acute and chronic diseases and metabolic disorders.

Prerequisite: Minimum of C- in NFSC380 and NFSC440; and permission of AGNR-Nutrition and Food Science department.

NFSC470 Community Nutrition (3 Credits)

Perspectives underlying the practice of nutrition services in community settings. Assessment of needs, program planning and evaluation.

Programs and strategies to meet nutrition needs outside the acute care setting, such as nutrition education and food assistance. National nutrition policy and federal initiatives in nutrition will be examined.

Students will be required to travel to local community nutrition sites during the semester.

Prerequisite: Minimum of C- in NFSC315.

NFSC490 Special Problems in Nutrition (2-3 Credits)

Individually selected problems in the area of human nutrition.

Prerequisite: NFSC440; and permission of AGNR-Nutrition and Food Science department.

NFSC491 Professional Issues and Opportunities in Dietetics (3 Credits)

A capstone course for dietetics majors. Students will integrate knowledge and theory of nutrition, food, management, psychology, and social behaviors necessary to support quality dietetic practice. Working in teams, students will participate in case studies, simulated situations and community projects. Individuals and groups will present cases as well as papers on published research.

Prerequisite: Minimum of C- in NFSC350 and permission of Nutrition and Food Science Dietetics program.

Corequisite: NFSC456.

Restriction: Senior standing or higher; and must be in Nutrition and Food Science: Dietetics program.

NFSC498 Selected Topics (1-3 Credits)

Selected current aspects of food.

Restriction: Permission of AGNR-Nutrition and Food Science department.

Repeatable to: 6 credits if content differs.

OURS - Office of Undergraduate Research

OURS199 Research Internship (3 Credits)

Research and mentorship-centered course designed to provide research experience, technical skill sets, an understanding of the expectations and requirements of research environments, and broad professional development. Students in this course work directly with a faculty mentor and peers in laboratory and other research environments on the design and fulfillment of authentic and discipline-relevant research outcomes. The iterative advancement of final research products contributes to the development of higher capacities in collaboration and teamwork, communication, critical thinking, and discipline-specific training and skill sets.

Repeatable to: 12 credits.

PEER - Health Center

PEER311 Peer Education Mental Health & Wellness (3 Credits)

Designed to train students to become Peer Educators who are responsible for presenting to members of the campus community about issues surrounding stress management, mental illness, appropriate on/off campus resources, stigma, body image, helping a friend in distress, and other issues related to mental health and wellness, including bystander intervention. Programming is done in classroom settings, residence halls, and at tables during special events.

Prerequisite: Students must complete an interview before enrolling in this course.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5.

Credit Only Granted for: HLTH381 or PEER311.

Formerly: HLTH 381.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required.

PEER312 Peer Education: Preventing Power-Based Violence (3 Credits)

Designed to train students to become Peer Educators who are responsible for presenting to members of the campus community about the complex dynamics surrounding issues of power-based personal violence. This includes: sexual assault, relationship violence, stalking, bystander intervention, consent, and rape culture. Students fully learn the on and off-campus resources for victim/survivors. Programming is done in classroom settings, residence halls, Greek life spaces, and at tables during special events.

Prerequisite: Students must complete an interview before enrolling in this course.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5.

Credit Only Granted for: HLTH382 or PEER312.

Formerly: HLTH382.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required.

PEER313 Peer Education: Alcohol and Other Drugs Education (3 Credits)

Designed to train students to become Peer Educators who are responsible for presenting to members of the campus community about issues surrounding substance use, including (but not limited to) alcohol, marijuana, and various other drugs, providing information about campus services for those with substance use related issues, and educating students about other topics related to harm reduction strategies and promoting students' overall well-being, including bystander intervention. Programming is done in classroom settings, residence halls, and at tables during special events.

Prerequisite: Students must complete an interview before enrolling in this course.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5.

Credit Only Granted for: HLTH380 or PEER313.

Formerly: HLTH380.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required.

PEER314 Peer Education: Sexual Health & Wellness (3 Credits)

Designed to train students to become Peer Educators who are responsible for presenting to members of the campus community about issues surrounding Sexually Transmitted Infections, sexual health testing and screening, birth control options, healthy sexuality, consent and communication, condoms and other barrier protection, campus sexual health services, and other issues related to sexual well being including bystander intervention. Programming is done in classroom settings, residence halls, and at tables during special events.

Prerequisite: Students must complete an interview before enrolling in this course.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5.

Credit Only Granted for: HLTH383 or PEER314.

Formerly: HLTH383.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required.

PEER318 CARE Peer Advocacy (3 Credits)

Designed to train students to become Peer Advocates who are responsible for providing crisis and short-term support services for victims of sexual assault, relationship violence, stalking, sexual harassment and child abuse. Students will be meeting with clients and providing emotional support and resources (both on and off campus). During weekly classes, students will be trained in trauma-informed crisis intervention procedures that will not only help them assist clients during in-person sessions but will help them support clients via the crisis cell. Students will be expected to maintain the crisis cell (on a shared basis) throughout the semester as well as maintain 10 hours per week in the CARE office. In addition to maintaining the crisis cell and office hours, during the spring semester students will be tasked with working as a team in planning and executing a Take Back the Night event.

Prerequisite: Students must complete an interview before enrolling in this course; and permission of instructor.

Recommended: PSYC100 and HLTH377.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5; and students must sign up for the same course in the spring semester; and students are only permitted to enroll in the repeatable year long course once during their academic career. If students wish to continue working with the office after the course has been completed (Fall and Spring), they can do so on a volunteer basis; and must not have taken HLTH382 as a CARE Advocate course.

Repeatable to: 6 credits.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required (crisis cell and special events).

PEER319 CARE to Stop Violence Outreach Peer Program (3 Credits)

A two semester, 6-credit course designed to train students in the knowledge, values and skills to build professional relationships and become leaders in community development related to the social justice issue of sexual misconduct with emphasis on the college campus environment.

Prerequisite: Permission of instructor; and students must complete an interview before enrolling in this course.

Restriction: Permission of instructor; and minimum cumulative GPA of 2.5; and students must sign up for the same course in the spring semester; and students are only permitted to enroll in the repeatable year long course once during their academic career. If students wish to continue working with the office after the course has been completed (Fall and Spring), they can do so on a volunteer basis; and must not have taken HLTH382 as a CARE Outreach course.

Repeatable to: 9 credits.

Formerly: HLTH382.

Additional Information: Students are required to attend a 40-hour training the week before classes begin which will equip them with the information and tools necessary to provide outreach as early as the first week of the Fall classes. Some evening and weekend hours may be required.

PEER321 Advanced Peer Education Mental Health and Wellness (3 Credits)

PEER 321 is a three-credit, interdisciplinary course building upon the stress management, mental illness, appropriate on/off campus resources, stigma, body image, helping a friend in distress, bystander intervention, and mental health/wellness knowledge gained during PEER 311. Students will gain a fundamental understanding of program planning basics through a series of assignments where they theoretically plan their own prevention or awareness program for the University of Maryland campus community. Students who become a Peer Leader during year two may have the opportunity to implement this program on campus. This course also provides advanced training in the skills necessary to serve as an effective Peer Educator under the University Health Center. Peer Educators will continue to provide outreach and education to the campus community through various outreach events, workshops, and more.

Prerequisite: Students must complete an interview before enrolling in this course; and minimum grade of B- in PEER311.

Restriction: Minimum cumulative GPA of 2.5; and permission of instructor.

Credit Only Granted for: HLTH381 or PEER321.

Formerly: HLTH381.

Additional Information: In addition to the weekly class lectures and experiential learning opportunities facilitating educational outreach on campus, advanced peer educators will meet weekly in groups. These group meetings will provide a space for the students to incorporate class content to enhance the design, development, and evaluation of a sexual assault prevention or awareness program for the University of Maryland campus community. Coordinators will meet with student groups to facilitate and supervise this process.

PEER322 Advanced Peer Education: Preventing Power-Based Violence (3 Credits)

PEER 322 is a three-credit, interdisciplinary course building upon the sexual assault, relationship violence, stalking, bystander intervention, and wellness knowledge gained during PEER 312. Students will gain a fundamental understanding of program planning basics through a series of assignments where they theoretically plan their own prevention or awareness program for the University of Maryland campus community. Students who become a Peer Leader during year two may have the opportunity to implement this program on campus. This course also provides advanced training in the skills necessary to serve as an effective Peer Educator under the University Health Center. Peer Educators will continue to provide outreach and education to the campus community through various outreach events, workshops, and more.

Prerequisite: Students must complete an interview before enrolling in this course; and minimum grade of B- in PEER312.

Restriction: Minimum cumulative GPA of 2.5; and permission of instructor.

Credit Only Granted for: HLTH382 or PEER322.

Formerly: HLTH382.

Additional Information: In addition to the weekly class lectures and experiential learning opportunities facilitating educational outreach on campus, advanced peer educators will meet weekly in groups. These group meetings will provide a space for the students to incorporate class content to enhance the design, development, and evaluation of a sexual assault prevention or awareness program for the University of Maryland campus community. Coordinators will meet with student groups to facilitate and supervise this process.

PEER323 Advanced Peer Education: Alcohol and Other Drugs Education (3 Credits)

PEER 323 is a three-credit, interdisciplinary course building upon the alcohol and other drugs (AOD) education knowledge gained during PEER 313. Students will gain a fundamental understanding of program planning basics through a series of assignments where they theoretically plan their own wellness program for the University of Maryland campus community. Students who become Peer Leaders during year two (PEER338) may have the opportunity to implement this program on campus. This course also provides advanced training in the skills necessary to serve as an effective Peer Educator under the University Health Center. Peer Educators will continue to provide outreach and education to the campus community through various outreach events, workshops, and more.

Prerequisite: Students must complete an interview before enrolling in this course; and minimum grade of B- in PEER313.

Restriction: Minimum cumulative GPA of 2.5; and permission of instructor.

Credit Only Granted for: HLTH380 or PEER323.

Formerly: HLTH380.

Additional Information: In addition to the weekly class lectures and experiential learning opportunities facilitating educational outreach on campus, advanced peer educators will meet weekly in groups. These group meetings will provide a space for the students to incorporate class content to enhance the design, development, and evaluation of an alcohol and other drugs education program for the University of Maryland campus community. Coordinators will meet with student groups to facilitate and supervise this process.

PEER324 Advanced Peer Education: Sexual Health & Wellness (3 Credits)

PEER 324 is a three-credit, interdisciplinary course building upon the sexual health and wellness knowledge gained during PEER 314. Students will gain a fundamental understanding of program planning basics through a series of assignments where they theoretically plan their own wellness program for the University of Maryland campus community. Students who become Peer Leaders during year two (PEER338) may have the opportunity to implement this program on campus. This course also provides advanced training in the skills necessary to serve as an effective Peer Educator under the University Health Center. Peer Educators will continue to provide outreach and education to the campus community through various outreach events, workshops, and more.

Prerequisite: Students must complete an interview before enrolling in this course; and minimum grade of B- in PEER314.

Restriction: Minimum cumulative GPA of 2.5; and permission of instructor.

Credit Only Granted for: HLTH383 or PEER324.

Formerly: HLTH383.

Additional Information: In addition to the weekly class lectures and experiential learning opportunities facilitating educational outreach on campus, advanced peer educators will meet weekly in groups. These group meetings will provide a space for the students to incorporate class content to enhance the design, development, and evaluation of a sexual health and wellness program for the University of Maryland campus community. Coordinators will meet with student groups to facilitate and supervise this process.

PEER338 PEER LEADERSHIP AND EDUCATION (3 Credits)

An interdisciplinary independent study designed to enhance the scope of learning around UHC peer education topics and train students to serve as leaders for those enrolled in first year peer courses, PEER31X and PEER32X. Second year peers are trained to facilitate intersectional and advanced health education dialogue, as well as serve in leadership roles for the course in which they were previously enrolled, PEER31X and PEER32X. Additionally, Peer Leader responsibilities include creating and implementing campus wide events to promote learning around the intersections between UHC peer education group topics (power-based violence, sexual health, alcohol and other drugs, stress and mental health). Peer Leaders will have different responsibilities based on the programmatic needs and goals of the semester.

Prerequisite: 1 course with a minimum grade of B- from (PEER321, PEER322, PEER323, PEER324).

Restriction: Minimum cumulative GPA of 3.0.

Repeatable to: 6 credits.

PERS - Persian**PERS101 Elementary Persian I (4 Credits)**

Introduction to the alphabet, pronunciation patterns, greetings, basic structures, and other fundamentals, with emphasis on oral and aural skills.

Prerequisite: Must have appropriate Foreign Language Placement Test (FLPT) score.

Restriction: Must not be native/fluent speaker of Persian.

PERS102 Elementary Persian II (4 Credits)

Continuation of PERS101 with emphasis on the use of formal language, vocabulary building, and reading.

Prerequisite: PERS101; or must have appropriate Foreign Language Placement Test (FLPT) score.

Restriction: Must not be native/fluent speaker of Persian.

PERS103 Beginning Persian I (3 Credits)

Introduction to the fundamental grammatical structures, phonology, and orthography. Students work toward developing foundational communicative and interactional competence in Persian.

Restriction: Must not be a native/fluent speaker of Persian. Native/fluent speakers of Persian or students who have previously attended school in Persian speaking countries should take the World Language Placement and see the Persian Program Advisor to identify the correct Persian course for which to register.

Credit Only Granted for: PERS101 or PERS103.

PERS104 Beginning Persian II (3 Credits)

Continuation of PERS103 with sustained emphasis on the simultaneous development of structural and communicative competence in Persian.

Prerequisite: PERS103; or must have appropriate World Language Placement (WLP) score.

Restriction: Must not be a native/fluent speaker of Persian. Native/fluent speakers of Persian or students who have previously attended school in Persian speaking countries should take the World Language Placement and see the Persian Program Advisor to identify the correct Persian course for which to register.

Credit Only Granted for: PERS102 or PERS104.

PERS105 Intensive Elementary Persian I (6 Credits)

Intensive training in spoken and written Persian at elementary level. Basic literacy skills, vocabulary, pronunciation and grammar developed through a highly interactive approach. Substantial cultural component familiarizing students with cultural themes related to Iran and the Persian speaking world. Taught in Persian.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Open to beginning learners of Persian only.

PERS106 Intensive Elementary Persian II (6 Credits)

Intensive training in spoken and written Persian at elementary level (ACTFL Novice High to Intermediate Low). Continues building basic literacy skills, vocabulary, and grammar through highly a interactive approach. Substantial cultural component familiarizing students with cultural themes related to Iran and the Persian speaking world. Taught in Persian.

Prerequisite: Pre-requisite: PERS105, or equivalent, as determined by the WLPT (World Language Placement Test).

PERS201 Intermediate Persian I (3 Credits)

Development of speaking, reading, writing, listening and cultural knowledge through wide variety of activities.

Prerequisite: PERS102; or Must have appropriate Foreign Language Placement Test (FLPT) score.

Restriction: Must not be native/fluent speaker of Persian.

PERS202 Intermediate Persian II (3 Credits)

Further development of speaking, writing, listening and cultural knowledge, with special focus on culture.

Prerequisite: PERS201; or Must have appropriate Foreign Language Placement Test (FLPT) score.

Restriction: Must not be native/fluent speaker of Persian.

PERS205 Intensive Intermediate Persian I (6 Credits)

Development of Persian language proficiency and cultural knowledge at the intermediate level (Intermediate-Mid on ACTFL scale). Taught in Persian.

Prerequisite: PERS106; or equivalent as determined by World Language Placement Test (WLPT).

PERS206 Intensive Intermediate Persian II (6 Credits)

Designed to further develop Persian language proficiency and cultural knowledge at an intermediate level (Intermediate High on ACTFL scale). Taught in Persian.

Prerequisite: PERS205; or equivalent, as determined by the WLPT (World Language Placement Test).

PERS211 Intermediate Conversation (3 Credits)

Development of aural and oral skills in Persian. Various genres and registers of speech. Special focus on contemporary daily life, with use of up-to-date media sources.

Prerequisite: PERS102; or students who have taken courses with comparable content may contact the department.

Recommended: Concurrent enrollment in PERS201.

PERS212 Intermediate Reading in Persian (3 Credits)

Focus on linguistic skill specific to reading; introduction to written traditions of Persian.

Prerequisite: PERS211 and PERS201; or permission of instructor.

Corequisite: PERS202; or permission of instructor.

PERS251 Modern Iran (3 Credits)

General sociopolitical introduction to modern Iran from establishment of the Qajar dynasty in the late 18th century to the present day. Taught in English.

Cross-listed with: HIST219X.

Credit Only Granted for: PERS251 or HIST219X.

PERS252 Gender and Body in Iran (3 Credits)

Multidisciplinary approach to key topics concerning gender and body in Iran, to include insights from religion, history, sociology, anthropology, disability studies, travel literature, arts, and fashion. Taught in English.

Credit Only Granted for: WMST298J, or PERS252.

PERS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PERS280 Art Activism in Iran (3 Credits)

Explores Iranian artists' intent and hope for change and their critical and playful strategies of making a difference through their visual or performing arts created since 1980. While exploring key concepts, contexts, and debates by examining a variety of artworks, we explore diverse and unique transgressive stories, strategies, and styles that these works present to address themes of social justice through the art. We examine how multimedia art forms (dance, theatre, cinema, painting, digital art, and music) empower Iranian artists to practice their identity and exercise their agency as these aspects intersect with race, ethnicity, class, sexuality, ability, and education in a shifting and multilayered context.

Credit Only Granted for: PERS289M, ARTH3890, or PERS280.

Formerly: PERS298M.

PERS283 Iranian Cinema (3 Credits)

Introduction to Iranian cinema, society, and culture. Taught in English.

Cross-listed with: CINE283.

Credit Only Granted for: PERS283, CINE283 or FILM298B.

PERS298 Special Topics in Persian Studies (1-3 Credits)

Special topic to be announced when course is offered.

Repeatable to: 9 credits if content differs.

PERS299 Directed Study in Persian Language (1-3 Credits)

Directed study in Persian. Taught in Persian.

Prerequisite: PERS202; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PERS301 Advanced Persian I (3 Credits)

Development of speaking, reading, writing, listening and cultural knowledge through wide variety of activities, especially reading.

Prerequisite: PERS202; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be native/fluent speaker of Persian.

PERS302 Advanced Persian II (3 Credits)

Further development of speaking, reading, writing, listening and cultural knowledge, with special focus on reading, in a variety of literary genres.

Prerequisite: PERS301; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be native/fluent speaker of Persian.

PERS305 Intensive Advanced Persian I (6 Credits)

Development of Persian language proficiency and cultural competence at an advanced level (Advanced Low on ACTFL scale). Taught in Persian.

Prerequisite: Must have completed PERS206; or equivalent as determined by World Language Placement Test (WLPT).

PERS306 Intensive Advanced Persian II (6 Credits)

Continued development of Persian language proficiency at an Advanced Mid level on ACTFL scale through a whole language approach integrating listening, speaking, reading and writing. Taught in Persian.

Prerequisite: PERS305; or equivalent as determined by WLPT (World Language Placement Test).

PERS311 Persian Media (3 Credits)

Examines issues, values, institutions of the contemporary Persian and Persianate world, primarily through analysis and discussion of current events as reported in the written and audiovisual press. Focus will be on increasing content knowledge as well as linguistic competency in Persian. Taught in Persian.

Prerequisite: PERS301; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PERS312 Contemporary Iranian Culture (3 Credits)

Study of the culture of contemporary Iran (post-evolution) with focus on the contemporary social, political, literary and artistic life in Iran. Taught in Persian.

Prerequisite: PERS301; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be native/fluent speaker of Persian.

PERS353 Iranian Life in Literature and Film (3 Credits)

Treats major themes in modern literature and life of Iranians. Topics examined include Iranian identity, religious traditions, modern life, and expatriate communities. Taught in English.

PERS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PERS371 Introduction to Persian Literature in Translation (3 Credits)

Introduction to classical and modern canons of Persian literature in historical, esthetic, and social context. Taught in English.

PERS385 Theatre and Dance in Iran and Afghanistan (3 Credits)

Students will learn about stories, plays, and movements in Iran and Afghanistan from past to present. Through watching performances, readings, and discussions, we explore the relationship between storytelling, body, space, and power in forming and performing identity and life experiences. Looking at case studies from traditional, popular, and western style dance and theater are an exciting part of the course.

Note: This course requires no prior knowledge of Persian culture or dance and theatre studies on the part of the students.

Cross-listed with: TDPS358A, THET328W.

Repeatable to: 3 credits if content differs.

Credit Only Granted for: TDPS358A, THET328W, PERS398A, or PERS385.

Formerly: PERS398A.

PERS386 Experiential Learning (3-6 Credits)

Pre-professional experience in research, analysis and writing in a work setting. Project proposal approved by faculty and internship sponsor.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

PERS398 Special Topics in Persian Studies (1-3 Credits)

Special topic to be announced when course is offered. Taught in Persian.

Prerequisite: PERS301; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PERS399 Directed Study in Persian (1-3 Credits)

Directed study with faculty supervision.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Sophomore standing or higher.

Repeatable to: 9 credits if content differs.

PERS402 Persian Translation (3 Credits)

Focuses on hands-on practice of English/Persian and Persian/English translation as well as the problematic issues of translation. Taught in Persian.

Prerequisite: PERS302; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PERS405 Media and the Current Issues in Iranian Society (6 Credits)

Develops Persian language proficiency and domain-specific knowledge at advanced-mid to advanced-high level on ACTFL scale. Enhances linguistic and cultural competence. Provides a broad understanding of some of the current social, political and economic issues in modern Iran. Taught in Persian.

Prerequisite: PERS306; or equivalent as determined by WLPT (World Language Placement Test).

PERS406 Practicum in Persian Translation (6 Credits)

Provides opportunities for translation, interpretation, and analysis of various authentic oral and written texts (both English to Persian and Persian to English). Facilitates the development of Persian language proficiency at advanced level through a task-based approach that integrates all the language skills in pedagogical translation activities.

Prerequisite: PERS306; or equivalent as determined by the WLPT (World Language Placement Test).

PERS498 Special Topics in Persian Studies (3 Credits)

Topic and language to be announced when offered.

Prerequisite: Permission of instructor.

Repeatable to: 9 credits if content differs.

PHIL - Philosophy

PHIL100 Introduction to Philosophy (3 Credits)

An introduction to the literature, problems, and methods of philosophy either through a study of some of the main figures in philosophic thought or through an examination of some of the central and recurring problems of philosophy.

PHIL140 Contemporary Moral Issues (3 Credits)

The uses of philosophical analysis in thinking clearly about such widely debated moral issues as abortion, euthanasia, homosexuality, pornography, reverse discrimination, the death penalty, business ethics, sexual equality, and economic justice.

PHIL170 Introduction to Symbolic Logic (3 Credits)

This course will introduce the basic concepts and techniques of modern symbolic logic, with an emphasis on developing skills in two areas: first, translating between ordinary language and logical notation; second, establishing the validity or invalidity of arguments using the methods of truth tables, deductions, and countermodels. Although the subject of symbolic logic was developed by mathematicians and philosophers for their own special purposes (which we will discuss), logical concepts and techniques have found applications in a variety of disciplines, including computer science, economics, law, linguistics, and psychology. We may also consider some of these applications.

PHIL171 Reasoning For Humans: Clear Thinking in an Uncertain World (3 Credits)

Reasoning is a transition in thought in which some beliefs or thoughts provide grounds or reasons for others. What makes certain transitions of thought rational or reasonable and others irrational or erratic is a major focus of investigation in diverse research areas, such as philosophy, logic, artificial intelligence, cognitive science, and psychology. This course is an introduction to logic and probability with a focus on applications to the study of the foundations of human reasoning.

Credit Only Granted for: PHIL171 or PHIL218A.

Formerly: PHIL218A.

PHIL201 Spooky Action at a Distance? Where Physics Meets Metaphysics (3 Credits)

Einstein believed that physics should represent a "reality in space and time, free from spooky action at a distance." He worried that quantum theory failed this test. Later developments suggest that quantum systems really can influence one another instantly, no matter how far apart they are, but the question remains controversial and experiments are not sufficient to provide an answer. This self-contained course will draw on philosophy and physics to investigate the controversy.

Recommended: Students should be comfortable with moderately mathematical presentations. Placement into MATH110 or higher is strongly recommended.

Credit Only Granted for: PHIL201 or PHIL209I.

Formerly: PHIL209I.

PHIL202 Know Thyself: Wisdom Through Cognitive Science (3 Credits)

How do we improve our decision making? Cognitive science demonstrates that self-knowledge isn't as easy as we think, and that there are numerous biases and fallacies that impact our decision-making in ways that are hard for us to be aware of. In this course you will learn what some of these are and how they have been discovered, and you will explore potential strategies for avoiding these fallacies and for making wiser choices.

Credit Only Granted for: PHIL209N or PHIL202.

Formerly: PHIL209N.

PHIL203 The Rights and Wrongs of Killing People (3 Credits)

Virtually everyone thinks it's permissible to kill people only in special circumstances. But why is killing usually wrong? Is it ever acceptable to kill an innocent human being intentionally? This course raises these and related questions and examines cases such as terrorism, suicide, abortion, euthanasia, the death penalty, war. Except for a brief discussion of animals, all the controversies considered deal with killing and causing death to human beings.

Credit Only Granted for: PHIL209J or PHIL203.

Formerly: PHIL209J.

PHIL204 Happiness (3 Credits)

What does the discipline of philosophy teach us about happiness? This course explores how philosophers have addressed questions about the nature of happiness and its role in the good human life. Questions to be addressed include: what is it to be happy? What social, economic, and political institutions foster and support human happiness? Can an immoral person be happy? And is a happy life the same as a meaningful life?

Credit Only Granted for: PHIL209E or PHIL204.

Formerly: PHIL209E.

PHIL205 Are Sports Ethical? (3 Credits)

Things happen routinely in sports that would seem morally unacceptable in other context: violence between the participants, attempts to trick the referee, fans hoping that some players would do embarrassingly badly, spectators feeling anger towards whole nations. Nonetheless, all of this may seem reasonable and even justifiable within a sporting context. This course will investigate the ethical structure of sports, and what it tells us about the ethics of everyday life. Philosophy will provide the primary disciplinary context, but we will also think about sociological, legal and anthropological perspectives on sports. Issues will include the nature of sportsmanship, what types of violence in sports are acceptable, drug use in sports, what it means to be a fan (for example, asking why loyalty to your team is valuable) and how our view of sports interacts with our view of nations. By the end of the course you should have gained familiarity with a variety of ethical concepts and a sensitivity to the ethical issues in sports. You should also find that by thinking about morality in the context of sports, you will look at larger ethical issues in new ways.

Credit Only Granted for: PHIL205, PHIL209G, or HONR229E.

Formerly: HONR229E.

PHIL209 Philosophical Issues (3 Credits)

An examination of selected philosophical issues of general interest.

Repeatable to: 6 credits if content differs.

PHIL210 Philosophy of the Universe (3 Credits)

An exploration of how philosophy can help us understand our place in the cosmos. The course covers a variety of topics at the intersection of science and philosophy, such as: How does the world we observe emerge from the microscopic world science tells us about? What are laws of nature? What is time? What is life? The emphasis is not on leading students to particular conclusions about these topics. Instead, it is to learn how to ask these questions critically and to understand what would count as relevant evidence for an answer.

Credit Only Granted for: PHIL209U or PHIL210.

Formerly: PHIL209U.

PHIL211 AI & ETHICS (3 Credits)

An introduction to a major subfield of contemporary Philosophy, namely applied ethics, and the experience of using some major tools in the practice of philosophy more generally, namely, the construction and formal evaluation of arguments, conceptual analysis, the use of thought experiments, and clear, direct and persuasive writing. Learning how to execute the latter will involve an intense iterative process. The substantive focus of the course will be the ethical evaluation of Artificial Intelligence (AI) in some of its current and potentially future incarnations. We'll examine algorithmic opacity, algorithmic bias and decision-making, autonomous weapons systems, human-robot interaction, and artificial moral agents, in order to uncover what, if any, ethical issues they give rise to.

Credit Only Granted for: PHIL209D or PHIL211.

Formerly: PHIL209D.

PHIL218 Issues in in Epistemology/Metaphysics (3 Credits)

An examination of selected philosophical issues in epistemology or metaphysics.

Repeatable to: 12 credits if content differs.

Additional Information: Counts toward the epistemology/metaphysics requirement for the Philosophy major.

PHIL220 Bioethics: Regulating Right and Wrong (3 Credits)

Bioethicists formulate ethical guidelines. They answer questions such as: When life-saving health resources are scarce, who should get them? Should we increase supply of one such resource, kidneys, by buying them from living "donors"? If drug trials in developing countries benefit patients who consent to participate, are the trials ethical, even if the same research would be forbidden in the US? If a sick person aims to hasten her death, how, if at all, might her doctor permissibly help her? In this course, students construct and defend ethical rules in four domains: research ethics, allocation of scarce resources, markets in organs, and physician-assisted dying.

Credit Only Granted for: PHIL209A or PHIL220.

Formerly: PHIL209A.

PHIL228 Issues in History of Philosophy (3 Credits)

An examination of selected issues in the history of philosophy.

Repeatable to: 12 credits if content differs.

Additional Information: Counts toward the history of philosophy requirement for the Philosophy major.

PHIL234 Fundamental Concepts of Judaism (3 Credits)

A conceptual introduction to Judaism, analyzing its fundamental concepts from both analytical and historical perspectives. Discussion of "normative" Judaism as well as other conceptions of Judaism. Topics include: God, the Jewish people, authority, ethics, the sacred and the profane, particularism and universalism.

Cross-listed with: JWST250, RELS250.

Credit Only Granted for: JWST250, PHIL234, or RELS250.

PHIL235 Authority, Faith, and Reason in Judaism (3 Credits)

A broad survey of the concepts of authority, faith, and reason in Jewish tradition from the Bible to the modern period, and their interrelationships.

PHIL236 Philosophy of Religion (3 Credits)

A philosophical study of some of the main problems of religious thought: the nature of religious experience, the justification of religious belief, the conflicting claims of religion and science, and the relation between religion and morality.

Cross-listed with: RELS236.

Credit Only Granted for: PHIL236 or RELS236.

PHIL238 Issues in Value Theory (3 Credits)

An examination of selected issues in ethics, aesthetics, political philosophy and related areas.

Repeatable to: 12 credits if content differs.

Additional Information: Counts toward the value theory requirement for the Philosophy major.

PHIL245 Political and Social Philosophy I (3 Credits)

A critical examination of such classical political theories as those of Plato, Hobbes, Locke, Rousseau, Mill, Marx, and such contemporary theories as those of Hayek, Rawls, and recent Marxist thinkers.

PHIL250 Philosophy of Science I (3 Credits)

Main issues in the philosophy of science. Special attention to the ways scientific developments have influenced the philosophy of science and how philosophy of science has influenced scientific progress. Case studies of selected historical episodes in which science and philosophy have interacted significantly, focusing on the physical, biological, or social sciences.

PHIL256 Philosophy of Biology I (3 Credits)

Issues in the discovery and justification of biological theories and models. Focus on cases from twentieth century biology, such as the genetic revolution or evolutionary theory.

PHIL261 Philosophy of the Environment (3 Credits)

An evaluation of different kinds of arguments for the claim that the natural environment should be preserved. Perspectives cut across the disciplines of philosophy (environmental ethics and philosophies of nature); economics (cost-benefit analysis); and biology (evolution, ecology, environmental studies).

Credit Only Granted for: HONR218F or PHIL261.

Formerly: HONR218F.

PHIL269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PHIL271 Symbolic Logic (3 Credits)

This course provides students with a thorough treatment of the basic concepts and techniques of modern symbolic logic, through classical first-order logic with identity. We will concentrate on the construction of natural deduction proofs and on the evaluation of logical statements in semantic models. Along the way, we will study some of the concepts from set theory (sets, functions, relations) used in the definition of semantic models for logical systems. We may also introduce some alternative, or non-classical logics. Although the subject of symbolic logic was developed by mathematicians and philosophers for their own special purposes (which we will discuss), logical concepts and techniques have found applications in a variety of disciplines, including computer science, economics, law, linguistics, and psychology. We may also consider some of these applications.

Recommended: PHIL170.

PHIL282 Free Will & Determinism (3 Credits)

A study of the main positions and arguments in the free will debate in contemporary analytic philosophy.

PHIL308 Studies in Contemporary Philosophy (3 Credits)

Problems, issues, and points of view of current interest in philosophy.

Prerequisite: 6 credits in PHIL courses.

Repeatable to: 6 credits if content differs.

PHIL309 Philosophical Problems (3 Credits)

A focused study of a contemporary philosophical problem or issue.

Topics will vary, but the course will encourage students to generate critical analyses or proposed resolutions of issues in the contemporary philosophical literature.

Prerequisite: 6 credits in PHIL courses.

Repeatable to: 12 credits if content differs.

PHIL310 Ancient Greek and Roman Philosophy (3 Credits)

A study of the origins and development of philosophy in ancient Greece and Rome, focusing on Socrates, Plato, Aristotle, the Epicureans, and Stoics.

Prerequisite: Must have completed 6 credits in philosophy or classics.

Cross-listed with: CLAS310, PHPE308Y.

Credit Only Granted for: PHIL310, CLAS310, or PHPE308Y.

PHIL313 From the Stoa to Silicon Valley: Ancient and Modern Approaches to Stoic Philosophy (3 Credits)

Stoicism, ancient Rome's most popular philosophy, posited that virtue is the only human good and that individuals must detach themselves emotionally from the material world in order to live ethical lives. Principles of Stoic philosophy will be explored together with the wide array of artistic, political, and intellectual traditions that have drawn inspiration from it, from the Haitian revolutionary movement of the late 18th century, to the sexist "manosphere" of Reddit and Twitter, to modern cognitive-behavioral therapy.

Cross-listed with: CLAS313, PHPE313.

Credit Only Granted for: CLAS313, PHIL313, or PHPE313.

PHIL318 Studies in Epistemology/Metaphysics (3 Credits)

Problems, issues, and points of view in epistemology or metaphysics.

Prerequisite: 1 course in PHIL.

Repeatable to: 12 credits if content differs.

Additional Information: Counts toward the epistemology/metaphysics requirement for the Philosophy major.

PHIL320 Knowing Oneself and Knowing the World: Early Modern Philosophy from Descartes to Kant (3 Credits)

A study of major philosophical issues of the 16th, 17th, and 18th centuries through an examination of such philosophers as Descartes, Spinoza, Leibniz, Cavendish, Locke, Berkeley, Hume and Kant

Prerequisite: 6 credits in PHIL courses; or permission of instructor.

PHIL328 Studies in the History of Philosophy (3 Credits)

Problems, issues, and points of view in the history of philosophy.

Prerequisite: 6 credits in PHIL courses.

Repeatable to: 6 credits if content differs.

PHIL332 Philosophy of Beauty (3 Credits)

Philosophical theories, historical and contemporary, of beauty, sublimity, and other aesthetic qualities, of aesthetic experience, and of aesthetic judgment.

Prerequisite: 3 courses in PHIL; or permission of ARHU-Philosophy department.

PHIL338 Studies in Value Theory (3 Credits)

Problems, issues and points of view in ethics, aesthetics, political philosophy and related areas.

Prerequisite: 1 course in PHIL.

Repeatable to: 12 credits if content differs.

Additional Information: Counts toward the value theory requirement for the Philosophy major.

PHIL341 Ethical Theory (3 Credits)

A critical examination of classical and contemporary systems of ethics, such as those of Aristotle, Kant, Mill, and Rawls.

Prerequisite: 6 credits in PHIL courses.

PHIL344 Philosophy of Race (3 Credits)

A survey of philosophical arguments involving race and racism. Guiding questions will include: How have philosophers and scientists conceived of the concept of race? Is race a coherent concept? Does it help us explain differences in performance and behavior? What makes racism, racial prejudice, and discrimination wrong? What is the point of equality? Do we owe reparations to victims of racism?

Credit Only Granted for: PHIL344 or PHIL308Y.

Formerly: PHIL308Y.

PHIL347 Philosophy of Law (3 Credits)

Examination of fundamental concepts related to law, e.g. legal systems, law and morality, justice, legal reasoning, responsibility.

Credit Only Granted for: PHIL347 or PHIL447.

Formerly: PHIL447.

PHIL360 Philosophy of Language (3 Credits)

The nature and function of language and other forms of symbolism from a philosophical perspective.

Prerequisite: LING311; or 2 courses in PHIL and (PHIL170 or PHIL370); or permission of ARHU-Philosophy department.

Cross-listed with: LING350.

Credit Only Granted for: LING350 or PHIL360.

PHIL362 Theory of Knowledge (3 Credits)

Some central topics in the theory of knowledge, such as perception, memory, knowledge, and belief, skepticism, other minds, truth, and the problems of induction.

Prerequisite: 6 credits in PHIL courses; and PHIL170.

Formerly: PHIL462.

PHIL364 Metaphysics (3 Credits)

The study of some central metaphysical concepts and issues including the nature and validity of metaphysical thinking, universals, identity, substance, time, God, and reality.

Prerequisite: 6 credits in PHIL courses.

Formerly: PHIL464.

PHIL366 Philosophy of Mind (3 Credits)

An introduction to core issues in the philosophy of mind, focusing especially on the basic metaphysical question of dualism versus physicalism.

Prerequisite: 6 credits in PHIL courses.

PHIL369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PHIL370 Logical Theory I: Metatheory (3 Credits)

This course is an introduction to logical "metatheory", that is, to logical reasoning about logic systems themselves. Topics include alternative alternative proof-theoretic presentations of logical systems as well as soundness and completeness theorems for propositional and first-order logic. Along the way, we will deepen our understanding of the elementary set-theoretic concepts underlying first order logic. Other topics may include basic results in the semantics of first order logic (such as the Craig interpolation theorem, the Beth definability theorem, or the Lowenheim-Skolem theorem).

Prerequisite: PHIL271 or CMSC250; or permission of the instructor.

PHIL386 Experiential Learning (3-6 Credits)

Restriction: Permission of ARHU-Philosophy department; and junior standing or higher.

PHIL408 Topics in Contemporary Philosophy (3 Credits)

An intensive examination of contemporary problems and issues. Source material will be selected from recent books and articles.

Repeatable to: 99 credits if content differs.

PHIL409 Advanced Studies in Contemporary Philosophy (3 Credits)

An in-depth study of a contemporary philosophical problem or issue. Topics will vary, but the course will encourage students to grapple with the primary literature in order to generate sustained critical analyses or proposed resolutions of issues under active consideration in contemporary philosophy.

Prerequisite: 6 credits in PHIL courses.

Repeatable to: 12 credits if content differs.

PHIL412 The Philosophy of Plato (3 Credits)

A critical study of selected dialogues.

Prerequisite: 6 credits in PHIL courses.

PHIL414 The Philosophy of Aristotle (3 Credits)

A critical study of selected portions of Aristotle's writings.

Prerequisite: 6 credits in PHIL courses.

PHIL417 The Golden Age of Jewish Philosophy (3 Credits)

Jewish philosophy from Maimonides in the 12th century to the expulsion of the Jews from Spain at the end of the 15th Century. Topics include the limitations of human knowledge, creation of the world, foreknowledge and free will, and the existence of God.

Prerequisite: 3 credits in PHIL courses; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies; or permission of ARHU-Philosophy department.

Cross-listed with: JWST452.

Credit Only Granted for: JWST452 or PHIL417.

PHIL418 Topics in Epistemology/Metaphysics (3 Credits)

An intensive examination of contemporary problems and issues in epistemology or metaphysics. Source material will be selected from recent books and articles.

Prerequisite: 2 courses in PHIL.

Repeatable to: 12 credits if content differs.

PHIL428 Topics in the History of Philosophy (3 Credits)

Prerequisite: PHIL310 and PHIL320; or permission of ARHU-Philosophy department.

Repeatable to: 99 credits if content differs.

PHIL438 Topics in Value Theory (3 Credits)

An intensive examination of contemporary problems and issues in ethics, aesthetics, political philosophy and related areas. Source material will be selected from recent books and articles.

Prerequisite: 2 courses in PHIL.

Repeatable to: 12 credits if content differs.

PHIL440 Contemporary Ethical Theory (3 Credits)

Contemporary work on fundamental problems in ethical theory, such as whether there are moral truths, whether and how our moral claims can be justified, what exactly makes an act right or wrong, the nature of moral language, and the role of reason and emotion in moral judgment.

Prerequisite: PHIL341; or permission of instructor.

PHIL443 Moral Psychology (3 Credits)

Philosophers often stress reasoning as the appropriate source for practical and moral action. Would a realistic view of human psychology undermine this assumption? This course will examine recent philosophical and empirical work on the relevance of emotion and/or intuition to rationality, moral worth, and moral judgment.

Prerequisite: 2 courses in PHIL.

Recommended: PHIL341 is strongly recommended for background on the historical authors that the readings make reference to.

Credit Only Granted for: PHIL408P or PHIL443.

Formerly: PHIL408P.

PHIL445 Contemporary Political Philosophy (3 Credits)

Major trends in contemporary political philosophy: liberal, libertarian, communitarian, socialist, feminist.

Restriction: Must have completed 3 credits in philosophy or political theory; or permission of ARHU-Philosophy department. And sophomore standing or higher.

PHIL446 Law, Morality, and War (3 Credits)

An exploration of fundamental moral and legal issues concerning war.

PHIL453 Philosophy of Science II (3 Credits)

A comprehensive survey of developments in the main problems of the philosophy of science from logical positivism to the present. The nature of theories, models, laws, and counterfactuals, testing, inductive logic, and confirmation theory, experimental methodology, measurement, explanation, concept formation, growth of scientific knowledge, and scientific realism.

Prerequisite: Students must have completed a minimum of two philosophy courses.

PHIL458 Topics in the Philosophy of Science (3 Credits)

A detailed examination of a particular topic or problem in philosophy of science.

Repeatable to: 6 credits if content differs.

PHIL469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PHIL470 Logical Theory II: Incompleteness and Undecidability (3 Credits)

Introduces the formal theory of computation, and then presents the central limitative results of modern first-order logic: Church's undecidability theorem and Godel's first and second incompleteness theorems. The primary focus of the course is a thorough technical study of these fundamental results, but we will also discuss some of the philosophical issues they raise. Further topics may include second-order logic.

Prerequisite: PHIL370; or permission of instructor.

PHIL478 Topics in Philosophical Logic (3 Credits)

Philosophical logics result from the application of formal techniques to problems of philosophical interest; these logics often have applications in other areas as well, such as AI, linguistics, psychology, economics, and law. This course will either concentrate on a particular family of philosophical logics (such as modal or temporal or defeasible logics) or else survey a number different logical systems.

Prerequisite: PHIL271; or permission of instructor.

Recommended: PHIL470.

Repeatable to: 9 credits if content differs.

PHIL488 Topics in Philosophy of Cognitive Studies (3 Credits)

Examination of a particular topic or problem in philosophy of cognitive studies.

Prerequisite: 3 credits in PHIL courses; or permission of ARHU-Philosophy department.

Repeatable to: 9 credits if content differs.

PHIL489 Undergraduate Seminar in Philosophy (3-6 Credits)

An intensive examination of a philosophical topic or topics.

Restriction: Permission of ARHU-Philosophy department.

Repeatable to: 6 credits if content differs.

PHIL490 The Practice of Philosophy: How To Develop Your Own Work (3 Credits)

Writing philosophical papers, presenting them to an audience, and responding critically and constructively to the papers and talks of others are skills central to the practice of philosophy. This course will help students to enhance those skills in a seminar-style format. Students should come to the course with a paper of their own (likely from another course) that they would like to develop.

Prerequisite: Three upper-level (300- or 400-level) courses in philosophy or permission of the instructor.

Credit Only Granted for: PHIL408R or PHIL490.

Formerly: PHIL408R.

PHIL498 Topical Investigations (1-3 Credits)

PHIX - Philosophy Education Abroad

PHIX301 Philosophy of Technology and Human Values (3 Credits)

In our age, it is undeniable that human beings are technological creatures. *Techne*, that is, artful craftsmanship, has increasingly been enhancing our experiences, fulfilling our desires, and broadening our abilities, both on a large scale and in the daily lives of individuals. Do we control technology or does it control us? Is technology part of nature or an instrument to human ends? How can we respond critically to the use and development of technology? In this course, we examine such pressing questions from specifically Scandinavian, ethical, social, environmental, and philosophical perspectives.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

PHIX306 Machiavelli Today: Politics, Sociability, Self-fashioning, Cinema, and Graphic Novels (3 Credits)

Takes students from the center of Florence, where Machiavelli was listening to a sermon by a theocratic leader, Girolamo Savonarola, and concluded that it was wrong to mix religion with politics. This principle was to guide Machiavelli's political thought and remained at the core of his teachings. For this reason, Machiavelli has been, and still is, both reviled for the content of his observations, and admired for the clarity of his exposition. Both the author and his books have been a constant presence in Western civilization, with regular patterns of rejection and acceptance, since moral principles have always been sacrificed for a supposed better good.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

PHPE - Philosophy, Politics, and Economics

PHPE308 Special Topics in Philosophy, Politics, and Economics (3 Credits)

A sustained investigation of a topic at the intersection of philosophy, politics and economics.

Repeatable to: 15 credits if content differs.

PHPE308Y Ancient Greek and Roman Philosophy (3 Credits)

A study of the origins and development of philosophy in ancient Greece and Rome, focusing on Socrates, Plato, Aristotle, the Epicureans, and Stoics.

Prerequisite: Must have completed 6 credits in philosophy or classics.

Cross-listed with: PHIL310, CLAS310.

Credit Only Granted for: PHIL310, CLAS310, or PHPE308Y.

PHPE313 From the Stoa to Silicon Valley: Ancient and Modern Approaches to Stoic Philosophy (3 Credits)

Stoicism, ancient Rome's most popular philosophy, posited that virtue is the only human good and that individuals must detach themselves emotionally from the material world in order to live ethical lives.

Principles of Stoic philosophy will be explored together with the wide array of artistic, political, and intellectual traditions that have drawn inspiration from it, from the Haitian revolutionary movement of the late 18th century, to the sexist "manosphere" of Reddit and Twitter, to modern cognitive-behavioral therapy.

Cross-listed with: CLAS313, PHIL313.

Credit Only Granted for: CLAS313, PHIL313, or PHPE313.

PHPE350 Careers in Impact (3 Credits)

The impact ecosystem is vast and complex and consists of public, private, and nonprofit sectors engaged in shaping the world around them. Each sector within this ecosystem has its own theory of change and plays a specific role in the broader impact space. As you seek to become a purposeful professional, it is essential to develop a deeper understanding of this ecosystem, the different levers of influence within it, and the intra-relationship between the sectors. This course introduces you to both the impact landscape and working professionals. Through lectures, guest visits, and hands-on projects you come away better equipped to find your place within the impact ecosystem.

PHPE355 Practicum on Civic Engagement (3 Credits)

As a PPE student, you are motivated to shape the world around you. Local governments share this same mission. In "Practicum on Civic Engagement", you will learn the tools of civic engagement and develop a project for a local government that furthers their goals. The class will consist of lectures that cover political, economic, and cultural aspects of civic engagement along with discussion days where you will work with your colleagues on a real-world project. This course is not an internship. Students will work to develop a project to serve their local government over the course of the semester and will have an opportunity to present their work to local government officials at the end of the semester.

PHPE386 Experiential Learning Practicum in Philosophy, Politics, and Economics (3-6 Credits)

For students who wish to gain experience working in research outside the classroom. Pending approval of the department, students may work at a professional site or remotely under professional supervision - your primary supervisor must be a professional in the field. Beyond working at a professional site or under professional supervision, students will have to complete further assignments to receive a passing grade in the course. Students may take PHPE386 for three-six credits, but only three credits will count towards the major requirements. PHPE386 is only open to those with junior standing or above.

Restriction: Junior standing or higher.

PHPE400 Individual and Group Decision-Making (3 Credits)

Foundational issues that arise within the theories of rational choice that underlie the treatments of decision-making found in economics, politics, and the other social sciences. The course is focused on individual decisions (rational choice theory), strategic decisions (game theory) and group decisions (social choice theory). In addition to presenting the formal models of decision making, we also discuss to what extent these mathematical theories explain social interactions. An important aspect of the course is to introduce students to the ways in which economic analysis has been applied to issues in social and political philosophy. Readings will be drawn from the literature in economics, psychology, statistics and political science, as well as philosophy.

Restriction: Must be in the Philosophy, Politics and Economics major; and must have junior standing or higher; or permission of instructor .

PHPE401 Social Philosophy and Political Economy (3 Credits)

Examines capitalism and socialism as differing modes of economic production through several different theoretical lenses. We begin by examining capitalism and socialism as they developed historically, by looking primarily at the work of Adam Smith and Karl Marx. Then, we turn our attention to one of the most important debates in 20th century economics: to what extent rational economic calculation is possible in a socialist commonwealth. After this we turn our attention to how capitalist and socialist modes of production functioned in practice. We end by turning our attention to the ethics of capitalism and socialism: which mode of economic production is most just?

Restriction: Must be in the Philosophy, Politics and Economics major; and must have junior standing or higher; or permission of instructor.

PHPE402 Senior Capstone in Philosophy, Politics, and Economics (3 Credits)

Senior capstone course for the Philosophy, Politics, and Economics major. The exact content of the course will be determined by the instructor who teaches it. The purpose of the course is to pursue sustained inquiry on a narrow philosophical topic, using the tools and methods from economics and political science to help analyze the topic. The course ends with a substantial research paper, where the student should demonstrate an ability to use the tools of philosophy, political science, and economics in his or her analysis.

Restriction: Must be a PHPE (Philosophy, Politics & Economics) major with senior standing; or permission of instructor.

PHPE408 Advanced Topics in Philosophy, Politics, and Economics (3 Credits)

A sustained investigation of a topic at the intersection of philosophy, politics and economics.

Repeatable to: 15 credits if content differs.

PHPX - Philosophy, Politics, and Economics Education Abroad

PHPX300 Facts and Fictions of Climate Change (3 Credits)

Explores theories of knowledge about climate change and how humans attempt to know, experience, and express the phenomenon of climate change. Examines on how "fact" is constructed by cultures in relation to climate change with a particular focus on air conditions and their representation in contemporary China.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

PHPX302 Human Rights in History: Origins, Foundations, Prospects (3 Credits)

What are human rights and where do they come from? In this class students will examine the tangled origins of the concept of human rights, its relation to broader transformations of moral conscience, how it became institutionalized in law and modern world politics, and why its history and prospects have become so fiercely contested today. Students will focus on cases from European, imperial, American and global history that illuminate how human rights became part of the contemporary framework of politics, law, culture, and historiography.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

PHPX303 History of Political Thought (6 Credits)

Explores key questions in the development of the concept of democracy through the study of texts by some of the most important thinkers and debates in the history of political thought, beginning in the ancient world and continuing through the twentieth century. Students will look at arguments and controversies as they unfolded in different historical circumstances, becoming familiar with the concepts, problems, and debates that have shaped political thought.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students. Please note that this course spans two semesters.

PHPX304 Modernity: Theories of State, Economy and Society (6 Credits)

Reflects on the concept of modernity through the examination of theories of society, economy and the state, and how modernity's promises of liberty, equality, and fraternity have been compromised from the outset. Students will study key theorists and moments in the history of modernity, and consider the dark side of modernity and critiques from both the "left" and the "right", the "culture of modernity", and the distinction between modernity and progress in history.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students. Please note that this course spans two semesters.

PHPX305 Socialist Political Thought (3 Credits)

Explores how socialism has historically provided the most important ideological and political alternative to capitalism and liberalism. This course examines core ideas in the history of socialist thought through a close reading of selected primary texts and the exploration of themes such as utopia, community, class, ownership and control, culture and identity, equality, and democracy.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

PHSC - Public Health Science

PHSC201 The Pursuit of Career Success in Public Health Science (1 Credit)

Explore the dynamic connection between experiential learning and career readiness in the field of public health by engaging with insightful podcasts that bring real-world perspectives to the forefront. Through active learning, you will evaluate your skill set, reflect on your experiences, analyze industry trends, and uncover best practices essential for success in the public health workforce. This course is designed to help you bridge the gap between your current abilities and your career aspirations. By strategically planning your curricular and co-curricular engagement, you'll develop a roadmap tailored to your unique goals. This personalized action plan will empower you to navigate your career path moving fearlessly forward.

Restriction: Must be in the Public Health Science program.

Credit Only Granted for: PHSC388D or PHSC201.

Formerly: PHSC388D.

PHSC300 Foundations of Public Health (3 Credits)

An overview of the goals, functions, and methods of public health. After an introduction to the core concepts and tools used in public health research and practice, applications of these methodologies are considered in the context of current controversies/problems in public health. Students work together to develop strategies for prevention and control that take into consideration different points of view, outside research, and impacts on individuals and communities.

Restriction: Must be a major within the School of Public Health.

Credit Only Granted for: SPHL100 or PHSC300.

PHSC321 Transfer Success for the Public Health Science Major (3 Credits)

A public health-focused transition course for first year transfer students in UMD's PHSC program at Shady Grove. Students will engage with current public health topics through primary sources, literature reviews, course discussions, analytic writing, and critical thinking. Academic success and professional development in the public health field will be emphasized. Students will also engage with faculty, staff, centers, and resources both at the University of Maryland, College Park and the Universities at Shady Grove.

Restriction: Must be a first year transfer student in UMD's Public Health Science program at Shady Grove.

PHSC388 Special Topics in Public Health Science (1-3 Credits)

Will differ by specific course offering.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 45 credits.

Repeatable to: 9 credits if content differs.

PHSC389 Independent Research Study in Public Health Science (1-6 Credits)

This independent research-based experience will provide the opportunity for students to work with individual research mentors in the area of Public Health Science. Students must identify a mentor prior to obtaining departmental permission.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 45 credits; and permission of instructor.

Repeatable to: 6 credits if content differs.

PHSC399 Public Health Science Internship (1-6 Credits)

The Public Health Science internship will enable students to gain practical experience under conditions conducive to academic, research and professional development. The internship is a time-limited, supervised period of public health professional experience carried out in a related professional organization or research setting.

Restriction: Must be in Public Health Science program; and must have completed a minimum of 75 credits; and must have permission of instructor.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: PHSC491 or SPHL491.

Formerly: SPHL491.

Additional Information: Prospective students must meet with an advisor and complete internship verification, expectations and responsibilities prior to registration. This is generally completed the semester prior to beginning the internship.

PHSC401 History of Public Health (3 Credits)

Emphasis is on the history of public health in the Western world from antiquity to the present. Also examines the influence of public health developments as they relate to the Western world as well as throughout diverse cultures and societies across the globe. Analysis focuses on the interaction among Western and non-Western cultures with respect to health issues, including science, policies, prevention and treatment.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 45 credits.

Credit Only Granted for: PHSC401 or SPHL401.

Formerly: SPHL401.

PHSC402 Public Health Emergency Preparedness (3 Credits)

Intensive introduction to public health emergency preparedness. Course will provide students with an overview of the role of public health in planning, prevention, preparedness, response, and recovery from disasters, both manmade and natural.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.

Credit Only Granted for: PHSC402 or SPHL402.

Formerly: SPHL402.

PHSC405 Policy Advocacy and Public Health (3 Credits)

Students will identify and analyze policy solutions to public health problems and determine advocacy strategies to encourage policy makers to implement the recommendations. Lectures, class discussions, group work and mock advocacy exercises will integrate the principles and practice of public health advocacy. Guest lecturers from a variety of settings will give students a broad range of perspectives and advocacy experiences.

Prerequisite: Minimum grade of C- in HLSA300.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.

PHSC410 Public Health Program Planning and Evaluation (3 Credits)

Students will become familiar with the dynamics of public health program planning, and the basic process of identifying unmet needs. They will be able to identify different types of program evaluation, including needs assessment, formative research, process evaluation, impact assessment, and cost analysis.

Restriction: Must be in Public Health Science program; and junior standing or higher.

Credit Only Granted for: PHSC410 or SPHL410.

Formerly: SPHL410.

PHSC412 Food, Policy, and Public Health (3 Credits)

Broad overview of the impact of food and food policy on public health. Course covers topics such as access to food, food systems, influence of food policies on the individual, the cost of food, influences on food selection, food safety risks and responses, nutrition-related health challenges, and a comparison of US food/nutrition issues with those of other nations.

Prerequisite: Must have completed HLSA300 with a C- or higher.

Recommended: NFSC100.

Restriction: Must be in Public Health Science program; and junior standing or higher.

Credit Only Granted for: PHSC412 or SPHL412.

Formerly: SPHL412.

PHSC415 Essentials of Public Health Biology: The Cell, The Individual, and Disease (3 Credits)

Presents the basic scientific and biomedical concepts of modern public health problems and explores in depth mechanisms and models of the major categories of disease. The biologic principles presented are foundations to public health disease prevention, control, or management programs.

Prerequisite: Minimum grade of C- in BSCI202.

Recommended: BSCI223.

Restriction: Must be in Public Health Science program; and junior standing or higher.

Credit Only Granted for: PHSC415, SPHL415 or SPHL498J.

Formerly: SPHL415 and SPHL498J.

PHSC420 Vaccines and Immunology (3 Credits)

An exploration of immunology and vaccines through a public health lens. We will examine the cells, systems, and molecules that comprise the human immune system and defend your body against disease. In addition, we will discuss the strategies used during vaccine development including the history and future of vaccination and how increased understanding of the immune system has allowed scientists to improve and refine the process. Finally we will examine the current social and political situation surrounding vaccination and the roles and responsibility of public health practitioners.

Prerequisite: Minimum grade of C- in BSCI202.

Recommended: CHEM231.

Restriction: Must have earned a minimum of 60 credits. And must be in Public Health Science program; or permission of instructor.

PHSC425 Genetics, Genomics, and Public Health (3 Credits)

Recent advances in genomic science and biomedical technologies have increased our understanding of the genetic basis of disease and the interplay between genetics and environmental and behavioral factors. This course will provide a solid background in basic genetics and genomic science and highlight the role of public health professionals in translating breakthroughs in this rapidly transforming field into the clinical setting, program planning, and policy. Topics covered will include the molecular basis for genetic variation, fetal and newborn screening, genetic risk factors for cancer, pharmacogenetics, the role of pathogen genomics in outbreak investigation, and applications of genetic engineering in solving public health issues.

Prerequisite: Must have completed BSCI170 and 171 with a C- or higher.

Recommended: BSCI222 and BSCI223.

Restriction: Must have earned a minimum of 60 credits; and must be in Public Health Science program.

Credit Only Granted for: SPHL498X OR PHSC425.

Formerly: SPHL498X.

PHSC426 Climate Change and Health (3 Credits)

Climate changes pose significant risks to population health by affecting air quality, the availability of safe drinking water, infectious disease transmission, food security, and access to housing, land, and livelihoods. Students examine the relationship between climate change and human health, focusing on how climate change vulnerability varies between populations by geographic, demographic, and socioeconomic characteristics.

Prerequisite: Minimum grade of C- in MIEH300.

Restriction: Must be in Public Health Science program.

PHSC430 Public Health in the City: Perspectives on Health in the Urban Environment (3 Credits)

Exposure to issues related to city habitation and the health of the public, including how the urban environment impacts the lives and health of city dwellers, including discussion of the social determinants of health. Students are encouraged to think about urban health and policy, and to question the current state of urban public health. Issues of race, class, and equality will be discussed throughout the course as they relate to each of these topics.

Prerequisite: Minimum grade of C- in BSCI202 and MIEH300.

Restriction: Must be in Public Health Science program; and junior standing or higher.

Credit Only Granted for: PHSC430 or SPHL498G.

Formerly: SPHL498G.

PHSC440 Public Health Nutrition (3 Credits)

Engages students in conceptual thinking about the relationship between public health and nutritional health. Students will analyze and interpret "A Framework for Public Health Nutrition." Students will identify determinants of nutritional health, assess nutritional health in individuals and populations, develop strategies to mitigate these issues, and analyze and evaluate public health nutrition policies.

Prerequisite: A minimum of C- in BSCI170, BSCI171, CHEM131, CHEM132 and EPIB301.

Restriction: Must be in Public Health Science program.

Credit Only Granted for: PHSC440 or NFSC498L.

PHSC450 Addressing Social and Structural Inequities Through Public Health (3 Credits)

A focus on addressing social and structural inequities within race, gender, disability, and class through various perspectives in the field of public health. Students explore the causes, challenges, consequences, and extent these injustices have on health disparities from local, national, and global perspectives. Students view these inequities through the lens of the affected populations, and work interactively and collaboratively to interpret, design, and evaluate public health interventions and approaches to address key health disparities within specific communities. The aim of this course is to help students define appropriate research and address structural inequities with innovative approaches through the professional practice of public health.

Prerequisite: Minimum grade of C- in MIEH300; and 1 course with a minimum grade of C- from either SPHL100 or PHSC300.

PHSC497 Public Health Science Capstone (3 Credits)

The capstone course is the culminating experience for Public Health Science students and must be taken only in the final semester of study. The Public Health Science capstone course is designed to challenge students to integrate the five core areas of public health in investigating, researching and addressing public health issues. Throughout the semester, students will be required to evaluate, analyze and synthesize scholarly works as they research and propose solutions to a variety of public health issues. By the conclusion of this research based course, students will understand how the various public health perspectives can combine in addressing and informing public health practices.

Prerequisite: Must have completed the professional writing requirement with a C- or higher; and minimum grade of C- in PHSC450.

Restriction: Must have earned a minimum of 100 credits; and must be in Public Health Science program; and must be in the final semester of undergraduate study.

Credit Only Granted for: SPHL498F or PHSC497.

Formerly: SPHL498F.

PHYS - Physics

PHYS102 Physics of Music (3 Credits)

A study of the physical basis of sound, acoustical properties of sound, the human ear and voice, reproduction of sound, electronic music, acoustical properties of auditoriums, and other selected topics.

Prerequisite: Must have math eligibility of MATH107 or higher.

Credit Only Granted for: PHYS102 and PHYS499C.

Additional Information: CORE Distributive Studies Physical Sciences Laboratory Course only when taken concurrently with PHYS103.

PHYS103 Physics of Music Laboratory (1 Credit)

Optional laboratory to accompany PHYS 102. Laboratory experiments, including the velocity of sound, sound quality and wave shape, traveling and standing waves, fourier synthesis and analysis, musical synthesizer, psychoacoustics, and audio equipment.

PHYS105 A Global Challenge: Energy and Climate Change (3 Credits)

How will the world address the energy needs of a growing population and its impact on climate change? This class will explore potential solutions to mitigate our atmospheric impact, including technological innovations and policy measures. Additionally, we will analyze the roles of economics, government, and industry in shaping our responses within the context of modern science.

Additional Information: This course is aimed at the non-science major.

PHYS106 Light, Perception, Photography, and Visual Phenomena (3 Credits)

Intended for the general student, this course will cover topics in optics which require minimal use of mathematics. Principles of optics, lenses, cameras, lasers and holography, physics of the eye, color vision and various visual phenomena such as rainbows.

PHYS107 Light, Perception, Photography and Visual Phenomena Laboratory (1 Credit)

Optional laboratory to accompany PHYS106. Laboratory experiments include geometrical optics (lenses, cameras, eye), optical instruments (telescope, binoculars), photography, perception, color phenomena, and wave phenomena.

PHYS111 Physics in the Modern World (3 Credits)

A survey course in general physics emphasizing the role that physics plays in science, technology, and society today. The course is concept oriented and minimal use of mathematics is made. Intended for the general student; does not satisfy the requirements of the professional schools.

PHYS115 Inquiry into Physics (4 Credits)

Intended for students majoring in neither the physical nor the biological sciences. Use of laboratory-based and inquiry-based methods to study some of the basic ideas of physical sciences.

Recommended: High School Physics.

Restriction: Must not have completed PHYS117; and must be in one of the following programs (Elementary Education; Early Childhood Education; Middle School Education).

Credit Only Granted for: PHYS115 or PHYS117.

PHYS121 Fundamentals of Physics I (4 Credits)

The first part of a two-semester course in general physics treating the fields of mechanics, heat, sound, electricity, magnetism, optics, and modern physics. Together with PHYS122, this generally satisfies the minimum requirement of medical and dental schools.

Prerequisite: MATH113 or MATH115.

Credit Only Granted for: PHYS121, PHYS131, or PHYS331.

PHYS122 Fundamentals of Physics II (4 Credits)

A continuation of PHYS121, which together with it, generally satisfies the minimum requirement of medical and dental schools.

Prerequisite: PHYS121; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: PHYS122, PHYS132, or PHYS332.

PHYS131 Fundamentals of Physics for Life Sciences I (4 Credits)

The first part of a two-semester course in general physics specifically oriented towards applications relevant for students in biology and pre-medical programs. The course covers basic mechanics including forces and energy, properties of matter, and thermodynamics done in authentic biological contexts.

Prerequisite: CHEM131; and (MATH136 or MATH140); and (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105).

Credit Only Granted for: PHYS121, PHYS131, or PHYS331.

PHYS132 Fundamentals of Physics for Life Sciences II (4 Credits)

The second part of a two-semester course in general physics specifically oriented towards applications relevant for students in biology and pre-medical programs. The course covers basic statistical physics, electricity and magnetism, and optics done in authentic biological contexts.

Prerequisite: PHYS131; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: PHYS122, PHYS132, or PHYS332.

PHYS141 Principles of Physics (4 Credits)

The first of a two-semester series in general physics. The first semester covers the fields of mechanics, thermodynamics, and special relativity. This survey course will use calculus and is recommended for chemistry and zoology majors. It also satisfies the requirements of medical and dental schools.

Corequisite: MATH141 or MATH121; or MATH221.

Credit Only Granted for: PHYS141, PHYS161, or PHYS171.

PHYS142 Principles of Physics (4 Credits)

A continuation of PHYS141 covering waves, electricity and magnetism, optics and modern physics.

Prerequisite: PHYS141; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: PHYS142, (PHYS260 and PHYS261), or PHYS272.

PHYS161 General Physics: Mechanics and Particle Dynamics (3 Credits)

First semester of a three-semester calculus-based general physics course. Laws of motion, force, and energy; principles of mechanics, collisions, linear momentum, rotation, and gravitation.

Prerequisite: Must have completed or be concurrently enrolled in MATH141.

Credit Only Granted for: PHYS141, PHYS161, or PHYS171.

Additional Information: General Education Natural Sciences Lab (DSNL) Course only when taken concurrently with PHYS275.

PHYS165 Introduction to Programming in the Physical Sciences (3 Credits)

Introduction to programming using examples in the physical sciences. Provides instruction in the techniques of upper-level languages such as Fortran, C, and Pascal, as well as an introduction to the object oriented programming techniques used in Python, C++ and Java. Includes strong component of visualization and graphing.

Prerequisite: PHYS171, PHYS141, or PHYS161; or must have scored 3 or higher on AP PHYS exam.

PHYS170 Professional Physics Seminar (1 Credit)

Provides a look at some of the major developments of current interest in physics research and discusses the activities physicists undertake in research, education, industry, government, and other areas of the economy.

Corequisite: MATH140.

Restriction: Must be in Physics program; or must be in Physics-Education program; or permission of instructor.

PHYS171 Introductory Physics: Mechanics (3 Credits)

First semester of a three semester sequence for physics majors and those desiring a rigorous preparation in the physical sciences: kinematics, Newton's laws, energy and work, linear and angular momenta.

Prerequisite: MATH140; or permission of CMNS-Physics department.

Credit Only Granted for: PHYS141, PHYS161, or PHYS171.

Additional Information: General Education Natural Sciences Lab (DSNL) Course only when taken concurrently with PHYS275.

PHYS172 Succeeding in Physics: Applications, Resources and Concepts (1 Credit)

Supplemental instruction and support for students taking PHYS171, especially for students with limited high school physics preparation, or who will benefit from extra review and practice of relevant mathematics and physics concepts and skills.

Corequisite: PHYS171.

Restriction: Permission of CMNS-Physics department.

PHYS174 Physics Laboratory Introduction (1 Credit)

Introduces students to the techniques of data gathering and analysis. This course will lay a foundation for higher-level labs in physics and the physical sciences. Students will learn to use laboratory equipment such as calipers, meters, oscilloscopes, and computer interfaces. Techniques of measurement and error analysis will be presented. Students will be taught to use the computer for data analysis with an emphasis on using spreadsheets.

Corequisite: MATH140.

Recommended: High school physics.

PHYS235 The Manhattan Project (3 Credits)

Introduction to some critical ideas of nuclear physics and a review of some key historical developments starting at the end of the 19th century. Chronological development of nuclear physics from the discovery of radioactivity by Becquerel in 1896 through to the discovery of fission in Germany in 1938 followed by an examination of the programs to develop nuclear weapons in the United States, Britain and Germany. Extensive study of political, ethical, scientific, military, social, and economic issues surrounding the Manhattan Project.

Recommended: Students should be comfortable standard high school algebra II.

Credit Only Granted for: PHYS199M or PHYS235.

Formerly: PHYS199M.

PHYS260 General Physics: Electricity, Magnetism and Thermodynamics (3 Credits)

Second semester of a three-semester calculus-based general physics course. Electrostatics, magnetism, induction, DC and AC circuits; Maxwell's Equations, heat, and thermodynamics.

Prerequisite: PHYS161 and MATH141.

Corequisite: PHYS261.

Credit Only Granted for: PHYS142, PHYS260, or PHYS272.

PHYS261 General Physics: Mechanics, Vibrations, Waves, Heat (Laboratory) (1 Credit)

Lab includes experiments on mechanics, vibrations, waves, and heat. Engineering majors are expected to take PHYS260 and PHYS261 in the same semester.

Prerequisite: PHYS161.

PHYS265 Introduction to Scientific Programming (3 Credits)

Introduction to scientific programming with python. Basic data types, sequences, input/output, and program control flow structures. Evaluation and plotting of mathematical functions and data. Statistical interpretation of data, and fitting of data to models. Introduction to numerical methods including integration, solutions of ordinary differential equations, and linear algebra. Extensive use of the numpy, matplotlib, and scipy packages.

Prerequisite: PHYS171, PHYS141, or PHYS161; or must have scored 3 or higher on AP PHYS C Mechanics exam.

Credit Only Granted for: PHYS165 or PHYS265.

Formerly: PHYS165.

PHYS270 General Physics: Waves, Optics, Relativity and Modern Physics (3 Credits)

Third semester of a three-semester calculus-based general physics course. Waves, sound, electromagnetic waves, optics, special theory of relativity, and modern physics.

Prerequisite: PHYS261, MATH241, and PHYS260.

Corequisite: PHYS271.

PHYS271 General Physics: Electrodynamics, Light, Relativity and Modern Physics (Laboratory) (1 Credit)

Lab includes experiments on ac circuits, magnetism, light and modern physics. PHYS270 and PHYS271 (lab) must be taken in the same semester.

Prerequisite: PHYS261.

Corequisite: PHYS270.

PHYS272 Introductory Physics: Fields (3 Credits)

Second semester of a calculus based general physics course. Universal gravitation, electric and magnetic fields and potentials, simple circuits, Maxwell's equations in integral form. Continues the application of mathematics to conceptual models, now with more abstract components.

Prerequisite: PHYS161 or PHYS171; and MATH141; and must have completed or be concurrently enrolled in MATH241.

Credit Only Granted for: PHYS142, PHYS260, or PHYS272.

PHYS273 Intermediate Oscillations and Waves (3 Credits)

Classical physics at an intermediate level, introducing mathematical tools such as complex variables, linear differential equations, and Fourier series and transforms. Physics of mechanical and electrical oscillators, including damped and driven systems; coupled oscillators and normal modes; the classical wave equation and its Fourier solutions; wave reflection and transmission at boundaries; Maxwell's equations in differential form; electromagnetic waves, and physical optics.

Prerequisite: MATH241 and PHYS272; and must have completed or be concurrently enrolled in one of the following: (PHYS274, MATH243, MATH246 or equivalent).

PHYS274 Mathematical Methods for Physics I (3 Credits)

A first course in mathematical methods for physics. Topics include linear algebra, curvilinear coordinates and vector analysis.

Prerequisite: MATH241 and PHYS272.

PHYS275 Experimental Physics I: Mechanics and Waves (2 Credits)

A first course for physics majors and interested engineering students introducing the methods of experimental science. Students learn to identify various statistical data distributions, carry out rigorous uncertainty analysis, and test whether a given theoretical model adequately describes the observed phenomena. These concepts are applied to sophisticated physical systems that exhibit complex behavior and can yield remarkably precise and accurate results. Experiments are chosen from the areas of mechanics and waves.

Prerequisite: Must have completed or be concurrently enrolled in PHYS171 or PHYS161.

Additional Information: General Education Natural Sciences Lab (DSNL) Course only when taken concurrently with PHYS171 or PHYS161.

PHYS276 Experimental Physics II: Electricity and Magnetism (2 Credits)

Second course in the three semester introductory sequence. Methods and rationale of experimental physics. Experiments chosen from the fields of electricity and magnetism including electrostatics, magnetostatics, magnetic induction, AC circuits.

Prerequisite: PHYS272 and PHYS275.

PHYS298 Special Topics in Physics (1-3 Credits)

Special topics in physics.

Repeatable to: 6 credits if content differs.

PHYS299 Special Problems in Physics (1-6 Credits)

Research or special study to complement courses taken elsewhere which are not fully equivalent to those in departmental requirements. Credit according to work done.

Prerequisite: Permission of CMNS-Physics department.

PHYS299Q Quantum Steampunk Science-Fiction Workshop (3 Credits)

Steampunk is a science-fiction genre in which futuristic technologies populate Victorian-era settings. Recently, steampunk has come to life in the scientific field of quantum thermodynamics. Thermodynamics, the study of energy, grew out of the Industrial Revolution. Two centuries later, quantum physics is transforming computing and cryptography. Quantum science is now revolutionizing 19th-century thermodynamics in quantum thermodynamics, which features quantum engines, automata, and more. Quantum thermodynamics inspired the growing subgenre of quantum steampunk. In this course, you will read science fiction, write quantum steampunk short stories, receive feedback, and critique classmates' writing. In parallel, you will learn about quantum physics, technologies, and thermodynamics.

Cross-listed with: ARHU270, CMSC298Q, ENME299Q.

Credit Only Granted for: ARHU270, CMSC298Q, ENME299Q or PHYS299Q.

PHYS313 Electricity and Magnetism I (4 Credits)

A first course in electricity and magnetism at an advanced level. Electrostatics; solutions to the Laplace and Poisson equations in cartesian and spherical coordinates; electric fields in matter; and magnetostatics. Study of boundary value problems and extensive use of vector calculus.

Prerequisite: MATH241, PHYS273, and one of the following: PHYS274, MATH240, MATH243, MATH246, or equivalent courses.

PHYS318 Topics in Contemporary Physics (3 Credits)

A survey of topics of current research and public interest. Intended for the non-physics or non-science major. Topics covered will include lasers, quantum liquids, cosmology, elementary particles and geophysics.

Prerequisite: PHYS122 or PHYS111; or permission of CMNS-Physics department.

PHYS331 Physics for Life Sciences I (4 Credits)

The first part of a two-semester course in general physics specifically oriented towards applications relevant for students in biology and pre-medical programs. The course covers basic mechanics including forces and energy, properties of matter, and thermodynamics done in authentic biological contexts.

Prerequisite: CHEM131; and (MATH131 or MATH136); and (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105). Or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: PHYS121, PHYS131 or PHYS 331.

PHYS332 Physics for Life Sciences II (4 Credits)

The second part of a two-semester course in general physics specifically oriented towards applications relevant for students in biology and pre-medical programs. The course covers basic statistical physics, electricity and magnetism, and optics done in authentic biological contexts.

Prerequisite: PHYS331; or PHYS131; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: PHYS122, PHYS132, or PHYS332.

PHYS371 Modern Physics (3 Credits)

Physics of the early 20th century. Special relativity; particle-wave duality; Compton scattering; the Bohr model; the Schroedinger equation; atomic and nuclear physics phenomena. Includes introductory thermodynamics and the kinetic theory of gases.

Prerequisite: PHYS273; and 1 course from (PHYS274, MATH243, or MATH246).

Credit Only Granted for: PHYS371 or PHYS420.

Additional Information: Intended primarily for physics and astronomy majors.

PHYS373 Mathematical Methods for Physics II (3 Credits)

A second course in mathematical methods for physics. Topics include introduction to ordinary differential equations, partial differential equations, and complex analysis.

Prerequisite: PHYS273 and PHYS274.

PHYS375 Experimental Physics III: Electromagnetic Waves, Optics and Modern Physics (3 Credits)

Third course in the three-semester introductory sequence. Methods and rationale of experimental physics. Experiments chosen from the areas of electromagnetic waves, optics and modern physics.

Prerequisite: PHYS276 and PHYS273.

PHYS386 Experiential Learning (3-6 Credits)**PHYS389 Undergraduate Thesis Research (1-6 Credits)**

Independent directed research and study on a topic selected by the student in consultation with his or her advisor. Final written thesis and oral defense will be expected.

Prerequisite: Permission of CMNS-Physics department.

Restriction: Must be in a major within CMNS-Physics department.

Repeatable to: 6 credits.

PHYS398 Independent Studies Seminar (1-16 Credits)

Credit according to work done. Enrollment is limited to students admitted to the independent studies program in physics.

PHYS399 Special Problems in Physics (1-3 Credits)

Selected advanced experiments. (Will be given with sufficient demand.)

Prerequisite: PHYS405; and permission of CMNS-Physics department.

PHYS401 Quantum Physics I (4 Credits)

Introduces some quantum phenomena leading to wave-particle duality. Schrodinger theory for bound states and scattering in one dimension. One-particle Schrodinger equation and the hydrogen atom.

Prerequisite: PHYS371; and (PHYS313 or PHYS373).

PHYS402 Quantum Physics II (3 Credits)

Applications of quantum mechanics to atomic, molecular, and solid state systems. Addition of angular momenta, multiparticle states, perturbation theory and other approximation techniques, scattering, and symmetries.

Prerequisite: PHYS401.

PHYS404 Introduction to Statistical Thermodynamics (3 Credits)

Introduction to basic concepts in thermodynamics and statistical mechanics.

Prerequisite: PHYS371 or PHYS420.

PHYS405 Advanced Experiments (3 Credits)

Advanced laboratory techniques. Selected experiments from many fields of modern physics. Emphasis on self-study of the phenomena, data analysis, and presentation in report form.

Prerequisite: PHYS375.

Restriction: Must be in a major within CMNS-Physics department.

PHYS407 Undergraduate Experimental Research (3 Credits)

Students develop and complete an independent, experimental research project with a professor in the Physics Department. The project should be a continuation of work done in PHYS499A. To obtain permission, students must submit a proposal describing the experimental work to be completed and this proposal must be approved by their faculty mentor, the associate chair for undergraduate education and the chair of the laboratory committee. Students must maintain a lab notebook, give an oral presentation and complete a written report on their research that includes data and error analysis.

Prerequisite: PHYS499 and PHYS375; and permission of CMNS-Physics department.

Restriction: Must be in a major within CMNS-Physics department; and senior standing.

PHYS410 Classical Mechanics (3 Credits)

Theoretical foundations of mechanics with extensive application of the methods. Various mathematical tools of theoretical physics.

Prerequisite: PHYS265 and PHYS273; and (MATH243 or MATH246).

PHYS411 Intermediate Electricity and Magnetism (4 Credits)

Foundations of electromagnetic theory, with extensive applications of the methods. Thorough treatment of wave properties of solutions of Maxwell's equations.

Prerequisite: PHYS313 or PHYS373.

PHYS412 Intermediate Electricity and Magnetism I (4 Credits)

The first semester of a two semester course with emphasis on electrostatics and magnetostatics, boundary value problems, fields in matter, electrodynamics, and Maxwell's equations.

Prerequisite: PHYS373.

PHYS413 Electricity and Magnetism II (3 Credits)

The second semester of a two semester course with emphasis on electromagnetic waves, potentials and gauge invariance, and relativistic electrodynamics

Prerequisite: PHYS313 or PHYS412.

Credit Only Granted for: PHYS411 or PHYS413.

PHYS420 Principles of Modern Physics (3 Credits)

A survey of atomic and nuclear phenomena and the main trends in modern physics. Appropriate for students in engineering and other physical sciences.

Prerequisite: MATH246. And PHYS271 and PHYS270; or PHYS273.

Credit Only Granted for: PHYS371 or PHYS420.

PHYS428 Physics Capstone Research (2-4 Credits)

Individual, focused research under the guidance of a faculty member. Discussion, presentations and, if appropriate, research group projects involved. Student must submit final research paper for completion of course. Paper may also serve as thesis required for High Honors in Physics. Not intended as a general "reading course" (see PHYS499).

Restriction: Must be in a major within CMNS-Physics department; and senior standing or higher; and permission of instructor.

Repeatable to: 4 credits.

PHYS429 Atomic and Nuclear Physics Laboratory (3 Credits)

Classical experiments in atomic physics and more sophisticated experiments in current techniques in nuclear physics.

Prerequisite: PHYS405.

PHYS431 Introduction to Solid State Physics (3 Credits)

Classes of materials; introduction to basic ideal and real materials' behavior including mechanical, electrical, thermal, magnetic and optical responses of materials; importance of microstructure in behavior. One application of each property will be discussed in detail.

Prerequisite: PHYS271, PHYS270, and MATH241.

Cross-listed with: ENMA460.

Restriction: Junior standing or higher; and must be in the Engineering: Materials Science program or Physics program.

Credit Only Granted for: ENMA460 or PHYS431.

Additional Information: Materials Engineering students take ENMA460 and Physics students take PHYS431.

PHYS441 Topics in Nuclear and Particle Physics (3 Credits)

A survey of concepts in particle and nuclear physics, with a topical emphasis on the impact of the Weak Interaction and the discovery of Parity Violation.

Prerequisite: PHYS401 or PHYS402.

Corequisite: PHYS402.

PHYS444 Computing Beyond the Standard Model of Particle Physics (3 Credits)

An exploration of the computing languages and techniques used to analyze large data sets in Large Hadron Collider physics with some discussion of applications in unrelated fields.

Prerequisite: PHYS371 and PHYS373; or permission of instructor.

PHYS456 Making Physics Experiments (3 Credits)

Laboratory course emphasizing practical skills used for making Physics experiments within the broader context of the maker movement and the maker culture. Design, fabrication, hands-on skills, repair, and safety. Practical skills not otherwise covered in traditional coursework (e.g.: carpentry, electronics disassembly/assembly, soldering, etc.).

Prerequisite: PHYS276; or permission of instructor.

Restriction: Permission of Physics Department.

Credit Only Granted for: PHYS499X or PHYS456.

Formerly: PHYS499X.

PHYS457 Introduction to Quantum Computing (3 Credits)

An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).

Restriction: Permission of CMNS-Physics department; or permission of CMNS-Computer Science department. Cross-listed with CMSC457.

Credit Only Granted for: PHYS457 or CMSC457. Additional information: No previous background in quantum mechanics is required.

PHYS467 Introduction to Quantum Technology (3 Credits)

Investigates the basic concepts/building blocks of quantum computers, quantum key distribution, quantum networks, and quantum sensors.

Examines what is needed to form a working qubit and different hardware platforms that implement them (for example, trapped ions, superconducting microwave circuits, color centers, and neutral atoms.) Conceptual and computational familiarity with complex numbers, vector spaces, bases, matrices, eigenvectors, and eigenvalues will be assumed, as well as quantum states/wave functions, and quantum measurement. Familiarity with spin-1/2 systems, and Pauli matrices is highly recommended.

Prerequisite: MATH141 and MATH240 or equivalent; and one of the following: PHYS360, PHYS401, PHYS457, or ENEE491; or permission of instructor.

Cross-listed with: ENEE492.

Credit Only Granted for: PHYS467 or ENEE492.

PHYS474 Computational Physics (3 Credits)

Introduction to computational physics. Overview of some of the most widely used methods of computational physics and computational methods, including data analysis and statistical methods, visualization, numerical solutions of ordinary and partial differential equations (classical equations of motion, Poisson's equation, time independent and time dependent Schrodinger equations) and Monte Carlo simulations. In addition to giving the students a basic working knowledge of these particular techniques, the goal is to make them proficient in scientific computing and programming in general, so that they will be prepared to tackle other computational and data analysis problems that they may encounter in the future. This course will use the programming language Python.

Prerequisite: PHYS373; and (PHYS165, CMSC106, or CMSC131).

Recommended: PHYS401 (strongly recommended).

Additional Information: Students will need a laptop for this course to run specific software; however, arrangements will be made for those who need them. Students will need to load the Python 3 language on your computer, which will be done in the first week of class. The class will use the "Anaconda" environment/distribution, which is available for Mac/Windows/Linux. Contact the department for more information.

PHYS476 Introduction to Applied Machine Learning (3 Credits)

Introduces machine learning techniques that are becoming pertinent in the technology industry. Focus on hands-on work using popular high-level libraries. Students are expected to have a background in functional programming, linear algebra, calculus, and mathematical modeling.

Prerequisite: PHYS165, PHYS274, and PHYS276; or interested students with backgrounds in functional programming, linear algebra and statistics, should contact the instructors to request permission.

PHYS485 Electronic Circuits (3 Credits)

Theory and application to experimental physics of modern semiconductor analog and digital circuits. Emphasis on understanding passive and active elements in practical circuits. Topics span the range from simple transistor circuits to microcomputers.

Prerequisite: PHYS272 and PHYS276.

Restriction: Must be in a major within CMNS-Physics department.

PHYS487 Computerized Instrumentation (3 Credits)

Concentration on computer interfaces to measurement devices. Includes a review of basic electronic circuits and measurement devices. Extensive work with arduinos, making use of a variety of measurement probes. Includes introduction to the C++ programming language, the Segger development environment, and real-time operating systems (RTOS) used in advanced physics experiments.

Prerequisite: PHYS276 or Permission of Instructor.

Restriction: Departmental Permission.

PHYS499 Special Problems in Physics (1-16 Credits)

Research or special study. Credit according to work done.

PLCY - Public Policy

PLCY100 Foundations of Public Policy (3 Credits)

A survey course, focusing on public policy institutions and analytical issues as well as on overview of key public policy problems. Students will be introduced to public policy as a discipline, with a brief overview of the actors and institutions involved in the process, and familiarize themselves with the kinds of problems typically requiring public action. The course will examine these problems from a multijurisdictional and multisectoral perspective. Specific policy areas examined include education policy, health policy, economic and budgetary policy, criminal justice policy, environmental policy, and national and homeland security policy. The course should permit students to have broad foundational exposure to the field that will give them a solid base for more advanced courses.

PLCY101 Great Thinkers on Public Policy (3 Credits)

Great ideas in public policy, such as equality, efficiency, sovereignty, liberty, bureaucracy, democracy and security are explored through the lens of great thinkers. An introduction to the intellectual foundations of public policy, from ancient theories on collective public action through the more contemporary development of public policy as a discipline. This may start as early as the ancient Greek philosophers and their views on public action through contemporary classics of public policy. At the conclusion of the course, students will have read classic works in the field and will master the key themes that have dominated the intellectual debates about public policy over its history. Emphasis will be on the interdisciplinary foundations of public policy, through examining core disciplinary contributions from economics, political science, management, philosophy, and other relevant disciplines.

PLCY201 Public Leaders and Active Citizens (3 Credits)

Aims to inspire, teach and engage students in the theory and practice of public leadership from the local to the national to the global level. Students will learn and apply diverse approaches to leadership in a multicultural society while developing an understanding of key frameworks and practices necessary to foster collective action across private, public, and nonprofit sectors. This course will allow students to become informed citizens able to reason critically and persuasively about public matters. Students will also explore and assess their own personal values, beliefs, and purpose as they develop their leadership potential.

Credit Only Granted for: PLCY201 or UPAF201.

Formerly: UPAF201.

PLCY203 Liberty and Justice for All: Ethics and Moral Issues in Public Policy (3 Credits)

Students will broaden their understanding of the moral dimensions of public policy as well as their own individual moral perspective. Discussions will include the ideal of a just society, and the place of liberty and equality in it, while focusing on contemporary theories of ethics and justice. It will develop students' appreciation of the ethical challenges unique to the public service sector while building their skills in ethical analysis and decision-making. We will explore the increasing ethical challenges in a world in which technology, global risks, and societal developments are accelerating faster than our understanding can keep pace. A framework for ethical decision-making underpins the course.

PLCY213 Foundations of Nonprofit Leadership and Social Innovation (3 Credits)

Through discussions of contemporary trends, challenges and issues, this course provides an introduction to the nonprofit and NGO sectors, social innovation, and the leadership and management skills required to achieve social impact. The course will explore the history, theories, and roles of philanthropy, the nonprofit sector, and social innovation in societies and cultures. Students will be able to demonstrate an understanding of the process and principles of social entrepreneurship and social innovation. Additionally, the course will introduce students to topics in leadership, social innovation, resource development, community mobilization through networks, the role of policy-making in creating change, project management, and overall strategies for achieving social impact. The course will include mini hands-on learning experiences that allow them to apply key learning outcomes.

PLCY214 Leading and Investing in Social Change: Re-defining and Experimenting with Philanthropy (3 Credits)

Defines philanthropy as an exploration of how one develops a vision of the public good and then deploys resources (including donations, volunteers, and voluntary associations) to achieve an impact.

Credit Only Granted for: PLCY214, UPAF214 or UPAF359I.

Formerly: UPAF359I, UPAF214.

PLCY215 Innovation and Social Change: Creating Change for Good (3 Credits)

A team-based, highly interactive and dynamic course that provides an opportunity for students to generate solutions to a wide range of problems facing many communities today. Students in the iGIVE Program will deepen their understanding of entrepreneurship and innovation practices by creating and implementing projects or ventures that address an issue of their choosing while learning topics such as communications, project management, teamwork, leadership, fundraising, project sustainability and next steps in social change.

Credit Only Granted for: PLCY215 or UPAF215.

Formerly: UPAF215.

PLCY240 Ethical, Policy and Social Implications of Science and Technology (3 Credits)

Asks students to think about how society should manage complexity, transformation, and uncertainty with an eye on developing a broader sense of ethics and social responsibility. Introduces analytical frameworks, concepts, and data collection techniques that interdisciplinary scholars use to map relationships among science, technology and society and generate important questions about the future of society.

Cross-listed with: ENES240.

Restriction: Must be in the Science, Technology, Ethics and Policy minor.

Credit Only Granted for: ENES240 or PLCY240.

PLCY288 Introduction to Public Policy Topics (1-3 Credits)

Introductory-level special topics focusing on a Public Policy problem or issue area.

Repeatable to: 6 credits if content differs.

PLCY300 Governance: Collective Action in the Public Interest (3 Credits)

Examination of societal responses to public problems, including actions by government, non-profit and private sector actors, as well as civil society. Students will examine the roles of these various actors, as well as the nature of civic responsibility. The course will examine the various stages of the policy process, asking the following questions: How does something get defined as a problem that requires a public policy response? How do we think about what the options are for this response, and how do we choose among them? What are the factors that contribute to successful policy implementation? How do we evaluate the success of public policies? These questions will be addressed using examples of current public policy problems, and students will be expected to engage in individual and collaborative work to design responses to those problems.

Prerequisite: PLCY100.

Restriction: Must be in a major in PLCY-School of Public Policy.

PLCY301 Sustainability (3 Credits)

Designed for students whose academic majors would be enhanced by the complementary study of a widely shared but hard-to-operationalize aspiration: that present choices should preserve or improve future options rather than foreclose or degrade them. How should we understand sustainability? How might we achieve it? How would we know if we had achieved it? And how could sustainability activists of a rising generation lead by example?

Cross-listed with: AGNR301.

Credit Only Granted for: AGNR301, PUA301, or PLCY301.

Formerly: PUA301.

PLCY302 Examining Pluralism in Public Policy (3 Credits)

Understanding pluralism and how groups and individuals coexist in society is an essential part of the public policy process. This course will examine the ways in which the diverse experiences of race, gender, ethnicity, class, orientation, identity, and religion impact the understanding of and equitable delivery of public policy. The examination of how identity development shapes our understanding of society and influences the decision-making process is central to students' shaping policy that is truly for the people. This course will equip students with the skills needed to analyze pluralism and draw conclusions about the application of various theories to public policy issues.

Credit Only Granted for: PLCY302 or PUA302.

Formerly: PUA302.

PLCY303 Public Economics Raising and Spending the People's Money (3 Credits)

Applied course in public finance, including introductions to resource mobilization (including taxation), macroeconomic policy, key public expenditure policies, and government budgetary processes and politics. The course will build on the foundations from ECON 202 to address the specific application of public finance principles to solving public problems. The course will focus on the principles of welfare economics (including market failure), economic principles as applied to particular spending programs and tax choices, and issues and institutions involved in the allocation and management of resources both at a national and subnational level. The focus of the course is on these issues from both a domestic and global perspective.

Prerequisite: ECON200.

Restriction: Must be in a major in PLCY-School of Public Policy.

PLCY304 Evaluating Evidence: Finding Truth in Numbers (4 Credits)

Enables students to understand the research done by others with a sufficiently skeptical eye to allow them to determine whether the findings of the research are valid given the assumptions made and methods used. This will involve, in part, thinking about the various problems in research design or conduct that could lead to faulty conclusions. It will also involve being able to differentiate between credible sources of information and those that are not objective. At the conclusion of the course, students should be able to differentiate objective evidence from political argumentation.

Prerequisite: STAT100.

Restriction: Must be in a major in PLCY-School of Public Policy.

PLCY306 Public Policy Analysis in Action (3 Credits)

Utilizes our unique location in the Washington, D.C. region to create a laboratory within which to analyze local, regional, national and international policy problems. Students will be put into teams and assigned to real and timely policy cases. The course will include meetings and field trips with local leaders in the field, ideally connected to the cases. Student will then expand and apply their use of policy analysis and evaluation skills to define those problems, analyze alternative responses, devise appropriate strategies for implementation, and evaluate the success of the proposed policy and implementation. The course will conclude with team presentations to local leaders and faculty. This distinctive course will serve to prepare students for their client-based senior capstone course.

Restriction: Must have earned a minimum of 60 credits; and must be in a major in PLCY-School of Public Policy.

PLCY309 Internship in Political Institutions: State and Local (3-6 Credits)

Offers students supervised internship placements in state and local political or public policy organizations.

Prerequisite: Permission of PLCY-School of Public Policy.

Repeatable to: 12 credits if content differs.

Formerly: PUA349 and PLCY349.

PLCY310 Nonprofit Leadership and Social Innovation in Action (3 Credits)

Further students understanding of topics in leadership, social innovation, resource development, community mobilization through networks, and the role of policy making in creating change. This course will further students understanding of the creation and leadership of nonprofits, social ventures, governance and boards; strategic planning and partnerships; advocacy and public policy processes; community outreach; working in teams, effective communications, and cross-sector approaches to scaling up social impact.

Prerequisite: PLCY 213.

PLCY311 Women in Leadership (3 Credits)

Examines the role of women in the leadership process including the participation of women as activists, voters, advocates, public leaders and as agents of change through various avenues including, among others, public service (elected and appointed), the media, community service, political organizations, and the nonprofit sector.

Credit Only Granted for: PUA311, PLCY311 or PUA359W.

Formerly: PUA359W.

PLCY313 Advocacy in the American Political System (3 Credits)

Introduces students to the creation of law through the legislative process with a special focus on the Maryland General Assembly.

Credit Only Granted for: PUA313, PLCY313 or PUA359C.

Formerly: PUA359C.

PLCY359 Contemporary Issues in Political Leadership and Participation (3 Credits)

Special topics in political leadership and participation.

Prerequisite: Permission of PLCY-School of Public Policy.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: PLCY359 or PUAF359.

Formerly: PUAF359.

PLCY380 Innovation and Social Change: Do Good Now (3 Credits)

Introduces students to the concept of social innovation while exploring the many mechanisms for achieving social impact. It is team-based, highly interactive and dynamic, and provides an opportunity for students to generate solutions to a wide range of problems facing many communities today. Deepens the students understanding of entrepreneurship and innovation practices by guiding them through the creation and implementation process as applied to a project idea of their choice.

Credit Only Granted for: ARHU380, BSOS388B, PLCY388D, or PLCY380.

Formerly: PLCY388D.

PLCY386 Experiential Learning (1-6 Credits)

Prerequisite: Permission of PLCY-School of Public Policy.

Credit Only Granted for: PLCY386 or PUAF386.

Formerly: PUAF386.

PLCY388 Special Topics in Public Policy (1-3 Credits)

Advanced special topics focusing on an interdisciplinary topic related to Public Policy.

Prerequisite: Permission of PLCY-School of Public Policy.

Restriction: Sophomore standing or higher.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: PLCY388 or PUAF388.

Formerly: PUAF388.

PLCY396 Fellowship Program in Political Leadership (2-6 Credits)

Individual instruction course.

Prerequisite: Permission of PLCY-School of Public Policy.

Restriction: Must be enrolled in the full-time fellowship program.

Credit Only Granted for: PLCY396 or PUAF396.

Formerly: PUAF396.

PLCY398 Fellowship Program in Political Leadership (3-6 Credits)

Prerequisite: Permission of PLCY-School of Public Policy.

Restriction: Must be enrolled in the full-time fellowship program.

Repeatable to: 12 credits if content differs.

Credit Only Granted for: PLCY398 or PUAF398.

Formerly: PUAF398.

PLCY399 Directed Study in Public Policy (1-6 Credits)

Guidance for the advanced student capable on interdisciplinary study on special projects under the supervision of faculty.

Prerequisite: Permission of PLCY-School of Public Policy.

Repeatable to: 12 credits if content differs.

Credit Only Granted for: PLCY399 or PUAF399.

Formerly: PUAF399.

PLCY400 Senior Capstone (3 Credits)

Public Policy students will take the skills and knowledge gained through their curriculum and apply them through their senior capstone course. Students will work in teams on problems and issues presented by outside clients, with guidance from faculty facilitators and interaction with the clients. Each team will work with the client to address a particular problem and produce a mutually agreed upon outcome. These hands on projects will advance students' understanding of the analytical, leadership, communication and problem solving skills necessary to address today's policy problems while allowing them to gain professional level experience that could contribute to their success in their post UMD endeavors. The course will conclude with an event that allows all teams to present their findings and outcomes to their client while being evaluated by faculty and public policy professionals.

Prerequisite: PLCY306.

Restriction: Permission of PLCY-School of Public Policy; and must have earned a minimum of 90 credits.

PLCY401 Contemporary Issues in Public Policy (3 Credits)

An integrative course that allows policy students to explore the complexities of the policy-making process from the perspective of specific policy topics. They will learn about and discuss subject-based issues in a seminar format led by faculty and policy experts. Site visits to federal agencies, guest speakers, and round table sessions ensure that students receive a variety of real-world perspectives on their chosen policy area.

Restriction: Must have earned a minimum of 90 credits.

PLCY488 Advanced Special Topics in Public Policy (3 Credits)

Advanced special topics for upper level students focusing on topics related to Public Policy.

Restriction: Must have earned a minimum of 60 credits.

Repeatable to: 6 credits if content differs.

PLSC - Plant Sciences

PLSC110 Introduction to Horticulture (3 Credits)

An overview to the art and science of horticulture. Relationships between plant science and plant production, the use of horticultural plants and plant stress as influenced by cultural practices.

Credit Only Granted for: PLSC100 or PLSC110 and PLSC111.

Formerly: PLSC100.

PLSC111 Introduction to Horticulture Laboratory (1 Credit)

The goal of this course is to expand your knowledge of the growth and development of horticultural crops. An integrated understanding of horticulture will come from laboratory experiments and field trips. This course is designed to complement lecture material from PLSC 110.

Corequisite: PLSC110 or permission of the Department of Plant Science and Landscape Architecture.

PLSC112 Introductory Crop Science (3 Credits)

Major crop plants including: anatomy, physiology, morphology, history, use, adaptation, culture, improvement and economic importance.

Credit Only Granted for: PLSC101 or PLSC112 and PLSC113.

Formerly: PLSC101.

PLSC113 Introductory Crop Science Laboratory (1 Credit)

An introduction to the growth, function and identification of agronomic crops and the environment in which they are produced. This course is designed to complement the lecture material from PLSC 112.

Corequisite: PLSC112 or permission of the Department of Plant Science and Landscape Architecture.

Credit Only Granted for: PLSC101 or PLSC112 and PLSC113.

PLSC115 How Safe is Your Salad? The Microbiological Safety of Fresh produce (3 Credits)

As food is produced in larger quantities and made to travel longer distances, keeping our food safe in this day and age is an ever growing challenge. This course will focus on the question of what it takes to grow and maintain safe fruits and vegetables, as food travels along the path from the farm to your fork. Food safety of fresh produce will be discussed from the public health, agricultural, economical and policy perspectives.

Recommended: PLSC110 and PLSC111; or (PLSC112 and PLSC113); or BSCI105; or (BSCI170 and BSCI171).

PLSC120 Mushrooms and Molds (3 Credits)

Students will learn about how essential fungi (mushroom, molds, and alike) are in this world and how they affect our daily lives. They will learn how fungi interact with animals, plants and other organisms in positive and negative ways. Also, they will study the importance of fungi in biotechnology and food and how they have shaped many societies throughout history.

PLSC125 Feeding Ten Billion by 2050: Food Security and Crop Protection (3 Credits)

A big question concerning global food security is "how can we feed 10 billion people in 2050?" This course will stimulate creative thinking about possible solutions particularly from the crop production perspective. The instructors will introduce the concept of food security and different dimensions of this complex issue, identify major constraints to food security, and discuss scientific approaches that may be used to meet the grand challenge. Emphasis will be placed on topical and controversial issues such as the impact of climate change, biofuel production and GM crops on food security, and novel strategies that can improve food security.

PLSC130 Did Yeast Create Civilization? (3 Credits)

Did yeast create civilization? Fermented foods have played a major role in the transition from nomadic to settled agrarian societies, the establishment of social and religious customs, the expansion of empires, and modern economies. To what extent are our past and current attitudes towards fermented foods rooted in historical and cultural imprints? Explore the central role of fermentation in human history and culture, the basic microbiological processes underlying fermentation processes, and the processes used to produce and distribute fermented foods. Find out how the fruits, grains, and dairy products used to produce fermented foods are grown and selected. Students will learn about the development and modern use of fermented dairy products, pickles, bread, tea, chocolate, wine, beer, distilled liquors, and pharmaceutical/manufactured products.

Recommended: CHEM103, CHEM131, CHEM135, or CHEM146.

Cross-listed with: AGST130.

Credit Only Granted for: AGST130 or PLSC130.

PLSC201 Plant Structure and Function (3 Credits)

The relationship between plant structure and function and how the environment influences changes in the physiology to control higher plant growth and development are studied. Survey of the organizational structure of plants from the molecular to the morphological level and gain an understanding of how the plant functions to grow and reproduce.

Prerequisite: Minimum grade of C- in PLSC110 and PLSC111 or (PLSC112 and PLSC113); and minimum grade of C- in CHEM131 and CHEM132.

PLSC203 Plants, Genes and Biotechnology (3 Credits)

An overview of the history, genetics, and reproductive mechanisms for agronomic and horticultural plants that examines mechanisms of genetic improvement ranging from traditional plant breeding to tissue culture and genetic engineering. Social and political issues such as germplasm preservation and international intellectual property rights will also be discussed.

Prerequisite: Minimum grade of C- in BSCI103; or minimum grade of C- in BSCI170 and BSCI171.

PLSC205 Introduction to Turf Science and Management (4 Credits)

Principals of turf science and culture with emphasis on turfgrass anatomy, morphology, and physiology. The role of cultural interventions in achieving specific aesthetic and functional objectives is examined for multiple turf uses. Pest problems typically encountered in turfgrass management are also covered.

Credit Only Granted for: PLSC205 or PLSC305.

Formerly: PLSC305.

PLSC206 Plant Structure and Function Laboratory (1 Credit)

Provide hands-on experience for students who are concurrently taking PLSC201 or other interested students and train students how to collect quantitative data from plants and perform statistical analysis (i.e., Student's t-test and chi-square analysis) of the data using Excel. The students will also have opportunity to access and analyze biological datasets from publicly available sources to build phylogenetic trees and explore gene expression patterns.

Prerequisite: PLSC201 or permission of instructor .

PLSC226 Plant Diversity (4 Credits)

Students will learn to identify and understand relationships among major plant families of northeastern North America, especially of the Mid-Atlantic region, through lecture, field, and laboratory study. Characteristics and biogeography of and evolutionary relationships among families are emphasized in lecture. These characteristics will be woven together to provide understanding of the ecological and evolutionary drivers of plant diversity and the history of the field. Sight identification of families, genera, and species and keying skills are stressed in field and laboratory sessions.

Prerequisite: Minimum grade of C- in PLSC201 and PLSC206; or permission of instructor.

PLSC244 Herbaceous Plants (3 Credits)

Herbaceous plants are integral components of residential and commercial landscapes. Students will become familiar with 250 annual and perennial plants. The emphasis will be on plant management requirements and seasonal variation in the landscape.

Prerequisite: PLSC110 and PLSC111; or (PLSC112 and PLSC113).

Credit Only Granted for: PLSC244 or PLSC489A.

Formerly: PLSC489A.

PLSC250 Lawns in the Landscape: Environmental Hero or Villain? (3 Credits)

Examination of the lawn as an element in the anthropogenic landscape and its influence on global warming, regional air and water quality, ecological diversity, mammalian pesticide exposure and consumptive water use. Demographic and socioeconomic factors are examined in the context of being predictors of landscape aesthetic desires and lawn management behaviors. Policies that incentivize lawn alternatives or changes in lawn management behavior are discussed. Cross-listed with ENSP250.

Credit Only Granted for: ENSP250 or PLSC250.

PLSC251 Financial Applications for the Green Industry (3 Credits)

An introduction to the application of financial principles in the Green Industry business sector. Accounting, pricing, and estimating, job cost management and production efficiency are discussed and manifested in Scholarship In Practice exercises, case studies and a business plan project.

Credit Only Granted for: PLSC361 or PLSC251.

Formerly: PLSC361.

PLSC253 Woody Plants for Mid-Atlantic Landscapes I (3 Credits)

A field and laboratory study of trees, shrubs, and vines used in ornamental plantings. Major emphasis is placed on native deciduous plant materials.

Prerequisite: Minimum grade of C- in PLSC110 and PLSC111.

PLSC254 Woody Plants for Mid-Atlantic Landscape II (3 Credits)

A field and laboratory study of trees, shrubs, and vines used in ornamental plantings. Major emphasis is placed on introduced and evergreen plant materials.

Prerequisite: Minimum grade of C- in PLSC110, PLSC111, and PLSC253; or permission of instructor.

PLSC271 Plant Propagation (3 Credits)

A study of the principles and practices in the propagation of plants.

Prerequisite: Minimum grade of C- in PLSC110 and PLSC111; or minimum grade of C- in BSCI170 and BSCI171.

PLSC272 Principles of Arboriculture (3 Credits)

The establishment and maintenance of healthy trees in an urban setting will be studied. Lectures will focus on the environmental constraints to tree development in the city, and the role of physiological processes in regulating tree vigor. Laboratory exercises will cover the unique aspects of urban soils, tree valuation procedures, pruning and training, and supervised climbing.

Cross-listed with: INAG272.

Credit Only Granted for: INAG272 or PLSC272.

PLSC303 Global Food Systems (3 Credits)

An introduction to the global food system and its agricultural, biophysical, and socioeconomic domains. The problems and potentials for increasing world food supply based on current agronomic knowledge. Emphasis on international aspects of food crop production as its interrelationships with people and the environment in the developing world.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or students who have taken courses with comparable content may contact the department.

PLSC321 Landscape Structures and Materials (3 Credits)

An examination of the use, properties, and detailing of materials used in landscape construction. The use and design of structures in the landscape.

Prerequisite: PLSC320.

Credit Only Granted for: LARC321 or PLSC321.

PLSC388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Prerequisite: Must be in the AGNR Honors Program.

Repeatable to: 6 credits if content differs.

PLSC389 Internship (1-3 Credits)

Credit will be given for practical work carried out at one or more horticultural, agronomic, landscape industries, botanical gardens, or arboreta under formally arranged internships.

Prerequisite: Permission of AGNR-Plant Science & Landscape Architecture department.

Restriction: Junior standing or higher. And must be in Plant Sciences program; or must be in Landscape Architecture program.

Repeatable to: 6 credits if content differs.

PLSC398 Seminar (1 Credit)

Oral presentation of the results of investigational work by reviewing recent scientific literature in the various phases of natural resource sciences, horticulture and agronomy.

Restriction: Senior standing. And must be in Landscape Architecture program; or must be in Plant Sciences program.

PLSC399 Special Problems in Plant Science (1-3 Credits)

Research projects in Plant Science including field, greenhouse, laboratory, studio and/or library studies. Research is conducted under the direction of a faculty member.

Prerequisite: Permission of the instructor .

Repeatable to: 6 credits.

PLSC400 Plant Physiology (4 Credits)

An in-depth examination of the unique molecular and physiological principles necessary to understand how plants grow and respond to the environment at the cellular and organismal levels. Plants evolved unique metabolism and survival strategies, so students should be prepared to enter a world that may be new to them.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in PLSC201; and minimum grade of C- in CHEM231 and CHEM232; or minimum grade of C- in CHEM237.

Cross-listed with: BSCI442.

Credit Only Granted for: BSCI442 or PLSC400.

PLSC401 Pest Management Strategies for Turfgrass (3 Credits)

Interdisciplinary view of weed, disease, and insect management from an agronomy perspective. Plant responses to pest invasion, diagnosis of pest-related disorders, and principles of weed, disease and insect suppression through cultural, biological and chemical means are discussed.

Prerequisite: PLSC305.

PLSC402 Sports Turf Management (3 Credits)

Sports turf management, including design, construction, soil modification, soil cultural techniques, pesticide use, fertilization, and specialized equipment.

Prerequisite: PLSC305 and PLSC401.

PLSC404 Plant and Fungal Metabolism (3 Credits)

An introduction to biochemistry and metabolism in plants and fungi, covering the biosynthesis of compartments in plant and fungal cells with biological molecules such as nucleic acids, amino acids and lipids. Energy flow processes such as photosynthesis, carbohydrate metabolism and respiration, are covered in the course. The integration of different pathways in plant development and responses to environmental stresses will be discussed.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in PLSC201 and PLSC206.

PLSC405 Agroecology (3 Credits)

How can we balance the multiple, and often competing objectives of sustainable agricultural intensification to promote both agricultural productivity and human wellbeing? The answer to this question requires a transdisciplinary, agroecological perspective. Agroecology is the integrative study of the ecology of the entire food system, encompassing ecological, economic and social dimensions. This course is designed to introduce various topics in agroecology (e.g. organic agriculture, biodiversity, the Farm Bill). We will take an ecosystems approach to the study of agriculture that will enable students to analyze the environmental, social, and economic interconnections within various types of agricultural systems locally and globally.

Prerequisite: At least one course in ecology with a minimum grade of C-; or permission of instructor.

Recommended: BSCI361 or PLSC471; or any BSCI or ENST ecology course.

Credit Only Granted for: PLSC405 or PLSC605.

Additional Information: Class will be held on campus, with two day-long field trips to local farms.

PLSC410 Commercial Turf Maintenance and Production (3 Credits)

Agronomic programs and practices used in hydroseeding, commercial lawn care, sod production and seed production. Current environmental, regulatory and business management issues confronting the turfgrass industry.

Prerequisite: PLSC305; or permission of AGNR-Plant Science & Landscape Architecture department.

PLSC411 Plant Genetics (3 Credits)

An introduction to genetic principles and technologies in plants, centered on linking phenotype to genotype. Topics include Mendelian inheritance of single and complex traits, epigenetics, population genetics and plant breeding. Examples on creating and mapping genetic mutations in both model plants and non-model crops are discussed. Current genetic and genomic approaches are highlighted, such as genome engineering and reprogramming, TILLING, and genome-wide association mapping.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171.

PLSC420 Principles of Plant Pathology (4 Credits)

An introduction to the causal agents, nature and management of plant diseases with particular attention paid to economically important diseases of horticultural and agronomic crops.

Prerequisite: Minimum grade of C- in CHEM131, CHEM132, and PLSC201; or students who have taken courses with comparable content may contact the department.

PLSC425 Green Roofs and Urban Sustainability (1 Credit)

The integration of disciplines associated with sustainability issues. Topics range from plant science to design to policy, all of which can contribute to improving the urban environment.

Credit Only Granted for: PLSC425 or PLSC489V.

Formerly: PLSC489V.

PLSC427 Plant Microbe Associations (3 Credits)

Encompasses advanced investigation and analyses of the ecology, physiology and molecular genetics of plant-microbe interactions along with their impact on crop production, ecological and food production systems.

Credit Only Granted for: PLSC489W or PLSC427.

Formerly: PLSC489W.

PLSC430 Water and Nutrient Planning for the Nursery and Greenhouse Industry (3 Credits)

Skills will be developed in order to write nutrient management plans for the greenhouse and nursery industry. Completion of this course can lead to professional certification in nutrient planning by the State of Maryland after MDA examinations are passed.

Prerequisite: Minimum grade of C- in CHEM131 and CHEM132; or minimum grade of C- in ENST200; or permission of instructor.

Recommended: PLSC432.

PLSC432 Greenhouse Crop Production (3 Credits)

The commercial production and marketing of ornamental plant crops under greenhouse, plastic houses and out-of-door conditions. Integrating an understanding of basic plant physiological mechanisms into the decision-making process for the design, construction, maintenance and day-to-day management of greenhouse operations.

Prerequisite: Minimum grade of C- in PLSC201 .

PLSC433 Technology of Fruit and Vegetable Production (4 Credits)

A critical analysis of research work and application of the principles of plant physiology, chemistry and botany to practical problems in the commercial production of fruit and vegetable crops.

Prerequisite: Minimum grade of C- in PLSC201, PLSC271, and ENST200; or students who have taken courses with comparable content may contact the department.

Restriction: Junior standing or higher.

PLSC452 Environmental Horticulture (3 Credits)

Environmental horticulture principles used in the establishment and maintenance of plant materials in residential and commercial landscapes will be addressed. The effect of soil conditions, environmental factors, and commercial practices will be discussed in relation to the growth and development of newly-installed plant materials. Field diagnostics will be used by students to assess significant problems of plant decline. Environmental sustainability will be combined with current commercial practices of storm water management, nutrient management, and irrigation management to achieve an integrated approach to plant management.

Prerequisite: Minimum grade of C- in PLSC110 and PLSC111; or minimum grade of C- in PLSC112 and PLSC113; and minimum grade of C- in PLSC253 and PLSC254.

PLSC453 Weed Science (3 Credits)

Weed identification, ecology, and control (cultural, mechanical, biological, and chemical methods).

PLSC460 Application of Knowledge in Plant Sciences (3 Credits)

A capstone course based on interactions with plant science professionals and student-led class discussions. Students will apply their knowledge and experience to practical issues in the discipline, further develop critical thinking ability, and enhance their communication, teamwork, and professional skills. Topics will include nutrient management, integrated pest management, plant interactions with urban and rural ecosystems, planning of public grounds, plant biotechnology, and teaching skills.

Prerequisite: Minimum grade of C- in PLSC110 and PLSC111; or minimum grade of C- in PLSC112 and PLSC113; or minimum grade of C- in PLSC201; or permission of instructor.

Recommended: ENGL393 and ENST200; and (PLSC389 or PLSC399).

Restriction: Senior standing or higher.

PLSC461 Cultural Management of Nursery and Greenhouse Systems: Substrates (1 Credit)

One of three 1-credit modules (PLSC461, PLSC462 and PLSC464) covering the management techniques used in the intensive culture of plants in commercial operations. Specifically, this module covers the composition, handling, physical and chemical properties of substrates and how they should be managed to maximize plant growth.

Credit Only Granted for: PLSC461 or PLSC489T.

Formerly: PLSC489T.

Additional Information: Course material is delivered primarily online, but a four hour face-to-face lecture/lab will be held at the end of the module. PLSC461, PLSC462 and PLSC464 will be taught sequentially during the semester.

PLSC462 Cultural Management of Nursery and Greenhouse Systems: Irrigation (1 Credit)

One of three 1-credit modules (PLSC461, PLSC462 and PLSC464) covering the management techniques used in the intensive culture of plants in commercial operations. Specifically, this module covers water quantity and quality issues, water supply (basic hydraulics), irrigation system design and irrigation system evaluation (performance) to maximize water application efficiency.

Credit Only Granted for: PLSC462 or PLSC489W.

Formerly: PLSC489W.

Additional Information: Course material is delivered primarily online, but a four hour face-to-face lecture/lab will be held at the end of the module. PLSC 461, 462 and 464 will be taught sequentially during the semester.

PLSC464 Cultural Management of Nursery and Greenhouse Systems: Nutrients (1 Credit)

One of three 1-credit modules (PLSC461, PLSC462 and PLSC464) covering the management techniques used in the intensive culture of plants in commercial operations. Specifically, this module covers the basics of fertilization, different fertilization strategies and nutrient use and efficiency, to optimize nutrient application practices in intensive plant production systems.

Credit Only Granted for: PLSC464 or PLSC489Z.

Formerly: PLSC489Z.

Additional Information: Course material is delivered primarily online, but a four hour face-to-face lecture/lab will be held at the end of the module. PLSC 461, 462 and 464 will be taught sequentially during the semester.

PLSC471 Forest Ecology (3 Credits)

An understanding of the forest ecosystem, its structure and the processes that regulate it are provided. It also considers changes that occur in forests, the interaction of environment and genetics in promoting ecosystem sustainability, and the role of human influences on urban forest ecosystems.

Prerequisite: Minimum grade of C- in PLSC201; or minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106.

PLSC472 Capstone-Urban Forest Project Management (3 Credits)

Students will synthesize the ideas and information learned from their studies in urban forestry. Working in teams, students will complete projects involving real-world issues. Student projects will use scientific, social, political and ethical considerations in an interdisciplinary approach to provide solutions to their problem.

Prerequisite: Minimum grade of C- in ENST200, PLSC272, and PLSC471.

Restriction: Senior standing or higher; and must be in a major within AGNR-Plant Science & Landscape Architecture department.

PLSC473 Woody Plant Physiology (3 Credits)

Concentration is placed on physiological processes important to woody plant growth and development. Emphasis will be placed on current concepts and theories of how woody plants grow and develop, and the critical assessment of current research in woody plant physiology. Course readings will include textbook assignments and selected papers from the current scientific literature.

Prerequisite: Minimum grade of C- in PLSC400 or BSCI442; or minimum grade of C- in PLSC201 and PLSC206; or students who have taken courses with comparable content may contact the department.

PLSC480 Urban Ecology (3 Credits)

Cities are rapidly increasing in number and size across the globe, transforming local ecosystems. This course examines urban environments as coupled social-ecological systems at multiple scales, from streets and parks to urban landscapes patterns and global patterns of biodiversity. Ecological principles are applied in the urban context, including habitats, biodiversity, ecological processes, and ecosystem services of urban environments, with applications to problems in urban land management, decision-making and design.

Prerequisite: Minimum grade of C- in PLSC471, ENST360, BSCI363, or BSCI160; or other coursework/experience considered for instructor permission.

Additional Information: Class will be held both on campus and at other locations such as the U.S. Botanic Garden, local parks, and urban and suburban locations off campus.

PLSC481 Vegetation Assessment and Analysis (2 Credits)

An overview of vegetation assessment through the collection of data in the field (e.g. plots and transects) and the analysis of existing data and remotely detected images (e.g. Aerial photographs and GIS layers).

Prerequisite: PLSC110 and PLSC111; or (BSCI160 and BSCI161); or permission of instructor.

Recommended: PLSC201, BSCI360, PLSC226, or PLSC471.

PLSC489 Special Topics in Plant Science (1-3 Credits)

A lecture and or laboratory series organized to study a selected phase of Plant Science not covered by existing courses. Credit according to time scheduled and organization of the course.

Repeatable to: 6 credits if content differs.

PORT - Portuguese

PORT103 Intensive Elementary Portuguese (4 Credits)

Covers speaking, reading, writing, listening, and culture of Portuguese-speaking world.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: PORT103 or PORT104.

Formerly: PORT104.

PORT203 Intensive Intermediate Portuguese (4 Credits)

Covers speaking, reading, writing, listening, and culture of Portuguese-speaking world.

Prerequisite: PORT103 or PORT104; or must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: PORT203 or PORT204.

Formerly: PORT204.

PORT205 Intermediate Reading and Conversation in Portuguese I (3 Credits)

Development of spoken Portuguese at intermediate level based on written assignments and exams on readings in a variety of genres.

Prerequisite: PORT203; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PORT207 Intermediate Reading and Conversation in Portuguese II (3 Credits)

Advanced practice of oral and written Portuguese. Reading and discussions of texts, review of grammar, and vocabulary practice.

Prerequisite: PORT205; or students who have taken courses with comparable content may contact the department.

Restriction: Not open to native/fluent speakers of Portuguese.

PORT222 Cannibals, Savages and Carnivalization: The Making of Brazilian National Culture (3 Credits)

Introduction to the main concepts, cultural movements, and ideas that have shaped Brazilian modern culture. Exploring some of the ways in which cultural cannibalism, savagery, and carnivalization have been deployed as symbolic frameworks in the construction of a national identity through analyses of film, literature, music and visual arts. Taught in English.

Credit Only Granted for: PORT222 or PORT228C.

Formerly: PORT228C.

PORT224 Brazilian Culture (3 Credits)

Pluralistic formation of Brazilian culture, based on European, African and Indian contributions. Lectures, discussions, slides, video, and film presentations. Taught in English.

PORT228 Selected Topics in Latin American Literature and Society (3-6 Credits)

Variable cultural studies topics on literature and society in contemporary Latin America. Taught in English.

Cross-listed with: SPAN228.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: PORT228 or SPAN228.

PORT229 Selected Topics in Latin American Culture (1-3 Credits)

Varied topics in Latin America culture.

Repeatable to: 9 credits if content differs.

PORT230 Brazilian Portuguese through Film (3 Credits)

Intermediate practice of oral and written Portuguese through discussion of Brazilian movies, along with grammar review and vocabulary exercises. Taught in Portuguese.

Prerequisite: PORT205; or permission of ARHU-School of Languages, Literatures, and Cultures department.

PORT234 Issues in Latin American and Caribbean Studies I (3 Credits)

Interdisciplinary study of major issues in Latin America and the Caribbean, including Latin America's cultural mosaic, migration and urbanization. Democratization and the role of religions. Taught in English.

Cross-listed with: LACS234, SPAN234.

Credit Only Granted for: LASC234, PORT234, SPAN234, or LACS234.

Formerly: LASC234.

PORT235 Issues in Latin American and Caribbean Studies II (3 Credits)

Major issues shaping Latin American and Caribbean societies including the changing constructions of race, ethnicity, gender and class as well as expressions of popular cultures and revolutionary practices. Taught in English.

Cross-listed with: LACS235, SPAN235.

Credit Only Granted for: LASC235, PORT235, SPAN235, or LACS235.

Formerly: LASC235.

PORT269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PORT320 Survey of Portuguese Literature (3 Credits)

Portuguese poetry, fiction and drama from the Twelfth Century to the present. Taught in English.

PORT332 Brazilian Cinema (3 Credits)

Brazilian films from the late 1950s to the present with a special view to the relationship between cinema, society, historical dates, and social changes in Brazil. Taught in English.

Cross-listed with: CINE332.

Credit Only Granted for: PORT332, CINE332, or FILM332.

Formerly: FILM332.

PORT369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PORT386 Experiential Learning (3-6 Credits)

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department; and junior standing or higher.

PORT388 Special Topics in Brazilian Studies (3 Credits)

Exposes students to textual, visual and aural products to explore how Brazil has been shaped from within and abroad. Focuses on the broad meaning and impact on Brazilian culture and social formation. Taught in English.

Repeatable to: 6 credits if content differs.

PORT399 Independent Study in Portuguese (1-3 Credits)

Specific readings in literature under the supervision of a faculty member of the department.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 3 credits.

PORT405 Portuguese for Spanish Speakers (3 Credits)

Intensive basic grammar, reading and auditory comprehension. Native or acquired fluency in Spanish required.

Restriction: Must have native or acquired fluency in Spanish.

PORT408 Special Topics in Portuguese Literature (3 Credits)

Major themes and literary developments from the late 18th century to the present.

Repeatable to: 6 credits if content differs.

PORT409 Special Topics in Brazilian Literature (3-6 Credits)

Major themes and literary development from the late eighteenth century to the present. Specific topic to be announced each time the course is offered.

PORT410 Tropical Dreams: Nature and Art in Brazil (3 Credits)

Ideas, images, and representations of the tropics have historically portrayed them as exotic, lush, underdeveloped, and resource-rich places. This course interrogates how concepts of tropicality and nature have influenced the culture, politics, and society of a particular country:

Brazil. We examine how nature, a key concept in tropicality, has been represented and understood in different terms throughout history and how these representations have informed environmental discourses and attitudes. Furthermore, we critically analyze how racialized notions of the tropics that shaped structures of oppression have been constructed, perpetuated, and contested. Our objects of analysis will consist of artistic depictions of the tropical world in addition to films, music, literature, and critical thought.

Credit Only Granted for: PORT409A, SPAN609A, LACS448Y, or PORT410.

Formerly: PORT409A.

PORT478 Themes and Movements of Luso-Brazilian Literature in Translation (3 Credits)

A study of specific themes and movements either in Portuguese or Brazilian literature, as announced. Designed for students for whom the literatures would be inaccessible in Portuguese.

Repeatable to: 6 credits if content differs.

PORT480 Machado de Assis (3 Credits)

Fiction of Machado de Assis covering his romantic and realistic periods.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

PSYC - Psychology

PSYC100 Introduction to Psychology (3 Credits)

A basic introductory course intended to bring the student into contact with the major problems confronting psychology and the more important attempts at their solution.

PSYC123 The Psychology of Getting Hired (1 Credit)

Designed to introduce students to the science behind the hiring process and to prepare individuals with the academic and practical training required. Together we will explore psychological principles that influence the selection process and how individuals can apply them for the competitive edge that makes others Fear the Turtle!

Restriction: Must not be in a Robert H. Smith School of Business degree program.

Additional Information: Cannot be used in place of BMGT367 toward a degree program in the Robert H. Smith School of Business.

PSYC138 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PSYC200 Statistical Methods in Psychology (3 Credits)

A basic introduction to quantitative methods used in psychological research.

Prerequisite: PSYC100; and 1 course with a minimum grade of C- from (STAT100, MATH107, MATH111, MATH120, MATH130, MATH136, or MATH140).

PSYC202 Introduction to Neuroscience (3 Credits)

In an evolutionary sense, the job of the nervous system is to produce, control, and coordinate behaviors that help an animal survive and reproduce. Neuroscience is the study of how the nervous system does that. Provides a broad introduction to neuroscience, always keeping the behavioral consequences in view.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171.

Cross-listed with: NEUR200.

Credit Only Granted for: PSYC309U, NEUR200, PSYC202 or PSYC301.

Formerly: PSYC309U.

PSYC210 Personality and Temperament: Developmental Origins, Brain Bases, and Clinical Implications (3 Credits)

What is known about what makes each of us unique? How do these differences contribute to enduring differences in health & wealth?

We will review recent research in humans and non-humans aimed at understanding the psychological & biological mechanisms underlying stable individual differences in personality. We will discuss the phylogenetic and ontogenetic origins of temperament, measurement issues, fundamental dimensions of personality across the lifespan, neurobiological substrates of temperament/personality, mechanisms contributing to stability and change, implications for psychopathology, & broader implications for public/macro-economic policy.

Prerequisite: PSYC100.

Restriction: Must be in Psychology program.

PSYC221 Social Psychology (3 Credits)

The influence of social factors on the individual and on interpersonal behavior. Includes topics such as conformity, attitude change, personal perception, interpersonal attraction, and group behavior.

Prerequisite: PSYC100.

PSYC232 Psychology of Racism (3 Credits)

Explores the causes, correlates, and consequences of racial prejudice in the United States and other national contexts. Using lecture, readings, and discussion, we will examine the psychological theory and research on what processes underlie and motivate racial prejudice; how racial prejudice is experienced by its targets; how racial prejudice pervades our culture and social institutions; and how racial prejudice is learned, maintained, and ultimately changed.

Restriction: Limited to Psychology majors; if spaces remain in the course, will open to all majors.

PSYC234 Living the Good Life: The Psychology of Happiness (3 Credits)

What are the secrets to living a happy life? Can happiness be found within the context of war, a depressed economy, violence and other major stressors? Are some people born happier than others? This course will teach you the scientific process that psychologists use to study happiness (and related emotional variables) and give you the opportunity to practice applying that process in a number of ways. You will learn how we (a) gather and critically evaluate research findings in the existing literature, (b) integrate those findings into coherent and testable theories, (c) design and conduct valid scientific research that tests those theories and extends our knowledge, and (d) effectively communicate our theories and findings to a wide range of audiences. The result of the process is a more accurate and objective understanding of happiness, and that is what prepares you to apply your scientific understanding to explain and influence a wide range of outcomes.

Credit Only Granted for: PSYC234 or PSYC289D.

Formerly: PSYC289D.

PSYC237 Psychology of Evil (3 Credits)

Why is there evil in the world? Are some born evil, or do social, environmental and cultural forces create evil? What makes otherwise good people do evil things? The scientific study of evil epitomizes the fundamental challenge that psychology faces in dissecting the role of biology (nature) and the social context (nurture).

Credit Only Granted for: PSYC237 or PSYC289E.

Formerly: PSYC289E.

PSYC238 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PSYC262 Asian American Psychology (3 Credits)

An overview of how socio-cultural influences impact the development and psychological health of Asian Americans. Other topics include how minority group status, adaptation and identity development influence various aspects of psychological functioning; the role of historic systematic racism; and, how the COVID-19 pandemic has negatively impacted Asian Americans. Students develop a deeper understanding of the role of stereotypes and racism, acculturation, racial identity development, cultural values, gender socialization, behavioral norms, family roles, stressors and social support systems on the mental health, well-being and health of Asian Americans.

Cross-listed with: AAST262.

Credit Only Granted for: PSYC262, AAST262 or PSYC489Z.

Formerly: PSYC489Z.

PSYC300 Research Methods in Psychology Laboratory (4 Credits)

A general introduction and overview to the fundamental theoretical, conceptual, and practical issues in psychological research in both the laboratory and the field.

Prerequisite: PSYC200.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track.

PSYC302 Fundamentals of Learning and Behavior (3 Credits)

Overview of the fundamental types of learning that occur without formal instruction. The course covers fundamentals of classical and instrumental conditioning as studied in a variety of species in addition to more modern theories of learning. We will then explore how these principles influence diverse processes such as memory, attention, extinction, categorization, motivation, and in some cases, how they are implemented in the brain and disrupted in disease.

Prerequisite: PSYC100, BSCI170, and BSCI171.

Restriction: Restricted to psychology majors during the registration period; all other majors will be placed on a hold file.

PSYC303 Professional Development for Psychology Majors (1 Credit)

An investigation of various career and graduate school opportunities available to psychology majors. Students will learn about a wide range of career fields, will learn how to utilize available resources to pursue career goals, and will take steps to advance their professional identity and development.

Prerequisite: PSYC123; or permission from the instructor with a completed resume.

Restriction: Must have earned a minimum of 60 credits; and must be in the Psychology major.

PSYC304 Biological Psychology (3 Credits)

Biological Psychology is the study of the physiological basis of behavior. In this course, we will first cover the basic principles of brain organization and neural transmission. We will then introduce traditional and modern research techniques in the field of behavioral neuroscience. The last portion of the course focuses on specific topics including psychopharmacology, learning and memory, emotion, stress, drug of abuse, neurological disorders (e.g., Alzheimer's disease and Parkinson's disease) and schizophrenia.

Prerequisite: PSYC100, BSCI170 and BSCI171; or equivalent.

Credit Only Granted for: PSYC301 or PSYC304.

Formerly: PSYC301.

PSYC307 Collective Behavior and Decision Making in Human and Animal Groups (3 Credits)

Overview of the fundamental principles underlying the organization of animal societies, mathematical models describing these phenomena, and applications to human societies and decision-making. Students will engage in discussions of case studies, analyze and evaluate mathematical simulations, and apply what they have learned from animal groups to practice solving problems currently facing human society.

Prerequisite: NEUR200, PSYC304 or PSYC221.

Recommended: PSYC200 or equivalent statistics course.

Credit Only Granted for: PSYC207 or PSYC307.

Formerly: PSYC207.

PSYC309 Special Topics in Psychology (1-3 Credits)

Topics of current interest which represent extensions of or additions to topics covered in more general topical courses.

Prerequisite: PSYC100.

Restriction: Must be in Psychology program; and sophomore standing or higher.

Repeatable to: 6 credits if content differs.

PSYC310 Perception (3 Credits)

A survey of phenomena and theories of perception including psychological, anatomical, physiological, and environmental factors important in determining how we perceive the world. Historical background will be examined as well as contemporary research.

Prerequisite: PSYC100. And CHEM103; or PHYS121; or (BSCI160 and BSCI161); or (BSCI170 and BSCI171); or BSCI105; or BSCI106.

Restriction: Must not have completed PSYC410.

PSYC330 Child Psychopathology (3 Credits)

Etiology, diagnosis, prevention and treatment of emotional disorders of childhood and adolescence.

Prerequisite: PSYC100.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track.

Credit Only Granted for: PSYC309B or PSYC330.

Formerly: PSYC309B.

PSYC332 Psychology of Human Sexuality (3 Credits)

A survey of historical and contemporary psychological views on a wide variety of sexual behaviors; theory and research bearing on the relationship between life span psychological development, psychological functioning, interpersonal processes and sexual behaviors; political and social issues involved in current sexual norms and practices.

Prerequisite: PSYC100.

PSYC334 Psychology of Interpersonal Relationships (3 Credits)

Research, theory and their practical applications pertaining to the development, maintenance and dissolution of human relationships. Processes critical to successful relating (e.g., communication, bargaining, conflict resolution), and issues associated with troubled dyadic relations with equal partners (e.g., jealousy, spouse abuse, divorce).

Prerequisite: PSYC100.

PSYC336 Psychology of Women (3 Credits)

A study of the biology, life span development, socialization, personality, mental health, and special issues of women.

Prerequisite: PSYC100.

Cross-listed with: WGSS336.

Credit Only Granted for: PSYC336, WMST336 or WGSS 336.

Formerly: WMST336.

PSYC338 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PSYC341 Introduction to Memory and Cognition (3 Credits)

An introduction to the basic concepts of cognitive psychology, the scientific study of mental processes. Topics will include perception, attention, memory, reasoning, and language, with an emphasis on how findings from cognitive psychology can inform real-life thinking (e.g., memory strategies for studying, pitfalls of multitasking, and how/why our memories can fail us).

Prerequisite: PSYC200 and PSYC300.

PSYC344 Health Psychology (3 Credits)

An examination of how psychological, biological, and social factors impact physical health and well-being. Students will use the biopsychosocial model to analyze topics including stress, health disparities, pain, addiction, disease states (e.g., cardiovascular disease, diabetes, cancer), and primary prevention.

Prerequisite: PSYC100; or permission of instructor.

Restriction: Must be in the Psychology program; or must be in a major within the School of Public Health; or permission of instructor.

Credit Only Granted for: PSYC489U or PSYC344.

Formerly: PSYC489U.

PSYC346 Death, Dying and Grieving: What Future Healthcare Professionals Need to Know (3 Credits)

What do future healthcare professionals need to know about death dying and grieving? Theories and research related to death, dying and grieving, interventions with the dying and grieving, and communication about end-of-life issues in healthcare settings will be examined. Topics include trajectories of common illnesses, palliative and hospice care, ethical and multicultural issues, suicide, models of grieving, post-traumatic growth, and self-reflection regarding values, biases, and beliefs regarding death. This class will prepare students for careers as psychologists, physicians, nurses, or social workers as they will obtain foundational knowledge, engage in self-reflection, and practice communication skills that can be used with future clients or patients who are dying or grieving the dying/death of a loved one.

Prerequisite: PSYC100.

PSYC353 Adult Psychopathology (3 Credits)

The nature, diagnosis, etiology, and treatment of mental disorders.

Prerequisite: PSYC100.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track.

PSYC354 Multicultural Psychology in the U.S. (3 Credits)

What are the psychological implications of racism, sexism, homophobia and other structures of inequality in the United States? How do socio-cultural privilege and oppression influence individual and group thoughts, feelings, and behaviors? This course will take a current events focus to understanding multicultural and social justice issues in psychology with an emphasis on self-reflection, mental health, cross-cultural communication, and strategies for social change.

Prerequisite: PSYC100.

PSYC355 Developmental Psychology (3 Credits)

Survey of research and theory of psychological development from conception through childhood, stressing physiological, conceptual and behavioral changes, and the social and biological context in which individuals develop.

Prerequisite: PSYC100.

PSYC361 Survey of Industrial and Organizational Psychology (3 Credits)

A general survey of the field of industrial organizational psychology including such topics as organizational entry (recruitment, selection, training, socialization); organizational psychology (motivation, leadership, job attitudes); productivity in the workplace (performance appraisal, absenteeism, turnover), and the role that the larger environment plays in influencing work behaviors and work attitudes.

Prerequisite: PSYC100.

PSYC362 Introduction to Negotiation (3 Credits)

Overview of the field of negotiation and the social-psychological and contextual factors that facilitate and inhibit successful negotiation agreements. Students will engage in a variety of negotiation exercises individually and as a team.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track.

PSYC381 Community Interventions: Domestic Violence I (3 Credits)

Study theories and research related to the dynamics and effects of intimate partner violence on women and children. Learn about community resources and interventions for survivors of domestic violence. Examine theoretical writings and research findings regarding the effects of gender, culture, race/ethnicity, and socioeconomic status on the experiences of intimate partner violence survivors and their children.

Prerequisite: PSYC100.

Restriction: Preference given to majors in Human Development, Psychology, and Women, Gender and Sexuality Studies.

Credit Only Granted for: PSYC318D, PSYC381, WMST498A or WGSS498A.

Formerly: PSYC318D.

Additional Information: Students who successfully complete this course may be eligible to enroll in PSYC319 - a service learning class in which students volunteer in the community to work with children who have experienced domestic violence and/or homelessness.

PSYC389 Experiential Learning (1-6 Credits)

Internship in psychology-related fields.

Prerequisite: PSYC100; and permission of BSOS-Psychology department; and 9 credits in PSYC courses.

Restriction: Minimum cumulative GPA of 2.8; and must have earned a minimum 3.0 Psychology GPA.

Repeatable to: 9 credits.

PSYC391 Community Interventions: Domestic Violence II - Service Learning (3 Credits)

Apply knowledge gained in PSYC318D/PSYC318 to provide interventions to individuals who have experienced domestic violence. Critical analysis of interventions and related research. Ethical and cultural considerations in the provision of services are addressed.

Prerequisite: PSYC381 or PSYC318D.

Restriction: Preference given to majors in Psychology; Women, Gender, and Sexuality Studies; and Human Development; and permission of BSOS-Psychology department.

Credit Only Granted for: PSYC319D or PSYC391.

Formerly: PSYC319D.

PSYC401 Biological Bases of Behavior Laboratory (4 Credits)

Students will study some of the key concepts in neuroscience by combining behavioral experiments with electrode recordings from neurons controlling the behaviors. We will intensively examine concepts like creation of rhythmic behaviors (walking, flight), neurotransmitters' control of aggression, drug effects on synaptic activity, high-speed neural circuits for effective escape from predators, and CNS maps in the visual system for directing prey capture. Students will learn microsurgery and a broad range of neural recording techniques. We work with animals (invertebrates, cold-blooded vertebrates) every week. A strong biology background will be beneficial.

Prerequisite: PSYC300; and (PSYC202, NEUR200, or BSCI353).

Restriction: Permission of instructor; and must be in Psychology program; and must have earned a minimum of 85 credits.

Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

PSYC403 Animal Behavior (3 Credits)

Reviews the theoretical framework underlying the study of animal behavior. The genetic, hormonal and physiological basis of behavior, and the relation to ecological and evolutionary processes will be discussed using examples that range from invertebrate animals to humans.

Prerequisite: PSYC202 or NEUR200.

PSYC404 Introduction to Behavioral Pharmacology (3 Credits)

Theoretical viewpoints on the interaction of drugs and behavior. Basic principles of pharmacology, the effects of drugs on various behaviors, experimental analysis of drug dependence and abuse, and neuropharmacology and behavior.

Prerequisite: PSYC202 or NEUR200.

Restriction: Must be in Psychology program.

PSYC406 Neuroethology (3 Credits)

A merger between the disciplines of neuroscience and ethology (animal behavior) studies the behavioral functions of nervous systems using a comparative and evolutionary approach. Students will learn how the nervous system controls behavioral patterns in a variety of different organisms ranging from insects to mammals.

Prerequisite: PSYC301, PSYC202 or NEUR200.

Restriction: Must be in Psychology program.

PSYC407 Behavioral Neurobiology Laboratory (4 Credits)

In this lab course, you will collect behavioral and physiological data in humans using classic behavioral paradigms, design models of neural circuits that can explain those behaviors, record neural activity from the roach, and write lab reports describing your results and how they relate to patients with psychiatric illnesses.

Prerequisite: PSYC300; and (PSYC202 or NEUR200).

Restriction: Must be in Psychology program; and must have earned a minimum of 85 credits.

PSYC409 Topics in Neurosciences Seminar (1 Credit)

Current research in neurosciences will be presented, read, and discussed. Emphasis will change each term.

Restriction: Permission of BSOS-Psychology department; and junior standing or higher.

Repeatable to: 4 credits if content differs.

PSYC411 Introduction to Functional Magnetic Resonance Imaging (3 Credits)

An introduction to functional magnetic resonance imaging (fMRI). Students will be taught about formulating testable hypotheses with fMRI, utilizing basic methods in fMRI studies, and understanding existing limitations of fMRI studies in the literature.

Prerequisite: PSYC200 and PSYC300; and (PSYC202 or NEUR200).

Restriction: Must be in a major within BSOS-Psychology department.

Credit Only Granted for: NACST728F or PSYC411.

PSYC413 Music Cognition (3 Credits)

Overview of the psychological foundations of musical behavior, focusing on underlying perceptual, cognitive, and neural mechanisms. Students will read and discuss primary behavioral and neuroscience research on how people perceive, remember, enjoy, and use music across the lifespan.

Prerequisite: PSYC300.

Credit Only Granted for: PSYC413 or PSYC489X.

Formerly: PSYC489X.

PSYC414 Science of Sleep and Biological Rhythms (3 Credits)

Sleep is a powerful, inescapable, misunderstood, and mysterious presence in our lives. The course will begin with a review of the basics of sleep and biological rhythms with a focus on the underlying neurobiology. The bulk of the semester will be in-depth discussions of topics in sleep and circadian rhythms primarily chosen by the students. A few examples: narcolepsy, sleep in primitive cultures, lucid dreaming, racial and cultural differences in sleep and sleep disorders, the biology of sleep and circadian rhythms during adolescence, CNS control of dreaming, sleep and states of consciousness, sleeping to remember vs. sleeping to forget, legal ramifications of parasomnias, e.g. sleepwalking, and the relationships between sleep deprivation and obesity.

Prerequisite: PSYC301, PSYC202, or NEUR200; or permission of instructor.

Restriction: Must be in a major within the BSOS-Psychology department; and restricted to psychology majors during the registration period.

PSYC416 Development of Attachment in Infancy and Childhood: Theory, Research, Methods, and Clinical Implications (3 Credits)

Overview of the development of attachment during infancy and childhood, examining theory, research methods, research findings, and clinical implications. Students will observe videos of attachment assessments, lead class discussion of readings, make class presentations, and complete writing assignments.

Prerequisite: PSYC355; or permission of instructor.

Restriction: Must be in a major within the BSOS-Psychology department.

PSYC417 Data Science for Psychology and Neuroscience Majors (4 Credits)

A large number of industry and academic jobs require basic programming and data analysis skills. This class represents an introduction to both. Students will learn to program in R and will briefly be introduced to Python, the two most popular programming languages for data science. Common constructs shared by a variety of procedural programming languages will be emphasized. Basic statistics and probability theory will be reviewed from a computational perspective, and more advanced topics introduced. During the course, students will simulate toy data sets which they will then analyze knowing how the data came about, as well as work with real data. The class is highly hands-on with a large number of in-class lab and homework projects. Expect to work a lot and move quickly. Because of the hands-on nature of the class, the overall focus is more on application and execution rather than theory. However, some theory is covered at a high level so that students are aware of why they are doing something, rather than mindlessly writing code.

Prerequisite: PSYC200 and PSYC300; and (MATH120, MATH130, or MATH140).

Credit Only Granted for: PSYC489D or PSYC417.

Formerly: PSYC489D.

PSYC420 Experimental Psychology: Social Psychology Laboratory (4 Credits)

A laboratory course to provide a basic understanding of experimental methods in social psychology and experience in conducting research on social processes.

Prerequisite: PSYC300 and PSYC221.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track; and must have earned a minimum of 85 credits.

PSYC424 Communication and Persuasion (3 Credits)

Effect of social communication upon behavior and attitudes. Theory and research concerning attitude change and social influence.

Prerequisite: PSYC221 and PSYC200.

PSYC425 Psychology and Law (3 Credits)

An introduction to the intersection of psychology and the criminal justice system, known as the field of legal psychology. The material covered will span the course of the criminal justice process and examine each aspect from a psychological perspective beginning with profiling and moving on to eyewitness memory and judgements through perpetrator memories and interrogation techniques. These aspects will be evaluated with a research lens as well as an applied outlook.

Prerequisite: PSYC100, PSYC200, and PSYC300.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track.

Credit Only Granted for: PSYC325 or PSYC425.

PSYC426 Psychology of Adolescents' Close Relationships: Parents, Peers, and Romantic Partners (3 Credits)

An examination of the development of close relationships during adolescence, including those with parents, peers, and romantic partners. We consider core developmental themes including nature and nurture, stability and change, and individual differences, and discuss theory, research, and clinical applications. Students gain observational skills through discussing extensive video examples of social interactions.

Prerequisite: PSYC355; or permission of the instructor.

Credit Only Granted for: PSYC426 or PSYC489B.

Formerly: PSYC489B.

PSYC431 Human and Animal Intelligence (3 Credits)

The study of intelligence touches upon a broad range of topics from cognition, animal behavior, philosophy, psychology, and linguistics. Through lectures, discussions, and critical evaluation of opposing arguments, we will investigate the construct of intelligence from an evolutionary perspective. An understanding of animal intelligence also has important applications for understanding cognition in general, the design of robotic controls, investigating human health, conserving endangered species, development of artificial intelligence, and assuring animal welfare.

Prerequisite: PSYC300.

Credit Only Granted for: PSYC431 or PSYC489R.

Formerly: PSYC489R.

PSYC432 Counseling Psychology: Theories, Research, and Practice (3 Credits)

Analysis of research and intervention strategies developed and used by counseling psychologists. Historical and current trends in content and methodology.

Prerequisite: PSYC200.

PSYC433 Basic Helping Skills: Research and Practice (4 Credits)

Theories and research regarding effective helping relationships, with a focus on applications to counseling and psychotherapy. Students will practice helping skills with each other and will conduct research projects evaluating their helping skills. Students should be willing to talk about personal issues in class. Attendance in labs is mandatory and contributes to the course grade; thus, students should only enroll in a lab section that they will be able to attend consistently.

Prerequisite: PSYC300.

Restriction: Must be in Psychology program; and must have earned a minimum of 85 credits; and must not have completed or be concurrently enrolled in EDCP 310.

Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

PSYC435 Temperament, Personality, and Psychopathology (3 Credits)

An advanced review of cutting-edge research in humans and animals aimed at understanding the psychological and biological mechanisms underlying stable individual differences in temperament and personality (T&P) and determining their role in adult and child psychopathology, with a major focus on anxiety disorders, depression, and addiction. We will discuss the developmental origins of T&P, measurement issues, fundamental dimensions, heritability, relevance to psychopathology and intervention (treatment and prevention), and broader implications for public policy.

Prerequisite: PSYC200.

PSYC436 Introduction to Clinical Psychology: From Science to Practice (3 Credits)

Critical analysis of clinical psychology, with particular emphasis on current developments and trends.

Prerequisite: PSYC300.

PSYC437 The Assessment and Treatment of Addictive Behaviors (3 Credits)

Explores the current research in assessment and treatment of addictive behaviors. Topics may include addictions in the areas of alcohol, drugs, nicotine, gambling, and eating.

Prerequisite: PSYC100; and 9 credits in PSYC courses.

PSYC438 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

PSYC440 Experimental Psychology: Cognitive Processes and Legal Applications (4 Credits)

A survey of the content, models, and methods in cognitive psychology with an emphasis on attention and encoding, recall, recognition, judgment, signal detection theory, and applying cognitive theories to situations in the legal system. Students integrate scientific theories with real-life legal situations. Course topics include research methodology in assessing and addressing cognitive mechanisms and how this understanding may help eyewitness and victim recall and recognition, perpetrator recall, assessing scientific theories of repression, and real life examples.

Prerequisite: PSYC100, PSYC200, PSYC300 and PSYC341.

Restriction: Must be in Psychology program or Social Data Science - Psychology Track; and must have earned a minimum of 85 credits.

PSYC442 Psychology of Language (3 Credits)

Introductory survey of the psychology of language, focusing on the cognitive processes that enable us to produce and understand language. Topics include speech perception, speech production, syntactic processing, language development, language disorders, and the brain bases of language.

Prerequisite: PSYC300 and PSYC341.

Restriction: Must be in Psychology program.

PSYC447 Diversity in Organizations (3 Credits)

Overview and active discussion of issues related to diversity and discrimination in organizations from several different perspectives, including: the person(s) being stigmatized, the person(s) doing the stigmatizing, the bystander(s) witnessing stigmatization of others, and the organization. Course readings address each of these perspectives, along with an introductory unit that outlines key concepts of diversity.

Prerequisite: PSYC300.

Credit Only Granted for: PSYC489E or PSYC447.

Formerly: PSYC489E.

PSYC450 Applying Psychology to the Workplace: Industrial Organizational Psychology Laboratory (4 Credits)

In this laboratory course, students use data analytic techniques, along with psychology theories and principles, to solve problems and provide recommendations to mock organizations. Along with learning theories in industrial-organizational psychology and statistical analysis, students will improve personal presentation skills that promote effective communication of information.

Prerequisite: PSYC300.

PSYC460 Psychological Foundations of Personnel Selection and Training (3 Credits)

An examination of issues and processes involved in the design and evaluation of personnel selection and training programs in a variety of organizational settings: job, person and organizational analysis; organizational choice; development of predictors; evaluation of instructional and training systems; criteria for performance evaluation, promotion and training.

Prerequisite: PSYC361 and PSYC200.

PSYC464 Psychology of Leaders in Work Organizations (3 Credits)

The psychological assumptions and implications of various theories of management and leadership. Selections and training; development of careers; influence processes; change of managerial behavior; and the impact of the larger environment, nature of product or service, and organization structure on managerial behavior.

Prerequisite: PSYC200 and PSYC361.

PSYC468 Field Experience and Special Assignments in Honors (1-3 Credits)

An individual experience arranged by the honors student and his or her supervisor. A proposal submitted to the honors faculty in the semester preceding registration for the course should state the activities anticipated and the method of evaluation.

Prerequisite: Must have permission of supervisor and honors faculty.

Restriction: Permission of BSOS-Psychology department.

Repeatable to: 6 credits.

PSYC469 Honors Thesis Proposal Preparation (3 Credits)

Development of honors thesis proposal by preliminary research and literature review. Presentation of formal proposal to the thesis committee.

Restriction: Permission of BSOS-Psychology department.

Repeatable to: 3 credits.

PSYC478 Independent Study in Psychology (1-3 Credits)

Restriction: Permission of BSOS-Psychology department; and must have earned a minimum of 9 credits in Psychology; and must have earned a minimum GPA of 3.0 in Psychology; and minimum cumulative GPA of 2.8.

Repeatable to: 9 credits.

PSYC479 Special Research Problems in Psychology (1-3 Credits)

Restriction: Permission of BSOS-Psychology department; and must have earned a minimum of 9 credits in Psychology; and must have earned a minimum GPA of 3.0 in Psychology; and minimum cumulative GPA of 2.8.

Repeatable to: 9 credits.

PSYC488 Advanced Psychology I (Honors) (3 Credits)

Seminar covering topics in sensation, perception, learning, and motivation.

Prerequisite: PSYC200.

Restriction: Permission of BSOS-Psychology department.

PSYC489 Advanced Special Topics in Psychology (3 Credits)

Treatment of a specialized topic in psychology.

Prerequisite: PSYC300.

Repeatable to: 9 credits if content differs.

PSYC498 Advanced Psychology II (Honors) (1 Credit)

Seminar covering topics of current interest in psychology.

Prerequisite: Permission of BSOS-Psychology department.

Repeatable to: 3 credits.

PSYC499 Honors Thesis Research (3 Credits)

Prerequisite: PSYC469; and must have permission of thesis advisor.

QMMS - Quantitative Methodology: Measurement and Statistics

QMMS410 Classroom Assessment (3 Credits)

Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.

Restriction: Junior standing or higher.

Formerly: EDMS410.

QMMS451 Applied Educational Statistics (3 Credits)

Introduction to statistical reasoning; location and dispersion measures; data analysis; regression and correlation; formation of hypotheses tests;

Restriction: Sophomore standing or higher.

Credit Only Granted for: EDMS451 or QMMS451.

Formerly: EDMS451.

QMMS489 Field Experiences in Measurement and Statistics (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 4 credits.

QMMS498 Special Problems in Measurement and Statistics (1-3 Credits)

Available only to education majors who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

RDEV - Real Estate Development

RDEV250 People, Planet, and Profit: Building Sustainable Places (3 Credits)

An introduction to the four disciplines represented in the School: architecture and urban design, community planning, historic preservation, and real estate development, that work to create a more sustainable environment for the future using our interpretation of the quadruple bottom line: socio-cultural, economic, environmental, and design sustainability. Students will be provided with an understanding of the fundamental scholarship and processes of each of these disciplines and examine the intersections between them. Additionally, they will learn by applying the approaches of the four disciplines through a series of field studies.

Cross-listed with: ARCH271.

Credit Only Granted for: ARCH271 or RDEV250.

RDEV270 Tax and Accounting for Real Estate Development (3 Credits)

An understanding of key tax and accounting principles and how they impact real estate development for students in the minor in real estate development is the purpose of this course. This course is geared for science, arts and humanities students who otherwise in their major would not take an accounting course as part of their major.

Restriction: Permission of ARCH-Real Estate Development; and must not be in a major in the Robert H. Smith School of Business; and must not have completed BMGT210, BMGT220, or BMGT221.

RDEV350 Real Estate Development: Introduction to Principles, Process, and Practice (3 Credits)

An introduction to the basic principles of real estate development: How real estate and communities get built and how value is created. The emphasis is on entrepreneurship and an experiential learning approach to the entrepreneurial real estate development process, principles, and practice.

Prerequisite: RDEV250 or ARCH271.

Restriction: Must be in the Real Estate and the Built Environment major or the Real Estate Development minor; and permission of ARCH-School of Architecture, Planning, & Preservation.

Credit Only Granted for: RDEV150 or RDEV350.

Formerly: RDEV150.

RDEV410 Legal Foundations of Real Estate (3 Credits)

Provides students with the chance to explore various legal topics related to real estate, including government regulation, rights of property owners, financing real estate purchases, protections for certain classes of people, elements of a real estate contract, title, insurance, taxation, rights of landlords and tenants, premises liability, urban planning, land use regulation, and environmental issues.

Prerequisite: RDEV250 and RDEV350.

Restriction: Must be in the Real Estate and the Built Environment major; and permission of ARCH-Real Estate Development.

RDEV415 Principles, Process and Politics of Planning for Real Estate Development (3 Credits)

Designed to introduce and familiarize students with planning and zoning and the associated processes and requirements that impact the real property development process and products. It will look at the roles the community and politics play in shaping the built environment and the development process.

Prerequisite: RDEV250 and RDEV350.

Restriction: Permission of ARCH-Real Estate Development.

RDEV445 Essentials of Architectural Design and Construction Management for Real Estate Professionals (3 Credits)

Essential terminology, process and substantive knowledge needed by development professionals to effectively move a project through the design and construction process; includes environmental and ethical considerations throughout the process.

Restriction: Permission of ARCH-Real Estate Development.

RDEV450 Foundations of Real Estate Finance and Investment (3 Credits)

Real Estate Finance and Investment addresses how real estate value is established, the fundamental foundations of the time value of money, as well as more real estate specific applications of return on investment, net operating income, the components of a real estate sources and uses statement, sources of real estate equity and debt financing, commonly used debt ratios and equity returns in real estate, as well as concepts of sensitivity analysis and exit strategies.

Prerequisite: Must have completed RDEV270 or an approved accounting course with a grade of C- or better; and minimum grade of C- in RDEV350.

Restriction: Must be enrolled in RDEV Minor; and permission of ARCH-School of Architecture, Planning, & Preservation.

RDEV470 Real Estate Development Case Studies (3 Credits)

Real Estate Development Case Studies takes the principles learned in RDEV 250, 350 and 450 and takes an in depth look at a selection of local, national and international case studies in residential, commercial office, retail and hospital and critically analyzes the success and failure, short term and long term of the projects.

Prerequisite: RDEV450.

Restriction: Must be in the Real Estate and the Built Environment major or Real Estate Development minor; and permission of ARCH-Real Estate Development.

RDEV473 Real Estate Case Study Competition (3 Credits)

The Colvin Institute of Real Estate Development hosts a case study competition. The Colvin Case Study Challenge is a national intercollegiate real estate case study competition for full or part-time students enrolled in a college or a university real estate program (undergraduate or graduate or a university sanctioned real estate club/organization). The Challenge is to document a recent innovative real estate project within the team's metropolitan region. Unlike many other case competitions, this is a post-development report and documentation of a recently completed project (or project phase). The Challenge is designed to hone professional skills and reveal the knowledge base and understanding of markets, project valuation, finance, urban design and sustainability, entitlement processes and operational issues. This course prepares students to participate in the competition.

Prerequisite: RDEV250, RDEV350, and RDEV450.

Restriction: Must be in the Real Estate and the Built Environment major; and permission of ARCH-Real Estate Development.

RDEV478 Special Topics in Real Property Development (1-3 Credits)

RDEV 478 will address one or more current topics in real property with a focus in one or more of the areas of real estate development from planning and entitlements, to design and construction, to market analysis and valuation, to finance and investment, to operations and property management, or social and economic impacts.

Recommended: RDEV250, RDEV350, and RDEV450.

Restriction: Permission of ARCH-School of Architecture, Planning, & Preservation.

Repeatable to: 6 credits if content differs.

RELS - Religious Studies

RELS120 Islamic Civilization (3 Credits)

Introduction to society and culture in the Middle East since the advent of Islam: as a personal and communal faith; as artistic and literary highlights of intellectual and cultural life; and as the interplay between politics and religion under the major Islamic regimes.

Cross-listed with: HIST120.

Credit Only Granted for: HIST120 or RELS120.

RELS133 God Wills It! The Crusades in Medieval and Modern Perspectives (3 Credits)

An examination of the identities and convictions both of the Western Europeans who participated in the Crusades and of the Easterners (Muslim, Christian, and Jewish) whom they encountered in the Holy Land. Focuses on the era of the first four great Crusades, from about 1095 to 1215. Consideration of the cultural impact of these movements on both Western Europe and the Middle East.

Cross-listed with: HIST133.

Credit Only Granted for: HIST133, RELS133 or RELS289D.

Formerly: RELS289D.

RELS170 Ancient Myths and Modern Lives (3 Credits)

What are myths and why do we tell them? What powers do myths have? We will tackle these questions by looking at the enduring and fascinating myths from ancient Greece and Rome. In addition to studying how they shaped ancient societies, we will also look at their modern influence and reflect upon the power that myths still hold in our contemporary world. Taught in English.

Cross-listed with: CLAS170.

Credit Only Granted for: CLAS170 or RELS170.

Additional Information: This course cannot be taken for language credit.

RELS171 Is Judaism a Religion? (3 Credits)

Jewish identity can be framed in terms of ethnicity, culture, and religious practice, but also in terms of more contemporary social constructions including social action, political engagement, and intellectual pursuit. In the context of such diverse social and individual frames, what does it mean to identify Judaism as a religion? Attention to Jewish society in historical and global perspective will provide a backdrop for a particular focus on contemporary Jews in the United States and Israel.

Cross-listed with: JWST171.

Credit Only Granted for: JWST171 or RELS171.

RELS219 Special Topics in Religious Studies (3 Credits)

Special topics in Religious Studies

Repeatable to: 9 credits if content differs.

RELS219K Reformers, Radicals, and Revolutionaries: The Middle East in the Twentieth Century (3 Credits)

The 20th century was a period of dramatic changes in the Middle East. Within the global context of the two World Wars and the Cold War, countries in the region struggled with the effects of colonialism and painful processes of decolonization. The course offers a thematic-comparative approach to issues such as social and political reform, nationalism, the colonial experience, independence struggles, models of governance, political violence, and Islamism. Course lectures and the analysis and discussion of primary sources will lead students to understand that the peoples of the Middle East found answers to the challenges posed by Western dominance based on their specific historical, cultural and socio-economic circumstances.

Cross-listed with: HIST245.

Credit Only Granted for: RELS219K or HIST245.

RELS225 Religions of the Ancient Near East (3 Credits)

Introduction to ancient Near Eastern religious systems and mythology, from the third millennium BCE through the fourth century BCE. Particular emphasis on Mesopotamia and ancient Israel.

Cross-listed with: HIST219I, JWST225.

Credit Only Granted for: JWST225, HIST219I, RELS225, or RELS219A.

Formerly: RELS219A.

RELS230 Inventing Traditions: The Making of Rabbinic Judaism (3 Credits)

Introduces the dramatic literary and cultural (as well as political and demographic) innovations that reshaped Judaism in late antiquity. Examines the fundamental works and genres of rabbinic literature and the religious movement that produced them. Special emphasis on the rabbinic uses of "tradition" to enhance authority and legitimacy, and to foster group identity.

Cross-listed with: HIST281, JWST230.

Credit Only Granted for: HIST281, JWST230, RELS219C or RELS230.

Formerly: RELS219C.

RELS236 Philosophy of Religion (3 Credits)

A philosophical study of some of the main problems of religious thought: the nature of religious experience, the justification of religious belief, the conflicting claims of religion and science, and the relation between religion and morality.

Cross-listed with: PHIL236.

Credit Only Granted for: PHIL236 or RELS236.

RELS250 Fundamental Concepts of Judaism (3 Credits)

A conceptual introduction to Judaism, analyzing its fundamental concepts from both analytical and historical perspectives. Discussion of "normative" Judaism as well as other conceptions of Judaism. Topics include: God, the Jewish people, authority, ethics, the sacred and the profane, particularism and universalism.

Cross-listed with: JWST250, PHIL234.

Credit Only Granted for: JWST250, PHIL234, or RELS250.

RELS264 Introduction to the New Testament (3 Credits)

A historical and literary introduction to the New Testament focusing on the context of the authors and the development of earliest Christianity.

RELS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

RELS271 What is Religion? (3 Credits)

Draws upon examples from a wide variety of religious traditions to explore the question of what religion is and how to best understand it. Engagement with diverse approaches to religion including phenomenology and the study of "the sacred"; sociology and the study of religious communities; and questions of religious experience, ritual, and identity formation.

Credit Only Granted for: RELS289I or RELS271.

Formerly: RELS289I.

RELS273 Jesus, Mani, and Muhammad: The Dynamics of New Religious Movements (3 Credits)

We examine three significant ancient religious figures: Jesus (d. 30s CE), Mani (d. 276 CE), and Muhammad (d. 632). All three were founders of long-lasting religions that were part of a dramatic change in the society and religion of the ancient world. Special areas of focus: the biographies of these founding figures, and how we know them; a historical approach to religious founders; and the sociology of new religious movements.

Cross-listed with: HIST289T.

Credit Only Granted for: RELS273 or RELS289M or HIST289T.

Formerly: RELS289M.

RELS274 Jerusalem in Antiquity: The History of Sacred Space in a Holy City (3 Credits)

Examines the complex history of Jerusalem's status as a holy city, with a focus on constructions of sacred space in Judaism, Christianity, and Islam.

Cross-listed with: JWST274.

Credit Only Granted for: JWST274, RELS274, JWST289J or RELS289J.

Formerly: JWST289J, RELS289J.

RELS289 New Explorations in Religious Studies (3 Credits)

Investigation of critical and innovative responses in Religious Studies. Although the topic will vary, the course will encourage intellectual exploration by students of fundamental problems and critical methods.

RELS289C Jews, Christians, and Muslims in Medieval Spain: Tolerance, Oppression, and the Problematic Past (3 Credits)

For 800 years, medieval Spain was home to one of the most religiously diverse societies in European history. Despite frequent hostilities, the interactions of Spanish Jews, Christians, and Muslims produced a flowering of science, theology, and literature in an often remarkably tolerant climate. Students will learn how medieval Spanish people themselves experienced interreligious contact and conflict. They will also discover the modern pressures, prejudices, and ideals that have shaped historians' interpretations of medieval Spain.

Cross-listed with: HIST289A.

Credit Only Granted for: HIST289A or RELS289C.

RELS319 Special Topics in Religious Studies (1-3 Credits)

Special topics in the study of religious history, literature, culture, and thought.

Repeatable to: 6 credits if content differs.

RELS340 Europe in the Making: The Early Medieval West (A.D. 300-1000) (3 Credits)

From one empire to another: Rome to Charlemagne. This period is approached as a crucible in which classical, Christian, and Germanic elements merged, yielding new experimental syntheses. This course will deal with issues of authority, cultural trends, and the formation of group solidarity.

Cross-listed with: HIST330.

Credit Only Granted for: HIST330 or RELS340.

RELS341 Europe in the High Middle Ages: 1000-1500 (3 Credits)

Medieval civilization in the 11th through 15th centuries. Emphasis on cultural and political developments of the high Middle Ages with study of the principal sources of medieval thought and learning, art and architecture, and political theory prior to the Renaissance.

Cross-listed with: HIST331.

Credit Only Granted for: HIST331 or RELS341.

RELS342 Renaissance Europe (3 Credits)

Intellectual developments in Italy and Northern Europe from 1300 to 1550 and their influence on the arts and religion; social and economic trends, including the rise of the commercial economy in cities; the family and the role of women in society; expansion of Europe overseas and the beginnings of colonization; emergence of the state and consequent changes in political theory.

Cross-listed with: HIST332.

Credit Only Granted for: HIST332 or RELS342.

RELS343 The European Reformations (3 Credits)

Examination of developments in European religion between 1450 and 1700; the late-medieval Church and its critics; rise of Protestant thought in Germany and its spread throughout Europe; reform efforts in the Catholic Church; religious wars and violence and their impact on state and society; consequences of religious reform in society and its impact on the family and women.

Cross-listed with: HIST333.

Credit Only Granted for: HIST333 or RELS343.

RELS346 History of Religion in America (3 Credits)

A history of religion, religious movements, and churches in America from the early Colonial period to the present, with special attention to the relation between church and society.

Cross-listed with: HIST306.

Credit Only Granted for: HIST306 or RELS346.

RELS347 Tradition and Change: Jewish Religion in the Modern World (3 Credits)

An exploration of the history of the different modern Jewish religious movements that developed in Europe, starting with messianic movements and ending with Reform and Orthodoxy. Emphasis will be placed on the influence of the academic study of Judaism on the development of modern Jewish religious ideologies and practices.

Cross-listed with: JWST347, HIST429X.

Credit Only Granted for: RELS347, JWST347, HIST429X, or RELS419R.

Formerly: RELS419R.

RELS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

RELS370 Ancient Greek Religion: Gods, Myths, Temples (3 Credits)

Survey of Greek religious ideas and practices as they evolve from the Bronze Age to the early Christian period.

Cross-listed with: CLAS330.

Credit Only Granted for: CLAS330 or RELS370.

RELS408 Capstone Seminar for Religions of the Ancient Middle East (3 Credits)

A capstone seminar for majors in Religions of the Ancient Middle East, designed to provide the intellectual framework for a substantial, interdisciplinary research project. Course topics will be thematic and students will be encouraged to explore comparative or interdisciplinary approaches.

Repeatable to: 6 credits if content differs.

RELS419 Advanced Topics in Religious Studies (3 Credits)

The contemporary study of religion in which topics may address specific religious traditions, regional or historical developments, or methodological and theoretical issues.

Recommended: RELS216.

Repeatable to: 9 credits if content differs.

RELS427 The Epic of Gilgamesh (3 Credits)

One of the most famous tales from the ancient world, the Epic of Gilgamesh inspires readers with tales of friendship and loss, mortality, and the search for meaning. The story itself grew and changed over time and took on new meanings. Through study of the epic, its development over time, and the sources it drew from, this class will examine the meaning of the Gilgamesh epic and its impact on ancient Mesopotamian culture.

Prerequisite: JWST225, RELS225, HIST219I, or permission of the instructor.

Recommended: JWST262, ENGL262, or HEBR298B.

Cross-listed with: JWST427.

Credit Only Granted for: JWST419G, RELS419G, RELS427 or JWST427.

Formerly: JWST419G.

RELS429 Advanced Topics in Religious History (3 Credits)

Advanced study of religious history in a particular setting, with attention to particular themes, texts, events, or communities.

Recommended: RELS216 or RELS289.

Repeatable to: 9 credits if content differs.

RELS430 Dead Sea Scrolls (3 Credits)

A study of the Dead Sea Scrolls in their ancient and modern settings, and in terms of contemporary scholarly interpretations of their meaning. Interpretations of the historical significance of these documents, their connections to ancient Jewish sectarian movements, and their implications for our understanding of Judaism, Christianity, and the history of the Bible.

Prerequisite: Must have completed one JWST course or one RELS course; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies. Cross-listed with JWST430.

Credit Only Granted for: JWST430 or RELS430.

RELS439 Advanced Topics in Religious Thought (3 Credits)

Advanced study of religious thought in a particular setting, with attention to particular themes, texts, events, or communities.

Recommended: RELS216 or RELS289.

Repeatable to: 9 credits if content differs.

RELS488 Honors Thesis Research in Religions of the Ancient Middle East (3 Credits)

Guided research on a thesis under the supervision of a faculty mentor.

Repeatable to: 6 credits if content differs.

RELS499 Independent Study in Religious Studies (1-3 Credits)

An advanced independent research project for qualified students, supervised by a faculty member, on a topic not ordinarily covered in available courses.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 6 credits if content differs.

RUSS - Russian

RUSS101 Intensive Elementary Russian I (6 Credits)

This intensive first-year course is intended to develop the four skills: reading, writing, listening and speaking with an emphasis on communicative competence.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a native/fluent speaker of Russian.

Credit Only Granted for: RUSS101 or (RUSS111 and RUSS112).

RUSS102 Intensive Elementary Russian II (6 Credits)

A continuation of RUSS101 which will further develop the four skills: reading, writing, listening and speaking with an emphasis on communicative competence.

Prerequisite: RUSS101 or RUSS102; and must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a native/fluent speaker of Russian.

Credit Only Granted for: RUSS102 or (RUSS113 and RUSS114).

RUSS201 Intermediate Russian I (5 Credits)

Continued activation and expansion of skills and knowledge acquired in an elementary Russian course with the goal of communicative competence.

Prerequisite: RUSS102 or RUSS114; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a native/fluent speaker of Russian.

RUSS202 Intermediate Russian II (5 Credits)

Continued activation and expansion of skills and knowledge acquired in RUSS201 with the goal of communicative competence.

Prerequisite: RUSS201; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a native/fluent speaker of Russian.

RUSS211 Applied Russian Phonetics (3 Credits)

Pronunciation; the sounds and intonational patterns of Russian in contrast with those of English.

Prerequisite: RUSS102.

Restriction: Must not be a native/fluent speaker of Russian.

RUSS223 Dostoevsky and The Russian Soul (3 Credits)

Dostoevsky's exploration of the dark side of the psyche shaped a mythological image of the Russian soul. An examination of his selected works in light of development of psychoanalysis and Russian and European intellectual history. Taught in English.

RUSS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

RUSS281 Russian Language and Pre-Revolutionary Culture (3 Credits)

Introduction to the Russian language and a study of Russian nationalism; artistic and social concepts in the development of Russian art, dance, geography, history and literature from the 18th to the 20th centuries.

Lectures in English, with third hour devoted to basic language instruction (alphabet, vocabulary, pronunciation and minimal conversational skills).

Restriction: Must not be a native/fluent speaker of Russian.

RUSS287 The Power of the Word: Freedom of Speech in the U.S. and Russia (3 Credits)

The central theme is the abiding human propensity to ask questions, to use language to pursue inquiry. To be a "critical thinker," one must develop the habit and discipline of asking questions and challenging assumptions. Through a comparative approach to the US and Russian experiences, we will explore the role of language and its power in different political and social systems. We will explore such questions as: Why is free speech so fiercely defended in a democracy and such a threat to totalitarianism? What is the relationship between free speech, political power and dissent? Is the pen still mightier than the sword, even in the nuclear age? What has shaped our current attitudes toward freedom of expression? How has the concept of political free speech been extended to include freedom of expression in general, such as in the creative arts? What role do new technologies play in the arena of free speech debates? We will explore how freedom of speech and expression has been defended or its suppression justified in the US and Russia. We will practice the art of questioning and constructing counter-arguments throughout the course.

Credit Only Granted for: RUSS287 or RUSS289I.

Formerly: RUSS289I.

Additional Information: Taught in English.

RUSS298 Special Topics in Russian Language and Literature (3 Credits)

Repeatable to: 6 credits if content differs.

RUSS301 Advanced Russian I (3 Credits)

Advanced training in written Russian communicative structures.

Prerequisite: RUSS202; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a native/fluent speaker of Russian.

RUSS302 Advanced Russian II (3 Credits)

Advanced training in written Russian communicative structures.

Prerequisite: RUSS301.

RUSS303 Russian Conversation: Functional Skills (3 Credits)

Intended for students who do not anticipate having the opportunity to study in Russia. Skills for daily life (both function and etiquette) and argumentation (rhetoric).

Prerequisite: RUSS202; or students who have taken courses with comparable content may contact the department.

RUSS321 Survey of Russian Literature I (3 Credits)

The first half of a survey of Russian literature.

Prerequisite: RUSS202; or students who have taken courses with comparable content may contact the department.

RUSS328 19th Century Russian Literature in Translation (3 Credits)

Development of Russian literary thought in the Russian novel and short prose of the 19th century. Influence of western literatures and philosophies.

Repeatable to: 6 credits if content differs.

RUSS329 Soviet Literature in Translation (3 Credits)

Russian literature between 1917 and the fall of the Soviet Union, both as a continuation of pre-revolutionary traditions and as a reflection of Soviet ideology.

Repeatable to: 6 credits if content differs.

RUSS334 Soviet Film: Propaganda, Myth, Modernism (3 Credits)

A Survey of Soviet film from the 1920s to 1991, focusing on important directors, genres, themes, and styles. Taught in English.

Cross-listed with: CINE334.

Credit Only Granted for: RUSS334, CINE334, or FILM334.

Formerly: FILM334.

RUSS336 Soviet Cinema and Empire (3 Credits)

Examination of the concepts of "empire" and "nation" through their representation in Soviet cinema. Taught in English.

Cross-listed with: CINE336.

Credit Only Granted for: RUSS336, CINE336, or FILM336.

Formerly: FILM336.

RUSS361 Dostoevsky's Life and Works (3 Credits)

A study of Dostoevsky's major works with reference to related developments in Russian and European culture, literary criticism, and intellectual history. Interdisciplinary investigation of Dostoevsky's contemporary relevance and tremendous international popularity.

RUSS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

RUSS386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and permission of ARHU-School of Languages, Literatures, and Cultures department.

RUSS388 Language House Spring Colloquium (1 Credit)

For students residing in the Language House Immersion Program.

Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.

Restriction: Must be a resident of Language House.

Repeatable to: 8 credits.

RUSS398 Selected Topics in Russian Language and Literature (3 Credits)

Repeatable to: 6 credits if content differs.

RUSS401 Advanced Russian Composition (3 Credits)

Approaches to argumentation, organization of information, contextualized grammar, appropriateness of lexical choice, genre, and register.

Prerequisite: RUSS302; or students who have taken courses with comparable content may contact the department.

Restriction: Not open to native speakers of Russian.

RUSS402 Practicum in Written Russian (3 Credits)

Designed to improve comprehension of functional varieties of written Russian and develop ability to present in written form concise syntheses of source texts.

Prerequisite: RUSS401; or students who have taken courses with comparable content may contact the department.

RUSS403 Russian Conversation: Advanced Skills (3 Credits)

Advanced spoken production of high-level, abstract language.

Prerequisite: RUSS303; or students who have taken courses with comparable content may contact the department.

RUSS404 Practicum in Spoken Russian (3 Credits)

To improve comprehension of rapidly spoken Russian of various functional styles and to develop ability to synthesize orally the content of spoken material.

Prerequisite: RUSS403; or students who have taken courses with comparable content may contact the department.

RUSS405 Russian-English Translation I (3 Credits)

Introduction to the principles of translation of a particular genre, and is typically diplomatic, business, or literary.

Prerequisite: Must have completed or be concurrently enrolled in RUSS302.

RUSS409 Selected Topics in Russian Language Study (3 Credits)

Presentation of a topic in Russian language study.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

RUSS411 Linguistic Analysis of Russian I (3 Credits)

Elucidation of theoretical concepts of modern linguistics through the analysis of problematic concepts in the Russian linguistic system. Phonology and the syntax of the simple sentence.

Prerequisite: Must have completed or be concurrently enrolled in RUSS301.

RUSS439 Selected Topics in Russian Literature (3 Credits)

Presentation of a topic in Russian literature.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

RUSS499 Independent Study in Russian (1-3 Credits)

Independent study under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

SLAA - Second Language Acquisition and Application

SLAA269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SLAA369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SLAA410 Second Language Acquisition: Theory, Research, and Practice (3 Credits)

Introduces vibrant and expanding branch of language science and cognitive science: theory, research and practice in SLA. Students apply what they learn to practical issues ranging from learning languages as an adult to societal problems involving second languages and dialects.

Prerequisite: LING200, LING240, PSYC200, PSYC221, or PSYC354.

SLAA498 Second Language Research and Practicum (1-3 Credits)

Individualized research and practicum for undergraduate students to work as Undergraduate Research Assistants (UGRA) on existing projects under the supervision of a PhD Graduate Supervisor (GS) in the area of second language acquisition to learn/experience how second language as well as psycholinguistic research is conducted.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 9 credits if content differs.

Additional Information: UGRAs register for 1-3 credits. A specific weekly schedule will be determined at the beginning of the semester. Throughout the semester, students will meet with the Graduate Supervisor (GS) once per week to discuss the theoretical and methodological background of the project as well as the broader area behind the research. In addition to the training in theoretical background, the first several weeks of the semester will be devoted to hands-on details of running subjects using a particular method and analyzing data. When this training is complete, UGRAs will work more independently to schedule and run research projects and process the data.

SLLC - School of Languages, Literatures and Cultures

SLLC108 Beg Less Commonly Taught Language I (3-6 Credits)

Study of any of the less commonly taught languages at the elementary level. Speaking, listening, reading, and writing a less commonly taught language. Development of an emphasis on oral proficiency skills.

Restriction: Not open to native speakers of the language being taught. Heritage speakers must contact the instructor at the host institution to determine proper placement.

Repeatable to: 12 credits if content differs.

Additional Information: Course is offered remotely via a member institution of the CIC CourseShare arrangement. Instruction may be delivered synchronously or asynchronously. Students register through University of Maryland, and course appears on transcript as a UMD course. No additional fees are associated with this course.

SLLC109 Beg Less Commonly Taught Language II (3-6 Credits)

Study of any of the less commonly taught languages at the elementary level, as a continuation of SLLC108 (in the same language). Speaking, listening, reading, and writing a less commonly taught language. Development of an emphasis on oral proficiency skills.

Restriction: Not open to native speakers of the language being taught. Heritage speakers, or those with previous experience in the language, must contact the instructor at the host institution to determine proper placement.

Repeatable to: 12 credits if content differs.

Additional Information: Course is offered remotely via a member institution of the CIC CourseShare arrangement. Instruction may be delivered synchronously or asynchronously. Students register through University of Maryland, and course appears on transcript as a UMD course. No additional fees are associated with this course.

SLLC169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SLLC199 Special Topics in Language Study (1-3 Credits)

Language and topic to be announced when offered.

Repeatable to: 6 credits if content differs.

SLLC200 Global Movements (3 Credits)

This interdisciplinary and cross-cultural course introduces students to a variety of frameworks for understanding our interconnected world by focusing on one or more issues of global relevance today, including but not limited to conflict, revolution, and war; democracy, citizenship, and human rights; migration; and climate change. Focusing on the interpretive methods of the humanities, including critical analysis, close readings, and engagement with theoretical approaches, we will discuss the historical, social, and cultural contexts of major global movements in comparative perspective. In addition to examining literary, cultural, and media texts, the class will ask students to make connections between global and local contexts through a group service-learning project.

SLLC208 Intermediate Less Commonly Taught Language I (3-6 Credits)

Intermediate-level work on speaking, reading, and writing a less commonly taught language. Continued development of oral proficiency skills.

Prerequisite: SLLC109; or must have permission of instructor after placement assessment.

Restriction: Not open to fluent/native speakers. Heritage speakers or students with prior knowledge of the language must contact the instructor at the host institution to determine proper placement before enrolling.

Repeatable to: 12 credits if content differs.

Additional Information: Course is offered remotely via a member institution of the CIC CourseShare arrangement. Instruction may be delivered synchronously or asynchronously. Students register through University of Maryland, and course appears on transcript as a UMD course. No additional fees are associated with this course.

SLLC209 Intermediate Less Commonly Taught Language II (3-6 Credits)

Second semester Intermediate-level work on speaking, reading, and writing a less commonly taught language. Continued development of oral proficiency skills.

Prerequisite: Must have completed SLLC208 or have permission of instructor, based on placement assessment.

Restriction: Not open to native speakers of the language being taught. Heritage speakers or students with prior knowledge of the language must contact the instructor at the host institution to determine proper placement before enrolling.

Repeatable to: 12 credits if content differs.

Additional Information: Course is offered remotely via a member institution of the CIC CourseShare arrangement. Instruction may be delivered synchronously or asynchronously. Students register through University of Maryland, and course appears on transcript as a UMD course. No additional fees are associated with this course.

SLLC269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SLLC280 Mythology of the Oppressed (3 Credits)

Does information drive human history? Mythological recurrences say much about cultures that had to adapt their world views while attempting to preserve them. This course examines the cognitive or social bases of mythology, to be pursued from insights in cultural and literary studies, linguistics, the cognitive sciences, paleo-anthropology, archeology, etc. The course is designed to help students think about complex problems from a humanistic perspective, making liberal use of the sciences.

Credit Only Granted for: SLLC280 or SLLC299J.

Formerly: SLLC299J.

SLLC284 Language, Power and Society (3 Credits)

Introduction to language variation along social, ethnic and regional identity lines. Taught in English.

SLLC286 Living the Good Life: Chinese Philosophy in the Modern World (3 Credits)

Confucius, Mencius, Zhuangzi and other Chinese thinkers who lived more than 2,000 years ago would argue that the contemporary Western emphasis on self-discovery (Find yourself) and self-acceptance has led you astray. See what they have to say and discuss what relevance it has for the modern world as we study how early Chinese thinkers wrestled with questions of existence, morality, and governance. No previous knowledge of Chinese philosophy and history will be assumed and no prerequisites are required. We will discuss ideas that are both historical and relevant to students' lives. What is "the Way"? How do we cultivate spontaneity? Is there a stable self? How can we be more alive? These are questions important for ancient kings but also for UMD students choosing a major, or wondering how ARHU can benefit them.

Additional Information: Taught in English.

SLLC290 Behavior of the Rich and Powerful, Past and Present (3 Credits)

Through the study of fifteenth- and sixteenth-century courtesy literature, in this course we explore the various forms of behavior of the rich and powerful of the Italian Renaissance, an era that is much closer to our contemporary world than we might initially think, especially in regard to the way political and influential figures act in social situations and the image of themselves they present to others. What can we learn from observing and comparing the behavior of the rich and powerful of the past and present? In the public arena of these two worlds, does appearance matter more than truth?

Restriction: Must be in the Freshmen Connection program.

Credit Only Granted for: SLLC290 OR SLLC299P.

Formerly: SLLC299P.

Additional Information: Taught in English.

SLLC299 Special Topics in World Cultures (1-6 Credits)

Topic to be announced when course is offered.

Repeatable to: 6 credits if content differs.

SLLC305 Language, Identity and Diversity in the U.S. (3 Credits)

Introduces issues of linguistic diversity in the framework of the U.S. as a multilingual society. Special emphasis is placed on attitudes toward language diversity, specifically, how regional, social, generational, ethnic, racial and gender differences in language use contribute to notions of identity.

SLLC309 Language Partner Program (1 Credit)

For intermediate- to advanced-level language study. Conversations entirely in target language with native speaker.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: For intermediate- to advanced-level language majors.

Repeatable to: 3 credits.

SLLC329 Language House Immersion (1 Credit)

Provides credit for students participating in the Language House Living-Learning program. It focuses on the further development of skills in the target language and the acquisition of cultural knowledge of the countries and communities where people speak the target language. It requires hands-on immersive linguistic and cultural activities led by a native-speaking mentor and supplements the learning that takes place in the language classroom and in the living-learning environment of the Language House.

Restriction: Permission of the Language House Director and the related program Faculty Liaison; and must be in the Language House Immersion Program.

Repeatable to: 6 credits.

SLLC342 Film Comedy (3 Credits)

Comedy as a specific cinematic genre.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE342.

Credit Only Granted for: SLLC342, CINE342, or FILM342.

Formerly: FILM342.

SLLC344 Film and the Fantastic (3 Credits)

Survey of fantastic cinema, encompassing American classics, Hollywood recent productions, and independent films, as well as Asian horror films, anime, and European fantasy.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE344.

Credit Only Granted for: SLLC344, CINE344 or FILM344.

Formerly: FILM344.

SLLC350 Translation in a Global Context (3 Credits)

Provides a theoretical foundation for understanding the history, practice, and ethics of translation in a global context. Students will learn about key movements, theories, and debates in the field of translation studies, with a focus on scholarly readings that examine the role of language, literature, and culture in shaping perception and reality, and compare a variety of published translations in order to examine the role of translation in the negotiation and creation of meaning. A key facet of our readings and discussions will be a critical engagement with how global issues of power, violence, and resistance are intertwined with processes of translation. Students will be able to synthesize what they have learned by undertaking a translation project of their own, in consultation with the course instructor and faculty specialists in their language(s) of choice.

Prerequisite: Basic proficiency in at least one language other than English.

Recommended: SLLC200.

Restriction: Permission of the School of Languages, Literatures, and Cultures.

SLLC360 Cultural Theory in a Global Age (3 Credits)

Examines the need to think beyond established frameworks, including the national-cultural paradigm, for apprehending literature, cinema, and other forms of cultural production in a global age. We will read and discuss theories that respond to and engage with the increased flow of ideas, bodies, and texts in an era characterized by globalization, migration, and neoliberal capitalism. We will also analyze literary texts, films, and cultural movements that emerge from and address the geopolitical transformations and challenges of the present. Students are expected to address topics comparatively across different languages, as appropriate for their level of linguistic proficiency. The range of connections between language and cultural expression and understanding is a central topic of the course.

Prerequisite: SLLC200.

SLLC361 Cinema and Globalization (3 Credits)

Introduction to cinema as a global phenomenon.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of Film Studies program; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE361.

Credit Only Granted for: SLLC361, CINE361, or FILM361.

Formerly: FILM361.

SLLC362 Vision, Visuality, and the Gaze in Cinema (3 Credits)

Students will build a way of talking critically about film. The prism of seeing, visuality, the gaze, and the like will serve as a way to investigate the way films take on meaning as well as to understand how film participates in a wide network of interconnected ideas, concepts, and modes of thought that have contributed to the audiences' ability to make sense of what a film is conveying.

Prerequisite: ENGL245, FILM245 or CINE245; or permission of Film Studies Program; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE362.

Credit Only Granted for: SLLC362, CINE362, or FILM362.

Formerly: FILM362.

SLLC368 Special Topics in Film Studies I (3 Credits)

Content varies. Exploration of topics in film studies beyond national traditions, for example through the lens of theory, genre, auteurship, aesthetic movements in cinema, and/or comparative perspectives.

SLLC369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SLLC386 Experiential Learning (3 Credits)

Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor and the student's internship sponsor.

Restriction: Junior standing or higher.

SLLC400 Articulatory Phonetics for Second Language Acquisition and Application (3 Credits)

The mechanical capabilities of the human vocal apparatus for producing speech sounds, and their terminology and transcription in the International Phonetic Alphabet. Emphasis is on the practical needs of the teacher and student of foreign language, rather than the theoretical linguist or the hearing-and-speech pathologist. The phonetics of major languages are also introduced, with attention to the pedagogy of their phonetics.

Restriction: Junior standing or higher.

Credit Only Granted for: SLLC400.

SLLC410 Documentary and Narrative (3 Credits)

An examination of the relationship between film and reality, focusing on documentary film.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE410.

Credit Only Granted for: SLLC410, CINE410 or FILM410.

Formerly: FILM410.

SLLC411 Experimental Film (3 Credits)

Introductory survey of European and U.S. American experimental cinema.

Cross-listed with: CINE411.

Credit Only Granted for: SLLC411, CINE411 or FILM411.

Formerly: FILM411.

SLLC461 Political Cinema (3 Credits)

Histories of cinema and politics in the 20th century.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: CINE461.

Credit Only Granted for: CINE461, FILM461 or SLLC461.

Formerly: FILM461.

SLLC463 Screening Time: History and Memory in Cinema (3 Credits)

An examination of the ways and techniques with which cinema produces a sense of time in the viewer.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Cross-listed with: CINE463.

Credit Only Granted for: SLLC463, CINE463 or FILM463.

Formerly: FILM463.

SLLC468 Special Topics in Film Studies II (3 Credits)

Exploration of topics in film studies beyond national traditions, for example through the lens of theory, genre, auteurship, aesthetic movements in cinema, and/or comparative perspectives. Courses at the 400-level have higher expectations of independent work, including reading and written assignments.

Repeatable to: 12 credits if content differs.

SLLC471 The Cultural Environment of Global Business (3 Credits)

The goal of this course is to provide students with an understanding of cultural aspects pertaining to global business, and thereby increasing their awareness of the cultural factors that motivate decisions and behavior in the business world. Students will gain an understanding of how the business cultures in the rest of the world diverge from the American, and develop the cultural understanding, attitudes, and communication skills needed to function appropriately within an increasingly global and multicultural working environment.

Restriction: Sophomore standing or higher.

Credit Only Granted for: ARHU439B, ARHU439E, ARHU439T, ENES472, SLLC471, SLLC472, or SLLC473.

Formerly: ARHU439B.

SLLC473 European Business Cultures (3 Credits)

The goal of this course is to provide students with an understanding of cultural aspects pertaining to European business, and thereby increasing their awareness of the cultural factors that motivate decisions and behavior in the European business world. Students will gain an understanding of how the European business cultures diverge from the American, and develop the cultural understanding, attitudes, and communication skills needed to function appropriately within an increasingly global and multicultural working environment.

Restriction: Sophomore standing or higher.

Credit Only Granted for: ARHU439B, ARHU439E, ARHU439T, ENES472, SLLC471, SLLC472, or SLLC473.

Formerly: ARHU439E.

SLLC499 Special Topics in World Cultures (3 Credits)

Interdisciplinary, transnational or cross-language course; specific topic to be announced.

Repeatable to: 12 credits if content differs.

SLLX - School of Languages, Literatures & Cultures Education Abroad

SLLX101 Swedish Language and Culture: Level 1 (3 Credits)

This course is an integrated language and culture course. When studying Swedish language, we will employ a functional approach. The course will focus on spoken everyday Swedish, reading comprehension and basic grammar. We will study different aspects of Swedish culture and we will operate with a complex view on culture through various representations. The focus will be on dominant national narratives, values, and symbolism, which we will approach from both a historical and contemporary perspective.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

SLLX102 Swedish Language and Culture: Levels 1 and 2 (6 Credits)

This intensive course covers two semesters of Swedish language content in one, making it an excellent option for students who wish to advance quickly in their knowledge of the language. The emphasis is on speaking, writing, and understanding basic Swedish language. Swedish literature, film, and music are included in the curriculum. Politics, burning cultural issues, and your personal experiences form the cornerstone of class discussions.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

SLLX106 Elementary Italian II (4 Credits)

Focuses on vocabulary expansion and strengthening the four language skills of speaking, listening, writing, and reading in order to provide students with the ability to converse on familiar social situations related to school, recreation, and particular interests. This course equips students to provide oral descriptions in the major time frames (past, present, and future), read short written texts, and write short compositions on familiar topics.

Credit Only Granted for: ITAL103 or SLLX106.

Formerly: ITAL103.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

SLLX200 Spanish Civilization and Culture (3 Credits)

This course starts with an extensive view of the Spanish history and then examines the different cultures within Spain: Castilian, Catalan, Basque and Galician; focusing mainly on language, nationality, and political implications. The rest of the course will travel throughout the various aspects of the Spanish Civilization, understanding civilization as lifestyle and society, and also the various artistic ways of expression. Taught in English.

Credit Only Granted for: SLLC299Z or SLLX200.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SLLX201 Swedish Language and Culture: Intermediate (3 Credits)

This class is intended to improve your linguistic and communicative skills in Swedish on an intermediate level. It is an integrated language and culture course, and it gives you the opportunity to reflect upon and document intercultural competences gained while studying abroad at DIS. The course makes you develop a critical and analytical understanding of your own as well as of the Swedish culture, and it seeks to explore Swedish history, literature, film, art as well as the burning issues of today - enriching your experience and making you a qualified discussion partner for your Swedish family and friends.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

SLLX204 Italian Fashion (3 Credits)

Examines the history of Italy's fashion industry in order to understand how it gained strength and importance in Italian culture. The course will analyze how fashion has been effective historically as a communication system that has represented the development of Italian national identity and in turn has had considerable impact on Italian society and culture. The course makes use of novels, periodicals and films from the late 19th century post-unification period to the present and will highlight the close connection between the massive presence of art in Italy and its influence on the development of a collective sense of aesthetics that finds confirmation in fashion.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

SLLX205 Italian Food and Culture (3 Credits)

This interdisciplinary course focuses on the social and cultural aspects of food and eating in different geographical areas with a special emphasis on Italy and its history. The course will be taught through a variety of readings, class discussions and presentations and there will also be some practical experiences.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

SLLX300 Italy Outside Italy: Italian Culture & Identity in Italy, America & the World (3 Credits)

This course is an introduction to the history of Italian emigration and Italian communities around the world as well as to the trans-national culture and identity they developed. The focus will be on Italians in America, and on the Italian emigrants' point of view. We will discuss how they viewed themselves as emigrants (not immigrants), how they thought of their communities as "colonies" (not "Little Italies"), and how they faced prejudice and discrimination to finally integrate into the new country as Italian Americans.

Credit Only Granted for: ITAL369G, ITAX303, or SLLX300.

Formerly: ITAL369G.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

SLLX301 Identity and Culture in Italy: A Comparative Approach (3 Credits)

Introduces the concept of culture in the sociological and anthropological sense. After clarifying the meaning of the word 'culture', other related concepts will be analyzed: values, norms, lifestyles, attitudes, beliefs, stereotypes. Attention will also be drawn to the notion of social and cultural change (de-secularization, globalization, mediatization, individualization). Italian-ness will be compared with traits of the American, Northern European and Mediterranean cultural heritage.

Credit Only Granted for: ITAL369D, ITAX305, or SLLX301.

Formerly: ITAL369D.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

SMLP - Southern Management Leadership Program

SMLP470 Fundamentals of Entrepreneurial Ventures (3 Credits)

Learn the processes and skills needed to launch and manage start-up ventures, including technology startups. Assess the feasibility of a startup ventures, as well as how to apply best practices for planning, launching, and managing new companies by using real-world examples and in-depth case studies. Discuss a wide range of issues of importance and concern to entrepreneurs and learn to recognize opportunity, assess the skills and talents of successful entrepreneurs, and learn models and approaches that help navigate uncertainty.

Restriction: Restricted to students in the Southern Management Leadership Program.

Credit Only Granted for: HLMN470, SMLP470, ENES460 or BMGT461.

Formerly: HLMN470.

Additional Information: SMLP470 may not count toward any BMGT major or minor degree.

SMLP471 Entrepreneurial Finance (3 Credits)

Examine the elements of entrepreneurial finance, develop and analyze financial statements, focusing on technology-based startup ventures and the early stages of company development. Address key questions that challenge all entrepreneurs: how much money can and should be raised; when it should be raised and from whom; how to define a reasonable valuation of a company; and how to structure funding, develop employment contracts, and make exit decisions. Analyze the variety of financing models across a venture's life cycle, with an aim to understanding the incentives of each type of investor and the relative costs and benefits of each source of funding.

Restriction: Restricted to students in the Southern Management Leadership Program.

Credit Only Granted for: HLMN471, SMLP471, ENES466 or BMGT365.

Formerly: HLMN471.

Additional Information: SMLP471 may not count toward any BMGT major or minor degree.

SMLP472 Strategies for Innovation & Entrepreneurship (3 Credits)

Understand the process of technological change; the ways that firms come up with innovations; the strategies that firms use to benefit from innovation; and how to create new value not only through new products or services, but with novel technologies, business concepts, organizing structures, transaction/financing mechanisms, distribution channels, and market segmentation. Challenge students to think about how to create value and build a productive business organization with available resources (e.g. intelligence, insight, energy, initiative and personal relationships).

Restriction: Restricted to students in the Southern Management Leadership Program.

Credit Only Granted for: HLMN472, SMLP472, BMGT467, or ENES463.

Formerly: HLMN472.

Additional Information: SMLP472 may not count toward any BMGT major or minor degree.

SMLP473 Consulting in Tech Entrepreneurship (3 Credits)

Apply the entrepreneurship/business principles learned in the classroom to real-world consulting projects. Gain practical experience by solving actual business situations and by dealing with ambiguity and uncertainty inherent in fast-moving technical organizations. Develop key skills in negotiation, group dynamics, organization, and planning.

Restriction: Restricted to students in the Southern Management Leadership Program.

Credit Only Granted for: HLMN473 or SMLP473.

Formerly: HLMN473.

Additional Information: HLMN473 may not count toward any BMGT major or minor degree.

SMLP474 Essentials of Negotiations and Marketing for Entrepreneurs (3 Credits)

Building on the innovation and entrepreneurship knowledge acquired in previous SMLP courses, this team-taught course will equip students with the experience to conduct successful negotiations and bring an innovation to market. In the first half of this course, you will learn more about your individual negotiation style and practice the skills and techniques essential to a successful negotiation. You will then apply some of those skills, along with the human-centered mindset cultivated in previous SMLP courses, to introduce an existing product to the marketplace by identifying the promotion, distribution, and pricing tactics that meet the preferences of the intended target market. The course will conclude with a live presentation of your comprehensive go-to-market strategy to a panel of real investors, followed by a mock negotiation for an investment in bringing that product to market.

Restriction: Must be in the Southern Management Leadership Program.

SOCY - Sociology

SOCY100 Introduction to Sociology (3 Credits)

Introduces fundamental concepts and theories of sociology. Guided by C. Wright Mills' "sociological imagination," the course promotes critical thinking; challenges conventional assumptions about culture politics, history, and psychology; and equips students with theoretical approaches and research methods to analyze various sociological topics, including family, work, education, religion, social movements, and issues related to class, gender, race, and ethnic inequalities.

SOCY105 Understanding Contemporary Social Problems - Frameworks for Critical Thinking and Strategies for Solutions (3 Credits)

Embark on an exploration of contemporary social issues and unravel the intricate ways in which these challenges are woven into the fabric of society. Develop a comprehensive understanding of societal organization and partake in a detailed study of selected social problems, with a specific emphasis on issues like social conflict and inequality. This course provides an insightful journey into the nuanced interplay between societal structure and prevalent challenges, fostering a heightened awareness of the dynamics shaping our social landscape.

SOCY120 Veterans in American Society: What does America Owe Its Veterans? (3 Credits)

An examination of current and past policies toward compensation for military veterans, data and evidence on current and past adjustments to life after military service, historical variations in the mechanisms for staffing the military, and trends in the contours of the lives of those who do not serve.

SOCY158 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SOCY200 Innovation, Exploration and the Evolution of Human Societies (3 Credits)

We will explore the nature of human societies through comparative, historical, and interdisciplinary perspectives. Students will delve into the core of social structures, unravel the defining components of society, and examine their organization, evolution, and impact on collective existence. Students will also explore the socio-historical forces and geopolitical dynamics that drive social change to analyze the complex connections that illuminate our shared social experience across time.

SOCY201 Introductory Statistics for Sociology (4 Credits)

Students will explore descriptive and inferential statistics. You will hone your quantitative analytical skills to construct impactful bivariate tables, craft frequency distributions, and decipher measures of central tendency and dispersion. Additionally, you will master the techniques of hypothesis testing, chi-square, ANOVA, and ordinary least squares regression, equipping you to seamlessly translate data into meaningful research insights.

Prerequisite: SOCY100; and (MATH107 or MATH111).

Restriction: Must not have completed STAT400, BMGT231, or ENEE324.

SOCY202 Introduction to Research Methods in Sociology (4 Credits)

We will examine why social research is needed, explore some of the main quantitative and qualitative techniques to conduct sociological research, and discover how to understand and critically evaluate sociological research on pressing social problems. Students will also learn to use specialized software to analyze and interpret quantitative data in the computer lab.

Prerequisite: SOCY100.

SOCY203 Sociological Theory (3 Credits)

Examines major trends in the history and development of sociological thought, including theories of inequality, the self, institutions, and more. With each theorist students will learn what sociologists assume and focus on when studying societies.

Prerequisite: SOCY100.

SOCY211 The Sociology Major: Mapping the Road to Academic Success (1 Credit)

Designed to assist students in making a successful transition to the major and will orient them to departmental, college, and university resources. Students will collaboratively explore avenues and best practices that build self-confidence and lead to academic achievement.

Restriction: Must be in the Sociology major (22080) or Sociology minor (#BS13).

SOCY212 Hate Crimes in the U.S.: What Lt. Richard Collins III Can Teach Us About History, Hope and Healing (3 Credits)

Rooted in the tragic murder of Lt. Richard W. Collins III, a Bowie State student, on the campus of the University of Maryland by a white supremacist student, this course will provide an overview and discussion of the history of bias-motivated violence in the United States, the development of modern hate crime laws, theories and impacts of victimization, domestic terrorism, legal and social responses, and prevention strategies. Students from both Bowie State University and the University of Maryland will engage with experts from multiple disciplines and work together in a collaborative community to generate actionable strategies.

SOCY216 Social Aspects of Artificial Intelligence (3 Credits)

In two generations computers insinuated themselves into the way societies create wealth, wage war, work, and govern their citizens. While scientists across disciplines debate the feasibility of engineering artificial general intelligence, the race is on to create computers (classic and quantum) that match or surpass human intelligence in as many domains as possible. Students in this course will weigh some social consequences of living with smart machines that are everywhere and never sleep, and confront the question of whether AI has gone too far, or not far enough.

Credit Only Granted for: SOCY216 or SOCY416.

Formerly: SOCY416.

SOCY222 Immigration and Ethnicity in America (3 Credits)

The history of immigration and the development of diverse populations in the United States are examined. Topics include related political controversies, the social experiences of immigrants, ethnicity, generations, migration, inter-group relations, race and diversity in American culture.

Cross-listed with: AAST222.

Credit Only Granted for: AAST222, HIST222, or SOCY222.

SOCY224 Why are We Still Talking About Race? (3 Credits)

Explore and discuss the major debates and assumptions that construct perceptions of race and how it matters. Sociological and social science theories will give students a historical and present day frame with which to view race and ethnic relations in the twenty-first century.

SOCY225 Women's Jobs, Men's Jobs: How and Why Do They Differ? (3 Credits)

An exploration of critical issues pertaining to gender differences in the workplace. Overview of theories explaining why some people do better than others in the world of work, and discussions of more specific questions relating to women's and men's job opportunities and experiences.

SOCY227 Introduction to the Study of Deviance (3 Credits)

An introduction to the sociological study of deviant behavior, covering such topics as mental illness, sexual deviance, and the use of drugs.

Credit Only Granted for: SOCY227 or SOCY327.

Formerly: SOCY327.

SOCY230 Sociological Social Psychology (3 Credits)

Why do people do that? Sitting at the nexus of sociology and psychology, this course surveys the various ways in which sociologists have answered this question. We investigate individuals-for example, how they develop and understand themselves in relation to others, how they choose to present themselves to the world, and how they form thoughts and opinions. And we study larger units of analyses, from small groups to the broader society. Topics covered include socialization, identity formation, social influence, group processes, how social processes shape individual behavior, and how human behavior shapes society.

SOCY241 Inequality in American Society (3 Credits)

A broad-based overview of inequality in contemporary U.S. society, focusing on measuring patterns and trends over time. A series of learning modules familiarizes students with how inequality unfolds in relation to social stratification processes along the lines of race, gender, education and social class, income and wealth, and health.

Credit Only Granted for: SOCY241 or SOCY441.

SOCY242 Sociology of Homelessness (3 Credits)

Examines the causes of and solutions for homelessness in society. How social scientists analyze social issues using ethnographic observation, surveys, official statistics, and other research methods. Discusses how policies have responded to the problem of homelessness, and how to evaluate their effectiveness.

SOCY243 The Family: Diversity, Inequality, and Social Change (3 Credits)

An exploration of diversity and inequality in family life, focusing on empirical patterns and trends, political and cultural debates, and policy issues, including the major theories and research methods used in the sociological study of the family in a plural society.

Credit Only Granted for: SOCY243 or SOCY443.

Formerly: SOCY443.

SOCY244 Bridging Perspectives: Critical Conversations Between Students and Police (3 Credits)

This course is a university curriculum created by the International Association of Chiefs of Police to enhance community-police engagement. This course brings university students and police together to engage in facilitated dialogue to learn from one another and build trust. Through this transformative educational course, both groups will enhance their knowledge of the structural and cultural frameworks that influence historical and current events and relationships between communities and police.

SOCY245 The Family in Contemporary American Society (3 Credits)

This is a course in the sociology of the family as an institutional arena in the United States. Students will become familiar with the empirical patterns and trends, political and cultural debates, and policy issues concerning families - and the major theories and research methods used in the sociological study of the family. The readings include a textbook and a research monograph. To succeed, students will attend lectures and participate in discussion; complete quizzes and in-class writing assignments; and take a midterm and final exam.

Credit Only Granted for: SOCY243 or SOCY245.

SOCY258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program
Repeatable to: 15 credits if content differs.

SOCY265 War and Society, from the American Revolution to the Present (3 Credits)

This course asks, why do nations make war the way they do? And how does the experience of waging war in this manner remake institutions, social and political relationships and even culture? To answer these questions, the course adopts a comparative and historical perspective, highlighting the ways nations organize and mobilize for armed conflict as well as how they define 'the enemy' against whom they direct armed force, and the ways these together shape the social consequences of warfare. Among the range of social consequences, we will focus on three: the experience of combat itself; the impact of war on class, race and gender relations; and the emergence of cultural values around armed conflict and the place of warfare and soldiers in society. The course concludes with almost a month devoted to making sense of the War in Ukraine and considering where to go from here.

Credit Only Granted for: SOCY465 or SOCY265.

Formerly: SOCY465.

SOCY277 Intersectionality and Illness: How do Overarching Social Inequalities Affect Health Outcomes? (3 Credits)

Students will examine the social determinants of disease: the relationship between socioeconomic status and health care access, as well as investigate the links between social status and disease chronicity. Students will further explore how health disparities, health resource distribution, and susceptibility disproportionately affect disadvantaged communities with chronic diseases.

Credit Only Granted for: SOCY277 or SOCY302.

Formerly: SOCY302.

SOCY298 Selected Topics in Sociology (1-3 Credits)

Special topics in Sociology.

SOCY310 Sociology of Race, Class, Gender and Sports (3 Credits)

Examines the institution of sport with an emphasis on race, gender, and class. The course will critically analyze assumptions, historical relationships, and contemporary issues in sports. The course will utilize sports as a platform to understand and explore sociological concepts, theories, and research.

SOCY322 Immigration and Ethnicity in the US (3 Credits)

Explores historical and contemporary Asian immigration to the US in comparison to and in the context of other immigrant groups. From low-skilled laborers to highly-skilled professionals, Asian and other immigrants have been an integral part of the shifting US economy and society since its inception. The course includes theories on why immigration occurs, determinants of its continuation, the uses of migrant labor, and immigrant adaptation and settlement. The second part of the course focuses on theories of ethnicity and racial formation and how immigrants develop and challenge the definitions of race, ethnicity, the "other", and ultimately, who is American. Students will also have the opportunity to gain first-hand knowledge of the immigrant experience through a life history interview project.

Cross-listed with: AAST322.

Credit Only Granted for: AAST322, SOCY222, HIST322 or SOCY322.

Formerly: AAST222, SOCY222.

SOCY325 The Sociology of Gender (3 Credits)

Institutional bases of gender roles and gender inequality, cultural perspectives on gender, gender socialization, feminism, and gender-role change. Emphasis on contemporary American society.

Prerequisite: 3 credits in SOCY courses.

Cross-listed with: WGSS325.

Credit Only Granted for: SOCY325, WMST325 or WGSS325.

Formerly: WMST325.

SOCY335 Sociology of Health and Illness (3 Credits)

An exploration of the social model to studying health and illness: how meanings and experiences of health and illness are socially produced. How experiences are shaped by the interaction of external social environments (culture, community) and the internal environment (human body), and by socio-demographic variables (race, class, gender, etc.). Disparities in health and healthcare delivery, medicalization of society, determinants of health, social construction of illness, and the social organization of health care.

SOCY336 Gender and Health (3 Credits)

The relationship between gender and health is the central focus of this course. We consider how health disparities between women and men vary by race and ethnicity, sexual and gender minority identity, and social class. We consider how institutional and cultural factors across social and spatial contexts influence gendered associations with physical and mental health. In addition, this is a course on how to do the disciplinary work of sociology. Social discourse and policies about health have been crucial to creating our current understanding of gender and health. This course will provide training in analyzing health disparities and preparing research and policy briefs about how to address these disparities. This will happen through group projects and a peer reviewed process that relies on critical feedback from sociologists engaged in the same project, in this case, the other students in this course.

Credit Only Granted for: SOCY236 or SOCY336.

Formerly: SOCY236.

SOCY340 Globalization's Winners and Losers (3 Credits)

What is the relationship between globalization and inequality? This course examines the factors shaping both between-nation and within-nation household income inequality for the past century. It is divided into four parts, each considering a different factor. First we seek to understand global trade historically. Second, we examine the more recent phenomenon of outsourcing. Third, we examine welfare and taxation policy and its role in shaping domestic inequality. Finally, we analyze the mechanisms for the accumulation of capital within global finance. By the end of the course, students will be able to discuss globalization beyond the "is it good or bad" binary and understand the complex interaction between domestic politics and international trade.

SOCY358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SOCY370 Career Exploration and Professional Development for Sociology Majors (1 Credit)

Prepares Sociology majors to make the transition from undergraduate to entering graduate school and/or the professional work world. Topics include career options in Sociology, skills for conducting a job search, resume writing and interview preparation, and the graduate application process.

Restriction: Must be in the Sociology major.

SOCY378 Undergraduate Teaching Assistantship (1-3 Credits)

The Undergraduate Teaching Assistant position offers exceptional Sociology undergraduates the opportunity to actively contribute to the educational process. This hands-on role involves assisting faculty in classroom activities, mentoring fellow students, and supporting academic assignments and assessments. Throughout the course, students develop crucial teaching and communication skills, learn effective time management, and gain valuable teamwork experience. This position not only enhances students' resumes but also equips them with skills vital for future academic and professional roles. This is an individual instruction course; contact the department or instructor to obtain section number.

Restriction: Permission of the Sociology Department.

Repeatable to: 9 credits if content differs.

SOCY380 Honors Independent Reading in Sociology (3 Credits)

This course permits sociology honor students to undertake a program or reading on a particular problem in sociology or a subfield therein. The reading will be done under the supervision of a member of the sociology faculty. Required of sociology honor students.

Restriction: Permission of BSOS-Sociology department.

SOCY381 Honors Independent Research in Sociology (3 Credits)

This course permits sociology students to define a particular problem in sociology or a subfield therein and to develop a research plan for use as a thesis topic. The work will be done under the supervision of a member of the sociology faculty.

Prerequisite: SOCY380.

SOCY383 Honors Thesis Research (3 Credits)

Student research under the direction of a member of the sociology faculty, culminating in the presentation and defense of a thesis reporting the research.

Prerequisite: SOCY381.

SOCY386 Experiential Learning (3-6 Credits)

Restriction: Permission of BSOS-Sociology department; and junior standing or higher.

SOCY391 Surveillance and the Erosion of Privacy (3 Credits)

Our world is under increasing amounts of surveillance, from states, corporations, and other individuals. These activities may affect our sense of privacy since surveilling others is done as a means to gather knowledge. This class examines surveillance and privacy together in order to answer the following questions: Are acts of surveillance in contemporary society eroding our sense of privacy? Are certain populations more or less privileged in terms of having privacy rights? How can we protect privacy rights in an age of surveillance?

SOCY398 Special Topics in Sociology (1-3 Credits)

Topics of special interest to both sociology majors and non-majors.

Prerequisite: 3 credits in SOCY courses.

Repeatable to: 6 credits if content differs.

SOCY398G Global Migration and the Israeli Case Study (3 Credits)

Over 70% of Israel's population is made of first, second or third generation immigrants, who came from over 70 countries, making Israel an ultimate immigrant society. This course will focus on the history of Israel as a case study for the understanding of the historical phenomena of modern immigration.

Cross-listed with: ISRL343.

Credit Only Granted for: ISRL349K, GVPT368G, SOCY398G, SOCY398I, or ISRL343.

Formerly: ISRL349K.

SOCY399 Independent Study in Sociology (1-6 Credits)

Integrated reading or research under the direction and supervision of a faculty member. A maximum of 6 credits may be earned by a student for the same field experience in SOCY386 and SOCY399 combined.

Prerequisite: 12 credits in SOCY courses.

Restriction: Permission of BSOS-Sociology department.

Repeatable to: 6 credits if content differs.

SOCY401 Intermediate Statistics for Sociologists (3 Credits)

This is a course about multiple regression for undergraduate students and presumes that students taking this course will be both producers and consumers of multiple regression results. Students will work with the instructor to produce a research poster presentation based on secondary social science data. In addition to multivariable statistics, students will learn some statistical programming as well as how to organize a research presentation.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

Restriction: Must not have completed STAT400, BMGT231, or ENEE324.

SOCY405 Scarcity and Modern Society (3 Credits)

Resource depletion and the deterioration of the environment. Relationship to lifestyles, individual consumer choices, cultural values, and institutional failures. Projection of the future course of American society on the basis of the analysis of scarcity, theories of social change, current trends, social movements, government actions, and the futurist literature.

Prerequisite: 6 credits in SOCY courses.

Credit Only Granted for: SOCY305 or SOCY405.

Formerly: SOCY305.

SOCY407 Explaining Social Change: Fact and Fiction in Understanding Why Our World Looks the Way it Does (3 Credits)

Examines large-scale processes of social change that have produced durable and defining aspects of our contemporary world and asks, How did we get here? It focuses on four key issues: how markets and the pursuit of profit came to organize virtually all aspects of material life and restructured societies around social classes; how democratic forms of governance emerged to direct states and the persistent challenges presented by authoritarian rule; how social revolution erupts and what kinds of changes it yields; and how warfare between states can produce varieties of change not necessarily comprehended in the foregoing domains.

Prerequisite: 6 credits in SOCY courses or permission of Sociology Department.

Credit Only Granted for: SOCY498Y or SOCY407.

Formerly: SOCY498Y.

SOCY410 Social Demography (3 Credits)

Demography is the scientific study of human populations including their size, distribution, composition, and the processes that change these characteristics. Social demography examines how population processes interrelate with institutions in society, such as the family and the economy.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS-Sociology department.

SOCY411 Demographic Techniques (3 Credits)

This is a survey course in techniques that are widely used in demographic analysis. These include techniques that describe population structure and change, that analyze fertility, mortality, and migration, and that evaluate demographic data. In addition, many of the analytic skills and techniques of the course have more general applicability in social science and population health research.

Prerequisite: SOCY201 and SOCY410; or permission of the Sociology department.

SOCY412 Family Demography (3 Credits)

Family and population dynamics. Fertility issues, such as teenage pregnancy, the timing of parenthood, and family size, as they relate to family behavior, such as marital patterns, child care use, and work and the family. Policy issues that relate to demographic changes in the family.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

SOCY413 Sociology of Aging (3 Credits)

The aging of the population is one of the major demographic changes affecting social institutions during the next century. Research demography, sociology, economics, epidemiology, psychology and public health are integrated to develop a broader understanding of the causes and consequences of population aging. A central focus is the diversity of experiences by age, gender, socioeconomic status and health.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

SOCY415 Environmental Sociology (3 Credits)

Overview of the field and theoretical themes within the area of environmental sociology and technology. Current issues are explored including: environmental attitudes; environmental movements; environmental justice; globalization; global climate change; and garbage and food.

Prerequisite: 6 credits in SOCY courses.

SOCY418 Research in Family & Demography (3 Credits)

This is a special topics research course for Family and Demography. **Prerequisite:** SOCY201 and SOCY202; or permission of the Sociology department.

Repeatable to: 6 credits if content differs.

SOCY420 Qualitative Research Methods in Sociology (3 Credits)

Using the sociological imagination to independently explore research questions as designed by students. Readings will explore dilemmas qualitative researchers confront such as, how to conduct research ethically and how their background influences their findings and analysis. Students will learn how to collect data, analyze it, and present it to others.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

SOCY424 Sociology of Race Relations (3 Credits)

Encourages sociological thinking about US racial and ethnic minority populations, with a focus on African Americans, Latinos, Asian Americans, and Native Americans. The central concern is to understand and explain racial/ethnic inequality. A wide array of topics are discussed, including prejudice and discrimination, slavery, residential segregation, cultural inequality, skin tone stratification, economic and educational disparities, and assimilation/generational processes.

Prerequisite: 6 credits in SOCY courses; or permission of the Sociology department.

Cross-listed with: AAST424.

Credit Only Granted for: SOCY424 or AAST424.

SOCY428 Research in Inequality (3 Credits)

This is the special topics research course for Stratification and Inequality.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

Repeatable to: 6 credits if content differs.

SOCY431 Principles of Organizations (3 Credits)

Structural and processual characteristics of organizations that make them effective for different purposes and in different environments. Effects of different institutional environments, small group processes, organizational networks, and leadership. Types of organizations studied include formal bureaucracies, professional organizations, and voluntary associations.

Prerequisite: SOCY201 and SOCY202; or permission of BSOS-Sociology department.

SOCY432 Social Movements (3 Credits)

This course broadens students' understanding of social movements in the United States. Many topics are discussed, including the emergence of social movements, why people join social movements, collective identity, gender, culture, emotions, tactics, repression, and the decline of social movements. Various movements are reviewed, including the civil rights movement, the Chicano movement, the women's movement, the LGBTQ movement, the white power movement, the American Indian movement, and the animal rights movement.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS-Sociology department.

SOCY435 Society, Biology, and Health (3 Credits)

It is not too far-fetched to speak of the pancreas under capitalism or the proletarian lung. Humans are social beings in physical bodies. In this course, we draw on research studies, podcasts, news articles, and best-selling non-fiction to inform conversation and writing on how various dimensions of human biology influence, and are influenced by, our social and cultural environment. We focus on conceptualizing human behavior as an interplay between both nature and nurture, and consider how this approach changes our understanding of modern social problems. This course is appropriate for students with a range of backgrounds in the social and natural sciences; introductory-level supplemental readings on all necessary biological concepts will be provided.

Prerequisite: Must have completed 6 credits in SOCY courses or permission of BSOS Sociology Department.

SOCY441 Social Stratification and Inequality (3 Credits)

The sociological study of social class, status, and power. Topics include theories of stratification, correlates of social position, functions and dysfunctions of social inequality, status inconsistency, and social mobility.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS-Sociology department.

Restriction: Junior standing or higher.

SOCY442 The Black Middle Class (3 Credits)

Students will learn about the Black Middle Class. They will examine and explore the historical context that led to the rise of a Black Middle Class. Innovative avenues into the Black Middle Class will also be examined, including various household and family formations. Finally, the course will cover the consequences of being in the The Black Middle Class, with an emphasis on residential segregation and racial identity.

Prerequisite: 6 credits in SOCY courses.

Credit Only Granted for: SOCY498T or SOCY442.

Formerly: SOCY498T.

SOCY445 Sex and Love in Modern Society (3 Credits)

Sociological theories of sex and gender are used to explore empirical research on women's and men's sexual behavior and attitudes; variation in gendered sexuality by key social characteristics and how gendered sexuality is constructed and controlled; changes in sexuality over time and across relationship types, focusing on changes in sexual desire and behaviors and on the changing meaning of sex and marriage in U.S. society and other countries. Contemporary debates about sexuality will also be examined.

Prerequisite: SOCY201, SOCY202, SOCY203, and SOCY230.

Restriction: Must be in Sociology program; or permission of BSOS-Sociology department.

Credit Only Granted for: SOCY498X or SOCY445.

Formerly: SOCY498X.

SOCY450 Investigating Women's Empowerment in Low and Middle Income Countries (3 Credits)

Students in this course will learn how the study of women's empowerment in low and middle income countries (LMICs) has developed, its current state of measurement, and new avenues to pursue in the future. Examining the extensive research on gender-based inequalities in educational attainment, employment rates, and health status, students will investigate how power imbalances across individuals, households, and institutional factors result in persistent inequality. Bringing an intersectional perspective to the forefront of the course, we will study how to design effective intervention policies that seek to improve the daily lives of women, girls and their families.

Prerequisite: SOCY201 and SOCY202; or permission of BSOS-Sociology department.

SOCY451 Sociology of Culture (3 Credits)

Analyzes the relationship between society and culture. How do social forces affect cultural objects and products? How do values and meanings shape individual behavior? How can culture be both a source of domination and resistance? These and other topics will be analyzed to show the role of culture in our lives.

Prerequisite: 6 credits in SOCY courses; or permission of the department.

Credit Only Granted for: SOCY498C or SOCY451.

Formerly: SOCY498C.

SOCY452 Sociology of Mental Health (3 Credits)

The class focuses upon the larger question: "What is the balance between people being mentally 'ill' and us having a 'sick' society?" To explore this question, students will utilize sociological approaches toward mental illness and health. This will manifest as a focus on how social organization is related to mental health and illness. Students will consider how sociologists understand the nature, distribution, and treatment of mental illness and health in society, and will develop a personal understanding of what it means to be mentally healthy.

Prerequisite: 6 credits in SOCY courses; or permission of the department.

Credit Only Granted for: SOCY498O or SOCY 452.

Formerly: SOCY498O.

SOCY453 Racial Residential Segregation (3 Credits)

Examines how race and ethnicity have historically shaped residential patterns in the U.S. and their continuing importance today. Students will investigate the causes of residential segregation, including residential preferences, discrimination, and socioeconomic differences between racial and ethnic groups. Significant attention will be paid to how immigration and ensuing ethnic and racial diversity are reshaping the residential landscape. The readings highlight the U.S. context, though residential patterns in different countries are also briefly discussed.

Prerequisite: 6 credits in SOCY courses; or permission of the department.

Credit Only Granted for: SOCY498D or SOCY453.

Formerly: SOCY498D.

SOCY455 Social Dimensions of Privacy and Surveillance (3 Credits)

Today, it is quite common in many spheres of life that we divulge personal information in exchange for something else. This course examines practices of surveillance in contemporary society in relationship to collective understandings of privacy. By the end of this course, students will be able to analyze privacy norms and practices in the age of mass surveillance, how surveillance produces inequalities in relation to privacy, and how definitions and regulations of privacy and surveillance change over time.

Prerequisite: 6 credits in SOCY courses; or permission of the department.

Credit Only Granted for: SOCY391 or SOCY455.

SOCY456 Smart Machines and Human Prospects (3 Credits)

Artificial intelligence is everywhere and never sleeps. It is transforming our social institutions in intended and unintended ways. While scientists debate the feasibility of engineering conscious machines with general intelligence, no one debates that the global race is on to create more potent computers. Through targeted research, discussion, and presentation of findings students will answer a specific question on how, where, and in what ways society is being changed by smart machines.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

Credit Only Granted for: SOCY416 or SOCY456.

SOCY457 Sociology of Law (3 Credits)

Social, political, and cultural sources of legal norms and concepts; and how the law shapes society and society shapes the law using sociological theoretical frameworks. The role of social change, social reproduction and inequality (including race, class, gender, and sexuality) to achieve certain objectives such as compliance, deterrence and social control.

SOCY458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SOCY461 Sociology in Action: Research and Community Engagement in Prince George's County (3 Credits)

Sociology in Action is a research course that will use the science of sociology to inform real life issues and contribute to the development of social programs. In this course, students will gain hands-on experience in applying sociology by working with clients in Prince George's County on specific social problems and issues. Please assess your ability to commit to this course and fulfill all requirements. Given that students will be working with Prince George's County organizations, there will be some variation and unpredictability in the nature of the projects.

Prerequisite: SOCY202; or students who have taken courses with similar content may contact the department.

SOCY462 Digital Technology and Society (3 Credits)

Situates digital technology in our social environment and then examines how this relationship reflects, reinforces, or reorders social hierarchies. Students will learn the conceptual and methodological foundations for studying and evaluating how technologies such as health and social media apps, the personal computer, artificial intelligence, and weapons of war have evolved, diffused and impacted social life. Students will explore and then conduct independent research on the relationship between technology and social inequalities through the lens of health and medicine, the environment and climate change, jobs and the workplace, as well as government and criminal justice.

Prerequisite: Must have completed 6 credits in SOCY courses; or permission of BSOS-Sociology department.

SOCY463 Sociology of Masculinity: How Much Has Masculinity Really Changed? (3 Credits)

An examination of the history both feminist social movements and feminist sociology in a specific way. It uses the sociological subfield of men and masculinities as a keyhole through which we will study 'the stalled revolution' for women's equality. Along the way, we will familiarize ourselves with academic and popular reports about changing and contested definitions, ideas, and behaviors of masculinity.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS Sociology department.

SOCY465 The Sociology of War: State and Society since the American Revolution (3 Credits)

Since the American and French Revolutions at the end of the eighteenth century, warfare has been marked by the way national states draw ordinary people into armed conflicts—as members of the military, producers and controllers of resources and supporters or resisters, and also as targets and victims. This course examines how the centering of ordinary people in war has transformed over time, continuing right up to the current conflict in Ukraine. Alongside explaining why states make war the way they do, the course explores the impacts of making war and living through conflict on the societies embroiled in it.

Prerequisite: Must have completed 6 credits in SOCY courses; or permission of BSOS-Sociology department.

Credit Only Granted for: SOCY465 or SOCY265.

SOCY467 Sociology of Education (3 Credits)

Students will examine educational institutions from a sociological perspective by analyzing the latent and manifest functions of schooling. Students will study schools as structured organizations; investigate the various roles and subcultures present among teachers and students; and explore educational disparities in access and achievement.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS-Sociology department.

SOCY470 Pregnancy and Parenthood in an Unequal Society (3 Credits)

Analysis of patterns in sexual activity, contraceptive use, and unintended pregnancy, and how they reinforce or alleviate socioeconomic, gender, and racial inequalities. Emphasis on the role of healthcare providers and contraceptive access, attitudes about motherhood and contraception, policy interventions, and institutional designs. Social and economic consequences of increasing women's ability to control their fertility.

Prerequisite: 6 credits in SOCY courses; or permission of Sociology Department.

SOCY475 Sociology of Emotions (3 Credits)

Emotions are often thought of as purely subjective experiences. How much more personal than one get than their emotions and feelings? In addition to their physiological and psychological aspects, however, emotions have a social side that often go unnoticed. This course will introduce you to the social aspects of emotions. In doing so, we will cover wide-ranging topics including the social causes of emotions, social norms about emotions, disparities in emotionalexperiences, and the ways in which emotions can maintain and reshape society.

Prerequisite: 6 credits in SOCY courses; or permission of BSOS-Sociology Department.

Credit Only Granted for: SOCY498W or SOCY475.

Formerly: SOCY498W.

SOCY480 Researching the Middle East (3 Credits)

Introduces religion, gender, and politics in the Middle East and North Africa. After an overview of the political and social history the focus will be on methods for carrying out research on fundamental issues facing Middle Eastern societies, including national identity, religion, gender relations and the status of women in the family, politics, education, and labor market.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

Credit Only Granted for: SOCY498E or SOCY480.

Formerly: SOCY498E.

SOCY481 Ideology and Social Conditions in the Making of Terrorism in the Middle East and North Africa (3 Credits)

The sociology of terrorism and political violence in the Middle East and North African will be explored in this course.

Prerequisite: Must have completed 6 credits in SOCY courses or permission of the Sociology department.

Restriction: Sophomore standing or higher.

SOCY490 Experimental Research Practicum (3 Credits)

Hands-on experience in designing, conducting, and analyzing experimental research. Introduces students to causal inference in social scientific research, focusing on experimental designs. Students will get hands-on research experience running experimental studies in the group processes lab. Students will also work with the professor and graduate students in the department to develop a research idea that can be executed in the spring semester.

Prerequisite: SOCY201 and SOCY202; or permission of the Sociology department.

Additional Information: This is the first course in the experimental research practicum 2-course sequence.

SOCY491 Experimental Research Design (3 Credits)

Students will finalize the design of their studies from the fall semester and carry out the research in this course. Introduces students to analyzing experimental data and presenting results from these data. Students will continue to get hands-on research experience running experimental studies in the group processes lab and working with the professor and graduate students in the department to further develop their projects.

Prerequisite: SOCY201, SOCY202 and SOCY490; or permission of BSOS-Sociology department.

Additional Information: This is the second course in the experimental research practicum 2-course sequence.

SOCY498 Selected Topics in Sociology (1-3 Credits)

Topics of special interest to advanced undergraduates in sociology. Such courses will be offered in response to student request and faculty interest.

Prerequisite: SOCY201 and SOCY202; or permission of BSOS-Sociology department.

Repeatable to: 6 credits.

SPAN - Spanish

SPAN103 Elementary Spanish for Intercultural Communication I (4 Credits)

Develops students' communicative competence at the novice mid/high level of proficiency. Introduces students to global Hispanophone cultures.

Prerequisite: Must have appropriate World Language Placement (WLP) score.

Restriction: Must not be a native/fluent speaker of Spanish. Native/fluent speakers of Spanish or students who have previously attended school in Spanish speaking countries should take the WLP and see the Spanish Undergraduate Advisor to identify the correct Spanish course for which to register.

Credit Only Granted for: SPAN102 or SPAN103.

SPAN169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SPAN203 Elementary Spanish for Intercultural Communication II (4 Credits)

Continues to develop students' communicative competence at the novice high/intermediate low level of proficiency. Furthers the introduction to global Hispanophone cultures.

Prerequisite: SPAN103; or must have appropriate World Language Placement (WLP) score.

Restriction: Must not be a native/fluent speaker of Spanish. Native/fluent speakers of Spanish or students who have previously attended school in Spanish speaking countries should take the WLP and see the Spanish Undergraduate Advisor to identify the correct Spanish course for which to register.

SPAN204 Intermediate Spanish for Intercultural Communication (3 Credits)

Further develops students' communicative competence at the intermediate mid/high level of proficiency. Fosters expanded knowledge of and appreciation for global Hispanophone cultures.

Prerequisite: SPAN203; or must have appropriate World Language Placement (WLP) score.

Restriction: Must not be a native/fluent speaker of Spanish. Native/fluent speakers of Spanish or students who have previously attended school in Spanish speaking countries should take the WLP and see the Spanish Undergraduate Advisor to identify the correct Spanish course for which to register.

SPAN206 Spanish for Heritage Speakers I (3 Credits)

Review of oral and written Spanish for students who have native or near native knowledge of, but no formal education in Spanish. Taught in Spanish.

Prerequisite: Native or near native knowledge of and no formal education in Spanish.

SPAN207 Reading and Writing in Spanish (3 Credits)

Selected readings with emphasis on reading comprehension and the development of reading strategies. Work in composition writing and a review of selected grammatical topics. Complements material of SPAN204.

Prerequisite: Must have completed or be concurrently enrolled in SPAN204; or must have appropriate World Language Placement Test (WLPT) score.

SPAN222 Cultural Difference in Contemporary Latin America (3 Credits)

Introduction to representations and expressions in Latin America: cultural stereotypes, representations of difference, forms of discrimination, sublimation of difference into national identity, and the staging of the other. Taught in English.

SPAN224 Violence and Resistance in the Americas (3 Credits)

Indigenous vision of violence and resistance in the Americas. Texts and maps from the European explorers and conquerors are also studied. Readings include primary texts from the 16th as well as from the 20th century. Taught in English.

SPAN228 Selected Topics in Latin American Literature and Society (3-6 Credits)

Variable cultural studies topics on literature and society in contemporary Latin America. Taught in English.

Cross-listed with: PORT228.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: PORT228 or SPAN228.

SPAN229 Selected Topics in Latin American Culture (1-3 Credits)

Varied topics in Latin America culture.

Repeatable to: 9 credits if content differs.

SPAN234 Issues in Latin American and Caribbean Studies I (3 Credits)

Interdisciplinary study of major issues in Latin America and the Caribbean, including Latin America's cultural mosaic, migration and urbanization. Democratization and the role of religions. Taught in English.

Cross-listed with: LACS234, PORT234.

Credit Only Granted for: LASC234, PORT234, SPAN234, or LACS234.

Formerly: LASC234.

SPAN235 Issues in Latin American and Caribbean Studies II (3 Credits)

Major issues shaping Latin American and Caribbean societies including the changing constructions of race, ethnicity, gender and class as well as expressions of popular cultures and revolutionary practices. Taught in English.

Cross-listed with: LACS235, PORT235.

Credit Only Granted for: LASC235, PORT235, SPAN235, or LACS235.

Formerly: LASC235.

SPAN269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SPAN301 Advanced Grammar and Composition I (3 Credits)

Practice of complex grammatical structures through reading and writing of compositions and essays. Specific lexical, syntactic, rhetorical, and stylistic devices will be highlighted.

Prerequisite: Must have completed or be concurrently enrolled in SPAN207.

SPAN302 Advanced Grammar and Composition II (3 Credits)

Practice in and writing of different types of compositions and essays, including narrations, descriptions, and persuasive writing. Review of problematic syntactical structures.

Prerequisite: SPAN301.

SPAN303 Approaches to Cultural Materials in the Hispanic World (3 Credits)

Development of proficiency in critical thought through the reading, viewing, and analytical discussion of major genres and styles of cultural materials selected from Spanish-speaking world. Taught in Spanish.

Prerequisite: SPAN301.

Recommended: May elect to take SPAN311 and/or SPAN316 in same semester as SPAN303.

SPAN306 Spanish for Heritage Speakers II (3 Credits)

Practice of complex grammatical structures through reading and writing of compositions and essays. Specific lexical, syntactic, rhetorical and stylistic devices will be highlighted. Designed for Spanish speakers educated in English. Taught in Spanish.

Prerequisite: SPAN206.

SPAN307 Oral Communication Skills for Heritage Speakers of Spanish (3 Credits)

Development of techniques for formal public speaking in Spanish. Writing and delivering oral presentations for varied audiences and purposes. Includes strategies for organization, the use of rhetorical patterns, and the development of effective discourse. Designed for Heritage speakers of Spanish with native or near native knowledge of Spanish, but no formal education in Spanish. Taught in Spanish.

Prerequisite: Native or near native knowledge of and no formal education in Spanish.

SPAN311 Advanced Communication I (3 Credits)

Further development of listening, speaking, and writing skills in Spanish. Opportunity to develop oral and written fluency, improve pronunciation and increase vocabulary. Individual and/or group oral presentations. Taught in Spanish.

Prerequisite: SPAN301; and must have completed or be concurrently enrolled in SPAN303.

Restriction: Must not be a native/fluently speaker of Spanish.

SPAN312 Advanced Conversation II (3 Credits)

Continued mastery of listening and speaking skills in Spanish. Opportunity to develop oral fluency, improve pronunciation, and increase vocabulary. Emphasis on colloquial and technical language as well as development of linguistic accuracy. Individual and/or group oral presentation.

Prerequisite: SPAN311.

Restriction: Must not be a native/fluently speaker of Spanish.

SPAN316 Spanish Translation I (3 Credits)

Translation of texts into Spanish and/or English. Taught in Spanish.

Prerequisite: SPAN301; and must have completed or be concurrently enrolled in SPAN303.

SPAN317 Translation II (3 Credits)

Translation of non-literary, non-technical texts into Spanish and/or English.

Prerequisite: SPAN316.

SPAN318 Translation of Technical Texts (3 Credits)

Specialized texts in law and international affairs into Spanish and/or English. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

Repeatable to: 6 credits if content differs.

SPAN325 Hispanic Linguistics I: Grammar and Society (3 Credits)

Sociolinguistic approach to Spanish grammar focusing on real-life exploration of the ways linguistic structures change and are used in different parts of the Spanish-speaking world. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

Credit Only Granted for: SPAN310 or SPAN325.

Formerly: SPAN310.

SPAN331 Spanish Culture, Civilization and Literature I: Medieval Times (3 Credits)

The exploration of cultures of the Iberian Peninsula from its origins until the 15th century as well as the study of historical and political events that gave rise to the Spanish state. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN332 Spanish Culture, Civilization and Literature II: Renaissance and Baroque (3 Credits)

An overview of cultural and literary production of Spain from the late 15th through late 17th centuries, exploring the production of literary texts in their socio-historical, political, religious and cultural contexts and development. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN333 Spanish Culture, Civilization and Literature III: Modern Times (3 Credits)

An overview of cultural and literary production of Spain from the late 17th century through the present day, exploring the production of literary texts in their socio-historical, political, religious and cultural contexts and development. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN335 Cultural History of Seville (4 Credits)

Cultural History of Seville: An exploration of the Iberian, Mediterranean, and transatlantic contexts shaping the history, identity, and cultural and artistic expressions of Seville. Includes texts from the Middle Ages to the twenty first century. Focus on the historical, literary and cultural evolution of Seville from the Roman Empire and the Moorish occupation to the discovery and conquest of America until present times. Taught in Spanish.

Prerequisite: SPAN301.

Recommended: SPAN303.

SPAN359 Spanish for the Professions (3-9 Credits)

Exploration of cultural and linguistic skills for different professional contexts including vocabulary, listening, speaking, reading and strategies. No experience in the professional area necessary. Taught in Spanish.

Prerequisite: SPAN316; or permission of department.

Repeatable to: 9 credits if content differs.

SPAN361 Latin American Literatures and Cultures I: From Pre-Columbian to Colonial Times (3 Credits)

Overview of cultural history of Latin America from pre-Columbian civilizations to the Colonial period, exploring the foundations of the Spanish American cultural and literary tradition to approximately 1770. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN362 Latin American Literatures and Cultures II: From Independence to Nation Formation (3 Credits)

An overview of cultural and literary production of Latin America from the 18th Century to approximately 1900, exploring the production of literary texts in their socio-historical, political, and cultural contexts and development. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN363 Latin American Literatures and Cultures III: From Modernism to Neo-Liberalism (3 Credits)

An overview of cultural and literary production of Latin America from the late 19th through the early 21st centuries, exploring the production of literary texts in their socio-historical, political, and cultural contexts and development. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SPAN370 Spanish for Business I (3 Credits)

Business Spanish terminology, vocabulary and practices. Emphasis on everyday spoken and written Spanish. Readings and discussions of Spanish commercial topics. May include exposure to Spanish commercial topics. May include exposure to Spanish business environments. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

Credit Only Granted for: SPAN315 or SPAN370.

Formerly: SPAN315.

SPAN371 Spanish for the Health Professions (3 Credits)

Exploration of cultural and linguistic skills for the health professions including vocabulary, listening, speaking, reading and strategies. No experience in the professional area necessary. Taught in Spanish.

Prerequisite: SPAN303; and (SPAN311 or SPAN316).

SPAN372 Spanish and the Law (3 Credits)

Offers students the opportunity to enhance Spanish linguistic and intercultural communication skills in contexts of legal practice through the translation of a variety of legal documents. Introduces Spanish legal terminology in areas such as immigration, consumer protection, and criminal/employment/housing/family law. Students will learn how to apply these language and cultural skills as future legal practitioners interacting with clients who possess limited English proficiency. Native or fluent guest participants will expose students to legal terminology, registers, and dialects from various Spanish-speaking countries. The goal of the class is to enable students to, at a minimum, conduct intake interviews in a culturally competent fashion with Spanish-speaking clients without the assistance of interpreters. The course is designed to be beneficial for students with varying levels of Spanish language ability, up to and including students who are native or heritage speakers of Spanish. Taught in Spanish

Prerequisite: SPAN311 or SPAN316.

Credit Only Granted for: SPAN372 or SPAN3590.

Formerly: SPAN3590.

SPAN373 Spanish in the Media (3 Credits)

Exploration of Spanish in current events in the Hispanic world in local and international press and varied media, and production of journalistic articles.

Prerequisite: SPAN303; and (SPAN311 or SPAN316). Or permission of instructor.

Credit Only Granted for: SPAN373 or SPAN359A.

Formerly: SPAN359A.

SPAN374 Spanish in the Community (3 Credits)

Provides students with context for understanding, communicating with, and working with the Spanish-speaking community. Topics include Latino/a demographics, cultures, communities, work opportunities and local uses of Spanish. Requires outside service-learning work.

Prerequisite: SPAN303; and (SPAN311 or SPAN316). Or permission of instructor.

Credit Only Granted for: SPAN374 or SPAN359B.

Formerly: SPAN359B.

SPAN375 Spanish in the Life Sciences (3 Credits)

Communication and critical thinking skills in Spanish through the study of materials related to science. The course engages students in class discussions about a variety of topics in different formats, such as book chapters, articles, film, art, and literary works. The course is divided into five units that will allow the study of specific geographies, topics, and cases in the Spanish-speaking world. Assignments include a research proposal and visits to the National Zoo and the National Museum of Natural History. No technical knowledge is necessary, as we will emphasize the language of science, not the content itself. Taught in Spanish.

Prerequisite: SPAN303 and SPAN311; or SPAN316; or permission of instructor.

Credit Only Granted for: SPAN359L or SPAN375.

Formerly: SPAN359L.

SPAN386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Junior standing or higher.

SPAN388W Writing Center Internship (1-6 Credits)

Examines face-to-face and online writing center theory and practice through readings, exercises, and supervised tutoring. Students investigate the writing process and help other writers to negotiate it.

Prerequisite: Permission of the Writing Center (1205 Tawes Hall).

Cross-listed with: ENGL388W.

Repeatable to: 12 credits.

Credit Only Granted for: ENGL388W or SPAN388W.

SPAN399 Independent Study in Spanish (1-3 Credits)

Specific readings in literature or a translation project under the supervision of a faculty member of the department.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 3 credits.

SPAN401 Advanced Composition I (3 Credits)

Compositions and essays with emphasis on stylistics, idiomatic and syntactic structures. Organization and writing of research papers.

Prerequisite: SPAN302; or permission of ARHU-School of Languages, Literatures, and Cultures department.

SPAN402 Advanced Composition II (3 Credits)

Compositions and essays with emphasis on stylistics, idiomatic and syntactic structures. Organization and writing of research papers.

Prerequisite: SPAN401; or permission of ARHU-School of Languages, Literatures, and Cultures department.

SPAN404 The Bright Middle Ages (3 Credits)

The period that precedes the Renaissance has been traditionally labeled as the "dark" Middle Ages and it is common to associate an evil, brutality and barbarian life style with the time span comprised of between the 5th and the 15th centuries. This undergraduate seminar does not intend to embellish the truth or to minimize the hardships of life and death at the time of the Crusades. In fact, an objective timeline of historical events that marked that period as middle will be provided, and the central question to be addressed in this class is, "Middle of what"? As we try to answer it, we will be able to examine many "modern" aspects of the Middle Ages. Some of them have been highlighted since the beginning of the 20th century and justify a view of the Middle Ages as a bright and "modern" period in which, while overcoming despicable difficulties and a lack of facilities, the most precious treasures of our times were intellectually conceived, manufactured, built, and written. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN404, or SPAN408I.

Formerly: SPAN408I.

SPAN405 North American Neomedievalism: the U.S. East Coast and 16th-Century Spain (3 Credits)

The fall of the Roman Empire certainly did not affect North America, but the European Middle Ages created several patterns of expansion that, with considerable transformations, are present in North America and all over the world. Through the study of Neomedievalism, students will be able to better understand today's national and international relations. We will read scholarship that helps us understand that it is not an accident that we have replicas of medieval villas and that we are increasingly interested in developing games and producing movies that replicate medieval life. We will also study why the failure and success of social and economic systems of the past have influenced modern civilizations and why the loaded concepts of "barbarian" and "foreign" have not disappeared. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN405 or SPAN408C.

Formerly: SPAN408C.

SPAN406 Don Juan Manuel's Fictional and Historical Prose (3 Credits)

Dedicated to the literary production of an important author: Don Juan Manuel. By examining the interaction among writing, reading and the oral acquisition of knowledge in his works, special attention will be given to how the border between fact and fiction is constructed in the Middle Ages.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN407 Early Modern US and Early Modern Spain: A Common History (3 Credits)

The impact of Spanish early modern literature, cartography and architecture in the US Atlantic Coast (Labrador Peninsula to Florida). The class will start with readings that will provide a general overview of the Spanish presence in the US and its role in the early history of this country. We will continue reading about the voyages of exploration to the US East Coast of 1521-1526, which were sponsored by a Spaniard, Lucas Vazquez de Ayllon. These voyages subsequently resulted in a territory named "Tierras de Ayllon" (from Florida to the Chesapeake Bay). These Lands of Ayllon were located on the settlement of Chicora and the Missions of Ajacan and San Miguel de Gualdape. We will focus on the history and the geographical location of these Spanish establishments; they paralleled geographically and anteceded chronologically those of the British colony at Roanoke (1585) and the eventual establishment of Jamestown (1607). Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

SPAN408 Special Topics in Iberian and Latin American Studies (3 Credits)

Special topics in (a) the literature and film of Spain, Spanish-speaking Latin America, and U.S. Latina/o communities; (b) Spanish linguistics; and (c) Spanish, Latin American, and U.S. Latino cultural studies. Each topic will be announced when the course is offered.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN410 Libro de Buen Amor: Literary Matchmaking, Theory, and Praxis (3 Credits)

Literary traditions in the Libro de buen amor. Taught in Spanish

Prerequisite: One of the following SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN410 or SPAN413.

Formerly: SPAN413.

SPAN412 Women in the Middle Ages: Myths and Daily Life (3 Credits)

Explores the role of women during the Middle Ages and analyzes the active participation of women in a society in which men's occupation was warfare. Also explores "feminine voices" and female representations in the literature of the times.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN417 Practicum in Translation VI (3 Credits)

Translation of complete literary texts from Spanish into English. Evaluation of different versions of the original. Problems of interpretation, literary structure and analysis.

Prerequisite: SPAN316; or permission of ARHU-School of Languages, Literatures, and Cultures department.

SPAN418 Hispanic Literature in Translation (3 Credits)

Repeatable to: 6 credits if content differs.

SPAN420 Spanish and Spanish-Speaking Communities in the US (3 Credits)

Lays the foundations for the historical, linguistic, cultural, sociological, and political study of Spanish in the United States (US). The main goal of the course is to develop critical awareness about the relationship between language, individuals, and society within the diverse Spanish-speaking communities of the US. To this end, the course will analyze issues concerning, first, the historical and dialectal characteristics of the Spanish language in different regions of this country; second, the acquisition of Spanish as a minority language and in contact with both English and a large number of Spanish dialects; and third, the space that Spanish occupies in US public life now and in the future. The design of activities, assignments, and assessment procedures is based on promoting individual and collective awareness about crucial topics related to the present and the future of Spanish as one of the national languages of the US.

Prerequisite: SPAN325, SPAN425, or permission of instructor.

Credit Only Granted for: SPAN478A or SPAN420.

Formerly: SPAN478A.

SPAN422 Intercultural Communication and Negotiation (3 Credits)

Focuses on the relationship of language and culture of those operating in world markets. Particular attention will be given to intercultural communication, linguistic systems, culture specific perceptions of, and negotiation with, the Spanish-speaking world. Taught in Spanish.

Prerequisite: SPAN370 OR SPAN371 OR SPAN373 OR SPAN 374.

Restriction: Junior standing or higher.

SPAN425 Hispanic Linguistics II: Structures of Spanish (3 Credits)

This course begins with an introduction to general concepts in linguistics, from language function and the brain to communication, culture, and thought, and their relation to other disciplines in the social sciences.

The main purpose of this course is to provide an overview of Hispanic linguistics through multiple perspectives, while exploring the areas of Spanish morphology, syntax, and semantics. This course will also focus on the structural tendencies of Spanish through a variety of practical activities. Taught in Spanish.

Prerequisite: SPAN303; and SPAN311 or SPAN316 or SPAN325.

SPAN426 Hispanic Linguistics III: Language in Use (3 Credits)

Designed for students without previous experience in Linguistics. Focus on language variation and use, linguistic change, and bilingualism. Taught in Spanish.

Prerequisite: SPAN303; and SPAN311 or SPAN316 or SPAN325. Also offered as: SPAN626.

Credit Only Granted for: SPAN426 or SPAN626.

SPAN427 Visions and Fictions from Spain (3 Credits)

Overview of Spanish Cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their sociohistorical, political, religious and cultural contexts.

Taught in Spanish.

Prerequisite: SPAN331, SPAN332, or SPAN333; or students who have taken courses with comparable content may contact the department; or permission of ARHU-Spanish & Portuguese Languages & Literatures department.

Cross-listed with: CINE427.

Credit Only Granted for: CINE427, FILM427 or SPAN427.

Formerly: FILM427.

SPAN431 Mexican Women Writers (3 Credits)

Focuses on Mexican women writers from the colonial period to the present. It consists of various types of texts, including poetry, short story, essay, and novel. Its principal themes include the relations among experience, knowledge, and expression; the presence or absence of women in literary histories, including Wikipedia pages; feminism; and the opportunities and challenges presented by the category of women writers. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN431 or SPAN408G.

Formerly: SPAN408G.

SPAN432 Colonial Latin American Literature (3 Credits)

Examines the key themes, writers, literary movements, and cultural debates of the colonial period.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN433 Women and Culture in Colonial Latin America (3 Credits)

Considers questions of women and historical production, women writers in colonial times, and contemporary literary interpretations of colonial realities. Debates the continued legacy of female archetypes from the colonial period to the present, and epistemological questions regarding the production of knowledge.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN434 The Usable Past: Reflecting on Archives in Contemporary Fictions and Films from the Southern Cone (3 Credits)

Che Guevara on a t-shirt, Eva Peron in a Broadway musical, Bolivar as trans on a postcard, Gabriela Mistral on a peso bill, Pablo Neruda as a postman's friend, Frida Kahlo as a feminist icon, Artigas in a blues band ...

The list goes on. Nevertheless, what all these cultural appropriations have in common is that the present has used the past to inscribe a functional narrative for that time. This course will not ask if we can know past events as they really happened, but rather it will explore how contemporary fictions, films, and visual art from the Southern Cone construct usable cultural archives for their present. Also, this seminar traces the ways in which contemporary authors, filmmakers, and visual artists reflect on the past in order to critically read their present. Concentrating on the past as both the subject of fiction and as a force for inscribing fiction, this seminar inscribes an approach to time that moves away from a linearity.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN434 or SPAN408F.

Formerly: SPAN408F.

Additional Information: Taught in Spanish.

SPAN435 Ecuador: Andean Spaces-Traversing the Colonial City and the Natural World (3 Credits)

Introduces students to the history and cultures of Ecuador from the colonial period to the beginning of the 19th century. By studying the socio-spatial configuration of the colonial city as exemplified by Quito, students will be immersed in the art, architecture, and other rich cultural legacies of Ecuador. Quito, a World Heritage site, offers students visually stunning churches, monasteries, colonial squares, a famed tradition of Baroque painting and sculptures, and vibrant indigenous and mestizo communities. As a contrast, students will explore also travel narratives that represent the natural Andean world while visiting Quito's surrounding areas. This course will interrogate the European influence on urban design and representations of the landscape of the Americas. Understanding this colonial past enhances the understanding of the modern history of the Andean region and Latin America as a whole. The students will gain a full appreciation of the European and Indigenous living heritage that composes the region today. Taught in English.

Cross-listed with: ARTH472.

Credit Only Granted for: SPAN435, SPAN448E, ARTH472 or ARTH369E.

Formerly: SPAN448E and ARTH369E.

SPAN436 Representations of Childhood and Youth in Latin American Literature and Film (3 Credits)

Focuses on the representation of childhood and youth in films and works of fiction from various regions of the Spanish-speaking Americas, including Mexico, the Caribbean, the US, and Peru. We are going to read various short stories and novels, and watch two films, all of which develop in different ways the topics of childhood and youth. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

SPAN437 Love, Science, Religion and the Pursuit of Criollo Independence in 18th-Century Mexico (3 Credits)

Explores the 18th century from the periphery of traditionally studied centers of Enlightenment. By focusing on pre-independence Mexico, we will study the emergence of alternative scientific and religious discourses in an American context that leads to social and political changes at the onset of the 19th century. Students will watch the Mexican telenovela "Alborada" (2005-6), which fictionally explores many of the topics that are relevant for the course. Students will also read a variety of materials on the following subtopics: imperial designs, cultural production, inquisitional realities, medical discourse, individual and political rights, criollo consciousness, etc. All writing and discussion will be in Spanish. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN437 or SPAN408V.

Formerly: SPAN408V.

SPAN438 Special Topics in Colonial Latin America (3 Credits)

The conquest and colonization of the New World produced a textual corpus of invaluable importance for the foundation of Spanish American literary tradition. Special topics (themes, authors, debates, etc.) relevant to the Colonial period will be addressed.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Repeatable to: 9 credits if content differs.

SPAN440 Speaking Up/Out: Women Writers and Feminist Social Movements in Contemporary Latin America (3 Credits)

This seminar will explore how feminist subversion of naturalized power relationships has become a social force that is reshaping Latin American culture in the last several decades. Also, we will study how contemporary cultural artifacts contest value systems while rejecting entrenched hierarchies and norms. By reading contemporary women writers and by working on contemporary feminist social movements, this course will explore what the anthropologist Rita Segato has defined as "the war against women." Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

SPAN442 Detective Fiction in Latin America (3 Credits)

Focuses on Latin American detective fiction, including novels and short stories, whodunits and thrillers. Detective fiction's origins are primarily from outside of Latin America. Therefore the course will also include important texts from other traditions, including the US, English, and French. Taught in Spanish.

Prerequisite: SPAN303; and SPAN311 or SPAN316; and one from (SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363) or permission of instructor.

Credit Only Granted for: SPAN408T or SPAN442.

Formerly: SPAN408T.

SPAN448 Special Topics in Latin American Civilization (3 Credits)

Intensive independent study of a selected topic related to Latin American civilization.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Repeatable to: 6 credits if content differs.

SPAN449 Special Topics in Spanish Civilization (3 Credits)

An intensive study of a selected topic related to Spanish civilization.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Repeatable to: 6 credits if content differs.

SPAN450 The Hispanic Caribbean: What is a Beach? (3 Credits)

Explores the Hispanic Caribbean as "island spaces" of multiple migrations and cultural identities, as sites of colonial experiences and post-colonial debates.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Credit Only Granted for: SPAN408C or SPAN450.

Formerly: SPAN408C.

SPAN451 Paradise Lost: Cuban Cinematic Culture (3 Credits)

Explores the cinematic journey of the Cuban revolution from socialist utopia to bitter disillusionment. Taking as a point of departure the national postulates of an "Imperfect Cinema" and the different theorizations of "New Latin American cinema," the course will concentrate on the emergence and development of Cuban cinematic culture that has taken place during the revolution. Our objective is to explore how art and politics collide to reveal contested visions of a social process. Visual materials will include films and documentaries. Readings will include selections from historiographic and literary works, as well as contemporary critical studies. Taught in Spanish

Prerequisite: One course from SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN451 or SPAN408P.

Formerly: SPAN408P.

SPAN452 Reflecting on Neoliberalism and Contemporary Southern Cone Culture (3 Credits)

An exploration of how neoliberalism and its market-driven economy have shaped Latin American culture of the last decades. In particular, we will explore how contemporary cultural artifacts are inscribed into a value system that quantifies the unquantifiable, that is to say, a system that only values a book or an artist based on sales. In this class, we will work with a variety of cultural artifacts from Argentina, Chile, and Uruguay—films, chronicles, music, newspapers, cartoons, literature, and documentaries—to map how culture and markets intersect. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN452 or SPAN448T.

Formerly: SPAN448T.

SPAN453 Seeking Adventure and Glory: Don Quixote (3 Credits)

Widely acknowledged as the first modern novel, Don Quixote tells the story of a middle-aged Spanish gentleman who, obsessed with the chivalrous ideals found in romantic tales, decides to take up his lance and sword to defend the helpless and destroy the wicked. Seated upon his horse Rocinante and accompanied by his loyal squire Sancho Panza, Don Quixote sets out on the roads of Spain seeking adventure and glory. The course will consist of a close reading of Don Quixote. We will analyze and comment on the novel at the literal and historical levels, as well as in its symbolic and widely anthropological dimensions. We will also establish a dialogue between Don Quixote and the narrative and philosophical traditions of Europe, United States and Latin America. Taught in Spanish.

Prerequisite: One of the following: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN430 or SPAN453.

Formerly: SPAN430.

SPAN456 Construction of Gender and Sexuality in the Spanish Realist-Naturalist Novel (3 Credits)

Examines 19th-century Spanish normative notions regarding gender expression and identities as well as men's and women's sexualities in the Realist and Naturalist novel. Also, we will discuss representations of men and women whose behavior ran afoul of a heteronormative system that valued domestic privacy as a space of honor and virtuous masculinity and femininity. Taught in Spanish.

Prerequisite: One of the following: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Recommended: SPAN333.

SPAN457 Comedy, Foppery, and Foreignness in Eighteenth-Century Spain (3 Credits)

We will explore the comical and satirical elements in 18th-century Spanish literary works, situating them within the social and historical context of the aesthetic tastes of the Spanish reading public and how those tastes impacted the production of literature and other cultural artifacts. Taught in Spanish.

Prerequisite: One of the following: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Recommended: SPAN333.

SPAN460 The Sublime and the Grotesque in Spanish Romantic Plays and the Visual Arts (3 Credits)

An exploration of the notions of the sublime and the grotesque in theatrical works as well as in the visual arts of the Romantic movement in Spain. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

SPAN461 Queer Spain (3 Credits)

Explores discursive representations of Spaniards who were judged as non-normative by their society during the modern and contemporary period. Putting a critical lens to various cultural artifacts (visual arts, fiction, film, and journalism), we will interrogate what it means to be "(ab)normal" in terms of gender expression, erotic desire, sexuality, and anatomical sex in Spain at critical junctures in modern history. Taught in Spanish.

Prerequisite: One of the following: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362 or SPAN363; or permission of instructor.

Recommended: SPAN333.

Credit Only Granted for: SPAN408A or SPAN461.

Formerly: SPAN408A.

SPAN462 Twentieth Century Drama (3 Credits)

Significant plays of the twentieth century.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN463 Cultural Artifacts of Contemporary Spanish Crises from 1898 to the COVID Pandemic (3 Credits)

An overview of Spain from the end of the 19th century through the present day and studies some of its main crises. The course explores the production of literary, cultural, and cinematic texts in their sociohistorical, political, religious and cultural contexts and development. This interdisciplinary course covers topics such as political, historical, religious, racial, ethnic, gendered/sexual, cultural, and ethno-geographical, literary and cinematic diversities and differences in Contemporary Spain. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

SPAN464 Contemporary Spanish Poetry (3 Credits)

Spanish poetry from the generation of 1927 to the present.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN465 Spanish Exiles and Totalitarianisms (3 Credits)

An overview of the cultural and literary production regarding the Spanish Civil War (1936-1939) and its aftermath in the context of political exile from the early 20th century through present-day Spain. The course explores the production of literary texts in their sociohistorical, political, and cultural contexts and development as a reflection of that crisis in the conscience of present-day Spain. This interdisciplinary course covers topics such as political, historical, religious, racial, ethnic, gendered/sexual, cultural, and ethno-geographical diversities and differences concerning the Spanish Civil War and its aftermath. Taught in Spanish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Recommended: SPAN333.

SPAN466 The Contemporary Spanish Novel (3 Credits)

The novel and the short story from 1940 to the present.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN467 Visions and Fictions from Spain (3 Credits)

Overview of Spanish cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their social, historical, political, religious, and cultural contexts.

Prerequisite: One course from SPAN331, SPAN332, SPAN333, SPAN361, SPAN362 or SPAN363; or permission of instructor.

Recommended: SPAN333.

Cross-listed with: CINE467.

Credit Only Granted for: CINE427, CINE467, FILM427, SPAN427, or SPAN467.

Formerly: FILM427, CINE427, and SPAN427.

SPAN468 Modernism and Post-Modernism in Spain and Spanish-America (3 Credits)

A study of the most important works and authors of both movements in Spain and Spanish-America.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Repeatable to: 9 credits if content differs.

SPAN469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

SPAN471 United States Latina Fiction (3 Credits)

An introduction to United States latina fiction through the study of short stories, novels, poetry, etc. It explores strategies of representation by women of color.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN472 Latina/o Communities and Language Struggles (3 Credits)

Explores the history of Latina/o communities and their language "choices," negotiations, and struggles in the United States, starting with the Spanish conquest of North America through the 21st century. We examine the lasting impact of the War of 1848 by which the U.S. colonized the southwest and consider how the Spanish-American War of 1898 imposed U.S. rule in the Hispanophone Caribbean. In this context of struggle, we examine how language repression and expression gave voice to the Latinx civil rights movements in the 1960s and 1970s as well as current immigration and education movements. Texts include Spanish crónicas, U.S. political treaties, the Hispanic press, manifestos, novels, poetry, spoken word, film, music, among others. Course format consists of lectures, discussions, group work, short essays, presentations, and examinations. Students should expect to participate in a community engagement project. Taught in Spanish and discussions in Spanglish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of the instructor.

Credit Only Granted for: SPAN408T or SPAN472.

Formerly: SPAN408T.

SPAN473 U.S. Latino Performance (3 Credits)

An introduction to United States Latino Performance texts by Chicano, Nuyorican, Cuban-American, Dominican, Central-American and others.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN474 Central American Literatures, Cultures, and Histories (3 Credits)

An overview of Central American history and cultural production, focusing primarily but not exclusively on literary texts.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

SPAN475 Central America: 21st-Century Literature & Culture (3 Credits)

Explores the discursive construction of Central America in the 21st century, from banana republic to northern triangle. While we study issues of violence, crime, femicide, impunity, corruption, migration, human and drug trafficking, and climate change, we will moreover focus on people's struggles for equality, human rights, environmental justice, food security, healthcare, education, and employment in the region. We seek to understand the root cause of local and global conditions in Central America as well as the creative and resilient ways that Central Americans respond to them. Texts include novels, short stories, crónicas, news, films, photography, and other re/sources. Course format consists of lectures, discussions, group work, short essays, presentations, and examinations. Students should expect to participate in a community engagement project. Taught in Spanish and discussions in Spanglish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN408L or SPAN475.

Formerly: SPAN408L.

SPAN476 Central Americans in the DMV (3 Credits)

Explores the history, migration, and cultural representation of Central Americans in the DMV (DC, Maryland, and Virginia) in the larger context of transnational relations between Central America and the United States. We ask how and why the DMV is home to one of the largest concentrations of Central Americans, especially Salvadorans, in the nation, as well as examine the diaspora as a transnational process. We study plays, short stories, poetry, spoken word/ performances, films, music, photography, zines, social media, and other interdisciplinary re/ sources, and engage one-on-one with local and international artists, activists, and community organizations. Course format consists of lectures, discussions, group work, short essays, presentations, and examinations. Students should expect to participate in a community engagement project. Taught in Spanish and discussions in Spanglish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN408W or SPAN476.

Formerly: SPAN408W.

SPAN477 Between Worlds: Central American Diasporas (3 Credits)

Examines Central America as a locus of diasporas, from its geological formation as an isthmus to the current movement of peoples across El Salvador, Guatemala, Nicaragua, Honduras, Costa Rica, Panama, Belize, and beyond. It offers a broadscale view of Central American societies, histories, (geo)politics, social and revolutionary movements, and cultural and literary production, and situates diasporic literature in relation to migration, war, genocide, violence, transnationalism, globalization, among others. Because the Washington, D.C. Metropolitan Area is a significant site of the Central American diasporas, we will explore our particular location and engage with local diasporic communities. Course format consists of lectures, discussions, group work, short essays, presentations, and examinations. Students should expect to participate in a community engagement project. Taught in Spanish and discussions in Spanglish.

Prerequisite: SPAN331, SPAN332, SPAN333, SPAN361, SPAN362, or SPAN363; or permission of instructor.

Credit Only Granted for: SPAN408R or SPAN477.

Formerly: SPAN408R.

SPAN478 Special Topics in United States Latino Cultures (3 Credits)

Explores special topics in US Latino Cultures, ranging from Chicano, Nuyorican, Cuban-American, Dominican, Central-American and other border cultural identities.

Prerequisite: SPAN333, SPAN361, SPAN331, SPAN332, SPAN362, or SPAN363.

Repeatable to: 9 credits if content differs.

SPAN479 Honors Thesis (3-6 Credits)

Researching and writing an honors thesis under the direction of a professor.

Restriction: Must be in Spanish and Portuguese Honors.

Repeatable to: 6 credits if content differs.

SPAN480 Spanish for Business II (3 Credits)

Business Spanish terminology, vocabulary and practice. Emphasis on everyday spoken and written Spanish. Readings and discussions of international topics. Cross-cultural considerations relative to international business operations, including exporting and banking. Taught in Spanish.

Prerequisite: Must have completed SPAN370.

Restriction: Sophomore standing or higher.

Credit Only Granted for: SPAN470 or SPAN480.

SPAN495 Honors Reading (3 Credits)

Supervised reading.

Prerequisite: Must be in Spanish and Portuguese Honors; or permission of ARHU-School of Languages, Literatures, and Cultures department.

SPAX - Spanish Education Abroad

SPAX100 Intensive Elementary Spanish I A1 (6 Credits)

This intensive introductory course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. The course covers an introduction to the Spanish alphabet and fundamental skills including reading, writing, listening, and speaking. Students will be able to introduce themselves and be familiar with everyday expressions and basic phrases.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX101 Elementary Spanish I A1 (3 Credits)

This introductory course covers an introduction to the Spanish alphabet and fundamental skills including reading, writing, listening, and speaking. Students will be able to introduce themselves and be familiar with everyday expressions and basic phrases.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX102 Intensive Elementary Spanish II A2 (6 Credits)

This intensive elementary course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. The course covers Spanish language intonations, reading, writing, listening, and conversational Spanish. Students will be able to understand sentences and frequently used expressions related to areas of most immediate relevance.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX103 Elementary Spanish II A2 (3 Credits)

This course covers Spanish language intonations, reading, writing, listening, and conversational Spanish. Students will be able to understand sentences and frequently used expressions related to areas of most immediate relevance.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX200 Intensive Intermediate Spanish I B1.1 (6 Credits)

This intensive intermediate course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. The course covers pronunciation, expression, reading comprehension, writing, and culture of the Spanish-speaking world. Students will be able to deal with most situations likely to arise while travelling in a Spanish-speaking region and produce simple connected text on topics that are familiar or of personal interest.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX201 Intermediate Spanish I B1.1 (3 Credits)

This intermediate course covers pronunciation, expression, reading comprehension, writing, and culture of the Spanish-speaking world. Students will be able to deal with most situations likely to arise while travelling in a Spanish-speaking region and produce simple connected text on topics that are familiar or of personal interest.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX202 Intensive Intermediate Spanish II B1.2 (6 Credits)

This intensive intermediate course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. The course covers communicating with confidence, understanding and writing short texts, and various grammatical structures. Students will be able to describe experiences and events, dreams, hopes and ambitions and briefly give reasons and explanations for opinions and plans.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX203 Intermediate Spanish II B1.2 (3 Credits)

This intermediate course covers communicating with confidence, understanding and writing short texts, and various grammatical structures. Students will be able to describe experiences and events, dreams, hopes and ambitions and briefly give reasons and explanations for opinions and plans.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX300 Intensive Upper Intermediate Spanish I B2.1 (6 Credits)

This intensive upper intermediate course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. The course covers more advanced reading and listening comprehension, with a focus on Spanish and Latin American authors; covers more advanced speaking, such as discussions and debates, as well as writing letters, reports, and essays. Students will be able to produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX301 Upper Intermediate Spanish I B2.1 (3 Credits)

This upper intermediate course covers more advanced reading and listening comprehension, with a focus on Spanish and Latin American authors; covers more advanced speaking, such as discussions and debates, as well as writing letters, reports, and essays. Students will be able to produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX302 Intensive Upper Intermediate Spanish II B2.2 (6 Credits)

This intensive upper intermediate course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. Students will be able to take part in conversations with native speakers with little or no difficulty and no grammatical errors and using acceptable pronunciation. Students achieving this level are able to handle literary texts and documents on any subject in their field of interest, and write complex texts with very few errors.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX303 Upper Intermediate Spanish II B2.2 (3 Credits)

This upper intermediate course will allow students to be able to take part in conversations with native speakers with little or no difficulty and no grammatical errors and using acceptable pronunciation. Students achieving this level are able to handle literary texts and documents on any subject in their field of interest, and write complex texts with very few errors.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX306 Intensive Advanced Spanish I C1.1 (6 Credits)

This intensive advanced course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. Students will be able to understand a wide range of demanding, longer clauses, and recognize implicit meaning as well as express ideas fluently and spontaneously without much obvious searching for expressions.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX307 Intensive Advanced Spanish II C1.2 (6 Credits)

This intensive advanced course offers significant exposure to the Spanish language and creates many opportunities to practice language skills. Students will be able to use language flexibly and effectively for social, academic and professional purposes as well as produce clear, well-structured, detailed text on complex subjects, showing controlled use of organizational patterns, connectors and cohesive devices.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

SPAX312 Spanish Conversation and Oral Skills I (3 Credits)

Augments student linguistic competence with a special focus on oral skills and linguistic functions. Students will develop the oral abilities and strategies needed to accomplish meaningful interactions with people from the local community with ease and confidence.

Additional Information: This course is offered as part of the USAC Chile study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/10009>. Education Abroad processes registrations for this course on behalf of students.

SPHL - Public Health

SPHL100 Foundations of Public Health (3 Credits)

An overview of the goals, functions, and methods of public health. After an introduction to the core concepts and tools used in public health research and practice, applications of these methodologies are considered in the context of current controversies/problems in public health. Students work together to develop strategies for prevention and control that take into consideration different points of view, outside research, and impacts on individuals and communities.

Restriction: Must be in a major in SPHL-School of Public Health.

Credit Only Granted for: SPHL100, PHSC300 or SPHL600.

SPHL240 Public Health Engagement (2 Credits)

Public Health Engagement is a transfer transition course that provides an opportunity for transfer students to engage in the professional culture of the public health field and to build community while navigating a large, public institution. Instructors use research, physical activity, and academic engagement to stimulate community building across all majors within the School of Public Health. Students will engage with public health issues, academic resources, solution-driven grant writing, identity development, faculty and alumni support systems, and group and individual physical activities. A partnership of 3 sectors within the school, this course is taught by an interdisciplinary team fostering public health practice and community building while promoting successful transition, integration and retention.

Restriction: Must be a transfer student with 60 credits or less; and must be in a major in SPHL-School of Public Health.

Additional Information: The course will include a significant physical activity component.

SPHL246 Terp Restoration (1 Credit)

This lab course is designed to assist students in improving academic strategies, learning time management practices, interacting with the faculty and greater campus community, and developing professional career aspirations. The focus will be on an exploration of the academic environment, campus resources, self-discovery tools, and skill development. Utilizing an interactive experience through facilitated discussion that develops positive relationships, students will actively explore academic opportunities offered through the School of Public Health and the University of Maryland.

Restriction: Students must be undergraduate majors within the School of Public Health; and permission of instructor.

SPHL260 Public Health Beyond Borders: Designing Culturally Competent Global Projects (3 Credits)

The skills learned in this course are intended to engage students in critical thinking prior to a study abroad, global health project, or other international service experience in such a way that adds depth for the student and minimizes unintended negative consequences for local communities. The course is designed in three parts to prepare students to think critically about reciprocity in international service projects and develop scholarship in practice. Community members are viewed as partners, educators, and trusted advisors. Furthermore, since global health projects begin long before the plane lands, money is exchanged, and the first of many plastic bottles of water is purchased, the course begins with broad definitions of key concepts to heighten awareness of unintended consequences of well-meaning volunteers, then leads students through reflection and writing to apply these concepts and provides opportunity to integrate key concepts into plans for projects that serve global communities with cultural competence. Students will explore the needs of global communities, design interventions, and reflect on the potential outcomes in improving health in the communities served, while also focusing on their own subjective experience.

SPHL291 Does Science Support Nontraditional Healing Practices? (3 Credits)

Does yoga improve the health of wounded warriors and/or breast cancer survivors? Can mindfulness enhance your business success and family relationships, or is it social media hype? Do you know what reflexology is, and does it help reduce your personal stress level? Increasing numbers of people are using nutritional supplements, meditation, yoga and other forms of exercise, acupuncture and experiences in nature to reduce stress levels and improve overall health and well-being. In the media, scientists to celebrities have alternately endorsed or rejected claims about how these and other nontraditional health practices benefit health and well-being. Students will sample some of these nontraditional health practices and explore whether these practices can enhance their own well-being. General scientific methods for health research will be introduced and students will use this knowledge to evaluate the existing scientific research on these practices. Students will also evaluate whether popular and media translation of scientific research on these practices is fact-based.

Recommended: Successful completion of English composition course.

SPHL298 SPH Ambassador Program (1 Credit)

The purpose of this course is to train students in the methods related to advising, teaching and leading undergraduate current and prospective students. At the end of the course ambassadors will be a resource to these new students in SPH through their knowledge of academic planning, college/university policy, and understanding of what SPH has to offer. Ambassadors will have experience working one on one with students who have academic advising questions and concerns. They will develop better public speaking skills and know how to impart new information in an effective way to undergraduate students.

Restriction: Must be in a major in SPHL-School of Public Health; and minimum cumulative GPA of 2.7; and must have earned less than 90 credits.

Repeatable to: 6 credits.

SPHL321 Terrapin Think Tank (1 Credit)

Serves as a broad introduction to Terrapin Think Tank. Students will learn the basic core competencies we use in health policy research, advocacy, and evaluation. Students will be introduced to policy structures at county- and state-level, key players, and best practices in designing policies and interventions that are sustainable and truly community-centric. Students will also have the opportunity to build out an original initiative, program, or piece of legislation over the course of the semester which will culminate in a final presentation with community and faculty leaders.

SPHL333 Fundamentals of Undergraduate Teaching for Education Assistants and Mentors (UTEAM) (1 Credit)

Supports the professional and personal development of UG students in the UTEAM program. Must be completed concurrently with the first semester of providing UTEAM support to a specific course. UTEAM members are dedicated student learners who provide peer education support for specific course as part of the teaching team and emphasizes: 1) introduction to teaching, learning, literature and practice, 2) collaboration with other UTEAM members, faculty and staff as a learning community, and 3) reflection on the knowledge and skills developed through course participation.

Corequisite: SPHL399.

Restriction: Permission of the instructor; and permission of the School of Public Health.

Additional Information: This course must be taken concurrently with SPHL399 the first term in which a student is a UTA. Preference is given to students within an SPHL major.

SPHL386 Experiential Learning (3 Credits)

Prerequisite: Permission of SPHL-School of Public Health.

SPHL399 Academic Peer Teaching and Mentoring in Public Health (1-3 Credits)

An independent study course for the Undergraduate Teaching and Mentoring (UTEAM) program within the School of Public Health. Students will apply evidence-based research while assisting peers with the understanding and application of course content. Specific responsibilities may vary dependent upon the course instructor. The primary roles of the UTEAM members will be to provide in-class support and/or external course support through review sessions, discussions sessions, laboratory support, group tutoring and office hours.

Corequisite: If this course is being taken for the first time, students must concurrently register for SPHL333.

Restriction: Permission of the instructor; and permission of the School of Public Health.

Repeatable to: 6 credits if content differs.

Additional Information: Preference is given to students within an SPHL major.

SPHL478 Special Topics in Public Health (1-4 Credits)

Special topics in the field of public health.

Repeatable to: 8 credits if content differs.

SPHL488 Children's Health and Development Clinic (1-4 Credits)

An opportunity to acquire training and experience in a therapeutically oriented physical education-recreation program for children referred by various education, special education, medical or psychiatric groups.

Prerequisite: Permission of SPHL-School of Public Health.

SPHL498 Special Topics in Public Health (3 Credits)

Topical and interdisciplinary courses of interest to upper level undergraduate students in the field of Public Health not currently covered by the program.

Restriction: Junior standing or higher.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: SPHL498 or SPHL698 of same suffix.

STAT - Statistics and Probability

STAT100 Elementary Statistics and Probability (3 Credits)

Simplest tests of statistical hypotheses; applications to before-and-after and matched pair studies. Events, probability, combinations, independence. Binomial probabilities, confidence limits. Random variables, expected values, median, variance. Tests based on ranks. Law of large numbers, normal approximation. Estimates of mean and variance.

Prerequisite: MATH110, MATH112, MATH113, or MATH115; or permission of CMNS-Mathematics department; or must have math eligibility of STAT100 or higher and math eligibility is based on the Math Placement Exam or the successful completion of Math 003 with appropriate eligibility.

Cross-listed with: DATA100.

Restriction: Must not have completed MATH111; or must not have completed any STAT course with a prerequisite of MATH141.

Credit Only Granted for: DATA100 or STAT100.

STAT110 Applications of R for Data Science (1 Credit)

Intended to prepare students for subsequent courses requiring computation with R, providing powerful and easy to use tools for statistical data analysis. Covers basics of R and R Studio including file handling, data simulation, graphical displays, vector and function operations, probability distributions, and inferential techniques for data analysis.

Prerequisite: DATA100, STAT100, or MATH135; or any 400-level STAT course.

Cross-listed with: DATA110.

Credit Only Granted for: STAT110 or DATA110.

STAT386 Experiential Learning (3-6 Credits)

Prerequisite: Must have learning proposal approved by the CMNS-Mathematics Department.

STAT400 Applied Probability and Statistics I (3 Credits)

Random variables, standard distributions, moments, law of large numbers and central limit theorem. Sampling methods, estimation of parameters, testing of hypotheses.

Prerequisite: 1 course with a minimum grade of C- from (MATH131, MATH141); or students who have taken courses with comparable content may contact the department.

Cross-listed with: DATA400.

Credit Only Granted for: DATA400, ENEE324, or STAT400.

Additional Information: Not acceptable toward graduate degrees in MATH/STAT/AMSC.

STAT401 Applied Probability and Statistics II (3 Credits)

Point estimation - unbiased and consistent estimators. Interval estimation. Minimum variance and maximum likelihood estimators. Testing of hypotheses. Regression, correlation and analysis of variance. Sampling distributions. Elements of non-parametric methods.

Prerequisite: 1 course with a minimum grade of C- from (STAT400, STAT410).

Additional Information: Not acceptable toward graduate degrees in MATH/STAT/AMSC.

STAT410 Introduction to Probability Theory (3 Credits)

Probability and its properties. Random variables and distribution functions in one and several dimensions. Moments. Characteristic functions. Limit theorems.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241).

Cross-listed with: SURV410.

Credit Only Granted for: STAT410 or SURV410.

STAT420 Theory and Methods of Statistics (3 Credits)

Point estimation, sufficiency, completeness, Cramer-Rao inequality, maximum likelihood. Confidence intervals for parameters of normal distribution. Hypothesis testing, most powerful tests, likelihood ratio tests. Chi-square tests, analysis of variance, regression, correlation. Nonparametric methods.

Prerequisite: 1 course with a minimum grade of C- from (SURV410, STAT410).

Cross-listed with: SURV420.

Credit Only Granted for: STAT420 or SURV420.

STAT422 Probability Models (3 Credits)

Random variables, Joint Distributions, Hierarchical Models, Random Samples, Algorithms for generating samples, Markov Chains, Poisson Processes, Stochastic Processes, Simulations.

Prerequisite: STAT400 or STAT410.

Credit Only Granted for: STAT498J or STAT422.

Formerly: STAT498J.

STAT426 Introduction to Data Science and Machine Learning (3 Credits)

An introductory course to the recent developments in the fields of data science and machine learning. Emphasis will be given to mathematical and statistical understanding of commonly used methods and processes.

Prerequisite: Minimum grade of C- in MATH241 or MATH340; and minimum grade of C- in MATH240, MATH461 or MATH341; and minimum grade of C- in STAT400 or STAT410; students who have taken courses with content comparable to STAT400/410 may request permission of the instructor.

Credit Only Granted for: STAT426 or CMSC320.

STAT430 Introduction to Statistical Computing with SAS (3 Credits)

Descriptive and inferential statistics. SAS software: numerical and graphical data summaries; merging, sorting and splitting data sets. Least squares, regression, graphics and informal diagnostics, interpreting results. Categorical data, lifetime data, time series. Applications to engineering, life science, business and social science.

Prerequisite: 1 course with a minimum grade of C- from (STAT400, STAT410); and must have completed or be concurrently enrolled in STAT401 or STAT420; students who do not meet the STAT401 or STAT420 requirement but who have taken a statistics course may contact the math department to confirm eligibility.

STAT440 Sampling Theory (3 Credits)

Simple random sampling. Sampling for proportions. Estimation of sample size. Sampling with varying probabilities. Sampling: stratified, systematic, cluster, double, sequential, incomplete.

Prerequisite: 1 course with a minimum grade of C- from (STAT401, STAT420).

Credit Only Granted for: STAT440 or SURV440.

STAT464 Introduction to Biostatistics (3 Credits)

Probabilistic models. Sampling. Some applications of probability in genetics. Experimental designs. Estimation of effects of treatments. Comparative experiments. Fisher-Irwin test. Wilcoxon tests for paired comparisons.

Prerequisite: Must have completed one semester of calculus.

Restriction: Junior standing or higher.

Credit Only Granted for: BIOE372 or STAT464.

Additional Information: Not acceptable toward degrees in MATH/STAT.

STAT470 Actuarial Mathematics (3 Credits)

Major mathematical ideas involved in calculation of life insurance premiums, including compound interest and present valuation of future income streams; probability distribution and expected values derived from life tables; the interpolation of probability distributions from values estimated at one-year multiples; the 'Law of Large Numbers' describing the regular probabilistic behavior of large populations of independent individuals; and the detailed calculation of expected present values arising in insurance problems.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241).

Recommended: STAT400.

STAT498 Selected Topics in Statistics (1-6 Credits)

Topics of special interest to advanced undergraduate students will be offered occasionally under the general guidance of the MATH/STAT major committee. Students register for reading in statistics under this number.

Restriction: Permission of CMNS-Mathematics department.

Repeatable to: 16 credits.

SURV - Survey and Data Science

SURV400 Fundamentals of Survey and Data Science (3 Credits)

The course introduces the student to a set of principles of survey and data science that are the basis of standard practices in these fields. The course exposes the student to key terminology and concepts of collecting and analyzing data from surveys and other data sources to gain insights and to test hypotheses about the nature of human and social behavior and interaction. It will also present a framework that will allow the student to evaluate the influence of different error sources on the quality of data.

Prerequisite: STAT100; or permission of BSOS-Joint Program in Survey Methodology department.

Restriction: Course open to SURV certificate students, SURV Advanced Special Students, and SURV undergraduate minors. Graduate students from other departments may enroll with permission from the department.

Credit Only Granted for: SURV699M or SURV400.

Formerly: SURV699M.

SURV410 Introduction to Probability Theory (3 Credits)

Probability and its properties. Random variables and distribution functions in one and several dimensions. Moments. Characteristic functions. Limit theorems.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH340, MATH241).

Cross-listed with: STAT410.

Credit Only Granted for: STAT410 or SURV410.

SURV420 Theory and Methods of Statistics (3 Credits)

Point estimation, sufficiency, completeness, Cramer-Rao inequality, maximum likelihood. Confidence intervals for parameters of normal distribution. Hypothesis testing, most powerful tests, likelihood ratio tests. Chi-square tests, analysis of variance, regression, correlation. Nonparametric methods.

Prerequisite: 1 course with a minimum grade of C- from (SURV410, STAT410).

Cross-listed with: STAT420.

Credit Only Granted for: STAT420 or SURV420.

SURV430 Fundamentals of Questionnaire Design (3 Credits)

Introduction to the scientific literature on the design, testing and evaluation of survey questionnaires, together with hands-on application of the methods discussed in class.

Restriction: Permission of BSOS-Joint Program in Survey Methodology department.

Credit Only Granted for: SURV430 or SURV630.

SURV440 Sampling Theory (3 Credits)

Simple random sampling, sampling for proportions, estimation of sample size, sampling with varying probabilities of selection, stratification, systematic selection, cluster sampling, double sampling, and sequential sampling.

Prerequisite: STAT401 or STAT420.

Credit Only Granted for: STAT440 or SURV440.

TDPS - Theatre, Dance and Performance Studies

TDPS201 Introduction to Technical Production (3 Credits)

Students are provided with an overview of topics related to the technical production of theatre and dance including: scenic, prop and costume construction, lighting, sound and video execution and management structures.

Restriction: Must be in a major within the ARHU-Dance department; or must be in a major within the ARHU-Theatre department.

Credit Only Granted for: DANC210 and THET114 or TDPS201.

Formerly: DANC210 and THET114.

TDPS240 Arts Organizations and Audiences in the United States (3 Credits)

An introduction to the history and role of arts organizations in the U.S., as well as the respective audiences and populations they serve. This grounding allows artists and emerging administrators to understand the events and questions that have shaped the field, and develop strategies for advancing sustainable arts organizations in the future.

Cross-listed with: ARHU240.

Credit Only Granted for: TDPS258C, TDSP240 or ARHU240.

Formerly: TDPS258C.

TDPS258 Special Topics in Introductory Performing Arts (1-3 Credits)

Designed for performing arts students. Offers instruction at the introductory level in various aspects of performance such as Voice for the Performing Arts, Movement for the Performing Arts, Acting for the Performing Arts, Partner Dance and a myriad of specific aspects within these genres.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 9 credits if content differs.

TDPS358 Special Topics in Intermediate Performing Arts (1-3 Credits)

Designed for performing arts students. Offers instruction at the intermediate level in various aspects of performance such as Voice for the Performing Arts, Movement for the Performing Arts, Acting for the Performing Arts, Partner Dance and a myriad of specific aspects within these genres.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 9 credits if content differs.

TDPS358A Theatre and Dance in Iran and Afghanistan (3 Credits)

Students will learn about stories, plays, and movements in Iran and Afghanistan from past to present. Through watching performances, readings, and discussions, we explore the relationship between storytelling, body, space, and power in forming and performing identity and life experiences. Looking at case studies from traditional, popular, and western style dance and theater are an exciting part of the course.

Note: This course requires no prior knowledge of Persian culture or dance and theatre studies on the part of the students.

Cross-listed with: PERS385, THET328W.

Repeatable to: 3 credits if content differs.

Credit Only Granted for: TDPS358A, THET328W, PERS398A, or PERS385.

Formerly: PERS398A.

TDPS362 Alexander Technique (1-3 Credits)

Based on the F.M. Alexander Technique, students will learn to recognize habit patterns that interfere with how they function and express themselves so that they can make conscious choices as a performing artist.

Prerequisite: THET222, THET116, THET223, and TDPS201; or (DANC218 and DANC219). And permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET399J, THET362 or TDPS362.

Formerly: THET399J and THET362.

TDPS408 Seminar in Theory and Practice of Critical Difference (3 Credits)

This interdisciplinary seminar examines expressive culture as performed in works of dance, theatre, music, and digital media.

Repeatable to: 6 credits if content differs.

TDPS440 Arts Leadership Seminar (3 Credits)

An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.

Cross-listed with: ARHU440.

Credit Only Granted for: TDPS440 or ARHU440.

TDPS441 Arts Entrepreneurship: Theory and Practice (3 Credits)

Establishes arts entrepreneurship as a unique discipline with the goal of connecting creative initiatives (products, artforms, and programs) to audiences, resources, and communities. Introduces students to the ways in which creative initiatives both create value and offer solutions to social, political, environmental, and cultural issues. Students will develop artist impact statements and identify different contexts and ways to apply their talents and creative initiatives in society.

Prerequisite: ARHU240 or TDPS240; or permission of instructor.

Recommended: ARHU440 or TDPS440.

Cross-listed with: ARHU441.

Jointly offered with: ARHU640, TDPS640.

Restriction: Limited to 4 undergraduate students (2 in ARHU and 2 in TDPS).

Credit Only Granted for: TDPS458E, ARHU441, TDPS441, ARHU640 or TDSP640.

Formerly: TDPS458E.

TDPS458 Special Topics in Advanced Performing Arts (1-3 Credits)

Designed for performing arts students. Offers instruction at an advanced level in various aspects of performance such as Voice for the Performing Arts, Movement for the Performing Arts, Acting for the Performing Arts, Partner Dance and a myriad of specific aspects within these genres.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 9 credits if content differs.

TDPS469 Advanced Practicum in Stage Management (1-3 Credits)

A graded course in stage management for theatre and/or dance productions. A hands-on laboratory experience.

Prerequisite: Minimum of 2 credits from TDPS479.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 9 credits.

TDPS470 Production Management (3 Credits)

To familiarize students with techniques and skills required of a Production Manager in a theatrical production. Focus will also be given to the field of event management.

Prerequisite: TDPS201, THET222, THET223, and THET116; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

TDPS479 Production Practicum (1-3 Credits)

A graded course in a specified practical aspect of mounting a theatre or dance production. It is a hands-on, purely laboratory experience.

Prerequisite: TDPS201.

Repeatable to: 10 credits if content differs.

Credit Only Granted for: TDPS479 or THET479.

Formerly: THET479.

THET - Theatre

THET110 Introduction to the Theatre (3 Credits)

In the age of pop music and blockbuster films, of memes and viral videos, we often forget that theatre was one of the original forms of popular entertainment. We will focus on theatre practitioners including actors, directors, designers and backstage personnel to understand how theatre is produced. We will also consider popular entertainment in Europe and America, with a particular focus on musical theatre and Broadway to explore how theatre communicates, resonates, and remains relevant to all audiences.

THET116 Fundamentals of Theatrical Design (3 Credits)

Examines theatre as an environmental art that is realized through collaboration between set, costume, and lighting designers.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET120 Introduction to Acting (3 Credits)

Through scene study, exercises, and improvisation, an appreciation is developed for the working habits of actors, which will aid them in rehearsal as well as performance.

Restriction: Must not be in Theatre program.

THET199 Independent Study (1-3 Credits)

An independent study in which each student completes an assigned major theatre project under close faculty supervision. Projects may culminate with term papers, scenic, lighting, or costume designs, or a stage production.

Restriction: Permission of instructor; and freshman standing.

Repeatable to: 6 credits if content differs.

THET222 Foundations of Acting and Performance (3 Credits)

Students will become familiar with the tools and process of acting through the discipline of acting exercises, analyzing character and performing. Students will research various theatre artists that have contributed to the acting process. Through monologue and scene work students will learn listening skills, communicative, collaborative and embodiment skills and will learn how to use the self in the imaginative process and research. And, most importantly, students will learn creative process through practice.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET223 Text and Context in Western Theatre (3 Credits)

Introduction to the analysis and critique of the play script. Students will have the opportunity to read, analyze, and interpret western dramatic literature from a range of periods and styles. Texts are analyzed from a variety of theatrical analytical perspectives, with an eye towards choices theatre artists must make in the creation of a theatrical production.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET228 Special Topics in Introduction Theatre and Performance (1-3 Credits)

This course is offered as part of the TDPS Artist-in-Residence program. Topics covered may include: Intercultural Theatre; Performance Art; Puppetry; Solo Performance; or Theatrical Design.

Prerequisite: THET114 or TDPS201; and (THET116, THET222, and THET223); and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 3 credits if content differs.

THET251 Broadway Mashup: Remixing America Through Musical Theater (3 Credits)

Interrogate musical theater's political history, investigating how this uniquely American genre uses narrative, song, and dance to weave critical differences across race, ethnicity, immigration status, religion, gender, sexuality, and ability into our national fabric.

THET269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

THET274 Introduction to Stage Management (3 Credits)

Familiarization with the techniques and skills required of a Stage Manager in a theatrical production, including organization, production meetings, rehearsals, tech and running a show. The outcome at the conclusion of the course is the ability to function as an Assistant Stage Manager in a supervised situation.

Prerequisite: THET114 or TDPS201; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET279 Theatre Workshop I (1 Credit)

Supervised participation in backstage staffing of University Theatre productions.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

THET282 Stage Makeup (3 Credits)

Students learn to design and execute character makeup based on research and script analysis. Studying fundamental facial anatomy, the class learns to manipulate light and shadow with makeup to enhance and alter the shape of facial features. Once these techniques are mastered, the class moves on to more complex exercises, including Old Age, Facial Hair, Wounds and Fantasy.

THET284 Stage Costume Construction I (3 Credits)

Study and practical experience in garment construction and related costume crafts as used in theatre costume design. Flat pattern development, corset construction, theatrical sewing techniques and organization of the costume construction process.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET285 The Art of Communication and Presentation (3 Credits)

An introduction to the fundamental practice and theory of public speaking and oral communication using theatrical techniques of both performance and the craft of storytelling.

Credit Only Granted for: COMM107, COMM200, INAG110, JOUR130, or THET285.

THET286 Experiential Learning I (1-3 Credits)

Introductory internship in theatre. Constructed to help students in their sophomore year gain practical experience in a supportive work environment in the theatre. Student must research and propose internship to a Faculty Advisor and Internship Venue.

Prerequisite: THET222, THET223, and THET116. And THET114; or TDPS201. And permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET287 Subversive Cultures and Performance (3 Credits)

Every society has rebels - those who refuse to conform to the mainstream's rigid rules, aesthetics, and beliefs. From unruly skateboarders, punk rockers, bohemian poets, and radical theater performers, to national revolutionary movements and brick-throwing anarchists - such groups form niches that are defined by their exclusion from society. We will look at how their beliefs and actions fit into a particular historical context, and how their actions drive social change.

Credit Only Granted for: THET289I or THET287.

Formerly: THET289I.

THET290 History Plays: From Conquest to Contemporary American Theatre (3 Credits)

Investigates the braided relationship between American history, theatre, and race. In this course, students will destabilize their understandings of each of these three terms by exploring them from two vantage points: from the point of view of historic American plays, and from the vantage of contemporary American "history plays" – plays that draw on America's past to rewrite its future. Using the lens of Omi & Winant's theory of racial projects, students will explore how theatrical performances of racial difference from 1600 to 1900 were instrumental in crafting American ideologies, identities, and the nation state itself. The class will then telegraph through history to consider each historical play in dialogue with a contemporary "history play." Theatre 290 intentionally pivots between the past and present, page and stage, the political arena and the public sphere in order to demonstrate how America, theatre, and race consistently make and remake one another. The class emphasizes intersectional theories of race, and considers race alongside categories of gender and (dis)ability.

Recommended: THET110 and THET223 .

THET293 Black Theatre and Performance I (3 Credits)

Thematic and historical survey of African-American drama from the late nineteenth century to the 1960s. Emphasis on sociopolitical context, thematic thrust, issues, styles, the aesthetic reflected in the work, impact on African-American and general theatre audiences.

THET294 Black Theatre and Performance II (3 Credits)

Thematic and historical survey of African-American drama from the 1960s to the present. Emphasis on sociopolitical context, thematic thrust, issues, styles, the aesthetic reflected in the work, impact on African-American and general theatre audiences.

Restriction: Sophomore standing or higher.

THET299 Independent Study (1-3 Credits)

An independent study in which each student completes an assigned major theatre project under close faculty supervision. Projects may culminate with term papers; scenic, lighting, or costume designs; or a stage production.

Restriction: Permission of instructor; and sophomore standing or higher.
Repeatable to: 6 credits if content differs.

THET310 Voice for the Actor I (3 Credits)

Freeing the natural voice. In-depth experience of connection of actor's voice to thought, impulse and emotion. Tools for releasing tension, increasing resonance and range, and refining articulation will be explored.

Prerequisite: THET116, THET222, THET223, and TDPS201; and must Interview; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Sophomore standing or higher.

THET324 Character Development (3 Credits)

European-based physical approach to acting. Primary focus on character development, may include creating original characters and learning how to bring to life an already scripted character. Techniques to explore the soul and psychology of characters and their physical qualities, voice, rhythm and movement.

Prerequisite: Must have completed or be concurrently enrolled in THET310 and THET362; or permission of Instructor. And must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

THET325 Actor's Process I (3 Credits)

Focus on use of self in creating character. Tools employed include decision-making and use of imagery, personalization, objectives, adjectives, and verbs.

Prerequisite: Must have completed or be concurrently enrolled in THET310; or permission of Instructor. And must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET326 Viewpoints (3 Credits)

Viewpoints is a movement-based performance course for students who already have a foundation in the basics of acting and/or dance. The Viewpoints are a set of tools and vocabulary; using 9 categories of time and space, students will fully explore the possibilities of using their physical instruments (the body) to their fullest on stage.

Prerequisite: THET222, THET223, THET116, and TDPS201; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET328V or THET326.

Formerly: THET328V.

THET328 Special Topics in Intermediate Theatre and Performance (1-3 Credits)

Topics covered include: Intercultural Theatre, Performance Art, Puppetry, Solo Performance, or Theatrical Design.

Prerequisite: THET222, THET223, and THET116; and (THET114 or TDPS201); and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

Repeatable to: 3 credits if content differs.

THET328W Theatre and Dance in Iran and Afghanistan (3 Credits)

Students will learn about stories, plays, and movements in Iran and Afghanistan from past to present. Through watching performances, readings, and discussions, we explore the relationship between storytelling, body, space, and power in forming and performing identity and life experiences. Looking at case studies from traditional, popular, and western style dance and theater are an exciting part of the course. Note: This course requires no prior knowledge of Persian culture or dance and theatre studies on the part of the students.

Cross-listed with: PERS385, TDPS358A.

Repeatable to: 3 credits if content differs.

Credit Only Granted for: TDPS358A, THET328W, PERS398A, or PERS385.

Formerly: PERS398A.

THET330 Play Directing I (3 Credits)

A lecture-laboratory course dealing with the techniques of coordinating, designing and guiding the production of a script through to performance. Study and practice in stage composition, movement, pacing, script and character analysis, and rehearsal routines. Emphasis on methods of communicating a script to an audience.

Prerequisite: THET222, THET223, and THET116. And THET114; or TDPS201. And permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

THET351 Musical Theatre I (3 Credits)

An introduction for students interested in developing their skills with musical theatre, specifically the work of the actor interpreting songs and text in musicals. With a primary focus on American Musical Theatre repertoire, students will prepare and present various solo, duet, and group numbers.

Credit Only Granted for: THET351 or THET328M.

Formerly: THET328M.

THET360 Voice Archetypes (3 Credits)

The student will learn how to apply archetypal characters and expand performance potentialities, increase vocal self knowledge, discover rhythms, pitch variations, and sounds that reflect inner states of being.

Prerequisite: THET310 and THET362; and must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET360 or THET399Z.

Formerly: THET399Z.

THET363 The Business of the Business (3 Credits)

An in depth study of the business of working in the theatre. Explores early career opportunities and entry-level positions in the entertainment industry. Analyzes publicity, management, union, casting, and agency practices; how they apply to you and your career in the non-profit and commercial theatre.

Prerequisite: THET116, THET222, THET223, and TDPS201; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET399B or THET499E or THET363.

Formerly: THET399B, THET499E.

THET369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

THET371 Scenic Design I (3 Credits)

A study of design theory and style. Methods and techniques of coordination of all elements of scenic design for theatre.

Prerequisite: THET222, THET223, and THET116; and (THET114; or TDPS201). Or permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET372 Stage Property Design (3 Credits)

Materials and techniques for the design and execution of stage properties with special emphasis on period research, special materials, and special effects.

Prerequisite: THET114; or TDPS201; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET377 Lighting Design for Performance (3 Credits)

A study of the theories of electrification, instruments, design, color, and control for the stage. Practical work on productions.

Prerequisite: THET222, THET223, THET116, and TDPS201; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET380 Sound Design (3 Credits)

Theatre Sound Design is a first course in designing sound for stage productions.

Prerequisite: THET116. And THET114; or TDPS201; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Sophomore standing or higher.

THET383 Costume Design I (3 Credits)

Basic principles of theatre costume design and introduction to rendering skills. Emphasis on development of design conception, unity, character statement, basic clothing design and period style adaptation.

Prerequisite: TDPS201 or THET114; and (THET116, THET222, and THET223). Or permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET384 Stage Costume Construction II (3 Credits)

Study and practical experience in the construction of stage costumes, props and accessories. Pattern development by draping, millinery, and crafts.

Prerequisite: THET284; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET384 or THET487.

Formerly: THET487.

THET385 Media Design (3 Credits)

Focuses on learning the grammar and conceptual thinking behind multimedia design for live performance. Students will learn how our new multimedia tools can enhance the sense of liveness as well as explore the different ways in which technology can be implemented into preproduction thinking, rehearsal experimenting, and ultimately, effective use in performance.

Prerequisite: THET222, THET223, THET116, and TDPS201; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET399D or THET385.

Formerly: THET399D.

THET386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET388 Special Topics in Performance Studies (3 Credits)

Performance Studies is a broad discipline that offers strategies for exploring diverse texts from diverse perspectives. Students are encouraged to explore critical and practical approaches to research and performance, including the History and Practice of Festivals and Carnival Performances, Comedy, Performance in Everyday Life, Contemporary Theatre at the Margins, and Stage Adaptation.

Prerequisite: THET222, THET223, THET116, THET114, or TDPS201; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Sophomore standing or higher.

Repeatable to: 6 credits if content differs.

THET390 History of Theatre I (3 Credits)

The history of Western theatre from its origins in classical antiquity through the mid-seventeenth century with emphasis on plays and playwrights, architecture and decor, acting and costuming, and significant personalities. Includes explorations of interrelationships between Western theatre and the theatre of other cultures.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET391 Theatre History II (3 Credits)

The history of Western theatre from the mid seventeenth century to the early twentieth century, with emphasis on plays and playwrights, architecture and decor, acting and costuming, and significant personalities. Includes explorations of interrelationships between Western theatre and the theatre of other cultures.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET399 Independent Study (1-3 Credits)

An independent study in which each student completes an assigned major theatre project under close faculty supervision. Projects may culminate in term papers, scenic; lighting, or costume designs; or a stage production.

Restriction: Permission of instructor; and junior standing or higher.

Repeatable to: 6 credits if content differs.

THET408 Seminar: Theory and Performance Studies (3 Credits)

Studies in theatre theory and performance studies from classical antiquity to the present.

Repeatable to: 12 credits if content differs.

THET411 Voice for the Actor II (3 Credits)

Learn the International Phonetic Alphabet (IPA) and apply to exploration of sound and language. Designed to increase voice and speech awareness, and create a base knowledge from which to approach any accent or dialect.

Prerequisite: THET324 or THET325; and must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

Credit Only Granted for: THET311, THET411, or THET499L.

Formerly: THET311.

THET420 Language and the Actor (3 Credits)

Explores the actor's relationship to language, particularly heightened poetic language, in order to: develop the ability to embody language and vocally and physically project the images; apply an intellectual understanding of the inherent structural, poetic, and rhetorical techniques of heightened language in combination with action theory; and access the inner states of character while expressing them through text.

Prerequisite: THET325 or THET324; and must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET424 Movement II: Advanced Studies in Movement and Mask Theatre (3 Credits)

A deeper exploration of how to use the actor's instrument for dramatic expression. Continuing work in the F.M. Alexander Technique and foundational exercise to help actors learn what they need to prepare for rehearsal and performance. Other techniques may include theatrical styles, physical character, dramatic use and play with space and rhythm and masks.

Prerequisite: THET325 or THET324; and must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

THET425 Actor's Process II (3 Credits)

A deeper exploration of the work begun in THET325. A continuation of creating a personal process through which the actor can confidently approach any genre of play. Special focus on status and subtext and the world of the playwright.

Prerequisite: THET325; and must audition; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET426 Theatrical Clown (3 Credits)

Progression of developing individual clown characters through methods based on European pedagogy which emphasizes a physical and technical approach to actor training.

Prerequisite: THET324 or THET325; and must Audition.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET426, THET499C or THET 499O.

Formerly: THET499C, THET499O or THET426.

THET428 Special Topics in Advanced Theatre and Performance (1-3 Credits)

This course is offered as part of the School of Theatre, Dance, and Performance Studies' Artist in Residence program. Topics covered may include: Intercultural Theatre; Performance Art; Puppetry; Solo Performance; or Theatrical Design.

Prerequisite: THET114 or TDPS201; and (THET116, THET222, and THET223); and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Junior standing or higher.

Repeatable to: 3 credits if content differs.

Additional Information: Incorporate the change from THET 114 to TDPS 201, listing both numbers, as students will take the prerequisite under either number. To change the catalog description to reflect the proper unit name as the School of Theatre, Dance, and Performance Studies.

THET429 Actor's Studio (1-3 Credits)

Participation in dramatic roles executed under faculty supervision in the department's productions. Eligible students must make commitments and plan performances with course instructor during pre-registration.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 10 credits.

THET435 Advanced Costume Construction (3 Credits)

The course is taught in a presentation/practical application format. Students will learn advanced techniques in draping and pattern development and develop proficiency in communication of design and construction choices.

Prerequisite: THET284 and THET384; and portfolio review; and permission of ARHU-School of Theatre, Dance & Performance Studies department. Jointly offered with THET635.

Credit Only Granted for: THET435, THET499 K, THET635, or THET669K.

Formerly: THET499K and THET669K.

THET440 Advanced Playwriting (3 Credits)

Ensemble-based writer's workshop. It is the second part of a two-course sequence and is designed for students who already have a foundation in the basics of playwriting or who are otherwise well-versed in the art of theatre and dramatic structure. Through exploratory writing sequences, the reading of full-length plays, and in-class readings of work-in-progress, students will continue to deepen their craft and develop the script for a new full-length play.

Prerequisite: THET340; or permission of instructor. And permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Credit Only Granted for: THET440 or THET499P.

Formerly: THET499P.

THET451 Musical Theatre Workshop I (3 Credits)

Development of the ability to move, act and express through the media of lyric and music.

Prerequisite: Must audition.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET452 Musical Theatre Workshop II (3 Credits)

Development of the ability to move, act and express through the media of lyric and music from the integrated musicals of the 1960s through the development of concert and rock/pop musicals.

Prerequisite: Must audition.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET465 History of Fashion for the Theatre (3 Credits)

A survey of Western clothing from the Ancient Worlds through 20th Century. A discussion of the cultural contexts of various trends in fashion through an examination of art, industry and textiles.

Prerequisite: THET116; or permission of instructor.

Restriction: Sophomore standing or higher.

THET469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

THET471 Design Studio in Scenery (3 Credits)

Advanced study of scenic design for the theatre. Particular design projects will vary.

Prerequisite: THET371; and permission of ARHU-School of Theatre, Dance & Performance Studies department. Jointly offered with THET639.

Credit Only Granted for: THET471 or THET639.

THET472 Scene Painting (3 Credits)

Scene painting techniques and materials. Three-dimensional realistic scenery and non-realistic two-dimensional projects.

Prerequisite: THET114 or TDPS201; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

THET473 Rendering for the Theatre II (3 Credits)

Continued study in rendering techniques and graphic skills for theatrical design presentation. Emphasis on style, technique and use of different artistic media.

Prerequisite: THET373; or permission of instructor.

THET474 Advanced Stage Management (3 Credits)

Intensive practical study of the techniques and procedures for stage management.

Prerequisite: THET114 or TDPS201; and (THET116, THET222, THET223, and THET274); and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department; and sophomore standing or higher.

THET475 History of Art, Architecture, and Decor for the Theatre (3 Credits)

Study of Western art, architecture, and decor and their practical application to theatrical production.

Prerequisite: THET114 or TDPS201; and (THET116, THET222, and THET223); and permission of ARHU-School of Theatre, Dance & Performance Studies department. Jointly offered with THET670.

Credit Only Granted for: THET475 or THET670.

THET477 Design Studio in Lighting (3 Credits)

Designed for students who have successfully completed THET377 and wish to further develop their lighting design skills. Emphasis is on theoretical design of productions and realized light lab projects. Particular design projects will vary.

Prerequisite: THET377; and permission of ARHU-School of Theatre, Dance & Performance Studies department. Jointly offered with THET659.

Credit Only Granted for: THET477 or THET659.

THET479 Production Practicum (1-3 Credits)

Designed to expand students' practical knowledge and skills through working on Department of Theatre productions.

Prerequisite: THET116 and THET114; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

THET480 Advanced Sound Design (3 Credits)

Students will dive deeper into the technical elements of sound design, developing a working understanding of both software editing tools as well as the primary components of a live sound system.

Prerequisite: THET380 and permission of the School of Theatre, Dance, and Performance Studies.

THET481 Theatre Graphics II: Computer Assisted Design (3 Credits)

Study and practical application of computer generated graphical design for use in theatrical production.

Prerequisite: THET114 or TDPS201; and THET116; and permission of ARHU-Theatre department.

Restriction: Sophomore standing or higher.

THET482 Scene Painting II (3 Credits)

Advanced study of theatrical scenic painting.

Prerequisite: THET472; or permission of instructor.

Restriction: Sophomore standing or higher.

THET488 Special Topics in Theatre History Before 1800 (3 Credits)

Topics in the history of world theatre and performance from the Greeks through 1800.

Repeatable to: 12 credits if content differs.

THET489 Special Topics in Theatre History from 1800 to Present (3 Credits)

Topics in the history of world theatre and performance from 1800 to present.

Repeatable to: 12 credits if content differs.

THET491 Theatrical Rendering Using Photoshop (3 Credits)

A studio course in rendering for the theatre. The course focuses primarily on traditional approaches to perspective drawing, space, texture, color and lighting rendering using Photoshop. Photoshop tools and techniques; preparing three-dimensional objects for accurate rendering; and techniques for Photoshop rendering and lighting of three-dimensional objects and architectural forms. This class primarily has an emphasis on rendering/uses for scenic design.

Prerequisite: THET471.

Credit Only Granted for: THET491 or THET4280.

Formerly: THET4280.

THET497 Non-Traditional Theatre (3 Credits)

Seminar exploring American and European experimental performance since 1960. Topics include experimental theatre, performance art, pornography and performance, gender and performance, and popular culture and performance. Topics are treated historically and theoretically. Student-produced performance projects are an important component of the seminar.

THET498 Seminar: Theatre History (3 Credits)

Studies in theatre history from classical antiquity to the present.

Prerequisite: THET488 or THET489.

Restriction: Senior standing; and permission of instructor.

Repeatable to: 6 credits if content differs. Jointly offered with THET698.

Credit Only Granted for: THET498 or THET6 98.

THET499 Independent Study (1-3 Credits)

An independent study course in which each student completes an assigned major theatre project under close faculty supervision. Projects may culminate with term papers, scenic or costume designs, or a stage production.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

THEX - Theatre Education Abroad

THEX100 London/Culture/Performance (3 Credits)

Introduces students to aspects of London's cultural resources and history and explores London as a performance site. Examines current issues in cultural politics and engages with the vast cultural resources, history, and global connections of London through analysis of a range of texts, performances and events, and sites around London.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX101 Theatre and Performance in North America (3 Credits)

Studies contemporary drama and live art from countries including the United States, Canada, and Mexico. Explores how forms of and approaches to performance spread across a region and the globe through seminar discussions, readings, film, and television. Analyzes various performance styles and traditions including Indigenous performance, intercultural theatre, and Latinx theatre.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX102 London: Walking the City (3 Credits)

What is a city? This course asks students to consider the different ways that we might define a city and to explore different perspectives on London inflected by mobility, migration, class and gender. Through reading a range of literary and theoretical texts, as well as walking lectures, students will develop an understanding of the role of literature, performance and cultural institutions in producing and contesting urban experience.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX300 Race and Racism in Performance (3 Credits)

Explores how race is performed in theater, art, and popular culture.

Examines questions about racism in performance casting and practices.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX301 Voice, Gender, Performance (3 Credits)

How do people use their voices, and what does this reveal or conceal about their gendered identities? How do gendered voices intersect with other aspects of identity, such as region, class, nation and race? This course explores how gender is voices in a variety of different spaces by drawing on theoretical material from a range of disciplinary fields, including cultural philosophy, sociolinguistics, film studies, and psychology while equipping students to use the voice creatively through mixed learning methods and attendance at exhibitions and performances.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX302 Show Business: Theatre and Capitalism (3 Credits)

Explores the relationship between theater and capitalism through the examination of key economic problems as they arise in the theater (e.g. "star" performers, box office, theater as entertainment, theater as a "creative industry," theater and real estate). Considers how performance offers a distinctive lens through which to think about broader movements (e.g. neoliberalism, globalization, urban development) that have become central to our everyday lives.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX303 Live Art: Then and Now (3 Credits)

Explores the recent history of Live Art, from the 1970s to the present via the study of significant as well as overlooked artists through audiovisual documentation, oral histories/interviews, and artists' writings, as well as significant scholarship and criticism in the field. Students will analyze performances and gain perspective on key themes for the study of Live Art, including (but not limited to) sexuality, gender, race and ethnicity, the blurring of art and life, extremity, duration, protest, and social engagement.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX304 Scriptwriting: Creativity and Technique (6 Credits)

Delves into the world of scriptwriting through production of an original script and analysis of filmed scripts. Explores the context around reading scripts as well as how to write a short original film script with coherent dialogue, exposition and structure.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

THEX305 The History of Emotions (3 Credits)

We live in an era of angry voters, weeping celebrities, and governments intent on measuring happiness. The course explores the histories of feelings, emotions and passions through the study of a wide range of examples and case studies, and examines many different historical types, including intellectual history, gender history, cultural history, social history, religious history, the history of art, and the histories of science and medicine.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

TLPL - Teaching and Learning, Policy and Leadership

TLPL101 Inquiry Approach to Teaching STEM (Step 1) (1 Credit)

Explore STEM teaching and learning and classroom complexity, and develop teaching skills through discussion-based, collaborative class sessions, and experiences in local schools. To explore/understand the fundamentals of inquiry teaching, students will observe, plan and teach student-centered lessons.

Additional Information: Students must allow for a three-hour window between 7:45 AM and 3:15 PM in their schedule for field experiences in a local school 3-4 times during the semester. A background check is required and will be facilitated by the Terrapin Teacher program coordinator.

TLPL102 Inquiry Teaching of STEM in Middle School (2 Credits)

Second course in the Terrapin Teachers teacher preparation sequence. Students gain field experience and continue exploring teaching as a career by conducting teacher observations, and planning and implementing lessons in local, high-need middle school classrooms. Students work closely with UM master teachers to build upon the inquiry-based teaching practices developed in TLPL 101. Students work with mathematics and science curricula while attending to state and district standards, in order to develop and enact lessons that are responsive to students' reasoning in math and science.

Prerequisite: Must have completed TLPL101.

Additional Information: Attendance at each class session will be vital to student success in the course. To complete the observations and lessons, students must allow a three hour block of time during the local middle school operational hours from 7:45 am to 3:15 pm. A background check is required.

TLPL200 Exploring Teaching as a Career (3 Credits)

Weekly participation as a volunteer tutor in a local school or community program with children or adolescents. Regular campus meetings assist with developing teaching skills and insight.

Credit Only Granted for: EDCI210 or TLPL200.

Formerly: EDCI210.

TLPL202 Good Stories: Teaching Narratives for Peace and Justice (3 Credits)

Through the study and use of oral storytelling and digital technologies explore qualities and characteristics of what makes a good story and how stories can be used to advance peace and justice on both individual and social levels.

Credit Only Granted for: EDCI246 or TLPL202.

Formerly: EDCI246.

TLPL204 Latino and Black Schooling: A History (3 Credits)

The historical, cultural, political and socio-economic factors that shape the school experience and achievement (Kindergarten - college) of Latinos and Blacks in the U.S.

Credit Only Granted for: EDCI286 or TLPL204.

Formerly: EDCI286.

TLPL206 Forbidden Books: Censorship of Children's and Young Adult Literature (3 Credits)

What is the relationship between censorship and intellectual freedom? This course examines the history of censorship from Plato to Fake News with a focus on contemporary censorship analyzed through historical, political, ethical, moral, philosophical, and socio-cultural perspectives. We consider the evolving definition of censorship, forms of censorship, the rationalizations and arguments for censorship, and the consequences and unintended results of censorship.

Credit Only Granted for: TLPL288W or TLPL206.

Formerly: TLPL288W.

TLPL210 Childhood Reimagined: Learning In and Out of Schools (3 Credits)

Surveys innovative approaches to child education, including unschooling, homeschooling, blended instruction, place-based learning, Big Picture Learning, democratic schools, microschoools, self-directed learning centers, and other alternatives to traditional schools.

Credit Only Granted for: TLPL288K or TLPL210.

Formerly: TLPL288K.

TLPL250 Historical and Philosophical Perspectives on Education (3 Credits)

An examination of illustrative historical and philosophical examples of the interplay of ideas and events in the shaping of educational aims and practices from ancient cultures to modern technological societies.

Credit Only Granted for: EDPS210 or TLPL250.

Formerly: EDPS210.

TLPL251 Community, Learners, and Classroom Climate (3 Credits)

Focuses on classroom community building as an ethic of caring for students and examines the connection between classroom climate and learning. Topics include students' funds of knowledge, social-emotional competency, and the practices that maintain a safe and inclusive classroom climate. Wellness strategies to support teacher resilience are also addressed.

Additional Information: This course has a field component in a local elementary school.

TLPL252 Students, Schooling, and Communities (3 Credits)

Facilitates pre-service teachers' initial look at their personal backgrounds and the ways in which they view the world. Exploration of schools, students and their connections to communities. Draws on preservice teachers' concurrent field experiences.

Corequisite: TLPL251.

Credit Only Granted for: EDCI297 or TLPL252.

Formerly: EDCI297.

TLPL253 Language Rights and Repression in Education (3 Credits)

Many English-speaking Americans view societal monolingualism and English-speaking in schools as the standard. The proposed course will delve deeply into issues associated with language, language rights, education, and linguistic repression in schooling. The Big Question of our time this course asks is: Are access to education and native language maintenance civil rights? Human rights?

TLPL254 Surmounting School: Democracy, Inequality, and Schooling (3 Credits)

This Big Questions course explores the grandest challenges faced by today's public schools and asks: How do schools shape democracy and inequality in the U.S.? At the conclusion of this course, students will propose practical educational policy recommendations aimed at addressing its big question.

TLPL285 Decolonizing Climate Change Education: Fostering Inclusivity, Equity, and Holistic Understandings (3 Credits)

How climate science is measured, understood, communicated, and taught through Eurocentric and Indigenous lenses to situate climate change education at the nexus of socio-cultural and environmental justice. This course welcomes participants with varying levels of experience and expertise in the subject matter, ensuring an inclusive learning environment suitable for beginners and those with a more advanced understanding of the concepts involved. The curriculum is structured to accommodate a broad range of backgrounds, providing a valuable educational experience for everyone, regardless of prior familiarity with the concepts.

TLPL287 Inquiry Into Issues in US Public Schooling: Policies, Practice and Promise (3 Credits)

Students will inquire into enduring issues faced by US public education, focusing on the forces and stakeholders that have shaped current policy and practice. In addition, students will work to consider the real daily consequences of policy on the lives of students and teachers. Through crafting and researching a question of interest, employing a project based learning approach, students will take a deep dive into the most vexing issues faced by public education in the United States.

Credit Only Granted for: TLPL288T or TLPL287.

Formerly: TLPL288T.

TLPL288 Special Problems in Education (1-6 Credits)

Special and intensive treatment of current topics and issues in teaching, learning, policy and leadership. Available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Formerly: EDPS288.

TLPL298 Special Problems in Education (1-6 Credits)

Exploration of current problems in teaching, learning, policy and leadership. Available only to students who have definite plans for study of approved problems.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Repeatable to: 6 credits if content differs.

Formerly: EDCI298.

TLPL300 Digital Learning Tools and Communities (1 Credit)

An exploration of the digital tools available for P12 students and their teachers that enhance learning and help build classroom community. This hybrid course will prepare P12 teachers to incorporate instructional technology, digital learning resources, and social media in P12 classrooms.

Restriction: Minimum cumulative GPA of 2.75; and must be in one of the following programs (Elementary Education; Secondary Educ: Social Studies; Secondary Educ: Art; Secondary Educ: Mathematics; Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Foreign Languages).

Credit Only Granted for: EDCI385 or TLPL300.

Formerly: EDCI385.

TLPL312 Curriculum and Instruction in Elementary Education: Mathematics (3 Credits)

Materials and procedures to help children sense arithmetical meanings and relationships. Development of an understanding of the number system and arithmetical processes. Includes laboratory/field experiences.

Prerequisite: TLPL361.

Corequisite: EDCI362, EDCI342, TLPL321, and TLPL362.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI352 or TLPL312.

Formerly: EDCI352.

TLPL321 Curriculum and Instruction in Elementary Education: Science (3 Credits)

Objectives, methods, materials and activities for teaching science in the elementary school; emphasis on teaching strategies which help children learn the processes and concepts of science. Includes laboratory/field experiences.

Prerequisite: TLPL361.

Corequisite: TLPL312, EDCI362, EDCI342, and TLPL362.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI372 or TLPL321.

Formerly: EDCI372.

TLPL332 Arts Integration in Elementary Classrooms (3 Credits)

An exploration of the theories and core practices associated with integrating the arts in ways that promote student learning in the core subjects.

Corequisite: TLPL362, EDCI362, TLPL361, and EDCI489.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: TLPL306 or TLPL332.

Formerly: TLPL306.

TLPL340 Introduction to Children's Literature and Critical Literacy (3 Credits)

Analysis of literary materials for children and youth. Timeless and ageless books, and outstanding examples of contemporary publishing. Evaluation of the contributions of individual authors, illustrators and children's book awards.

Restriction: Must be in Elementary Education program; or must be a Pre-Education Major.

Credit Only Granted for: EDCI443 or TLPL340.

Formerly: EDCI443.

TLPL341 Assessing Language and Literacy Development in Elementary Classrooms (3 Credits)

An exploration of the social and cognitive processes involved in reading and writing, the developmental nature of those processes, the foundational concepts associated with effective literacy assessment, a variety of formative and summative literacy assessments, and the nature of individual differences in reading and writing.

Corequisite: TLPL479, EDHD411, and EDSP401.

Restriction: Must be in the Elementary Education program; and permission of EDUC-Teaching and Learning, Policy and Leadership.

Credit Only Granted for: TLPL341 or TLPL488R.

Formerly: TLPL488R.

TLPL342 Promoting Skilled and Motivated Readers in Diverse Elementary Classrooms (Part 1) (3 Credits)

An investigation of the materials, curriculum, teaching and learning practices and assessment methods associated with promoting skilled and motivated readers in diverse elementary classrooms. Teacher candidates will learn to use assessments to design instruction in the core components of reading, in line with students' individual needs and the Maryland College and Career Ready Standards.

Corequisite: TLPL362, TLPL361, TLPL332, and TLPL479.

Restriction: Must be in the Elementary Education program; and permission of EDUC-Teaching and Learning, Policy and Leadership.

Credit Only Granted for: TLPL488L or TLPL342.

Formerly: TLPL488L.

TLPL343 Promoting Skilled and Motivated Readers in Diverse Elementary Classrooms (Part 2) (3 Credits)

Application of the materials, curriculum, teaching and learning practices and assessment methods associated with classroom reading programs designed to promote skilled and motivated readers in diverse elementary classrooms. Teacher candidates will learn to assess and scaffold students' self-regulated literacy learning in line with students' individual needs and Maryland College and Career Ready Standards.

Corequisite: TLPL312, TLPL321, TLPL446, and TLPL489.

Restriction: Must be in the Elementary Education program; and permission of EDUC-Teaching and Learning, Policy and Leadership.

Credit Only Granted for: TLPL343 or TLPL488F.

Formerly: TLPL488F.

TLPL344 Culturally Responsive Language and Literacy Instruction in Diverse Elementary Classrooms (3 Credits)

Application of the asset-based practices associated with culturally responsive language and literacy programs. Teacher candidates will learn to plan, guide and assess students' integrated language and literacy practices (reading, writing, speaking and listening), with emphasis on writing instruction, in line with students' individual needs and Maryland College and Career Ready Standards.

Corequisite: TLPL300, TLPL478, and TLPL489.

Restriction: Must be in the Elementary Education program; and permission of EDUC-Teaching and Learning, Policy and Leadership.

Credit Only Granted for: TLPL488I or TLPL 344.

Formerly: TLPL488I.

TLPL360 Foundations of Education (3 Credits)

Social context of education and conflicts over philosophies, values, and goals that are reflected in educational institutions in our pluralistic society. Helps teachers become reflective, critical thinkers about the social and philosophical issues they face and the choices they make.

Credit Only Granted for: EDPS301 or TLPL360.

Formerly: EDPS301.

TLPL361 Community, Learners, and Classroom Engagement (3 Credits)

Focuses on classroom community building as an ethic of caring for students and examines the connection between classroom engagement and learning. Topics include student agency, the context and design of learning experiences, and the practices that sustain students' engagement in learning. Wellness strategies to support teacher resilience are also addressed.

Corequisite: TLPL332, TLPL362, TLPL342, and TLPL479G.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

TLPL362 Curriculum and Instruction in Elementary Education: Social Studies (3 Credits)

Curriculum, organization and methods of teaching, evaluation of materials, and utilization of environmental resources. Emphasis on multicultural education. Includes laboratory/field experiences.

Corequisite: EDCI362, TLPL361, EDCI489, and TLPL306.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI322 or TLPL362.

Formerly: EDCI322.

TLPL379 Professional Engagement In and Beyond the Secondary/MS/ K-12 Classroom (1 Credit)

Provides an early field experience (e.g., tutoring young children) in secondary school settings (e.g., middle school). Recommended for students exploring the possibility of or intending to minor in Education or major in Secondary/MS/K-12 education. Credit will not be granted for experience accrued prior to registration. This course is open to all students but best suited for those interested in a career in education. Students need to be prepared to participate in as many as 10 in-person tutoring sessions over the course of the semester. Transportation is provided.

Repeatable to: 3 credits.

Additional Information: Students need to be available for a half day once a week to engage in the field based tutoring experience.

TLPL401 Student-Centered Curriculum and Instruction (3 Credits)

A focus on using student-centered teaching and learning approaches in high school STEM classrooms. Students will develop and implement a multi-day series of lessons, building upon the foundations of inquiry-based practices developed in prior courses. Students will also consider the implications of cultural awareness on teaching practices broadly, as well as in the specific contexts of their fieldwork.

Prerequisite: Permission of instructor; and TLPL102; and must have completed or be concurrently enrolled in TLPL414.

Credit Only Granted for: TLPL488P or TLPL401.

Formerly: TLPL488P.

Additional Information: Field experience for this course will require students to be available for a 2-4 hour block of time at various points throughout the semester to complete observations and teach lessons between 8:00 a.m. and 3:30 p.m. A background check is required and will be facilitated through the Terrapin Teacher program coordinator.

TLPL403 Teaching and Learning High School Mathematics (3 Credits)

Methods of teaching and assessing the high school mathematics curriculum; aligning tasks and activities to curriculum standards; lesson planning; and selection and use of technology. The course also focuses on managing large group dynamics in the high school mathematics classroom.

Prerequisite: Must have 2 semesters of calculus; or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Corequisite: EDCI355.

Restriction: Must be in Secondary Educ: Mathematics program; and minimum cumulative GPA of 2.75; Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI455 or TLPL403.

Formerly: EDCI455.

TLPL406 Teaching and Learning Mathematics in the Elementary School, Part 1 (3 Credits)

Focuses on teaching and learning whole numbers. Special emphasis will be placed on developing equitable teaching practices that enable culturally and linguistically diverse students to develop knowledge and skills that promote mathematical proficiency. Mathematical concepts: Content knowledge: some aspects of early numeracy, whole numbers and the four arithmetic operations, some aspects of algebraic thinking.

Jointly offered with: TLPL607.

Credit Only Granted for: TLPL607 or TLPL406.

TLPL407 Teaching and Learning Mathematics in the Elementary School, Part 2 (3 Credits)

Focuses on teaching and learning rational numbers (fractions and decimals) and developing algebraic thinking. Special emphasis will be placed on developing equitable teaching practices that enable culturally and linguistically diverse students to develop knowledge and skills that promote mathematical proficiency. Mathematical concepts: Content knowledge: rational numbers (fractions and decimals) and the four arithmetic operations, algebraic thinking, some aspects of geometry and measurement.

Credit Only Granted for: TLPL488G or TLPL407.

TLPL413 Teaching and Learning Middle School Mathematics (3 Credits)

Methods of teaching and assessing the middle school mathematics curriculum. Understanding the conceptual difficulties students have in moving from whole numbers to rational numbers, additive thinking to multiplicative thinking, and arithmetic to algebra. Lesson planning and selection of technology and other materials are applied in the context of supervised tutoring of students having difficulty in middle school mathematics. Lab and field experience required. Supervised tutoring takes place on site at a local middle school therefore TLPL413 students will be expected to travel to a local middle school for 8-10 of the class meetings.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI457 or TLPL413.

Formerly: EDCI457.

TLPL414 Knowing and Learning in Mathematics and Science (3 Credits)

Special and intensive treatment of current topics and issues in mathematics and science teaching and learning, policy and leadership. The overall goal of the course is to orient future teachers to the discourses and theories that shape what we know about how students learn math and science.

Prerequisite: Must have completed or be concurrently enrolled in TLPL102.

Credit Only Granted for: TLPL488M or TLPL414.

Formerly: TLPL488M.

TLPL415 Perspectives in Science (3 Credits)

Overview of the history of science and philosophical perspectives on science, particularly as they apply to science teaching.

Prerequisite: Permission of instructor.

Credit Only Granted for: TLPL488W or TLPL415.

Formerly: TLPL488W.

TLPL418 Teaching Residency (3-9 Credits)

An extended teaching internship in an Elementary Professional Development School. School placements to be arranged.

Prerequisite: Must have completed or be concurrently enrolled in TLPL352, TLPL363, TLPL372, TLPL415.

Restriction: Restricted to Elementary Education majors with permission of the Department; 2.75 GPA required.

Repeatable to: 12 credits.

Credit Only Granted for: TLPL418 or EDCI481.

TLPL420 Knowledge, Reasoning, and Learning in Science (3 Credits)

For prospective science teachers. Investigations of the nature of knowledge, reasoning, and learning in middle and secondary science. Readings from cognitive science and science education research; studies of student thinking in interview and classroom observations; analyses of curricula. Includes laboratory and field experiences.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: TLPL420 or EDCI411.

Formerly: EDCI411.

TLPL421 Practices in Secondary School Science Teaching (2 Credits)

Analyses of student thinking, instructional interpretations, strategies, and techniques in the teaching internship.

Prerequisite: TLPL425.

Corequisite: EDCI471 and EDCI474.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department; and must be in Secondary Educ: Science program. Or minimum cumulative GPA of 2.75.

Credit Only Granted for: TLPL421 or EDCI480.

Formerly: EDCI480.

TLPL423 Interdisciplinary Teaching in the Middle Grades I (2 Credits)

For prospective middle school teachers. Studying and planning interdisciplinary instructional practices in middle school. Utilizes context and experiences from students' field placements. Use of technology and incorporation of technology into instruction.

Prerequisite: TLPL413 and TLPL420; or permission of instructor.

Corequisite: EDCI360 and TLPL475.

Restriction: Minimum cumulative GPA of 2.75; and must be in the Middle School Teacher Education Program, major code 0804P.

Credit Only Granted for: EDCI413 or TLPL423.

Formerly: EDCI413.

TLPL424 Interdisciplinary Teaching in the Middle Grades II (2 Credits)

For prospective middle school teachers. Planning and implementing interdisciplinary instructional practices in middle school. Draws on the context of and experiences in the student teaching placement. Use of technology and incorporation of technology into instruction.

Prerequisite: EDCI360 and TLPL423.

Corequisite: TLPL476 and EDCI460.

Restriction: Minimum cumulative GPA of 2.5; and must be in the Middle School Teacher Education Program.

Credit Only Granted for: EDCI414 or TLPL424.

Formerly: EDCI414.

TLPL425 Learning and Teaching in Science (3 Credits)

Studies of student learning and instructional practices in science teaching.

Prerequisite: TLPL420; or permission of instructor.

Restriction: Must be in Secondary Educ: Science program.

Credit Only Granted for: EDCI470 or TLPL425.

Formerly: EDCI470.

TLPL433 Foundations of Art Education (3 Credits)

Introduction to the field of Art Education and the role of the visual arts in grades PreK-12 for today's diverse school populations. The fundamental, historical and philosophic components of art education with an emphasis on arts disciplines and curriculum. Includes a school-based practicum.

For those considering art education as a major.

Restriction: Minimum cumulative GPA of 2.75.

Credit Only Granted for: EDCI403 or TLPL433.

Formerly: EDCI403.

TLPL435 Art Education Methods I (3 Credits)

Methods I provides future art teachers with a knowledge base of the theories and best practices of effective pedagogy for: teaching methods and strategies, diversity, motivational techniques, classroom management, assessment and evaluation methods, and accommodating all students including those with special needs.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department. And must be in Secondary Educ: Art program; or must be in Secondary Educ: Art pre-major program.

Credit Only Granted for: EDCI405 or TLPL435.

Formerly: EDCI405.

TLPL436 Studio Processes and Materials: 2D (3 Credits)

A discussion/studio format used to develop skills, materials, resources and education strategies for using technology and two-dimensional art in K-12 programs.

Prerequisite: ARTT210.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department; and junior standing or higher; and must not be in any of the following programs (Early Childhood Education; Elementary Education; Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Social Studies; Physical Education; Music Education; Special Education).

Credit Only Granted for: EDCI406 or TLPL436.

Formerly: EDCI406.

TLPL437 Studio Processes and Materials: 3D (3 Credits)

A lecture-studio course to develop skills, material resources, and educational strategies for three-dimensional projects in school settings.

Restriction: Must be in Secondary Educ: Art program; or must be a Pre-Art Education Major.

Credit Only Granted for: EDCI407 or EDCI437.

Formerly: EDCI407.

TLPL440 Foundations of Educating Multilingual Learners (3 Credits)

Investigates historical, theoretical, and public policy issues and current practice in the field of education as it relates to multilingual learners (also known as English Language Learners, English Learners) in K-12 and other settings.

Credit Only Granted for: EDCI432 or TLPL440.

Formerly: EDCI432.

TLPL441 Methods for Teaching Multilingual Learners (3 Credits)

Draws on current research to present methods of teaching English to speakers of other languages and challenges participants to analyze and apply successful classroom practices that address the needs of culturally and linguistically diverse learners (also known as English Language Learners, English Learners).

Credit Only Granted for: EDCI434 or TLPL441.

Formerly: EDCI434.

TLPL442 Foundations of Literacy and Biliteracy Development (3 Credits)

An overview of the research on literacy and biliteracy development for English learners. Specifically, the course explores the theoretical models and processes of teaching reading and writing, current literacy/biliteracy issues, assessment, and strategies for developing literacy and biliteracy skills for English learners.

Credit Only Granted for: EDCI435 or TLPL442.

Formerly: EDCI435.

TLPL443 Cross-Cultural Communication and Multilingual Learners (3 Credits)

Participants will research and critically reflect upon aspects of culture as a basis to understand students and to develop principles to guide culturally inclusive teaching decisions. Participants will better understand the role of culture and language in schooling in order to create classrooms where culturally and linguistically diverse students (also known as English Language Learners, English Learners) can succeed.

Credit Only Granted for: EDCI436 or TLPL443.

Formerly: EDCI436.

TLPL444 Teaching and Understanding English Grammar with Multilingual Learners (3 Credits)

Students will analyze the major grammatical structures of American English and the role of teaching grammar and developing effective classroom methods and techniques for multilingual learners. To do so, students will be exposed to diverse theories, approaches, methods, and practical techniques of grammar instruction in order to assist multilingual learners (also known as English Language Learners, English Learners) K-12 classrooms.

Credit Only Granted for: EDCI437 or TLPL444.

Formerly: EDCI437.

TLPL445 Methods I: World Language Methods and Technology (3 Credits)

Explores Dual Language/World Language Methods and Second Language/Bilingual development. Implications for teaching and initial lesson design are explored through on-campus seminars as well as guided field experiences. Students should reserve a regular half-day per week for the field experience in local schools.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: TLPL445 or TLPL695.

TLPL446 Language Variation and Multilingualism in Elementary Classrooms (3 Credits)

Issues in language variation and multilingualism in elementary classrooms, schools and communities with a focus on classroom practice, assessment, and policy.

Restriction: Must be in Elementary Education program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

TLPL447 Art Education Methods II (3 Credits)

Methods II builds upon the pedagogical foundation of Methods I and provides future art teachers with the means for developing pre K-12 art lessons and unit plans for a balanced qualitative art program for today's diverse and inclusive schools and classrooms.

Prerequisite: TLPL435; or students who have taken courses with comparable content may contact the department.

Restriction: Minimum cumulative GPA of 2.75; and must be in Secondary Educ: Art program.

Credit Only Granted for: EDCI423, EDCI603, TLPL447 or TLPL633.

Formerly: EDCI423.

TLPL450 Advanced World Language Methods and Technology (3 Credits)

Teaches advanced best practices for effective world language instruction. Topics include: using authentic assessment and materials, applying national standards, teaching writing and culture, motivating students, providing strategy instruction, infusing technology, preparing for PreK-12 employment, and creating a professional portfolio.

Prerequisite: TLPL445.

Corequisite: EDCI438.

Restriction: Must be in Secondary Educ: Foreign Languages program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI433, EDCI688A, TLPL450 or TLPL696.

Formerly: EDCI433.

TLPL451 Teaching and Learning in Secondary Education: English (3 Credits)

An introduction for prospective middle and secondary English teachers into the basic issues, concepts, orientations, and processes that shape the teaching of English for diverse students in schools. Candidates explore their own perspectives in relation to local and national trends and develop basic teaching understanding and skills through on-campus seminars, teaching laboratory experiences, and guided field experiences. Students should reserve one full day or two half days per week for field experience.

Credit Only Granted for: EDCI416 or TLPL451.

Formerly: EDCI416.

TLPL452 Bases for English Language Instruction (3 Credits)

Examines current theory, research, best practice, curricula and materials focused on the teaching of English language to native and non-native English learners. Topics include morphology, syntax, semantics, vocabulary, pragmatics, argument, discourse structure, dialects, edited academic English, English language proficiency (listening, speaking, reading, writing) assessment, and instructional planning. English Language Learner (TESOL and SIOP) and special needs (inclusion) pupil issues considered.

Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI417 or TLPL452.

Formerly: EDCI417.

TLPL453 Life in Two Languages: Understanding Bilingual Communities and Individuals (3 Credits)

Overview of society and individual multilingualism. Topics include diglossia, language shift, codeswitching, bilingual first language acquisition, language attrition, dual language education policy and practice.

TLPL456 Teaching Writing (3 Credits)

Examines current theory, research, best practice, curricula and materials for teaching written communication in grades K-12. Focuses on analytical, argumentative, informative/explanatory, literary analysis, narrative, descriptive, and research writing. Emphasizes instructional planning, assessment, writer problem-solving strategies, information search, development, organization and style appropriate to task, purpose and audience for both non-digital and digital text. English Language Learner and special needs pupil issues considered.

Corequisite: EDCI447.

Restriction: Must be in Secondary Educ: English Language Arts program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI467 or TLPL456.

Formerly: EDCI467.

TLPL457 Literature for Adolescents (3 Credits)

Reading and analysis of fiction and nonfiction; methods for critically assessing quality and appeal; current theory and methods of instruction; research on response to literature; curriculum design and selection of books.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI466 or TLPL457.

Formerly: EDCI466.

TLPL460 Materials and Instruction for Creating Skilled and Motivated Readers, Part I (3 Credits)

Explains the educational research that addresses the acquisition of reading and its underlying processes, including research-based reading instruction and materials. Learn how to create a literacy learning environment that helps diverse learners become skilled and motivated readers through phonemic awareness, phonics, fluency, comprehension, vocabulary, and whole and small-group instructional approaches.

Restriction: Must be in Elementary Education program; and junior standing or higher. Or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDCI461 or TLPL460.

Formerly: EDCI461.

TLPL461 Materials and Instruction for Creating Skilled and Motivated Readers, Part II (3 Credits)

Selecting, evaluating, and using a variety of materials to create skilled and motivated readers in the elementary grades, particularly in diverse classroom settings; Topics include word analysis, spelling, writing, reading comprehension strategies, directed reading lessons, and explicit instruction.

Prerequisite: TLPL361 and TLPL460.

Corequisite: TLPL312, EDCI342, TLPL321, and TLPL362.

Restriction: Minimum cumulative GPA of 2.75; and permission of EDUC-Teaching and Learning, Policy and Leadership department; and must be in Elementary Education program.

Credit Only Granted for: EDCI462 or TLPL461.

Formerly: EDCI462.

TLPL462 Reading in the Secondary School (3 Credits)

Provides secondary school teachers with understanding the need for and approaches to teaching students to read and learn from content area texts.

Restriction: Minimum cumulative GPA of 2.75; and must be in one of the following programs (Middle School Education; Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Mathematics; Secondary Educ: Foreign Languages; Secondary Educ: Social Studies; Secondary Educ: Art); and permission of department required for post-baccalaureate students.

Credit Only Granted for: EDCI463 or TLPL462.

Formerly: EDCI463.

TLPL470 Knowledge, Reasoning, and Learning in Secondary Social Studies (3 Credits)

An exploration of the nature of knowledge and reasoning in social studies disciplines as well as how students learn social studies. Assessment and investigation of students' conceptions and misconceptions as well as their disciplinary thinking. Implications for teaching and initial lesson design are explored through on-campus seminars as well as guided field experiences. Students should reserve a regular half-day per week for the field experience in local schools. This course is required for admission to the secondary social studies double major.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department; and minimum cumulative GPA of 2.75.

Credit Only Granted for: EDCI426 or TLPL470.

Formerly: EDCI426.

TLPL471 Curriculum, Teaching, and Assessment in Secondary Social Studies (3 Credits)

An exploration of curriculum development, teaching, and assessment in secondary history/social studies. Focus on identifying students' conceptions of social studies topics and designing lessons that advance students' disciplinary thinking and understanding.

Prerequisite: TLPL470.

Corequisite: EDCI428.

Restriction: Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Center for Learning & Educational Technology.

Credit Only Granted for: EDCI427 or TLPL471.

Formerly: EDCI427.

TLPL475 Equitable Classrooms (2 Credits)

An exploration and application of major theoretical frameworks surrounding equity and critical pedagogy. Creating habits of mind that help teachers see all students as capable of achieving at high levels. Draws on the concurrent field experience.

Prerequisite: TLPL252, TLPL413, and TLPL420.

Corequisite: EDCI360 and TLPL423.

Restriction: Minimum cumulative GPA of 2.75; and must be in Middle School Education program.

Credit Only Granted for: EDCI424 or TLPL475.

Formerly: EDCI424.

TLPL476 Equity and Pedagogy (2 Credits)

An exploration and application of major theoretical frameworks surrounding equity and critical pedagogy. Pedagogical decision making that leads to greater equity and improved student learning for all students. Draws on the concurrent student teaching experience.

Prerequisite: TLPL475.

Corequisite: TLPL424 and EDCI460.

Restriction: Minimum cumulative GPA of 2.75; and must be in one of the following programs (Middle School Education; Early Childhood Education; Elementary Education; Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Mathematics; Secondary Educ: Foreign Languages; Secondary Educ: Social Studies; Physical Education; Music Education; Secondary Educ: Art; Special Education).

Credit Only Granted for: EDCI425 or TLPL476.

Formerly: EDCI425.

TLPL477 Teaching Academically, Culturally, and Linguistically Diverse Students in Middle School and Secondary Education (2 Credits)

Instruction on methods of teaching academically, culturally, and linguistically diverse students in middle school and secondary classrooms.

Restriction: Must be in the teacher education program; or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: TLPL488B or TLPL477.

Formerly: TLPL488B.

TLPL478 Professional Seminar in Education (1-3 Credits)

Seminar on the issues and problems teacher candidates encounter in classrooms. Exploration of the skills and strategies that best address these challenges.

Restriction: Must be in a major within the EDUC-Teaching and Learning, Policy and Leadership department.

Repeatable to: 4 credits.

Formerly: EDCI488.

TLPL479 Field Experiences in Education (1-4 Credits)

Field experiences in approved education setting with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students admitted to approved teacher education programs.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Repeatable to: 2 credits.

Formerly: EDCI489.

TLPL481 Embracing Diversity in the Classroom Community (3 Credits)

An exploration of the richness and complexity of student diversity that teacher candidates will encounter in K-12 classrooms. Students will engage in critical reflection around diversity and equity issues.

Restriction: Admission to teacher education program; or permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: TLPL481 or EDCI475.

Formerly: EDCI475.

TLPL488 Special Topics in Education (1-3 Credits)

Special and intensive treatment of current topics and issues in teaching, learning, policy and leadership.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDPS488 or TLPL488.

Formerly: EDPS488.

TLPL489 Internship in Education (1-12 Credits)

Internship or residency experiences in school settings with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students admitted to approved teacher education programs.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Repeatable to: 12 credits.

Credit Only Granted for: EDPS489 or TLPL489.

Formerly: EDPS489.

TLPL498 Special Problems in Education (1-3 Credits)

Exploration of current problems in teaching, learning, policy and leadership. Available only to students who have definite plans for study of approved problems.

Restriction: Permission of EDUC-Teaching and Learning, Policy and Leadership department.

Credit Only Granted for: EDPS498 or TLPL498.

Formerly: EDPS498.

TLPL499 Workshops, Clinics, and Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.

Credit Only Granted for: EDPS499 or TLPL499.

Formerly: EDPS499.

TLTC - Teaching and Learning Transformation Center

TLTC222 Academic Technologies (3 Credits)

Teaches students the instructional technology skills and strategies needed to support faculty teaching in technology-rich physical environments like the university's TERP classrooms as well as virtual environments such as ELMS-Canvas.

Restriction: Permission of TLTC required - enrollment restriction.

Credit Only Granted for: AGNR270, ARHU299T, BSOS288V, or TLTC222.

TLTC310 Leadership in Collaborative Learning Groups (3 Credits)

Experiential learning opportunity that applies principles of leadership, peer mentoring, and learning theory to the planning and facilitation of peer-led collaborative learning sessions. Incorporates research, reasoning, evidence, and feedback to develop a reflective practice.

Restriction: Restricted to students selected to participate in the Guided Study Sessions through the Teaching and Learning Transformation Center.

Credit Only Granted for: HESI318N or TLTC310.

Formerly: HESI318N.

TLTC333 Fundamentals of Academic Peer Mentoring (1 Credit)

How should scientific research influence the way we study and advance the academic performance of others? Learn about the scholarship of teaching and learning and develop the applied skills to support active learning as an academic peer mentor. Whether or not you ultimately pursue a career as an educator, the more effectively you can coach and support the performance of other people, and the more successful you will be. Guided online and face-to-face participation will culminate in a portfolio of your teaching activities and professional development.

TLTC399 Independent Study in Academic Peer Mentoring (1-3 Credits)

Earn academic credit for the time spent supporting a course in TLTC's Academic Peer Mentoring Program (AMP).

Prerequisite: Must have completed or be concurrently enrolled in TLTC333.

Restriction: Permission of TLTC required - enrollment restriction.

Repeatable to: 6 credits.

TLTC499 Independent Study in Teaching and Learning (1-3 Credits)

Earn academic credit for the time spent supporting TLTC's educational development programs and/or engaging in the scholarship of teaching and learning.

Restriction: Permission of TLTC required - enrollment restriction.

Repeatable to: 6 credits.

UMEI - Maryland English Institute

UMEI001 English as a Foreign Language: Beginning (12 Credits)

Intensive course for the non-native speaker of English who has little or no previous knowledge of English. Focus on the rapid acquisition of the basic features of English grammar and pronunciation and on speaking and understanding American English; reading and writing appropriate to the level will be included. Special fee required for this course. This course does not carry credit towards any degree at the University and does not count in the retention plan.

Restriction: Permission of EDUC-Dean-Maryland English Institute department.

UMEI002 English as a Foreign Language: Intermediate I (12 Credits)

Intensive course for the non-native speaker of English who has had some previous instruction in English. Emphasis on improving listening and speaking skills, on mastering intermediate grammatical structures, and on expanding vocabulary. Includes practice in reading and writing appropriate to the level. Special fee required for this course. This course does not carry credit towards any degree at the University and does not count in the retention plan.

Restriction: Permission of EDUC-Dean-Maryland English Institute department.

UMEI003 English as a Foreign Language: Intermediate II (12 Credits)

Intensive course for the non-native speaker of English who has mastered the essential structures of English grammar. Emphasis on improving communicative skills for a wide range of linguistic situations, on rapid expansion of vocabulary, and on improving reading comprehension and basic writing skills. Special fee required for this course. This course does not carry credit towards any degree at the University and does not count in the retention plan.

Restriction: Permission of EDUC-Dean-Maryland English Institute department.

UMEI004 English as a Foreign Language: Intermediate III (12 Credits)

Intensive course for the non-native speaker of English who has a good command of the basic features of spoken and written English. Emphasis on refining speaking and listening skills, on improving reading speed and comprehension of academic texts, and on developing writing skills for academic courses. Special fee required for this course. This course does not carry credit towards any degree at the University and does not count in the retention plan.

Restriction: Permission of EDUC-Dean-Maryland English Institute department.

UMEI005 Advanced English as a Foreign Language (6 Credits)

Semi-intensive course for the nearly proficient non-native speaker of English needing additional language instruction prior to undertaking full-time academic study. Speaking and listening skills; improvement of reading speed and comprehension; and development of writing skills. Special fee required for this course. This course does not carry credit towards any degree at the University and does not count in the retention plan.

UMEI011 Integrated English: Elementary (5-10 Credits)

English as a Second Language course for students at the elementary level.

Prerequisite: Placement exam; and permission of EDUC-Dean-Maryland English Institute department.

UMEI012 Integrated English: Intermediate (5-10 Credits)

English as a Second Language course for students at the intermediate level.

Prerequisite: Placement exam; and permission of EDUC-Dean-Maryland English Institute department.

UMEI013 Integrated English: Advanced (5-10 Credits)

English as a Second Language for students at the advanced level.

Prerequisite: Placement exam; and permission of EDUC-Dean-Maryland English Institute department.

UMEI028 Special Topics in English as a Second Language (1-2 Credits)

Focuses on particular English language topics for ESL student as indicated by title. Course intended to be taken concurrently with UMEI011, UMEI012, or UMEI013; but may be taken independently with special permission.

Repeatable to: 18 credits if content differs.

UNIV - University Courses

UNIV100 The Student in the University (1 Credit)

Introduces students to University life. In a small classroom setting, students will explore how to successfully bridge the gap between high school and college. Study skills, career decision-making, and student development processes will be explored.

Credit Only Granted for: EDCP1080 or UNIV100.

Formerly: EDCP1080.

UNIV101 The Student in the University and Introduction to Computer Resources (2 Credits)

Introduces students to University life and current computer resources. In a small classroom setting, students will explore the world of higher education and current technological advances available to them. Additionally students will explore current resources both internal and external to the University, and how to utilize the World Wide Web as a research tool.

UNIV102 Confidence Building and Study Skills in Mathematics (2 Credits)

A mathematics preparatory class designed to facilitate a student's transition toward fundamental studies mathematics, including study skills and strategies for success.

Restriction: Must be in uTerp Individual Admits program.

UNIV104 Reading and Writing at the College Level (1 Credit)

A workshop designed to enhance students' college level reading and writing abilities to include study skills and strategies for success.

Restriction: Must be in uTerp Individual Admits program.

UNIV106 The Transfer Student in the University (1 Credit)

This course is designed to assist students in making a successful transition to the University of Maryland (UMD) and to serve as an extended orientation to campus living and learning.

Restriction: Must be a first-semester transfer student.

Credit Only Granted for: UNIV106 or EDCP108G.

UNIV107 Science Technology Engineering Mathematics Colloquium (1 Credit)

For students interested in pursuing a STEM related major. Introduces students to the fundamentals of career and major exploration and career development within the various disciplines of STEM.

Restriction: Must be a current student in Letters & Sciences.

UNIV108 Business Exploration Series Colloquium (1 Credit)

For students interested in pursuing a business career. Students learn the fundamentals of career development and what the internship/job search process entails.

Restriction: Must be a current student in Letters and Science.

UNIV110 Grand Challenges of Our Time (1 Credit)

An introduction to and solutions to society's grand challenges. Students meet with President Pines once a week and then in small discussion sections with two instructors. Previous topics have included literacy, Black Lives Matter, Covid, environmental justice, poverty, and voting and civic engagement.

Restriction: Must have Freshmen standing; and permission of instructor.

UNIV190 National Scholarships for International Goals (1 Credit)

Prepares first- and second-year students with international interests such as study abroad, language learning, and international careers to apply for nationally competitive scholarships, including how to write an effective personal statement. The course will help students focus and explore their interests, and connect these interests to current events. It will be of particular interest to students preparing for service-oriented and internationally focused careers.

Restriction: Freshman or Sophomore Standing.

UNIV218 Study Abroad Exploration (3 Credits)

Topics and assignments will vary by travel site.

Restriction: Must be in designated Study Abroad programs.

Repeatable to: 6 credits if content differs.

UNIV269 Connecting Across Cultures (1 Credit)

An examination of culture to guide study abroad students through the stages of cross cultural adjustment and to promote cultural competency by providing the motivation, knowledge and skills necessary to work with diverse individuals and teams.

Restriction: Must be in a study abroad program.

UNIV318 Special Topics in Study Abroad (3 Credits)

Topics and assignments will vary by travel site, as indicated by subtitles such as Italian Art, Chinese History, and French Theater.

Restriction: Must be in a designated Study Abroad program; and must not have six credits of CPSP379 if College Park Scholar student; and freshman standing or higher.

UNIV339 McNair Research Methods and Writing (2-6 Credits)

As an introduction to qualitative and quantitative research methods, students will be taught how to: (1) create, analyze, and disseminate knowledge conceptually and empirically; (2) write a research document; (3) use the IRB process; (4) develop research posters; (5) read and evaluate research studies; (6) read and understand statistics; (7) conduct interviews, develop surveys, and design experiments; and (8) communicate effectively to public audiences.

Restriction: Must have earned a minimum of 60 credits.

UNIV348 Federal Semester Seminar (3 Credits)

This topical seminar will approach Federal policy formation through a combination of framework-based and content-specific considerations. Content and themes will vary. The Federal Semester is an offering of the Office of Undergraduate Studies in conjunction with several academic colleges and the University Career Center.

Restriction: Must be in the Federal Semester program; and permission of UGST-Undergraduate Studies; and junior standing or higher.

Repeatable to: 6 credits if content differs.

UNIV349 Federal Semester Experiential Learning (1-6 Credits)

This is the internship component of the Federal Semester program, an offering of the Office of Undergraduate Studies in conjunction with several academic colleges and the University Career Center.

Prerequisite: UNIV348.

Restriction: Must be in the Federal Semester program; and must have a Learning proposal approved by the Office of Undergraduate Studies and student's internship sponsor; and junior standing or higher.

Repeatable to: 6 credits if content differs.

UNIV362 Designing Your Life after College (2 Credits)

Helps students anticipate and prepare for changes in finances, social life, health, and career dynamics they are likely to experience as they transition from college to working full-time. It focuses on understanding what resources students have as they enter the workforce as critical for navigating post-graduation changes successfully. It offers an overview of financial, risk management and professional development approaches to increase students' confidence regarding post-graduation decisions; in addition, it develops their creative problem solving and reflection skills to help them align the outcomes of their decisions with their values.

Restriction: Must have earned a minimum of 60 credits.

UNIV378 Beyond the Classroom Experiential Learning (1-3 Credits)

This is the internship component of the Beyond the Classroom program in which students hold internships at organizations such as governmental units and non-profit agencies.

Prerequisite: UNIV325.

Restriction: Must be in the Beyond the Classroom program; and must have proposal approved by director of Beyond the Classroom.

UNIV389 Special Topics in Undergraduate Studies (3 Credits)

Courses will focus on interdisciplinary topics and will be planned in cooperation with Undergraduate Studies.

Restriction: Freshman standing.

Repeatable to: 6 credits if content differs.

UNIV399 Experiential Learning in Undergraduate Studies (1-3 Credits)

Experiential learning offered in conjunction with certain designated Office of Undergraduate Studies programs.

Restriction: Must have a Learning proposal approved by the Office of Undergraduate Studies and student's internship sponsor; and junior standing or higher.

Repeatable to: 6 credits if content differs.

URSP - Urban Studies and Planning

URSP250 The Sustainable City: Exploring Opportunities and Challenges (3 Credits)

An exploration, through an interdisciplinary approach, of a number of issues related to making cities more sustainable in terms of environmental protection, economic opportunity, and social justice. The course assist students to develop skills in critical analysis and systems thinking and to use those skills in analyzing sustainability related problems and potential solutions, and to expand students' understanding of the political implications of crafting and moving towards a sustainable urban future.

URSP372 Diversity and the City (3 Credits)

Exploration of the different needs of diverse economic, racial/ethnic, and gender groups that live and work in cities, the historical background of differences, the impact of societal structures and group cultures, and how public and private policies do and can affect different groups.

USLT - Latina/o Studies

USLT201 U.S. Latina/o Studies I: An Historical Overview to the 1960's (3 Credits)

Interdisciplinary course focusing on demographics, terminology and social constructs of race, class, ethnicity, indigeneity, gender, and sexuality associated with the historical and political roots of US Latinidades. Examines the formation, evolution and adaptation of US Latina/o communities as critical field of inquiry.

USLT202 US Latina/o Studies II: A Contemporary Overview 1960's to present (3 Credits)

Interdisciplinary course on emerging populations of Latinos in the 20th century with a focus on the multiple waves of latino immigration as a result of neocolonialism, imperialism, globalization and transnationalism. Examines the positioning of immigrant waves in the political, sociocultural and historical contexts of US Latinidades.

USLT269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

USLT320 Afro-Latinx Diasporas (3 Credits)

Examines the history of the African diaspora and the Afro-Latinx populations in the United States. Explores transnational migrations, comparative slave systems, labor, community formation, gender, sexuality, popular culture, and the changing meanings of blackness and latinidad.

Credit Only Granted for: USLT319A, USLT320, or AMST328E.

Formerly: USLT319A.

USLT369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

USLT401 Latinas/os and US Popular Culture (3 Credits)

An examination of the relationship between Latinas/os and popular culture in the United States. Using theoretical lenses drawn from cultural studies, visual culture studies, critical race theory, borderlands theory, and feminism, the course analyzes multiple texts from time frames past and present. Explores issues such as exclusion from and inclusion within US identity, transnational identifications and cultural flows, ethnoracial stereotyping and resistance to it, and intersections of Latina/o identity with aspects of class, race, sexuality, and gender. Investigates art, TV, music, cinema, and everyday lived experience.

Credit Only Granted for: USLT401, USLT498B, or AMST498M.

Formerly: USLT498B.

USLT403 Citizens, Refugees, and Immigrants (3 Credits)

Citizenship, Refugee and Immigrant are guiding categories that often define the Latina/o community in the United States. Employing this analytical lens, this course critically engages with notions of exclusion and inclusion, which included documentation, status, race, gender, and power. To better understand how these ideas and processes work, students are introduced to the history of Latina/o migration, US immigration policies, racial formation theory, gender construction, borderland theory, and the politics of territoriality.

Credit Only Granted for: USLT403, USLT498I, AMST498N, or IMMR419D.

Formerly: USLT498I.

USLT420 U.S. Latinas/os on the Silver Screen: The Silent Era to the Present Day. (3 Credits)

Combining media theory and film history, this course considers the film industry's relationship to Latinidad, examining issues such as the shift from silent film to sound, the impact made on Latina/o images by the Second World War, and Latinas/os in the Red Scare. The second half of the course turns its attention to self-representation by Latina/o filmmakers and empathetic images created by whites in and after the 1970s. Some of the questions that the course addresses include: How have Latinas/os been depicted in Hollywood history? How have inter-American foreign relations shaped the US Latina/o image? How have Latina/o filmmakers confronted issues such as racism and sexism in the United States?

Credit Only Granted for: USLT420, USLT498A or AMST498G.

Formerly: USLT498A.

USLT430 Globalization and the Diversifying U.S. (3 Credits)

While often talked about as a recent phenomenon and one focused on capital, the ebbs and flows of globalization has a long history among Latina/o communities in the United States. The impact and consequences of globalization can be seen in US foreign policy in Latin America. For instance, Operation Bootstrap in Puerto Rico and the Maquiladores on the Mexico and U.S. border. At the same time, it has shaped immigration policies and the social, political and cultural experiences of Latina/o workers in the U.S. Often blamed for "taking" jobs, this course takes a deeper look at the concrete reasons for the rise of globalism and its impact on Latina/o communities in the US.

Credit Only Granted for: USLT430, USLT498N, AMST498W, or IMMR419J.

Formerly: USLT498N.

USLT450 Central Americans and the United States: Culture, Politics, and Community (3 Credits)

With attention to history, memory, politics, and culture, this course examines the relationships, conflicts, and exchanges of people and power between the United States and the Central American isthmus. We will investigate the role of the US government and military, as well as US corporate interests and US-backed dictatorships, in the culture, politics, and economy of nations including El Salvador, Nicaragua, Guatemala, and Honduras. Through literature, feature films, documentary films, theatre, poetry, and other mediums, the class will analyze responses to this history in Central American cultural productions originating both from the isthmus and from Central Americans living in the United States. In addition to US interventions in the Americas, the course will examine migration from Central America to North America and will conclude by exploring the lives and activities of Central Americans living in the USA.

Credit Only Granted for: AMST498C, USLT450 or USLT498D.

Formerly: USLT498D.

USLT460 Revolutions and Diasporas (3 Credits)

How have revolutions in Latin America influenced the history of US immigration, refugee, and asylum policies? How have they changed US history, culture, experience, geography, politics and the future? This course examines both the history of major revolutions in Latin America and their impact on Latinx diasporic and immigrant communities in the US. It investigates questions of slavery and freedom US expansionism, radical politics, Third World liberation movements, and the politics of asylum and US immigration policies. Students in the course will learn transnationalist, diasporic, borderlands and other forms of Latinx historical methods. In addition, the course will focus on race, class, gender, sexuality, and the politics of location.

Credit Only Granted for: USLT460, USLT498R, or AMST498B .

Formerly: USLT498R.

USLT480 Race and Nation in U.S. Cinema (3 Credits)

From the 1915 release of D.W. Griffith's *The Birth of a Nation* to the present, cinema has been a crucial medium through which cultural producers have advanced and contested concepts of ethnoracial and national identity in the US. This course adopts a historically-grounded practice of media criticism to understand the ideology and iconography of both Hollywood's studio system and independent cinema. The course requires students to examine film and identity through multiple, racial, methodological and theoretical lenses, including film history, and film and media theory. Focus will be the cinematic politics and poetics of racial exclusion and inclusion, empathy and disidentification, power and resistance, and the shaping of a national "imagined community." We will pursue how ideas about class, sexuality, gender, and disability have informed ideologies concerning race and nation. Classes will be divided between lecture, film viewings, and, most importantly, class discussions.

Credit Only Granted for: AMST498P, USLT480, or USLT498C.

Formerly: USLT498C.

USLT488 US Latina/o Senior Seminar (3 Credits)

A variable topics seminar that exposes students to interdisciplinary critical readings, writings, and research in U.S. Latina/o Studies. Interdisciplinary research methodologies are broadly addressed. Students will gain skills and practice in reading critical analytic texts and will develop writing skills.

Recommended: USLT202 or USLT201.

Restriction: Senior standing; and permission of instructor.

Repeatable to: 9 credits if content differs.

USLT498 US Latina/o Studies: Special Topics (3 Credits)

Specific content to be announced when courses are offered.

Prerequisite: USLT202 or USLT201.

Restriction: Junior standing or higher.

Repeatable to: 9 credits if content differs.

VIPS - Vertically Integrated Projects

VIPS208 Starting with Vertically Integrated Projects (1-2 Credits)

Team members beginning their experience with VIP@Maryland will engage on interdisciplinary and vertically-integrated teams with a focus on research, design, industry competition, entrepreneurship, and community engagement projects related to active research and exploration areas of UMD faculty members. Students will also participate in lectures and professional development activities that include topics related to design, research, documentation and technical writing, communication, leadership and teamwork, ethics, project management, intellectual property, information literacy, and introduction to a broad range of applicable research topics, technologies and development tools. Students are expected to maintain involvement with the same project team for multiple terms.

Restriction: Permission of ENGR-Dean-Office of Global Engineering Leadership.

Repeatable to: 8 credits.

Additional Information: Students must apply through the VIP@Maryland application process in order to join a VIP team. For more information: go.umd.edu/vipmaryland.

VIPS308 Engaging with Vertically Integrated Projects (1-2 Credits)

Team members will expand their role and responsibilities on their selected VIP@Maryland team. They will engage on interdisciplinary and vertically-integrated teams with a focus on research, design, industry competition, entrepreneurship, and community engagement projects related to active research and exploration areas of UMD faculty members. Students will also participate in lectures and professional development activities that include topics related to design, research, documentation and technical writing, communication, leadership and teamwork, ethics, project management, intellectual property, information literacy, and introduction to a broad range of applicable research topics, technologies and development tools. Students are expected to maintain involvement with the same project team for multiple terms.

Restriction: Permission of ENGR-Dean-Office of Global Engineering Leadership.

Repeatable to: 8 credits.

Additional Information: Students must apply through the VIP@Maryland application process in order to join a VIP team. For more information visit: go.umd.edu/vipmaryland.

VIPS408 Leading with Vertically Integrated Projects (1-2 Credits)

Advanced team members will take on mentorship and leaderships roles within their VIP@Maryland project. They will engage on interdisciplinary and vertically-integrated teams with a focus on research, design, industry competition, entrepreneurship, and community engagement projects related to active research and exploration areas of UMD faculty members. Students will also participate in lectures and professional development activities that include topics related to design, research, documentation and technical writing, communication, leadership and teamwork, ethics, project management, intellectual property, information literacy, and introduction to a broad range of applicable research topics, technologies and development tools. Students are expected to maintain involvement with the same project team for multiple terms.

Restriction: Permission of ENGR-Dean-Office of Global Engineering Leadership.

Repeatable to: 12 credits.

Additional Information: Students must apply through the VIP@Maryland application process in order to join a VIP team. For more information: go.umd.edu/vipmaryland.

WEID - Words of Engagement Intergroup Dialogue Program

WEID139 Navigating Social Identity Difference through Intergroup Dialogue (1 Credit)

Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on identity-based topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.

Prerequisite: Completion of on-line enrollment form.

Cross-listed with: ENES338.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: CHSE338, EDHI338, ENES338 or WEID139.

Formerly: CHSE338.

WGSS - Women, Gender, and Sexuality Studies

WGSS115 Gender, Race and Computing (3 Credits)

Race and gender have shaped computing from its earliest histories to contemporary debates over bias in search algorithms, surveillance, and AI. As computational processes shape ever more dimensions of everyday life from the personal to the global scale, understanding how they operate and how power operates within them grows ever more important. Combating racism and sexism is not as simple as ensuring the pool of programmers and engineers is more diverse; structures of power are embedded in digital technologies as they are in all aspects of our society, and we must learn to perceive their operation if we hope to transform them. We will examine how racism and sexism operate in the field of computer science and in everyday uses of digital technologies, while studying how feminist and racial justice movements have created alternative approaches. This class is for anyone who wishes to better understand the relationships between digital technology, structural power, and social justice.

Cross-listed with: CMSC115.

Restriction: Must not have taken CMSC216 or higher.

Credit Only Granted for: WGSS115 or CMSC115.

WGSS200 Introduction to WGSS: Gender, Power, and Society (3 Credits)

Examines constructions of race, class, sexuality, ability, and gender relations from a social science multi-disciplinary perspective. The course interrogates the ways that systems of hierarchy and privilege are created, enforced, and intersect through the language of race, class, sexuality, and national belonging. The course will provide students with the skills to examine how systems of power manifest in areas such as poverty, division of labor, health disparities, policing, violence. In addition to examining the impact of systems of power, students will reflect on their own location within the exercise of racialized, and gendered power relations. This course encourages students to understand and critique these systems both personally and politically.

Credit Only Granted for: WMST200 or WGSS200.

Formerly: WMST200.

WGSS205 Reproductive Justice: An Introduction (3 Credits)

Developed by feminists of color, reproductive justice frameworks offer a roadmap for economic, social, and medical justice advocacy attentive to the intersections of race, class, gender, sexuality, and disability. This course reviews the historical, legal, and social bases of reproductive rights in the U.S.; discusses the history of feminist organizing for reproductive freedom; surveys critical theories of reproductive justice that go beyond abortion law to advocate for broader social transformation; and evaluates the possible futures of intersectional feminist activism after the overturning of Roe v. Wade.

WGSS210 Love, Labor, and Citizenship: Women in America to 1880 (3 Credits)

An examination of the economic, family, and political roles of colonial slave, immigrant and frontier women in America from the pre-industrial colonial period through the early stages of 19th-century industrialization and urbanization.

Cross-listed with: HIST210.

Credit Only Granted for: HIST210, WMST210 or WGSS210.

Formerly: WMST210.

WGSS211 Women in America Since 1880 (3 Credits)

An examination of women's changing roles in working class and middle class families, the effects of industrialization on women's economic activities and status, and women's involvement in political and social struggles, including those for women's rights, birth control, and civil rights.

Cross-listed with: HIST211.

Credit Only Granted for: HIST211, WMST211 or WGSS211.

Formerly: WMST211.

WGSS212 Women in Western Europe 1750-Present (3 Credits)

An analysis of the economic, family, and political roles of European women from 1750 to the present. The effects of industrialization on women's work and status, the demographic parameters of women's lives, and women's participation in political events from market riots to suffrage struggles.

Cross-listed with: HIST212.

Credit Only Granted for: HIST212, WMST212 or WGSS212.

Formerly: WMST212.

WGSS230 Introduction to Humanities, Health, and Medicine (3 Credits)

An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.

Cross-listed with: ARHU230, ENGL254, HIST219N.

Restriction: Permission of ARHU-English Department.

Credit Only Granted for: ARHU230, ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

WGSS250 Introduction to WGSS: Art and Culture (3 Credits)

Provides students with a critical introduction to the ways that art and art activism have served as a conduit to understanding and challenging systems of inequity and practices of normativity. Interrogating the categories of gender, sexuality, race, class, ability, the course will provide students with an examination of how artists have responded to pressing social justice issues of their eras. While the course centers visual art, students will also engage genres such as music, plays, literature, digital and performance art as arenas of social change.

Credit Only Granted for: WMST250 or WGSS250.

Formerly: WMST250.

WGSS255 Reading Women Writing (3 Credits)

Explores literary and cultural expressions by women and their receptions within a range of historical periods and genres. Topics such as what does a woman need in order to write, what role does gender play in the production, consumption, and interpretation of texts, and to what extent do women comprise a distinct literary subculture. Interpretation of texts will be guided by feminist and gender theory, ways of reading that have emerged as important to literary studies over the last four decades.

Cross-listed with: ENGL250.

Credit Only Granted for: ENGL250, WMST255 or WGSS255.

Formerly: WMST255.

WGSS263 Introduction to Black Women's Studies (3 Credits)

Interdisciplinary exploration of Black women, culture and society in the United States. Drawn primarily from the social sciences and history with complementary material from literature and the arts.

Cross-listed with: AAAS263.

Credit Only Granted for: WMST263, AASP298I, WGSS263, AAAS263 or AASP263.

Formerly: WMST263.

WGSS264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)

Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word "quare" invites us to do), Quare/Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.

Cross-listed with: LGBT264, AAAS264.

Credit Only Granted for: LGBT264, AASP264, AAAS264, WMST264 or WGSS264.

WGSS265 Constructions of Manhood and Womanhood in the Black Community (3 Credits)

Investigates the ways that African Americans are represented and constructed in public and private spheres and explores the social constructions and representations of Black manhood and womanhood from various disciplinary perspectives.

Cross-listed with: AAAS265.

Credit Only Granted for: WMST265, AASP298B, AAAS265, WGSS265 or AASP265.

Formerly: WMST265.

WGSS267 Introduction to Black Women's Cultural Studies (3 Credits)

An introduction to black women's cultural production and to an understanding of how the social norms and ideals about women within black communities and in the larger society have shaped black women's own self-perceptions and behaviors and thus their cultural production.

Credit Only Granted for: WMST267 or WGSS267.

Formerly: WMST267.

WGSS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: WMST269.

WGSS271 Monsters and Racism: Black Horror and Speculative Fiction (3 Credits)

The previous decade has been considered a renaissance for Black Horror. From *Get Out* to *Lovecraft Country*, the genre has enjoyed unprecedented mainstream media buzz and accolades. This course looks at contemporary Black horror and speculative fiction as cultural texts which put into question our notions of human(e) and inhuman(e) through critiques of white supremacy and accompanying oppressions. Students will learn a host of critical skills through close reading and analysis of literature and film by Black creators such as Jordan Peele, Misha Green, Toni Morrison, Jewelle Gomez, and Octavia Butler. With the ability to interpret cultural texts using literary criticism, film analysis, history, cultural studies, ethnic studies, feminist theory, and the social sciences, students will connect these texts to continuing historical and contemporary issues of racial and cultural oppression such as medical discrimination, policing and criminalization, misogynoir, and racialized capitalism.

Cross-listed with: AAAS271, ENGL289J.

Credit Only Granted for: AAAS271, ENGL289J, HONR299Y, HNUH238W, WGSS271 or WGSS298W.

Formerly: HNUH238W.

WGSS275 World Literature by Women (3 Credits)

Comparative study of selected works by women writers of several countries, exploring points of intersection and divergence in women's literary representations.

Cross-listed with: CMLT275.

Credit Only Granted for: WMST275, CMLT275 or WGSS275.

Formerly: WMST275.

WGSS280 Gender and Science in Film and Media (3 Credits)

Isaac Azimov once said of science fiction that it is the genre that "deals with the reaction of human beings to changes in science and technology." With this definition in mind, we will embark on a critical exploration of sci-fi film and other media, using it as a lens for analyzing society's deepest fears and most furtive hopes. Our investigation will center on the liminal space between hegemonic culture and its prescribed excesses. These liminal spaces—between self and other, disability and enhancement, cultural hybridization, and gender crossing—shift in response to real-world sociopolitical tensions. We will consider feminist and anti-racist media scholars' concerns over representation, authorship and ideology alongside questions of technological change. Students will use analytical and creative assignments to explore not only how the scientific imaginary serves as fertile ground for feminist, disability, and anti-racist critique, but also provides a locus for alternative futures.

Cross-listed with: ENGL289I.

Credit Only Granted for: ENGL289I or WGSS280.

WGSS290 Bodies in Contention (3 Credits)

Explores the contributions of feminist scholarship in framing and resolving contemporary controversies concerning gendered bodies. It includes the ways in which knowledge about the human body has been shaped by cultural ideas of gender, race, sexuality and ability.

Credit Only Granted for: WMST298D or WGSS290.

Formerly: WMST298D.

WGSS291 Racialized Gender and Rebel Media (3 Credits)

An introduction to the interdisciplinary field of women's studies and an exploration of the ways in which media has been used as a platform for racial justice, feminist activism, and cultural transformation, with a principal focus on the expressions of women of color. The goals of the course are to explore how different forms of media shape the stories which circulate about race, femininities, masculinities, ethnicities, sexualities, religiosity, power and difference, and to examine how various media formats been used to disrupt dominant stories, to tell new stories, and to create differing understandings of citizenship.

Credit Only Granted for: WGSS291 or WMST298N.

Formerly: WMST298N.

WGSS298 Special Topics in Women, Gender, and Sexuality Studies (1-3 Credits)

Thematic exploration of a topic in women, gender, and sexuality studies.

Repeatable to: 6 credits if content differs.

Formerly: WMST298.

WGSS298L History of Sexuality in America (3 Credits)

Explores the social construction of sexualities from the first colonial settlement to the modern era in the United States. Analyzes the implications of these understandings for power relations in U.S. history.

Cross-listed with: HIST213.

Credit Only Granted for: HIST213, WMST298L or WGSS298L.

WGSS298N The Politics of Sexuality in America: A Historical Approach (3 Credits)

Why do particular issues about sexuality hold such an important place in American political debates? What animates these controversies and what can a historical perspective on these issues add to our understanding of modern sexual politics? This class explores the historical sexual politics that undergird contemporary debates concerning sexuality in America. It focuses on topics that garner significant public attention - Reproductive rights - LGBTQ rights - Sexting - and explores the histories that undergird Americans disagreements.

Cross-listed with: HIST289N.

Credit Only Granted for: HIST289N or WGSS298N.

WGSS298W Monsters and Racism: Black Horror and Speculative Fiction (3 Credits)

The previous decade has been considered a renaissance for Black Horror. From *Get Out* to *Lovecraft Country*, the genre has enjoyed unprecedented mainstream media buzz and accolades. This course looks at contemporary Black horror and speculative fiction as cultural texts which put into question our notions of human(e) and inhuman(e) through critiques of white supremacy and accompanying oppressions. Students will learn a host of critical skills through close reading and analysis of literature and film by Black creators such as Jordan Peele, Misha Green, Toni Morrison, Jewelle Gomez, and Octavia Butler. With the ability to interpret cultural texts using literary criticism, film analysis, history, cultural studies, ethnic studies, feminist theory, and the social sciences, students will connect these texts to continuing historical and contemporary issues of racial and cultural oppression such as medical discrimination, policing and criminalization, misogynoir, and racialized capitalism.

Cross-listed with: HNUH238W.

Credit Only Granted for: HONR299Y, HNUH238W, or WGSS298W.

Formerly: HONR299Y.

WGSS301 Introduction to Research in Gender, Race, and Queer Studies (3 Credits)

Primarily a research skills-building course, focusing especially on interdisciplinary approaches to research. Encompasses basic library skills, conceptualizing a research question. The course is not designed to teach a specific research method but rather to as an introduction to a range of research methods commonly employed in feminist, critical race, and queer studies with some opportunity to begin to apply them. Considers the ethical dilemmas and political implications embedded in research projects.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies; Must be enrolled in a Harriet Tubman Department of Women, Gender, and Sexuality Studies program.

Credit Only Granted for: WMST301 or WGSS301.

Formerly: WMST301.

WGSS302 Feminist, Critical Race, and Queer Theories (3 Credits)

Introduces students to some of the major concepts in feminist, critical race, and queer theories. It examines the questions: What is theory? What forms does theory take? What is the relationship between theory and practice? What is the role of theory in political and social action? In art? In personal life? What does it mean to do theory?

Prerequisite: 6 credits in LGBT, WMST, WGSS or courses that are cross-listed with these.

Credit Only Granted for: WMST302, WGSS302 or WMST400.

Formerly: WMST302.

WGSS310 Transgender Studies (3 Credits)

Introduces students to the interdisciplinary field of transgender studies, providing a history of the field and engaging current debates within it. Students will explore the emergence and consolidation of trans identities, practices, cultures, and knowledges across medical, historical, sociological, cultural, and artistic contexts, paying particular attention to dynamics of race, class, and ability, to global and transnational difference, and to the implications of transgender studies for understanding gender and sexuality overall.

Cross-listed with: LGBT310.

Credit Only Granted for: LGBT310, WMST310 or WGSS310.

WGSS314 Black Women in United States History (3 Credits)

Black American women's history from slavery to the present. Focused on gaining a fuller understanding of the effect of race, class and gender on the life cycles and multiple roles of Black women as mothers, daughters, wives, workers and social-change agents.

Cross-listed with: AAAS313.

Restriction: Sophomore standing or higher.

Credit Only Granted for: AASP313, AAAS313, WMST314 or WGSS314.

Formerly: WMST314.

WGSS315 Intro to Fat Studies: Fatness, Blackness and Their Intersections (3 Credits)

Examines fatness as an area of human difference subject to privilege and discrimination that intersects with other systems of oppression based on gender, race, class, sexual orientation, and ability. Though we will look at fatness as intersectional, this course will particularly highlight the relationship between fatness and Blackness. We approach this area of study through an interdisciplinary humanities and social-science lens which emphasizes fatness as a social justice issue. The course closes with an examination of fat liberation as liberation for all bodies with a particular emphasis on performing arts and activism as a vehicle for liberation and challenging fatmisia.

WGSS319 Workshops in Gender, Race, and Queer Studies (3 Credits)

Topics will change each semester but all workshops will be designed to have students think transdisciplinarily and interdisciplinarily about a specific topic or issue and to understand how differing approaches shape knowledge. Assignments within the workshops are aimed at students developing their skills in forms of presentation beyond the written essay, e.g. oral argument, digital or creative projects. Collaborative work must be central to all workshop courses; these collaborative activities do not preclude the possibility of individual research/writing assignments but the Workshops should emphasize conversation, debate, collaboration, and critique more so than the individually authored essay.

Repeatable to: 9 credits if content differs.

Formerly: WMST319.

WGSS320 Women in Classical Antiquity (3 Credits)

A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art. Readings in primary sources in translation and modern critical writings.

Cross-listed with: CLAS320, HIST328W.

Credit Only Granted for: CLAS320, WMST320, WGSS320 or HIST328W.

WGSS325 The Sociology of Gender (3 Credits)

Institutional bases of gender roles and gender inequality, cultural perspectives on gender, gender socialization, feminism, and gender-role change. Emphasis on contemporary American society.

Prerequisite: 3 credits in SOCY courses.

Cross-listed with: SOCY325.

Credit Only Granted for: SOCY325, WMST325 or WGSS325.

Formerly: WMST325.

WGSS326 Biology of Reproduction (3 Credits)

The biology of the reproductive system with emphasis on mammals and, in particular, on human reproduction. Hormone actions, sperm production, ovulation, sexual differentiation, sexual behavior, contraception, pregnancy, lactation, maternal behavior and menopause.

Prerequisite: BSCI170 and BSCI171; or BSCI105; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies; or permission of CMNS-Biological Sciences UG Program.

Cross-listed with: BSCI342.

Credit Only Granted for: BSCI342, WMST326 or WGSS326.

Formerly: WMST326.

WGSS336 Psychology of Women (3 Credits)

A study of the biology, life span development, socialization, personality, mental health, and special issues of women.

Prerequisite: PSYC100.

Cross-listed with: PSYC336.

Credit Only Granted for: PSYC336, WMST336 or WGSS 336.

Formerly: WMST336.

WGSS348 Literary Works by Women (3 Credits)

The context, form, style and meaning of literary works by women.

Prerequisite: Must have completed at least one lower-level English literature course and one other lower-level English course; or Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: ENGL348.

Repeatable to: 6 credits if content differs.

Formerly: WMST348.

WGSS358 Undergraduate Teaching Assistantship (3 Credits)

Students work under the supervision of a faculty mentor to assist with an undergraduate LGBT or WGSS course while also becoming conversant in feminist, critical race, and queer pedagogical debates and approaches.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Repeatable to: 9 credits.

Formerly: WMST358.

WGSS360 Caribbean Women (3 Credits)

An interdisciplinary analysis of the lives and experiences of women across the Caribbean region, through an examination of their roles in individual, national, social and cultural formations. Special emphasis on contemporary women's issues and organizations.

Cross-listed with: AAAS361.

Credit Only Granted for: WGSS360, WMST360, AAAS361 or AASP361.

Formerly: WMST360.

WGSS368 Undergraduate WGSS Internship (3-6 Credits)

Undergraduate Internship in a position related to women, gender, and sexuality studies and overseen by a member of the WGSS faculty.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies; and must have Learning Proposal approved by WGSS Academic Advisor; and junior standing or higher.

Repeatable to: 9 credits if content differs.

Formerly: WMST386 and WMST368.

WGSS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: WMST369.

WGSS370 Black Feminist Thought (3 Credits)

Examines the ideas, words and actions of Black women writers, speakers, artists, and activists in the United States.

Prerequisite: 1 course in AASP; or 1 course in WGSS.

Cross-listed with: AAAS371.

Credit Only Granted for: WMST370, WGSS370, AAAS371 or AASP371.

Formerly: WMST370.

WGSS378 Undergraduate Research and Creative Works Assistantship (1-3 Credits)

The Undergraduate Research Assistant provides an opportunity to develop a deep understanding of specific research methods and topics while involving the student in a professional role that requires ethical responsibility. The precise syllabus for the URA will be personalized to the student's interests and abilities, as well as to the specific research project and the Faculty Mentor's expectations. The student will meet with the Faculty Mentor prior to enrolling for a URA in order to determine the responsibilities and learning goals for the semester.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST378.

WGSS379 Topics in Women, Gender, and Sexuality Studies (1-3 Credits)

Thematic exploration of a topic in women, gender, and sexuality studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST379.

WGSS408 Literature by Women Before 1800 (3 Credits)

Selected writings by women in the medieval and early modern era.

Prerequisite: Must have completed two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: ENGL408.

Repeatable to: 9 credits if content differs.

Formerly: WMST408.

WGSS410 Women of the African Diaspora (3 Credits)

Explores the lives, experiences, and cultures of women of Africa and the African diaspora—African-America, the Caribbean, and Afro-Latin America. A variety of resources and materials will be used providing a distinctive interdisciplinary perspective.

Credit Only Granted for: WMST410 or WGSS410.

Formerly: WMST410.

WGSS420 Asian American Women: The Social Construction of Gender (3 Credits)

Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.

Cross-listed with: AAST420.

Restriction: Must not have completed WMST420.

Credit Only Granted for: AAST420, WMST420 or WGSS420.

WGSS425 Gender Roles and Social Institutions (3 Credits)

Relationship between gender roles and the structure of one or more social institutions (e.g., the economy, the family, the political system, religion, education). The incorporation of gender roles into social institutions; perpetuation or transformation of sex roles by social institutions; how changing gender roles affect social institutions.

Credit Only Granted for: SOCY425, WMST425 or WGSS425.

Formerly: WMST425.

WGSS428 Topics in Women, Gender, and Sexuality Studies (1-3 Credits)

Thematic exploration of a topic in women, gender, and sexuality studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST428.

WGSS444 Feminist Critical Theory (3 Credits)

Issues in contemporary feminist thought that have particular relevance to textual studies, such as theories of language, literature, culture, interpretation, and identity.

Prerequisite: WMST200, WGSS200, WMST250, WGSS250, or ENGL250.

Cross-listed with: ENGL444.

Credit Only Granted for: ENGL444, WMST444 or WGSS444.

Formerly: WMST444.

WGSS448 Literature by Women of Color (3 Credits)

Literature by women of color in the United States, Britain, and in colonial and post-colonial countries.

Prerequisite: Must complete two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: ENGL448.

Repeatable to: 9 credits if content differs.

Formerly: WMST448.

WGSS452 Women in the Media (3 Credits)

Participation and portrayal of women in the mass media from colonial to contemporary times.

Cross-listed with: JOUR452.

Credit Only Granted for: JOUR452, WMST452 or WGSS452.

Formerly: WMST 452.

WGSS454 Women in Africa (3 Credits)

The place of women in African societies: the role and function of families; institutions such as marriage, birthing, and child rearing; ritual markers in women's lives; women in the workplace; women's associates; women's health issues; measures designed to control women's behavior; women and development.

Credit Only Granted for: HIST494, WMST454 or WGSS454.

Formerly: WMST454.

WGSS455 Women in Medieval Culture and Society (3 Credits)

Medieval women's identity and cultural roles: the condition, rank and rights of medieval women; their access to power; a study of women's writings and the constraints of social constructs upon the female authorial voice; and contemporary assumptions about women.

Cross-listed with: HIST495.

Credit Only Granted for: HIST495, WMST455 or WGSS455.

Formerly: WMST455.

WGSS456 Women and Society in the Middle East (3 Credits)

Examines the customs, values and institutions that have shaped women's experience in the Middle East in the past and in the contemporary Middle East.

Recommended: Prior coursework in Middle East studies or gender studies.

Cross-listed with: HIST492.

Credit Only Granted for: HIST492, WMST456 or WGSS456.

Formerly: WMST456.

WGSS457 Redefining Gender in the U.S., 1880-1935 (3 Credits)

Exploring changing perceptions of gender in the U.S., 1880-1935, and the impact of those changes on the day to day lives of men and women.

Credit Only Granted for: WGSS457 or WMST457.

Formerly: WMST457.

WGSS458 Literature by Women After 1800 (3 Credits)

Selected writings by women after 1800.

Prerequisite: Must have completed two English courses in literature; or permission of Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: ENGL458.

Repeatable to: 9 credits if content differs.

Formerly: WMST458.

WGSS468 Feminist Cultural Studies (3 Credits)

Each version of this course focuses on one or several forms of popular culture -- such as TV, music, film, cyber-culture, or genre fiction (for example, science fiction) -- and demonstrates how feminists value, critique and explain such forms. Tools of feminist cultural studies include economic and social analyses of power, race, sexuality, gender, class, nationality, religion, technology, and globalization processes.

Repeatable to: 9 credits if content differs.

Formerly: WMST468.

WGSS469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: WMST469.

WGSS471 Women's Health (3 Credits)

The women's health movement from the perspective of consumerism and feminism. The physician-patient relationship in the gynecological and other medical settings. The gynecological exam, gynecological problems, contraception, abortion, pregnancy, breast and cervical cancer and surgical procedures. Psychological aspects of gynecological concerns.

Cross-listed with: HLTH471.

Restriction: Must be in a program in the Harriet Tubman Department of Women, Gender, and Sexuality Studies; or must be in a major within SPHL-Behavioral & Community Health department.

Credit Only Granted for: HLTH471, WMST471, or WGSS471..

Formerly: WMST471.

WGSS486 Advanced Feminist, Critical Race, and Queer Theories (3 Credits)

Provides undergraduates with a survey of foundational texts in the intersecting fields of feminist, critical race, and queer studies, as well as an overview of current scholarship in order to give students an opportunity to understand the origins and the development of these fields. This course is especially recommended for students interested in pursuing graduate education. Our discussions will be focused on the trajectories of these intellectual conversations as they have developed in the academy.

Prerequisite: WMST301 or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

WGSS487 Advanced Research Seminar in Gender, Race, and Queer Studies (3 Credits)

A research seminar that allows students to focus their developed skills on a single topic of their own choosing while meeting regularly in seminar to discuss, critique, support, and learn from their peers' projects and assessments. Students choose a topic based on their own interests and prior coursework, perform advanced research appropriate to the question, and formulate an appropriate method of presentation of their research findings. The culminating presentation may take the form of a written paper or a creative, digital, or activist project.

Prerequisite: WMST300 or WGSS301; and WMST400 or WGSS302.

Credit Only Granted for: WMST487 or WGSS487.

Formerly: WMST487.

WGSS488 Senior Seminar (3 Credits)

Seminar for advanced majors in women's studies or other students with appropriate preparation. Interdisciplinary topics will vary each semester.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST488.

WGSS489 Individual Research in Gender, Race and Queer Studies (3 Credits)

Allows students who wish to continue the research they began in WMST487 or WGSS487 to do so under the guidance of an individual faculty mentor. Each student taking this class will develop an individual syllabus based on the project on which they are working, with the goal of developing a work of scholarship specific to their interests that can serve as an entry point for graduate study or professional work.

Prerequisite: WMST487 or WGSS487.

Repeatable to: 9 credits.

WGSS491 Judaism and the Construction of Gender (3 Credits)

The study of Jewish culture, religious practice, communal authority, and literature through the frame of such critical categories of analysis as gender, sexuality, masculinity, power, ethics, and the feminine.

Prerequisite: 1 course in JWST; or 1 course in LGBT; or 1 course in WMST or WGSS.

Cross-listed with: JWST491.

Credit Only Granted for: JWST491, WMST491 or WGSS491.

Formerly: WMST491.

WGSS492 Sex, Gender, and Jewish Identity (3 Credits)

An exploration of Jewish embodiment, including dynamics related to biological sex, culturally-framed gender, and sexuality. Topics of discussion may include transgender and intersex Jews, stereotypes and gender performance, modesty, genetics, and body alteration. Focus is on contemporary Jewish culture, framed within the larger historical and textual tradition.

Prerequisite: 1 course in WGSS; or 1 course in JWST; or 1 course in LGBT; or permission of instructor.

Cross-listed with: JWST492, LGBT448W.

Credit Only Granted for: JWST492, JWST409G, LGBT448W, WMST498W or WGSS492.

Formerly: WMST498W and JWST409G.

WGSS496 African-American Women Filmmakers (3 Credits)

Examines the cinematic artistry of African-American women filmmakers and the ways in which these films address the dual and inseparable roles of race and gender.

Credit Only Granted for: WMST496 or WGSS496.

Formerly: WMST496.

WGSS497 Professional Development (1 Credit)

To assist students in thinking about the next step post-undergraduate degree and to think long term about the importance of their WMST degree in lifelong career, personal, and political development. This course will provide students an opportunity to reflect upon where they are going beyond the B.A. and develop ways to communicate how their coursework and experiences at UMD have prepared them for the next step. The course will focus on the practicalities of resume writing, internship or job searches, etc. but also on the specific challenges/opportunities of translating interdisciplinary training to professional internship or beyond-the B.A. sites. Students may take this course in preparation for their internship (working to select an appropriate internship that can translate well to post-undergraduate aspirations) or they may take it post-internship as they determine their post-graduation steps.

Prerequisite: 12 credits in LGBT, WMST or WGSS courses.

Restriction: Must have completed a minimum of 75 credits.

Credit Only Granted for: WMST497 or WGSS497.

Formerly: WMST497.

WGSS498 Advanced Special Topics in Women, Gender, and Sexuality Studies (1-3 Credits)

Advanced study of a thematic topic in women, gender, and sexuality studies.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST498.

WGSS498D Sex, Gender, and Sexuality in the Islamic World (3 Credits)**WGSS499 Independent Study (1-3 Credits)**

Research and writing or specific readings on a topic selected by the student and supervised by a faculty member of the Women's Studies Department.

Prerequisite: 1 course in WMST or WGSS.

Restriction: Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Repeatable to: 9 credits if content differs.

Formerly: WMST499.

WMSX - Women's Studies Education Abroad

WMSX200 Gender, Equality, and Sexuality in Scandinavia (3 Credits)

Sweden is one of the most gender equal countries in the world and is well-known for its progressive culture supported by forward-thinking laws and legislation. This course explores how concepts of gender, body, sexuality and race intersect in current debates about changing family structures, children's rights, and new ethical dilemmas in a changing Scandinavia.

Cross-listed with: LGBX200.

Credit Only Granted for: WMSX200 or LGBX200.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

WMSX201 Sex Education and Sexual Reform in Europe (3 Credits)

Provides insight to the ways in which sexual reform and sex education has shaped not only the history of sexuality in Europe, but also the very core of the various national identities. We will look into the different movements, campaigns, policies, and public debates regarding sexuality. We will discover the ways in which sex and sexuality are conveyed in sexual education aimed at children and youth by reading and watching examples of sex educational material.

Cross-listed with: LGBX201.

Credit Only Granted for: WMSX201 or LGBX201.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

WMSX202 Transgender in Scandinavia (3 Credits)

This course explores the history of trans activism with a special focus on Sweden, and how legislative and medical discourses change how we think about gender identities and rights. We also explore topics such as transphobia, gender disclosure and HIV criminalization laws, reproductive rights, gender-neutral pronouns, transgender children and their families, and how race and class intersect with being trans.

Cross-listed with: LGBX202.

Credit Only Granted for: WMSX202 or LGBX202.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

WMSX203 Economics of Gender (3 Credits)

Decisions around marriage, children, and work are taken by everyone on the planet. In this class we look at the economic elements that forge those choices. Moreover, while women's roles have changed beyond recognition in a century, we are still plagued with a dramatic under-representation of women in senior economic roles and the fact that they appear underpaid vis a vis men for doing the same work. This course looks at the factors influencing such issues, providing often surprising results.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

WMSX204 Nice Girls, Bad Girls, and Bitches: British Women and Gender from the Vote to Thatcher (3 Credits)

Explores the words and experiences of British women in a century of rapid social, economic and cultural transformation - when what it meant to be a 'British woman' was itself revolutionized, through decolonization and immigration. We will determine the constraints on women in war and peace, politics, education and paid work, marriage, motherhood and family, and celebrate rebels and non-conformists.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

WMSX300 Feminism(s) (6 Credits)

Engages with contemporary feminist thought through literature, literary criticism, history and theory of feminism. It examines the significant debates and key concepts of feminist thought through a range of political and philosophical texts and encourages students to develop their own critical understanding of gender and equality issues in the contemporary period. Explores feminism in relation to Marxism, psychoanalysis, sexuality, post-structuralism, neo-liberalism and international feminism.

Additional Information: This course is offered as part of the ARHU-in-London study abroad program. Students must apply for this program through Education Abroad: More information at globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

WMSX301 The Rising Generation: Youth, Age and Protest in Post-War Britain (3 Credits)

Explores important empirical and methodological questions about age, gender and sexuality, using a case study of post-war Britain. Considers the histories of "muted groups" such as children, adolescents, women and LGBT people, while thinking about how the language used about such groups is used to structure power relations in society. Engages with the ways conservatives and radicals used the language of age and life-stage to construct visions of the future, and how the experience of childhood, adolescence, adulthood and old age changed in Britain between 1945 and 1979.

XPER - xFoundry

XPER433 Xperiment to Address Grand Challenges (3 Credits)

Students will collaborate with each other using creative approaches to address complex real-world challenges. You will develop skills for interdisciplinary teamwork, problem-solving, and idea testing through hands-on experiences and guided discussions and reflections. By the end, you will form a multidisciplinary team of co-innovators ready to design a solution to a well-defined, real-world problem.

Restriction: Permission required by the xFoundry Program.

Additional Information: For more information, and to request permission to enroll, visit <https://xfoundry.umd.edu/xperience>.

GRADUATE APPROVED COURSES

A

- AASP - African American Studies (p. 454)
- AAST - Asian American Studies (p. 455)
- AGNR - Agriculture and Natural Resources (p. 456)
- AGST - Agricultural Science and Technology (<https://academiccatalog.umd.edu/graduate/courses/agst/>)

AASP - African American Studies

AASP400 Directed Readings in African American Studies (3 Credits)

The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.

Prerequisite: AASP202 or AASP100.

AASP401 Research Directions in African-American Studies (3 Credits)

Utilizing a pro seminar format, this course offers an overview of recent research on the experiences of African Americans and the African diaspora. The course will cover selective topics from research portfolios of department faculty related to the status of African Americans and the diaspora across a number of topics. Students will read recent original research studies and discuss with the authors both the theoretical underpinnings of the research, the methods and evaluate the interpretations. This course fulfills the capstone requirement for African American studies majors and certificate students by providing an opportunity to consolidate and integrate a range of ideas encountered in the curriculum.

Restriction: Must have earned a minimum of 90 credits; and must be major in African-American Studies.

AASP402 Classic Readings in African American Studies (3 Credits)

Classic readings of the social, economic and political status of blacks and other minorities in the United States and the Americas.

Prerequisite: AASP202 or AASP100.

AASP411 Black Resistance Movements (3 Credits)

A comparative study of the black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.

Prerequisite: AASP100.

AASP413 Gentrification: Have You Met the New Neighbors?: Issues of Belonging and Displacement in Urban Areas (3 Credits)

Explores and considers current scholarship on the history, modes and implications of the process of gentrification in various areas within the United States. The course will engage with history, culture, and policy factors related to the redevelopment of urban areas. Course texts will be interdisciplinary in their methodology and genre, and will include themes of race, gender, and class. These texts, combined with student engagement, class discussion, and directed assignments will help to develop a theoretical framework for the understanding of gentrification as systematic, profound and in most if not all cases, irreversibly detrimental.

AASP441 Science, Technology, and the Black Community (3 Credits)

Scientific knowledge and skills in solving technological and social problems, particularly those faced by the black community. Examines the evolution and development of African and African American contributions to science. Surveys the impact of technological changes on minority communities.

Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP443 Blacks and the Law (3 Credits)

The relationship between black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.

Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP468 Special Topics in Africa and the Americas (3 Credits)

Cultural, historical and artistic dimensions of the African experience in Africa and the Americas.

Repeatable to: 6 credits if content differs.

AASP478 Humanities Topics in African American Studies (3 Credits)

Advanced studies in the humanities, often requiring prerequisites, focusing on the literary, artistic and philosophical contributions of Africans and African Americans.

Repeatable to: 6 credits if content differs.

AASP479 Special Research in African-American Studies (1-9 Credits)

Supervised research activity within the African American Studies Department. This course is for both majors and non-majors who seek to work for a faculty member on their research project(s) and/or work in their research lab as a Research Assistant (RA). The purpose of this course is to expose undergraduate students to theories and methods used to understand the lives and experiences of Black people across the diaspora via hands-on/applied research experience. A faculty member must agree to supervise your research activity before students can enroll for course credit.

Recommended: AASP210.

Restriction: Permission of BSOS- African American Studies department; and sophomore standing or higher.

Repeatable to: 9 credits.

AASP493 Feminist and Nationalist Thought in Black Communities (3 Credits)

The historical and theoretical foundations of feminist and nationalist thought in Black Communities will be examined. Further, we will discover why feminist and nationalist thought has been routinely ignored or misrepresented as disparate, if not oppositional, themes in Black intellectual and political life.

Prerequisite: AASP101 or AASP100.

Credit Only Granted for: AASP493 or AASP499W.

Formerly: AASP499W.

AASP498 Special Topics in Black Culture (3 Credits)

Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.

Prerequisite: AASP202 or AASP100.

Repeatable to: 6 credits if content differs.

AASP499 Advanced Topics in Public Policy and the Black Community (3 Credits)

Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.

Prerequisite: AASP301; or permission of BSOS-African American Studies department.

Repeatable to: 6 credits if content differs.

AASP602 Interdisciplinary Research Methods in Afro-American Studies (3 Credits)

The purpose of this course is to familiarize graduate students with both the interdisciplinary and multidisciplinary approaches that academics employ when producing scholarship in the field of Afro-American Studies. This will examine the contours of the field with an emphasis on work in both the social sciences and the arts and humanities.

Restriction: Permission of BSOS-African American Studies department; or permission of EDUC-Education Policy and Leadership department.

AASP611 Classic Texts and Contemporary Issues (3 Credits)

Through a review and analysis of classic texts of Black intellectuals, artists, writers, and activists, students will examine the compelling themes in African American life and scholarship.

Restriction: Permission of BSOS-African American Studies department.

AASP621 Public Policy and Black Communities (3 Credits)

This course explores the role of race in social policy formation and emphasizes the importance of both political institutions and economic relations as determinants of the policy making process and context.

Restriction: Permission of BSOS-African American Studies department.

AAST - Asian American Studies

AAST420 Asian American Women: The Social Construction of Gender (3 Credits)

Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.

Cross-listed with: WGSS420.

Restriction: Must not have completed WMST420.

Credit Only Granted for: AAST420, WMST420 or WGSS420.

AAST421 Asian American Public Policy (3 Credits)

Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.

Cross-listed with: AMST418N.

Credit Only Granted for: AAST421, AAST498M or AMST418N.

Formerly: AAST498M.

AAST422 Asian American Women and Gender (3 Credits)

Examines Asian/American cultural production along with theories of gender and sexuality in the field of Asian American Studies. We consider how Asian American femininities/masculinities are conceived and circulated, drawing from a diverse selection of twentieth-century and contemporary texts, films and images that connect Asian American bodies to ideas of absence, danger, inscrutability, hyper- or hypo-sexuality, and virulence. Beginning with early to mid-twentieth century representations, the course attends to theories that clarify the contested relationship between the East/West and Asia/U.S. Also examined are the methods through which bodies differentiated by sex, gender, and race are managed, surveilled, and rehabilitated, with close attention to the enduring legacies of American expansionism and conquest, anti-immigration policies in the U.S., and twentieth-century wars and occupations in Asia. The course engages Women of Color feminisms, queer theory, and disability studies.

Credit Only Granted for: AAST498G or AAST422.

Formerly: AAST498G.

AAST424 Sociology of Race Relations (3 Credits)

Encourages sociological thinking about US racial and ethnic minority populations, with a focus on African Americans, Latinos, Asian Americans, and Native Americans. The central concern is to understand and explain racial/ethnic inequality. A wide array of topics are discussed, including prejudice and discrimination, slavery, residential segregation, cultural inequality, skin tone stratification, economic and educational disparities, and assimilation/generational processes.

Prerequisite: 6 credits in SOCY courses; or permission of the Sociology department.

Cross-listed with: SOCY424.

Credit Only Granted for: SOCY424 or AAST424.

AAST440 South Asian American Literature and Culture (3 Credits)

Examines writing by South Asian American authors and authors writing about South Asian American issues. It explores major South Asian diaspora themes, considering how migration, war, the events of 9/11, global capitalism, and the changing socio-political and racial scene have affected South Asians in the United States. We will use a transnational approach to consider how writers and filmmakers explore gender, class, religious, caste, and other differences amongst South Asian Americans. We will also examine the place of South Asian Americans in relation to other Asian American populations. We will consider how South Asian American texts disrupt traditional literary classifications based on national identities by reflecting the complex global conditions, imperialistic and capitalistic expansion, and interconnectedness of peoples, nations, and cultures that have transformed American literature and conceptions of American identity.

Credit Only Granted for: AAST440 or AAST498W.

Formerly: AAST498W.

AAST443 Asian American Politics (3 Credits)

Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.

Cross-listed with: AMST498J, GVPT368C.

Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.

Formerly: AAST498T.

AAST498 Advanced Topics in Asian American Studies (3 Credits)

Advanced study of the cultural and historical antecedents of contemporary Asian American society. Emphasis on the social, political, economic, and behavioral factors affecting Asian Americans and their communities.

Repeatable to: 6 credits if content differs.

AAST499 Senior Thesis (3 Credits)

Under the supervision of faculty, research regarding a specific topic of the Asian American experience will be completed.

Prerequisite: AAST201 and AAST200.

Restriction: Permission of UGST-Undergraduate Studies; and must be in Asian American Studies program.

Repeatable to: 6 credits if content differs.

AGNR - Agriculture and Natural Resources

AGNR489 Field Experience (1-4 Credits)

Credit according to time scheduled and organization of the course. A lecture series organized to study in depth a selected phase of agriculture not normally associated with one of the existing programs.

Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

Repeatable to: 4 credits if content differs.

Formerly: AGRI489.

AGNR499 Special Problems (1-3 Credits)

Formerly: AGRI499.

AGNR606 Program Planning and Evaluation in Agricultural Education (2-3 Credits)

Second semester. Analysis of community agricultural education needs, selection and organization of course content, criteria and procedures for evaluating programs.

Formerly: AGRI606.

AGNR661 Rural Community Analysis (3 Credits)

Communities as social systems composed of organizations which interact in a system of cultural institutions, norms, and values. Functional and structural linkages between organizations within as well as outside the community; rural vs. urban similarities and differences; and the role of the social processes such as competition, cooperation and conflict in the context of community power and leadership structure.

Formerly: AGRI661.

AGNR699 Special Problems (1-3 Credits)

Formerly: AGRI699.

AGNR789 Special Topics (1-3 Credits)

Repeatable to: 9 credits if content differs.

Formerly: AGRI789.

AGNR798 Seminar in Rural Education (1-3 Credits)

Problems in the organization, administration, and supervision of the several agencies of rural and/or vocational education.

Repeatable to: 8 credits if content differs.

Formerly: AGRI798.

AGNR799 Master's Thesis Research (1-6 Credits)

Formerly: AGRI799.

AGNR888 Apprenticeship in Education (1-8 Credits)

Apprenticeships in the major area of study are available to selected students whose application for an apprenticeship has been approved by the education faculty. Each apprentice is assigned to work for at least a semester full-time or the equivalent with an appropriate agency. The sponsor of the apprentice maintains a close working relationship with the apprentice and the other persons involved.

Prerequisite: Must have completed 6 credits in Education at the University of Maryland.

Restriction: Must have experience and must have a master's degree.

Formerly: AGRI888.

AGNR889 Internship in Education (3-8 Credits)

Internships in the major area of study for experienced students who are assigned to an appropriate school system, educational institution, or agency in a situation different than that in which the student is regularly employed.

Formerly: AGRI889.

AGNR899 Doctoral Dissertation Research (1-8 Credits)

Formerly: AGRI899.

AMSC - Applied Mathematics & Scientific Computation

AMSC420 Mathematical Modeling (3 Credits)

The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and 1 course with a minimum grade of C- from (STAT400, STAT410); and 1 course with a minimum grade C- from (CMSC106, CMSC131).

Cross-listed with: MATH420.

Credit Only Granted for: AMSC420 or MATH420.

AMSC452 Introduction to Dynamics and Chaos (3 Credits)

An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.

Prerequisite: MATH341; or MATH246 and one of (MATH240 or MATH461).

Cross-listed with: MATH452.

Credit Only Granted for: AMSC452 or MATH452.

AMSC460 Computational Methods (3 Credits)

Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246.

Cross-listed with: CMSC460.

Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

AMSC466 Introduction to Numerical Analysis I (3 Credits)

Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410.

Cross-listed with: CMSC466.

Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC498 Selected Topics in Applied Mathematics (1-3 Credits)

Topics in applied mathematics of special interest to advanced undergraduate students.

Repeatable to: 6 credits if content differs.

AMSC660 Scientific Computing I (3 Credits)

Fundamental techniques in scientific computation with an introduction to theory and software for each topic. Computer numbers and sources of errors, numerical linear algebra, optimization, and Monte Carlo methods.

Prerequisite: Must have knowledge of Matlab or Python.

Cross-listed with: CMSC660.

Credit Only Granted for: AMSC660 or CMSC660.

AMSC661 Scientific Computing II (3 Credits)

Numerical methods for solving ordinary and partial differential equations (elliptic, parabolic, hyperbolic, and dispersive): motivation, analysis, and implementation. Finite difference methods, finite element methods, Fourier and Chebyshev spectral methods, and meshless methods.

Prerequisite: Must have knowledge of Matlab or Python. Must have basic knowledge of ordinary and partial differential equations (MATH246 and MATH462 or equivalent, or permission of instructor).

Cross-listed with: CMSC661.

Credit Only Granted for: AMSC661 or CMSC661.

AMSC662 Computer Organization and Programming for Scientific Computing (3 Credits)

This course presents fundamental issues of computer hardware, software parallel computing, and scientific data management for programming for scientific computation.

Prerequisite: Must have Knowledge of C or Fortran.

Cross-listed with: CMSC662.

Credit Only Granted for: AMSC662 or CMSC662.

AMSC663 Advanced Scientific Computing I (3 Credits)

In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (CMSC663/CMSC663 and AMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.

Prerequisite: AMSC660 or CMSC660; and (AMSC661 or CMSC661).

Cross-listed with: CMSC663.

Restriction: Permission of instructor.

Credit Only Granted for: AMSC663 or CMSC663.

AMSC664 Advanced Scientific Computing II (3 Credits)

In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (AMSC663/CMSC663 and CMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.

Prerequisite: AMSC663 or CMSC663.

Cross-listed with: CMSC664.

Restriction: Permission of instructor.

Credit Only Granted for: AMSC664 or CMSC664.

AMSC666 Numerical Analysis I (3 Credits)

Approximation theory, numerical solution of initial-value problems, iterative methods for linear systems, optimization.

Prerequisite: CMSC466 or AMSC466; and MATH410.

Cross-listed with: CMSC666.

Credit Only Granted for: AMSC666 or CMSC666.

AMSC670 Ordinary Differential Equations I (3 Credits)

Existence and uniqueness, linear systems usually with Floquet theory for periodic systems, linearization and stability, planar systems usually with Poincare-Bendixson theorem.

Prerequisite: MATH405.

Cross-listed with: MATH670.

Credit Only Granted for: AMSC670 or MATH670.

AMSC671 Ordinary Differential Equations II (3 Credits)

The content of this course varies with the interests of the instructor and the class. Stability theory, control, time delay systems, Hamiltonian systems, bifurcation theory, and boundary value problems.

Prerequisite: MATH630.

Cross-listed with: MATH671.

Credit Only Granted for: AMSC671 or MATH671.

AMSC673 Partial Differential Equations I (3 Credits)

Analysis of boundary value problems for Laplace's equation, initial value problems for the heat and wave equations. Fundamental solutions, maximum principles, energy methods. First order nonlinear PDE, conservation laws. Characteristics, shock formation, weak solutions. Distributions, Fourier transform.

Prerequisite: MATH411; or students who have taken courses with comparable content may contact the department.

Cross-listed with: MATH673.

Credit Only Granted for: AMSC673 or MATH673.

AMSC674 Partial Differential Equations II (3 Credits)

Boundary value problems for elliptic partial differential equations via operator-theoretic methods. Hilbert spaces of functions. Duality, weak convergence. Sobolev spaces. Spectral theory of compact operators. Eigenfunction expansions.

Prerequisite: MATH673 or AMSC673; or permission of instructor.

Cross-listed with: MATH674.

Credit Only Granted for: AMSC674 or MATH674.

AMSC689 Research Interactions in Applied Mathematics and Scientific Computation (1-3 Credits)

The students participate in a vertically integrated (undergraduate, graduate and/or postdoctoral, faculty) research group. Format varies, but includes regular meetings, readings and presentations of material. See graduate program's online syllabus or contact the graduate program director for more information.

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

AMSC698 Advanced Topics in Applied Mathematics (1-4 Credits)

Repeatable to: 99 credits if content differs.

AMSC699 Applied Mathematics Seminar (1-3 Credits)

Seminar to acquaint students with a variety of applications of mathematics and to develop skills in presentation techniques.

Repeatable to: 99 credits if content differs.

AMSC714 Numerical Methods For Stationary PDEs (3 Credits)

Topics include: Maximum principle, finite difference method, upwinding, error analysis; Variational formulation of elliptic problems, inf-sup theory; The finite element method and its implementation; Piecewise polynomial interpolation theory in Sobolev spaces; A priori and a posteriori error analyses, adaptivity; Fast solvers; Variational crimes; Mixed finite element methods.

Prerequisite: One graduate level course in partial differential equations or one graduate level course in numerical analysis or scientific computing; or permission of instructor.

Credit Only Granted for: AMSC 714 or AMSC 614.

Formerly: AMSC614.

Additional Information: This course is a complement to the graduate courses MATH 673 and MATH 674 in PDEs, AMSC 666 in numerical analysis, and AMSC 660 and AMSC 661 in scientific computing.

AMSC715 Numerical Methods for Evolution Partial Differential Equations (3 Credits)

Topics include: Heat and wave equations: maximum principle, energy methods and Sobolev spaces, finite difference and finite element methods, von Neumann analysis, stability and error estimates; Linear first order PDEs: upwinding and monotone schemes, finite difference, finite volume, and discontinuous Galerkin methods; Nonlinear conservation laws: weak solutions and entropy conditions, monotone methods.

Prerequisite: Permission of instructor; or one graduate level course in partial differential equations or one graduate level course in numerical analysis or scientific computing.

Credit Only Granted for: AMSC612 or AMSC715.

Formerly: AMSC612.

Additional Information: This course continues AMSC 714, but can be taken independently, and is a complement to the graduate courses MATH 673 and MATH 674 in PDEs, AMSC 666 in numerical analysis, and AMSC 660 and AMSC 661 in scientific computing.

AMSC721 Mathematical Population Biology (3 Credits)

Foundational principles for modeling and analysis of real-life phenomena in population biology. Topics include design and analysis of models for general classes of unstructured (single species discrete-time and continuous-time, interacting populations etc.) and structured (spatially-structured, age-structured, sex-structured) population biology models in ecology and epidemiology, dynamics analysis of population biology models (asymptotic stability and bifurcation theory), numerical discretization of continuous-time models, statistical analysis (parameter estimation, uncertainty quantification).

Prerequisite: Calculus, differential equations, modeling, linear algebra, familiarity with mathematical software and programming languages (e.g., MATLAB, R, Python etc.); or permission of instructor.

Cross-listed with: BIOL721.

Credit Only Granted for: AMSC721 or BIOL721.

Additional Information: Open to advanced undergraduates by permission of instructor.

AMSC760 Applied Statistics Practicum (3 Credits)

A semester long applied statistical project (a minimum 10 hours per week or 120 hours in total), in an internship of collaborative research-laboratory setting working on a substantive applied quantitative project with significant statistical content.

Prerequisite: Must have completed one year of graduate study in Applied Statistics.

Restriction: Must have project proposal approved by SAC coordinator.

AMSC761 Applied Statistics Seminar (1 Credit)

Seminar taught once yearly on a rotating basis by faculty engaged in the Applied Statistics area. Required of AMSC Applied Statistics area doctoral students within one year following the completion of their practicum project, AMSC760, and open only to Applied Statistics Area students. The seminar will include sessions on presentation skills, but will consist primarily of oral presentations of students' past Practicum project results. Students attend throughout the term, give one talk (at least 1/2 hour).

Recommended: STAT700 or STAT701; and (STAT740 or STAT741).

AMSC762 Data Analysis Project (1 Credit)

This course cannot be used to meet any of the Applied Statistics Area's seminar requirements. Offered yearly, required of and limited to MS non-thesis and doctoral students in Applied Statistics Area, for whom the resulting projects serve as a Qualifying Exam component. After 5-6 lectures or presentations on components of successful data analyses and write-ups, 3-4 sessions will discuss previous student project submissions. The culminating project, to be completed in a two week period between semesters, is an analysis and written report of one of three project choices made available each year to represent a spectrum of realistic applied statistical problems.

Restriction: Permission of CMNS-Applied Mathematics department; and permission of instructor.

AMSC763 Advanced Linear Numerical Analysis (3 Credits)

Advanced topics in numerical linear algebra, such as dense eigenvalue problems, sparse elimination, iterative methods, and other topics.

Prerequisite: AMSC666 or CMSC666; or permission of instructor.

Cross-listed with: CMSC763.

Credit Only Granted for: AMSC600, AMSC763, CMSC760, or CMSC763.

Formerly: AMSC600 and CMSC760.

AMSC764 Advanced Numerical Optimization (3 Credits)

Modern numerical methods for solving unconstrained and constrained nonlinear optimization problems in finite dimensions. Design of computational algorithms and the analysis of their properties.

Prerequisite: MATH410; or permission of instructor. Cross-listed with CMSC764.

Credit Only Granted for: AMSC607, AMSC764 or CMSC764. Formerly: AMSC607.

AMSC799 Master's Thesis Research (1-6 Credits)**AMSC808 Advanced Topics in Applied Mathematics (1-3 Credits)**

Advanced topics of current interest.

Restriction: Permission of instructor.

Repeatable to: 18 credits.

AMSC819 Applied Mathematics Seminar (1-3 Credits)

Advanced topics of current interest.

Restriction: Permission of instructor.

Repeatable to: 18 credits.

AMSC898 Pre-Candidacy Research (1-8 Credits)**AMSC899 Doctoral Dissertation Research (1-8 Credits)**

AMST - American Studies

AMST418 Cultural Themes in America (3 Credits)

Examination of structure and development of American culture through themes such as "growing up American," "culture and mental disorders," "race," "ethnicity," "regionalism," "landscape," and "humor."

Repeatable to: 6 credits if content differs.

AMST418N Asian American Public Policy (3 Credits)

Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.

Cross-listed with: AAST421.

Credit Only Granted for: AAST421, AAST498M or AMST418N.

Formerly: AAST498M.

AMST425 Film and American Landscape (3 Credits)

Explores how representations of various geographic spaces in American film impact our understanding of community, identity, and place. In particular, we will think about how these spaces are culturally produced and changeable rather than static. The same space can hold diverse meanings for various groups of people and how such a space is represented in film is often wrapped up with issues of power, the reinforcement of stereotypes, and the creation of self/other dichotomies. By analyzing a variety of narrative, documentary, major studio, and independent films, we will seek to understand how American films' representations of rural, urban, and suburban spaces both reflect, contradict, and often influence our lived experiences of these spaces; in other words, this course will examine how the "reel" intersects with the "real".

Credit Only Granted for: AMST418K or AMST425.

Formerly: AMST418K.

AMST428 American Cultural Eras (3 Credits)

Investigation of a decade, period, or generation as a case study in significant social change within an American context. Case studies include "Antebellum America, 1840-1860" and "American culture in the Great Depression."

Repeatable to: 6 credits if content differs.

AMST429 Perspectives on Popular Culture (3 Credits)

Topics in popular culture studies, including the examination of particular genres, themes, and issues.

Repeatable to: 6 credits if content differs.

AMST450 Seminar in American Studies (3 Credits)

Developments in theories and methods of American Studies scholarship, with emphasis upon interaction between the humanities and the social sciences in the process of cultural analysis and evaluation.

Prerequisite: AMST201 and AMST340; and 1 course in AMST.

Restriction: Senior standing; and must be in American Studies program.

AMST498 Special Topics in American Studies (3 Credits)

Topics of special interest.

Repeatable to: 9 credits if content differs.

AMST498J Asian American Politics (3 Credits)

Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.

Cross-listed with: AAST443, GVPT368C.

Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.

Formerly: AAST498T.

AMST499 Independent Studies (1-3 Credits)

Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.

Restriction: Permission of ARHU-American Studies department; and must be in American Studies program.

Repeatable to: 6 credits if content differs.

AMST601 Introductory Theories and History in American Studies (3 Credits)

Explores the formative literature, theories, research approaches, and history of American Studies.

Restriction: Must not be a Graduate Advanced Special Student.

AMST602 Interdisciplinary Research Methods and Bibliographic Instruction (3 Credits)

Advanced instruction interdisciplinary research strategies, bibliography, and the structure of systems of scholarly communication in the fields and subfields of American Studies.

AMST603 Current Approaches to American Studies (3 Credits)

Builds on AMST601 and explores contemporary literature, theory, and intellectual issues in American Studies.

Restriction: Must be in one of the following programs (American Studies (Master's); American Studies (Doctoral)). Or permission of ARHU-American Studies department; and permission of instructor.

AMST628 Seminar in American Studies (3 Credits)

AMST629 Seminar in American Studies (3 Credits)

AMST638 Orientation Seminar: Material Aspects of American Civilization (3 Credits)

Class meets at the Smithsonian.

AMST639 Reading Course in Selected Aspects of American Civilization (3 Credits)

Class meets at the Smithsonian.

AMST650 Material Culture Studies Theory (3 Credits)

Readings and analysis of canonical and current scholarly approaches to the study of material culture. Covers a wide range of material culture genres and subfields, and focuses on artifacts and the built environment.

AMST655 Introduction to Museum Scholarship (3 Credits)

Provides students a basic understanding of museums as cultural and intellectual institutions. Topics include the historical development of museums, museums as resources for scholarly study, and the museum exhibition as medium for presentation of scholarship.

Cross-listed with: ANTH655, HIST610, INST653.

Credit Only Granted for: AMST655, ANTH655, HIST610, INST728T or INST653.

AMST659 Special Topics: Collaborative Curation (3 Credits)

This seminar considers the history of curation and curators within the institutional setting of museums and offers participants the opportunity, and challenge, to engage in curatorial practice by planning an exhibition that focuses on a critical aspect of life at and around the University of Maryland over the years.

Prerequisite: AMST655, ANTH655 or HIST610.

Recommended: AMST856, ANTH856, or HIST810; and AMST857, ANTH857 or HIST811.

Cross-listed with: ANTH659, HIST688, INST788.

Restriction: Must have permission of the Museum Studies and Material Culture program.

Repeatable to: 6 credits if content differs.

Additional Information: Students enrolled in the MSMC (Museum Studies and Material Culture) certificate program will be given priority for enrollment.

AMST698 Directed Readings in American Studies (3 Credits)

This course is designed to provide students with the opportunity to pursue independent, interdisciplinary research and reading in specific aspects of American culture under the supervision of a faculty member.

Repeatable to: 6 credits if content differs.

AMST789 Professional Development in Dance and Theatre (1 Credit)

This course will introduce graduate students to the academic job market, competitive fellowships, and ALT-AC (alternative academic) careers. Topics will include the interdisciplinary job market, cover letters, cv's, teaching and research statements, the teaching/artist portfolio, the diversity statement, interfolio, letters of recommendation, writing samples, websites, interviewing, and careers beyond academia.

Cross-listed with: TDPS789.

Repeatable to: 4 credits.

Formerly: THET669K, DANC689F.

AMST798 Non-Thesis Research (1-3 Credits)**AMST799 Master's Thesis Research (1-6 Credits)****AMST851 Interpretation of Cultural Landscapes (3 Credits)**

A research seminar that provides students an opportunity to survey the principal approaches to studying a cultural landscape, learn how to apply and adapt a field research method, and produce a primary research report on a cultural landscape of their choice.

AMST856 Museum Research Seminar (3 Credits)

A research seminar focusing on the practice and presentation of cultural and historical scholarship in museums and historical sites. Students will complete an original research project on the challenges and opportunities of public exhibition and interpretation of cultural and historical research.

Prerequisite: AMST655, ANTH655, or HIST610.

Cross-listed with: ANTH856, HIST810, INST786.

Credit Only Granted for: AMST856, ANTH856, HIST810, INST728U or INST786.

AMST857 Museum Scholarship Practicum (3-6 Credits)

Students devise and carry out a research program using the collections at the Smithsonian Institution or some other cooperating museum, working under joint supervision of a museum professional and a university faculty member.

Prerequisite: AMST856, ANTH856, or HIST810.

Cross-listed with: ANTH857, HIST811, INST787.

Restriction: Permission of Museum Scholarship Program required.

Credit Only Granted for: AMST857, ANTH857, HIST811, INST728I or INST787.

AMST878 American Studies Pedagogy Mentoring (1-3 Credits)

This course provides graduate teaching assistants with a structured approach to pedagogical content, techniques, and collaborative practices that they learn and then can use throughout their careers. It also commits a core faculty member to teaching pedagogy and makes it possible for the course to become a formal part of one's load.

Restriction: Must be an AMST graduate assistant.

Repeatable to: 12 credits.

AMST898 Pre-Candidacy Research (1-8 Credits)**AMST899 Doctoral Dissertation Research (1-8 Credits)**

ANSC - Animal Science

ANSC401 Animal Growth and Development for Production Agriculture (3 Credits)

An integration of the physiological, genetic, and nutritional bases of animal growth, development, and body composition with application to livestock production.

Prerequisite: ANSC201.

ANSC410 The Gut Microbiome and its Roles in Health and Disease (3 Credits)

A comprehensive perspective of the role of gut microbiome/microflora in nutrition, metabolism, disease prevention and health issues including farm animal health and food value, and human gastrointestinal health and immunity.

Prerequisite: BSCI223, ANSC212, ANSC327, EPIB301, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC489M or ANSC410.

Formerly: ANSC489M.

ANSC417 Regulatory Issues in Animal Care and Management (3 Credits)

A study of regulatory issues affecting animal care and management in the livestock industry. Guest speakers and classroom discussions will focus on key topics including animal welfare, feed and drug regulations, animal identification, CAFO management, processing and marketing of animal products.

Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, ANSC262, or ANSC282; or permission of instructor.

Additional Information: Field trips may be required for this course.

ANSC435 Experimental Embryology (3 Credits)

Experimental approaches in animal embryology with emphasis on, domestic livestock systems as applied to research and production systems. Lab will, include hands-on experiments and demonstrations of techniques that are commonly, used in industry and research.

Prerequisite: ANSC212 or ANSC201.

Recommended: ANSC446.

Credit Only Granted for: ANSC435 or ANSC489M.

Formerly: ANSC489M.

ANSC436 Animal Health Policy and Communication (3 Credits)

Intended for upper level students in Veterinary Medicine or Animal Science as well as other students who are interested in understanding how science and politics interact and influence animal health policy and how veterinarians and animal scientists can effectively communicate science to non-scientists such as legislators and policymakers.

Recommended: Completion of ANSC225 and ANSC340 recommend.

Cross-listed with: VMSC436.

Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; or permission of AGNR-VA-MD Regional COL Veterinary Med.

Credit Only Granted for: ANSC489A, ANSC436, or VMSC436.

Formerly: ANSC489A.

ANSC437 Animal Biotechnology (3 Credits)

Key concepts and current issues in animal biotechnology are covered. Current techniques and applications systems as well as social, ethical, and regulatory issues associated with biotechnology will be discussed.

Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

ANSC440 Zoonotic Diseases and Control (3 Credits)

Global perspective of foodborne diseases common to animals and man, specifically those caused by farm animal-originated human pathogens (zoonoses) and their control. A selection of important zoonoses and food safety issues will be specifically covered with an emphasis on the principles of zoonotic disease transmission and control, risk factors to humans, and surveillance methods.

Prerequisite: BSCI223, ANSC212, ANSC327, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC440 or ANSC489R.

Formerly: ANSC489R.

ANSC443 Physiology of Lactation (3 Credits)

A comprehensive survey of lactation in laboratory and domestic animals. Other species are discussed where possible. Emphasis will be placed on physiological aspects of milk synthesis and secretion and on the cellular and molecular biology of mammary gland development.

Prerequisite: ANSC212; and (CHEM231, PLSC275 or AGST275).

Recommended: BCHM463.

ANSC444 Domestic Animal Endocrinology (3 Credits)

Current developments in endocrinology as it relates to animals used in the production of food and other products important to the well being of humans will be covered.

Prerequisite: ANSC212; or permission of instructor.

Restriction: Must not have completed ANSC644.

Credit Only Granted for: ANSC489I, ANSC444, or ANSC644.

Formerly: ANSC489I.

ANSC445 Comparative Digestive Physiology (3 Credits)

Comparative gastrointestinal physiology and the pathophysiology of diseases involved in animal-related research. A comparative approach will be presented for much of this material, using the human, canine, porcine, equine, bovine, and avian when information is available. The ultimate aim of the course is to provide a comprehensive knowledge of comparative gastrointestinal pathophysiology, and to give students an insight into the current field of human and veterinary gastroenterology. Students should feel more comfortable reading cutting edge literature by the end of the course, and should acquire a greater understanding of potential digestive disease areas for their future career such as graduate, medical, and veterinary students.

Prerequisite: ANSC212.

ANSC446 Physiology of Mammalian Reproduction (3 Credits)

Anatomy and physiology of reproductive processes in domesticated and wild mammals.

Prerequisite: ANSC212 or BSCI440.

ANSC447 Physiology of Mammalian Reproduction Laboratory (1 Credit)

Gross and micro-anatomy, artificial insemination, estrous cycle synchronization and invitro-fertilization procedures and analytical techniques useful in animal management and reproduction.

Prerequisite: Must have completed or be concurrently enrolled in ANSC446.

ANSC450 Animal Breeding Plans (3 Credits)

Design of animal breeding programs for the genetic improvement of livestock and companion animal species. Principles of population and quantitative genetics. Genetic evaluations of animals, selection strategies and crossbreeding systems. Incorporation of statistics and biotechnology into animal breeding plans.

Prerequisite: ANSC101; and 1 course with a minimum grade of C- from (MATH120, MATH136, MATH140, or BIOM301).

Restriction: Junior standing or higher.

ANSC452 Avian Physiology (3 Credits)

The digestive, excretory, respiratory, circulatory, immune, skeletal muscle, endocrine and nervous systems of avian species will be examined.

Prerequisite: ANSC212.

Restriction: Junior standing or higher.

ANSC453 Animal Welfare and Bioethics (3 Credits)

Ethical concerns related to the use of animals in modern society. Historical and philosophical overview of animal welfare and bioethics. Applied ethical discussions on human/animal interrelationships, physical and genetic manipulation, and other current issues associated with the treatment of animals used in food production, research, zoos, and as pets.

Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161); or permission of instructor.

Restriction: Junior standing or higher.

ANSC454 Nutritional Aspects of Metabolic Disease (3 Credits)

Biochemical and physiological fundamentals of nutrition. Discussion of protein, fat, carbohydrate, minerals and vitamins and their roles and interrelationships innutrition, metabolism and diseases in humans and animals. The course will use recommended texts for foundation material as well as research papers to provide in-depth coverage and illustrate emerging themes in metabolic aspects of nutrition and disease.

Prerequisite: CHEM131 and ANSC101, or BSCI170; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC489O or ANSC454.

Formerly: ANSC489O.

ANSC455 Applied Animal Behavior (3 Credits)

Principles of animal behavior applied to production systems in animal agriculture.

Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161).

ANSC460 Comparative Vertebrate Immunology (3 Credits)

Basic concepts in immunology, and comparing immunity in different vertebrates, including organization of immune systems, innate and adaptive immune responses. Special attention will be paid to how cell-mediated and humoral immune responses are induced in natural infections, and what are the effector mechanisms in both of these processes. Immune response in representative disease models such as infections with viruses and bacteria, cancer, and autoimmune disease will be discussed. Lectures concerning cutting-edge research will also be given.

Prerequisite: ANSC212, BSCI201, or BSCI440.

Credit Only Granted for: ANSC460 or ANSC489I.

Formerly: ANSC489I.

ANSC489 Current Topics in Animal Science (1-3 Credits)

Examination of current developments in the animal sciences.

Repeatable to: 6 credits if content differs.

ANSC497 Animal Biotechnology Recombinant DNA Laboratory (3 Credits)

An advanced course offering hands-on experience in performing recombinant DNA experiments. Current molecular biology techniques used for cloning genes, analyzing the gene products, and modifying the genes of animals will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.

Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

Recommended: ANSC437 and ANSC435.

ANSC617 Quantative Techniques in Physiology and Nutrition (3 Credits)

Development and evaluation of quantative techniques to explore mechanisms of physiological and nutritional regulation. Kinetic and dynamic models will be emphasized.

Prerequisite: MATH120; or permission of AGNR-Animal & Avian Sciences department.

ANSC624 Recent Advances in Animal and Avian Sciences (1 Credit)

Seminar course in advanced animal science research.

Restriction: Must be an Animal Sciences graduate student.

Credit Only Granted for: ANSC698C or ANSC624.

Formerly: ANSC698C.

ANSC625 Developing Presentation Skills (1 Credit)

Seminar designed to teach oral presentation skills for animal science students.

Restriction: Must be an Animal Sciences graduate student.

Credit Only Granted for: ANSC625 or ANSC698D.

Formerly: ANSC698D.

ANSC627 Molecular and Quantitative Genetics (3 Credits)

Classical, molecular, and population genetics with specific emphasis on animal systems will be covered. Also, disseminate information on molecular approaches for manipulating genetics at the whole animal level (transgenic and cloning). Other model organisms will be discussed to provide a conceptual framework.

ANSC644 Molecular and Cellular Endocrinology (3 Credits)

A comprehensive course covering the major endocrine systems in animals. Lecture topics include major endocrine axes, hormonal regulation of homeostasis, growth and reproduction, and endocrine mechanisms of action. Advanced concepts in the molecular and cell biology of hormone action and regulation addressed in weekly discussion sessions centered on current research publications in the field of molecular and cellular endocrinology.

Restriction: Must not have completed ANSC444.

Credit Only Granted for: ANSC444, ANSC489I, ANSC644, or ANSC688I.

Formerly: ANSC688I.

ANSC660 Poultry Literature (1-4 Credits)

Readings on individual topics are assigned. Written reports required.

Methods of analysis and presentation of scientific material are discussed.

ANSC688 Special Topics (1-4 Credits)

Lectures, experimental courses, and other special subjects in the fields of animal sciences and veterinary medicine.

Repeatable to: 4 credits.

ANSC698 Seminar (1 Credit)

Students are required to prepare papers based upon current scientific publications relating to animal science, or upon their research work, for presentation before and discussion by the class; (1) recent advances; (2) nutrition; (3) physiology; (4) biochemistry.

ANSC699 Special Problems in Animal Science (1-2 Credits)

Work assigned in proportion to amount of credit. Prerequisite: approval of staff. Problems will be assigned which relate specifically to the character of work the student is pursuing.

ANSC799 Master's Thesis Research (1-6 Credits)**ANSC898 Pre-Candidacy Research (1-8 Credits)****ANSC899 Doctoral Dissertation Research (1-8 Credits)**

ANTH - Anthropology

ANTH407 Anthropology and Development (3 Credits)

An examination of the intersection of Anthropology, international development and foreign policy. The course provides students with conceptual tools to engage with international development and other assistance projects in areas including conservation and climate change, governance and human security, gender, human rights, and political stability from a variety of viewpoints.

Jointly offered with: ANTH607.

Credit Only Granted for: ANTH407 or ANTH607.

ANTH411 Global Migration and Health (3 Credits)

The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.

Jointly offered with: ANTH611.

Credit Only Granted for: ANTH411 or ANTH611.

ANTH412 Hypermarginality and Urban Health (3 Credits)

Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality—the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.

Credit Only Granted for: ANTH412 or ANTH612.

ANTH413 Health Inequities, Care, and Justice in the United States (3 Credits)

Systematic health inequities in the United States are well documented, shaped by structural forces that determine who gets sick, what illnesses/diseases they are vulnerable to, what their care options are, how they are treated while seeking care, and their ultimate health outcomes. This course applies the concepts, methods, and theoretical approaches of medical anthropology to examine the roots and implications of these health inequities. Students will also assess efforts to address these inequities through tailored interventions and social movements organized around equity and justice.

Jointly offered with: ANTH613.

Credit Only Granted for: ANTH413 or ANTH613.

ANTH415 Critical Global Health (3 Credits)

Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.

Recommended: ANTH210, ANTH310, or ANTH265 or a similar course focused on global health or medical anthropology course.

Jointly offered with: ANTH615.

Credit Only Granted for: ANTH415 or ANTH615.

ANTH416 Anthropology of Global Violence (3 Credits)

An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts. Jointly offered with ANTH616.

Credit Only Granted for: ANTH4680, ANTH66 80, ANTH416 or ANTH616.

Formerly: ANTH4680.

ANTH421 Nutritional Anthropology (3 Credits)

The study of nutrition from an anthropological perspective which includes both biological and cultural aspects of nutrition. We will explore how nutrition can affect culture how culture can affect nutrition. Nutritional anthropology includes the study of cross-cultural variation in diet, nutritional status and subsistence systems as well as variation in these factors over the evolutionary course of human existence, from prehistoric and historic to modern times. Students will be introduced to nutritional anthropology and provided with the basics for assessing reliability and feasibility of nutritional advice and policy encountered in everyday modern life in a global setting.

Credit Only Granted for: ANTH421, ANTH428N, or ANTH621.

Formerly: ANTH428N.

ANTH422 Human-Plant-(Human & Bioactive Plant) Interaction (3 Credits)

This seminar course will discuss the evolutionary, historical, cultural, and ecological aspects of coevolution with respect to humans and their interactions with specific bioactive plants. Case studies of human-plant-(pathogen) interactions will be discussed as well as an inclusive survey of anthropologically important phytochemicals. The seminar incorporates human-plant-(pathogen) interactions into models of human evolution and ecology.

Prerequisite: ANTH220 and ANTH320; or permission of BSOS-Anthropology department.

Credit Only Granted for: ANTH422.

Formerly: ANTH428I.

ANTH424 Human Skeletal Anatomy (3 Credits)

In addition to descriptive information about bone identification, the lectures will address the history of human anatomical studies, the development of analytical techniques, and the application of these techniques in paleoanthropology, comparative anatomy, functional anatomy (and related fields, such as physical therapy), and skeletal analysis in museum, historic cemetery, archaeological, and forensic settings. Emphasis will be on the development of the skeleton and recognition of normal variation in bones. The laboratory sessions will allow the students access to human bones for the purpose of identification, documentation of human variation, and application of techniques to obtain information about the living individual from the skeleton.

ANTH428 Special Topics in Bioanthropology (3 Credits)

Advanced research courses in biological anthropology on changing topics that correspond to new theoretical interests, faculty research interests, or the specialties of visiting scholars. Prerequisites or background knowledge vary with the topic. Check with the department for requirements.

Repeatable to: 6 credits if content differs.

ANTH429 Advanced Special Topics in Biological Anthropology (3 Credits)

Upper level biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH433 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)

Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.

Jointly offered with: ANTH633.

Credit Only Granted for: ANTH433 or ANTH633.

ANTH435 Archaeological Ethnography and Heritage Ethnography (3 Credits)

Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit.

This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.

Jointly offered with: ANTH635.

Credit Only Granted for: ANTH435 or ANTH635.

ANTH436 Norse Archaeology (3 Credits)

The archaeology of the Norse world from the 8th century through to the end of the 11th century. We will investigate the possible causes of the Norse expansion out of Scandinavia. The various settlements and colonies of Norse Russia, the Baltic, Britain, Ireland and the North Atlantic Islands (Orkney, the Shetlands, the Faroes, Iceland, Greenland and Newfoundland) will be examined. While we will look at the Norse in detail we will also attempt to put their raiding, trading, and settlements into a larger Eurasian context through a study of the archaeology of this period.

Credit Only Granted for: ANTH436 or ANTH636.

ANTH438 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ANTH440 Theory and Practice of Historical Archaeology (3 Credits)

Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.

Prerequisite: ANTH240. Jointly offered with ANTH640.

Credit Only Granted for: ANTH440 or ANTH640.

ANTH441 Archaeology of Diaspora (3 Credits)

"Diaspora" is defined, theorized, deconstructed, and employed throughout the social sciences. There are context specific relations that define who leaves, when, and how they are received in the new place of settlement. Over the course of the semester the class will actively and critically examine the relevance of historical archaeology and material culture studies in the understanding of the formation, experiences, and transformation of diasporic groups over time and space.

Prerequisite: ANTH240.

Credit Only Granted for: ANTH448A, ANTH688Z, or ANTH441.

Formerly: ANTH448A.

ANTH442 Public Archeology (3 Credits)

Explores the uses and environments for archaeological work through a discussion of museum, electronic media, heritage settings, outdoor history museums, including the legal environment that offers protection for archaeological remains. The course exposes students to the majority of cultural media within which archaeology is currently practiced. The interdisciplinary course is a survey of the progress made within and beyond anthropology in understanding the function of heritage, public memory, tourism, and the other popular uses of materials from the past, including the progress made in linguistics psychology and other cognitive disciplines in understanding the purpose of the past.

Credit Only Granted for: ANTH442, ANTH448V, or ANTH642.

Formerly: ANTH448V.

ANTH444 Theories of the Past (3 Credits)

The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern society. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.

Prerequisite: ANTH240. Jointly offered with ANTH740.

Credit Only Granted for: ANTH448P, ANTH444, or ANTH740.

Formerly: ANTH448P.

ANTH445 Laboratory Methods in Archaeology (3 Credits)

The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn the basics of laboratory techniques necessary for the final analysis and interpretation of field data.

Prerequisite: ANTH496.

Recommended: ANTH240.

ANTH447 Material Culture Studies in Archaeology (3 Credits)

An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.

Prerequisite: ANTH240.

Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.

Formerly: ANTH448C.

ANTH448 Special Topics in Archaeology (3 Credits)

Advanced topics in archaeological research, corresponding to new theoretical developments, faculty research interests, or specialties of visiting scholars. Prerequisites may vary with course topic; check with the department for requirements.

Prerequisite: ANTH240.

Repeatable to: 6 credits if content differs.

ANTH449 Advanced Special Topics in Archaeology (3 Credits)

Upper level archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH450 Theory and Practice of Environmental Anthropology (3 Credits)

An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.

Restriction: Junior standing or higher. Jointly offered with ANTH650.

Credit Only Granted for: ANTH450 or ANTH650.

ANTH451 Environmental Archaeology (3 Credits)

An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.

Credit Only Granted for: ANTH451, ANTH651, ANTH448F, ANTH668F.

Formerly: ANTH448F.

ANTH452 Anthropology and Climate Change (3 Credits)

Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.

Prerequisite: ANTH220, ANTH222, ANTH240, or ANTH260.

Credit Only Granted for: ANTH452 or ANTH652.

ANTH453 Archaeology of the Modern City (3 Credits)

An overview of how social scientists, in particular historical archaeologists, approach modern cities as being part of the materiality of the social structure and order.

Prerequisite: ANTH240; or permission of instructor.

Credit Only Granted for: ANTH448Q or ANTH453.

Formerly: ANTH448Q.

ANTH454 Political Ecology (3 Credits)

The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.

Jointly offered with: ANTH654.

Credit Only Granted for: ANTH454 or ANTH654.

ANTH456 Conservation and Indigenous People in South America (3 Credits)

Considers indigenous peoples and their relation to the lands on which they live, issues of traditional indigenous knowledge and land management as well as new contributions by indigenous peoples to changing landscapes. Reviews legal mechanisms and instruments through which indigenous peoples have rights to the resources they occupy and utilize. Taking specific cases and examining them through the lens of political and social ecology, the role of indigenous peoples in local and worldwide conservation efforts is considered. Case studies will emphasize the indigenous peoples and conservation policies of Latin America.

Jointly offered with: ANTH656.

Credit Only Granted for: ANTH468L, ANTH456, ANTH688L, or ANTH656.

Formerly: ANTH468L.

ANTH461 Language as Practice (3 Credits)

An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.

Jointly offered with: ANTH661.

Credit Only Granted for: ANTH461, ANTH468I or ANTH661.

Formerly: ANTH468I.

ANTH462 Amazon Through Film (3 Credits)

An interdisciplinary course that utilizes film to consider the Amazon basin, its history, peoples, and landscapes through cinematic representations. The course places the films in the context of film history and critical theory. The course takes into consideration the Brazilian, North American, Mexican, European and Argentine creators of the films and their visions of Amazonia, as well as the audiences and markets to which the films are intended.

Credit Only Granted for: ANTH468D or ANTH462.

Formerly: ANTH468D.

ANTH463 Climate Cultures (3 Credits)

Climate change is an inherently global problem. To a significant degree, its causes and consequences are cultural in nature: Climate change impacts, mitigation and adaptation efforts are perceived and addressed in culture-specific ways. This course will be an overview of the holistic and anthropological approaches to the study of how culture frames what we know and how we respond to climate change. Readings, lectures, and discussions will focus on how culture is expressed through the interplay of processes and practices in specific economic, social and political contexts.

ANTH464 Anthropology of Cultural Heritage (3 Credits)

A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.

Prerequisite: ANTH260. Jointly offered with ANTH664. Credit only granted for: ANTH469T, ANTH689T, ANTH464, ANTH664.

Formerly: ANTH469T.

ANTH465 Applied Ethnoecology (3 Credits)

Introduces theory and methodology for applied ethnoecology, the study of human relationships with and knowledge about the environment. Students will examine human relationships with both biotic (e.g. plants and animals) and abiotic (e.g. glaciers, weather) elements of ecological systems to better understand how knowledge frameworks and cultural practices shape human experiences of the natural world. The history of ethnoecology as a discipline will be covered, before moving to applied case studies where different ecological knowledge systems intersect as a result of conservation projects, bioprospecting, and other contemporary environmental issues. This course involves both discussion and project-based learning including StoryMaps, cultural domain analysis and text analysis.

Credit Only Granted for: ANTH465 or ANTH688E.

ANTH466 Anthropology of Work (3 Credits)

Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.

Jointly offered with: ANTH666.

Credit Only Granted for: ANTH466 or ANTH666.

ANTH467 Researching Environment and Culture (3 Credits)

In this applied course, students use mixed methods to research a locally-based, environmental sustainability issue. Classroom time will be split between seminar discussions of theory, methods, and relevant case studies, and lab work focused on project development, data analysis, and report write up. Students are expected to spend additional time outside class on data collection, analysis, and writing

Recommended: ANTH322, ANTH360, ENSP101, or ENSP102.

ANTH468 Special Topics in Cultural Anthropology (3 Credits)

Advanced courses in varying specialty areas of cultural anthropology that respond to new theoretical developments, faculty research interests, or specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH469 Advanced Special Topics in Cultural Anthropology (3 Credits)

Upper level cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH473 Native American Languages and Cultures (3 Credits)

An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the structure of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.

Jointly offered with: ANTH673.

Credit Only Granted for: ANTH473 or ANTH673.

ANTH474 Language, Racism & Identity (3 Credits)

An exploration of the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.

Jointly offered with: ANTH674.

Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH476 Senior Research (3-4 Credits)

Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of a senior thesis in anthropology.

Restriction: Must be in Anthropology program.

Credit Only Granted for: ANTH476 or ANTH486.

ANTH477 Senior Thesis (3-4 Credits)

Capstone course in which students write a senior thesis on independent research into a current problem in anthropology. The thesis is defined before a committee of faculty.

Prerequisite: ANTH476.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program.

Credit Only Granted for: ANTH477 or ANTH487.

ANTH478 Special Topics in Linguistics (3 Credits)

Advanced courses in specialty areas that respond to new theoretical developments and faculty research interests in linguistics.

Recommended: LING200.

Repeatable to: 6 credits if content differs.

ANTH481 Environmental Ethnographies of Asia (3 Credits)

Examines social and ecological environments in Asia through the lens of classic and contemporary ethnographies from across the continent. Considers how cultural, political and economic dynamics interact with ecological systems in both recurring and unexpected ways. Ethnographies include case studies of global commodity chains, technoscientific management, borders and migration, conservation, and local knowledge as they intersect with changing environments.

Credit Only Granted for: ANTH481 or ANTH681.

ANTH485 Honors Research Preparation (3 Credits)

Honors Research Preparation is an independent study course during which the Honors candidate will work with their Honors Thesis Advisor to establish not only the structure of the thesis and timeline, but also the formation of Thesis Review Committee.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

ANTH486 Honors Research (3-4 Credits)

Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of an honors thesis in anthropology.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

Credit Only Granted for: ANTH486 or ANTH476.

ANTH487 Honors Thesis (3-4 Credits)

Capstone course in which students write a thesis on the results of independent research into a current problem in anthropology.

Prerequisite: ANTH486.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

Credit Only Granted for: ANTH487 or ANTH477.

ANTH496 Field Methods in Archaeology (6 Credits)

Field training in the techniques of archaeological survey and excavation.

ANTH498 Advanced Field Training in Ethnography (1-8 Credits)

Experience in field research utilizing a variety of ethnographic methods of inquiry.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: ANTH498 or ANTH698.

ANTH601 Applied Anthropology (3 Credits)

An overview of the history and current practices of applied anthropology. This includes relationships between applied anthropology and other major subfields of the profession; the interdisciplinary and public context of applied anthropology; and problems of significance, utility, and ethics associated with applied anthropology.

ANTH606 Qualitative Methods in Applied Anthropology (3 Credits)

An introduction to the use of ethnography and qualitative methods in applied and policy contexts. Qualitative methods discussed include informal and systematic approaches. Students undertake fieldwork in local settings to practice the qualitative methods and to develop analysis and report writing skills.

ANTH607 Anthropology and Development (3 Credits)

An examination of the intersection of Anthropology, international development and foreign policy. The course provides students with conceptual tools to engage with international development and other assistance projects in areas including conservation and climate change, governance and human security, gender, human rights, and political stability from a variety of viewpoints.

Jointly offered with: ANTH407.

Credit Only Granted for: ANTH407 or ANTH607.

ANTH611 Global Migration and Health (3 Credits)

The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.

Jointly offered with: ANTH411.

Credit Only Granted for: ANTH411 or ANTH611.

ANTH612 Hypermarginality and Urban Health (3 Credits)

Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality—the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities. Jointly offered with ANTH412.

Credit Only Granted for: ANTH412 or ANTH612.

ANTH613 Health Inequities, Care, and Justice in the United States (3 Credits)

Systematic health inequities in the United States are well documented, shaped by structural forces that determine who gets sick, what illnesses/diseases they are vulnerable to, what their care options are, how they are treated while seeking care, and their ultimate health outcomes. This course applies the concepts, methods, and theoretical approaches of medical anthropology to examine the roots and implications of these health inequities. Students will also assess efforts to address these inequities through tailored interventions and social movements organized around equity and justice.

Jointly offered with: ANTH413.

Credit Only Granted for: ANTH413 or ANTH613.

ANTH615 Critical Global Health (3 Credits)

Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.

Jointly offered with: ANTH415.

Credit Only Granted for: ANTH415 or ANTH615.

ANTH616 Anthropology of Global Violence (3 Credits)

An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts.

Credit Only Granted for: ANTH416 or ANTH616.

ANTH620 Environment and Society (3 Credits)

Students will obtain foundational knowledge of core theories and methods that integrate cultural and socio-economic research into environmental science. Key topics include: coupled natural and human systems, cultural models of the environment, social networks, ecological economics, political ecology, environmental justice, and science communication.

Cross-listed with: MEES620.

Credit Only Granted for: ANTH620 or MEES620.

Additional Information: Offered over the interactive video network.

ANTH629 Advanced Developments in Biological Anthropology (3 Credits)

Graduate biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Restriction: Permission of BSOS-Anthropology department.

Credit Only Granted for: ANTH429 or ANTH629.

ANTH630 Quantification and Statistics in Applied Anthropology (3 Credits)

An intensive overview of key quantitative and statistical approaches used by social scientists in applied and policy research. This includes nonparametric and parametric statistical approaches. Students utilize statistical software and analyze existing and student-created databases. Anthropological case studies are emphasized.

Restriction: Must be in one of the following programs (Anthropology (Doctoral); Anthropology (Master's)).

ANTH633 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)

Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.

Jointly offered with: ANTH433.

Credit Only Granted for: ANTH433 or ANTH633.

ANTH635 Archaeological Ethnography and Heritage Ethnography (3 Credits)

Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit.

This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.

Jointly offered with: ANTH435.

Credit Only Granted for: ANTH435 or ANTH635.

ANTH636 Norse Archaeology (3 Credits)

The archaeology of the Norse world from the 8th century through to the end of the 11th century. We will investigate the possible causes of the Norse expansion out of Scandinavia. The various settlements and colonies of Norse Russia, the Baltic, Britain, Ireland and the North Atlantic Islands (Orkney, the Shetlands, the Faroes, Iceland, Greenland and Newfoundland) will be examined. While we will look at the Norse in detail we will also attempt to put their raiding, trading, and settlements into a larger Eurasian context through a study of the archaeology of this period.

Credit Only Granted for: ANTH436 or ANTH636.

ANTH640 Advanced Studies in Theory and Practice of Historical Archaeology (3 Credits)

Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories. Jointly offered with ANTH440.

Credit Only Granted for: ANTH440 or ANTH640.

ANTH641 Introduction to Zooarchaeology (3 Credits)

Zooarchaeology is the study of animal remains, especially bones, from archaeological contexts. This course will address both methodology as well as many of the main issues in contemporary zooarchaeology. Zooarchaeology stands at the intersection of a number of social and biological sciences, such as Biology, Osteology, Ecology, History, Anthropology and Economics. We will discuss basic animal osteology and the concepts and practices behind the identification of animal remains from archaeological contexts. We will cover the nature of the data in zooarchaeology, especially issues around using proxy data. Jointly offered with ANTH341.

Credit Only Granted for: ANTH298D, ANTH341 or ANTH641.

ANTH643 Anthropological Approaches to Geographic Information Science (3 Credits)

A practical introduction to GIS program use, including the production of archaeological and other maps, profiles, and integrated presentations of plans, photographs, texts, and other digitally available materials, as well as research applications in applied biological and cultural anthropology.

Credit Only Granted for: ANTH448S, ANTH643, or ANTH689S.

ANTH647 Advanced Material Culture Studies in Archaeology (3 Credits)

An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.

Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.

Formerly: ANTH689C.

ANTH649 Advanced Developments in Archaeology (3 Credits)

Graduate Archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Restriction: Permission of BSOS-Anthropology department.

Repeatable to: 6 credits if content differs.

ANTH650 Advanced Studies in Theory and Practice of Environmental Anthropology (3 Credits)

An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach. Jointly offered with ANTH450.

Credit Only Granted for: ANTH450 or ANTH650.

ANTH651 Environmental Archaeology (3 Credits)

An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.

Credit Only Granted for: ANTH448F, ANTH451, ANTH688F, or ANTH651.

Formerly: ANTH688F.

ANTH652 Anthropology and Climate Change (3 Credits)

Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation. Jointly offered with ANTH452.

Credit Only Granted for: ANTH452 or ANTH652.

ANTH654 Political Ecology (3 Credits)

The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.

Jointly offered with: ANTH454.

Credit Only Granted for: ANTH454 or ANTH654.

ANTH655 Introduction to Museum Scholarship (3 Credits)

Provides students a basic understanding of museums as cultural and intellectual institutions. Topics include the historical development of museums, museums as resources for scholarly study, and the museum exhibition as medium for presentation of scholarship.

Cross-listed with: AMST655, HIST610, INST653.

Credit Only Granted for: AMST655, ANTH655, HIST610, INST728T or INST653.

ANTH657 Approaches to Sustainable Development (3 Credits)

An overview of the history of sustainable development, major development and environmental theories, and development strategies as they relate to an anthropological concern for an integrated, holistic, comparative, and humane approach to sustainable development.

Jointly offered with: ANTH357.

Credit Only Granted for: ANTH657 or ANTH357.

ANTH659 Special Topics: Collaborative Curation (3 Credits)

This seminar considers the history of curation and curators within the institutional setting of museums and offers participants the opportunity, and challenge, to engage in curatorial practice by planning an exhibition that focuses on a critical aspect of life at and around the University of Maryland over the years.

Prerequisite: AMST655, ANTH655 or HIST610.

Recommended: AMST856, ANTH856, or HIST810; and AMST857, ANTH857 or HIST811.

Cross-listed with: AMST659, HIST688, INST788.

Restriction: Must have permission of the Museum Studies and Material Culture program.

Repeatable to: 6 credits if content differs.

Additional Information: Students enrolled in the MSMC (Museum Studies and Material Culture) certificate program will be given priority for enrollment.

ANTH661 Language as Practice (3 Credits)

An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.

Jointly offered with: ANTH461.

Credit Only Granted for: ANTH468I, ANTH461, or ANTH661.

ANTH663 Climate Cultures (3 Credits)

Climate change is an inherently global problem. To a significant degree, its causes and consequences are cultural in nature: Climate change impacts, mitigation and adaptation efforts are perceived and addressed in culture-specific ways. This course will be an overview of the holistic and anthropological approaches to the study of how culture frames what we know and how we respond to climate change. Readings, lectures, and discussions will focus on how culture is expressed through the interplay of processes and practices in specific economic, social and political contexts.

Jointly offered with: ANTH463.

Credit Only Granted for: ANTH463 or ANTH663.

ANTH664 Anthropology of Cultural Heritage (3 Credits)

A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.

Credit Only Granted for: ANTH469T, ANTH689T, ANTH464 or ANTH664.

Formerly: ANTH689T.

ANTH665 Method & Theory in Medical Anthropology and Global Health (3 Credits)

Provides a critical perspective to global health that encompasses key political, economic, and cultural factors associated with the nature and magnitude of global health issues such as HIV/AIDS, tuberculosis and malaria, paying particular attention to how poverty and inequalities within and between societies has accelerated current global health challenges. Introduces students to how medical anthropologists have contributed to the debates surrounding the globalization of health.

Credit Only Granted for: ANTH310, ANTH465 or ANTH665.

ANTH666 Anthropology of Work (3 Credits)

Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.

Jointly offered with: ANTH466.

Credit Only Granted for: ANTH466 or ANTH666.

ANTH669 Advanced Developments in Cultural Anthropology (3 Credits)

Graduate cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Restriction: Permission of BSOS-Anthropology department.

Repeatable to: 6 credits if content differs.

ANTH672 Advanced Studies in Medical Anthropology (3 Credits)

An exploration of the cultural, social, economic and political dimensions of health, disease, and illness. These dimensions will be examined through both the health-seeker's and the care-provider's perspectives.

Credit Only Granted for: ANTH472, ANTH468L, ANTH672, or ANTH688L.

Formerly: ANTH688L.

ANTH673 Native American Languages and Cultures (3 Credits)

An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the structure of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.

Jointly offered with: ANTH473.

Credit Only Granted for: ANTH673 or ANTH473.

ANTH674 Language Racism & Identity (3 Credits)

This course explores the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.

Jointly offered with: ANTH474.

Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH688 Current Developments in Anthropology (3 Credits)

Detailed investigation of a current problem or research technique, the topic to be chosen in accordance with faculty interests and student needs.

Repeatable to: 9 credits if content differs.

ANTH689 Special Problems in Anthropology (1-6 Credits)**ANTH692 Anthropology of the Immigrant Life Course (4 Credits)**

Explores social issues affecting local immigrant populations through readings, research and service learning. Theorizing immigration as a social policy issue in the U.S. culture, students learn about the specific contributions that anthropology has made to the understanding of immigration: globalization on the one hand, and the context of daily life in local neighborhoods on the other. Jointly offered with ANTH492.

Credit Only Granted for: ANTH 492, ANTH69 2, ANTH498N, ANTH689N.

Formerly: ANTH689N.

ANTH696 Field Methods in Archaeology (6 Credits)

Field training in the techniques of archaeological survey and excavation.

Formerly: ANTH699.

ANTH698 Advanced Field Training in Ethnology (1-6 Credits)

Experience in field research utilizing a variety of ethnographic methods of inquiry.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: ANTH498 or ANTH698.

ANTH701 Anthropology Internship Preparation (3 Credits)

Preparation for internship includes practicum training in development, presentation and evaluation of position papers, proposals and work plans; literature search and use of secondary data sources in decision making the effect cultural analysis and resource management; ethics and professional development for work in non-academic settings.

ANTH712 Anthropology Internship Analysis (3 Credits)

The preparation and presentation of internship results, and the development of skills in report writing and presentation. Includes the completion of a professional quality report or publishable paper based on the internship experience.

Prerequisite: ANTH789.

ANTH722 Ecological Anthropology (3 Credits)

An overview of important approaches to ecological anthropology. Population, systems, community, political, behavioral and evolutionary ecology will be examined as they have been applied to a range of anthropological questions. Complexity theory (nonlinear dynamics) and topics in game theory will also be addressed. Students will map the field of ecological anthropology and to assess the strengths and weaknesses of contemporary approaches, methods and theories.

Restriction: Must be in one of the following programs (Anthropology (Doctoral); Anthropology (Master's)).

Credit Only Granted for: ANTH720 or ANTH722.

ANTH740 Theories of the Past and Accomplishments of Archaeology (3 Credits)

The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern society. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.

Credit Only Granted for: ANTH689P or ANTH740.

Formerly: ANTH689P.

ANTH741 Introduction to Cultural and Heritage Resource Management (3 Credits)

An introduction to the field of cultural and heritage resource management. Examines existing international, national, and local frameworks for the protection of cultural heritage. Provides an overview of employment opportunities and ethical responsibilities within the profession.

Restriction: Must be in the Cultural and Heritage Resource Management Master or Post-Baccalaureate Certificate of Professional Studies Programs; or by permission of the Anthropology department.

ANTH742 Advanced Methods in CRM (3 Credits)

An examination of the range of nondestructive technologies used to research and image cultural and heritage resources. Standard archaeological survey methods will be covered and will focus on remote sensing technologies and how an integrated approach to archaeological investigation can reveal vital information for resource planning, interpretation, and outreach.

Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH743 Community Engagement and Consultation (3 Credits)

A grounding in cultural communication and sensitivity to community, cultural, and stakeholder needs within and beyond project specific confines. Using the broader context of practicing anthropology in the exploration of communication styles, learning styles, and cultural biases and taboos, students are exposed to underlying concepts concerning inter-cultural communication so that they may develop more collaborative approaches to research. The program also provides background in the development of public outreach programs in the context of cultural and heritage resource management.

Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH744 Collections, Data Management and Cultural Materials Preservation (3 Credits)

An overview of the process of collecting cultural materials and samples with the goal of obtaining as much information during analysis as possible followed by content relating to archaeological curation and collections management. Provides information on the preservation of cultural materials from the time they leave the field until they are placed in a certified collections facility.

Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH745 International Heritage Management (3 Credits)

An examination of international heritage management practices and global ethical and professional norms in order to contextualize domestic cultural resource management in the US. The survey will also explore the linkages and areas for growth between international and domestic heritage practice.

Restriction: Must be in the Cultural and Heritage Resource Management Program; or by permission of the Anthropology department.

ANTH746 Applied Archaeological Theory (3 Credits)

Does cultural and heritage resources management (CHRM) need theory? Can archeological theory help us understand CHRM conventions and configurations, and does CHRM have its own distinctive contribution to make to archaeological theory? This course explores these questions while surveying the key areas of theory that inform the work that CHRM practitioners do, and also the place of CHRM in cultural discourse.

Restriction: Must be in the Cultural and Heritage Resource Management Program; or by permission of the Anthropology department.

ANTH747 Business of CRM (3 Credits)

An overview of the skills necessary for success in managing a CRM program. Students will learn how CRM organizations market and manage clients, prepare and submit budgets and proposals, and coordinate technical staff to successfully complete projects. Topics will address the range of issues that owners and managers are confronted with in their oversight of projects, including the management of employees, ethics and professional responsibilities, ensuring health and safety, and meeting the many contractual obligations of CRM projects.

Restriction: Must be in the Cultural and Heritage Resource Management Masters Program (MPCH) or certificate (Z121) ; or by permission of the Anthropology department.

ANTH749 Cultural and Heritage Resource Management Internship (1-6 Credits)

An internship/practicum that would contribute to students' understanding of the overall process of CHRM. Students who are already working in CRM or a closely related field may use their employment as their practicum if the opportunity is available for them to learn beyond their current job duties.

Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM).

Repeatable to: 12 credits if content differs.

ANTH751 Project Management (3 Credits)

This capstone class for the MPS in CHRM provides students with a grounding in the critical thinking processes necessary during each stage of the CRM process. It provides students with insights into the processes used as research questions are translated into data and then into an evaluative report. Students review examples of appropriate and inappropriate technical reports and then analyze the reports to understand the thinking processes necessary for project management to provide the client with the documentation necessary for completing the compliance process.

Restriction: Must be in the Cultural and Heritage Resource Management Master's Program (MPCH) or certificate (Z121) ; or by permission of the Anthropology department.

ANTH752 Introduction to GIS for CRM (3 Credits)

Builds foundational competence for using geographical information systems (GIS) in the field of cultural resources management (CRM), including a basic understanding of how to work in ArcGIS, and the types of data analysis and presentation that are possible within GIS applications.

ANTH760 Development of Social/Cultural Theory (3 Credits)

A broad perspective of the history of social cultural theory in anthropology and the critical skills needed for understanding the subdiscipline is provided. An overview of the history of theorizing about society and culture will help outline the past, present, and future of anthropology and its relations with other scientific and humanistic disciplines.

ANTH788 Internship Research (1-3 Credits)

This course augments ANTH 789 and is graded in conjunction with it.

Prerequisite: ANTH701.

Restriction: Permission of BSOS-Anthropology department; and must be in one of the following programs (Anthropology (Master's); Anthropology (Doctoral)).

ANTH789 Internship (1-6 Credits)

Individual instruction course supervised by a department faculty member.

Prerequisite: ANTH701.

Repeatable to: 6 credits if content differs.

Formerly: ANTH705.

ANTH799 Master's Thesis Research (1-6 Credits)**ANTH856 Museum Research Seminar (3 Credits)**

A research seminar focusing on the practice and presentation of cultural and historical scholarship in museums and historical sites. Students will complete an original research project on the challenges and opportunities of public exhibition and interpretation of cultural and historical research.

Prerequisite: AMST655, ANTH655, or HIST610.

Cross-listed with: AMST856, HIST810, INST786.

Credit Only Granted for: AMST856, ANTH856, HIST810, INST728U or INST786.

ANTH857 Museum Scholarship Practicum (3-6 Credits)

Students devise and carry out a research program using the collections at the Smithsonian Institution or some other cooperating museum, working under joint supervision of a museum professional and a university faculty member.

Prerequisite: AMST856, ANTH856, or HIST810.

Cross-listed with: AMST857, HIST811, INST787.

Restriction: Permission of Museum Scholarship Program required.

Credit Only Granted for: AMST857, ANTH857, HIST811, INST728I or INST787.

ANTH898 Pre-Candidacy Research (1-8 Credits)**ANTH899 Doctoral Dissertation Research (1-6 Credits)**

AOSC - Atmospheric and Oceanic Science

AOSC400 Physical Meteorology (3 Credits)

The application of basic classical physics, chemistry and mathematics to the study of the atmosphere. Composition of the atmosphere; energy sources and sinks (radiation in the atmosphere; radiative balance and radiative forcing of atmospheric processes); atmospheric thermodynamics; clouds and precipitation physics; atmospheric electricity and optics; mesoscale processes (e.g., orographic mesoscale phenomena and instabilities); air mass boundaries; severe weather, tropical cyclones; storms; global circulation.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of CMNS-Atmospheric & Oceanic Science department.

AOSC401 Climate Dynamics and Earth System Science (3 Credits)

Introduction of the earth and global climate systems and their major components: atmosphere, land, ocean, biosphere and cryosphere. Key processes governing the function of the earth's climate: Global energy balance and water cycle, climate dynamics (general circulation of the atmosphere and ocean) and climate physics (aerosol, cloud and rain), as well as climate variability and climate changes. Phenomena resulting from this coupled system including El Nino-Southern Oscillation, monsoons, and the hydrological cycle will be discussed, with a focus on how the Earth System responds to global warming.

Prerequisite: AOSC400 or AOSC200; and MATH141; and (PHYS161 or PHYS171). Or permission of instructor.

AOSC420 Physical Oceanography (3 Credits)

Ocean observations. Water masses, sources of deep, intermediate, and surface water. Mass, heat, and salt transport, and the meridional overturning circulation. Geochemical tracers and cycles, including carbon. Western boundary currents, mixed layers, and processes maintaining the thermocline. Coastal and estuarine processes. Surface waves and tides. the ocean's role in climate.

Prerequisite: MATH141 and PHYS141.

Recommended: AOSC200. Also offered as: GEOL670, AOSC670.

Credit Only Granted for: AOSC420, AOSC670, or GEOL670.

AOSC424 Remote Sensing of the Atmosphere and Ocean (3 Credits)

Many of the properties of the atmosphere, ocean, and land surface are most easily observed from satellite remote sensing. This course will provide students with a hands-on introduction to a variety of passive and active sensing techniques and sensors observing our changing environment. Topics include: orbital dynamics and electromagnetic properties of the atmosphere and surface; atmospheric emission characteristics and scattering; chemical composition and spectroscopy; temperature retrievals; detection and retrieval of aerosol, cloud and rain; ocean surface properties; sea surface temperature and color; active sensing of wind stress, sea level, and internal waves; time-dependent gravity; properties of vegetation and ice.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of instructor.

AOSC431 Atmospheric Thermodynamics (3 Credits)

Classical thermodynamics applied to both the dry and the moist atmosphere. Composition; phase changes of water; stability concepts; Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141).

Recommended: MATH246.

AOSC432 Dynamics of the Atmosphere and Ocean (3 Credits)

Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Geostrophic/balanced and ageostrophic/unbalanced motion. Circulation, vorticity, and potential vorticity. Introduction to the boundary layer.

Prerequisite: AOSC431.

Corequisite: MATH246.

Credit Only Granted for: AOSC432 or AOSC632.

Formerly: METO432.

AOSC433 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146. And MATH241; or permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Chemistry & Biochemistry department. Cross-listed with CHEM433.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

Formerly: AOSC434.

AOSC434 Air Pollution and Environmental Justice (3 Credits)

Basic concepts in physics and chemistry of the atmosphere as applied to air pollution and environmental justice. Production, transformation, spatial scales, transport, and removal of air pollutants. The problems of photochemical smog, the greenhouse effect & climate change, stratospheric ozone, visibility. Numerical simulation of air pollution. Health and environmental effects of air pollution in the developed and developing world; why some communities suffer disproportionately

Prerequisite: CHEM131 and MATH241; or permission of instructor.

AOSC436 Principles of Biogeochemistry (3 Credits)

An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.

Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).

Cross-listed with: GEOL436.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL436 or AOSC436.

AOSC437 Global Climate Change: Past and Present (3 Credits)

Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.

Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).

Cross-listed with: GEOL437.

Credit Only Granted for: AOSC437 or GEOL437.

AOSC440 Polar Remote Sensing (3 Credits)

The harsh environment of the vast polar regions makes them some of the most inaccessible places on Earth. With widespread environmental change already underway, satellite remote sensing provides the only means by which to obtain year-round observations of the polar climate system. The objective of this course is to provide students with an overview of polar remote sensing techniques, including the physical principles of active and passive sensors, orbits, electromagnetic radiation, atmospheric transmission, calibration and validation. We will focus on measurements of the polar oceans, sea ice, glaciers, ice sheets, snow and permafrost, and examine the response of the cryosphere to climate change.

Prerequisite: PHYS171 or PHYS161; and AOSC401 or GEOG301; or with permission of instructor.

Cross-listed with: GEOG440.

Jointly offered with: AOSC642.

Credit Only Granted for: AOSC440, GEOG440, AOSC642, or GEOG640.

AOSC447 Machine Learning in Earth Science (3 Credits)

A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.

Prerequisite: Must have completed MATH140.

AOSC458 Advanced Topics in Atmospheric and Oceanic Science (1-4 Credits)

Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.

Repeatable to: 12 credits.

AOSC462 Ecohydrology (3 Credits)

Focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC662.

Credit Only Granted for: AOSC462 or AOSC662.

AOSC463 Water and Climate Systems (3 Credits)

Focuses on exploring the relationships between water, climate, land, energy, and the economy (the so called "nexus") through an interwoven understanding of the physical, economic, and institutional relationships and constraints that influence management and decision-making process in water supply, energy generation and food production. The course emphasizes the use of integrated assessment (IA) modeling tools as a way to formalize these relationships and explore their implications. Lectures will be complemented with online discussion sessions and applied modeling exercises to get hands-on knowledge of practical solutions to nexus challenges.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC663.

Credit Only Granted for: AOSC463 or AOSC663.

Additional Information: This course is offered through a joint effort of the Earth System Science Interdisciplinary Center (ESSIC, part of UMDb Sciences) and the Joint Global Change Research Institute (a collaboration between UMD and the US Dept of Energyb Northwest National Laboratory).

AOSC470 Synoptic Meteorology (3 Credits)

Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitude and mesoscale weather systems. Tropical meteorology. Weather forecasting using numerical and statistical models. Prediction of weather phenomena on the global, synoptic, meso, and local scales. Analysis of surface and upper air data; Norwegian cyclone model; introduction to weather forecasting.

Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.

Credit Only Granted for: AOSC470, AOSC600, or METO600.

AOSC472 Mesoscale Meteorology (3 Credits)

Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.

Prerequisite: AOSC432, AOSC600, AOSC610, or AOSC470.

Jointly offered with: AOSC602.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: AOSC472 or AOSC602.

AOSC475 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)

The fundamentals of the Earth's carbon cycle, a key biogeochemical cycle that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO₂ and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.

Jointly offered with: AOSC675.

Credit Only Granted for: AOSC475 or AOSC675.

AOSC480 Introduction to Earth System Science (3 Credits)

Focuses on exploring the relationships between the atmosphere, the oceans, water, climate, land, vegetation, energy, and human systems through an interwoven understanding of the physical, biogeochemical and socioeconomic relationships and constraints that influence management and decision-making processes in societal issues such as water supply, power generation, food production, ecosystem services and others. The course introduces integrated assessment (IA) science as a framework to formalize these relationships and explore their implications.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC680.

Credit Only Granted for: AOSC480 or AOSC680.

Additional Information: This course is offered through a joint effort of the Department of Atmospheric and Oceanic Science (AOSC) and the Earth System Science Interdisciplinary Center (ESSIC).

AOSC484 Climate System Modeling (3 Credits)

Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Niño and global warming.

Jointly offered with: AOSC684.

Credit Only Granted for: AOSC484 or AOSC684.

AOSC493 Senior Research Project I (3 Credits)

Technical writing and oral presentation skills. Planning, writing, and presenting a plan for research in the geosciences.

Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.

Restriction: Must be in Atmospheric and Oceanic Science program; or permission of instructor.

AOSC494 Atmospheric and Oceanic Science Seminar (1 Credit)

Exposure to a wide range of contemporary topics in atmospheric, oceanic, and climate sciences, to foster research interests and promote critical thinking through the weekly AOSC departmental seminar series.

Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.

Restriction: Permission of the Atmospheric and Oceanic Science Department.

AOSC498 Senior Research Project II (3 Credits)

The project will be based on the research or development plan created in AOSC493. It may be completed with the approval of a faculty advisor in conjunction with an internship. Final written thesis and oral defense will be expected.

Prerequisite: AOSC493.

AOSC499 Special Problems in Atmospheric Science (1-3 Credits)

Research or special study in the field of meteorology and the atmospheric and oceanic sciences.

Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.

Repeatable to: 6 credits.

AOSC600 Synoptic Meteorology I (3 Credits)

Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitude and mesoscale weather systems. Tropical meteorology.

Prerequisite: AOSC610.

AOSC602 Mesoscale Meteorology (3 Credits)

Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.

AOSC610 Dynamics of the Atmosphere and Ocean I (3 Credits)

Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Circulation and vorticity, geostrophic motion and the gradient wind balance. Turbulence and Ekman Layers.

Prerequisite: Must have completed or be concurrently enrolled in MATH462; or students who have taken courses with comparable content may contact the department.

AOSC611 Dynamics of the Atmosphere and Oceans II (3 Credits)

Waves and instabilities in the atmosphere and the ocean. Gravity, Rossby, coastal and equatorial waves. Flow over topography. Dynamic instabilities including barotropic, baroclinic, inertial, and instabilities of the coupled ocean-atmosphere system. Stationary waves and multiple equilibria.

AOSC614 Atmospheric Modeling, Data Assimilation and Predictability (3 Credits)

Solid foundation for atmospheric and oceanic modeling and numerical weather prediction: numerical methods for partial differential equations, an introduction to physical parameterizations, modern data assimilation, and predictability.

Prerequisite: AOSC610; or permission of instructor.

AOSC615 Data Assimilation (3 Credits)

An overview of fundamental methods of data assimilation. Theory, techniques, potentials, and strategies of these methods, as well as their possible drawbacks. Hands-on experimentation through applications.

AOSC617 Atmospheric and Oceanic Climate (3 Credits)

The general circulation of the atmosphere and oceans, historical perspective, observations, and conceptual models; wind-driven and thermohaline circulation of the oceans. Seasonal cycle and monsoon circulations; interannual to interdecadal climate variability; climate change.

Prerequisite: AOSC610; or permission of instructor.

AOSC620 Physics and Chemistry of the Atmosphere I (3 Credits)

Air parcel thermodynamics and stability; constituent thermodynamics and chemical kinetics. Cloud and aerosol physics and precipitation processes.

Prerequisite: MATH461; or students who have taken courses with comparable content may contact the department.

AOSC621 Physics and Chemistry of the Atmosphere II (3 Credits)

Spectroscopy; basic concepts in radiative transfer and atmospheric chemistry; photolysis rates for atmospheric molecules.

Prerequisite: MATH462; or students who have taken courses with comparable content may contact the department.

AOSC624 Remote Sensing of Surface Climate (3 Credits)

The theory and principles of remote sensing as applicable to earth observing satellites. Discussed will be current methods to interpret satellite observations into useful climate parameters. Emphasis will be placed on parameters that provide information about the climate close to the earth surface, and that can be inferred on regional to global scales. Examples are: surface temperature and reflectivity, radiation budgets, soil moisture, and vegetation cover.

Prerequisite: MATH240 and MATH241.

AOSC625 Remote Inference of Atmospheric Properties by Satellite (3 Credits)

Fundamentals of radiative transfer concepts, theories and models pertinent to remote sensing. Satellite platforms, sensors and systems used for operation and research in atmospheric remote sensing. Concepts and technologies of passive and active remote sensing. Remote sensing methods and products of atmospheric constituents, aerosol, cloud, precipitation, temperature and water vapor profiles, precipitation in liquid and ice forms, radiation budget, and remote sensing application in data assimilation for numerical weather forecast (NWP); use of atmospheric remote sensing products for development of global climate model (GCM).

AOSC630 Statistical Methods in Meteorology and Oceanography (3 Credits)

Parametric and non-parametric tests; time series analysis and filtering; wavelets. Multiple regression and screening; neural networks. Empirical orthogonal functions and teleconnections. Statistical weather and climate prediction, including MOS, constructed analogs. Ensemble forecasting and verification.

Prerequisite: STAT400; or students who have taken courses with comparable content may contact the department.

AOSC632 Atmospheric Dynamics (3 Credits)

The equations of motion of the atmosphere are developed, and then analyzed with a focus on developing students' intuition about the behavior of the large-scale atmospheric flow in the mid-latitudes. Topics covered: Kinematics; forces in the atmosphere; apparent forces arising from the rotation of the earth; vertical coordinate systems; spherical coordinate; natural coordinates; hydrostatic, cyclostrophic; geostrophic and gradient wind balances; diagnosis of vertical motion (the omega equation); prediction of surface pressure; dynamics of fronts; lifecycle of baroclinic disturbances; introduction to climate sensitivity and climate feedbacks.

Prerequisite: AOSC431.

Corequisite: MATH246.

Restriction: Must not have completed AOSC432.

Credit Only Granted for: AOSC432 or AOSC632.

AOSC633 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146.

Cross-listed with: CHEM633.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

AOSC634 Air Sampling and Analysis (3 Credits)

Theory and application of analytical techniques for the analysis of atmospheric gases and particles including priority pollutants. Combined chemical and meteorological considerations in designing field experiments.

AOSC642 Polar Remote Sensing (3 Credits)

The harsh environment of the vast polar regions makes them some of the most inaccessible places on Earth. With widespread environmental change already underway, satellite remote sensing is the only way to obtain year-round observations of the polar climate system. The objective of this course is to provide students with an overview of polar remote sensing techniques, including the physical principles of active and passive sensors, orbits, electromagnetic radiation, atmospheric transmission, calibration and validation. We will focus on measurements of the polar oceans, sea ice, glaciers and ice sheets and examine the response of the cryosphere to climate change.

Prerequisite: PHYS171 or PHYS161; and AOSC401 or GEOG301; or with permission of instructor.

Cross-listed with: GEOG640.

Jointly offered with: AOSC440.

Credit Only Granted for: AOSC440, GEOG440, AOSC642, or GEOG640.

AOSC647 Machine Learning in Earth Science (3 Credits)

A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.

Prerequisite: MATH140.

Jointly offered with: AOSC447.

Credit Only Granted for: AOSC447 or AOSC647.

AOSC652 Analysis Methods in Atmospheric and Oceanic Science (3 Credits)

A variety of the analysis methods used by atmospheric and oceanic scientists will be applied to observational data sets such as Vostok ice core record, temperature trends, and satellite measurements of ozone, sea ice, etc. in a hands-on, computer laboratory setting. Students will be exposed to Fortran and Python as well as modern file formats such as HDF and netCDF. No prior programming experience required.

Prerequisite: PHYS141 and MATH241; or students who have taken courses with comparable content may contact the department.

Recommended: AMSC460, CMSC660, AMSC660, or CMSC460.

AOSC658 Special Topics in Meteorology (1-4 Credits)

Various special topics in meteorology are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.

Restriction: Permission of instructor.

Repeatable to: 10 credits if content differs.

AOSC661 Sustainability Modeling (3 Credits)

Suitable for students who are concerned with sustainability issues, have little or no background in computational modeling, but would like to understand what modeling can do to help solve sustainability problems. By exploring a variety of contemporary societal issues (e.g., water scarcity, biodiversity loss, energy dependence), you will be introduced to modeling approaches for simulating and quantitatively understanding sustainability variables (inputs and outputs), and using modeling towards the design of policy measures that can be implemented as a response to such issues.

AOSC662 Ecohydrology (3 Credits)

The vulnerability and resilience of ecosystems are dependent on phenomena that link the cycling of water, nutrients and other biogeochemically active elements. Understanding the perturbations in these cycles that trigger impacts on ecosystem spatiotemporal characteristics is a challenge that generally transcends disciplinary and geographical boundaries, and is key to sustaining the diversity of life on Earth. This course on ecohydrology focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation. **Prerequisite:** AOSC610; and undergraduate level hydrology and/or hydrogeology, familiarity with differential calculus and equations. Please consult with instructor for details.

AOSC663 Water and Climate Systems (3 Credits)

Focuses on exploring options for adaptation and building resilience to the possible impacts of climate change through an interwoven understanding of the physical, biological, social, cultural, economic and institutional constraints of water resources issues and consideration of climate-related risks in the management and decision-making process.

Prerequisite: AOSC610; and undergraduate level hydrology and/or hydrogeology, familiarity with differential calculus and equations. Please consult with instructor for details.

AOSC670 Physical Oceanography (3 Credits)

Ocean observations. Water masses, sources of deep water. Mass, heat, and salt transport, geochemical tracers. Western boundary currents, maintenance of the thermocline. Coastal and estuarine processes. Surface waves and tides. Ocean climate.

Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Geology department.

Cross-listed with: GEOL670.

Credit Only Granted for: GEOL670, AOSC670 or AOSC420.

AOSC675 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)

The fundamentals of the Earth's carbon cycle, a key biogeochemical cycle that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO₂ and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration. Jointly offered with AOSC475.

Credit Only Granted for: AOSC475 or AOSC675.

AOSC680 Introduction to Earth System Science (3 Credits)

An introduction to the study of the earth as a system: atmosphere, oceans, land, cryosphere, solid earth, and humans. Cycling of materials and energy in the earth system: the energy cycle, the hydrologic cycle, the carbon cycle, the nitrogen cycle. Climate processes and variability: land-atmosphere, ocean-atmosphere, biosphere-climate, and human interactions, short- and long-term variability in climate.

AOSC684 Climate System Modeling (3 Credits)

Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Nino and global warming. Jointly offered with AOSC484.

Credit Only Granted for: AOSC484 or AOSC684.

AOSC798 Directed Graduate Research (1-3 Credits)

Directed graduate research in atmospheric and oceanic science.

Repeatable to: 15 credits.

AOSC818 Frontiers in Atmosphere, Ocean, Climate, and Synoptic Meteorology Research (1 Credit)

A broad range of topics in the contemporary sciences of atmosphere, ocean, climate and synoptic meteorology are covered.

Repeatable to: 18 credits if content differs.

AOSC898 Pre-Candidacy Research (1-8 Credits)**AOSC899 Doctoral Dissertation Research (1-8 Credits)**

ARAB - Arabic

ARAB401 Readings in Arabic Literature (3 Credits)

A survey of Modern Arabic literature is given through a range of selected texts. Texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Taught in Arabic.

Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB410 Ideology of Stereotyping: American and Middle Eastern Film and Television (3 Credits)

Exploration of cultural stereotyping, using examples from American and Middle Eastern cinema and television. Students will examine ideological constructs of Otherness and its history, including Orientalism; propaganda techniques; and audiovisual aspects of stereotyping. While the focus is on American and Middle Eastern cultural production, the course will engage broader issues of stereotyping in contemporary society and media. Readings include theories of propaganda and cultural ideology.

Credit Only Granted for: ARAB410, ARAB499Q, FILM429Q.

Formerly: ARAB499Q.

ARAB489 Special Topics in Arabic Studies (3 Credits)

In-depth study of particular aspect of Arabic language and culture. Specific topics to be announced when course is offered. Taught in Arabic.

Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB499 Special Topics in Arabic Studies (3 Credits)

In-depth study of particular aspect of Arabic culture, literature and language. Specific topic to be announced when course is offered.

Repeatable to: 18 credits if content differs.

ARAB628 Special Topics in Arabic Studies (3 Credits)

In-depth study of a particular aspect of Arabic Studies. Topics to be announced when course is offered. Taught in Arabic.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

ARAB638 Special Topics in Middle Eastern Studies (3 Credits)

In-depth study of a particular aspect of Middle Eastern Studies. Topic to be announced when course is offered. Taught in Arabic.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

ARAB788 Internship in Arabic (3-6 Credits)

Field and/or professional experience in a public or private institution where Arabic is the language of work.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

ARAB789 Independent Study in Arabic (1-3 Credits)

Independent study in Arabic. Taught in Arabic.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 9 credits if content differs.

ARCH - Architecture

ARCH400 Architecture Design Studio I (6 Credits)

Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

ARCH401 Architecture Design Studio II (6 Credits)

Continuation of ARCH 400 with introduction to building typology, urban and contextual issues, design of the vertical surface, and architectural interiors.

Prerequisite: Minimum grade of C- in ARCH400.

Restriction: Must be in Architecture (B.S.) program.

ARCH402 Architecture Design Studio III (6 Credits)

Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical.

Prerequisite: Minimum grade of C- in ARCH401.

Restriction: Must be in Architecture (B.S.) program.

ARCH403 Architecture Design Studio IV (6 Credits)

Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.

Prerequisite: Minimum grade of C- in ARCH402.

Restriction: Must be in Architecture (B.S.) program.

ARCH404 Graduate Architecture Design Studio I (6 Credits)

Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses. Offered fall only.

Recommended: For 3 1/2 year graduate students only.

Restriction: Must be in Architecture (Master's) program.

ARCH405 Graduate Architecture Design Studio II (6 Credits)

Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical. Offered spring only.

Prerequisite: Minimum grade of C- in ARCH404.

Restriction: Must be in Architecture (Master's) program.

ARCH406 Graduate Architecture Design Studio III (6 Credits)

Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.

Prerequisite: Minimum grade of C- in ARCH405.

Restriction: Must be in Architecture (Master's) program.

ARCH407 Graduate Architecture Design IV (6 Credits)

Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high-density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit Oriented Development, density, sustainable development, building typology, and street design.

Prerequisite: Minimum grade of C- in ARCH406.

Restriction: Must be in Architecture (Master's) program.

ARCH408 Special Topics Architecture Design Studio (6 Credits)

Design Studio course to examine topical problems in architecture and urban design.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 12 credits if content differs.

Additional Information: May also be taken for repeat credit for ARCH400, ARCH401, ARCH402, or ARCH403 only by permission of Architecture Program Director.

ARCH418 Selected Topics in Architectural Technology (3 Credits)

Selected Topics in Architectural Technology

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH419 Independent Studies in Architectural Technology (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH420 History of American Architecture (3 Credits)

American architecture from the late 17th to the 21st century.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture program.

ARCH423 History of Roman Architecture (3 Credits)

Survey of Roman architecture from 500 B.C. To A.D. 325.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH425 History of Architecture I (3 Credits)

Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH225 or ARCH425.

Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH426 History of Architecture II (3 Credits)

Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH226 or ARCH426.

Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH427 Theories of Architecture (3 Credits)

Survey of architectural theories - theories of architectural design, representation and urban design from antiquity to the present day.

Prerequisite: ARCH426; or permission of ARCH-Architecture Program.

Restriction: Must be in Architecture (B.S.) program.

ARCH428 Selected Topics in Architectural History (1-4 Credits)

Selected Topics in Architectural History

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH429 Independent Studies in Architectural History (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH430 Measuring Sustainability in Architecture (3 Credits)

Studies metrics of sustainability as included in rating standards, including LEED. All students will take the LEED GA test.

Credit Only Granted for: ARCH430 or ARCH418M.

Formerly: ARCH418M.

ARCH435 History of Contemporary Architecture (3 Credits)

Architectural history from World War II to the present.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH443 Visual Communication For Architects (3 Credits)

Investigation of the relationship between drawing from life and architectural drawing, the conventions of architectural drawing and the role of architectural drawing as a means to develop, communicate, and generate architectural ideas.

Corequisite: ARCH400.

Restriction: Must be in Architecture (Master's) program; and must be in the 3.5 year M. ARCH program.

ARCH445 Visual Analysis of Architecture (3 Credits)

Study of visual principles of architectural and urban precedents through graphic analysis. Exercises include on-site observation, documentation and analysis. Focuses on the development of an architect's sketchbook as a tool for life-long learning.

Prerequisite: ARCH400; or permission of ARCH-Architecture Program.

Restriction: Must be in Architecture (B.S.) program.

ARCH448 Selected Topics in Visual Studies in Architecture (3 Credits)

Selected Topics in Visual Studies in Architecture

Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH449 Independent Studies in Visual Studies in Architecture (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH456 Great Cities (3 Credits)

Case studies from a selection of the great cities of the world.

Prerequisite: Permission of ARCH-Architecture Program.

ARCH458 Selected Topics in Urban Design (3 Credits)

Selected Topics in Urban Design

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH459 Independent Studies in Urban Design (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH460 Site Analysis and Design (3 Credits)

Principles and methods of site analysis; the influence of natural and man-made site factors on site design and architectural form.

Restriction: Must be in the Master of Architecture program; or permission of the School of Architecture, Planning and Preservation.

ARCH461 Sustainability in Architecture (3 Credits)

Strategies of sustainability as related to the broader context of architectural problem solving.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH418S or ARCH461.

Formerly: ARCH418S.

ARCH462 Methods & Materials of Building Construction (3 Credits)

Building Construction methods and materials are examined through case studies to explore the means and techniques applied to the material execution of buildings and BIM. Focus on an understanding of the organization of the design and construction process and awareness of building and zoning codes, material systems and types.

Prerequisite: PHYS121 or equivalent; and MATH120 or MATH140 or equivalent; or permission of the ARCH-Architecture Program.

Restriction: Must be in a major in undergraduate or graduate ARCH program or Construction Project Management Minor.

Credit Only Granted for: ARCH410 or ARCH462.

ARCH463 Sustainable Systems in Architecture (3 Credits)

Sustainable systems in architecture examines the nature of the global problem, environmental economics, understanding the local environment, bioclimatic design, solar control and shading, solar access zoning, residential scale energy design issues, commercial scale energy design issues, and urban scale energy design issues.

Prerequisite: ARCH462.

Restriction: Must be in a major in undergraduate or graduate ARCH program.

ARCH464 Architectural Structures I (3 Credits)

This course covers the basic principles of architectural structures, including the influence of geometric, sectional, and material properties related to flexure and shear in beam and framed systems; vector mechanics with application to analysis of trusses, catenaries, and arches; diagrammatic analysis of beams for bending moment, shear, and deflection as well as the study of structural framing systems for vertical and lateral loads.

Prerequisite: ARCH462, ARCH463, and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.

Corequisite: ARCH401 or ARCH406.

Restriction: Must be in either BS in Architecture or M. Architecture Program.

Credit Only Granted for: ARCH411 or ARCH464.

ARCH465 Architectural Structures II (3 Credits)

The basic principles of elastic behavior for different materials such as wood, steel, concrete, and composite materials and compares the properties and applications of materials generally will be covered. It investigates cross sectional stress and strain behavior in flexure and in shear, and torsion as well as the stability of beams and columns. The qualitative behavior of combined stresses and fracture in materials is also covered.

Prerequisite: ARCH464 and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.

Restriction: Must be in either BS in Architecture or M. Architecture Program.

Credit Only Granted for: ARCH412 or ARCH465.

ARCH466 Environmental Systems in Architecture (3 Credits)

Environmental systems in architecture presents the theory, quantification, and architectural design implications for heating ventilating and air conditioning, water and waste, fire protection, electricity, illumination, acoustics, and vertical transportation.

Prerequisite: ARCH462 and ARCH463.

Corequisite: ARCH403 or ARCH406.

Restriction: Must be in either BS in Architecture or M. Architecture Program.

Credit Only Granted for: ARCH413 or ARCH466.

ARCH467 Integrated Project Delivery (3 Credits)

Integrated Project Delivery is examined from design to implementation through an exploration of building construction, architectural design and construction management perspectives.

Restriction: Must be in a major in ARCH-Architecture Program; or must be in Construction Project Management Minor.

ARCH468 Selected Topics in Architecture (1-4 Credits)

Selected Topics in Architecture

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH470 Computer Applications in Architecture (3 Credits)

Introduction to computer utilization, with emphasis on architectural applications.

Prerequisite: ARCH400; or permission of ARCH-Architecture Program.

ARCH472 Building Information Modeling Communication and Collaboration (3 Credits)

Building Information Modeling is explored as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.

Restriction: Must be in a major in ARCH-Architecture Program; or must be in the Construction Project Management Minor.

Credit Only Granted for: ARCH678I or ARCH472.

Formerly: ARCH678I.

ARCH478 Selected Topics in Architecture (1-4 Credits)

Selected Topics in Architecture

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH479 Independent Studies in Architecture (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH481 The Architect in Archaeology (3 Credits)

The role of the architect in field archaeology and the analysis of excavating, recording, and publishing selected archaeological expeditions.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH482 The Archaeology of Roman and Byzantine Palestine (3 Credits)

Archaeological sites in Palestine (Israel and Jordan) from the reign of Herod the Great to the Moslem conquest.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH483 Field Archaeology (3 Credits)

Participation in field archaeology with an excavation officially recognized by proper authorities of local government.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH488 Selected Topics in Architectural Preservation (1-4 Credits)

Selected Topics in Architectural Preservation.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH489 Independent Studies in Architectural Preservation (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH600 Integrated Design Studio V (6 Credits)

Integrated and comprehensive building and site design. Course content bridges the gap between design and technology, between practice and education, in a studio setting. Explorations include the integration of conceptual and technical aspects of architectural form and assembly, highlighting the ways in which multiple layers of a building design are developed, coordinated and resolved.

Corequisite: ARCH611.

Restriction: Permission of ARCH-Architecture Program.

ARCH601 Topical Design Studio VI (6 Credits)

Topical architectural design studio with concentration on advanced topical inquiry addressing but not limited to: architectural competitions, sustainable design, theoretical/conceptual issues, programmatic, contextual, and/or technical issues.

Restriction: Permission of ARCH-Architecture Program.

ARCH608 Advance Special Topics Design Studio (6 Credits)

Topical architectural design studio with concentration on advanced theoretical, conceptual, technological, cultural or professional issue.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 12 credits if content differs.

Additional Information: Elective Architecture Design Studio that may be taken for repeat or advanced credit in place of ARCH404, ARCH405, ARCH406, ARCH407, ARCH600, ARCH601, ARCH700 or an additional design studio.

ARCH611 Advanced Architecture Technology Seminar (3 Credits)

Technology in design of buildings. Application of technological issues in building design; integration of technology in architecture; technology as a form determinant in architecture; other conceptual and philosophical issues related to the application of technology in the design, construction, and use of buildings.

Corequisite: ARCH600.

Restriction: Permission of ARCH-Architecture Program.

ARCH618 Selected Topics in Architectural Technology (3 Credits)

Selected Topics in Architectural Technology

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 12 credits if content differs.

ARCH628 Selected Topics in Architectural History (1-4 Credits)

Graduate Selected Topics in Architectural History

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH629 Graduate Independent Studies in Architectural History (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH635 Seminar in the History of Modern Architecture (3 Credits)

Advanced investigation of historical problems in modern architecture.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH654 Urban Development and Design Theory (3 Credits)

Advanced investigation into the history, and practice of urban design, planning, and development.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

ARCH655 Urban Design Seminar (3 Credits)

Advanced investigation into problems of analysis and evaluation of the design of urban areas, spaces, and complexes with emphasis on physical and social considerations; effects of public policies through case studies. Field observations.

Prerequisite: ARCH654; or permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH451 or ARCH655.

Formerly: ARCH451.

ARCH658 Selected Topics in Urban Design (3 Credits)

Selected Topics in Urban Design

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH668 Advanced Selected Topics in Architecture (1-4 Credits)

Graduate Selected Topics in Architecture.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH670 Advanced Computer Applications in Architecture (3 Credits)

Advanced use of computer technology in design. Use of digital design processes and conceptual methodologies to study design alternatives and realization. Methods and techniques of digital design representation, simulation, or fabrication to explore and test concepts and integration of digital technologies into the architectural design process.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH678C or ARCH670.

Formerly: ARCH678C.

ARCH671 BIM Technology and Processes in Architecture (3 Credits)

Building Information Modeling is examined in depth relative to Integrated Project Delivery methods as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.

Prerequisite: ARCH403; and ARCH470. Or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ARCH678I or ARCH670.

Formerly: ARCH678I.

ARCH672 Type and Typology Seminar (3 Credits)

The idea of type and typology, its implications for theory, scholarship, and practice in architecture and urban design.

Restriction: Permission of ARCH-Architecture Program.

ARCH673 Building Culture Seminar (3 Credits)

Comprehension of major themes in the development of architectural building techniques and culture value systems in architecture are developed through lecture, discussion and analysis of seminal readings and buildings.

Restriction: Permission of ARCH-Architecture Program.

ARCH674 Seminar in Regionalism (3 Credits)

Regional characteristics of culture, climate, and landscape as determinants world architecture.

Restriction: Permission of ARCH-Architecture Program.

ARCH676 Field Research in Architecture (3 Credits)

Recording and analysis of significant architectural complexes in situ.

Restriction: Permission of ARCH-Architecture Program.

ARCH678 Advanced Selected Topics in Architecture (1-4 Credits)

Graduate Selected Topics in Architecture.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH679 Advanced Independent Studies in Architecture (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH688 Advanced Selected Topics in Architectural Technologies (1-4 Credits)

Graduate Selected Topics in Architectural Technologies.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH689 Advanced Independent Studies in Architectural Technologies (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH700 Urban Design Studio VII (6 Credits)

Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit-Oriented Development, density, sustainable development building typology, and street design.

Restriction: Permission of ARCH-Architecture Program.

ARCH770 Professional Practice of Architecture (3 Credits)

Project management, organizational, legal, economic and ethical aspects of architecture.

Restriction: Permission of ARCH-Architecture Program.

ARCH778 Graduate Selected Topics in Urban Design (1-4 Credits)

Graduate Selected Topics in Urban Design.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH779 Advanced Independent Studies in Urban Design (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH797 Thesis Proseminar (3 Credits)

Directed research and preparation of thesis program.

Prerequisite: ARCH601.

ARCH798 Thesis in Architecture (3 Credits)

Complements the research of ARCH 799, with presentation of the design research to student's thesis committee.

Prerequisite: ARCH797.

Corequisite: ARCH799.

Restriction: Must be in Architecture (Master's) program; and permission of ARCH-Architecture Program; and minimum cumulative GPA of 3.0.

ARCH799 Master's Thesis Research (1-6 Credits)

Development of master's thesis.

Prerequisite: ARCH797.

Corequisite: ARCH798.

Restriction: Must be in Architecture (Master's) program; and permission of ARCH-Architecture Program; and minimum cumulative GPA of 3.0.

Repeatable to: 6 credits if content differs.

AREC - Agricultural and Resource Economics

AREC405 Economics of Production (3 Credits)

The use and application of production economics in analysis of firm and policy decisions. Production functions, cost functions, multiple product and joint production, and production processes through time.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC422 Econometric Analysis in Agricultural and Environmental Economics (3 Credits)

This course offers a hands-on introduction to econometrics. Students will explore the linear regression model from the ground up by analyzing real-world datasets and learning how to distinguish causation from correlation. They will gain practical experience using econometrics to address important questions in agricultural economics and environmental economics.

Prerequisite: 1 course from (AREC326 or ECON326); and 1 course from (ECON230, ECON321, or BMGT230).

Credit Only Granted for: ECON422, ECON424, or AREC422.

AREC426 Economic Methods and Food Consumption Policy (3 Credits)

An overview of major econometric tools used by policy makers, economists and social scientists to analyze the effects of food consumption policy. Major food assistance programs in the United States such as SNAP, the School Lunch Program and the School Breakfast Program will be discussed.

Prerequisite: AREC326; or ECON326.

Credit Only Granted for: AREC4890 or AREC426.

Formerly: AREC4890.

AREC427 Commodity Pricing and Markets (3 Credits)

Economic theory as applied to the marketing of agricultural commodities. How commodity prices vary with current demand and production, and how prices are linked over time, across space, and across grades.

The role played by contractual arrangements, cooperative marketing, vertical integration, and governmental policies in commodity marketing strategies.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC430 Introduction to Agricultural and Resource Law (3 Credits)

Survey of law with emphasis on problems and applications related to agricultural and natural resource economics. The course emphasizes strategies for managing legal risk arising from ownership, management, and use of agricultural resources. Students will get practical information to utilize in personal or professional settings. Contract law, constitutional law, tort law, property law, real estate transactions, business organization, estate planning, and debtor.

Prerequisite: ECON326 or AREC326.

Credit Only Granted for: AREC430 or AREC489K.

Formerly: AREC489K.

AREC431 Agricultural Water Quality: Policy and Legal Issues (3 Credits)

An overview of the American and Maryland legal systems and sources of legal information as it pertains to water quality and agriculture.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: AREC489L or AREC431.

Formerly: AREC489L.

AREC433 Food and Agricultural Policy (3 Credits)

Economic and political context of governmental involvement in the farm and food sector. Historical programs and current policy issues. Analysis of economic effects of agricultural programs, their benefits and costs, and comparison of policy alternatives. Analyzes the interrelationship among international development, agricultural trade and general economic and domestic agricultural policies.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC435 Commodity Futures and Options (3 Credits)

The economics and institutional features of commodity futures and options markets. Students will develop a basic understanding of the underlying price relationships between cash and futures markets and will apply this information to business risk management decision making.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

AREC445 Agricultural Development, Population Growth and the Environment (3 Credits)

Development theories, the role of agriculture in economic development, the agricultural policy environment, policies impacting on rural income and equity, environmental impacts of agricultural development.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC446 Sustainable Economic Development (3 Credits)

Examine why socially equitable and environmentally sustainable economic growth is difficult to achieve. It explores the interactive dynamics of environmental degradation, human capital, inequality and institutions. Emphasis is on the role of market imperfections and political failure in explaining the persistence of extractive economic institutions that hinder sustainable development.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: AREC446 or AREC489G.

Formerly: AREC489G.

AREC447 The Economy of China (3 Credits)

An introductory survey course of economic development in China with emphasis on understanding the process of economic reform in mainland China since 1978.

Prerequisite: AREC326, ECON306, or ECON326.

AREC453 Natural Resources and Public Policy (3 Credits)

Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.

Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).

Cross-listed with: ECON453.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: AREC453 or ECON453.

AREC454 The Economics of Climate Change (3 Credits)

The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON484.

Credit Only Granted for: AREC454 or ECON484.

AREC455 Economics of Land Use (3 Credits)

Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON485.

Credit Only Granted for: AREC455 or ECON485.

AREC456 Energy and Environmental Economics (3 Credits)

Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation, climate change, and transportation policies.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON486.

Credit Only Granted for: AREC456 or ECON486.

AREC457 Energy, Climate Change, and Options for a Low-Carbon Economy (3 Credits)

Provides a primer in the physics and atmospheric chemistry of climate change, describes what the effects of climate change may be and explains how energy generation and use in various sectors of the economy contribute to greenhouse gas. It presents policy options meant to curb the use of fossil fuels (e.g., carbon taxes), improve energy efficiency (e.g., standards and incentives), and identifies possible drawbacks or unintended effects of such policies. Students will also study adaptation from the engineering, policy and anthropology points of view. The course further covers other aspects of climate change, as the potential effect of climate change on human health, cultural artifacts and the built environment, and sensitive ecological systems, and the legal implications of carbon storage options.

Recommended: ECON200. And AREC326; or ECON326.

Restriction: Junior standing or higher.

AREC466 Transportation Engineering, Economics, and Policy (3 Credits)

The transportation system moves people and goods around the world, but transportation has downsides: harming local air quality, contributing to climate change, causing traffic accidents, and wasting people's time on congested roads. Mitigating these downsides will require new policies, new technologies, and new decisions by households and businesses. Focusing on the US transportation system, students will apply an integrated economics, policy, and engineering perspective to analyze transportation's most pressing challenges. Students are expected to have some background in one of the three disciplines—economics, engineering, or policy—but not all three. The beginning of the semester will include tutorials for students without much economics or engineering background.

Prerequisite: BMGT230, ECON230, ECON321, ENCE302, or PLCY304; or permission of the instructors.

Recommended: AREC326, ECON306 or ECON326.

Credit Only Granted for: AREC466 or ENCE489T.

AREC481 Environmental Economics (3 Credits)

An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON481.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: ECON481 or AREC481.

AREC489 Special Topics in Agricultural and Resources Economics (3 Credits)

Repeatable to: 9 credits.

AREC610 Microeconomic Applications in Agricultural and Resource Markets (3 Credits)

Applications of graduate level microeconomic analysis to the problems of agricultural and natural resource production and distribution including demand for agricultural output, the nature of agricultural supply decisions, decision making under uncertainty, valuation of natural resources, and exploitation of natural resources.

Prerequisite: ECON603 and AREC620.

AREC620 Optimization in Agricultural and Resource Economics (3 Credits)

Mathematical theory of static and dynamic optimization as applied to the economics of agriculture, natural resources and the environment. Topics include necessary and sufficient conditions for constrained optimization, convexity and concavity, duality and the envelope theorem, comparative statics, fixed point theorems, optimal control theory and dynamic programming.

Prerequisite: Must have completed Multivariate calculus and matrix or linear algebra.

AREC623 Applied Econometrics I (4 Credits)

A modern introduction to empirical strategies in applied microeconomic research in public policy, development economics, labor economics, education, marketing and corporate finance. Emphasis on causal reasoning and design-driven identification in the social sciences. Concepts and applications will focus on addressing economically meaningful causal questions. Basic theoretical and mathematical aspects of probability and statistics will be developed to assess the significance of the relationship among economic variables. Topics include: the approximation of the conditional expectation function through a linear predictor (Ordinary Least Squares), the effects of omitted variables and the usefulness of variables that resemble the outcome of a randomized experiment (Instrumental Variables), as well as extensions to high-dimensional big-data counterparts. Fundamental concepts in sampling theory, statistical inference (with small and large samples) and hypothesis testing will be studied and applied to real data using Stata, a general-purpose statistical software.

Prerequisite: Introductory statistics or econometrics, linear algebra, and differential/calculus; or permission of instructor.

Additional Information: Intended for first-year Ph.D. students from AREC, BUFN, ECON, EDMS, EDUC, PLCY and URSP departments with a background in introductory statistics or econometrics.

AREC624 Applied Econometrics II (4 Credits)

Variations of the standard linear model, simultaneous equations estimation, nonlinear regression, nonlinear simultaneous equations estimation, static and dynamic panel data models, errors in variables, Hausman tests, discrete choice models such as conditional multinomial and mixed logit models, latent class models, semi-parametric estimation, varying parameter models, unobserved variables, time series models, and model selection procedures.

Prerequisite: AREC623.

AREC699 Special Problems in Agricultural and Resource Economics (1-2 Credits)

Intensive study and analysis of specific problems in the field of agricultural and resource economics, providing in-depth information in areas of special interest to the student.

AREC783 Environmental Taxation and Regulation (3 Credits)

The economics of policies to address environmental externalities. Specific topics include the theory of public goods and externalities, cost-benefit and cost-effectiveness analysis of environmental regulations, regulatory instrument choice under uncertainty, environmental policy in an economy with pre-existing tax distortions, monitoring and enforcement of environmental regulations, distributional effects of environmental policy, and regulation of intertemporal externalities.

Prerequisite: ECON603 and ECON604; and graduate-level econometrics.

Credit Only Granted for: AREC783 or AREC869W.

Formerly: AREC869W.

AREC784 Energy Economics, Empirical Industrial Organization, and Public Policy (3 Credits)

Energy markets and public policy, evaluating techniques for estimating market demand and supply and for evaluating policy intervention. Comparison of reduced-form and structural approaches. Applications may include but are not limited to electricity, oil and other liquid fuels, and household travel, with examples from the United States and other countries.

Prerequisite: ECON603, AREC623, and AREC624; or permission of instructor.

AREC785 Advanced Economics of Natural Resources (3 Credits)

The use of exhaustible and renewable natural resources from normative and positive points of view. Analysis of dynamic resource problems emphasizing energy, mineral, groundwater, forestry, and fishery resources; optimal, equilibrium, and intergenerational models of resource allocation.

Prerequisite: Permission of AGNR-Agricultural & Resource Economics department; or (ECON603 and AREC623).

Cross-listed with: ECON785.

Credit Only Granted for: AREC785 or ECON785.

AREC799 Master's Thesis Research (1-6 Credits)**AREC815 Experimental and Behavioral Economics (3 Credits)**

An overview of the design, implementation, and analysis of experiments motivated by behavioral economics, with a particular focus on experiments in field settings. Topics covered include social preferences, risk aversion, prospect theory, present bias, overconfidence, and limited attention.

Prerequisite: AREC623, AREC624, ECON603, and ECON604; or equivalent.

Credit Only Granted for: AREC815 or AREC869A.

Formerly: AREC869A.

AREC825 Advanced Economic Welfare Analysis (3 Credits)

Theory of economic welfare measurement, problems of path dependence in evaluating multiple price changes, welfare measurement under risk, general equilibrium welfare measurement with multiple distortions, and applications in evaluation of agricultural and resource policies.

Credit Only Granted for: AREC625 or AREC825.

AREC829 Policy Design and Causal Inference for Social Science (3 Credits)

A course in applied econometrics that examines empirical strategies in applied microeconomic research used to estimate the effects of a policy or program on the outcomes of interest in fields like public policy, development economics, labor economics, education, marketing and corporate finance, as well as in industry and international organizations. Methods in applied econometrics with a focus on the thought experiment, the hypothetical experiment that should be used to answer the causal question of interest. A taxonomy of departures from the experimental ideal is presented, as well as the assumptions required to mimic the conditions of the unfeasible experiment from observational data.

Topics include regression and matching, instrumental variables and natural experiments, differences-in-differences, change-in-changes, synthetic control methods and regression discontinuity designs. Causal parameters defined from conditional moments, and quantiles and effects on conditional distributions (for inequality and poverty assessment) are considered. Stata, a general-purpose statistical software widely used by applied economists, is used to develop concepts and applications.

Prerequisite: AREC623; or permission of instructor.

Repeatable to: 9 credits if content differs.

Additional Information: The course is intended for second-year Ph.D. students from AREC, BUFN, ECON, EDMS, EDUC, PLCY and URSP who have a background in quantitative methods comparable to that offered in an introductory micro-econometrics class.

AREC832 Agricultural Policy Analysis (3 Credits)

The economics of agricultural policies. The impact of agricultural policies on both historic and modern growth, including discussion of optimal farm and ownership structure. Contemporary policy issues in both developed and developing countries. Additional topics in trade, environment, and commodity markets.

Credit Only Granted for: AREC632 or AREC832.

AREC844 Firm Growth in Developing Countries (3 Credits)

A study of the growth of firms face in developing countries and interventions/policies that can be used to remove barriers to growth, including issues related to management, credit constraints, political connections, misallocation and trade.

Prerequisite: A one-year PhD-level sequence in microeconomics and a PhD-level course in econometrics.

AREC845 Environment and Development Economics (3 Credits)

Considers neoclassical and endogenous growth models; international trade theory; the role of property right institutions and factor markets; the environmental impact of trade liberalization in developing countries and the environmental effects of increasing international capital mobility; empirical studies relating the environment to growth and globalization; and policy analyses.

AREC846 Development Microeconomics (3 Credits)

Development economics with focus on issues applicable to rural development and agriculture in developing countries. Content includes both theory and empirical application of theory. Subjects covered include economics of agricultural households, credit and insurance markets, technological progress and learning and institutional economics of developing countries.

Prerequisite: AREC624, ECON603, and AREC623; or equivalent.

Formerly: AREC869E.

AREC847 Networks, Social Learning and Technology Adoption (3 Credits)

This class will focus on networks, learning from others, and peer effects and the role of each in human capital accumulation, technology adoption and behavior. The material is focused on applications of education, health agriculture and entrepreneurship in developing countries, but will draw heavily from literatures on these effects in developed countries as well. The class will cover the theory of networks and learning but its primary focus will be on the empirical difficulty of identifying these effects and establishing causality.

Prerequisite: AREC624, AREC623, and ECON603; and students who have taken courses with comparable content may contact the department.

AREC869 Advanced Topics in Agricultural and Resource Economics (1-3 Credits)

Frontiers of research in environmental and resource economics; agricultural policy, production, and trade; and development. Topics may include decision making under risk and related market institutions, principal agent analysis, optimal policy design, technology adoption, market structure, land and credit markets, information markets, and income distribution.

Repeatable to: 9 credits if content differs.

AREC891 Introduction to Prospectus Development (1 Credit)

Critical evaluation of research, prospectus topic exploration including literature review, data identification, model development, and related presentations. Required of all second-year Ph.D. students.

Prerequisite: Completion of the first year of graduate study in AREC.

Credit Only Granted for: AREC 869K or AREC 891.

Formerly: AREC869K.

AREC892 Dissertation Prospectus Development (3 Credits)

Presentations of proposed dissertation research including literature review, model development, data identification, and written prospectus development. Required of all third-year Ph.D. students.

Prerequisite: Completion of two years of the AREC Ph.D. program.

Credit Only Granted for: AREC 869P or AREC 892.

Formerly: AREC869P.

AREC898 Pre-Candidacy Research (1-8 Credits)**AREC899 Doctoral Dissertation Research (1-8 Credits)**

ARHU - Arts and Humanities

ARHU439 Interdisciplinary Studies in Arts and Humanities (3 Credits)

An interdisciplinary exploration of chronological, geographical or thematic topics in Arts and Humanities.

Repeatable to: 6 credits if content differs.

ARHU440 Arts Leadership Seminar (3 Credits)

An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.

Cross-listed with: TDPS440.

Credit Only Granted for: TDPS440 or ARHU440.

ARHU441 Arts Entrepreneurship: Theory and Practice (3 Credits)

Establishes arts entrepreneurship as a unique discipline with the goal of connecting creative initiatives (products, artforms, and programs) to audiences, resources, and communities. Introduces students to the ways in which creative initiatives both create value and offer solutions to social, political, environmental, and cultural issues. Students will develop artist impact statements and identify different contexts and ways to apply their talents and creative initiatives in society.

Prerequisite: ARHU240 or TDPS240; or permission of instructor.

Recommended: ARHU440 or TDPS440.

Cross-listed with: TDPS441.

Jointly offered with: ARHU640, TDPS640.

Restriction: Limited to 4 undergraduate students (2 in ARHU and 2 in TDPS).

Credit Only Granted for: TDPS458E, ARHU441, TDPS441, ARHU640 or TDSP640.

Formerly: TDPS458E.

ARHU458 Graduate School Preparation (1 Credit)

Designed for Juniors and Seniors who are interested in applying to graduate school. Topics include skills needed for the graduate school search and application process, evaluation and reflection of application materials, preparation for GRE exam, and exploration into career options after graduate school. Focus on the Humanities fields.

Restriction: Must have earned a minimum of 60 credits.

Repeatable to: 3 credits if content differs.

ARHU468 Peer Mentoring Program (1 Credit)

A workshop for sophomore, junior or senior students who wish to serve as peer mentors helping first-year students to cope with the numerous issues which often arise in the transition to the university.

Restriction: Sophomore standing or higher; and permission of ARHU-College of Arts & Humanities.

Repeatable to: 3 credits if content differs.

ARHU486 Internship Practicum in Arts and Humanities (3-6 Credits)

An internship intended for students who have already completed an internship for credit. ARHU486 must be a different experience from the internship students have already taken for credit. Generally students intern with a different company, but they may continue working for the same company if the job is significantly different. See ARHU internship coordinator for details.

Prerequisite: Have completed previous internship at U of MD.

Restriction: Must be in a major in ARHU-College of Arts & Humanities; and permission of ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits; and completed 12 credits at U of MD.

ARHU489 Advanced Internship Practicum in ARHU (3-6 Credits)

Designed for students who have already completed at least 2 upper level internship courses for academic credit. It is an advanced practicum to assist students in continuing to develop and hone their professional writing, presentation and analytical skills.

Prerequisite: ARHU486.

Restriction: Must be in a major in ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and permission of instructor.

Repeatable to: 6 credits if content differs.

Additional Information: Course is designed to follow ARHU486.

ARHU498 Special Topics in Arts and Humanities (3 Credits)

Repeatable to: 6 credits if content differs.

ARHU786 Leadership and Professional Development Internship (1-6 Credits)

Professional development for graduate students interested in careers in non-academic organizations and in administrative positions in academic institutions. See department graduate program director for internship guidelines and applicability to graduate program requirements.

Prerequisite: Must have completed one semester of full-time graduate study; and permission of ARHU-College of Arts & Humanities.

ARHU788 Profession Development Seminar (1-3 Credits)

Professional development for academic and non-academic careers in the arts and humanities.

Repeatable to: 9 credits if content differs.

ARHU789 Professional Development Practicum (1-6 Credits)

Graduate students, in various disciplines within the college of Arts and Humanities, will learn the theory and principles of a specific issue or skill set related to academic or non-academic work. They will create original work in a hands-on practicum format.

Restriction: Must have completed at least the equivalent of one year of full-time graduate study; and permission of instructor.

Repeatable to: 6 credits if content differs.

ARMY - Army**ARMY401 Advanced Military Leadership III (3 Credits)**

Introduces contracted students to the study of Army structure, practices and processes exercised by Army Commanders and Staff in completing personnel, logistics, training and combat operations. Includes a laboratory in applied leadership skills and two field exercises.

ARMY402 Advanced Military Leadership IV (3 Credits)

The military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

ARSC - Air Science**ARSC400 National Security and Preparation for Active Duty I (3 Credits)**

Study of American national security policy and processes to include information and implementation, impact of major national and international actors, and development of major policy issues. This course will satisfy credit towards a minor in military studies.

Prerequisite: Permission of UGST-AFROTC-Air Science; or (ARSC300 or ARSC301).

Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Senior standing.

ARSC401 National Security and Preparation for Active Duty II (3 Credits)

This course examines various subjects including: military law/justice, preparation for active duty, and current issues affecting military professionalism. This course will satisfy credit towards a minor in military studies.

Prerequisite: ARSC300 or ARSC301; or permission of UGST-AFROTC-Air Science.

Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Senior standing.

ARTH - Art History & Archaeology**ARTH418 Special Problems in Italian Renaissance Art (3 Credits)**

Focus upon aspects of painting, sculpture, and architecture of Renaissance.

Repeatable to: 6 credits if content differs.

ARTH426 Renaissance and Baroque Sculpture in Northern Europe (3 Credits)

Sculpture in France, Germany, England, and the Low Countries from the fourteenth to the seventeenth century.

ARTH472 Ecuador: Andean Spaces-Traversing the Colonial City and the Natural World (3 Credits)

Introduces students to the history and cultures of Ecuador from the colonial period to the beginning of the 19th century. By studying the socio-spatial configuration of the colonial city as exemplified by Quito, students will be immersed in the art, architecture, and other rich cultural legacies of Ecuador. Quito, a World Heritage site, offers students visually stunning churches, monasteries, colonial squares, a famed tradition of Baroque painting and sculptures, and vibrant indigenous and mestizo communities. As a contrast, students will explore also travel narratives that represent the natural Andean world while visiting Quito's surrounding areas. This course will interrogate the European influence on urban design and representations of the landscape of the Americas. Understanding this colonial past enhances the understanding of the modern history of the Andean region and Latin America as a whole. The students will gain a full appreciation of the European and Indigenous living heritage that composes the region today. Taught in English.

Cross-listed with: SPAN435.

Credit Only Granted for: SPAN435, SPAN448E, ARTH472 or ARTH369E.

Formerly: SPAN448E and ARTH369E.

ARTH484 Modern Chinese Film and Visual Culture (3 Credits)

Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.

Cross-listed with: CINE426.

Credit Only Granted for: ARTH484, CINE426 or FILM426.

Formerly: FILM426.

ARTH488 Colloquium in Art History (3 Credits)

Colloquium to investigate a specific topic in depth.

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 9 credits if content differs.

ARTH489 Special Topics in Art History (3 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 9 credits if content differs.

ARTH496 Methods of Art History and Archaeology (3 Credits)

Methods of research and criticism applied to typical art-historical/archaeological problems, familiarizing the student with bibliography and other research tools. Introduction to the historiography of art history and archaeology, surveying the principal theories, encouraging methodological debates within the discipline. Course for majors who intend to go on to graduate school.

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Restriction: Must be in Art History program.

ARTH498 Directed Studies in Art History I (2-3 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Restriction: Junior standing or higher.

Repeatable to: 99 credits if content differs.

ARTH499 Honors Thesis (1-6 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 6 credits if content differs.

ARTH608 Studies in Ancient Art and Archaeology (3 Credits)

Repeatable to: 9 credits.

ARTH609 Studies in Late Roman, Early Christian, and Byzantine Art (3 Credits)

Repeatable to: 9 credits.

ARTH618 Studies in Medieval Art (3 Credits)

Repeatable to: 9 credits.

ARTH619 Studies in Italian Renaissance Art (3 Credits)

Repeatable to: 9 credits.

ARTH628 Studies in Fourteenth and Fifteenth Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH629 Studies in Sixteenth-Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH638 Studies in Seventeenth-Century Southern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH639 Studies in Seventeenth-Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH648 Studies in Eighteenth-Century European Art (3 Credits)

Repeatable to: 9 credits.

ARTH649 Studies in Nineteenth-Century European Art (3 Credits)

Repeatable to: 9 credits.

ARTH658 Studies in American Art (3 Credits)

Repeatable to: 9 credits.

ARTH659 Studies in Twentieth-Century Art (3 Credits)

Repeatable to: 9 credits.

ARTH668 Studies in Latin American Art and Archaeology (3 Credits)

Repeatable to: 9 credits.

ARTH669 Studies in African Art (3 Credits)

Repeatable to: 9 credits.

ARTH678 Studies in Chinese Art (3 Credits)

Repeatable to: 9 credits.

ARTH679 Studies in Japanese Art (3 Credits)

Repeatable to: 9 credits.

ARTH689 Selected Topics in Art History (1-3 Credits)

Repeatable to: 9 credits.

ARTH692 Methods of Art History (3 Credits)

Methods of research and criticism applied to typical art-historical problems; bibliography and other research tools.

ARTH698 Teaching Art History (1-3 Credits)

Allows students to explore pedagogical tools and methods in the history of art and archaeology, with a goal to becoming better instructors in the field. Starting with the basics of being a good TA (discussion of texts, teaching visual analysis, grading assignments), it moves on through questions of research and project-based teaching, lecturing, and the creation of an inclusive and equitable classroom. Students are asked to design a class they could teach, including a syllabus and assignment prompts. They will also learn how to deliver a lecture (in class, at a conference) and will explore the job market (academic and non-academic) for art historians and archaeologists. The class is recommended for students who have served once as a TA and taken the basic "TA Training" workshops.

Repeatable to: 3 credits.

ARTH699 Special Topics in Art History (3 Credits)

Prerequisite: consent of department head or instructor.

Restriction: Permission of instructor; or permission of ARHU-Art History & Archaeology department.

ARTH708 Seminar in Ancient Art and Archaeology (3 Credits)

Repeatable to: 9 credits.

ARTH709 Seminar in Late Roman, Early Christian, and Byzantine Art (3 Credits)

Repeatable to: 9 credits.

ARTH718 Seminar in Medieval Art (3 Credits)

Repeatable to: 9 credits.

ARTH719 Seminar in Italian Renaissance Art (3 Credits)

Repeatable to: 9 credits.

ARTH728 Seminar in Fourteenth and Fifteenth-Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH729 Seminar in Sixteenth-Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH738 Seminar in Seventeenth-Century Southern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH739 Seminar in Seventeenth-Century Northern European Art (3 Credits)

Repeatable to: 9 credits.

ARTH748 Seminar in Eighteenth-Century European Art (3 Credits)

Repeatable to: 9 credits.

ARTH749 Seminar in Nineteenth-Century European Art (3 Credits)

Repeatable to: 9 credits.

ARTH758 Seminar in American Art (3 Credits)

Repeatable to: 9 credits.

ARTH759 Seminar in Twentieth-Century Art (3 Credits)

Repeatable to: 9 credits.

ARTH768 Seminar in Latin American Art and Archaeology (3 Credits)

Repeatable to: 9 credits.

ARTH769 Seminar in African Art (3 Credits)

Repeatable to: 9 credits.

ARTH778 Seminar in Chinese Art (3 Credits)

Repeatable to: 9 credits.

ARTH779 Seminar in Japanese Art (3 Credits)

Repeatable to: 9 credits.

ARTH789 Selected Topics in Art History (1-3 Credits)**ARTH798 Directed Graduate Studies in Art History (3 Credits)****ARTH799 Master's Thesis Research (1-6 Credits)****ARTH898 Pre-Candidacy Research (1-8 Credits)****ARTH899 Doctoral Dissertation Research (1-8 Credits)**

ARTT - Art Studio

ARTT409 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTT418 Advanced Drawing Studio (3 Credits)

Multi-level drawing studio emphasizing advanced concepts and processes related to drawing; emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT200, ARTT210, and ARTT150; and must have completed one 300-level studio course. Or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT426 Advanced Painting: Painting on Site I (3 Credits)

Designed for Art and design, architecture, urban planning, and public engagement majors seeking to gain more experience in the public art process. Through public artworks, students will explore ethical methods of community engagement, mural design and production. This course will have 1-2 visiting artists give lectures and/or participate in a workshop.

Prerequisite: ARTT320; or permission of the Art Department.

ARTT427 Advanced Painting: Painting on Site II (3 Credits)

Designed for Art and design, architecture, urban planning, and public engagement majors and Creative Placemaking minors seeking to build and strengthen relationships through public place-based artwork. This course will teach ethical methods of public outreach through community engagement, the stages of mural design, and research to aid the mural design phase. This course will also examine the various materials used to create a public work of art and apply them throughout the semester effectively.

Prerequisite: ARTT320.

Restriction: Permission of the Art Department.

ARTT428 Advanced Painting Studio (3 Credits)

Multi-level painting studio emphasizing advanced concepts and processes related to oil and acrylic painting; emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: ARTT320.

Repeatable to: 12 credits.

ARTT438 Advanced Sculpture Studio (3 Credits)

Multi-level sculpture studio; continuation of media-specific sculpture courses with emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: Must have completed one 300-level sculpture course; or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT448 Advanced Printmaking Studio (3 Credits)

Multi-level printmaking studio; continuation of media-specific printmaking courses with emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: Must have one 300-level printmaking course; or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT449 Advanced Photography Studio (3 Credits)

Advanced photographic processes and theory. Emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT353; or permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT454 Advanced Graphic Design Principles: Design in Society (3 Credits)

Focus on social responsibility and community activism. History and theory of propaganda and advocacy-based design. Students explore current design practices, work individually, and collaborate in teams with non-profits or other clients with community-based or socio-cultural agendas. Research and writing-intensive course.

Prerequisite: ARTT355 and ARTT356.

ARTT455 Three Dimensional Graphic Design (3 Credits)

Continued exploration of advanced graphic design practices with primary emphasis on 3-D object and packaging design. Includes research, course reading discussion, oral presentations, and specific project assignments which will require a proficient level of hand-skills (craft) and computer skills.

Prerequisite: ARTT355, ARTT356, and ARTT357.

Recommended: ARTT333.

Credit Only Granted for: ARTT352 or ARTT455.

Formerly: ARTT352.

ARTT456 Motion Design (3 Credits)

Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.

Prerequisite: ARTT355, ARTT356, and ARTT357; or permission of ARHU-Art department.

ARTT457 Advanced Interactive Design (3 Credits)

Advanced concepts and techniques of interactive design and interactive software. Examination of corporate, client-based, and public service-based interactive graphic design. Emphasis on web-based interactive design structures.

Prerequisite: ARTT357.

ARTT458 Graphic Design Portfolio (3 Credits)

Creation of a comprehensive professional portfolio. Curriculum includes portfolio preparation and presentation, contracts, copyright issues, interviewing skills, resume and cover-letter writing, design briefs and proposals, and freelance business issues. Portfolio presentation includes basics of book arts.

Prerequisite: ARTT454.

Repeatable to: 9 credits if content differs.

ARTT459 Advanced Graphic Design Studio (3 Credits)

Student-run design firm working with non-profits and other organizations. Organizations act as clients; the students as a creative firm. Under guidance and supervision of faculty, students learn first-hand about working with clients, working within a budget, working with printers and press runs, and working under real deadlines.

Prerequisite: ARTT454; or permission of ARHU-Art department.

Repeatable to: 9 credits if content differs.

ARTT460 Seminar in Art Theory (3 Credits)

Exploration of relationship between content and processes of art in a contemporary multi-cultural context.

Restriction: Senior standing.

ARTT468 Seminar on the Interrelationship Between Art and Art Theory (3 Credits)

The relationship between a student's work and the theoretical context of contemporary art.

Restriction: Junior standing or higher; or permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT469 Professional Practice (3 Credits)

Business aspects of being an artist, with an emphasis on starting and maintaining a professional career.

Restriction: Senior standing; or permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

Formerly: ARTT462.

ARTT479 Advanced Digital Media Studio (3 Credits)

Variable multi-level studio emphasizing advanced concepts and processes related to time-based, projection, installation, interactive, and audio/visual integrated digital art. Emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT370; or permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT481 Advanced Specialization Seminar (3 Credits)

Seminar combines contemporary art theory, criticism, professional practice and career preparation in relation to students works from all areas of specialization.

Prerequisite: Permission of ARHU-Art department.

ARTT487 Capstone for Citation in Interdisciplinary Multimedia and Technology (1 Credit)

Independent study: a paper or website synthesizing the various citation learning experiences.

Prerequisite: Permission of ARHU-Art department.

ARTT488 Advanced Special Topics in Graphic Design (1-3 Credits)

Variable topics in Graphic Design theory and practice.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT489 Advanced Special Topics in Art (1-3 Credits)

Advanced studio art and theory within the context of a special topic.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT498 Directed Studies in Studio Art (1-3 Credits)

Advanced independent work in Studio Art. Meeting with faculty and studio time arranged.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT499 Directed Studies in Graphic Design (1-3 Credits)

Advanced independent studies in Graphic Design. Meetings with faculty and studio time arranged.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT618 Drawing (3 Credits)

Independent studies in drawing for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT628 Painting (3 Credits)

Graduate painting for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT638 Sculpture (3 Credits)

Independent studies in sculpture for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT648 Printmaking (3 Credits)

Independent studies in printmaking for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT689 Special Problems in Studio Art (3 Credits)

Restriction: Permission of instructor.

Repeatable to: 6 credits.

Formerly: ARTS689.

ARTT698 Directed Graduate Studies in Studio Art (1-4 Credits)

Independent work. Meetings with faculty and studio time arranged.

Prerequisite: Permission of ARHU-Art department.

Restriction: Must be in Studio Art (Master's) program.

Repeatable to: 12 credits if content differs.

Formerly: ARTS698.

ARTT699 Directed Graduate Studies in Studio Art (1-4 Credits)

Independent graduate studies.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT718 Drawing (3 Credits)

Independent studies in drawing for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT728 Painting (3 Credits)

Independent studies in painting for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT738 Sculpture (3 Credits)

Independent studies in sculpture for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT748 Printmaking (3 Credits)

Independent studies in printmaking for advanced special students.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT768 Graduate Colloquium (2 Credits)

Examines various aspects of art, art theory and criticism in a contemporary and multi-cultural context. Relates student work to this context.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT798 Directed Graduate Studies in Studio Art (1-4 Credits)

Independent graduate studies.

Restriction: Must be in Studio Art (Master's) program.

Repeatable to: 12 credits if content differs.

Formerly: ARTS798.

ARTT799 Master's Thesis Research (1-6 Credits)

Formerly: ARTS799.

ASTR - Astronomy

ASTR406 Stellar Structure and Evolution (3 Credits)

Study of stellar internal structure, nuclear reactions, and energy transport. Study of stellar evolution of both low-mass and high-mass stars, including the stellar end states of white dwarfs, neutron stars, and black holes.

Prerequisite: ASTR320; or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR498N or ASTR406.

Formerly: ASTR498N.

ASTR410 Radio Astronomy (3 Credits)

Introduction to current observational techniques in radio astronomy. The radio sky, radiophysics, coordinates and catalogs, antenna theory, Fourier transforms, interferometry and arrays, aperture synthesis, and radio detectors.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR415 Computational Astrophysics (3 Credits)

Introduction to the most important computational techniques being used in research in astrophysics. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273).

Or permission of CMNS-Astronomy department. Jointly offered with ASTR615.

Credit Only Granted for: ASTR415 or ASTR615.

ASTR421 Galaxies (3 Credits)

Introduction to structure, kinematics, and dynamics of normal and peculiar galaxies. Quantitative descriptions of normal spiral galaxies (like our Milky Way) and elliptical galaxies will be followed by more exotic considerations such as interacting and merging galaxies, and active galactic nuclei.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR422 Cosmology (3 Credits)

Introduction to modern cosmology. Topics include large scale structure of universe, the intergalactic medium, the nature of dark matter cosmological models and galaxy formation.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR430 The Solar System (3 Credits)

Formation and evolution of the Solar System. Planetary surfaces, interiors, atmospheres, and magnetospheres. Asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the Solar System. Intended for students majoring in the physical sciences.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR435 Astrophysics of Exoplanets (3 Credits)

Introduction to exoplanets. Topics include historical development, advantages, and limitations of detection methods, the statistics of exoplanet characteristics, the bulk properties of known exoplanets, and remote sensing for characterization of exoplanets.

Prerequisite: ASTR121; and (PHYS273; or (PHYS270 and PHYS271)). Or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR498X or ASTR435.

Formerly: ASTR498X.

ASTR450 Orbital Dynamics (3 Credits)

Vectorial mechanics, motion in a central force field, gravitational and non-gravitational forces, the two-body and three-body problems, orbital elements and orbital perturbation theory, resonances in the solar system, chaos. Intended for students majoring in any of the physical sciences.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR480 High Energy Astrophysics (3 Credits)

The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined. Phenomena such as supernovae and high-energy particles are also covered.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR498 Special Problems in Astronomy (1-6 Credits)

Research or special study. Credit according to work done.

Restriction: Must be in one of the following programs (Physics; Astronomy); and permission of CMNS-Astronomy department.

ASTR601 Radiative Processes (3 Credits)

Emission, absorption, and scattering of radiation by matter, with astrophysical applications. Thermodynamics and statistical mechanics: LTE, Boltzmann, and Saha equations; radiative transfer; atomic and molecular radiation; plasma radiation and transfer: bremsstrahlung, synchrotron emission, Compton scattering.

Restriction: Permission of CMNS-Astronomy department.

ASTR606 Stellar Structure and Evolution (3 Credits)

Models of stellar atmospheres, methods of determining properties of stars, physical principles governing stellar interior processes, observational data for determining stellar evolution, nuclear processes, stellar modeling.

Restriction: Permission of CMNS-Astronomy department.

ASTR610 Astronomical Instrumentation and Techniques (3 Credits)

Review of Maxwell's equations; designs of telescopes, spectrographs, modern detectors; basic concepts for radio detectors and telescopes; interferometry and data processing.

Restriction: Permission of CMNS-Astronomy department.

ASTR615 Computational Astrophysics (3 Credits)

Introduction to computational techniques used in astrophysical research. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.

Restriction: Permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR415 or ASTR615.

ASTR620 Galaxies (3 Credits)

Galaxy classifications; Milky way: basic data, distribution of stars, gas, dust and relativistic particles, large-scale structure and rotation; Spiral galaxies: stellar dynamics and stability, density waves, star bursts, galactic center; Elliptical galaxies: stellar dynamics, cannibalism; galaxy formation.

Restriction: Permission of CMNS-Astronomy department.

ASTR622 Cosmology (3 Credits)

Introduction to modern cosmology. Topics include the large scale structure of the universe, cosmological models, the Big Bang, the cosmic microwave background, the nature of dark matter, and galaxy formation.

Restriction: Permission of CMNS-Astronomy department.

ASTR630 Planetary Science (3 Credits)

The science of our planetary system with an emphasis on the aspects of it, that help us understand the origin of the system and thus the relevance to other planetary systems. Topics will include planetary atmospheres, surfaces, and interiors and the small bodies of the solar system (asteroids, comets, Kuiper-belt objects). We will consider the dynamics of these bodies and the physics and chemistry of these bodies.

Restriction: Permission of CMNS-Astronomy department.

ASTR635 Exoplanetary Astrophysics (3 Credits)

Introduces students to the current state of the exoplanetary field, at a graduate level. Topics covered will include exoplanet detection, exoplanet demographics, planet formation and evolution, planetary atmospheres and interiors, and habitability.

Restriction: Permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR635 or ASTR688E.

Formerly: ASTR688E.

ASTR670 Interstellar Medium and Gas Dynamics (3 Credits)

Content of phases of the interstellar medium: physical processes in the ISM: ionization equilibrium, heating and cooling, interstellar dust; gas dynamics: fluid motions, instabilities, shock waves; magnetohydrodynamics.

Restriction: Permission of CMNS-Astronomy department.

ASTR680 High Energy Astrophysics (3 Credits)

The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined.

Restriction: Permission of CMNS-Astronomy department.

Formerly: ASTR688M.

ASTR688 Special Topics in Modern Astronomy (1-3 Credits)

Special topics such as extragalactic radio sources, plasma astrophysics, the H.R. diagram, chemistry of the interstellar medium, radiophysics of the sun.

Restriction: Permission of instructor.

ASTR690 Research Project I (3 Credits)**ASTR695 Introduction to Research (1 Credit)**

Provides an introduction to research programs in the Department of Astronomy and a forum to explore possible research projects. Aimed at incoming graduate students.

ASTR699 Special Problems in Advanced Astronomy (1-6 Credits)**ASTR788 Selected Topics in Modern Astronomy (1-3 Credits)****ASTR799 Master's Thesis Research (1-6 Credits)****ASTR898 Pre-Candidacy Research (1-8 Credits)****ASTR899 Doctoral Dissertation Research (1-8 Credits)**

BCHM - Biochemistry

BCHM461 Biochemistry I (3 Credits)

First semester of a comprehensive introduction to modern biochemistry. Structure, chemical properties, and function of proteins and enzymes, carbohydrates, lipids, and nucleic acids. Basic enzyme kinetics and catalytic mechanisms.

Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.

Credit Only Granted for: BCHM461 or BCHM463.

BCHM462 Biochemistry II (3 Credits)

A continuation of BCHM 461. Metabolic pathways and metabolic regulation, energy transduction in biological systems, enzyme catalytic mechanisms.

Prerequisite: Minimum grade of C- in BCHM461.

Credit Only Granted for: BCHM462 or BCHM463.

BCHM463 Biochemistry of Physiology (3 Credits)

A one-semester introduction to general biochemistry. A study of protein structure, enzyme catalysis, metabolism, and metabolic regulation with respect to their relationship to physiology.

Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.

Credit Only Granted for: BCHM461, BCHM462 or BCHM463.

BCHM464 Biochemistry Laboratory (3 Credits)

Biochemical and genetic methods for studying protein function. Site-directed mutagenesis and molecular cloning, protein purification, enzyme activity assays, computer modeling of protein structure.

Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for all College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: BCHM465.

Restriction: BCHM, CHEM, and Nutritional Sciences majors have first priority, followed by other life science majors.

BCHM465 Biochemistry III (3 Credits)

CORE Capstone (CS) Course. An advanced course in biochemistry. Biochemical approach to cellular information processing. DNA and RNA structure. DNA replication, transcription, and repair. Translation of mRNA to make proteins.

Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Recommended: BCHM462.

BCHM477 Biomolecular Measurement and Data Analysis (3 Credits)

Covers a range of classic and modern biochemical assays and techniques as well as introducing data science approaches to "omics" data. Upon successful completion of this course, students should have the necessary preparation and experience to collaborate productively with research scientists in industrial, clinical or academic contexts.

Prerequisite: CHEM271 or CHEM276; and (CHEM277 or CHEM272).

Restriction: Must be in the Chemistry or Biochemistry major.

BCHM485 Physical Biochemistry (3 Credits)

Physical Chemistry with applications to biological systems. Principal topics: quantum chemistry, spectroscopy, structural methods for biological macromolecules, statistical thermodynamics, transport processes in liquid phase, chemical and biochemical kinetics, modeling and simulation, polymer dynamics.

Prerequisite: Minimum grade of C- in CHEM481.

Restriction: Must be in Biochemistry program; or permission of instructor.

Credit Only Granted for: CHEM482 or BCHM485.

BCHM661 Nucleic Acids I (2 Credits)

Topics covered: Chemistry and structure of DNA and RNA, from nucleotides to chromatin, chromosomes, and genomes, and some methods for studying, synthesizing, sequencing and manipulating nucleic acids. Rudimentary genomics and bioinformatics. DNA Biology: selected aspects of the biochemistry and regulation of DNA replication, repair, and recombination, and how these processes interact with each other.

Prerequisite: BSCI410 and BCHM465.

BCHM662 Nucleic Acids II (2 Credits)

Topics covered: Interactions between nucleic acids and ligands such as cations, drugs, and especially proteins. Sources of binding affinity and specificity. Selection-amplification methods. Description of several classes of protein-nucleic acids complexes. DNA/RNA catalysis, the origin of life, mobile genetic elements.

Prerequisite: BCHM661.

BCHM668 Special Problems in Biochemistry (2-4 Credits)

Prerequisite: BCHM464; or students who have taken courses with comparable content may contact the department.

BCHM669 Special Topics in Biochemistry (1-3 Credits)

Prerequisite: BCHM462; or students who have taken courses with comparable content may contact the department.

BCHM671 Protein Chemistry and Enzymic Catalysis (3 Credits)

Principles of protein structure, folding, and function, experimental characterization of structure, active sites, enzyme mechanisms and kinetics.

Prerequisite: BCHM461; or students who have taken courses with comparable content may contact the department.

BCHM675 Biophysical Chemistry (3 Credits)

Conformation, shape, structure, conformational changes, dynamics and interactions of biological macromolecules and complexes or arrays of macromolecules. Physical techniques for studying properties of biological macromolecules.

Prerequisite: CHEM481 and BCHM461; or students who have taken courses with comparable content may contact the department.

BCHM676 Biological Mass Spectrometry (3 Credits)

Fundamentals of modern mass spectrometry and use with biochemical techniques to provide unique analyses of drug metabolites, lipids, carbohydrates, nucleotides and proteins. The interface with bioinformatics will be examined, which provides the foundation of proteomics.

Prerequisite: BCHM461 or BCHM463.

Formerly: BCHM669B.

BCHM677 Computational Tools in Biochemistry (1 Credit)

A practical, hands-on introduction to the application of computational tools that support biochemistry research. Selected topics may include: efficient use of scientific literature databases and the preparation of professional bibliographies; proteomics and mass spectrometry; bioinformatics and genomics programs an database resources; molecular structure visualization and modeling; quantitative data fitting and error analysis; and laboratory research ethics.

Prerequisite: BCHM674 or BCHM671; or permission of instructor.

Restriction: Must be in one of the following programs (Biochemistry (Master's); Biochemistry (Doctoral)); or permission of instructor.

BCHM698 Literature Seminar in Biochemistry (2 Credits)

Students will prepare and present a departmental seminar based on a topic in the current biochemical research literature.

Repeatable to: 2 credits if content differs.

BCHM699 Special Problems in Biochemistry (1-6 Credits)

Laboratory experience in a research environment. Restricted to students in the non-thesis M.S. option.

Prerequisite: Must have completed one semester of graduate study in biochemistry; and must be in the Biochemistry Masters program non-thesis M.S. option.

Repeatable to: 6 credits if content differs.

BCHM799 Master's Thesis Research (1-6 Credits)**BCHM889 Seminar (1-3 Credits)****BCHM898 Pre-Candidacy Research (1-8 Credits)****BCHM899 Doctoral Dissertation Research (1-8 Credits)**

BEES - Behavior, Ecology, Evolution and Systematics

BEES608 Seminar in Behavior, Ecology, Evolution and Systematics (1-4 Credits)

One seminar per week for each subject selected: Behavior; Ecology; Evolution; Systematics; Behavior, Ecology, Evolution and Systematics.

Repeatable to: 15 credits if content differs.

BEES609 Special Topics in Behavior, Ecology, Evolution and Systematics (1-6 Credits)

Lectures, experimental courses and other special instructions in topics appropriate for Behavior, Ecology, Evolution and Systematics (BEES) students.

Repeatable to: 12 credits if content differs.

BEES708 Advanced Topics in Behavior, Ecology, Evolution, and Systematics (1-4 Credits)

Lectures, experimental courses, and other special instruction in various behavioral, ecology, evolution and systematics subjects.

Repeatable to: 12 credits if content differs.

BEES799 Master's Thesis Research (1-6 Credits)**BEES898 Pre-Candidacy Research (1-8 Credits)****BEES899 Doctoral Dissertation Research (1-8 Credits)**

BERC - Center for Study of Business, Ethics, Regulation, Crime

BERC600 Legal and Regulatory Compliance (3 Credits)

Global anticorruption law (including the Foreign Corrupt Practices Act, the UK Bribery Act, the OECDs Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, Canadas Corruption of Public Officials Act, and the Inter American Convention Against Corruption). Sarbanes Oxley compliance (including certification requirements, whistleblower protection, and audit committees). Financial integrity (including money laundering, insider trading, market manipulation, conflicts of interest, and privacy). Internal investigations or attorney client privilege. Compliance (antitrust, food and drug, environmental, occupational safety and health).

BERC601 White-Collar Crime and Victimization (3 Credits)

History, definitions, categories and trends of white collar crime, within the US and globally. The corporation as offender and the corporation as victim; Data sources and measurement; Theories of offending and victimization; Costs of crime, correlates of crime, and risks; Internal compliance systems; Enforcement strategies (deterrence/compliance); responsive regulation; enforcement pyramid; Policy assessment.

BERC602 Accounting and Its Uses in the Forensic Process (3 Credits)

An introduction to accounting for the uninitiated (an introduction to bookkeeping, key accounts, financial statements and their composition, and concepts in managerial accounting). Principles of forensic accounting and the use of financial statement analysis in the forensic process (common fraud schemes in the areas of fraudulent financial reporting, misappropriation of resources, corruption and illegal acts, how fraud schemes typically appear in the accounting records and financial statements of an enterprise or agency, the use of financial statement analysis and analytics to detect fraud, differences between a routine financial statement audit and a forensic audit, the limitations on financial statement audits in the discovery of fraud, how budgeting issues in managerial accounting can pressure managers to act unethically or illegally).

BERC603 Investigative tools and Data Analysis (3 Credits)

Techniques to electronically capture and integrate data from a variety of different sources aimed to assist managerial decision-making in such areas as fraud detection. Focus on large data sets for data mining/machine learning tools for classifications (such as decision trees, neural networks, techniques to recognize patterns in the data and regression modeling and statistics to aid prediction). Learning and utilizing appropriate software (e.g., XLMiner). Computer-aided analysis techniques for detecting and investigating white-collar offenses, issues related to the collective use of digital evidence and the collection of data from electronic devices. Extensive use of case studies as examples.

BIOE - Bioengineering

BIOE404 Biomechanics (3 Credits)

Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.

Prerequisite: MATH246, BIOE120, ENES102, BIOE121, and BIOE241; and must have completed or be concurrently enrolled in BIOE371.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE411 Tissue Engineering (3 Credits)

A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.

Prerequisite: Must have completed at least one biology course; and (BIOE120, BIOE121, BIOE241, MATH246, and MATH241). Or permission of ENGR-Fischell Department of Bioengineering department.

Recommended: BSCI330 and BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE411 or CHBE487.

BIOE413 Stem Cell Engineering (3 Credits)

Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.

Prerequisite: BIOE241, BIOE120, BIOE121, and MATH246; and must have completed or be concurrently enrolled in BIOE340.

Jointly offered with: BIOE613.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE413, BIOE689J, or BIOE613.

BIOE414 Macroscale Biomechanics (3 Credits)

An overview of current problems in movement biomechanics. After taking this course, students will be able to 1) Describe the engineering tools needed to study human movement 2) Recognize a variety of clinical research and practice, and 3) Use the framework provided by the course to pursue their own self-teaching and research on these topics. Topics covered include muscle mechanics, joint mechanics, EMG and EEG signal applications, ultrasonography and elastography, anthropometry, human movement 3-D kinematics, inverse dynamics, forward dynamics, work, power and energy. Biomechanics tools will be used to investigate clinical problems. Students will also do research projects on related topics.

Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and ENES102.

Jointly offered with: BIOE614.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE414, BIOE614 or BIOE489Z.

Formerly: BIOE489Z.

BIOE415 Engineering Design for Global Health (3 Credits)

Many medical technologies are not available in low and middle-income countries due to the cost, infrastructure, and medical expertise required to implement and sustain them. There is tremendous potential to increase access to health care through developing more affordable biomedical technologies, but effective design requires deep understanding of the problem. The goal of this course is to introduce the human-centered design framework and how it can be applied to design new biomedical technologies to solve challenges in global health.

Prerequisite: BIOE120, BIOE121, and MATH246.

Jointly offered with: BIOE615.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE415, BIOE615, BIOE489Y, or BIOE689I.

Formerly: BIOE489Y.

BIOE416 Cardiovascular Engineering (3 Credits)

An overview of engineering applications in the cardiovascular system. Covers cardiovascular anatomy, physiology and pathophysiology in the context of cell and tissue mechanics, fluid mechanics, thermodynamics, biotransport, neurovascular coupling, and imaging. Includes design of cardiovascular devices, sensors, biomaterials, and tissue engineered constructs.

Prerequisite: BIOE331 and BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE416 or BIOE489V.

Formerly: BIOE489V.

BIOE420 Bioimaging (3 Credits)

Covers the fundamental principles of major biomedical imaging techniques, including X-ray Imaging, Computer Tomography (CT), Magnetic Resonance Imaging (MRI), Ultrasound Imaging, Nuclear Medicine Imaging (SPECT/PET/CT), Optical Coherent Tomography (OCT), and Optical and Hyperspectral Imaging. The course will explore the underlying concepts of imaging system architectures, image reconstruction algorithms, and software implementation. Additionally, it will discuss the clinical interpretation of biomedical images and newer ways to use images for bio-related applications for diagnosis and analysis.

Prerequisite: MATH246, BIOE120, BIOE121, and BIOE241.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE431 Fundamentals of Biosensor Techniques, Instrumentation, and Applications (3 Credits)

A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.

Prerequisite: CHEM135, PHYS260, PHYS261, BSCI330, BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE433 Optical Microscopy (3 Credits)

Includes a large variety of techniques central in many fields of biological and engineering research as well as clinical medicine. This course will provide a comprehensive overview of the fundamentals of optical microscopy. At a fundamental level, the course will cover the interaction of light with tissue, cells and biomaterials, and the mathematical foundations that describe optical systems.

Prerequisite: BIOE120, BIOE121, BIOE241, BIOE371, and MATH246.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489I or BIOE433.

Formerly: BIOE489I.

BIOE437 Computer-Aided Design in Bioengineering (3 Credits)

Introduction to Computer-Aided Design (CAD). Lecture topics will summarize design methodology, review best-practices in hardware development, and discuss engineering applications. The course will culminate in a student-selected project leveraging CAD.

Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE437, BIOE689V, ENME414, ENME272, or ENAE488D.

Formerly: BIOE689V.

BIOE442 Python: Introduction to Programming and Data Analysis (3 Credits)

Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.

Prerequisite: BIOE241, BIOE120, BIOE121, and MATH241; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489A or BIOE442.

Formerly: BIOE489A.

BIOE447 Clinical Experiences in Bioengineering (3 Credits)

An immersion experience in the clinical settings in which biomedical engineering strategies, technologies, and practices are applied. An emphasis will be placed on both clinical problems and engineering solutions.

Prerequisite: BIOE221.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489O or BIOE447.

Formerly: BIOE489O.

BIOE453 Biomaterials (3 Credits)

Examination of the structure and function of natural biomaterials, and cell-extracellular matrix interactions. Study physical properties of synthetic biomaterials for biomedical applications. Understanding molecular level interactions between biomolecules and biomaterials to design novel biomaterials with desirable characteristics. Application of biomaterials as implants, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds will be covered.

Prerequisite: CHEM231, MATH246, CHEM232, BIOE120, BIOE121, and BIOE241.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

BIOE457 Biomedical Electronics & Instrumentation (4 Credits)

Students learn fundamental concepts of electronics, assembly of electronic components into functional circuits, and integration of functional electronic devices and circuits into a system. In the lab component, students will learn to assemble and evaluate circuits and systems.

Prerequisite: BIOE120, BIOE121, BIOE241, PHYS261, MATH246, and PHYS260.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE461 Synthetic Biology and Biological Engineering (3 Credits)

Students are introduced to the scientific foundation and concepts of synthetic biology and biological engineering. Current examples that apply synthetic biology to fundamental and practical challenges will be emphasized. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.

Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Recommended: Completion of BSCI222 and/or BSCI330 recommended.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE462 Therapeutic Development and Delivery (3 Credits)

The ultimate purpose of the pharmaceutical and biotechnology industries is the development and delivery of therapeutics. This course covers fundamentals of engineering and the pharmaceutical sciences related to therapeutics, including basic pharmaceuticals/drug delivery, pharmacokinetics, biomolecular kinetics, and regulatory issues. Specific focus is placed on biotherapeutics, including antibodies and protein engineering, RNA and DNA therapeutics (gene therapy and RNAi), extracellular vesicle biotechnology (exosomes), and cell-based therapies, including stem cells. The use of delivery technologies to enable therapeutics (e.g. nanomedicine) will also be discussed.

Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489P or BIOE462.

Formerly: BIOE489P.

BIOE464 Introduction to Computational Molecular Bioengineering (3 Credits)

Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.

Prerequisite: Minimum grade of C- in BIOE232, BIOE372, and BIOE442; and minimum grade of C- in BIOE371 or BIOE246; or permission of Fischell Department of Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE468 Selected Topics in Bioengineering (3 Credits)

Selected topics in Bioengineering will be covered and taught by a variety of department faculty.

Prerequisite: BIOE120 and BIOE121.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 9 credits if content differs.

BIOE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Prerequisite: BIOE120.

Jointly offered with: BIOE674.

Restriction: Must have earned a minimum of 60 credits, Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE474, BIOE674, CHBE474, BIOE489T, or BIOE689E.

Formerly: BIOE489T.

BIOE485 Capstone Design I: Entrepreneurship, Regulatory Issues, and Ethics (3 Credits)

This is the first part of a two-semester senior capstone design course which covers principles involved in engineering design, design approaches, economics of design, ethics in engineering, and patent regulations. It also helps students learn team work and write design project proposals under the mentorship of a faculty advisor.

Prerequisite: 21 credits in BIOE courses; and must have completed or be concurrently enrolled in BIOE457.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and senior standing; and must be in Engineering: Bioengineering program.

BIOE486 Capstone Design II (3 Credits)

This is the second part of the senior capstone design course. This part is independent instruction where faculty mentoring each project team works with students to order supplies, fabricate their proposed design under BIOE485, test the design, write the report and present it to their fellow seniors and board of faculty mentors. Students are taught to convert the blue print of a design to actual device and test it.

Prerequisite: Must have completed BIOE485 in the immediately preceding semester.

Restriction: Senior standing; and must be in Engineering: Bioengineering program; and permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE486 or ENBE486.

Formerly: ENBE486.

BIOE488 Research Methods in Bioengineering (1-3 Credits)

Exploring a variety of research methods in the field of Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 9 credits if content differs.

BIOE489 Special Topics in Bioengineering (1-3 Credits)

Exploring a variety of topics with Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 6 credits.

BIOE601 Biomolecular and Cellular Rate Processes (3 Credits)

Presentation of techniques for characterizing and manipulating non-linear biochemical reaction networks. Advanced topics to include mathematical modeling of the dynamics of biological systems; separation techniques for heat sensitive biologically active materials; and rate processes in cellular and biomolecular systems. Methods are applied to current biotechnological systems, some include: recombinant bacteria; plant insect and mammalian cells; and transformed cell lines.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE601 or ENCH859B.

BIOE602 Cellular and Tissue Biomechanics (3 Credits)

Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.

BIOE604 Cellular and Physiological Transport Phenomena (3 Credits)

A study of transport processes, including momentum, energy and mass transport, relevant to biosystems at various scales from physiological to cellular systems. Transport leads to sets of partial differential equations and the course revolves around approaches to solving these equations to arrive at fundamental understanding of the physics of transport in biosystems.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE605 BIOE Graduate Studies I (1 Credit)

Introduction to the bioengineering graduate program. Students gain exposure to departmental research through lab rotation and to current research in the field through seminar. Students will also gain preparation and guidance on other first-year academic requirements.

Restriction: Must be in ENGR: PhD Only-Bioengineering (Doctoral) program.

BIOE606 BIOE Graduate Studies II (1 Credit)

Second semester continued acclimation to the bioengineering graduate program. Students gain exposure to departmental research through lab rotation and to current research in the field through seminar.

Restriction: Must be in ENGR: PhD Only-Bioengineering (Doctoral) program.

BIOE608 Bioengineering Seminar Series (1 Credit)

A variety of topics related to Bioengineering will be presented in weekly seminars.

Restriction: Must be in one of the following programs (ENGR: PhD Only-Bioengineering (Master's); ENGR: PhD Only-Bioengineering (Doctoral)).

Repeatable to: 6 credits if content differs.

BIOE610 Mathematical Methods in Bioengineering (3 Credits)

From diffusion problems to light-matter interactions, students will learn basic skills needed to create mathematical models in bioengineering. Students will first be exposed to simplified problems in analytical form, and then more complex problems with the help of computer software programs.

Restriction: Permission of ENGR-Fischell Department of Bioengineering.

BIOE611 Advanced Tissue Engineering (3 Credits)

A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.

Prerequisite: Must have completed at least one biology course; and MATH241. Or permission of ENGR-Fischell Department of Bioengineering department.

Recommended: BSCI330 and BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE612 Physiological Evaluation of Bioengineering Designs (3 Credits)

Bioengineering designs of biomaterials, biomedical devices, imaging and drug delivery agents, tissue engineering, prosthesis (among others), offer the opportunity to improve health care. This course is aimed at providing knowledge to lead bioengineering designs on the basis of biocompatibility and to provide tools to assess their patho-physiological impact in biological systems.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE613 Stem Cell Engineering (3 Credits)

Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.

Jointly offered with: BIOE413.

Restriction: Permission of ENGR-Fischell Department of Bioengineering.

Credit Only Granted for: BIOE489J, BIOE413, BIOE689J or BIOE613.

Formerly: BIOE689J.

BIOE614 Macroscale Biomechanics (3 Credits)

An overview of current problems in movement biomechanics. Topics covered include muscle mechanics, joint mechanics, EMG and EEG signal applications, ultrasonography and elastography, anthropometry, human movement 3-D kinematics, inverse dynamics, forward dynamics, work, power and energy. Biomechanics tools will be used to investigate clinical problems. Students will also do research projects on related topics.

Jointly offered with: BIOE414.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE689X, BIOE489Z, BIOE414, or BIOE614.

Formerly: BIOE689X.

BIOE615 Engineering Design for Global Health (3 Credits)

Many medical technologies are not available in low and middle-income countries due to the cost, infrastructure, and medical expertise required to implement and sustain them. There is tremendous potential to increase access to health care through developing more affordable biomedical technologies, but effective design requires deep understanding of the problem. The goal of this course is to introduce the human-centered design framework and how it can be applied to design new biomedical technologies to solve challenges in global health.

Jointly offered with: BIOE415.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE615, BIOE415, BIOE689I, or BIOE489Y.

Formerly: BIOE689I.

BIOE631 Biosensor Techniques, Instrumentation, and Applications (3 Credits)

A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.

Prerequisite: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE631, BIOE689Z, or CHPH718Z.

Formerly: BIOE689Z.

BIOE632 Biophotonic Imaging and Microscopy (3 Credits)

Principles and instrumentation of various biomedical optical techniques, including fluorescence and Raman spectroscopy, confocal and multi-photon microscopy, optical coherence tomography, and diffuse optical tomography. Biomedical applications will also be discussed.

Recommended: BIOE420.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE432, BIOE632, or BIOE689C.

BIOE640 Polymer Physics (3 Credits)

Graduate course covering theoretical aspects of the behavior of polymeric materials. It covers statistical properties and thermodynamics of single chain and multichain systems.

Prerequisite: ENMA471; or permission of instructor.

Credit Only Granted for: ENMA620 or BIOE640.

BIOE650 Quantitative Physiology of the Cell (3 Credits)

Introduction to quantitative aspects of neuronal, skeletal muscle, and cardiac physiological systems, with an emphasis on cellular function and plasticity. Complements BIOE603: Electrophysiology of the Cell.

Recommended: MATH246, MATH141, and MATH241.

Credit Only Granted for: BIOE689Q or BIOE650.

Formerly: BIOE689Q.

BIOE651 Applied Mathematics in Bioengineering (3 Credits)

Students will use and learn mathematical concepts that are directly relevant to their career as a bioengineer. They will apply these concepts to various bioengineering applications while also learning industry-relevant analytical software.

Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.

Credit Only Granted for: BIOE651 or BIOE658M.

Formerly: BIOE658M.

BIOE652 Regulatory Affairs in Medical Product Development (3 Credits)

An introductory course on regulations associated with the development and production of medical devices and pharmaceuticals.

Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.

Credit Only Granted for: BIOE652, ANTH627 or BIOE658R.

Formerly: BIOE658R.

BIOE654 Physiology for Bioengineers (3 Credits)

Bioengineering-based designs of biomaterials, biomedical devices, imaging and drug delivery agents, tissue engineering, and prosthesis (among others), offer the opportunity to improve health care. This course is aimed at providing biological knowledge to lead bioengineering designs on the basis of biocompatibility and to provide tools to assess their patho-physiological impact in biological systems.

Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.

Credit Only Granted for: BIOE654 or BIOE658P.

Formerly: BIOE658P.

BIOE658 Special Topics in Bioengineering (M.Eng.) (1-3 Credits)

Special topics in Bioengineering.

Restriction: Must be in the Master of Engineering program or Post-Baccalaureate Certificate of Engineering program; and permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 99 credits if content differs.

BIOE664 Computational Molecular Bioengineering (3 Credits)

Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.

Restriction: Permission of ENGR-Fischell Department of Bioengineering.

Credit Only Granted for: BIOE489N, BIOE464, BIOE689U, or BIOE664.

Formerly: BIOE689U.

BIOE674 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Jointly offered with: BIOE474.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE674, BIOE474, CHBE474, BIOE489T, or BIOE689E.

Formerly: BIOE689E.

BIOE689 Special Topics in Bioengineering (1-3 Credits)

Research Oriented Individual Instruction course.

Repeatable to: 6 credits if content differs.

BIOE799 Master's Thesis Research (1-6 Credits)

BIOE898 Pre-Candidacy Research (1-8 Credits)

BIOE899 Doctoral Dissertation Research (1-8 Credits)

BIOL - Biology

BIOL600 Ethics in Scientific Research (2 Credits)

Issues of scientific integrity with emphasis on investigators in the laboratory sciences, including mentoring, scientific record keeping, authorship and peer review, ownership of data, use of animals and humans in research, and conflict of interest.

Restriction: Must have completed at least one year of graduate study.

Credit Only Granted for: BIOL600 or ZOOL600.

Formerly: ZOOL600.

BIOL608 Biology Seminar (1-2 Credits)

Repeatable to: 8 credits if content differs.

Formerly: ZOOL608.

BIOL609 Special Problems in Biology (1-6 Credits)

One seminar per week for each subject selected: A-Cell Biology; B-Developmental Biology; C-Estuarine and Marine Biology; D-Genetics; E-Parasitology; F-Physiology; G-Systematics and Evolutionary Biology; I-Behavior; J-General; K-Endocrinology; L-Ecology.

Repeatable to: 6 credits if content differs.

Formerly: ZOOL609.

BIOL613 Recombinant DNA (3 Credits)

An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.

Prerequisite: BSCI330 or BSCI230; and BSCI222. Or permission of instructor required.

Credit Only Granted for: BIOL613 or ZOOL652.

Formerly: ZOOL652.

BIOL615 Developmental Genetics (3 Credits)

Differential gene function and its regulation in developing systems. Genes and the analysis of developmental processes.

Prerequisite: Must have completed courses in molecular genetics and developmental or cell biology; or permission of instructor.

Credit Only Granted for: BIOL615 or ZOOL642.

Formerly: ZOOL642.

BIOL620 Cell Biology (3 Credits)

Offered with laboratory as BSCI 421. Molecular basis of cell structure and function in eukaryotes.

BIOL622 Membrane Transport Phenomena (3 Credits)

The fundamental phenomena related to solute movement in bulk solution and across interfaces. Examination of natural and artificial membrane transport systems, with emphasis placed on their mechanism of action.

Prerequisite: (MATH120; or must have completed MATH220); and (BSCI330 or BSCI230). Or permission of instructor.

Credit Only Granted for: BIOL622 or ZOOL622.

Formerly: ZOOL622.

BIOL625 Biological Ultrastructure (3 Credits)

The ultrastructure of cells and tissues, with emphasis on interpretation and correlation of ultrastructure and function.

Prerequisite: Must have completed a course in Cell Biology or Histology; or permission of instructor.

Credit Only Granted for: BIOL625 or ZOOL615.

Formerly: ZOOL615.

BIOL641 Comparative Physiology (4 Credits)

Cellular and biochemical processes used by animals to interact with both the external and cellular environment. Water balance, intermediary metabolism, nitrogen metabolism, anaerobic metabolism, thermal regulation, nerve and muscle physiology in cells from a broad variety of animal species are considered.

Prerequisite: One year of biology, one year of organic chemistry, and one semester of physiology.

Credit Only Granted for: BIOL641 or ZOOL621.

Formerly: ZOOL621.

BIOL646 Hearing (3 Credits)

Principles of hearing, covering the auditory periphery, the physiology and anatomy of the central auditory system and psychoacoustics.

Prerequisite: BSCI330 or BSCI230; or permission of instructor.

BIOL660 Theoretical Population and Community Ecology (3 Credits)

Application of simple dynamic systems and optimization models to understand the dynamics of populations and ecological communities; population growth, predator-prey interactions, competition, food webs, foraging theory, and evolution of life histories. Instruction and use of the program Mathematica.

Prerequisite: Must have completed one year of college calculus. And BSCI462; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: BIOL660 or ZOOL675.

Formerly: ZOOL675.

BIOL667 Mathematical Biology (4 Credits)

Mathematical methods of analyzing deterministic and stochastic biological processes from a variety of areas (including population and evolutionary biology, neurobiology, physiology, and morphogenesis). Qualitative aspects of dynamical systems which are usually given as difference or differential equations. The computer program Mathematica will be used to obtain the numerical solutions of these equations.

Credit Only Granted for: BIOL667 or ZOOL625.

Formerly: ZOOL625.

BIOL671 Molecular Evolution (3 Credits)

Basic foundations through advanced concepts in molecular evolution, including patterns and processes of DNA sequence variation, transposable element dynamics, gene duplication and loss, and genome organization. Relevant concepts from genetics, biochemistry, and phylogenetics also will be covered.

Credit Only Granted for: BIOL671 or ZOOL645.

Formerly: ZOOL645.

BIOL704 Cell Biology from a Biophysical Perspective (3 Credits)

An approach to cell biology by focusing on mechanisms and unifying paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think quantitatively and mechanistically.

Recommended: BSCI330, PHYS121, and PHYS122.

Cross-listed with: BIPH704.

Jointly offered with: BSCI404.

Credit Only Granted for: BSCI404, BIOL704, BIOL7080, or BIPH704.

Formerly: BIOL7080.

BIOL705 Statistics & Modeling for Biologists (3 Credits)

An overview of essential probability and statistics using R with a focus on biological problems. Topics include: parameter estimation (likelihood, Bayesian), confidence intervals and hypothesis testing, multiple testing, experimental design and power analysis, and resampling-based measures of uncertainty. Practical use of computers will be emphasized.

Restriction: Must be in the Biological Sciences Graduate program; or permission of Biology Department.

Credit Only Granted for: BIOL705 or BIOL709F.

Formerly: BIOL709F.

BIOL708 Advanced Topics in Biology (1-4 Credits)

Lectures, experimental courses and other special instructions in various zoological subjects.

Repeatable to: 8 credits if content differs.

Credit Only Granted for: BIOL708 or ZOOL708.

Formerly: ZOOL708.

BIOL709 Selected Advanced Topics in Biology (1-4 Credits)

Lectures, experimental courses and other special instructions in various biological subjects.

Repeatable to: 16 credits.

BIOL710 Plant Ecological Genetics (3 Credits)

Plant ecological genetics is focused on the processes responsible for evolution in plant populations. Covers the basic principle of population genetics, then quickly shifts towards understanding how allele frequencies can change in an ecological context. Emphasis is placed on the role of drift and selection in evolution, and particular attention is placed on plant mating system evolution.

Prerequisite: BSCI472 and BSCI222; or permission of instructor.

Credit Only Granted for: BIOL710 or PBI0745.

Formerly: PBI0745.

BIOL721 Mathematical Population Biology (3 Credits)

Foundational principles for modeling and analysis of real-life phenomena in population biology. Topics include design and analysis of models for general classes of unstructured (single species discrete-time and continuous-time, interacting populations etc.) and structured (spatially-structured, age-structured, sex-structured) population biology models in ecology and epidemiology, dynamics analysis of population biology models (asymptotic stability and bifurcation theory), numerical discretization of continuous-time models, statistical analysis (parameter estimation, uncertainty quantification).

Prerequisite: Calculus, differential equations, modeling, linear algebra, familiarity with mathematical software and programming languages (e.g., MATLAB, R, Python etc.); or permission of instructor.

Cross-listed with: AMSC721.

Credit Only Granted for: AMSC721 or BIOL721.

Additional Information: Open to advanced undergraduates by permission of instructor.

BIOL762 Physiological Plant Ecology (2 Credits)

Environmental effects on plant ecophysiology. Microclimatology, leaf energy balance, plant responses to temperature and radiation, physiological adaptations, water relations and plant gas exchange.

Prerequisite: BSCI460; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: BIOL762 or PBI0755.

Formerly: PBI0755.

BIOL765 Sociobiology (4 Credits)

Deals with the description and analysis of animal social organizations the adaptive nature of animal societies, the effects of early experience, and the role of communication in the integration of animal groups.

Prerequisite: Must have completed a course in behavior.

Restriction: Permission of instructor.

Credit Only Granted for: BIOL765 or ZOOL665.

Formerly: ZOOL665.

BIOL767 Behavioral Endocrinology (3 Credits)

The interactive effects of hormones and behavior. Emphasis on the reproductive and stress hormones as they affect the brain and behavior.

Prerequisite: BSCI342 or BSCI447.

Credit Only Granted for: BIOL767 or ZOOL627.

Formerly: ZOOL627.

BIOL799 Master's Thesis Research (1-6 Credits)

Formerly: ZOOL799.

BIOL898 Pre-Candidacy Research (1-8 Credits)**BIOL899 Doctoral Dissertation Research (1-8 Credits)**

Formerly: ZOOL899.

BIOM - Biometrics

BIOM405 Computer Applications in Biometrics (1 Credit)

An introduction to computer applications for data analysis. This is equivalent to the computer lab of 601 and is required for students that have taken BIOM301 and BIOM402 and wish to go directly into BIOM602.

BIOM601 Biostatistics I (4 Credits)

Estimation and hypothesis testing, t tests, one and two way analysis of variance, regression, analysis of frequency data. Lecture will emphasize uses and limitations of these methods in biology, while the laboratory will emphasize the use of statistical analysis software for the analysis of biological data.

Prerequisite: BIOM301 or STAT464; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: BIOM401 or BIOM601.

BIOM602 Biostatistics II (4 Credits)

The principles of experimental design and analysis of variance and covariance.

Prerequisite: BIOM601 or BIOM405.

BIOM603 Biostatistics III (4 Credits)

Applications and implementation of linear model analysis to biological data, including multivariate regression model, mixed model, generalized linear mixed model, nonlinear logistic and Poisson regression models, power calculation and survival analysis.

Prerequisite: Must have completed a graduate-level statistical class; or students who have taken courses with comparable content may contact the department.

BIOM621 Applied Multivariate Statistics (3 Credits)

Brief review of matrix algebra, means, covariance matrices, multivariate normal, multivariate confidence ellipses, MANOVA, Discriminant Methods, Principal Component Analysis, Factor Analysis, Multidimensional Scaling, Cluster Analyses, and other topics, depending on student interest.

Prerequisite: BIOM602.

Recommended: BIOM603.

BIOM688 Topics in Biometrics (1-3 Credits)

Advanced topics of current interest in various areas of biometrics. Credit assigned will depend on lecture and/or laboratory time scheduled and organization of the course.

Restriction: Permission of AGNR-Animal & Avian Sciences department.

Repeatable to: 6 credits if content differs.

BIOM698 Special Problems in Biometrics (1-3 Credits)

Individual study of a particular topic in biostatistics or biomathematics.

Restriction: Permission of AGNR-Animal & Avian Sciences department; and permission of instructor.

Repeatable to: 6 credits if content differs.

BIOM699 Seminar in Biometrics (1 Credit)

BIPH - Biophysics

BIPH697 Protein Engineering (3 Credits)

Covers the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.

Cross-listed with: CHBE697.

Jointly offered with: CHBE497.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE497, BIOE489R, BIPH697, ENCH648P or CHBE697.

Formerly: ENCH648P.

BIPH698 Biophysics Seminar (1 Credit)**BIPH699 Research in Biophysics (2 Credits)**

Supervised research in biophysics laboratories. Rotations through several laboratories prior to a choice of laboratory for a research assistantship.

Restriction: Must be in one of the following programs (Biophysics (Master's); Biophysics (Doctoral)).

Repeatable to: 8 credits if content differs.

BIPH703 Introduction to Nonequilibrium Statistical Physics (3 Credits)

Analysis and microscopic modeling of systems away from thermal equilibrium. Linear response theory, ergodicity, Brownian motion, Monte Carlo modeling, thermal ratchets, far-from-equilibrium fluctuation relations. Introduction to the theoretical tools of nonequilibrium phenomena and their application to problems in physics, chemistry and biology.

Prerequisite: PHYS603 or CHEM687; or permission of instructor.

Cross-listed with: CHEM703, CHPH703, PHYS703.

Credit Only Granted for: BIPH703, CHEM703, CHPH703, or PHYS703.

BIPH704 Cell Biology from a Biophysical Perspective (3 Credits)

An approach to cell biology by focusing on mechanisms and unifying paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think quantitatively and mechanistically.

Recommended: BSCI330, PHYS121, and PHYS122.

Cross-listed with: BIOL704.

Jointly offered with: BSCI404.

Credit Only Granted for: BSCI404, BIOL704, BIOL708O, or BIPH704.

Formerly: BIOL708O.

BIPH799 Master's Thesis Research (1-6 Credits)**BIPH898 Pre-Candidacy Research (1-8 Credits)****BIPH899 Doctoral Dissertation Research (1-8 Credits)**

BISI - Biological Sciences

BISI610 Introduction to Behavior, Evolution, Ecology, & Systematics (2 Credits)

This literature-based course serves as an intellectual orientation for new (i.e. first- and second-year) doctoral students in the Behavior, Evolution, Ecology, and Systematics (BEES) concentration area of the Biological Sciences (BISI) Graduate Program.

Restriction: Must be in the Behavior, Evolution, Ecology, and Systematics (BEES) concentration area of the Biological Sciences program; or permission of the instructor.

Credit Only Granted for: BEES608A, BIOL608D or BISI610.

Formerly: BEES608A.

BISI620 Bioinformatics and Genomics (2 Credits)

Provides an overview of some major topics and research areas bioinformatics and genomics, and includes material from basic foundations through advanced concepts.

Credit Only Granted for: CBMG688Y or BISI620.

Formerly: CBMG688Y.

BISI632 Genetics I: Gene Expression (2 Credits)

Molecular mechanisms of gene expression, with an emphasis on gene regulation in both prokaryotic and eukaryotic systems. Approximately 2/3 of the classes will be comprised of didactic lectures. The remaining portion of the course will consist of student-led experimental design sessions and a student-led proposal review panel.

Restriction: Must be in the Biological Sciences Graduate Program (BISI); or permission of instructor.

Credit Only Granted for: BISI632 or CBMG688F.

Formerly: CBMG688F.

BISI699 Special Problems in Biological Sciences (1-6 Credits)

Independent study with a specific faculty instructor from the Biological Sciences Program (BISI). Often involves original research in a laboratory or computational setting.

Restriction: Must be in one of the concentration areas of the Biological Sciences Graduate Program (BISI).

Repeatable to: 8 credits.

BISI701 Teaching & Professional Development in Biology (1 Credit)

Provides graduate students in the biological sciences with the foundational knowledge to become better teaching assistants and gives them an introduction into the skills and tools that they need to develop as professional scientists and educators.

Cross-listed with: ENTM701.

Credit Only Granted for: ENTM701, BISI688Z, CBMG688Z, or BIOL701.

Formerly: BISI688Z, CBMG688Z, BIOL701.

Additional Information: Priority enrollment will be given to students in the BISI Graduate Program.

BISI708 Advanced Topics in Biological Sciences (1-3 Credits)

Lectures, experimental courses, and other special instructions in various areas of biological sciences.

Repeatable to: 8 credits if content differs.

BISI712 Responsible Conduct of Research for Biologists (1 Credit)

An exploration of the ethical dimensions associated with the responsible conduct of scientific research focusing on providing students with practical insights into the existing norms and expectations of working scientists.

Credit Only Granted for: BISI712, BISI688B, or CBMG688B.

Formerly: BISI688B and CBMG688B.

BISI799 Master's Thesis Research (1-6 Credits)

Repeatable to: 99 credits.

BISI898 Pre-Candidacy Research (1-8 Credits)

Restriction: Must be in Biological Sciences (Doctoral) program.

BISI899 Doctoral Dissertation Research (1-8 Credits)

BMGT - Business and Management

BMGT400 Data Visualization and Web Analytics (3 Credits)

Data-driven decisions are increasingly embedded in business organizations. Business professionals must be able to explore and communicate data with understandable and powerful visualizations. This course provides an interactive introduction to data visualization and web analytics using industry standard data visualization tools, techniques, and frameworks to aid in business communication. Additionally, students will explore the use of data visualizations in understanding networks and web analytics.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT400 or BMGT408V.

Formerly: BMGT408V.

BMGT401 Big Data and AI using Cloud Computing (3 Credits)

Big data represents unprecedented opportunities for companies to generate insights and create wealth. Artificial intelligence (AI) has penetrated our daily routines, showing promise in many business areas such as finance, transportation, and healthcare. With cloud computing advances, big data and AI tools are more accessible and cost effective to average businesses; however, key challenges exist in initiating, implementing, and managing AI projects that analyze large, unstructured data. This course provides students with essential knowledge of key big data and AI technologies through hands-on, experiential learning using cloud computing platforms. Students will be able to help guide the successful design and implementation of complex data strategies.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT401 or BMGT408E.

Formerly: BMGT408E.

BMGT402 Database Systems (3 Credits)

The fundamentals of database management systems (DBMS), data models, query processing, and data warehouses, and their application in the development of business information systems will be covered. An important goal of this course is to understand the value of information resources and information management challenges within an organization.

Recommended: BMGT302.

Credit Only Granted for: INST327 or BMGT402.

BMGT403 Systems Analysis and Design (3 Credits)

Techniques and tools applicable to the analysis and design of computer-based information systems. System life cycle, requirements analysis, logical design of databases and performance evaluation. Emphasis on case studies. Project required that involves the design, analysis and implementation of an information system.

Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.

Recommended: BMGT302.

BMGT404 Essential Data Skills for Business Analytics (3 Credits)

Building on prior programming knowledge, this course introduces principles of data science to collect, analyze, and visualize business data. Students will explore application of business analytics in areas such as finance, accounting, marketing, and operations. This course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT404 or CMSC320.

Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major.

BMGT406 Developing Applications for the Web and Social Media (3 Credits)

The design and development of Web applications and the underlying platforms and standards for Web application development will be covered. It will examine the phenomenon of social media, social networking and crowdsourcing and understand their use within organizations.

Prerequisite: BMGT402 and BMGT302.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Credit Only Granted for: INST377 or BMGT406.

BMGT407 Information Systems Projects (3 Credits)

Senior capstone course for the information systems major. Collected knowledge from the IS courses and application to significant problems of size and complexity. State-of-the-art research ideas and current business and industrial practices in information systems.

Prerequisite: BMGT302, BMGT402 and BMGT403.

Restriction: Senior standing.

BMGT408 Emerging Topics in Information Systems (3 Credits)

Selected advanced topics covering emerging developments in the field of decision and information technologies.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BMGT410 Government Accounting (3 Credits)

An introduction to the theory and practice of accounting and financial reporting as applied in both federal and state/local governments, with a focus on generally accepted accounting principles applicable in each. Topics include analyzing transactions; recognizing transactions in the accounting cycles; and preparing and analyzing financial statements and the overall financial reports at both the federal and state/local government levels.

Prerequisite: BMGT221.

BMGT411 Ethics and Professionalism in Accounting (3 Credits)

Analysis and discussion of issues relating to ethics and professionalism in accounting.

Prerequisite: BMGT311.

Restriction: Must be in Accounting program.

BMGT417 Taxation of Corporations, Partnerships and Estates (3 Credits)

Federal taxation of corporations using the life-cycle approach-formation, operation, assessment, merger, reorganization and liquidation. Overviews of pass-through entities - partnerships and s-corporations -using the life-cycle approach, and the tax consequences of wealth transfers by individuals - gift and estate taxation. Both tax planning and compliance issues are addressed.

Prerequisite: BMGT221.

BMGT422 Auditing Theory and Practice (3 Credits)

A study of the independent accountant's attest function, generally accepted auditing standards, compliance and substantive tests and report forms and opinions.

Prerequisite: BMGT310; and must have completed or be concurrently enrolled in BMGT311.

BMGT423 Fraud Examination (3 Credits)

The focus of this course in fraud accounting is on fraud prevention, detection, and investigation as relevant to accountants and fraud examiners. Most organizations are affected to some degree by the occurrence of fraud, whether or not reported. It is estimated that organizations, WORLDWIDE, lost roughly 5% of their annual revenues to fraud. Despite advances in technology, the problem of fraud continues to escalate; and in particular, cybercrime is growing at an alarming rate. The course will serve as an introduction to all of the topics covered in the Certified Fraud Examiner (CFE) examination. While not purporting to be an exam preparation course, the diligent student could be CFE exam ready soon after taking this course. This course provides an introduction to the profession of fraud examination for accounting majors or for individuals seeking to satisfy the educational requirements for the CPA examination.

Prerequisite: BMGT220 or BMGT210.

BMGT424 Advanced Accounting (3 Credits)

Advanced accounting theory applied to specialized topics and current problems. Emphasis on consolidated statements and partnership accounting.

Prerequisite: BMGT311.

BMGT428 Special Topics in Accounting (3 Credits)

Selected advanced topics in Accounting.

Repeatable to: 9 credits if content differs.

BMGT430 Data Modeling in Business (3 Credits)

Explores the role of statistical models in business analytics to drive managerial decision-making and improve performance through the use of relevant data-motivated examples. Topics include regression models (both simple and multiple regression, as well as logistic regression for binary data), model validation, variable transformation, variable selection, discriminant analysis, and forecasting. These topics are modeled using state-of-the-art data analytics software.

Prerequisite: BMGT231 or BMGT230; or permission of BMGT-Robert H. Smith School of Business.

BMGT431 Data Analytics (3 Credits)

An introduction to the tools and techniques that are central to the analysis of abundant data that is being collected in many forms including web traffic, social network data, and reviews and comments on websites.

Prerequisite: BMGT430.

BMGT434 Analytics Consulting: Cases and Projects (3 Credits)

This course assumes that students have already been introduced to the concepts and techniques of operations research/business analytics (OR/BA). Published papers, short cases, and projects in OR/BA will be analyzed and discussed in a thoughtful way, taking into account the soft (people-related) issues and the hard (mathematical/optimization) issues.

Prerequisite: BMGT332.

BMGT435 Business Process Simulation (3 Credits)

Covers the methods for computer simulation modeling and analysis of complex systems. Students are assumed to have been introduced to the basic techniques and applications in the field of operations management and business analytics. Course emphasis is on modeling of real-world systems (for example, inventory or queueing systems), implementing simulations in special purpose software, and analyzing simulation results.

Prerequisite: BMGT332.

BMGT438 Special Topics in Operations Management (1-3 Credits)

Selected advanced topics in operations management.

Repeatable to: 6 credits if content differs.

BMGT440 Advanced Financial Management (3 Credits)

Analysis and discussion of cases and readings relating to financial decisions of the firm. The application of finance concepts to the solution of financial problems is emphasized.

Prerequisite: BMGT340.

BMGT441 Fixed Income (3 Credits)

Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.

Prerequisite: BMGT340.

BMGT442 Advanced Portfolio Management (3 Credits)

An in-depth coverage of statistical methods for choosing stocks is provided. Financial markets data is used in the class. Students are also expected to learn and use an industry-standard programming language during the class to implement the concepts of the class.

Prerequisite: BMGT343 and BMGT347.

BMGT443 Applied Equity Analysis and Portfolio Management (3 Credits)

Study and application of the concepts, methods, models, and empirical findings to the analysis, valuation and selection of securities, especially common stock.

Prerequisite: BMGT343.

BMGT444 Futures and Options Contracts (3 Credits)

The institutional features and economic rationale underlying markets in futures and options. Hedging, speculation, structure of futures prices, interest rate futures, efficiency in futures markets and stock and commodity options.

Prerequisite: BMGT343.

Credit Only Granted for: BMGT444 or MATH424.

BMGT445 Banking and Financial Institutions (3 Credits)

Analysis and discussion of cases and readings in commercial bank management. The loan function is emphasized; also the management of liquidity reserves, investments for income and source of funds. Bank objectives, functions, policies, organization, structure, services and regulation are considered.

Prerequisite: BMGT340.

Recommended: ECON330 or BMGT341.

BMGT446 International Finance (3 Credits)

Financial management from the perspective of the multinational corporation. Topics covered include the organization and functions of foreign exchange and international capital markets, international capital budgeting, financing foreign trade and designing a global financing strategy. Emphasis of the course is on how to manage exchange and political risks while maximizing benefits from global opportunity sets faced by the firm.

Prerequisite: BMGT340.

BMGT448 Special Topics in Finance (1-3 Credits)

Selected advanced topics in finance.

Repeatable to: 9 credits if content differs.

BMGT449 Investment Fund Management: Lemma Senbet Fund (3 Credits)

The Lemma Senbet Fund is a year-long, advanced finance course available to undergraduate finance majors in their senior year. Ten to twelve students will be selected in the spring of their junior year to participate on the fund, two as portfolio managers and eight to ten as equity analysts. The course provides students with the opportunity to apply what they have learned in finance classes to actual investment decisions, through researching real companies and managing a portfolio of real money.

Prerequisite: BMGT343.

Corequisite: BMGT443.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 6 credits if content differs.

BMGT450 Integrated Marketing Communications (3 Credits)

In-depth study of coordinated marketing activities including advertising, sales promotion, Internet marketing, direct marketing and personal selling. Emphasizes strategic planning to effectively use these promotional tools to communicate with customers and meet marketing goals. Blends theory and current practice to provide managerial orientation.

Prerequisite: BMGT350.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT453 Retail Management (3 Credits)

Planning and implementing retail marketing strategy. Application to store and non-store (catalog, internet) retailing. Evaluation of how environmental trends in the consumer market, competition, the economy and technology affect retail strategy in the U.S. and global market.

Prerequisite: BMGT220 and BMGT350.

Credit Only Granted for: BMGT353 or BMGT453.

Formerly: BMGT353.

BMGT454 Global Marketing (3 Credits)

Marketing functions from the global executive's viewpoint, including coverage of global marketing policies relating to product adaptation, data collection and analysis, channels of distribution, pricing, communications and cost analysis. Consideration is given to the cultural, legal, financial and organizational aspects of global marketing.

Prerequisite: BMGT350.

BMGT455 Sales Management (3 Credits)

The roles of the sales executive as a planner, manager of resources and marketing functions and recruiter, trainer, motivator and leader of field sales personnel. Techniques and sequence of problem analysis for selling and sales management decisions and to the practical framework in which these decisions take place. Teaching vehicles feature strong classroom interactions, cases, journal articles, research findings, guest sales managers, debates, and modern company practices.

Prerequisite: BMGT350.

BMGT456 Customer-Centric Innovation (3 Credits)

Addresses the management of new products and services with a focus on the innovation process, specifically the development and launching of new products or services: Opportunity Identification, Concept Generation, Design, Testing and Launch.

Prerequisite: BMGT350.

Credit Only Granted for: BMGT352, BMGT382 or BMGT456.

Formerly: BMGT352.

BMGT457 Marketing Policies and Strategies (3 Credits)

This capstone course ties together various marketing concepts using the fundamentals of strategic market planning as the framework. Application of these principles is accomplished by analyzing and discussing cases and by playing a marketing strategy computer simulation game. Analysis of current business articles to understand the link between theory and real-world problem solving.

Prerequisite: BMGT350.

BMGT458 Special Topics in Marketing (1-3 Credits)

Selected advanced topics in marketing.

Repeatable to: 6 credits if content differs.

BMGT461 Entrepreneurship (3 Credits)

Process of creating new ventures, including evaluating the entrepreneurial team, the opportunity and the financing requirements. Skills, concepts, mental attitudes and knowledge relevant for starting a new business.

Restriction: Must not have completed BMGT361.

Credit Only Granted for: BMGT261, BMGT361, BMGT461, ENES460, SMLP470 or HLMN470.

BMGT463 Cross-cultural Challenges in Business (3 Credits)

Examines in depth the nature of international cultural value-differences and their behavioral-related effects in the workplace. Topics include decision-making and leadership styles and reactions to various work assignments and reward structures.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT465 Business Plan For The New Venture (3 Credits)

Each student focuses on the production of a business plan that will be accepted for an annual business plan competition. Business plans of sufficient quality may be submitted to attract financing. Topics include a deep review of business construction and its derivative short forms.

Prerequisite: BMGT461 or BMGT361.

BMGT466 Global Business Strategy (3 Credits)

Focuses on the strategic challenges that directly result from and are associated with the globalization of industries and companies. Topics include drivers of industry globalization, difference between global and multi-domestic industry, global expansion strategies, sources of competitive advantage in a global context, and coordination of a company across a global network.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT467 Strategic Innovation and Entrepreneurship (3 Credits)

Provides an understanding of how innovation affects the competitive dynamics of markets, how firms can strategically manage innovation, and how firms can create and implement strategies to maximize their likelihood of success.

Credit Only Granted for: BMGT467, ENES463 or HLMN472.

BMGT468 Special Topics in Management and Organization (1-3 Credits)

Selected advanced topics in management and organization.

Repeatable to: 6 credits if content differs.

BMGT469 Management and Organization Short-term Study Abroad (3 Credits)

Selected short-term study abroad topics in management and organization.

Repeatable to: 9 credits if content differs.

BMGT472 Purchasing and Inbound Logistics (3 Credits)

Analysis of the resupply activities of logistics management, including purchasing policies, transportation planning, and inventory control. Attention is directed toward total cost minimization and the establishment of a sustainable competitive advantage based on procurement.

Prerequisite: BMGT372.

BMGT475 Supply Chain Strategy and Network Design (3 Credits)

Analysis of the strategic aspects of supply chain management. Emphasis on the creation of end-user value through supply chain cost reductions, service improvements or both. Attention is directed toward the enabling role of technology in support of strategy evaluation and implementation.

Prerequisite: BMGT372.

BMGT476 Technology Applications in Supply Chain Management (3 Credits)

An understanding of the role of technology in managing the supply chain. Provides students with hands-on experience in advanced software systems that build on top of enterprise resource planning systems. Major emphasis is placed on demonstrating that these systems result in supply chain cost reductions and service improvements.

Prerequisite: BMGT372.

BMGT477 International Supply Chain Management (3 Credits)

The study of the importance of the supply chain management within a global context. Topics covered include: the structure, service, pricing and competitive relationships among international carriers and transport intermediaries as well as documentation, location decisions, international sourcing/distribution and management of inventory throughout the international supply chain.

BMGT478 Special Topics in Supply Chain Management (3 Credits)

Selected advanced topics in supply chain management.

Repeatable to: 9 credits if content differs.

Additional Information: Course prerequisites will vary depending on the topic. A maximum of 3 credits of BMGT478 course work can fulfill Supply Chain Management major requirements.

BMGT483 Sports Management Program Capstone (3 Credits)

Through interdisciplinary collaboration, students will work in teams to apply their knowledge and skills in sports management to a real-world case. Student teams will be charged to develop innovative and creative solutions to sports management challenges while considering the ethical implications of their proposals.

Prerequisite: BMGT383.

BMGT484 Digital Marketing (3 Credits)

Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services through digital means, including the web, social media, and mobile apps. Both the development and analysis of digital media for marketing will be discussed.

Prerequisite: BMGT350.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT485 Project Management (3 Credits)

Modern project management techniques that are used by modern practicing professionals will be covered. Particular attention is given to the management of technology based systems and projects in a business enterprise. The topics covered include: defining project scope, alignment of projects with enterprise strategy, managing project cost, time and risks using tools such as CPM/PERT, and measuring project performance.

Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST4080 or INST453.

BMGT487 Six Sigma Innovation (3 Credits)

Enhances the overall understanding of Six Sigma Strategy, Tools and Methods to positively influence the performance of a business process, a product or service. Highlights the application of Define-Measure-Analyze-Improve-Control (DMAIC), Design For Six Sigma (DFSS), and the pursuit of Critical to Quality criteria (CTQ's) in a collaborative perspective, one that recognizes a balance between efficiency, and effectiveness and between statistical analysis and statistical thinking.

Prerequisite: STAT400, BMGT231, BMGT230, or ENME392.

BMGT488 Special Topics in Logistics, Business, and Public Policy (1-3 Credits)

Selected advanced topics in logistics, business and public policy.

Repeatable to: 6 credits if content differs.

BMGT490 QUEST Capstone Professional Practicum (4 Credits)

The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.

Prerequisite: ENES390 or BMGT390.

Cross-listed with: ENES490.

Credit Only Granted for: BMGT490 or ENES490.

BMGT491 Scoping Experiential Learning Projects (3 Credits)

QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.

Prerequisite: BMGT190 or ENES190.

Cross-listed with: ENES491.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT491 or ENES491.

BMGT493 Honors Study (3 Credits)

First semester of the senior year. The course is designed for honors students who have elected to conduct intensive study (independent or group). The student will work under the direct guidance of a faculty advisor and the Assistant Dean of Undergraduate Studies. They shall determine that the area of study is of a scope and intensity deserving of a candidate's attention. Formal written and/or oral reports on the study may be required by the faculty advisor.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT494 Honors Study (3 Credits)

Second semester of the senior year. The student shall continue and complete the research initiated in BMGT 493, additional reports may be required at the discretion of the faculty advisor and Assistant Dean of Undergraduate Studies.

Prerequisite: BMGT493.

Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in the Smith School Honors Fellows program.

BMGT495 Strategic Management (3 Credits)

A case-based course where students learn to play the role of the "strategic manager" who defines the scope of its business operations and, within the chosen scope, how the firm will compete against rivals. This course focuses on how a firm can both formulate effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits.

BMGT496 Business Ethics and Society (3 Credits)

A study of the standards of business conduct, morals and values as well as the role of business in society with consideration of the sometimes conflicting interests of and claims on the firm and its objectives. Emphasizes a strategic approach by business to the management of its external environment.

Prerequisite: 1 course in BMGT; or permission of BMGT-Robert H. Smith School of Business.

BMGT498 Special Topics in Business and Management (3 Credits)

Special topics in business and management designed to meet the changing needs and interests of students and faculty.

Repeatable to: 6 credits if content differs.

BMGT499 Advanced Business Topics (1 Credit)

Course will delve deeply into a specific business topic. Based on experience and knowledge from undergraduate core business classes, students will examine a particular subject from various angles.

Repeatable to: 3 credits if content differs.

BMGT600 Leadership and Teamwork (2 Credits)

Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BMGT600, BUSI662 or BUSM600.

BMGT602 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BMGT604 Managerial Economics and Public Policy (2 Credits)

Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI681 or BMGT604.

BMGT606 Data Driven Decision Making (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI630 or BMGT606.

BMGT610 Financial Management (2 Credits)

Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI640, BUFN610, or BMGT610.

BMGT612 Marketing Management (2 Credits)

Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI650 or BMGT612.

BMGT614 Strategic Management (2 Credits)

Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintains the proper scale and scope to compete effectively over time.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI690 or BMGT614.

BMGT616 Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI611, BUSI616, or BMGT616.

BMGT620 Business Communication (2 Credits)

Develop the ability to communicate with and about data.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI758A or BMGT620.

BMGT624 Operations Management (2 Credits)

Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI634 or BMGT624.

BMGT630 Data Models and Decisions (3 Credits)

To develop probabilistic and statistical concepts, methods and models through examples motivated by real-life data from business and to stress the role that statistics plays in the managerial decision making process.

BMGT640 Financial Management (3 Credits)

Analysis of major corporate financial decisions using a market-oriented framework. Introduction to value techniques, capital budgeting principles and problems, asset valuation, operation and efficiency of financial markets, financing decisions, dividend policy and international finance. Additional topics, such as mergers and acquisitions may be covered.

BMGT700 Competitive and Collaborative Negotiation (2 Credits)

Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0714 or BMGT700.

BMGT708 Special Topics in Cybersecurity (3 Credits)

Special Topics in Cybersecurity

Repeatable to: 9 credits if content differs.

BMGT710 Global Strategy (2 Credits)

Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI674, BUM0754, or BMGT710.

BMGT720 Innovation & Product Development (2 Credits)

This course focuses on the development of innovations - new products or new services - from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer-centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758P or BMGT720.

BMGT730 Valuation in Corporate Finance (2 Credits)

An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, discounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.

Prerequisite: BMGT600.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

BMGT740 Global Supply Chain Management (2 Credits)

Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI672 or BMGT740.

BMGT758 Special Topics in Business and Management (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BMGT788 Mastery Topic for EMBA (2 Credits)

Selected mastery topics which will cover various aspects of executive education.

Restriction: Must be in Executive MBA program.

Repeatable to: 8 credits if content differs.

BMGT789 Action Learning Project (3-4 Credits)

Significant consulting project, team designed by individual EMBA student participants and faculty.

Restriction: Must be in Executive MBA program.

Repeatable to: 10 credits if content differs.

BMGT808 Special Topics in Information Systems (1-9 Credits)

Special topics specific to the Information Systems doctoral field of study.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 18 credits if content differs.

BMGT811 Seminar in Financial Accounting (3 Credits)

Seminar in selected classic and current theoretical and empirical research in financial accounting.

BMGT818 Special Topics in Accounting and Information Assurance (1-9 Credits)

Special topics specific to the Accounting and Information Assurance doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT821 Seminar in Management Accounting (3 Credits)

Design and use of accounting information systems for managerial planning and controllership.

BMGT828 Independent Study in Business and Management (1-9 Credits)**BMGT830 Operations Research: Linear Programming (3 Credits)**

Concepts and applications of linear programming models, theoretical development of the simplex algorithm, and primal-dual problems and theory.

Prerequisite: MATH240; or students who have taken courses with comparable content may contact the department; or permission of BMGT-Robert H. Smith School of Business.

BMGT831 Operations Research: Extension of Linear Programming and Network Analysis (3 Credits)

Concepts and applications of network and graph theory in linear and combinatorial models with emphasis on computational algorithms.

Prerequisite: BMGT830; or students who have taken courses with comparable content may contact the department; or permission of BMGT-Robert H. Smith School of Business.

BMGT833 Operations Research: Integer Programming (3 Credits)

Theory, applications, and computational methods of integer optimization. Zero-one implicit enumeration, branch and bound methods, and cutting plane methods.

Prerequisite: BMGT830; and (MATH241; or students who have taken courses with comparable content may contact the department). Or permission of BMGT-Robert H. Smith School of Business.

BMGT834 Operations Research: Probabilistic Models (3 Credits)

Theoretical foundations for the construction, optimization, and applications of probabilistic models. Queueing theory, inventory theory, Markov processes, renewal theory, and stochastic linear programming.

Prerequisite: MATH241; and (STAT400; or students who have taken courses with comparable content may contact the department). Or permission of BMGT-Robert H. Smith School of Business.

BMGT835 Simulation of Discrete-Event Systems (3 Credits)

Simulation modeling and analysis of stochastic discrete-event systems such as manufacturing systems, inventory control systems, and computer/ communications networks.

Prerequisite: Knowledge of Fortran, Basic, C, or Pascal.

BMGT836 Applied Regression Models (3 Credits)

An introduction to regression models used in business research. Topics include: simple and multiple regression, diagnostics for checking model adequacy, transformations, polynomial models, indicator variables, multicollinearity, variable selection, times series data, generalized linear models, implementation using statistical software, and application to research questions.

Recommended: It is assumed that the student has taken a first course in statistics and is familiar with the content of such course including interval estimation and hypothesis testing.

BMGT837 Applied Multivariate Analysis (3 Credits)

Multivariate statistical methods and their use in empirical research. Topics include: summarization and visualization of multivariate data, the multivariate normal distribution, tests on mean vectors, multivariate paired comparisons, multivariate analysis of variance, repeated measures designs, test on covariance matrices, discriminant analysis and classification, canonical correlation, principal components, factor analysis and cluster analysis. Maximum likelihood estimation and the likelihood ratio method of test construction.

Recommended: BMGT836 or equivalent course. BMGT837 assumes working knowledge of matrices and elementary linear algebra and a sound understanding of univariate statistics, including random variables, statistical inference, ANOVA, and ordinary least squares regression.

BMGT838 Special Topics in Operations Management/Management Science (1-9 Credits)

Special topics specific to the Operations Management/Management Science doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT840 Seminar in Financial Theory (3 Credits)

Seminar in selected classic and current theoretical and empirical research in the foundations of finance.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT841 Seminar in Corporate Finance (3 Credits)

Seminar in selected classic and current theoretical and empirical research in corporate finance.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT843 Seminar in Portfolio Theory (3 Credits)

Seminar in selected classic and current theoretical and empirical research in portfolio theory.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT848 Special Topics in Finance (1-9 Credits)

Special topics specific to the Finance doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT858 Special Topics in Marketing (1-9 Credits)

Special topics specific to the Marketing doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT868 Special Topics in Organizational Behavior/Human Resource Management (1-9 Credits)

Special topics specific to the Organizational Behavior/Human Resource Management doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT878 Special Topics in Strategic Management and Entrepreneurship (1-9 Credits)

Special topics specific to the Strategic Management and Entrepreneurship doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT887 Bayesian Inference and Decision Theory (3 Credits)

Bayesian Methodologies in statistical inference and decision theory.

Includes discussion of subjective probability and coherence, elicitation of distributions conjugate distributions, estimation, testing, preposterior analysis and regression analysis. Applications are drawn from the functional business areas.

BMGT888 Special Topics in Supply Chain Management (1-9 Credits)

Special topics specific to the Supply Chain Management doctoral field of study.

Repeatable to: 18 credits if content differs.

BMGT898 Pre-Candidacy Research (1-8 Credits)**BMGT899 Doctoral Dissertation Research (1-8 Credits)**

BMSO - Online Business MS Programs

BMSO600 Data, Models and Decisions (3 Credits)

The field of data analytics is a very vibrant and broad field. The amount of data available and computing power have exploded in recent years. There is an increasing demand for business analysts who can select and apply the appropriate methods and interpret the results within the context of the problem. The goal of this course is to learn methods for exploring data and building models with the purpose of supporting data-driven decision making. The content of the course can be grouped as follows: Data Exploration, Probability, Confidence Interval Estimation, Hypothesis Testing and Regression Analysis. The focus will be on exploring realistic business scenarios, analyzing datasets using the appropriate analytical techniques, interpreting the analytic output within the context of the business scenario and translating the statistical results into actionable insights.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

BMSO601 Database Management Systems (3 Credits)

The fundamentals of managing data and information within an organization, including enterprise level platforms and tools for data driven analytics. Includes processes for acquiring and cleaning data, storing data, making it available for analytics, visualizing output, and archiving the data for long term use. Involves computational thinking, covers significant theoretical material on data models and queries, and teaches several different analytics and programming tools.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

BMSO602 Decision Analytics (3 Credits)

Difficult decisions require spending scarce resources. A 'resource' is any asset used to leverage business objectives, such as time and money. Tradeoffs are involved in allocating resources to one objective as opposed to another. This course develops a quantitative framework for studying resource allocation problems that arise in many industries and areas such as transportation, advertising, finance, and healthcare. The focus will be on translating verbal descriptions into quantitative optimization models, whereby standard tools (such as Microsoft Excel) can be applied to obtain solutions. The course also covers the role of uncertainty and risk in the decision-making process by using Monte-Carlo simulation models.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

BMSO603 Data Mining and Predictive Analytics (3 Credits)

In the business press, on TV, and in board rooms, 'machine learning,' 'AI,' 'big data' and 'data analytics' are now hot topics. Vast quantities of data are being generated these days, including new types of data such as web traffic, social network data, and reviews and comments on websites. This data is a valuable resource that, when used correctly, can create a competitive edge for companies. Advances in computing hardware and algorithms have significantly improved the quality of predictions and effectiveness of business applications based on them. Expertise in working with data, and a sound knowledge of data mining/machine learning methods, is a much sought after skill. The course provides an introduction to the key tools and techniques of data mining/machine learning, including classification, prediction, cluster analysis, association rules, and text mining. The methods covered are Linear Regression, Logistic Regression, K-nearest neighbors, Naive Bayes, Classification and Regression Trees, Ensemble methods, Neural Networks, K-Means and Hierarchical Clustering, and Association Rules. The focus throughout will be on business applications. Examples from Marketing, Finance, Healthcare, and Operations will be used to illustrate the breadth of applications.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

BMSO758 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BMSO778 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in an online Business Master of Science program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BSCI - Biological Sciences Program

BSCI400 Animal Diversity and Evolution (3 Credits)

Focuses on deep-level diversity of animals and their evolutionary relationships, unique and repeated transitions in the course of animal evolution, and the evolutionary mechanisms that have shaped and continue to shape animal diversity. The course takes an integrative organismal approach to understanding animal evolution, considering morphology, development, physiology, life history, and ecology. It also explores how patterns of animal diversity have changed through time and the processes affecting animal diversity in our changing world.

Prerequisite: Minimum grade of C- in BSCI160 and BSCI207.

BSCI401 Animal Communication (3 Credits)

Examining the mechanisms by which animals produce and receive signals in each sensory modality; and quantifying the type and amount of information conveyed in signals and how animals attend to such information.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And must have completed one semester of physics; and must have completed one semester of organic chemistry.

Recommended: A course in animal behavior or biopsychology.

Credit Only Granted for: BSCI401, BSCI338W or BIOL708W.

Formerly: BSCI338W.

BSCI403 Biology of Vision (3 Credits)

An upper level undergraduate course on the physical, molecular, and neural basis of vision.

Prerequisite: Minimum grade of C- in BSCI207, NEUR306, or BSCI353.

Recommended: BSCI222.

BSCI404 Cell Biology from a Biophysical Perspective (3 Credits)

An approach to cell biology by focusing on mechanisms and unifying physical paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think mechanistically and quantitatively.

Prerequisite: BSCI330.

Recommended: PHYS121 and PHYS122; or completion of PHYS131 and PHYS132 recommended. Jointly offered with BIOL704, BIPH704.

Credit Only Granted for: BSCI338O, BSCI404, BIOL704, BIOL708O, or BIPH704.

Formerly: BSCI338O.

BSCI405 Population and Evolutionary Genetics (3 Credits)

Genetic variation within a population provides the basis for future evolution as well as a record of past evolution. The genomics revolution provides data on this variation that, together with mathematical models, allow us to read this record to reconstruct evolutionary trajectories. Examples will focus on hominin and pathogen evolution. In the lab, students will use models to explore how genetic variation (allele frequencies) changes over time and space.

Prerequisite: Minimum grade of C- in BSCI222; and 1 course with a minimum grade of C- from (MATH131, MATH136, MATH141). Jointly offered with BIOL709.

Credit Only Granted for: BSCI405, BSCI339J, or BIOL709C.

Formerly: BSCI339J.

BSCI406 Membranes and Biological Interfaces (3 Credits)

An interdisciplinary approach to membrane biology, starting with the physical chemistry of interfaces and model systems and continuing into transport, excitability, and signaling. The course is oriented toward students with broad backgrounds in biology and biophysics. Success in the course will come from a background that prepares students to think mechanistically and quantitatively rather than having substantial factual biological knowledge.

Prerequisite: Minimum grade of C- in BSCI330.

Recommended: PHYS122; or PHYS132; or (PHYS260 and PHYS261).

Credit Only Granted for: BSCI339R, BSCI406, or BIOL709R.

Formerly: BSCI339R.

BSCI407 Behavioral Genetics (3 Credits)

Behavior represents an organism's most dynamic phenotype and allows an animal to respond immediately to both internal and external cues.

We will explore the genetic and epigenetic mechanisms that underlie behavioral variation and the associated neurological, hormonal, and developmental pathways. We will examine modern approaches used to study behavioral genetics in model and non-model systems, and in humans. Using case studies, we will explore a range of complex phenotypes including those related to mating, parental care, aggression, circadian rhythm, locomotion, learning, anxiety, and addiction.

Prerequisite: Minimum grade of C- in BSCI222.

BSCI410 Molecular Genetics (3 Credits)

An advanced genetics course emphasizing the molecular basis of gene structure and function in the context of modern approaches to the genetics of humans and model organisms.

Prerequisite: BSCI222. And must have completed CHEM233; or (CHEM231 and CHEM232).

BSCI411 Bioinformatics and Integrated Genomics (4 Credits)

Computational methods for the study of biological data. Pairwise and multiple sequence alignment, genome assembly and annotation, RNAseq analysis, and structural bioinformatics. Introduction to UNIX, Python, and R in the context of biological sequence data. Previous computational experience is not necessary.

Prerequisite: Minimum grade of C- in BSCI222.

Recommended: BSCI410.

Credit Only Granted for: BSCI380 or BSCI411.

Formerly: BSCI380.

BSCI412 Microbial Genetics (4 Credits)

A laboratory/lecture based course that covers the fundamentals of mutation, mobile genetic elements and transmission genetics of microbial organisms using both classical and molecular approaches.

Prerequisite: BSCI222; and (BSCI223 or BSCI283).

BSCI413 Recombinant DNA (3 Credits)

An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.

Prerequisite: BSCI330, BSCI223, or BSCI230; and BSCI222.

Formerly: ZOOL452.

BSCI414 Recombinant DNA Laboratory (3 Credits)

An advanced course offering hands-on experience in performing recombinant DNA experiments. All current molecular biology techniques used for cloning prokaryotic genes, analyzing the gene products, and modifying the genes will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.

Prerequisite: BSCI222.

BSCI415 Molecular Genetics Laboratory (3 Credits)

Problem solving laboratory organized around extended projects that employ different approaches toward linking gene and function.

Prerequisite: Must have completed or be concurrently enrolled in BSCI410.

Restriction: Junior standing or higher.

Credit Only Granted for: BSCI348G or BSCI415.

Formerly: BSCI348G.

BSCI416 Human Genetics (3 Credits)

Approaches to human genetics and applications to biology and medicine focusing on specific human genetic topics using primary research papers as the main resource.

Prerequisite: Minimum grade of C- in BSCI410.

Recommended: BSCI330.

BSCI417 Microbial Pathogenesis (3 Credits)

Current research in microbial pathogenesis and the molecular and cellular basis of bacterial disease. Comprehensive overview of the molecular basis of pathogenesis with a focus on model microbial systems to illustrate mechanisms of disease pathogenesis. Topics covered: how microorganisms attach to and enter cells; how host cells are damaged by microbial products; how the host responds to invasion; and host-pathogen evolution.

Prerequisite: BSCI222; and (BSCI223 or BSCI283).

Restriction: Junior standing or higher.

BSCI420 Cell Biology Lectures (3 Credits)

Molecular and biochemical bases of cellular organization and function in eukaryotes.

Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.

Credit Only Granted for: BSCI420 or BSCI421.

BSCI422 Principles of Immunology (3 Credits)

The immune system in health and disease. Presentation and analysis of the cellular and molecular processes that comprise the immune system.

Prerequisite: BSCI222.

Recommended: BSCI330; and (BSCI223 or BSCI283).

Restriction: Junior standing or higher.

BSCI423 Immunology Laboratory (2 Credits)

Current techniques for assessment of immune status and evaluation of the immune response, including monoclonal antibody production, Western blotting, cytokine assays, ELISA and flow cytometry.

Prerequisite: BSCI222.

Corequisite: BSCI422.

Recommended: BSCI223 or BSCI283.

Restriction: Junior standing or higher.

BSCI424 Pathogenic Microbiology (4 Credits)

The role of bacteria and fungi in the diseases of humans with emphasis upon the differentiation and culture of microorganisms, types of disease, modes of disease transmission, prophylactic, therapeutic, and epidemiological aspects.

Prerequisite: BSCI223 or BSCI283.

BSCI425 Advanced Cell Biology Lab Practices (2 Credits)

Experimental techniques used to study the molecular, structural, and spatial organization of plant and animal cells. Using a combination of in vitro assays aimed at analyzing macromolecular and subcellular components and in vivo analyses designed to reveal the inner architecture of a typical eukaryotic cell, students will have an opportunity to: improve some of the basic technical and conceptual skills they acquired in an introductory cell biology course; develop a more sophisticated understanding of the nature of experimental cell manipulation; and tackle the ongoing challenge of articulating their findings in both written and oral communication.

Prerequisite: Must have completed BSCI330, BSCI222, CHEM231, and CHEM232; and must have completed or be concurrently enrolled in BSCI420.

Credit Only Granted for: BSCI421, BSCI425, or BSCI348C.

BSCI430 Developmental Biology (3 Credits)

Structural, functional and regulatory events and mechanisms that operate during development to produce an integrated, multicellular organism composed of a multitude of differentiated cell types.

Prerequisite: BSCI222 and BSCI330.

BSCI431 The Origin and Evolution of Nervous Systems (3 Credits)

Explore how brains change through evolution along the animal tree of life. By comparing the nervous system structure and development across the animal kingdom, this course aims to reveal common designs and mechanisms that generate behavior, and to inform our understanding of how biology builds minds. Topics include the origins of neurons, the universal molecular patterning of brain development across invertebrates and vertebrates, the evolution of neurotransmission, comparative mechanisms of learning and memory, and what in our brain makes us human.

Prerequisite: Minimum grade of C- in NEUR200 or BSCI207.

BSCI432 Systems View of Cell Biology (3 Credits)

An integrated understanding of cell biology based upon reading of literature, discussion of new findings, and quantitative simulations. Exploration of ten topics including Heredity, Curing Diseases, and Synthesizing Life.

Prerequisite: BSCI330.

BSCI433 Biology of Cancer (3 Credits)

Causes and consequences of neoplastic transformations at the biochemical and cellular levels.

Prerequisite: BSCI222 and BSCI330; or permission of CMNS-Biological Sciences UG Program.

BSCI436 RNA Biology and Therapeutics (3 Credits)

The prediction of RNA structure from its sequence, and how the many types of cellular and viral RNAs function in and regulate cellular processes. Use of RNA-based drugs for controlling disease through RNA targeting, editing and vaccines.

Prerequisite: BSCI330.

Recommended: BSCI410.

Restriction: Must have junior standing or higher.

BSCI437 General Virology (3 Credits)

Discussion of the physical and chemical nature of viruses, virus cultivation and assay methods, virus replication, viral diseases with emphasis on the oncogenic viruses, viral genetics, and characteristics of the major virus groups.

Prerequisite: BSCI222; or permission of CMNS-Biological Sciences UG Program.

Restriction: Junior standing or higher.

BSCI439 Undergraduate Advanced Selected Topics in Biology (1-4 Credits)

Lectures, seminars, mini-courses, and other special instruction in various biological subjects.

Repeatable to: 9 credits if content differs.

BSCI440 Mammalian Physiology (4 Credits)

A study of the cardiovascular, hemopoietic, gastrointestinal, renal and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals. Course does not count as an upper level lab for BIOL majors (see BSCI441).

Prerequisite: BSCI330; and (CHEM231 and CHEM232; or must have completed CHEM233). Or permission of CMNS-Biological Sciences UG Program.

BSCI441 Mammalian Physiology Laboratory (2 Credits)

Laboratory exercises in experimental mammalian physiology.

Prerequisite: Must have completed or be concurrently enrolled in BSCI440.

BSCI442 Plant Physiology (4 Credits)

An in-depth examination of the unique molecular and physiological principles necessary to understand how plants grow and respond to the environment at the cellular and organismal levels. Plants evolved unique metabolism and survival strategies, so students should be prepared to enter a world that may be new to them.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in PLSC201; and minimum grade of C- in CHEM231 and CHEM232; or minimum grade of C- in CHEM237.

Cross-listed with: PLSC400.

Credit Only Granted for: BSCI442 or PLSC400.

BSCI443 Microbial Physiology (3 Credits)

Microbial cellular and population growth. Fermentation metabolism, physiology of anaerobiosis, and energy conservation and transformation in bacterial membranes. Efficiency of energy utilization for growth. Membrane structure and transport. Bacterial motility and chemotaxis. Regulation of bacterial chromosome replication, RNA and protein synthesis. Control of metabolic pathways. Bacterial stress responses. Antimicrobials.

Prerequisite: Minimum grade of C- in BSCI223 or BSCI283; and minimum grade of C- in BCHM461 or BCHM462.

BSCI446 Advanced Systems Neuroscience (3 Credits)

Neural development, neurobiology of sensation and perception, motor and integrative systems organization in the central nervous system. Neural systems dysfunction as related to medical pathologies and discussion of contemporary neuroscience methods used to understand brain function.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

BSCI447 General Endocrinology (3 Credits)

Functions and dysfunctions of the endocrine system with special reference to mammals.

Prerequisite: BSCI330, CHEM241, and CHEM242.

BSCI450 Mammalian Systems Physiology (3 Credits)

A study of the cardiovascular, hemopoietic, gastrointestinal, renal, and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals.

Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in CHEM233 or both CHEM231 and CHEM232.

Credit Only Granted for: BIOL708M, BSCI338L, BSCI440, or BSCI450.

BSCI451 Mammalian Systems Physiology Laboratory (2 Credits)

Laboratory exercises in experimental mammalian physiology.

Prerequisite: Must have completed with a minimum of C- or be concurrently enrolled in either BSCI440 or BSCI450.

Credit Only Granted for: BSCI441 or BSCI451.

Formerly: BSCI441.

BSCI452 Diseases of the Nervous System (3 Credits)

An advanced course covering the neuroanatomy, function, and organization of the nervous system and its implication for pathology and disease.

Prerequisite: Minimum grade of C- in BSCI330; and must have completed with a minimum of C- or be concurrently enrolled in either BSCI353 or NEUR306.

Credit Only Granted for: BSCI452, BIOL708E, or NACS728N.

BSCI453 Biology of Hearing (3 Credits)

Acoustic and neural basis of hearing. The auditory system will be described with a comparative approach across species.

Prerequisite: Minimum grade of C- in BSCI207 or NEUR200.

Recommended: BSCI353 or NEUR306.

BSCI454 Neurobiology Laboratory (2 Credits)

Basic neuroanatomical techniques, intracellular and extracellular recordings of electrical potentials from nerve and muscle.

Prerequisite: Minimum grade of C- in BSCI330; must have completed or be concurrently enrolled in BSCI353; and must have completed or be concurrently enrolled in PHYS122, PHYS132, or PHYS142.

Credit Only Granted for: BSCI454, BSCI455, NEUR405, or PSYC401.

BSCI455 Neuroscience Laboratory (3 Credits)

Students will utilize neurophysiological techniques to examine fundamental principles of neurons and neural circuits. This course will reinforce content from prerequisite NEUR courses. Students will also strengthen skills in experimental design and scientific writing.

Prerequisite: NEUR306 or BSCI353; and PHYS132.

Recommended: NEUR305.

Cross-listed with: NEUR405.

Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

BSCI456 Advanced Cellular Neuroscience (3 Credits)

Readings and discussion in cellular and molecular mechanisms underlying synaptic structure/function relationships, synaptic potentiation/depression, dendritic integration, homeostatic plasticity, and nervous system development including neurogenesis, axon guidance, synaptogenesis, and activity-dependent development among other topics.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

Recommended: Minimum grade of C- in BSCI440 or another upper-level neuroscience course.

Jointly offered with: NACS644.

Restriction: Permission of CMNS-Biology department.

Credit Only Granted for: BSCI339X, BSCI456, or NACS644.

Formerly: BSCI339X.

BSCI460 Plant Ecology (3 Credits)

The dynamics of populations as affected by environmental factors with special emphasis on the structure and composition of natural plant communities, both terrestrial and aquatic.

Prerequisite: Minimum grade of C- in BSCI361.

BSCI462 Population Ecology (3 Credits)

Theory of population growth and regulation, life tables, and theory of competition and predation, evolution in ecological settings, community structure and dynamics.

Prerequisite: MATH130, MATH136, or MATH140; and BSCI361.

BSCI464 Microbial Ecology (3 Credits)

Interaction of microorganisms with the environment, other microorganisms and with higher organisms. Roles of microorganisms in the biosphere. Microorganisms and current environmental problems.

Prerequisite: BSCI223 or BSCI283; and (CHEM271 or CHEM277); or permission of the instructor.

BSCI467 Freshwater Biology (4 Credits)

Biology and ecology of freshwater invertebrates in lotic and lentic habitats, their adaptation to aquatic life, their function in aquatic ecosystems, and their relationship to environmental deterioration. Laboratory will include field trips, demonstrations, and identifications.

Prerequisite: BSCI160.

BSCI471 Molecular Evolution (3 Credits)

Patterns of DNA sequence variation within and between species, caused by nucleotide changes and the movement of transposable elements. Theories of molecular evolution, such as the neutral theory. Molecular clock hypothesis: its importance as a practical empirical tool in molecular genetics and systematics and its theoretical foundation.

Prerequisite: BSCI222; or permission of CMNS-Biology department.

BSCI473 Marine Ecology (3 Credits)

Courses in evolution and animal behavior are strongly recommended. A detailed analysis of the evolutionary ecology of marine invertebrates; emphasis on testing of theories and on current literature.

Prerequisite: BSCI207.

BSCI475 Sexual Selection in Nature (3 Credits)

Sexual selection drives some of the most spectacular, if not bizarre, traits in nature. We will explore how organisms select and compete for mates and fertilization success, and how this powerful and pervasive evolutionary force shapes sexual traits and regulates species boundaries. We will focus on the key theories in the field and discuss recent and classic research papers. This is a student-directed class: course topics and materials will be selected based on student interests and involvement. On occasion, experts in the field will be invited to class to discuss their research.

Prerequisite: Minimum grade of C- in BSCI207; or permission of instructor.

Recommended: BSCI360 or BSCI370. Jointly offered with BIOL708.

Credit Only Granted for: BSCI338X, BSCI475, or BIOL708X.

Formerly: BSCI338X.

BSCI476 Evolutionary Genomics (3 Credits)

Application of genomics to understanding evolutionary processes, including genome evolution, organismal evolution, genomic diversity across the tree of life, human evolution and disease. Relevant concepts of evolutionary genetics and genome biology will be covered.

Prerequisite: Minimum grade of C- in BSCI222.

Recommended: BSCI370.

Credit Only Granted for: BSCI476 or BIOL708C.

BSCI477 Ecology and Evolution of Infectious Disease (3 Credits)

Parasites are a ubiquitous feature of ecological communities, and can strongly impact population growth, extinction risk, community structure and biodiversity, as well as pose serious risks to human health and food security. This course will cover basic principles of disease ecology, including; the diversity of parasitic organisms and transmission modes, host and pathogen traits for defense and infection, mathematical models of disease spread, the impacts of disease at different ecological scales, and host-parasite co-evolution. In the latter half of the course we will apply these basic concepts to current real-world problems in disease ecology including emerging infectious diseases in humans, wildlife and agriculture. We will use examples from plants, animals and humans to about an equal degree. This course will have a strong quantitative focus, and completion of the math series is recommended.

Prerequisite: C- or better in either BSCI370 or BSCI361 and either MATH136 or MATH140.

Credit Only Granted for: BSCI477 or BIOL708D.

BSCI480 Arthropod Form and Function (4 Credits)

Survey of the morphological, systematic and physiological diversity of the phylum Arthropoda.

Prerequisite: Permission of CMNS-Entomology (AGNR).

BSCI481 Insect Diversity and Classification (4 Credits)

A summary of the morphology, systematics and evolution of insects and techniques for their collection, preservation and identification. Emphasis is placed on the diversity of insects in North America, particularly Maryland and adjacent regions. An insect collection is required.

Prerequisite: BSCI337.

BSCI482 Insect Physiology and Molecular Biology (4 Credits)

Physiological and biochemical functions of insects. Insect endocrinology, neurobiology, sensory physiology, integument and molting, development and metamorphosis, immunity, metabolism and related topics.

Prerequisite: BSCI337.

BSCI483 Insects, Pathogens, and Public Health (3 Credits)

Mosquito- and tick-borne disease transmission poses significant challenges to human health and well-being globally, and is on the rise in North America. Arthropod parasites and the pathogens they transmit to humans and animals will be introduced, and the public health significance of these arthropods will be examined. The ecology and behavior of vectors in relation to disease transmission will be emphasized.

Prerequisite: BSCI207.

BSCI487 IPM: Science-Based Decision Making for Sustainable Pest Management (4 Credits)

Long-term global food security requires a sustainable increase in agricultural productivity to ensure the availability and accessibility of safe and nutritious food. Agricultural pests reduce global food production and threaten its sustainability. This course explores sustainable pest management in agroecosystems using the integrated pest management (IPM) paradigm. IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment.

Prerequisite: BSCI160 and BSCI161.

Restriction: Must have earned a minimum of 90 credits.

Credit Only Granted for: BSCI487 or ENTM609.

BSCI488 Summer Biology Institutes (1-8 Credits)

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 12 credits if content differs.

BSCI494 Animal-Plant Interactions (3 Credits)

Theoretical, conceptual and applied aspects of evolutionary and ecological interactions between plants and animals. This course gives an overview of major ideas, historical controversies, and current research on animal-plant relationships. We will explore the mechanisms and evolution of plant defenses and animal counter-adaptations, behavioral ecology and interactions across trophic levels, the role of microbial communities in mediating interactions, and how these interactions color human experience through food and medicine. The course will have a blended lecture/discussion format and will include field walks to collect herbivory data and observe animal-plant interactions.

Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI497 Insect Pests of Ornamentals and Turf (4 Credits)

The recognition, biology and management of insects and mites injurious to ornamental shrubs, trees, greenhouse crops, and turf. Emphasis on Integrated Pest Management (IPM).

Prerequisite: BSCI160 or BSCI337; or (PLSC110 and PLSC111) or (PLSC112 and PLSC113).

BSOS - Behavioral and Social Sciences

BSOS438 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSOS448 Teaching Assistant Practicum (1-6 Credits)

Supervised practicum for teaching assistants for BSOS/UNIV courses.

Repeatable to: 9 credits.

BSOS678 Special Topics in Justice Leadership (3 Credits)

Crime and Criminal Justice in Vietnam. Issues that will be focused on the present situation of crime in Vietnam; causes and conditions of criminal activities; include crime forecasting and crime prevention in Vietnam.

Also, provides comprehensive overview on the Criminal Justice System in Vietnam and relations among authorities.

Repeatable to: 18 credits if content differs.

BSOS685 Big-Data Analysis on the BSOS HPC Cluster (2 Credits)

Social media are a primary source of information on social interaction and personal interests. High-performance computing (HPC) is employed to search for hidden pattern and unknown correlations using advanced machine-learning algorithms available in python and R packages. The main steps of Natural Language Processing and big-data analysis are being worked out, from examining random samples to analyzing large data sets via in-memory Monte-Carlo applications and neural networks.

Prerequisite: Students must have completed a least one college-level statistics course.

Recommended: A working knowledge of python or R is expected.

Restriction: Students must be enrolled in a BSOS graduate program; or permission of instructor.

Credit Only Granted for: BSOS385, BSOS685, or BSOS688B.

Formerly: BSOS688B.

BSST - Terrorism Studies

BSST458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSST630 Motivations and Intents of Terrorists and Terrorist Groups (3 Credits)

Examines motivations for terrorism from an interdisciplinary perspective, with emphasis on political and applied social psychological perspective.

Topics may include: defining terrorism; preconditions; recruitment; domestic and international terrorism; and case studies and analysis of terrorist organizations.

BSST631 Societal Impacts of and Responses to Terrorism (3 Credits)

Explores the manners in which a variety of different actors respond to both terrorist incidents and the threat of terrorism. Examines local responses to terrorist incidents; local impacts of terrorism including effects on individual and group attitudes and behaviors; policy decisions made in response to both terrorist attacks and the threat of terrorism; terrorism prevention, deterrence, interdiction, and mitigation efforts; and individual and community recovery from terrorist attacks.

Credit Only Granted for: BSOS631 or BSST631.

Formerly: BSOS631.

BSST632 Development of Counterterrorism Policies and Programs (3 Credits)

Addresses the formulation, adoption, effectiveness, impacts, and afterlives of counterterrorism policies and programs.

Restriction: Must be in the Terrorism Analysis Graduate Certificate Program; or permission of department.

Credit Only Granted for: BSOS632 or BSST632.

Formerly: BSOS632.

BSST633 Research Methods in Terrorism and Counterterrorism (3 Credits)

Provides students with the opportunity to conduct original research, while exposing them to analytical tools relevant to the study of terrorism. Students will work with a range of data sources on domestic and international terrorism, and will be tasked with using data to test hypotheses related to the causes, behaviors, and/ or impacts of terrorism.

Credit Only Granted for: BSOS633 or BSST633.

Formerly: BSOS633.

BSST634 Legal and Criminal Approaches to Counterterrorism (3 Credits)

The United States and many of her allies have challenged long-standing legal boundaries in their effort to combat terrorism. This course examines these responses, including: increased criminalization of terrorism related activities; aggressive criminal prosecutions; detention of suspected terrorists indefinitely in far-off prisons; implementation of enhanced interrogation techniques; launch of drones to kill alleged terrorists, even U.S. citizens; and deployment of a vast system of mass surveillance.

BSST635 Countering Violent Extremism: Policy and Practice (3 Credits)

In recent years, the understanding of how and why individuals engage in violent extremism and terrorism has evolved and become more nuanced, as have the tools to mitigate these threats. A field of policy and practice called Countering Violent Extremism (CVE) has emerged that focuses on countering the pull of terrorist recruitment and influence by building resilience among populations vulnerable to radicalization.

BSST636 Quantitative Research Methods in Terrorism Studies (3 Credits)

Introduction to probability, statistics and data analysis, particularly with respect to how they are used in the study of terrorism. Students will learn fundamental principles of probability and statistical inference, how to summarize data and make statistical inferences, and how to manipulate and analyze data in a statistical software package (Stata) that is widely used in the discipline. The course provides a foundation in quantitative analysis that will enable students to critically evaluate extant quantitative research and manipulate their own data. It will also prepare interested students for more advanced statistics training.

BSST637 Qualitative Research Methods in Terrorism Studies (3 Credits)

Explores research design and qualitative methods using a hands-on approach. The course considers general themes such as the logic of inquiry, the appropriateness of qualitative approaches, as well as more specific topics such as process tracing, archival research, and survey methodology. It also provides students with the opportunity to learn and apply different tools for social science research.

BSST638 Special Topics in Terrorism Studies (3 Credits)

A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.

Repeatable to: 9 credits if content differs.

BSST639 Applied Analysis for Security Studies (3 Credits)

Introduces students to novel approaches for applied research in security studies. Topics include simulations, wargaming exercises, red teaming, and horizon scanning. This course assumes no prior experience with these methods. Throughout the course, students will complete interactive strategy-based activities to understand the behavior of violent non-state actors and how to use applied methods to counter militant groups.

BSST640 Theories of Security and Terrorism Studies (3 Credits)

Security and Terrorism Studies is a broad field that includes relevant theoretical voices from across the social sciences, philosophy, and policy. This course will mainly pull from sociological, psychological, and political science (international relations) theory to help students understand the theoretical foundation for the field and for their research. Specific topics may include discussion of power dynamics, ideology, violence, conflict, realist perspectives, and critical perspectives.

Additional Information: Priority enrollment will be given to students in the MPS in Security and Terrorism Studies program.

BSST641 U.S. Security Infrastructure (3 Credits)

An overview of the federal departments and agencies whose core missions are to provide for security and prevent terrorism. The course will overview the Departments of Defense, State, Treasury, Homeland Security, and the U.S. Intelligence Community as well as state, local, and tribal assets, and think tanks and the media, to provide students with a better understanding of interagency successes and gaps.

BSST642 Analytic Methods (3 Credits)

Development and mastery of analytic methods is vital for those seeking careers as professional analysts in fields related to security and terrorism studies. For students focused on an academic research career path, these skills will help you better interface with government and private sector consumers of your work. The overall goals for this course are to provide students with hands-on experience using analytic techniques to solve advanced problems. Classes will cover historical and current uses of analytic techniques and students will develop an understanding of which tools to use under different circumstances of analysis.

BSST643 Great Powers & Near-Peer Competition (3 Credits)

Focused on the emerging threats posed by state actors termed as "near-peers," including topics germane to near-peer competitors, most notably China, Russia, and Iran, but will cover other state actors as necessary. The course also investigates the past, present, and future of the most powerful states in the international system, the great powers, and how they compete, and cooperate in international relations. By examining the various aspects of the great powers and near-peer competitors, students will learn how geography, politics, economics, technology, and ideology play a role in global competition.

BSST645 Non-state Actors Threats and Responses (3 Credits)

The Non-State Actor. Running the gamut from Freedom fighters to Corporatized extortionists, NSAs play a pivotal role in the modern fields of combat. Some maintain loose state-level ties with high deniability, others rage against their domestic governments and facilitate foreign influence, but all present a modern adversary that Western Allies and Governments need to anticipate, track, and overcome. This course will provide an overview of the types of non-state actors that influence state actions. The course will examine the economic, political, and social costs of the proliferation of non-state actors globally. While the course will discuss terrorist groups, the main focus of the course will be on actors such as militant groups, insurgent groups, drug cartels, and illicit financial actors.

BSST650 Foundations of Insider Risk Management & Mitigation (3 Credits)

The risks posed by trusted insiders to organizations in both the public and private sector are well documented. Past compromises of national security information have provided sensitive information to US adversaries; theft or compromise of proprietary data and intellectual property has impacted businesses large and small; and, incidents of workplace violence perpetrated by insiders are on the rise. This course provides context for the counter insider threat mission and explores multi-disciplinary insider risk management concepts. The course addresses matters of policy, political and socio-economic impacts, psychological factors, and gives special consideration to issues of cyber insider threat, privacy and civil liberties, kinetic violence, and related social and behavioral science research.

BSST651 The Psychology of Malicious Insiders (3 Credits)

Multidisciplinary perspectives on intentional, malicious behavior by insiders. Reviews theoretical foundations from social psychology, personality psychology, psychopathology, and criminology and encourages students to understand Insider Threat (InT) behaviors through case conceptualization/formulation. Emphasis shall be placed on understanding the "fit" between different strategies for interviewing, investigating, early warning, monitoring, and mitigation, as well as the dynamics of a given case.

BSST652 Managing Insider Threat Activities (3 Credits)

Introduces critical concepts in threat assessment, management, and mitigation. Specifically, the seminar will highlight key concepts, theories, best practices, and research in three major areas of focus: (1) threat assessment and risk management, (2) mitigating existing risk and preventing further escalation, and (3) oversight and accountability of threat assessment activities.

BSST653 Investigative Thinking, Analysis and Decision-making in Insider Risk Management & Mitigation (3 Credits)

The purpose of this course is to stimulate "knowledge opportunity" in the complex everyday subject of decision making in insider threat analysis. Through the discovery of investigative thinking and some of its core elements of critical thinking, data to knowledge process, communication, heuristic, bias, and thinking processes, it is hoped it will lead students towards a better understanding of "What they are looking for" and "What they are looking at," both key elements essential in sound investigative thinking.

BSST697 Capstone (3 Credits)

The capstone course allows MPS students the ability to take what they have learned throughout their coursework and apply theories, methods, analysis, and policy in the form of a final project. The project can originate from work experience or the student's interests. Projects will be developed in conjunction with a member of the graduate faculty who will oversee the student's progress. By the end of the semester, each student is expected to have completed their individual project. The project should further the student's intellectual and career goals and can take the form of practical analysis, policy, or a more academic approach. Students will present their capstone project in written form and will also be required to present their research via an online colloquium. Students are expected to meet with a capstone advisor at least once a week and will devote considerable time developing the project individually.

Restriction: Students must be currently enrolled in their final semester of the MPTS program and have completed a minimum of 27 program credits.

BSST698 Seminar in Terrorism Studies (1-3 Credits)

A special topics seminar course for graduate students interested in terrorism studies.

Repeatable to: 9 credits if content differs.

BSST699 Independent Study in Terrorism Studies (3 Credits)

An independent study course for students in the Global Terrorism Minor program.

Repeatable to: 9 credits if content differs.

BUAC - Accounting and Information Assurance

BUAC602 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BUAC616 Introduction to Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Prerequisite: BUSI610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI611, BUAC616, or BMGT616.

BUAC701 Accounting Theory (3 Credits)

Examines GAAP, its weaknesses and strengths, and the role that the FASB and SEC play in its development. Includes the FASB standard setting process and issues that relate to this process: FASB conceptual framework; lobbying activity; and impending FASB standards. Other topics include: how management incentives and firm type influence accounting choice; recognize versus disclose as a strategy; and current debates in accounting. While the user of accounting information is examined, this course focuses more on management and how it reports and discloses accounting information.

Prerequisite: BMGT310, BMGT424, and BMGT311.

Credit Only Granted for: BMGT706 or BUAC701.

Formerly: BMGT706.

BUAC705 Advanced Financial Reporting (3 Credits)

Uses authoritative professional pronouncements to examine advanced financial reporting issues. Examines complex problems in accounting and reporting; examples include pensions, taxes, interest rate swaps, derivative securities, international transactions, and international financial reporting. Takes a user-oriented perspective, and examines the ways in which financial accounting information is used by investors, analysts, and creditors. Examples include if users adjust for alternative accounting methods or for information that is recognized versus disclosed.

Prerequisite: BMGT310, BMGT424, and BMGT311.

Credit Only Granted for: BMGT707 or BUAC705.

Formerly: BMGT707.

BUAC706 Business Ethics for Accountants and Auditors (2 Credits)

Considers all facets of business ethics issues within an accounting and auditing context. Ethical theory, corporate social responsibility, and individual decision-making are considered. Some of the applied topics that may be covered in this course include, but are not limited to, intellectual property issues, corporate downsizing, outsourcing, global ethics, crises management, and employment ethics.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC765 or BUAC706.

Formerly: BUAC765.

BUAC707 Financial Statement Analysis for Accountants and Auditors (2 Credits)

Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. This involves understanding and using the information that financial statements are communicating to users.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC780 or BUAC707.

Formerly: BUAC780.

BUAC710 Advanced Managerial Accounting and Control Systems (2 Credits)

Focuses on topics that emphasize the role of managerial accounting in a firm's overall management planning and control structure. A key concern is to show how effective organizations ensure that the parts of the organization work together to create the whole, and how the sum of the parts, through synergy, can indeed be greater than the whole.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC782 or BUAC710.

Formerly: BUAC782.

BUAC711 Financial Planning and Control Systems for Managers and Consultants (2 Credits)

This course provides an analysis of several topics concerning financial planning/control systems (management accounting systems). Topics covered: design and use of cost management systems (including activity based costing systems), financial performance measures for enhancing firm value, managerial incentive contracts and accounting data, management accounting and Internet-based transactions, managing earnings and financial ratios, use of balanced scorecard to evaluate financial/nonfinancial managerial performance, management accounting systems and competitor analysis, behavioral aspects of budgeting, post-auditing of capital investments, accounting/economics aspects of information security, and transfer pricing.

Prerequisite: BUSI611, BUSI681, and BUSI630; or permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BMGT711 and BUAC711.

Formerly: BMGT711.

BUAC712 Business Communications for Accountants and Auditors (2 Credits)

Focuses on the art of communication and its effects on people, organizations, and other stakeholders. The course will focus on two aspects of business communications: persuasion and effective presentations. The objective for the persuasion sessions is to have students improve upon their day-to-day oral business communications skills. This will be accomplished as participants learn to tailor each communication to the person or people with whom they are speaking.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC784 or BUAC712.

Formerly: BUAC784.

BUAC713 The Impact of Taxation on Business Decisions (3 Credits)

The impact of tax law and regulations on alternative strategies with particular emphasis on the large, multidivisional firm. Problems of acquisitions, mergers, spinoffs, and other divestitures from the viewpoint of profit planning, cash flow, and tax deferment.

Prerequisite: BUSI611.

Credit Only Granted for: BMGT713 or BUAC713.

Formerly: BMGT713.

BUAC714 Forensic Accounting/Auditing (2 Credits)

Provides a theoretical background and practical application of fraud examinations and corporate investigations. Fraud prevention, detection, investigation, and related matters such as courtroom procedures will be included. Also considered are topics such as FCPA and securities fraud. A wide variety of teaching tools are used.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC792 or BUAC714.

Formerly: BUAC792.

BUAC716 Auditing Automation and Analytics (2 Credits)

Auditing theory and the functions of the independent auditor in the financial market. As part of the class, the students will cover issues related to auditing large databases and audit analytics of large database. Moreover, the students will study audit automation and the use of artificial intelligence (AI) and Robotic process in the auditing market.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith.

BUAC717 Enterprise Risk Management (2 Credits)

Enterprise Risk Management, ERM, involves the study of the processes employed in identifying and assessing the risks and opportunities companies face, developing and implementing a plan to address those risks and opportunities, and monitoring progress implementing the plan. ERM is used to understand, control, and articulate the nature and level of risks taken in pursuit of business strategies coupled with accountability for risks taken and activities engaged in. One major benefit of ERM is that it provides an enhanced perspective and focus on risk management across the institution. The course will provide the opportunity to identify and discuss the issues and challenges in total risk management and will explore techniques for balancing enterprise risk and reward to optimize an organization's performance.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758J or BUAC717.

Formerly: BUAC758J.

BUAC721 Business Law for Managers (2 Credits)

Survey of United States legal institutions and processes as well as substantive areas of the law that affect business. Examination of tort and contract law, the legal forms of business organization and legal liability and major regulatory laws that affect business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI764 or BUAC721.

BUAC722 Applied Research for Accounting and Auditing (2 Credits)

Designed to give accounting masters students exposure to and appreciation of the various types of research that are undertaken by accounting and auditing professionals, including CPAs, financial analysts and academics. Accounting research will be studied as it relates to financial accounting standards, auditing standards, gaining understanding of a business and industry, and to a very limited extent tax and academic research. Students will gain experience working with professional accounting research databases as well as other databases that are useful for accounting research. Auditors and corporate preparers of financial statements need to know how to determine current GAAP and GAAS as they confront new issues and as standards evolve and change. Professionals need to understand how the standards are derived and how to analyze policy alternatives. Additionally, students will also explore the process of researching a business or industry in preparation for an audit.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith.

BUAC723 Essentials of Negotiation (2 Credits)

This highly experiential course will improve students' negotiation skills and capacity to acquire and effectively use bargaining power. By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, the class will increase students' negotiating self-confidence and improve their capacity to claim value and achieve win-win solutions to individual, team, and organizational problems. The course is designed to enhance students' negotiating self-confidence and improve students' analytical and decision-making skills (e.g., understanding bargaining zones, knowing when an agreement can be made and when to walk away; learning how to prepare for negotiations), interpersonal skills, creativity (e.g., identifying creative solutions to conflict), and persuasive abilities.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0794 or BUAC723.

Formerly: BUM0794.

BUAC724 Research on Accounting and Economic Aspects of Cybersecurity (2 Credits)

Cybersecurity has also become a key priority for the field of accounting for at least two reasons. First, the reliability, integrity and validity of computer-based accounting systems are dependent on cybersecurity. Second, given their role as advisors to organizations, accounting firms play a critical role in helping to improve the cybersecurity of their clients' computer-based accounting systems. The primary objective of this course is to discuss the relationships among accounting, economics and cybersecurity, with a focus on the important roles of accounting and economics in understanding the issues related to cybersecurity in today's interconnected digital world. A secondary objective of the course is to assist MS in Accounting (MSA) students in developing their ability to conduct original and applied research on topics related to "accounting and economic aspects of cybersecurity."

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUAC725 Leadership and Human Resource Management for Accountants and Auditors (2 Credits)

Develops the concepts, frameworks, and skills that are important to be effective leaders and to successfully manage human resources. Topics for discussion include: Creating a motivating and empowering environment; leadership attributes, power and effective influence; building effective decision-making; strategic management of human resources; specification of the skills and competencies requisite for job success; recruiting and selecting employees to fit the job and the organization; measuring, appraising and improving performance. All of the topics selected for discussion are critical ones that every professional needs to know, regardless of functional area (not just HR professionals), and will help students become more effective consultants, managers and leaders.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0796 or BUAC725.

Formerly: BUM0796.

BUAC726 Advanced Accounting Systems (3 Credits)

A study of current information technologies and their interaction with accounting systems and the accounting profession. Topics include: systems analysis and design; databases; electronic commerce and data security; communications and image processing; and expert systems and decision support systems.

Prerequisite: BMGT326.

Credit Only Granted for: BMGT716 or BUAC726.

Formerly: BMGT716.

BUAC731 Intermediate Accounting I (2 Credits)

The first part of a three-series set of courses on intermediate accounting; presents an in-depth analysis of financial accounting and reporting theory and practice that will enhance student understanding of financial information used in making effective management decisions. For each topic included in the series, this course presents a review of the underlying business transactions that require accounting along with a review the technical details of U.S. Generally Accepted Accounting Principles (GAAP) and applicable International Financial Reporting Standards (IFRS). The course covers the informational needs of managers, securities analysts, investors and creditors, applicable to a variety of business transactions and events. The course includes materials helpful to students planning to take the CPA Examination. Intermediate Accounting I focuses on financial accounting standards, the conceptual framework of accounting, the accounting information system, the balance sheet, income statement, statement of cash flows, time value of money concepts and revenue recognition.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758L or BUAC731.

Formerly: BUAC758L.

BUAC732 Intermediate Accounting II (2 Credits)

Continuing the study of accounting information covering accounting principles found in US GAAP and IFRS as they apply to cash and receivables, inventory valuation, acquisition and disposition of plant, property and equipment, depreciation, impairments and depletion, intangible assets, current liabilities and contingencies, long-term liabilities, and stockholders equity.

Prerequisite: BUAC731.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758M or BUAC732.

Formerly: BUAC758M.

BUAC735 External Auditing (2 Credits)

The study of the independent accountants attest function, generally accepted auditing standards, compliance and substantive tests, and auditor reports and opinions. The course explores audit planning and the role of internal controls and their effect on the auditability of financial statements. The course includes the study of various audit concepts, including how auditors develop an audit strategy, determine materiality in various contexts, set the acceptable level of audit risk, assess control and inherent risk and set detection risk, develop audit objectives, accumulate audit evidence and prepare workpapers, and audit firm quality control.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758O or BUAC735.

Formerly: BUAC758O.

BUAC737 Financial Reporting for Executives (2 Credits)

Financial Reporting involves the study of how financial executives can meet their reporting obligations in communicating the financial performance of their companies. The course reviews the financial reporting requirements including those imposed by the Sarbanes Oxley Act on public companies that will fulfill the informational needs of various stakeholders, including investors, stockholders and creditors, the primary financial statement users, along with customers, employees, and regulators. The course examines techniques to effectively meet these informational requirements, including accounting for and disclosing transactions and events that affect the primary financial statements income statement, balance sheet, statement of stockholders equity and cash flow statement.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758R or BUAC737.

Formerly: BUAC758R.

BUAC740 Data Driven Decision Making (2 Credits)

Proficiency in the art of analyzing data to support decision-making is critical for business professionals. In this course, we will explore basic analytical principles that can assist a manager to extract information from raw data and model complex decision problems with quantitative methods. A good outcome does not necessarily imply a good decision, a good outcome can be a matter of luck. A good decision is founded on sound reasoning and considers all the information available at the time of the decision.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUAC742 Accounting Analytics (2 Credits)

The application of data analytics techniques in accounting. Topics such as identifying questions that can be answered by data; data extraction, cleaning and preparation; data visualization; audit data analytics; generating key performance indicators; financial statement analytics; and tax analytics will be covered. Students will gain hands-on experience with various data analytics software. By the end of this course, the students should have a basic understanding on how accounting analytics can help enhance the effectiveness of management control systems and improve the quality and relevance of financial reporting, as well as its implications in auditing and fraud detection.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUAC743 Financial Statement Analysis (2 Credits)

Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. This involves understanding and using the information that financial statements are communicating to users.

Prerequisite: BUSI610.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUAC744 Valuation Measurement, Reporting, and Auditing for Accountants and Auditors (2 Credits)

An introduction to valuation for financial reporting ("fair value"), fair value reporting, and auditing fair value measurements. The number and complexity of financial reporting standards that require or allow assets and liabilities to be reported at fair value has increased substantially in recent years. The technical accounting standards that include fair value are complex in and of themselves, and the valuation measurements add substantially to the complexity. Further complexity is added to the dynamic because the audit firm is prohibited by the AICPA's independence rules from performing the valuation or providing significant assistance in technical accounting or the fair value measurement. Independent valuation/appraisal specialists are frequently preferred or required by the reporting company and/or the audit firm. From the perspective of the reporting company, this frequently results in complex and costly compliance, and from the auditor's perspective, a complex and high-risk area of the audit.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUAC746 Systems for Data Analysis (2 Credits)

Since the data grows exponentially and becomes complex, we need computational methods to collect, store, and analyze them in order to be successful in business, management, science, engineering, and other professions. This course is an introductory data class that meets this need. Class teaches how to analyze and model data, how to define and manipulate database, how to write computer programs in Python language to solve real-world problems, and how to use Tableau to explain your results as a report in a more readable way. This will be useful in your career and your research in the future. This course introduces the conceptual and logical designs of relational database systems and their uses in business environments. Topics include information modeling, optimization via normalization, data definition and manipulation languages, client/server architectures, concurrency and recovery, and data warehousing.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUAC758S or BUAC746.

Formerly: BUAC758S.

BUAC750 Research and Internship in Accounting (3 Credits)

Completion of a research paper on an approved accounting topic. Supervised sponsored internship in an entity outside the University.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT717 or BUAC750.

Formerly: BMGT717.

BUAC752 Internal Auditing I: Assurance and Consulting Services (2 Credits)

Provides students with an overview and basic understanding of internal auditing. Internal audit's role in internal control, risk management, business processes and risks, and Sarbanes-Oxley, Section 404 compliance efforts compliance efforts are considered. Internal auditing is presented as an integral part of effective corporate governance. Examples of assurance and consulting activities undertaken by the internal audit function, as well as the sourcing strategy (i.e., full insourcing, co-sourcing or full outsourcing models) are discussed. Students are introduced to internal control theory, test design concepts and internal auditing best practices.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUAC786 or BUAC752.

Formerly: BUAC786.

BUAC754 Internal Auditing II: Internal Audit Application and Practice (2 Credits)

This advanced internal auditing course contains an in-depth coverage of the internal audit process. Students receive experience in planning and conducting internal audit assurance and consulting engagements. Also, students build on the theory and techniques introduced in Internal Auditing I, through practical, in-depth coverage of specific audit areas. Other matters covered include audit evidence, workpapers, audit sampling, and communicating of engagement results. Internal auditing case studies are used to reinforce the learning process.

Prerequisite: BUAC786; or BUAC752.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC787 or BUAC754.

Formerly: BUAC787.

BUAC756 Information Security, Audit and Control (2 Credits)

Builds on basic information technology (IT) courses, focusing on key issues including IT security, IT controls, and IT auditing. Addressing issues such as auditing a computer information system; assessing risks; identifying control objectives; identifying appropriate audit procedures; learning the concepts and basic features of audit software thereby providing the tools for choosing audit software; conducting an operational audit basic controls over computer information systems; and developing world-class IT control frameworks.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC790 or BUAC756.

Formerly: BUAC790.

BUAC758 Special Topics in Accounting and Information Assurance (1-3 Credits)

Selected advanced topics in the various fields of graduate study in accounting and information assurance.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUAC759 Independent Study in Accounting and Information Assurance (1-6 Credits)

Independent study for masters students in accounting and information assurance.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUAC762 Tax I: Taxation of Individuals & Forecasting Analytics (2 Credits)

Federal taxation of individuals focusing on income, exclusions, deductions, depreciation, credits and capital transactions including home ownership. Property coverage includes the tax consequences of sales and dispositions of personal use assets, investment and business assets. Both tax planning and compliance issues are also covered. In addition the course covers wage based and equity-based compensation, taxable and nontaxable benefits as well as deferred compensation and various retirement plans. In addition, students will learn how to utilize regression analysis and scenario analysis to provide additional insights about these tax topics and to forecast future effective tax rates.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUAC764 Tax II: Taxation of Corporations & Other Entities (2 Credits)

Students have the opportunity to gain an understanding of the basic tax competencies required for determining the appropriate tax structure for businesses; issue identification; active listening; solving tax problems.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758V or BUAC764.

Formerly: BUAC758V.

BUAC765 Business Ethics for Accountants and Auditors (3 Credits)

Considers all facets of business ethics issues within an accounting and auditing context. Ethical theory, corporate social responsibility, and individual decision-making are considered. Some of the applied topics that may be covered in this course include, but are not limited to, intellectual property issues, corporate downsizing, outsourcing, global ethics, crises management, and employment ethics.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC765 or BUAC706.

BUAC766 Data Security and Taxation of Not-for-Profit Entities (2 Credits)

An introduction to the theory and practice of taxation as applied in the nonprofit sector. The practice of taxation for nonprofits requires, inter alia, an understanding of the legal framework for these entities. Therefore, the course will devote significant time to understanding the legal environment and framework associated with nonprofits. We will also discuss the related issues of data security and cybersecurity. The course goal is to enable students to become proficient in the major aspects of nonprofits that apply to the work of public accountants.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUAC767 Tax IV: Real Estate Taxation (2 Credits)

Provides an in-depth examination of the tax provisions and opportunities for planning transactions that involve real estate investments and transactions. The course covers the tax implications of purchasing, holding, and selling real property. These include the determination of tax basis and the treatment of mortgage interest, property taxes, like-kind exchanges, involuntary conversions, sales and dispositions, qualifying property, and capital gains and losses. The various forms used for property transactions will be reviewed in detail.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUAC758X or BUAC767.

Formerly: BUAC758X.

BUAC770 Tax V: Visual Analytics and International Tax (2 Credits)

An introduction to the theory and practice of international taxation. The objective of the course is to provide students with the basic tools to approach international tax topics from a US perspective. The course addresses the fundamentals of U.S. international taxation, but also offers insight into tax planning considerations. Both the U.S. activities of foreign taxpayers, as well as the foreign activities of U.S. taxpayers are explored. In addition, students will pull data from several sources into a visual analytics software environment and then manipulate the data into a visual front end.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUAC772 Database Management and State and Local Taxation (2 Credits)

Covers the tax implications of doing business in the United States across state lines, resulting in multiple taxation under the Commerce Clause of the United States Constitution. The course focuses on nexus or jurisdictional due process (which gives states the right to tax business profits), allocation and apportionment formulas of multi state income, business versus non-business income, privilege tax and discrimination. Also explored are the current tax developments under the Import-Export clause of the United States Constitution, taxation based on class legislation and the Equal Protection Clause, the multi-state tax compact, unitary concept, residence definitions, nonresident income sources, tax credits and short-period returns for individual income taxpayers, sales of tangible personal property, and retail and wholesale sales. The course examines valuation techniques for real and personal property. Students will learn the skills needed to understand and identify many aspects of the state income tax apportionment process. Focus will be placed on calculations and analyses required to present the state and local tax information in such a manner as to assist upper management in the business expansion decision-making process. The tax apportionment process requires a solid understanding of database management and we will utilize tools that are considered required knowledge in today's tax departments.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUAC774 Tax VII: Estates, Trusts, & Personal Finance Planning (2 Credits)

Covers the general tax considerations impacting estates and trusts. Includes an overview of the estate transfer tax and gift tax regime, in order to provide context to estate and trust income taxation. In addition, the course will cover how estates, trusts, and beneficiaries are taxed, and analyze some common estate planning techniques using trusts, including charitable trusts, grantor retained annuity trusts (GRATs), defective grantor trusts, valuation discounts, and other tax planning concepts.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUAC780 Financial Statement Analysis for Accountants and Auditors (3 Credits)

Provides a framework for using a firm's financial statements to perform a comprehensive analysis of the firm's operating performance, cash management, and financial position as well as to value the firm and to detect earning management. It includes an overview of the accounting and auditing standard setting framework, and the relevance of U.S. GAAP as well as International Financial Reporting Standards (IFRS) to accounting recognition, measurement, presentation, and disclosure. The course also identifies the analytical relevance of a selected set of more advanced accounting topics (e.g., valuing employee stock options).

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC780 or BUAC707.

BUAC782 Advanced Managerial Accounting and Control Systems (3 Credits)

Focuses on topics that emphasize the role of managerial accounting in a firm's overall management planning and control structure. A key concern is to show how effective organizations ensure that the parts of the organization work together to create the whole, and how the sum of the parts, through synergy, can indeed be greater than the whole.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC782 or BUAC710.

BUAC784 Business Communications for Accountants and Auditors (2 Credits)

Focuses on the art of communication and its effects on people, organizations, and other stakeholders. The course will focus on two aspects of business communications: persuasion and effective presentations. The objective for the persuasion sessions is to have students improve upon their day-to-day oral business communications skills. This will be accomplished as participants learn to tailor each communication to the person or people with whom they are speaking.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC784 or BUAC712.

BUAC786 Internal Auditing I: Conceptual and Institutional Framework (3 Credits)

Provides students with an overview and basic understanding of internal auditing. Internal audit's role in internal control, risk management, business processes and risks, and Sarbanes-Oxley, Section 404 compliance efforts compliance efforts are considered. Internal auditing is presented as an integral part of effective corporate governance. Examples of assurance and consulting activities undertaken by the internal audit function, as well as the sourcing strategy (i.e., full insourcing, co-sourcing or full outsourcing models) are discussed. Students are introduced to internal control theory, test design concepts and internal auditing best practices.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC786 or BUAC752.

BUAC787 Internal Auditing II: Internal Audit Application and Practice (3 Credits)

This advanced internal auditing course contains an in-depth coverage of the internal audit process. Students receive experience in planning and conducting internal audit assurance and consulting engagements. Also, students build on the theory and techniques introduced in Internal Auditing I, through practical, in-depth coverage of specific audit areas. Other matters covered include audit evidence, workpapers, audit sampling, and communicating of engagement results. Internal auditing case studies are used to reinforce the learning process.

Prerequisite: BUAC786.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC787 or BUAC754.

BUAC788 Action Learning Project (1-2 Credits)

A significant consulting project within teams, designed by individual MS student participants and faculty. It may also be an individual project/study or a business simulation exercise.

Restriction: Must be in Business and Management (Master's) program.

Repeatable to: 2 credits if content differs.

BUAC790 Information Security, Audit and Control (3 Credits)

Builds on basic information technology (IT) courses, focusing on key issues including IT security, IT controls, and IT auditing. Addressing issues such as auditing a computer information system; assessing risks; identifying control objectives; identifying appropriate audit procedures; learning the concepts and basic features of audit software thereby providing the tools for choosing audit software; conducting an operational audit basic controls over computer information systems; and developing world-class IT control frameworks.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC790 or BUAC756.

BUAC792 Forensic Accounting/Auditing (3 Credits)

Provides a theoretical background and practical application of fraud examinations and corporate investigations. Fraud prevention, detection, investigation, and related matters such as courtroom procedures will be included. Also considered are topics such as FCPA and securities fraud. A wide variety of teaching tools are used.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUAC792 or BUAC714.

BUDT - Decision and Information Technologies

BUDT700 Business Communication (1 Credit)

Consists of written and oral base-line assessments. Students will meet with Program administrators to receive feedback on these assessments and create an individualized development plan. Workshops and core course assignments, Smith-related activities and CMP assignments.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUDT758A or BUDT700.

Formerly: BUDT758A.

BUDT702 Database Management Systems (2 Credits)

Introduction to the conceptual, logical and physical design of relational database systems and their use in business environments. Topics include information modeling and optimization via normalization; Structured Query Language (SQL); Data Warehousing.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT703 Database Management Systems (3 Credits)

Introduction to the conceptual, logical and physical design of relational database systems and their use in business environments. Topics include information modeling and optimization via normalization; Structured Query Language (SQL); Data Warehousing.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUDT758Y OR BUDT703.

Formerly: BUDT758Y.

BUDT704 Data Processing and Analysis in Python (3 Credits)

An introduction to the Python programming language for the purpose of processing, analyzing, and visualizing data. In addition, students will be introduced to developing basic regression, optimization, and simulation models in Python, using highly popular packages. Course emphasis is on mastering basic Python functionality and developing intermediate to advanced skills in working with data, through instruction and active learning.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUDT758X OR BUDT704.

Formerly: BUDT758X.

BUDT705 Data Visualization for Business (2 Credits)

An introduction to data visualization techniques. Data-driven decisions are increasingly embedded in business organizations, so professionals must be able to explore and communicate data with understandable and powerful visualizations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT706 Social Media and Unstructured Data Analytics (2 Credits)

Firms operate in a world that is rapidly changing. Traditional product and service strategies are not sufficient when firms and consumers operate in a highly networked environment. Adoption of digital technologies is changing consumer behaviors and firms' competitive landscapes. Businesses need to craft strategies that leverage the vast amounts of data provided by the digital footprints of their customers. Predictive analytics, particularly social media and unstructured data analytics can provide clear, insightful, and actionable initiatives leveraging existing company data and data gathered from online channels and platforms. The course on social media and unstructured data analytics provides the conceptual understanding and analytical skills needed for businesses to succeed in today's rapidly changing environment. We will review concepts related to platforms, social media, network analytics and text analytics, and examine issues associated with business use of these technologies.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT721 Digital Transformation in Business (2 Credits)

Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Credit Only Granted for: BUDT758E or BUDT721.

Formerly: BUDT758E.

BUDT722 Managing Digital Business Markets (2 Credits)

The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUDT758G or BUDT722.

Formerly: BUDT758G.

BUDT723 Business Process Analysis for IS (2 Credits)

Helps students gain a solid foundation in the concepts, processes, tools, and techniques needed in analyzing business processes and conducting information systems projects.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT724 Project Management in Dynamic Environments (2 Credits)

Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT730 Data Models and Decisions (3 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUSI758B, BUDT758Q or BUDT730.

Formerly: BUDT758Q.

BUDT731 Data, Models, and Decisions Using R (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT732 Decision Analytics (3 Credits)

Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BMGT732, BUDT758P or BUDT732.

Formerly: BMGT732 and BUDT758P.

BUDT733 Data Mining and Predictive Analytics (2 Credits)

With vast quantities of data being generated, including new types of data such as web traffic, social network data, and reviews and comments on websites, "big data" and "analytics" are important topics. Data, when used correctly, can create a competitive edge for firms. Advances in computing hardware and algorithms have improved the quality of predictions and effectiveness of predictive business applications. Expertise in working with data, and deep knowledge of data mining/machine learning methods, is a sought-after skill. This course introduces key tools and techniques of data mining: classification, prediction, cluster analysis, and text mining. The methods covered are linear and logistic regression, k-nearest neighbors, naive Bayes, classification and regression trees, ensemble methods, neural networks, k-Means and hierarchical clustering, and association rules. The course will focus on business applications, with examples from Marketing, Finance, Healthcare, and Operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT738 Industry Seminar (0 Credits)

This experiential course will be offered in the Fall and Spring Semester of the first year to provide students exposure to career paths, real-world technology challenges faced by business and how these challenges are overcome. UMD Smith alumni will host weekly interactive learning discussions.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

Repeatable to: 0 credit.

BUDT740 Management of Information Systems (3 Credits)

To work together effectively for an organization's success, both business managers and IS managers must understand how to both manage and utilize information systems. This course explores management issues and opportunities of the IS function within organizations. Topics include e-business, protection of intellectual property and personal information, software development, IS operations, systems availability and business continuity, IS for multinational organizations, shadow IS organizations, business partnerships and alliances, and mergers, acquisitions, and divestitures.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUDT758J or BUDT740.

Formerly: BUDT758J.

BUDT741 Digital Health (2 Credits)

Healthcare is perhaps the latest industry to use technology to innovate and automate its business processes. The focus of the course is to provide a deep understanding to the current and emerging technologies in the healthcare industry. The course will also discuss the vagaries of healthcare data and the analytics techniques that are specific to the healthcare industry.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUDT758M or BUDT741.

Formerly: BUDT758M.

BUDT742 Machine Learning & Blockchain for FinTech (2 Credits)

Machine Learning is rapidly changing the financial services industries and Blockchain is poised to make fundamental changes to how the financial sector is structured and organized. The focus of the course is to provide a deep understanding for the current machine learning and emerging Blockchain technologies in the financial services industry.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUDT758I or BUDT742.

Formerly: BUDT758I.

BUDT748 Industry Practicum (3 Credits)

This capstone course will provide students an opportunity to work on a real-world project where they will work with a company to use technology to solve a business problem.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT751 Harnessing AI for Business (2 Credits)

Artificial Intelligence (AI) is penetrating our daily routines deeply and is revolutionizing almost every aspect of business. Firms are increasingly using technologies such as natural language processing, neural networks, and deep learning to generate deep insights. At the same time, AI algorithms are challenged by issues of bias, ethics, and transparency. This course aims to equip students with the essential knowledge of the current wave of AI. It uses a hands-on, learning-by-doing approach to understanding the concepts behind AI, the strategic drivers of these technologies and the value propositions that they provide to industries. The focus is on creating awareness of the technologies, allowing some level of familiarity with them through assignments, and enabling some strategic thinking around the use of these in business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT753 Blockchain Technologies and Business Applications (2 Credits)

Creates a strong business and technical foundation for Blockchain, starting with an in-depth discussion of the business inefficiencies that the Blockchain technology has the potential to address. This is followed by reviewing the computer science fundamentals related to cryptography, distributed computing, and peer-to-peer architectures that Blockchain systems rely on. The course then provides a comprehensive understanding of Bitcoin including its limitations, and the work that has been done to date to address these limitations. Alternate Blockchain implementations such as Ethereum and Hyperledger are discussed with a focus on smart contracts. The course will also cover potential business applications in Finance, Healthcare, Supply Chain, and Arts/Media/Entertainment. Students will be exposed to current research problems and research efforts in progress.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT754 IoT Applications for Business (2 Credits)

The IoT is enabling the digitization and internet connectivity of most physical things. The focus of this course is to provide students an in-depth understanding of the technology components of the IoT architecture, infrastructure, data and analytics so that they are equipped to develop business applications using IoT that deliver business outcomes.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT756 Causal Inference & A/B Testing (2 Credits)

Organizations and policymakers in government constantly grapple with such causal questions. For example, firms want to know how does a price change affect the sales of a product, or how to design websites and platforms that increase consumer engagement and lead generation; political parties want to know what on social media sites can boost their political influence, and governments want to know whether allowing parents to pay for private schools using publicly funded vouchers make the education system more effective. In particular, platforms such as Netflix, Airbnb, eBay, Groupon, Booking.com, Uber, Amazon, etc. make extensive and continuous use of A/B tests and have a dedicated team of data scientists and IT-personnel to implement, monitor and analyze such tests. Banks and Insurance companies constitute another important sector where the use of A/B testing is ubiquitous.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT757 Cybersecurity (2 Credits)

Distributed technologies and the ability of business to capture increasing amounts of sensitive data have increases the stakes and risks for information security. The focus of this course will be to help students understand cybersecurity frameworks, analytic techniques and enterprise risk management.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT758 Special Topics in Decision, Operations and Information Technologies (1-4 Credits)

Selected advanced topics in the various fields of graduate study in decision, operations and information technologies.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUDT759 Independent Study in Decision and Information Technologies (1-6 Credits)

Independent study for masters students in decision and information technologies.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUDT775 Pricing and Revenue Management (2 Credits)

Specialized course on pricing and revenue management (PRM) that provides students with tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. Topics covered include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, mark-down pricing, legal and ethical issues in models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in execution of PRM.

Prerequisite: BUSI630.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT758D or BUDT775.

Formerly: BUDT758D.

BUFN - Finance

BUFN400 Introduction to Financial Markets and Financial Datasets (3 Credits)

Provides an overview of financial concepts and markets and datasets. Company financial statements will be used to review concepts including earnings, cash flow, accruals, investment, dividends, etc. The course will introduce concepts related to portfolio theory and asset pricing. It will introduce the fundamentals of the stock market and market microstructure, including bid ask spreads and market liquidity. Advanced topics include event studies, high frequency trading, Over The Counter (OTC) bond markets, and more specialized institutional arrangements including repo markets and foreign currency exchange markets.

Prerequisite: STAT400, STAT401, STAT410, or STAT420.

Recommended: CMSC320, CMSC351, MATH240, and MATH241; and should have extensive familiarity with Python including Pandas, Numpy, Scipy, Matplotlib; and familiarity with probability and statistics, econometric modeling.

Restriction: By Permission Only.

BUFN401 Option Theory and Derivatives (3 Credits)

Will introduce Option Theory and the concept of a derivative financial contract whose value is based on some underlying asset, e.g., a stock or bond or commodity. Option theory based pricing models are a cornerstone of modern finance. Unlike the Capital Asset Pricing Model (CAPM) that determines an appropriate rate of return, option theory primarily relies on arbitrage arguments, and the probability that an option will be exercised during some time interval. Option theory has been very successful empirically. Common derivative types include stock and bond and index options, futures contracts, forward contract and swaps.

Prerequisite: BUFN400.

BUFN402 Portfolio Management (3 Credits)

The fundamentals of portfolio management, including asset allocation, investing strategies, and risk management. The class describes some of the main strategies used by hedge funds and provides methodologies to analyze them. The strategies are illustrated using real financial data, and students learn to apply tools for performance measurement, portfolio optimization (quadratic programming), factor models, predictive regression analysis, backtesting, and managing transaction costs.

Prerequisite: BUFN400.

BUFN403 Capstone Computational Finance Projects (3 Credits)

This is a semester-long capstone project to be completed by student groups. The projects will range from academic research projects (co-mentored by a finance or computer science faculty member) or an industry focused project (co-mentored by an industry coach). Each project must address an interesting real world challenge faced by a researcher, an analyst or a financial regulator. The project would ideally use a real dataset. Teams can create their own datasets or re-purpose existing datasets. There will be credit given to teams who create or curate their own datasets. The project should apply methodology based in machine learning, information / data management, including NLP and text analytics. The project must include a visual analytics component so that the results from the project can be presented and explained to the user.

Prerequisite: CMSC320; and (BUFN401 or BUFN402; or permission of the Computational Finance Minor faculty directors).

BUFN602 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BUFN610 Financial Management (2 Credits)

The fundamental concepts and techniques used to evaluate corporate decisions. Topics include the time value of money, valuation of common securities, investment decisions, capital budgeting, capital structure, and the weighted average cost of capital. The objectives are to develop the ability to make investment decisions, manage project finances, and analyze financial decisions.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUSI640, BUFN610, or BMGT610.

BUFN620 Capital Markets (2 Credits)

Covers modern theories and techniques for analyzing investments in different securities. Introduces mathematical and statistical models to price securities and guide investment decisions. The main topics covered are portfolio theory, pricing models, market efficiency, fixed income investment, and options.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN740 or BUFN620.

Formerly: BUFN740.

BUFN630 Valuation in Corporate Finance (2 Credits)

An advanced corporate finance course focusing on valuation. The main objective is to apply the concepts covered in the introductory finance class through real-life applications (cases) and use valuation estimates to guide and communicate investment decisions. The topics include building Pro Forma statements and forecasting future cash flows, dynamic cash flow models, estimating the cost of capital, implementing the Weighted Average Cost of Capital (WACC) and Adjusted Present Value (APV) methods, and using real options techniques (binomial and Black and Scholes models as well as Monte Carlo simulations) to value companies and projects.

Prerequisite: BUFN610.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

Formerly: BUFN750.

BUFN640 Financial Data Analytics (2 Credits)

Introduces the skills and computing languages for analyzing financial data and testing financial models. Covers topics such as the ordinary least square regression (OLS) estimator, its properties and applications, statistical inference, and univariate and multivariate analysis. The focus is on working with data and applying econometric models to financial applications such as estimating asset pricing models, portfolio choice, and the efficient frontier. The course will use Python programming language, Google Colab environment, and matching learning packages.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN758N of BUFN640.

Formerly: BUFN758N.

BUFN650 Machine Learning in Finance (2 Credits)

A hands-on course on applications of cutting-edge machine learning methods to financial modeling. It builds on the Financial Analytics class to introduce students to a wide variety of machine learning techniques ranging from lasso regression to deep learning and TensorFlow. The course provides the basic ideas and intuition behind these methods, a more formal understanding of how and why they work, and opportunities to experiment with machine-learning algorithms and apply them to big data modeling in finance. It will use the Python programming language, Google Colab environment, and machine learning packages.

Prerequisite: BUFN640.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN758O or BUFN650.

Formerly: BUFN758O.

BUFN660 Derivative Securities (2 Credits)

Introduces standard derivative contracts, including forwards and futures, swaps, and options. Covers the mathematical foundation of valuing derivative contracts, the use of static and dynamic replication strategies, and the concept of no-arbitrage. Derivative securities on various underlying assets (equities, indices, commodities, foreign exchange, etc.) are analyzed using different application contexts.

Prerequisite: BUFN610.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.

Formerly: BUFN761.

BUFN670 Financial Mathematics (2 Credits)

Introduction to the mathematical models used in finance and economics with emphasis on pricing derivative instruments. Topics include elements from basic probability theory, distributions of stock returns, elementary stochastic calculus, Ito's Lemma, arbitrage pricing theory, and continuous time portfolio theory. Particular focus is on the financial applications of these mathematical concepts.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN710 Financial Strategy for Corporations (2 Credits)

An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.

Prerequisite: BUFN610; or permission of BMGT-Robert H. Smith School of Business.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN751 or BUFN710.

Formerly: BUFN751.

BUFN712 Financial Restructuring (2 Credits)

Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN712 or BUFN752.

Formerly: BUFN752.

BUFN714 Corporate Governance and Performance (2 Credits)

Deals with corporate governance and its impact on shareholder value. Divergence of interests between corporate insiders and providers of funds leads to agency problems which can impair corporate performance and shareholder value. Various instruments of corporate governance - internal as well as external mechanisms - that can help align managerial incentives with those of outside investors, and hence help restore shareholder value will be studied.

Prerequisite: BUFN610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

Formerly: BUFN753.

BUFN716 Corporate Risk Management (2 Credits)

Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN716 or BUFN754.

Formerly: BUFN754.

BUFN717 Entrepreneurial Finance and Private Equity (2 Credits)

An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN755 or BUFN717.

Formerly: BUFN755.

BUFN721 International Investment (2 Credits)

Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategy.

Prerequisite: BUFN610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN721 or BUFN770.

Formerly: BUFN770.

BUFN722 Banking and Financial Institutions (3 Credits)

The role of financial management in banking and financial institutions. The economic role and regulation of banking and financial institutions, analysis of risks and returns on financial assets and liabilities, and the structure of assets, liabilities and capital.

Prerequisite: BUSI640.

Credit Only Granted for: BUFN722, BUFN724, or BUFN772.

BUFN723 International Corporate and Project Finance (2 Credits)

Continuation of BUFN721. Issues addressed will include capital budgeting, project financing, exchange rate exposure (operating, translation, and transaction), foreign investment strategy, and risk management.

Prerequisite: BUFN610 and BUFN721.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN723 or BUFN771.

Formerly: BUFN771.

BUFN724 Bank Management (2 Credits)

Analyze and discuss readings in bank management, with primary focus on the measurement and management of risk, including credit, market, and interest rate risk. Look at the management of liquid reserves. Examine the special nature of financial institutions, incorporating their functions, policies, services, and regulation. Study the evolving nature of the financial services industry, by reading the financial press and by having outside practitioner speakers. Focus is on U.S. banks.

Prerequisite: BUFN610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN724 or BUFN772.

Formerly: BUFN772.

BUFN726 Institutional Asset Management (2 Credits)

Examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. Involves a mixture of finance and economics and emphasizes the incentives professional money managers face within the context of the organizational structure in which they operate. Particular attention is paid to compensation structures and monitoring mechanisms.

Prerequisite: BUFN610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.

Formerly: BUFN773.

BUFN730 Advanced Financial Modeling and Equity Analysis (2 Credits)

Provides in-depth analysis of public equities, with a focus on financial statement analysis, financial forecasting and ultimately valuation. Students will apply the primary valuation techniques used in industry to estimate market values for equities. Additionally, students learn how to stress test their financial models and interpret outcomes.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN760 or BUFN730.

Formerly: BUFN760.

BUFN732 Fixed Income Analysis (2 Credits)

Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN732 or BUFN762.

Formerly: BUFN762.

BUFN734 Portfolio Management (2 Credits)

Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN734 or BUFN763.

Formerly: BUFN763.

BUFN736 Quantitative Investment Strategies (2 Credits)

Provides an introduction to quantitative techniques of selecting equities, as used commonly among long-short equity hedge funds and other quantitative equity asset management companies. Statistical factor models are developed to locate stocks with higher expected returns, based on the observable characteristics of the stocks. Implementation issues, including statistical estimation, backtesting and portfolio construction, are covered, as is performance evaluation.

Prerequisite: BUFN610.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUFN764 or BUFN736.

Formerly: BUFN764.

BUFN738 Investment Fund Management (3 Credits)

Provides second-year Master in Business Administration students with the opportunity to apply the skills learned in finance classes to actual investment decisions through management of an investment fund.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Repeatable to: 9 credits.

BUFN740 Capital Markets (2 Credits)

Designed to deepen the foundations necessary to finance focused students, especially those intending to specialize in the quantitative areas of finance including investments, fixed income, and financial engineering.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN740 or BUFN620.

BUFN741 Advanced Capital Markets (2 Credits)

This course covers modern theories and techniques for investments and asset pricing. The main topics covered are: portfolio theory, pricing models, market efficiency, fixed income investment, forwards and futures, and options.

Prerequisite: BUFN620; or permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN758P or BUFN741.

Formerly: BUFN758P.

BUFN742 Financial Engineering (2 Credits)

Introduces and applies various computational techniques useful in the management of equity and fixed income portfolios and the valuation of financial derivatives and fixed income securities. Techniques include Monte Carlo Simulation and binomial/lattice pricing models. Emphasis is on bridging theory with the design of algorithms and models that can be directly applied in practice.

Prerequisite: BUFN610.

Restriction: Permission of BMGT-Robert H.

Credit Only Granted for: BUFN742 or BUFN766.

Formerly: BUFN766.

BUFN744 Fixed Income Derivatives (2 Credits)

Surveys fixed income assets and related securities such as Exchange-traded bond options; bonds with embedded options; floating rate notes; caps, collars, and floors; floating rate notes with embedded options. Also surveys advanced tools for interest-rate and fixed-income portfolio management, including the use of derivative securities, and the application of binomial trees for analysis of options, and a sound understanding of stochastic yield curves.

Prerequisite: BUFN610; and BUFN732.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN765 or BUFN744.

Formerly: BUFN765.

BUFN745 Financial Programming (2 Credits)

This course introduces basic and innovative statistical modelling methods for financial markets, and equips students with analytical and programming tools for modelling and analyzing financial data. Examples of applications include portfolio management and risk management.

Prerequisite: BUFN650.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN758E or BUFN745.

Formerly: BUFN758E.

BUFN746 Enterprise and Credit Risk Management (2 Credits)

Surveys the theory and practice of credit risk identification, measurement and mitigation along with understanding the principles of enterprise risk governance and risk-adjusted returns. The course examines how to develop credit loss distributions via Monte Carlo simulation or copula methodologies for consumer assets such as mortgages, credit cards and auto loans, developing commercial loan scorecards for rating credit risk. Pricing and use of various credit structures such as credit default swaps, collateralized debt obligations and credit-linked notes is examined.

Prerequisite: BUSI640; and BUFN740.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN747 Asset-Liability and Nonfinancial Risk Management (2 Credits)

This course surveys risks and techniques associated with asset-liability and nonfinancial risks including market and interest rate risk, liquidity risk, operational risk and model risk, among others. Techniques such as portfolio value-at-risk (VaR) are used in realistic empirical examples to illustrate the methods. Key rate duration, principal components analysis and analytical and simulation-based VaR techniques are used to estimate interest rate risk exposure for financial firms. Hedging these risks using various financial derivative products such as options, swaps and futures contracts is explored. Operational risk is estimated leveraging Poisson loss distributions and model risk and validation techniques are reviewed.

Prerequisite: BUSI640; and BUFN740.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN750 Valuation in Corporate Finance (2 Credits)

An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, discounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

Formerly: BUFN714.

BUFN751 Financial Strategy For Corporations (2 Credits)

An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN751 or BUFN710.

BUFN752 Financial Restructuring (2 Credits)

Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN712 or BUFN752.

Formerly: BUFN712.

BUFN753 Corporate Governance and Performance (2 Credits)

Deals with corporate governance and its impact on shareholder value. Divergence of interests between corporate insiders and providers of funds leads to agency problems which can impair corporate performance and shareholder value. Various instruments of corporate governance - internal as well as external mechanisms - that can help align managerial incentives with those of outside investors, and hence help restore shareholder value will be studied.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

BUFN754 Corporate Risk Management (2 Credits)

Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN716 or BUFN754.

BUFN755 Entrepreneurial Finance and Private Equity (2 Credits)

An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN755 or BUFN717.

BUFN758 Special Topics in Finance (1-4 Credits)

Selected advanced topics in the various fields of graduate study in finance.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUFN759 Independent Study in Finance (1-6 Credits)

Independent study for Masters students in finance.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUFN760 Applied Equity Analysis (2 Credits)

Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN730 or BUFN760.

BUFN761 Derivative Securities (2 Credits)

Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.

Prerequisite: BUFN740.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.

Formerly: BUFN726.

BUFN762 Fixed Income Analysis (2 Credits)

Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.

Prerequisite: BUFN740.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN732 or BUFN762.

BUFN763 Portfolio Management (2 Credits)

Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.

Prerequisite: BUFN740.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN734 or BUFN763.

BUFN764 Quantitative Investment Strategy (2 Credits)

Provides an introduction to quantitative techniques of selecting equities, as used commonly among long-short equity hedge funds and other quantitative equity asset management companies. Statistical factor models are developed to locate stocks with higher expected returns, based on the observable characteristics of the stocks. Implementation issues, including statistical estimation, backtesting and portfolio construction, are covered, as is performance evaluation.

Prerequisite: BUFN763.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN764 or BUFN736.

BUFN765 Fixed Income Derivatives (2 Credits)

Surveys fixed income assets and related securities such as Exchange-traded bond options; bonds with embedded options; floating rate notes; caps, collars, and floors; floating rate notes with embedded options. Also surveys advanced tools for interest-rate and fixed-income portfolio management, including the use of derivative securities, and the application of binomial trees for analysis of options, and a sound understanding of stochastic yield curves.

Prerequisite: BUFN762.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN765 or BUFN744.

BUFN766 Financial Engineering (2 Credits)

Develop Excel and Visual Basic (VBA) models to solve problems related to portfolio management, options valuation, fixed income securities, interest rate processes, and risk management. This course thus bridges theory with the design of algorithms and models that can be directly applied in practice.

Prerequisite: BUFN740.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN742 or BUFN766.

BUFN768 Special Topics in Finance (1-4 Credits)

Selected experiential learning opportunities in advanced topics in the various fields of graduate study in finance.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BUFN770 International Investment (2 Credits)

Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategy.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN721 or BUFN770.

BUFN771 International Corporate and Project Finance (2 Credits)

Continuation of BUFN770. Issues addressed will include capital budgeting, project financing, exchange rate exposure (operating, translation, and transaction), foreign investment strategy, and risk management.

Prerequisite: BUFN770.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN724 or (BUFN770 and BUFN771).

Formerly: BUFN724.

BUFN772 Bank Management (2 Credits)

Analyze and discuss readings in bank management, with primary focus on the measurement and management of risk, including credit, market, and interest rate risk. Look at the management of liquid reserves. Examine the special nature of financial institutions, incorporating their functions, policies, services, and regulation. Study the evolving nature of the financial services industry, by reading the financial press and by having outside practitioner speakers. Focus is on U.S. banks.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN722, BUFN724, or BUFN772.

Formerly: BUFN722.

BUFN773 Institutional Asset Management (2 Credits)

Examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. Involves a mixture of finance and economics and emphasizes the incentives professional money managers face within the context of the organizational structure in which they operate. Particular attention is paid to compensation structures and monitoring mechanisms.

Prerequisite: BUSI640.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.

BULM - Logistics, Business, and Public Policy

BULM700 Business Fundamentals for Supply Chain Managers I (2 Credits)

This course is part of a series of two courses Business Fundamentals for SCM part I and, part II. The series is intended to provide you with the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain a solid understanding of accounting, finance and the link between supply chain and overall financial performance. Students will analyze financial statements and explain the implications of supply chain management decisions on standard financial ratios and all components of the balance sheet and income statement. Through interactive supply chain finance models, students will demonstrate the sensitivity of outcome to multiple independent variables. Last but not least, students will also learn how to apply the net present value technique to evaluate the feasibility of investment projects in supply chain.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BULM758K or BULM700.

Formerly: BULM758K.

BULM701 Business Fundamentals for Supply Chain Managers II (2 Credits)

This is the second course of the series Business fundamentals for Supply Chain Managers. This course is intended to provide you with the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain a solid understanding of accounting, finance and the link between supply chain and overall financial performance. Students will analyze financial statements and explain the implications of supply chain management decisions on standard financial ratios and all components of the balance sheet and income statement. Through interactive supply chain finance models, students will demonstrate the sensitivity of outcome to multiple independent variables. Last but not least, students will also learn how to apply the net present value technique to evaluate the feasibility of investment projects in supply chain.

Prerequisite: BULM700; or permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM758Q or BULM701.

Formerly: BULM758Q.

BULM710 Data Driven Decision Making I (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI630, BULM758X or BULM710.

Formerly: BULM758X.

BULM711 Data Driven Decision Making II (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI630, BULM758Y or BULM711.

Formerly: BULM758Y.

BULM720 The Green Supply Chain (2 Credits)

In response to international regulation of carbon emissions and increasing corporate responsibility pressures, companies are seeking to develop greener supply chains. Companies such as WalMart have undergone a paradigm shift in how they manage their businesses to emphasize environmental stewardship and due diligence on product sustainability. Students are provided with key concepts and tools for designing and managing environmentally sustainable, low-impact supply chains.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM721 Global Supply Chain Management (2 Credits)

Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI672 or BULM721.

BULM724 Negotiations in Supply Chain Management (2 Credits)

This high experiential course will improve students' negotiation skills and capacity to acquire and effectively use power. By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, the class will increase students' negotiating self-confidence and improve their capacity to achieve win-win solutions to individual, team, and organizational problems. The course is designed to enhance students negotiating self confidence and improve students analytical skills, interpersonal skills, creativity (e.g., identifying creative solutions to conflict), and persuasive abilities.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM726 Purchasing Management (2 Credits)

Examines purchasing methods from both a tactical and strategic viewpoint. Special emphasis is placed on developing purchasing strategies from international suppliers and the trade-offs between outsourcing and insourcing.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM731 Technology Applications in Supply Chain Management (2 Credits)

In this course, we introduce the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain an understanding of accounting, finance, production cost, scheduling, and the link between supply chain and overall financial performance.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BULM732 Networks and Influence (2 Credits)

Focuses on networks, social capital, and influence as they relate to operating effectively in organizations. It draws heavily on emerging literature related to social capital and networks, but also integrates concepts from persuasion, communication, and motivation literatures to aid your efforts to build a successful track record for yourself and your organization.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0725 or BULM732.

BULM733 Global Trade Logistics (2 Credits)

Acquaints students with managerial issues in international logistics and transportation, and provides students with an understanding of issues related to import/export management and the global marketplace.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT773 or BULM733.

Formerly: BMGT773.

BULM734 Assessing and Managing Supply Chain Risks (3 Credits)

Supply chain managers are facing an increasingly volatile operating environment, with constant danger of trading community disruption from business, social and environmental risks. Students are provided with a working knowledge of both the core techniques of supply chain risk assessment and mitigation; as well as best practices in establishing formal corporate supply chain risk management programs. A semester-long X-Treme Supply Chain Simulation will enable students to gain hands-on experience in navigating a computer company through a complex and risky four quarters of global business operations.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM735 Project Management in Dynamic Environments (2 Credits)

Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BULM736 Executives in Supply Chain Management (3 Credits)

Designed to provide students an opportunity to engage in intensive interaction with senior supply chain executives from a cross-section of industries. Executives share their insights on leading competitive supply chains in the global marketplace, while students research the competitive supply chain dynamics of each executive's industry.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM742 Global Supply Chain Resources Planning (2 Credits)

Provides students with an overall understanding of how firms use an advanced supply chain planning (ASCP) application as an integral part of their materials management process which includes such activities as production planning, materials requirements planning, and distribution requirements planning.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BULM744 Global Supply Chain Risk Management (2 Credits)

Explores methods to build enterprise resilience from the perspectives of the supply chain planner and supply chain manager. Addresses concerns assessing strategic & operational risks, day to day uncertainties in demand & supply and ensuring business continuity after low probability but high impact events such as a terrorist attack or earthquake.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; and permission of BMGT-Robert H. Smith School of Business.

BULM750 Lean Sigma for Supply Chain I (2 Credits)

This course is part of a series of courses. This the second part of the Lean Six Sigma for SC Managers course series. We will be focusing on the Analyze, Improve and Control phases of the Lean Six Sigma methodology. Lean Six Sigma is a robust methodology for problem solving aiming to improve quality and reduce speed within a process. This course covers up to the Lean and Six Sigma Green Belt level body of knowledge. You will be expected to conduct a project on a case study of a business looking to improve their processes to meet customer requirements.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM758L or BULM750.

Formerly: BULM758L.

BULM751 Lean Sigma for the Supply Chain II (2 Credits)

This course is part of a series of courses. The first part will cover the Introduction, Define and Measure Phases of the Lean Six Sigma Methodology. Lean Six Sigma is a robust methodology for problem solving aiming to improve quality and reduce speed within a process. This course covers up to the Lean and Six Sigma Green Belt level body of knowledge. You will be expected to conduct a project on a case study of a business looking to improve their processes to meet customer requirements.

Prerequisite: BULM750.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM758V or BULM751.

Formerly: BULM758V.

BULM754 Global Transportation Management (2 Credits)

Introduces transportation as a field of managerial and governmental responsibility and presents the features that make the transportation arena unique and, thus, worthy of advanced study. Each of the five modes of transportation, along with other forms of carriage, will be considered. In addition, the importance of freight transportation within supply chain management will be examined. Issues related to passenger transportation will also be addressed. Throughout the course, particular attention will be paid to the significant impact that transportation has on economic development and growth.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM758T or BULM754.

Formerly: BULM758T.

BULM756 Supply Chain Strategy (2 Credits)

Examines supply chain management at the strategic level. Through class lectures, case discussions, and assignments, students first learn about the determinants of corporate strategy. Supply chain strategies are then discussed, along with the need to properly align supply chain strategy with corporate strategy. Finally, there is a discussion of how to implement supply chain strategy, given various environmental and market considerations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM758B or BULM756.

Formerly: BULM758B.

BULM758 Special Topics in Logistics, Business and Public Policy (1-4 Credits)

Selected advanced topics in the various fields of graduate study in logistics, business and public policy.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BULM759 Independent Study in Logistics Management (1-6 Credits)

Independent study for Masters students in Logistics Management.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUMK - Marketing

BUMK701 Marketing Research Methods (2 Credits)

The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.

Prerequisite: BUSI650 and BUSI630.

Credit Only Granted for: BMGT752 or BUMK701.

Formerly: BMGT752.

BUMK706 Marketing Analysis (2 Credits)

Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.

Prerequisite: BUSI650.

BUMK715 Consumer Behavior (2 Credits)

Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.

Prerequisite: BUSI650.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BMGT754 or BUMK715.

Formerly: BMGT754.

BUMK716 Brand Management (2 Credits)

Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.

Prerequisite: BUSI650.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUMK717 Integrated Marketing Communications (2 Credits)

Marketing communications are a complex but critical component of marketing strategy. Topics include communication tools: advertising, sales promotions, corporation communications, one-on-one or direct marketing, public relations, internet communications, sponsorship/events marketing, and marketing communication plans: defining objectives, implementing the plan, and measuring communications effectiveness. Achieving integration in the content, look, and feel of all marketing communications is stressed.

Prerequisite: BUSI650.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUMK720 Marketing Strategy (3 Credits)

Introduces students to the fundamentals of marketing. This course combines lectures, readings, case analyses and a competitive simulation. A significant part of the course involves a competitive computer-based simulation in which student teams leverage marketing data and metrics to make marketing decisions for an organization that is competing in a market against other student teams in the class.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

Credit Only Granted for: BUMK758B or BUMK720.

Formerly: BUMK758B.

BUMK722 Customer Equity Management (2 Credits)

Focuses on managing customers of a business, whether in B2B or B2C space, as a portfolio of equity; understanding the current and future value of customers to the business; selective acquisition, development, and retention of customers using latest developments in information technology.

Prerequisite: BUSI650.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUMK722 or BUMK750.

BUMK724 Customer Analysis (3 Credits)

Focuses on the analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework used is the buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758D or BUMK724.

Formerly: BUMK758D.

BUMK726 Statistical Programming for Customer Analytics (3 Credits)

Provides students with a foundation in probability and statistics with a focus on business applications. It also gives students a foundation for thinking in both likelihood and Bayesian frameworks. The course teaches students the basics of SAS, as well as its use in statistical analysis and statistical programming. Also addressed are basic SAS language structure, data management, OLAP, enterprise miner, statistical analysis, writing procedures.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758E or BUMK726.

Formerly: BUMK758E.

BUMK731 Business-to-Business Marketing (2 Credits)

Focus is large fraction of marketing activity directed at organizational customers (businesses, non-profits and government). Marketing strategies, tactics and analytical tools most relevant when marketing to organizational customers are covered. Readings, cases and term paper contribute to understanding how to build long term buyer/seller relationships. Course is appropriate for anyone interested in understanding relationships between organizations, including vertical strategic alliances.

Prerequisite: BUSI650.

BUMK736 Service Marketing and Management (2 Credits)

Examines special challenges service marketing poses for managers because of the intangible, heterogeneous nature of the product, and the critical role of customer contact employees in service delivery. Strategies for meeting these challenges are addressed. Topics include 1) customer relationship management, 2) the design and execution of the service delivery process, 3) the development and implementation of employee customer service skills, 4) the measurement and management of critical outcome variables, such as customer satisfaction, customer equity, and customer lifetime value, and 5) the role of emerging technology in customer service.

BUMK742 Marketing Analytics for Consulting (3 Credits)

The analysis of marketing data needed for profitable marketing decisions. Advanced methods of marketing analysis for marketing decisions, including choice and count data models, joint analysis of consumers choice, quantity and timing decisions, mixture and mixture regression models, and conjoint analysis, all using data-based cases and SAS software. Applications are in the areas of strategic marketing, marketing segmentation, eye tracking for advertising effectiveness, new product development, sales promotion analysis, pricing, design of marketing mix, and direct marketing.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758K or BUMK742.

Formerly: BUMK758K.

BUMK744 Marketing Research and Analytics (3 Credits)

Provides a review of primary data collection methods for marketing data. Students will learn how to design and implement effective confirmatory research. Both direct methods such as surveys and indirect methods such as experiments will be covered. In this hands-on course, students will design and conduct research with target customers, analyze the data, and then present their results to decision makers.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758L or BUMK744.

Formerly: BUMK758L.

BUMK746 Data Science for Customer Analytics (3 Credits)

An introduction to data science and the basic concepts of database management. The course also provides an overview of the various sources of in-house data that are available to many organizations. Students will learn how to work with click stream, scanner panel and social media data. Geo-demographic datasets will be discussed and explored, and techniques for data-fusion will receive ample attention.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758W or BUMK746.

Formerly: BUMK758W.

BUMK747 CRM Analytics (2 Credits)

Customer Equity Management and Customer Relationship Marketing focuses on selective acquisition, development and retention of customers aided by developments in information technology and analytics - databases, online channels, social media, mobile technologies, and marketing analytics - with the objective of increasing a firm's customer equity (firm's value). This course will focus on the conceptual foundations of customer equity and relationship management, their strategic implications, and implementations in both B-2-B and B-2-C contexts, especially in the emerging era of big data. The course will provide insights into the role of measuring and managing customer equity and customer loyalty using online and offline media and channels. The objective of the course is to examine the strategic and analytical aspects in equal measure so that participants will have a deeper understanding of the power of customer equity and customer analytics, and how to put it to work effectively using data, big or small.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith.

Credit Only Granted for: BUMK758R or BUMK747.

Formerly: BUMK758R.

BUMK750 Customer Equity Management (2 Credits)

Managing customers of a business, whether in B2B or B2C space, as a portfolio of equity. Understanding the current and future value of customers to the business. Topics include selective acquisition, development, and retention of customers using latest developments in information technology.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK722 or BUMK750.

BUMK757 Marketing Strategy (2 Credits)

A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.

Prerequisite: BUSI650.

Credit Only Granted for: BMGT757 or BUMK757.

Formerly: BMGT757.

BUMK758 Special Topics in Marketing (1-4 Credits)

Selected advanced topics in the various fields of graduate study in marketing.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits.

Formerly: BMGT798.

BUMK759 Independent Study in Marketing (1-6 Credits)

Independent study for Masters students in Marketing.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUMK760 Business Policies and Ethics (2 Credits)

The standards of business conduct, morals and values as well as the role of business in society. Students will consider the sometimes conflicting interests of and claims on the firm and its objectives.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758F or BUMK760.

Formerly: BUMK758F.

BUMK762 Business Communication I (1 Credit)

A study of the standards of business conduct, morals and values as well as the role of business in society. Students will consider the sometimes conflicting interests of and claims on the firm and its objectives.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758H or BUMK762.

Formerly: BUMK758H.

BUMK764 Business Communications II (1 Credit)

Teaches students how to communicate quantitative information effectively. Focuses on developing written, spoken and presentation skills.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758G or BUMK764.

Formerly: BUMK758G.

BUMK766 Digital Analytics (2 Credits)

Examines the process of developing, implementing and analyzing strategies for successfully marketing a variety of existing and potential products and services on the Internet. Special attention is devoted to the tools and techniques unique to the electronic media.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758N or BUMK766.

Formerly: BUMK758N.

BUMK770 Retail Analytics (2 Credits)

Planning and implementing retail marketing strategies often involve sophisticated analytics. This course will teach the analytical tools needed to develop retail strategies. Both store and non-store (catalog, Internet) retailing are discussed. Also, students will learn how to evaluate the impact of environmental trends in the consumer market, competition, the economy and technology on retail strategy in the U.S. and global market.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758M or BUMK770.

Formerly: BUMK758M.

BUMK772 Innovation Analytics (2 Credits)

The economic success of many firms depends on their ability to accurately identify needs of their customers and efficiently innovate – i.e., develop new products, new services, or new processes – in order to meet those needs. Achieving this goal is a multi-disciplinary initiative. In this course, we focus on key analytics driven decisions faced by managers when approaching this important task of innovation from the customer centric perspective of a marketer.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758Y or BUMK772.

Formerly: BUMK758Y.

BUMK773 Pricing Analytics and Strategies (2 Credits)

The economic and behavioral aspects of pricing and the evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing. The course will cover both B2B, B2C, online and offline markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises, practitioner guest lectures and discussions.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758J or BUMK773.

Formerly: BUMK758J.

BUMK774 Market Forecasting (2 Credits)

Market forecasting methods for different contexts. Focus on quantitative modeling techniques based on established statistical methods. Non-statistical methods used when empirical data is scarce. This is a very hands-on class where students will apply the forecasting methods learned to real data.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758A or BUMK774.

Formerly: BUMK758A.

BUMK776 Action Learning Project (2 Credits)

Students analyze marketing data, report their findings and provide appropriate recommendations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK758Q or BUMK776.

Formerly: BUMK758Q.

BUMO - Management and Organization

BUM0702 Managerial Staffing (3 Credits)

Aimed at increasing an understanding of the legal, technical, and practical issues involved in organizational staff forecasting, and hiring and termination procedures.

Credit Only Granted for: BMGT783 or BUM0702.

Formerly: BMGT783.

BUM0704 Problems and Applications in Human Resource Management (3 Credits)

Applications in the design, implementation, and evaluation of human resource management programs. Experiential learning activities and simulations.

Prerequisite: BUSI663.

Credit Only Granted for: BMGT761 or BUM0704.

Formerly: BMGT761.

BUM0714 Competitive and Collaborative Negotiation (2 Credits)

Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.

Corequisite: BUM0715.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUM0714 or BMGT700.

BUM0715 Advanced Negotiation Challenges (2 Credits)

Practice negotiations using multiple media (email, phone). Multiple party negotiations. Cross-cultural negotiations.

Corequisite: BUM0714.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUM0720 Understanding Organizational Change (2 Credits)

Develops the fundamental change knowledge and skills of MBA students who plan to work with organizations as change agents, whether internally as managerial employees or externally as outside consultants. Draws on literatures from organizational behavior, human resource management and strategic management to identify models as prescriptions of change.

Prerequisite: BUSI664 or BUSI662.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUM0722 Organizational Behavior: A Multicultural Perspective (3 Credits)

Study of organizational behavior from a multicultural perspective.

Credit Only Granted for: BMGT765 or BUM0722.

Formerly: BMGT765.

BUM0725 Networks and Influence (2 Credits)

Focuses on networks, social capital, and influence as they relate to operating effectively in organizations. It draws heavily on emerging literature related to social capital and networks, but also integrates concepts from persuasion, communication, and motivation literatures to aid your efforts to build a successful track record for yourself and your organization.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUM0725 or BULM732.

BUM0727 The Entrepreneur and the Entrepreneurial Team (3 Credits)

The entrepreneur and the entrepreneurial team: the entrepreneur and the team as it relates to innovation, change, power, and risk-taking. Entrepreneurs and their teams from a variety of different firms present and discuss their views on leadership.

Prerequisite: Completion of MBA core requirements; and permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT781 or BUM0727.

Formerly: BMGT781.

BUM0732 Entrepreneurship and New Ventures (2 Credits)

Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.

Credit Only Granted for: BUM0732 or BUSI660.

Formerly: BMGT780.

BUM0743 Technology Transfer Commercialization Strategies (3 Credits)

Viewing technology as a strategic resource of the firm, students develop an understanding of the processes, risks, and rewards of technology commercialization. Student teams are organized to review and select a technological innovation and then determine its commercial viability in the market place.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BMGT785 or BUM0743.

Formerly: BMGT785.

BUM0744 Creation of High Potential Ventures (3 Credits)

This course focuses on the real life experiences of high profile technology entrepreneurs. Guest entrepreneurs and book review reveal patterns of personal preparation, strategic decision-making, and action that have produced ventures with high value-added and significant regional and national impact.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BMGT787 or BUM0744.

Formerly: BMGT787.

BUM0748 Business Plan Review (3 Credits)

Evaluation of real business plans submitted to the Dingman Center for Entrepreneurship. Practicing venture capitalist and professors focus on business plan critique and writing skills, venture capitalist screening practices, and the structure of electronic commerce. Past business plan reviews are analyzed according to the business model, target market, competitive advantages/threats, stage of development, management team and financial status. Real investment decisions are made on the basis of student recommendations. Subject companies are contacted and evaluated.

Repeatable to: 6 credits.

Formerly: BMGT796.

BUM0751 Implementing Strategy: Organizing to Compete (2 Credits)

Organizational dynamics of competitive advantage. Impact of alternative organizational structures, planning and control systems, human resource management practices, and executive leadership styles on the implementation of archetypically different strategies.

Prerequisite: Must have completed or be concurrently enrolled in BUSI690. And must have completed MBA core requirements; or permission of BMGT-Robert H. Smith School of Business.

BUM0752 Strategic Growth for Emerging Companies (2 Credits)

Explores the key elements of mastering the move from being a successful small company to achieving industry significance. Supplemented by readings, video and guest speakers, the course highlights the application of practical lessons leading to strategic growth and subsequent emergence as a player.

Restriction: Must be in Business and Management (Master's) program.

BUM0753 Emerging Business Formation (2 Credits)

Business formation issues, legal obligations that affect entrepreneurial activities, the spectrum of financing methods available to emerging businesses, creating management and organization and a practical application of the tools through practical projects.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUM0754 Global Strategy (2 Credits)

Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?

Credit Only Granted for: BUSI674, BUM0754, or BMGT710.

BUM0756 Industry Analysis (2 Credits)

Conceptual framework and analytical tools for understanding the dynamics of industry structure. Impacts of past and future attractiveness of the industry on profitability. Developing and applying frameworks to devise competitive strategies in uncertain industries.

Recommended: BUSI690.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BMGT792 or BUM0756.

Formerly: BMGT792.

BUM0757 Competitor Analysis (2 Credits)

Understanding of the dynamics of how competitors interact in the marketplace. Understanding economic and behavioral motivations of industry players to design more effective strategies.

Recommended: BUSI690.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUM0758 Special Topics in Management and Organization (1-4 Credits)

Selected advanced topics in the various fields of graduate study in management and organization.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUM0759 Independent Study in Management and Organization (1-6 Credits)

Independent study for Masters students in management and organization.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUM0761 Creativity for Business Leaders and Entrepreneurs (2 Credits)

Examines the concept of creativity as it applies in today's and tomorrow's complex business environment. An overview of the cognitive foundations of creativity, examines many of the preconceived notions about creativity in business and discusses multiple ways in which creativity can help business leaders and entrepreneurs to succeed. Topics include creativity techniques for groups and individuals, creativity as a foundation to recognize business opportunities and develop innovative products and services, selecting ideas and making them stick, mental and organizational obstacles to creativity as well as an overview of electronic tools to increase creative capability.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI661 or BUM0761.

Formerly: BUSI661.

BUM0767 Cross-Cultural Communication and Teamwork (2 Credits)

Provide managers a sound basis for developing such competencies. Specifically, we will develop an understanding of key cultural differences, and how these differences influence the management of individuals, groups, and organizations.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI667 or BUM0767.

Formerly: BUSI667.

BUM0794 Essentials of Negotiation (2 Credits)

This highly experiential course will improve students' negotiation skills and capacity to acquire and effectively use bargaining power. By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, the class will increase students' negotiating self-confidence and improve their capacity to claim value and achieve win-win solutions to individual, team, and organizational problems. The course is designed to enhance students' negotiating self-confidence and improve students' analytical and decision-making skills (e.g., understanding bargaining zones, knowing when an agreement can be made and when to walk away; learning how to prepare for negotiations), interpersonal skills, creativity (e.g., identifying creative solutions to conflict), and persuasive abilities.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUM0794 or BUAC723.

BUM0796 Leadership and Human Resource Management for Accountants and Auditors (3 Credits)

Develops the concepts, frameworks, and skills that are important to be effective leaders and to successfully manage human resources.

Topics for discussion include: Creating a motivating and empowering environment; leadership attributes, power and effective influence; building effective decision-making; strategic management of human resources; specification of the skills and competencies requisite for job success; recruiting and selecting employees to fit the job and the organization; measuring, appraising and improving performance. All of the topics selected for discussion are critical ones that every professional needs to know, regardless of functional area (not just HR professionals), and will help students become more effective consultants, managers and leaders.

Restriction: Must be in Business and Management (Master's) program.

Credit Only Granted for: BUM0796 or BUAC725.

BUSI - Part-Time MBA Program

BUSI600 Fundamentals of Business Decision Making (2 Credits)

Introduces students to the language of business. Topics covered include financial accounting, financial management, data models, strategy, leadership and teamwork, and a brief action learning project on innovation.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

Additional Information: Pre-work includes the DISC assessment, and a requires a passing grade on a spreadsheet pre-work course.

BUSI604 Business Communication (2 Credits)

Develop the ability to communicate with and about data.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI608 ELM: Special Topics (0 Credits)

Selected advanced topics in the various fields of graduate study in business and management.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Formerly: BMGT608.

BUSI610 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BUSI611 Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Prerequisite: BUSI610.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI611, BUAC616, or BMGT616.

BUSI621 Digital Transformation in Business (2 Credits)

Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.

Restriction: Must be in Business and Management (Master's); or permission of BMGT-Robert H Smith.

Credit Only Granted for: BUSI621 or BUSO620.

BUSI622 Managing Digital Business Markets (2 Credits)

The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUSI630 Data Driven Decision Making (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI631 Data Driven Decision Making II (2 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI634 Operations Management (2 Credits)

Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI634 or BMGT624.

BUSI640 Corporate Finance (2 Credits)

Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI641 Corporate Finance II (2 Credits)

Builds on the concepts and analytic methods covered in Corporate Finance I. Students will learn about the structure of financial markets, the financing and payout choices of large and small corporations, and the role of risk management in the corporation. In particular, the following issues will be addressed: The drivers of shareholder value; Corporate financing alternatives and the design of a company's capital structure; Coordinating investment, financing and payout policies; Corporate Finance Issues for Start-up firms; Key issues in international corporate finance.

Prerequisite: BUSI640.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI650 Marketing Management (2 Credits)

Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI650 or BMGT612.

BUSI662 Leadership and Teamwork (2 Credits)

Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BMGT600, BUSI662, or BUSM600.

BUSI672 Global Supply Chain Management (2 Credits)

Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI672 or BMGT740.

BUSI673 International Economics for Managers (2 Credits)

Focuses on understanding critical aspects of the global business environment that influence firm decisions and behavior. Globalization is present in market competition, capital markets, and managerial talent as evidenced by free trade areas and economic unions forming, the volatility in global financial markets, and the continued rise of transnational firms. With globalization, the challenge for firms is to acknowledge, understand and act when appropriate - to act by sourcing, lobbying, and relocating value chain activities internationally.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI681 Managerial Economics and Public Policy (2 Credits)

Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI681 or BMGT604.

BUSI683 The Global Economic Environment (2 Credits)

Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI690 Strategic Management (2 Credits)

Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintains the proper scale and scope to compete effectively over time.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Credit Only Granted for: BUSI690 or BMGT614.

BUSI698 MBA Consulting Project (3-6 Credits)

Experiential research project in the identification of management problems, the evaluation of alternative solutions, and the recommendation for management.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

Repeatable to: 9 credits if content differs.

Formerly: BMGT698.

BUSI700 Financial Statement Analysis (2 Credits)

Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. This involves understanding and using the information that financial statements are communicating to users.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI702 Strategic Growth for Emerging Companies (2 Credits)

Explores the key elements of mastering the move from being a successful small company to achieving industry significance. Supplemented by readings, video and guest speakers, the course highlights the application of practical lessons leading to strategic growth and subsequent emergence as a player.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI710 Competitive and Collaborative Negotiation (2 Credits)

Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI711 Industry Analysis (2 Credits)

Conceptual framework and analytical tools for understanding the dynamic of industry structure. Impacts of past and future attractiveness of the industry on profitability. Developing and applying frameworks to devise competitive strategies in uncertain industries.

Recommended: BUSI690.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI712 Entrepreneurship and New Ventures (2 Credits)

Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI713 Global Strategy (2 Credits)

Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert , H. Smith School of Business.

BUSI714 Innovation Management (2 Credits)

Designed to give students a broad view on issues related to the management of innovations. Covers both external dynamics of innovations and internal management activities, with special emphasis on knowledge development and learning processes within organizations.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI718 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 15 credits if content differs.

BUSI721 Creativity for Business Leaders and Entrepreneurs (2 Credits)

Examines the concept of creativity as it applies in today's and tomorrow's complex business environment. An overview of the cognitive foundations of creativity, examines many of the preconceived notions about creativity in business and discusses multiple ways in which creativity can help business leaders and entrepreneurs to succeed. Topics include creativity techniques for groups and individuals, creativity as a foundation to recognize business opportunities and develop innovative products and services, selecting ideas and making them stick, mental and organizational obstacles to creativity as well as an overview of electronic tools to increase creative capability.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI730 Marketing Research Methods (2 Credits)

The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.

Prerequisite: BUSI650 and BUSI630.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI731 Managing Brands and Products (2 Credits)

Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.

Prerequisite: BUSI650.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert , H. Smith School of Business.

BUSI732 Consumer Behavior (2 Credits)

Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.

Prerequisite: BUSI650.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI734 Digital Marketing (2 Credits)

It has been a quarter century since the commercial use of the Internet and the World Wide Web began and during that time the business landscape has changed at a frenetic pace. Large multinational corporations such as Alphabet/Google, Facebook, Amazon, Alibaba and eBay, unheard of twenty years ago, have emerged as key players in our modern economy. In 2017 holiday season, online sales increased over 16 percent of overall spending online in 2016 with online retail spending in the U.S., the highest percentage since tracking began in 1999. Sales made through mobile devices have increased at a rapid rate to around 22 to 40 percent of all online sales. Corporations now highlight the importance of creating a digital relationship with customers. Moreover, digital technologies and devices such as smartphones, smart products, the Internet of Things, Artificial Intelligence, and deep learning all promise significant transformations of consumers lives in the near future. It is against this backdrop this course seeks to understand how the developments in digital technology are re-shaping the process and the strategy of marketing in the broad space we call digital marketing.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI735 Advanced Marketing Analytics (2 Credits)

Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI736 Pricing Strategies for Sustainable Competitive Advantage (2 Credits)

Pricing is one of the most important marketing decisions a firm faces. This course will help participants to develop pricing strategies using actual proven concepts, processes and techniques, to align pricing strategies with corporate goals and objectives, to determine the value customers assign to products and services using competitive pricing analysis, and to optimize pricing using customer segmenting strategies. The course will focus on both economic and behavioral aspects of pricing, and evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing, covering both B2B and B2C markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises and discussions. The course will provide participants with an in-depth understanding of state-of-the-art pricing strategies, practices and techniques for making profitable and sustainable pricing decisions.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI737 Innovation & Product Development (2 Credits)

Focuses on the development of innovations, new products or new services from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI740 Valuation in Corporate Finance (2 Credits)

An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, discounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI741 Financial Strategy for Corporations (2 Credits)

Advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI742 Entrepreneurial Finance and Private Equity (2 Credits)

Advanced course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI743 Applied Equity Analysis (2 Credits)

Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI744 Derivative Securities (2 Credits)

Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI745 Fixed Income Analysis (2 Credits)

Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.

Prerequisite: BUSI640.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI746 International Investment (2 Credits)

Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategy.

Prerequisite: BUSI640.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI751 Decision Analytics (2 Credits)

Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.

Prerequisite: BUSI630.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI752 Data Mining and Predictive Analytics (2 Credits)

Data mining techniques and their use in business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, classification, prediction, time series forecasting, and clustering.

Prerequisite: BUSI630.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI754 Social Media and Web Analytics (2 Credits)

Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services using electronic media. Besides well-established Internet marketing tools such as e-mail, search engines and display advertising, a substantial part of the course is dedicated to understanding social media, analyzing successful social media strategies, and tracking their effectiveness. The course offers hands-on experience with many popular as well as emerging techniques unique to electronic media. Special attention is given to metrics appropriate for the new media.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI756 Managing Supply Chains: Models & Analysis (2 Credits)

Focuses on the strategic aspects of operations and supply chain management. Uses a framework for developing an operations strategy, and identify and analyze the key operations decisions which can have a major impact on a company's competitive position.

Prerequisite: BUSI630 and BUSI634.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI757 Pricing and Revenue Management (2 Credits)

Pricing is one of the most important and challenging business decisions with short-run and longrun implications. A specialized course on pricing and revenue management (PRM) is meant to provide you with the right bundle of tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. The topics covered in this course include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, using capacity controls in pricing, mark-down pricing, legal and ethical issues in pricing, B2B pricing, analysis of pricing processes, and applications of PRM in various industries. Emphasis is on both analytical models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in PRM.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI758 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUSI759 Independent Study in Business (1-6 Credits)

Independent study for Masters students in Business.

Repeatable to: 6 credits if content differs.

Formerly: BMGT708.

BUSI761 The Environment of International Business (2 Credits)

The international business environment as it affects company policy and procedures. In-depth analysis and comprehensive case studies of the business functions undertaken in international operations.

Credit Only Granted for: BMGT794 or BUSI761.

Formerly: BMGT794.

BUSI764 Business Law for Managers (2 Credits)

Survey of United States legal institutions and processes as well as substantive areas of the law that affect business. Examination of tort and contract law, the legal forms of business organization and legal liability and major regulatory laws that affect business.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI764 or BUAC721.

BUSI771 New Venture Financing (2 Credits)

Development of skills for financing new ventures (both small and potentially large). Exploration of various funding sources. Criteria used in evaluation and decision process, including commercial banks, venture capital companies, small business investment companies, underwriters, private placement-financial consultants, mortgage bankers, and small business innovative research grants (U.S. Government).

Prerequisite: BUSI640; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT740 or BUSI771.

Formerly: BMGT740.

BUSI781 Marketing Emergent Technology (1 Credit)

The many challenges and best practices of successfully marketing emergent technologies. The course will begin with a discussion of past successes and failures in marketing emergent technologies; followed by a study of the effective approaches and frameworks that help technology managers identify and understand customer needs. We will then focus on analyzing how the identified customer needs can guide design and development of emergent technologies. We will subsequently turn our attention to understanding how to translate customer needs and market conditions into effectively positioning our emergent technologies, with the intent of maximizing success when going to market.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUSI782 Science and Technology Project Valuation (2 Credits)

The application of financial management principles and techniques to science and technology investments and research and development projects. It will enable technology managers to estimate return on investment of R&D projects, value technology assets, quantify risk and make sound replacement and upgrade decisions for S&T projects. By the end of the course, students will be able to build financial models and make presentations to senior executives explaining the value creation potentially arising from investments in R&D, new product development, as well as infrastructure necessary to sustain the enterprise.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI784 Systems Design, Development, Test and Evaluation (2 Credits)

Systems engineering approaches to the definition, design, development, implementation, integration, verification, and validation of successful systems. Particular focus will be placed on the critical collaboration needed between business leaders and IT leaders in the early stages of program definition and how to effectively leverage and assess business-driven enterprise, product, and program development. The course will cover contemporary product lifecycle phases and the systems engineering technical processes associated with research and product development organizations in industry and government. It will explore currently popular development methodologies such as incremental, spiral, evolutionary, lean, and agile and how these are driven by concept and requirements development, systems analysis and modeling, and system architecting and are measured by technology prototyping, research validation, technology testing, and program/product evaluation. The intent is exposure to the systems engineering processes and product/program lifecycle is to help technology management professionals align developmental efforts to business/mission strategy; help them to oversee, collaborate with, and evaluate technology development efforts; and help them navigate challenges of technology development and adoption and advance technologies more efficiently from concept to operational use.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI785 Project Management in Dynamic Environments (2 Credits)

Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUSI786 Technology Management Capstone Action Learning Project (2 Credits)

This course will function as an experiential practicum to apply the skills and learning outcomes accumulated throughout the Technology Management curriculum toward solving real-world problems and cases. Projects will be chosen and executed in teams, and when possible sponsored by student employers or school partners. Project selection and maturation will receive iterative faculty facilitation.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI787 Integrative Capstone (2 Credits)

Provide students with an integrative experience to utilize the functional tools amassed in the MBA program and acquire new knowledge in the areas of international business, business ethics and executive/leadership presence, provide students with the opportunity to work with multiple functional areas at a time to drive business growth and utilize cases to address domestic and international challenges, enabling you to sharpen your skills in utilizing several methods for adding economic value when expanding globally. Additionally, students will raise awareness of best practices in building executive/leadership presence, as functional knowledge and business expertise is not enough to ensure successful career progression.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI788 Introduction to Global Business Experience (1-2 Credits)

Introduction to the economic climate of the country and region, history, political influences on business landscape, and specific opportunities and threats of doing business in the destination country. Course is a prerequisite to short-term study abroad classes.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Repeatable to: 2 credits.

BUSI790 Healthcare Operations Management and Marketing (3 Credits)

Introduction to a variety of tools that have been used to minimize waste and create value in the healthcare sector. These tools can also be applied to organizations outside of the healthcare sector. This course will focus on two critical aspects marketing in the context of hospitals and other health delivery organizations: service quality and customer relationship management. This course provides insight into the critical strategic decisions that healthcare managers must make as they seek to improve the performance of their organizations and attract and retain customers.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI791 Research and Development Strategy and Process (2 Credits)

This course will educate technology management professionals on contemporary strategy, management approaches, and best-practices for research and development. The course will focus on private sector methods to manage technology programs, identify and specify technical requirements, communicate technology use and value, and assess new technologies and architectures. It will include instruction on technology scouting and assessing Technology Readiness Levels (TRLs). Through engagement with experts in creating and managing technology, students will also be exposed to human and behavioral factors that can influence technology adoption in the commercial and public sector.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI792 Health Informatics and Information Technologies (3 Credits)

Targeted at professionals, managers, and consultants in healthcare to develop their understanding of core health informatics knowledge, IT concepts and management skills. Students will learn about policies, standards and methods of information exchange, data quality, cloud computing, behavior and population management, personal data collection devices, and how these elements can come together as parts of systems.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI794 Current Topics in Healthcare Transformation (3 Credits)

Covers a range of topics selected to enhance students understanding of the current healthcare environment, strategic landscape, critical policy changes, and how to lead transformation in their organizations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI796 Health Economics and Financing (3 Credits)

Designed to provide managers and professionals with a comprehensive overview of topics related to the economics and financial aspects of healthcare. Students will gain a perspective of how the healthcare ecosystem works from an economics perspective. The knowledge will be helpful for better economic analysis and business management in healthcare.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI798 Global Business Experience (2-4 Credits)

Provides MBA students the opportunity to combine classroom learning and project research with seminars in a host country. The focus and locations visited will vary.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 6 credits if content differs.

BUSI799 Masters Thesis Research (1-6 Credits)

BUSM - Full-Time MBA Program

BUSM600 Leadership and Teamwork (2 Credits)

Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT600, BUSI662 or BUSM600.

BUSM602 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI610 or BUSM602.

BUSM604 Managerial Economics and Public Policy (2 Credits)

Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI681 or BUSM604.

BUSM606 Data Driven Decision Making (2-3 Credits)

Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI630 or BUSM606.

BUSM610 Financial Management (2-3 Credits)

Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI640 or BUSM610.

BUSM612 Marketing Management (2 Credits)

Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI650 or BUSM612.

BUSM614 Strategic Management (2 Credits)

Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintains the proper scale and scope to compete effectively over time.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI690 or BUSM614.

BUSM616 Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Prerequisite: BUSI610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI611 or BUSM616.

BUSM621 Digital Transformation in Business (2 Credits)

Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM622 Managing Digital Business Markets (2 Credits)

The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI622 or BUSM622.

BUSM624 Operations Management (2 Credits)

Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI634 or BUSM624.

BUSM626 The Global Economic Environment (2 Credits)

Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI683 or BUSM626.

BUSM701 Marketing Research Methods (2 Credits)

The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.

Prerequisite: BUSM606; and BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK701 or BUSM701.

Formerly: BUMK701.

BUSM702 Consumer Behavior (2 Credits)

Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK715 or BUSM702.

BUSM703 Marketing Strategy (2 Credits)

A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK757 or BUSM703.

BUSM704 New Product Development (2 Credits)

This course focuses on the development of innovations, new products or new services from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.

Prerequisite: BUSM612.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)); or permission of BMGT-Robert H. Smith School of Business.

BUSM705 Brand Management (2 Credits)

Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK716 or BUSM705.

BUSM706 Innovation & Product Development (2 Credits)

Focuses on the development of innovations - new products or new services - from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer-centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0758P or BUSM706.

BUSM708 Independent Study in Business (1-6 Credits)

Independent study for Masters students in Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 6 credits if content differs.

BUSM710 Advanced Marketing Analytics Models (2 Credits)

Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK706 or BUSM705.

BUSM711 Pricing Strategies for Sustainable Competitive Advantage (2 Credits)

Pricing is one of the most important marketing decisions a firm faces. This course will help participants to develop pricing strategies using actual proven concepts, processes and techniques, to align pricing strategies with corporate goals and objectives, to determine the value customers assign to products and services using competitive pricing analysis, and to optimize pricing using customer segmenting strategies.

The course will focus on both economic and behavioral aspects of pricing, and evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing, covering both B2B and B2C markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises and discussions. The course will provide participants with an in-depth understanding of state-of-the-art pricing strategies, practices and techniques for making profitable and sustainable pricing decisions.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM713 Market Forecasting (2 Credits)

Students will learn a number of market forecasting methods, each appropriate for different contexts. The majority of this course focuses on quantitative modeling techniques based on established statistical methods. We also cover non-statistical methods that are often used when empirical data is scarce. This is a very hands-on class where students will apply the forecasting methods learned to real data.

Prerequisite: BUSM606 and BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM714 Integrated Marketing Communications (2 Credits)

Marketing communications are a complex but critical component of marketing strategy. Topics include communication tools: advertising, sales promotions, corporation communications, one-on-one or direct marketing, public relations, internet communications, sponsorship/events marketing, and marketing communication plans: defining objectives, implementing the plan, and measuring communications effectiveness. Achieving integration in the content, look, and feel of all marketing communications is stressed.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK717 or BUSM707.

BUSM715 Digital Marketing (2 Credits)

It has been a quarter century since the commercial use of the Internet and the World Wide Web began and during that time the business landscape has changed at a frenetic pace. Large multinational corporations such as Alphabet/Google, Facebook, Amazon, Alibaba and eBay, unheard of twenty years ago, have emerged as key players in our modern economy. In 2017 holiday season, online sales increased over 16 percent of overall spending online in 2016 with online retail spending in the U.S., the highest percentage since tracking began in 1999. Sales made through mobile devices have increased at a rapid rate to around 22 to 40 percent of all online sales. Corporations now highlight the importance of creating a digital relationship with customers. Moreover, digital technologies and devices such as smartphones, smart products, the Internet of Things, Artificial Intelligence, and deep learning all promise significant transformations of consumers lives in the near future. It is against this backdrop this course seeks to understand how the developments in digital technology are re-shaping the process and the strategy of marketing in the broad space we call digital marketing.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM716 Social Media and Internet Marketing (2 Credits)

Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services using electronic media. Besides well-established Internet marketing tools such as e-mail, search engines and display advertising, a substantial part of the course is dedicated to understanding social media, analyzing successful social media strategies, and tracking their effectiveness. The course offers hands-on experience with many popular as well as emerging techniques unique to electronic media. Special attention is given to metrics appropriate for the new media.

Prerequisite: BUSM612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM731 Capital Markets (2 Credits)

Designed to deepen the foundations necessary to finance focused students, especially those intending to specialize in the quantitative areas of finance including investments, fixed income, and financial engineering.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN740 or BUSM731.

BUSM733 Valuation in Corporate Finance (2 Credits)

An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, discounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN750 or BUSM733.

BUSM735 Financial Strategy for Corporations (2 Credits)

An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN751 or BUSM735.

BUSM736 Corporate Risk Management (2 Credits)

Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN754 or BUSM736.

BUSM737 Applied Equity Analysis (2 Credits)

Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN760 or BUSM737.

BUSM738 Investment Fund Management (1-4 Credits)

Provides second-year Master in Business Administration students with the opportunity to apply the skills learned in finance classes to actual investment decisions through management of an investment fund.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; and permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 12 credits.

Credit Only Granted for: BUFN738 or BUSM738.

BUSM741 Financial Restructuring (2 Credits)

Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN752 or BUSM741.

BUSM743 Entrepreneurial Finance and Private Equity (2 Credits)

An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN755 or BUSM743.

BUSM744 Portfolio Management (2 Credits)

Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.

Prerequisite: BUSM610; and BUSM731.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUFN763 or BUSM744.

BUSM745 Derivative Securities (2 Credits)

Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.

Prerequisite: BUSM610.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM747 Financial Reporting & Analysis (2 Credits)

Uses authoritative professional pronouncements to examine advanced financial reporting issues. Examines complex problems in accounting and reporting; examples include pensions, taxes, interest rate swaps, derivative securities, international transactions, and international financial reporting. Takes a user-oriented perspective, and examines the ways in which financial accounting information is used by investors, analysts, and creditors. Examples include if users adjust for alternative accounting methods or for information that is recognized versus disclosed.

Prerequisite: BUSM602.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM750 Project Management in Dynamic Environments (2 Credits)

Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI785 or BUSM750.

BUSM751 Managing Supply Chains: Models & Analysis (2 Credits)

Focuses on the strategic aspects of operations and supply chain management. Uses a framework for developing an operations strategy, and identify and analyze the key operations decisions which can have a major impact on a company's competitive position.

Prerequisite: BUSM606 and BUSM624.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM752 Games of Strategy and Incentives (4 Credits)

Analysis of managerial decisions in strategic environments using tools from game theory; competition and cooperation in product markets; principal-agent model and the economics of incentives; analytical foundations of behavioral constructs such as reputation, commitment and credibility.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business. OR BUSM610; and BUSM604; and BUSM614.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM754 Competitive and Collaborative Negotiation (2 Credits)

Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0714 or BUSM754.

BUSM755 Organizational Change (2 Credits)

Develops the advanced knowledge and skills of MBA students who plan to work with organizations as change agents. Concrete and useful strategies, tools, and interventions for diagnosing organizational change situations, analyzing problems, and designing and implementing organizational change. Draws on literature from organizational behavior, human resource management and strategic management to identify models as prescriptions of change.

Prerequisite: BUSM600.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM757 Implementing Strategy: Organizing to Compete (2 Credits)

Organizational dynamics of competitive advantage. Impact of alternative organizational structures, planning and control systems, human resource management practices, and executive leadership styles on the implementation of archetypically different strategies.

Prerequisite: BUSM614.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0751 or BUSM757.

BUSM758 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Formerly: BMGT798.

BUSM761 Data Mining and Predictive Analytics (2 Credits)

Data mining techniques and their use in business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, classification, prediction, time series forecasting, and clustering.

Prerequisite: BUSM606.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT733 or BUSM761.

Formerly: BUDT733.

BUSM762 Decision Analytics (2 Credits)

Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.

Prerequisite: BUSM606.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT732 or BUSM762.

BUSM764 Pricing and Revenue Management (2 Credits)

Specialized course on pricing and revenue management (PRM) that provide students with tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. Topics covered include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, mark-down pricing, legal and ethical issues in models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in execution of PRM.

Prerequisite: BUSM606; and BUSM624.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT775 or BUSM764.

BUSM765 Social Media and Web 2.0 (2 Credits)

Over the past years, social computing technologies such as online communities, blogs, wikis, and social networking systems have become important tools for individuals to seek information, socialize with others, get support, collaborate on work, and express themselves. Increasingly, businesses are trying to leverage web 2.0 by using social computing technologies to communicate with customers, employees, and other business partners or to build new business models. This course will review concepts and principles related to web 2.0 and examine issues and strategies associated with business use of social computing technologies.

Prerequisite: BUSM621; or BUSM622.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT706 or BUSM765.

BUSM767 Process Improvement (2 Credits)

Provide you with the necessary knowledge, tools and real-world examples to improve any organizational process and help students understand how a supply chain works from the perspective of processes improvement using Lean and Six Sigma methods. Much of the focus will be on identifying where improvement opportunities reside, understanding and improving the flow of supply chain processes, and eliminating non-value activities using a wide arrange of tools.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM771 Leading Strategically (2 Credits)

Focus on the aspects of the firm that facilitate reaching strategic objectives. The firm is comprised of formal structures or architecture, routines and practices, and culture and norms that all need to be well-aligned to support your strategy. In particular, organizational alignment facilitates the development of innovative ideas, achieving operational efficiency, sustaining organizational growth, adopting new business models, achieving strategic change, and building organizational competence. Students will use several tools to assist in analysis, such as congruence analysis, the 7S model, network analysis, and design thinking. Focus on thinking systematically and analytically about managing an organization and leading strategically.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM773 Innovation & Entrepreneurship (2 Credits)

Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0732 or BUSM773.

BUSM775 Global Strategy (2 Credits)

Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0754 or BUSM775.

BUSM778 Introduction to Global Business Experience (1-4 Credits)

Introduction to the economic climate of the country and region, history political influences on business landscape, and specific opportunities and threats of doing business in the destination country. Course is a prerequisite to short-term study abroad classes.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 4 credits.

Credit Only Granted for: BUSI788 or BUSM778.

BUSM781 International Economics for Managers (2 Credits)

Focus on understanding critical aspects of international economics that influence firm decisions and behavior. While covering theoretic fundamentals of international trade and foreign direct investment, focus on the implications for managers from these international economic activities. Such forces of globalization create winners and losers, and consider how firms can take advantage of these asymmetries. The topical issues include: - international trade: trade theory, comparative advantage, production location, why and how government is involved in international trade, how government involvement affects trade - firms participating abroad: determinants of foreign direct investment, location choice, off-shoring, emerging multinationals, emerging markets.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM783 Global Supply Chain Management (2 Credits)

Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI672 or BUSM783.

BUSM784 Assessing and Managing Supply Chain Risks (2 Credits)

Supply chain managers are facing an increasingly volatile operating environment, with constant danger of trading community disruption from business, social and environmental risks. Students are provided with a working knowledge of both the core techniques of supply chain risk assessment and mitigation; as well as best practices in establishing formal corporate supply chain risk management programs. A semester-long X-Treme Supply Chain Simulation will enable students to gain hands-on experience in navigating a computer company through a complex and risky four quarters of global business operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM734 or BUSM784.

BUSM785 Global Supply Chain Resources Planning (2 Credits)

Provides students with an overall understanding of how firms use an advanced supply chain planning (ASCP) application as an integral part of their materials management process which includes such activities as production planning, materials requirements planning, and distribution requirements planning.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM742 or BUSM785.

BUSM786 Global Trade Logistics (2 Credits)

Acquaints students with managerial issues in international logistics and transportation, and provides students with an understanding of issues related to import/export management and the global marketplace.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM787 Supply Chain Management Experience (2 Credits)

Gain a hands-on experience with logistics and supply chain operations. Various supply chain management activities, ranging from transportation to warehousing, will be witnessed directly through a series of site visits and facility tours and explored in depth through directed company projects. Other supply chain management activities, such as purchasing and planning, will also be introduced throughout the semester.

Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM788 Global Business Experience (1-6 Credits)

Provides MBA students the opportunity to combine classroom learning and project research with seminars in a host country. The focus and locations visited will vary.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 8 credits if content differs.

BUSM798 Business Consulting (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 8 credits if content differs.

Credit Only Granted for: BUSM798 or BMGT798.

BUSO - Online MBA Programs

BUSO600 Leadership and Teamwork (2 Credits)

Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI662, BUSO600 or EMBA656.

BUSO601 Corporate Finance I (2 Credits)

Introductory course in corporate financial management. The course outlines the financial concepts and techniques used to evaluate corporate decisions. The topics include the time value of money, valuation of common securities, capital budgeting methods, and discounted cash flow. The objectives are to introduce the language and structure of finance and to develop the ability to analyze financial decisions.

Prerequisite: BUSO602.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO602 Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: EMBA610 or BUSO602.

BUSO603 Data Analysis (2 Credits)

Many different skills are required in arriving at informed managerial decisions. Among these are analytical and quantitative skills. Data Analysis is one in a sequence of two courses that seeks to develop these two important skills. More formally, the goals of this course are: to introduce basic statistical techniques: summarizing and presenting data; confidence intervals and hypothesis tests; regression analysis.; to implement these techniques using spreadsheets; and to become active users of data analysis in making managerial decisions.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO604 Managerial Economics and Public Policy (2 Credits)

Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: EMBA681 or BUSO604.

BUSO612 Marketing Management (2 Credits)

Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: EMBA757 or BUSO612.

BUSO614 Strategic Management (2 Credits)

Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintains the proper scale and scope to compete effectively over time.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI690, BUSM614 or BUSO614.

BUSO616 Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Prerequisite: BUSI610; or BUSO602; or BUSM602.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI611, BUSM616 or BUSO616.

BUSO620 Strategic Information Systems (2 Credits)

Use of information technology to achieve competitive advantage, efficient operations, and effective decision making. Analysis of functions of information technology and its impact on competitive strategy and organizational operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSO620, BUSI621, BUSM621 or EMBA620.

BUSO624 Operations Management (2 Credits)

Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI634, BUSM624 or BUSO624.

BUSO626 The Global Economic Environment (2 Credits)

Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI683, BUSM626 or BUSO626.

BUSO700 Fundamentals of Business (2 Credits)

This course introduces students to the language of business. Topics covered include financial accounting, financial management, data models, strategy, leadership and teamwork, and a brief action learning project on innovation. Pre-work includes the DISC assessment, and a requires a passing grade on a spreadsheet pre-work course.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSO701 Integrative Business Capstone (2 Credits)

This is an experiential course that involves an integrative business experience. This experience may be simulated through a software package or through content, speakers and events that are based in a realistic business setting. Students compete in teams. Each team makes decisions in areas such as human resources, compensation packages, geographic expansion through sales offices, debt versus equity financing, manufacturing and inventory management, marketing, including pricing, advertising and product design. The impact of each of these decisions flows through the three financial statements and results in financial outcomes and ratios that measure the success of each team. Additional metrics include stakeholders beyond investors such as employee morale, community engagement, and environmental impact. Students compete for financing and for customers. Multiple presentations are made by students during the simulation to explain their strategy, their tactics, and their planned investments.

Prerequisite: Students must have completed a minimum of 48 credit hours.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO702 Action Learning Project I (1 Credit)

The objective of the Action Learning Project I and II is for teams to identify and solve business problems that currently exist in organizations and in the process, to provide significant value to organizations and their stakeholders. The experience of solving business problems will both enable students to apply knowledge learned in core courses and to develop the wisdom, skills, and problem-solving capabilities of team members. This course is designed to promote independent learning. Faculty members will offer mini-modules on key themes such as team dynamics, client relations and consulting protocols but their primary role will be to facilitate the ALP process and serve as consultants to the student teams. Selecting the right project and defining it unambiguously sets the stage for the rest of the ALP process improvement or problem solving effort, ultimately leading to a relevant, value added and well-received deliverable. Poor problem selection creates longer-term problems for both ALP teams and the sponsoring organization and can reduce or impede the quality of your learning experience. For this reason, we will lay the foundation for the final selection of projects during this term (a) soliciting ideas from all students, and (b) offering feedback to identify and nurture the most promising ideas.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO703 Action Learning Project II (3 Credits)

The objective of the Action Learning Project I and II is for teams to identify and solve/dissolve business problems that currently exist in organizations and in the process, to provide significant value to organizations and their stakeholders. The experience of solving/dissolving business problems will both enable students to apply knowledge learned in core courses and to develop the wisdom, skills, and problem-solving capabilities of team members. This course is designed to promote independent learning. Faculty members will offer mini-modules on key themes such as organizational support, team dynamics and peer feedback, but their primary role will be to facilitate the ALP process and serve as consultants to the student teams.

Prerequisite: BUSO702.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO704 Ethical Leadership (2 Credits)

This course will examine business ethics issues across a variety of business contexts. You will learn to apply a number of ethical theories to business problems, primarily through case studies and discussion. The goal is for you to engage actively with the material and understand the complexity of many ethical dilemmas that businesses and business owners face. Often in ethics there is not one right answer; rather, businesses and individuals must wrestle with ethical principles that may compete and conflict with one another in arriving at a resolution. We will explore conflicts between personal values and organizational goals, ethics as part of a business strategy, and various ethical frameworks businesses may use in understanding and implementing ethical approaches to problems.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: EMBA678 or BUSO704.

BUSO705 Business Communications (2 Credits)

Develop the ability to communicate with and about data.

Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.

BUSO706 Organizational Change (2 Credits)

Develops the advanced knowledge and skills of MBA students who plan to work with organizations as change agents. Concrete and useful strategies, tools, and interventions for diagnosing organizational change situations, analyzing problems, and designing and implementing organizational change. Draws on literature from organizational behavior, human resource management and strategic management to identify models as prescriptions of change.

Prerequisite: BUSM600; or BUSO600; or BUSI662; or EMBA656.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSO706 or BUSM755.

BUSO711 Executive Powers and Negotiation (2 Credits)

Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUM0714, BUSM754 or BUSO711.

BUSO712 Entrepreneurship (2 Credits)

Introduces students to tools and skills needed to create and grow a successful new venture. The course integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects teach skills to explore high-risk business ideas in inexpensive ways and allow students to experience the entrepreneurial environment. A startup is an organization formed to search for a repeatable and scalable business model (Steve Blank). Entrepreneurship is about pursuing hunches about solutions to customer problems and thereby creating value. Testing these hunches requires getting customers to evaluate solutions. It is difficult to attract resources (either human or financial) before it is known if the hunch is correct, but testing hunches requires resources. This course provides iterative tools to solve this chicken and egg problem. We will also focus on specific skill building exercises, such as pitching and networking.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO713 Supply Chain Management (2 Credits)

Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI672, BULM720 or BUSO713.

BUSO714 International Business (2 Credits)

The international business environment as it affects company policy and procedures. In-depth analysis and comprehensive case studies of the business functions undertaken in international operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT794, BUSI761 or BUSO714.

BUSO716 Decision Modeling (2 Credits)

Many different skills are required in arriving at informed managerial decisions. Among these are analytical and quantitative skills. Decision Modeling is one in a sequence of two courses that seeks to develop these two important skills. More formally, the goals of this course are: to introduce business optimization modeling techniques to aid in complex decision making environments, decision trees to structure strategic decision making problems in an uncertain environment, and Monte-Carlo simulation to help analyze and assess the risk associated with decisions in an uncertain environment. We will demonstrate the use of all techniques in this course in a spreadsheet environment.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO731 Social Media and Web Analytics (2 Credits)

Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services using electronic media. Besides well-established Internet marketing tools such as e-mail, search engines and display advertising, a substantial part of the course is dedicated to understanding social media, analyzing successful social media strategies, and tracking their effectiveness. The course offers hands-on experience with many popular as well as emerging techniques unique to electronic media. Special attention is given to metrics appropriate for the new media.

Prerequisite: BUSM612; or BUSO612; or BUSI650.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK7580, BUSO731 or BUSM716.

BUSO732 Managing Digital Business Markets and Platforms (2 Credits)

The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUSI622, BUSM622 or BUSO732.

BUSO733 Data Mining and Predictive Analytics (2 Credits)

Data mining techniques and their use in business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, classification, prediction, time series forecasting, and clustering.

Prerequisite: BUSM606; or BUSO607; or BUSI630.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUDT733, BUSM761 or BUSO733.

BUSO740 Customer Equity Management (2 Credits)

This course focuses on managing customers of a business, whether in B2B or B2C space, as a portfolio of equity. It provides an understanding of the current and future value of customers to the business. Topics include selective acquisition, development, and retention of customers using latest developments in information technology.

Prerequisite: BUSI650; or BUSM612; or BUSO612.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK722, BUMK750 or BUSO740.

BUSO741 Consumer Behavior (2 Credits)

Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.

Prerequisite: BUSM612; or BUSO612; or BUSI650.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BUMK715, BUSM702 or BUSO741.

BUSO750 Global Trade Logistics (2 Credits)

Acquaints students with managerial issues in international logistics and transportation, and provides students with an understanding of issues related to import/export management and the global marketplace.

Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT773, BULM733 or BUSO750.

BUSO751 Supply Chain Risk Management (2 Credits)

Supply chain managers are facing an increasingly volatile operating environment, with constant danger of trading community disruption from business, social and environmental risks. Students are provided with a working knowledge of both the core techniques of supply chain risk assessment and mitigation; as well as best practices in establishing formal corporate supply chain risk management programs. A semester-long X-Treme Supply Chain Simulation will enable students to gain hands-on experience in navigating a computer company through a complex and risky four quarters of global business operations.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BULM734, BUSM784 or BUSO751.

BUSO752 Innovative Solutions to Supply Chain Challenges (2 Credits)

This course is designed to provide you with practical challenges to implement innovative and effective actions to achieve the goal of enhanced supply chain operations. You will be challenged to function as a supply chain executive in charge of major decisions. The course is designed to be a mix of action-focused learning combined with some very recent and interesting examples of how companies are addressing their own supply chain challenges in innovative ways.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO758 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BUSO759 Independent Study in Business (1-4 Credits)

Independent study for Masters students in Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: BUSO759 or BUSI759.

BUSO778 Global Business Experience (1-6 Credits)

Provides MBA students the opportunity to combine classroom learning and project research with seminars in a host country. The focus and locations visited will vary.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 8 credits if content differs.

BUSO780 Fraud Examination, Detection, and Deterrence in the Business Environment (2 Credits)

The world is full of fraud schemes, victims, schemers, and those who catch them. Business, the public sector, and non-profits have their bottom lines impacted every day by fraud. This class is about all of this, and is an introduction to fraud in the operational environment. The primary objective of this course is for students to gain a conceptual understanding of how fraud occurs, how it can be prevented, and how fraud can be detected through practical application of skills and tools. We will also briefly practice the skills needed for providing testimony in court as a lay or expert witness. This course addresses general background relating to fraud, delves into the myriad types of financial fraud, corruption, employee theft, cybercrime, identity theft, red collar crime, scams, and examines the trends in fraud detection and investigation. The goal is that, whether you become a fraud fighter, or continue in your management careers, you will leverage this course to prevent and detect fraud at your workplace.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO781 The Impact of Taxation on Business Entities (2 Credits)

Tax Strategies for Business Planning and Investment provides a study of how federal and state taxes affect business strategy. The course focuses on the taxation of business entities and transactions. Concepts of taxing jurisdictions, taxes as transaction costs, maxims of income tax planning and jurisdictional issues in taxation are reviewed with particular emphasis on their impact on business operations. The course examines the choice of business entity, examining the taxation of flow-through entities (partnerships, LLCs, and S corporations) and C corporations (separately taxed entities). The course also examines investment and personal financial planning.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSO782 Financial Planning and Control Systems for Managers and Consultants (2 Credits)

This course provides an analysis of several topics concerning financial planning/control systems (management accounting systems). Topics covered: design and use of cost management systems (including activity based costing systems), financial performance measures for enhancing firm value, managerial incentive contracts and accounting data, management accounting and Internet-based transactions, managing earnings and financial ratios, use of balanced scorecard to evaluate financial/nonfinancial managerial performance, management accounting systems and competitor analysis, behavioral aspects of budgeting, post-auditing of capital investments, accounting/economics aspects of information security, and transfer pricing.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business. Or BUSO616; and BUSO602.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT711 or BUSO782.

Formerly: BMGT711.

BUSO788 Business Consulting (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 8 credits if content differs.

Credit Only Granted for: BUSI788 or BUSO788.

BUSO798 Special Topics in Business (1-4 Credits)

Selected advanced topics in the various fields of graduate study in business.

Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

CBMG - Cell Biology & Molecular Genetics

CBMG613 Microbiomes in Health, Disease, and Application (2 Credits)

Investigation of microbiomes in human and animal health, disease, and industrial applications, with an emphasis on underlying functional mechanisms. No prior programming experience required.

CBMG626 Quantitative Modeling for Experimental Biologists (2 Credits)

A toolkit for understanding processes through the generation of useful models constrained by data. Topics explored include Simulations, Information Theory, Dynamical Systems, and Control Theory.

Prerequisite: BIOL705; or permission of the instructor .

Recommended: Some familiarity with programming (NetLogo, R and/or Python) is helpful.

CBMG688 Special Topics in Cell Biology and Molecular Genetics (1-4 Credits)

Presentation and discussion of fundamental problems and special subjects in the topics of Cell Biology and Molecular Genetics.

Formerly: MICB688.

CBMG699 Special Problems in Cell Biology and Molecular Genetics (1-3 Credits)

Emphasis is placed on research and discussion of current problems in the area of Cell Biology and Molecular Genetics.

Repeatable to: 10 credits if content differs.

Formerly: PBIO699.

CBMG789 Seminar in Cell Biology and Molecular Genetics (2 Credits)

Cell Biology and Molecular Genetics Department Seminar.

Repeatable to: 4 credits if content differs.

Formerly: MICB789.

CBMG799 Masters Thesis Research (1-6 Credits)

Master's Thesis Research in Cell Biology and Molecular Genetics.

CBMG898 Pre-Candidacy Research (1-8 Credits)

Pre-candidacy Research.

CBMG899 Doctoral Dissertation Research (1-8 Credits)

Doctoral Dissertation Research.

CCJS - Criminology and Criminal Justice

CCJS405 Gangs (3 Credits)

Provides students with a historical and contemporary examination of street and institutional gangs. We will address the nature and definition of gangs, types of gangs, and diversity of membership of gangs, theoretical explanations, and criminal and deviant behavior. In addition, we will analyze law enforcement responses, intervention and prevention strategies, and public policy issues.

Prerequisite: CCJS100 and CCJS105.

Credit Only Granted for: CCJS405 or CCJS498G.

Formerly: CCJS498G.

CCJS418 Seminar in Criminology and Criminal Justice (3 Credits)

Selected topics of interest in the field of Criminology and Criminal Justice will be covered.

Repeatable to: 18 credits if content differs.

CCJS428 Special Topics in Criminology and Criminal Justice (3 Credits)

Topics in various aspects of the field of criminology and criminal justice will be covered.

Repeatable to: 18 credits if content differs.

CCJS440 Security Administration (3 Credits)

Designed to introduce students to the complex issues of Security Administration and the critical terrorism issues facing the nation.

Emphasis is placed on understanding the historical and contemporary issues effecting U.S. Counterterrorism Policy. It also explores the challenges facing today's security administrators including: ethics, classified information, intelligence, terrorist organizations and incidents, physical and personnel security, transportation and border security issues.

Prerequisite: CCJS100 and CCJS340.

Credit Only Granted for: CCJS440 or CCJS498Z.

Formerly: CCJS498Z.

CCJS444 Advanced Law Enforcement Administration (3 Credits)

The structuring of manpower, material, and systems to accomplish the major goals of social control. Personnel and systems management. Political controls and limitations on authority and jurisdiction.

Prerequisite: CCJS100 and CCJS340.

CCJS450 Advanced Juvenile Delinquency (3 Credits)

Examination of juvenile delinquency in the United States. Nature and extent of juvenile delinquency, historical approaches, sociological and criminological theories and research, social contexts including the institutions of families, schools, and peers, and social responses. Prevention, punishment, and treatment programs, both within and outside of the juvenile justice and criminal justice systems.

Prerequisite: CCJS105 and CCJS300.

Credit Only Granted for: CCJS350 or CCJS450.

CCJS451 Crime and Delinquency Prevention (3 Credits)

Methods and programs in prevention of crime and delinquency.

Prerequisite: CCJS105 and CCJS300.

CCJS453 White Collar and Organized Crime (3 Credits)

Definition, detection, prosecution, sentencing and impact of white collar and organized crime. Special consideration given to the role of federal law and enforcement practices.

Prerequisite: CCJS300; and (CCJS350 or CCJS105).

CCJS454 Contemporary Criminological Theory (3 Credits)

Examination of the main theoretical accounts that explain the underlying causes of criminal behaviors. Explore how individual choices, socialization experiences, biological factors and social structure affect criminal behaviors.

Prerequisite: CCJS300 and CCJS105.

CCJS455 Dynamics of Planned Change in Criminal Justice I (3 Credits)

An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on the development of innovative ideas using a research and development approach to change.

Prerequisite: CCJS300.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS458 Special Topics in Study Abroad IV (3 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS460 Victim Advocacy (3 Credits)

Introduces the practice of victim advocacy as a profession. Students will develop an understanding of the impact of crime on the victim, and how crime impacts the path of the victim through the criminal justice and other administrative processes. A special emphasis of the course will be on introducing the students to different contexts of victim advocacy, e.g. system-based, campus-based, military-based, and community-based, as well as special topics impacting the profession of victim advocacy, e.g. grief, death notification, child protection, violence intervention, and trauma therapy. Students will also develop an understanding about how race, gender, age, sexual orientation, and ethnicity impact the way in which victims are offered and receive advocacy in different systems.

Prerequisite: CCJS100.

Recommended: CCJS360.

Credit Only Granted for: CCJS460 or CCJS498T.

Formerly: CCJS498T.

CCJS461 Psychology of Criminal Behavior (3 Credits)

Biological, environmental, and personality factors which influence criminal behaviors. Biophysiology and crime, stress and crime, maladjustment patterns, psychoses, personality disorders, aggression and violent crime, sex-motivated crime and sexual deviations, alcohol and drug abuse, and criminal behavior.

Prerequisite: CCJS105 and CCJS300.

CCJS489 Honors Thesis Research (3 Credits)

Designed for students completing their honors thesis.

Prerequisite: CCJS100 and CCJS105.

Restriction: Limited to CCJS Departmental Honors students.

Repeatable to: 6 credits.

CCJS498 Selected Topics in Criminology and Criminal Justice (3 Credits)

Topics of special interest to advanced undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest.

Repeatable to: 6 credits if content differs.

CCJS600 Criminal Justice (3 Credits)

Current concept of criminal justice in relationship to other concepts in the field. Historical perspective. Criminal justice and social control. Operational implications. Systemic aspects. Issues of evaluation.

Restriction: Must be in one of the following programs (Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral)); or permission of BSOS-Criminology & Criminal Justice department.

Formerly: CJUS600.

CCJS601 Policing (3 Credits)

An introduction to research, theory, and applications of the causes and consequences of police behavior. Community policing, problem-solving methods, police discretion, police misconduct, police crime prevention strategies, and restorative justice.

CCJS602 Courts and Sentencing (3 Credits)

Research and theory on prosecution, plea-bargaining, sentencing principles and guidelines, and sentencing policies in practice. Mandatory minimum sentencing, "three strikes" laws, race, gender and class disparities, general and specific deterrent effects of sentencing, restitution and restorative justice, diversion and sentencing to treatment.

CCJS604 Policy Analysis Project (3 Credits)

An application of statistical and conceptual tools to criminal justice data in the student's area of concentration, resulting in a paper reporting the conceptualization, analytic methods and results. The topic of the independent study will be chosen through individual consultation with the instructor.

CCJS605 Program Evaluation for Criminal Justice (3 Credits)

Designing, implementing and evaluating programs in criminal justice. Topics include diagnosing program needs, planning and tailoring evaluation programs, program monitoring, assessing program impact, program efficiency, and the social context of evaluation.

Credit Only Granted for: CCJS605 or CCJS609.

Formerly: CCJS609.

CCJS610 Research Methods in Criminal Justice and Criminology (3 Credits)

Examination of special research problems and techniques.

Formerly: CRIM610.

CCJS611 Statistical Tools for Criminal Justice (3 Credits)

An introduction to essential statistical concepts for analyzing crime and evaluating criminal justice policies. Interpreting crime trends and correlations, risk and conditional probability analysis for repeat offenders and hot spots of crime, time series analysis, experimental statistics, effect sizes, statistical power and significance.

CCJS613 Criminal Justice System in China (3 Credits)

The main contents of this course include: the overall characteristics of the Chinese judicial system, the horizontal comparison of the judicial system between China and the United States, the investigation system, the pre-trial detention system, the defense system, the prosecutorial system, the trial system, the sentencing system, the correction and community correction system, as well as the minor judicial system in the criminal justice system of China.

Restriction: Must be in the Criminology and Criminal Justice Professional Master's Program in Nanjing China.

Credit Only Granted for: CCJS678G or CCJS613.

Formerly: CCJS678G.

CCJS614 Criminal Law (3 Credits)

Chinese criminal law and its interpretation, principles, and methods.

Restriction: Students enrolled in the CCJS Masters Program in China.

Credit Only Granted for: CCJS614 or CCJS678F.

Formerly: CCJS678F.

CCJS615 Criminal Procedure Law (3 Credits)

This course is intended to introduce students to basic issues in China's criminal procedure law.

Credit Only Granted for: CCJS678E or CCJS615.

Formerly: CCJS678E.

CCJS616 International Law and Process (3 Credits)

International law in globalized world and its functions.

Restriction: Students in the CCJS Masters program in China.

Credit Only Granted for: CCJS616 or CCJS678D.

Formerly: CCJS678D.

CCJS620 Fundamentals of Criminological Research (3 Credits)

Designed to help criminology students understand and apply three important components of statistics: descriptive statistics (including probability theory), fundamentals of statistical inference, and regression analysis. Course assumes familiarity with basic descriptive statistics. The emphasis of the classes on descriptive statistics is the calculation and interpretation of summary statistical measures for describing raw data. Covers the basic rules of probability and different probabilistic processes that could describe criminal activity. The sessions on fundamentals of statistical inferences are designed to provide background for executing and interpreting hypothesis tests and confidence intervals. The latter portion of the course focuses on regression analysis. Uses the statistical software, Stata.

Credit Only Granted for: CCJS498D or CCJS620.

Formerly: CCJS498D.

CCJS621 General Linear Models in Criminal Justice Research (3 Credits)

An in-depth exploration of applied linear regression analysis. Covers characteristics of estimates, such as unbiasedness and efficiency. Encourages fluency with the theoretical issues involved in the basic linear regression using simple algebra, familiarity with the general model using matrix algebra, and fluency with the computer application of multivariate regressions and the probit/logit models.

Prerequisite: CCJS620.

Credit Only Granted for: CCJS498F or CCJS621.

Formerly: CCJS498F.

CCJS631 Ethics in Criminal Justice (3 Credits)

Provides students with an overview of the major ethical perspectives, which are typically used to inform and justify the workings of the criminal justice system. The course draws on a number of case studies in order to introduce students to a broad range of ethical dilemmas, and students develop and hone a decision-making process designed to resolve such dilemmas.

Restriction: Must be in one of the following programs: Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral); Sociology (Master's); Sociology (Doctoral); or permission from BSOS-Criminology & Criminal Justice department.

CCJS632 Making Sense of Criminal Justice Methods and Statistics (3 Credits)

Teaches students how to better understand research that relies on statistics and to then apply this understanding to common criminal justice problems. The course will introduce basic statistical concepts that are necessary for analyzing crime and evaluating criminal justice programs and policies. Students will learn to interpret and assess the quality of reports that present crime trends, descriptive statistics, correlations, data mining efforts, geo-spatial and social media analytics, risk analysis for repeat offenders, hot spots of crime, and experimental research. By the end of the semester, students will learn to assess critically the quality of published research and evaluate its implications for criminal justice policy.

Restriction: Must be in one of the following programs: Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral); Sociology (Master's); Sociology (Doctoral); Master of Professional Studies in Public Safety Leadership and Administration (MPLA); Graduate Certificate in Criminal Justice Administration (Z130); or permission from BSOS-Criminology & Criminal Justice department.

CCJS633 Translating Research into Practice (3 Credits)

Law enforcement policy and practice is increasingly "evidence based." This course will focus on understanding data sources and the fundamentals of research methodology, focusing on how data and methodological choices shape the conclusions that can be drawn. At the end of this course, students will be able to discern between research of good and poor quality and understand the crucial benefits of evaluation.

Prerequisite: CCJS632.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS635 Minorities and Criminal Justice (3 Credits)

Role minorities play in the criminal justice system: as victims, offenders and professionals. Also provides theoretical framework for examining these roles.

Prerequisite: CCJS600; or students who have taken courses with comparable content may contact the department.

CCJS651 Seminar in Criminology (3 Credits)

Analysis of significant recent issues in Criminology.

Formerly: CRIM651.

CCJS652 Seminar in Juvenile Delinquency (3 Credits)

Analysis of delinquency and its control.

Formerly: CRIM652.

CCJS653 Seminar in Corrections (3 Credits)

Development, operation and future of correctional systems.

Prerequisite: CCJS651; or students who have taken courses with comparable content may contact the department.

Formerly: CRIM653.

CCJS654 History of Criminological Thought (3 Credits)

A study of the development of criminological thought from antiquity to the present.

Prerequisite: CCJS454; or students who have taken courses with comparable content may contact the department.

Formerly: CRIM654.

CCJS660 Gender and Crime (3 Credits)

Assumptions, biases, and relative strengths and weaknesses of theories of crime as applied to women. Criminal justice sanctioning of crimes by and against women. The course will also explore occupational segregation by gender in criminal justice professions, particularly in the fields of policing, courts (attorneys and judges), and corrections (correctional officers and treatment staff).

CCJS661 Crime and the Life Course (3 Credits)

Designed to provide an intensive examination of crime and the life course. Life course is examined as a theoretical orientation, a research methodology, and an empirical field of study with special reference to crime and deviance. Course includes development of criminal behavior and criminal careers; stability and change in criminal behavior across developmental stages; trajectories, transitions, and turning points through life; quantitative and qualitative approaches to studying crime and the life course; and social change and its link to individual lives.

Credit Only Granted for: CCJS699J or CCJS661.

Formerly: CCJS699J.

CCJS663 Issues in Corporate Crime (3 Credits)

Overview of what is known about corporate crime and criminals (e.g.: similarities to and differences from other offenders and crime types; characteristics of offenders and victims; what counts as corporate crime; introduction to theoretical frameworks.) Readings and class materials will coalesce around specific issues about which there is much debate but scant empirical research. Discussions will center around what is known, what is not, what needs to be done and how.

Credit Only Granted for: CCJS699S or CCJS663.

Formerly: CCJS699S.

CCJS664 Regulating Vice and Regulating Organized Crime (3 Credits)

For this course, vice is defined as a habit with bad consequences that can generate large black markets if the market for supplying that habit is prohibited or heavily regulated. Vice is found in all modern societies, though in widely differing forms, depending on population characteristics, culture and law. Society's decision is how to regulate it, whether criminally or otherwise, and how then to assess whether the regulation is successful. This assessment has multiple components, including: choosing outcome measures; modeling counterfactuals for which the evidence is often very indirect and developing a framework for ensuring that comparisons reflect all relevant outcomes and values.

Credit Only Granted for: CCJS699V or CCJS664.

Formerly: CCJS699V.

CCJS667 Innovations in Policing: Programs, Policies and Research (3 Credits)

Examine the factors that have led to recent police innovations and recent innovations in the study of policing. Critically explores the effects of such policies on crime and disorder, on research practices, as well as unintended consequences on community, police abuse and police organization. Which policies have been found to be effective? What types of practices work most effectively for what type of crime and disorder problems? Has there been sufficient research for us to come to solid conclusions regarding these questions? Does present research fit the practices of the police?

Credit Only Granted for: CCJS667 or CCJS699W.

Formerly: CCJS699W.

CCJS670 Race, Crime, and Criminal Justice (3 Credits)

Provides an historical overview of the operation and evolution of the criminal justice system and the impact of race. How race affects definitions of crime and criminality, the workings of the criminal justice system, the development of criminological theory, and the role of criminal justice ethics in the study of race and crime will be considered.

CCJS671 Technology in Modern Policing (3 Credits)

Leaders in law enforcement must be able to effectively evaluate, deploy, and manage technology projects. This course covers state-of-the-art technologies used in everyday policing, as well as emerging and future technologies. Students evaluate technological solutions to public safety problems from a legal/policy and privacy/optics perspective, from a procurement and budgetary perspective, and from a technical perspective. Students learn the challenges and best practices associated with deploying major technology projects. This course covers the underlying technical aspects of these technologies at a high level, such that students are able to successfully make informed decisions.

CCJS678 Advanced Topics in Criminology and Criminal Justice (3 Credits)

An analysis of contemporary issues in criminology and criminal justice with special emphasis on research and theory developments.

Prerequisite: CCJS600.

Repeatable to: 12 credits if content differs.

CCJS680 Drugs and Crime (3 Credits)

The relationship between drug use and crime. Policy concerning drug control enforcement, prosecution and sentencing. impact of drug treatment in criminal justice Impact of drug treatment in criminal justice settings, drug courts, drug-testing strategies and surveillance of former drug abusers in the community.

CCJS699 Special Criminological Problems (1-3 Credits)

Supervised study of a selected problem in the field of criminal justice.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

Repeatable to: 6 credits.

Formerly: CJUS699.

CCJS700 Advanced Research Methods in Criminology and Criminal Justice (3 Credits)

An in-depth inventory of the methods of criminological research. It considers the philosophy of science and research ethics; discusses sampling, measurement and methods of data collection, including survey, experimental, evaluation, and qualitative research.

Prerequisite: CCJS610.

CCJS710 Advanced Statistics Methods - Limited Dependent Variables (3 Credits)

Application of advanced data analysis strategies to criminological and criminal justice problems, with specific focus on limited dependent variables.

Prerequisite: Must have completed an approved doctoral level statistics course.

Formerly: CRIM710.

CCJS711 Randomized Experiments in Criminology and Criminal Justice (3 Credits)

Contrast randomized designs with other approaches, examining both statistical, methodological, ethical and practical concerns. What are the statistical advantages of randomized experimental designs? Why do some researchers believe that randomized studies violate ethical standards in criminal justice? Why are experiments considered to have higher internal validity than non-randomized designs and how do different types of designs compare in terms of external validity? Focus on how experiments can be developed and how they are analyzed. What are the practical barriers to experimentation and how can they be overcome? What statistical methods are most appropriate for experimental analysis? How can block randomization or hierarchical modeling be used to develop more powerful or more practical research approaches?

CCJS712 Longitudinal Data Analysis with Latent Variables (3 Credits)

This course is designed for graduate students with an interest in the use of latent variables in longitudinal data analysis as it is conceptualized in the Mplus framework. This course explores more general features of latent variable analyses as they are related to longitudinal modeling. Topics to be covered include latent growth analysis with a combination of continuous and categorical latent variables as well as the inclusion of continuous and categorical variables as predictors and outcomes.

Credit Only Granted for: CCJS699F or CCJS712.

Formerly: CCJS699F.

CCJS720 Criminal Justice System Planning: Policy Analysis for Crime Control (3 Credits)

System theory and method; examination of planning methods and models based primarily on a systems approach to the operations of the criminal justice system.

Prerequisite: Must have completed 1 course in research methodology; and 1 course in CCJS.

Formerly: CJUS720.

CCJS799 Master's Thesis Research (1-6 Credits)

Formerly: CRIM799.

CCJS898 Pre-Candidacy Research (1-8 Credits)**CCJS899 Doctoral Dissertation Research (1-8 Credits)**

Doctoral dissertation research in criminal justice and criminology.

Formerly: CRIM899.

CHBE - Chemical and Biomolecular Engineering

CHBE409 Undergraduate Honors Seminar (1 Credit)

Students will attend and write summaries of departmental seminars, along with professional development activities

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and Permission of ENGR-Chemical & Biomolecular Engineering department; and Must be in the Chemical Engineering Honors Program.**Repeatable to:** 2 credits.**CHBE410 Statistics and Design of Experiments (3 Credits)**

An introduction to probability, statistics, and design of experiments for chemical engineers.

Prerequisite: Minimum grade of C- in CHBE250, MATH241, and MATH246.**Restriction:** Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE410 or ENCH476.

Formerly: ENCH476.

CHBE422 Chemical and Biomolecular Engineering Transport Phenomena I (3 Credits)

Principals of fluid dynamics as applied to model development and process design. Mass, momentum and energy conservation. Statics and surface tension. Equation of Continuity and Navier-Stokes Equation with application to laminar flow. Dimensional analysis. Macroscopic balances, Bernoulli Equation and friction factors with application to turbulent flow.

Prerequisite: Minimum grade of C- in CHBE101, CHBE250, MATH241, and MATH246.**Restriction:** Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE422 or ENCH422.

Formerly: ENCH422.

CHBE424 Chemical and Biomolecular Engineering Transport Phenomena II (3 Credits)

Principles of mass and heat transfer as applied to model development and process design. Species continuity equation with application to diffusion, and convection in laminar flow. Macroscopic balances and mass transfer coefficients with application to turbulent flow. Microscopic equation of energy with application to heat conduction, and convection in laminar flow. Macroscopic energy balance and heat transfer coefficients with application to turbulent flow. Heat exchanger design.

Prerequisite: CHBE422.**Corequisite:** CHBE302.**Restriction:** Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE424 or ENCH424.

Formerly: ENCH424.

CHBE426 Chemical and Biomolecular Separation Processes (3 Credits)

Separation by stages operations. Rate dependent separation processes. Design application in distillation, gas absorption, liquid extraction, drying, adsorption and ion exchange.

Corequisite: CHBE302; and CHBE424.**Restriction:** Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE426 or ENCH426.

Formerly: ENCH426.

CHBE437 Chemical and Biomolecular Engineering Laboratory (3 Credits)

Application of chemical engineering process and unit operation principals in small-scale semi-commercial equipment. Data from experimental observations are used to evaluate performance and efficiency of operations. Emphasis on correct presentation of results in report form.

Prerequisite: CHBE424, CHBE426, and CHBE440.**Restriction:** Must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE437 or ENCH437.

Formerly: ENCH437.

CHBE440 Chemical Kinetics and Reactor Design (3 Credits)

Fundamentals of chemical reaction kinetics and their application to the design and operation of chemical reactors. Reaction rate theory, homogeneous reactions and catalysis electrochemical reactions. Catalytic reactor design.

Prerequisite: Minimum grade of C- in CHBE301, MATH241, and MATH246.**Restriction:** Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE440 or ENCH440.

Formerly: ENCH440.

CHBE442 Chemical and Biomolecular Systems Analysis (3 Credits)

Dynamic response applied to process systems. Goals and modes of control, Laplace transformations, analysis and synthesis of simple control systems, closed loop response, dynamic testing.

Prerequisite: CHBE424 and CHBE426.**Credit Only Granted for:** CHBE442 or ENCH442.

Formerly: ENCH442.

CHBE444 Process Engineering Economics and Design I (3 Credits)

Principles of chemical engineering economics and process design. Equipment sizing and costing. Economic evaluation of projects. Flowsheet synthesis. Introduction to flowsheet simulators and concepts of flowsheet optimization. Synthesis of Heat Exchanger Networks and Distillation Sequences.

Prerequisite: CHBE424, CHBE426, and CHBE440.**Restriction:** Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE444 or ENCH444.

Formerly: ENCH444.

CHBE446 Process Engineering Economics and Design II (3 Credits)

Application of chemical engineering principles for the design of chemical processing equipment. Representative problems in the design of chemical plants will be the focus of this capstone design class. Comprehensive reports are required.

Prerequisite: CHBE442 and CHBE444.**Restriction:** Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.**Credit Only Granted for:** CHBE446 or ENCH446.

Formerly: ENCH446.

CHBE451 Photovoltaics: Solar Energy (3 Credits)

The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.

Jointly offered with: CHBE651.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468L, CHBE451 or CHBE651.

Formerly: ENCH468L.

CHBE452 Introduction of Machine Learning in Chemical Engineering (3 Credits)

Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.

Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.

Jointly offered with: CHBE652.

Restriction: Permission of Department or Instructor.

Credit Only Granted for: CHBE452 or CHBE652.

CHBE453 Applied Mathematics and Distributive Parameter Systems (3 Credits)

Mathematical techniques applied to the analysis and solution of chemical engineering problems. Use of differentiation, integration, differential equations, partial differential equations and integral transforms. Application of infinite series, numerical and statistical methods.

Credit Only Granted for: CHBE453 or ENCH453.

Formerly: ENCH453.

CHBE454 Chemical Process Analysis and Optimization (3 Credits)

Application of mathematical models to the analysis and optimization of chemical processes. Models based on transport, chemical kinetics and other chemical engineering principles will be employed.

Credit Only Granted for: CHBE454 or ENCH454.

Formerly: ENCH454.

CHBE455 Model Predictive Control (3 Credits)

Empirical model identification from process data. Step and impulse response models. Linearization of nonlinear first principles models. Single variable Model Predictive Control. Robustness with respect to modeling error. MPC based tuning of PID controllers. Feedforward control. Multi-input multi-output processes. Multi-loop decentralized control. Centralized multivariable Model Predictive Control via on-line optimization.

Credit Only Granted for: CHBE455 or ENCH455.

Formerly: ENCH455.

CHBE457 Design and Processing of Polymers for Biomedical Devices (3 Credits)

Provides a foundation for understanding the use of various materials in medical applications. We will discuss design principles, based on biological context for drug delivery, diagnosis of disease, imaging applications, tissue engineering, among other relevant topics. The course will cover nanomedicine approaches (lipids, polymers, gold nanoparticles, carbon nanotubes, etc.), as well as scaffolds for tissue engineering and regenerative medicine. We will discuss advantages, challenges, and recent advances in the field. The course will highlight the importance of rational engineering when designing products to be used to treat and diagnose disease.

Prerequisite: MATH246; and CHEM231; and (CHBE301, ENMA461, or BIOE232).

Recommended: Knowledge of basic fluid dynamics: CHBE422/BIOE331 or equivalent.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

CHBE468 Research (1-3 Credits)

Investigation of a research project under the direction of a faculty member. Comprehensive reports are required.

Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.

Repeatable to: 6 credits.

Formerly: ENCH468.

CHBE469 Special Projects (1-3 Credits)

Special project under the direction of a faculty member. Comprehensive reports are required.

Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.

Repeatable to: 6 credits if content differs.

CHBE470 Colloid and Interface Science (3 Credits)

Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.

Prerequisite: CHBE424 and CHBE426.

Jointly offered with: CHBE670.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.

CHBE471 Particle Science and Technology (3 Credits)

Particles are everywhere. We breathe them, eat them, and use them to make many non-particulate materials. Knowledge of particle science and technology is important for manufacturing, for occupational health and safety, as well as environmental considerations. In this multidisciplinary course, the focus will be on the study of science and technology relevant to multiphase systems consisting of solid and/or liquid particles surrounded by a gas. These topics fall loosely under the headings of powder and aerosol technology. Team design projects will be an integral component.

Prerequisite: Knowledge of undergraduate engineering thermodynamics, and transport phenomena; knowledge of numerical methods for solving systems of ordinary differential equations.

Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE471 or ENCH471.

Formerly: ENCH471.

CHBE472 Control of Air Pollution Sources (3 Credits)

Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.

Jointly offered with: CHBE672.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE472, CHBE672 or ENCH672.

CHBE473 Advanced Batteries and Fuel Cells (3 Credits)

The lecture will start from the basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.

Jointly offered with: CHBE673.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE473 or CHBE673.

CHBE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Prerequisite: BIOE120; and permission of instructor.

Jointly offered with: CHBE674.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.

CHBE475 Ethics in Science and Engineering (3 Credits)

Ethical issues in science and engineering and their resolutions are examined. The main topics will be ethics and scientific truth (including issues of proper data analysis, proper data presentation, and record-keeping), ethics and other scientists and engineers (including issues of attribution, confidentiality, conflicts of interest, mentoring, and inclusion of under-represented groups), ethics and the practice of engineering (including responsibilities of engineers to clients, ecological issues, and conflicts of interest), and ethics and society (including funding priorities, moral issues, and human and animal subjects). Class meetings will be organized around discussions, case studies, and student reports. The course is aimed at postdoctoral students, graduate students and advanced undergraduate students who wish to ponder the important contemporary questions about the ethics of how science and engineering get done.

Credit Only Granted for: CHBE475 or ENCH475.

Formerly: ENCH475.

CHBE476 Molecular Modeling Methods (3 Credits)

Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.

Jointly offered with: CHBE476.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648P, CHBE476 or CHBE676.

Formerly: ENCH468P.

CHBE477 Mesoscopic and Nanoscale Thermodynamics (3 Credits)

Interdisciplinary course primarily for graduate and senior undergraduate students from engineering or science departments. New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artificial organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.

Prerequisite: A prior course in classical thermodynamics.

Jointly offered with: CHBE477.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE477, ENCH468Q or CHBE677.

Formerly: ENCH468Q.

CHBE480 Bionanotechnology: Physical Principles (3 Credits)

Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly; protein folding. Nanoscale intermolecular interactions important for biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer structures useful in medicine. Targeted delivery of drugs, genes by nano/micro structures. Cellular assembly in the eye, in insect wings. Cellular assembly at surfaces: gecko feet, duck feathers. Cellular assembly in the presence of crystals: biomineralization.

Prerequisite: BIOE120; or students who have taken courses with comparable content may contact the department.

Jointly offered with: CHBE680.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.

CHBE481 Transport Phenomena in Small and Biological Systems (3 Credits)

Interdisciplinary course primarily for senior undergraduate and graduate students from engineering or science departments. The course's main goal is to make the students familiar with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.

Jointly offered with: CHBE681.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468W, CHBE481 or CHBE681.

Formerly: ENCH468W.

Additional Information: Adding graduate course to jointly offered and credit only granted for fields.

CHBE483 Bioseparations (3 Credits)

Engineering fundamentals of separations and purification of biological molecules. Case studies and examples illustrate principles and practice of centrifugation, precipitation, crystallization, filtration, membrane separations, chromatography, and affinity separation of recombinant proteins and other biomolecules. Process scale-up and economics of biotechnology products and processes.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH483 or CHBE483.

Formerly: ENCH483.

CHBE484 Metabolic Pathway Engineering (3 Credits)

The state-of-the-art in metabolic engineering, with a focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: (1) overview of biochemistry and metabolism; (2) metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; (3) technologies for engineering metabolic pathways; (4) metabolic control analysis and pathway regulation; (5) applications of metabolic engineering to synthesis of biofuels and therapeutics; (6) specialized and related subjects such as protein engineering and synthetic biology.

Prerequisite: CHBE101 and CHBE440.

Jointly offered with: CHBE684.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468M, CHBE484 or CHBE684.

Formerly: ENCH468M.

CHBE485 Biochemical Engineering Laboratory (3 Credits)

Techniques of measuring pertinent parameters in fermentation reactors, quantification of production variables for primary and secondary metabolites such as enzymes and antibiotics, the insolubilization of enzymes for reactors, and the demonstration of separation techniques such as ultrafiltration and affinity chromatography.

Credit Only Granted for: CHBE485 or ENCH485.

Formerly: ENCH485.

CHBE486 Heterogeneous Catalysis for Energy Applications (3 Credits)

Introduction to heterogeneous catalytic science and technology for energy conversion and hydrocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogeneous reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO₂ utilization will be introduced.

Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE486, CHBE686 or ENCH686.

CHBE487 Tissue Engineering (3 Credits)

A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.

Prerequisite: Must have completed at least one biology course; and MATH241.

Recommended: BSCI330 and BIOE340.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: BIOE411, CHBE487, or ENCH468T.

Formerly: ENCH468T.

CHBE490 Polymer Science (3 Credits)

The elements of the polymer chemistry and industrial polymerization, polymer structures and physics, thermodynamics of polymer solutions, polymer processing methods, and engineering applications of polymers.

Credit Only Granted for: CHBE490, ENCH490, or ENMA495.

Formerly: ENCH490.

CHBE491 Electrochemical Energy Engineering (3 Credits)

Introduces students to the fundamentals of electrochemical engineering, covering thermodynamics, kinetics, and transport in electrochemical cells, as well as electrode structures and electroanalytical techniques.

The course will next transition to focus on electrochemical devices, including batteries, fuel cells, and other devices as guided by student input. This course will serve as a foundation for students who are interested in becoming practicing electrochemical engineers, those who would like to pursue research careers, and those who wish to become familiar with a specialized area within engineering that will have a crucial and growing importance during their careers.

Prerequisite: CHBE302, CHBE440, and CHBE422.

Jointly offered with: CHBE691.

Restriction: Permission of ENGR - Chemical & Biomolecular Engineering Department.

Credit Only Granted for: CHBE691 or CHBE491.

CHBE493 Chemical Processes in Beer Brewing (3 Credits)

Covers chemical engineering principles and chemical processes involved in the brewing and quality control of beer. Topics will include extraction and isomerization of bittering compounds from hops, enzymatic reactions involved in mashing beer, colloidal chemistry of haze formation, and microbiology of yeast and fermentation. Quantitative models will be applied to these processes based on fundamental chemical engineering principles from reaction kinetics, thermodynamics, transport phenomena, and colloid and interfacial science.

Prerequisite: Minimum grade of C- in CHBE424 and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE493 or CHBE693.

Additional Information: Neither the students nor the instructor will be making or working with alcoholic beverages in the course.

CHBE494 Sustainable Separations and Carbon Capture (3 Credits)

Provides a comprehensive overview of sustainable separations and carbon dioxide capture using synthetic membranes and sorbents.

Prerequisite: Minimum grade of C- in CHBE424, CHBE426 and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and must have permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE494 or CHBE694.

CHBE495 Nanoparticle Aerosol Dynamics and Particle Technology (3 Credits)

NanoParticles (NA) (< 100 nm), and their science and technology play an important role in nature and industry. From air quality standards, nuclear reactor safety, inhalation therapy, workplace exposure, global climate change, to counterterrorism, aerosols play a central role in our environment. On the industrial side, NA plays an integral part of reinforcing fillers, pigments and catalysts, and the new emerging field of nanotechnology, they are the building blocks to new materials, which encompass, electronic, photonic and magnetic devices, and bio and chemical sensors.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE496 Polymeric Materials: Structure, Property, and Processing (3 Credits)

An intermediate level treatment of structures of polymers. An introduction to mechanical properties and processing of polymeric materials. Emphasis will be on how to establish the structure-property relationship and on how to achieve such understanding via different characterization methods.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Cross-listed with: ENMA496.

Credit Only Granted for: ENMA496 or CHBE496.

CHBE497 Protein Engineering (3 Credits)

This course will cover the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.

Prerequisite: BIOE120, CHBE302, and CHBE440; and permission of instructor.

Jointly offered with: CHBE697.

Credit Only Granted for: CHBE497, BIOE489R, ENCH 648P or CHBE697.

CHBE608 Research in Chemical Engineering (1 Credit)

Students gain experience in research through lab rotations and experience presenting their findings.

Restriction: Must be in the Chemical Engineering Doctoral or Master of Science program.

Repeatable to: 8 credits.

CHBE609 Graduate Seminar (1 Credit)

Seminar in Chemical and Biomolecular Engineering

Repeatable to: 4 credits.

CHBE610 Chemical Engineering Thermodynamics (3 Credits)

Advanced application of the general thermodynamic methods to chemical engineering problems. First and second law consequences; estimation and correlation of thermodynamic properties; phase and chemical reaction equilibria.

Prerequisite: CHBE301; and CHBE302. Or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH610 or CHBE610.

Formerly: ENCH610.

CHBE620 Methods of Engineering Analysis (3 Credits)

Application of selected mathematical techniques to the analysis and solution of engineering problems; included are the applications of matrices, vectors, tensors, differential equations, integral transforms, and probability methods to such problems as unsteady heat transfer, transient phenomena in mass transfer operations, stagewise processes, chemical reactors, process control, and nuclear reactor physics.

Prerequisite: MATH246 and CHBE250; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ENCH620 or CHBE620.

Formerly: ENCH620.

CHBE630 Transport Phenomena (3 Credits)

Heat, mass and momentum transfer theory from the viewpoint of the basic transport equations. Steady and unsteady state; laminar and turbulent flow; boundary layer theory, mechanics of turbulent transport; with specific application to complex chemical engineering situations.

Prerequisite: CHBE422; and ENCH424. Or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH630 or CHBE630.

Formerly: ENCH630.

CHBE640 Advanced Chemical Reaction Kinetics (3 Credits)

The theory and application of chemical reaction kinetics to reactor design. Reaction rate theory; homogeneous batch and flow reactors; fundamentals of catalysis; design of heterogeneous flow reactors.

Prerequisite: CHBE440; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH640 or CHBE640.

Formerly: ENCH640.

CHBE648 Special Problems in Chemical Engineering (1-12 Credits)

Research project under the direction of a faculty member.

Repeatable to: 12 credits.

Formerly: ENCH648.

CHBE651 Photovoltaics: Solar Energy (3 Credits)

The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.

Jointly offered with: CHBE451.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE451 or CHBE651.

CHBE652 Introduction of Machine Learning in Chemical Engineering (3 Credits)

Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.

Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.

Jointly offered with: CHBE452.

Restriction: Permission of Department or Instructor.

Credit Only Granted for: CHBE452 or CHBE652.

CHBE670 Colloid and Interface Science (3 Credits)

Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.

Jointly offered with: CHBE470.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.

Formerly: ENCH648F.

CHBE672 Control of Air Pollution Sources (3 Credits)

Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.

Jointly offered with: CHBE472.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE472 or CHBE672.

CHBE673 Advanced Batteries and Fuel Cells (3 Credits)

Basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.

Jointly offered with: CHBE473.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE473 or CHBE673.

CHBE674 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Jointly offered with: CHBE474.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.

Formerly: ENCH648D.

CHBE676 Molecular Modeling Methods (3 Credits)

Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.

Jointly offered with: CHBE476.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE476 or CHBE676.

CHBE677 Mesoscopic and Nanoscale Thermodynamics (3 Credits)

New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artificial organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.

Prerequisite: A prior course in classical thermodynamics.

Jointly offered with: CHBE477.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE477 or CHBE677.

CHBE680 Bionanotechnology: Physical Principles (3 Credits)

Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important in biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer-based carriers useful in medicine. Antimicrobial therapies. Targeted cancer therapy. Ideal properties of nanocarriers in terms of size, charge, and surface chemistry.

Jointly offered with: CHBE480.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.

Formerly: ENCH648N.

CHBE681 Transport Phenomena in Small and Biological Systems (3 Credits)

Familiarize students with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.

Jointly offered with: CHBE481.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE481 or CHBE681.

CHBE684 Metabolic Pathway Engineering (3 Credits)

A focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: overview of biochemistry and metabolism; metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; technologies for engineering metabolic pathways; metabolic control analysis and pathway regulation; applications of metabolic engineering to synthesis of biofuels and therapeutics; specialized and related subjects such as protein engineering and synthetic biology.

Jointly offered with: CHBE484.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE484 or CHBE684.

CHBE686 Advanced Heterogeneous Catalysis for Energy Applications (3 Credits)

Introduction to heterogeneous catalytic science and technology for energy conversion and hydrocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogeneous reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO₂ utilization will be introduced.

Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.

Jointly offered with: CHBE486.

Restriction: Permission of instructor.

Credit Only Granted for: CHBE486, ENCH686 or CHBE686.

Formerly: ENCH686.

CHBE690 Polymer Reaction Engineering (3 Credits)

Advanced topics in polymerization kinetics, reactor design and analysis; addition and step-growth polymerization; homogeneous and heterogeneous polymerization; photopolymerization; reactor dynamics; optimal operation and control of industrial polymerization reactors.

Prerequisite: ENCH640; or permission of instructor.

Credit Only Granted for: ENCH781 or CHBE690.

Formerly: ENCH781.

CHBE691 Electrochemical Energy Engineering (3 Credits)

Introduces students to the fundamentals of electrochemical engineering, covering thermodynamics, kinetics, and transport in electrochemical cells, as well as electrode structures and electroanalytical techniques. The course will next transition to focus on electrochemical devices, including batteries, fuel cells, and other devices as guided by student input. This course will serve as a foundation for students who are interested in becoming practicing electrochemical engineers, those who would like to pursue research careers, and those who wish to become familiar with a specialized area within engineering that will have a crucial and growing importance during their careers.

Prerequisite: CHBE302, CHBE440, and CHBE422.

Jointly offered with: CHBE491.

Restriction: Permission of ENGR - Chemical & Biomolecular Engineering Department.

Credit Only Granted for: CHBE491 or CHBE691.

CHBE693 Chemical Processes in Beer Brewing (3 Credits)

Covers chemical engineering principles and chemical processes involved in the brewing and quality control of beer. Topics will include extraction and isomerization of bittering compounds from hops, enzymatic reactions involved in mashing beer, colloidal chemistry of haze formation, and microbiology of yeast and fermentation. Quantitative models will be applied to these processes based on fundamental chemical engineering principles from reaction kinetics, thermodynamics, transport phenomena, and colloid and interfacial science.

Prerequisite: Minimum grade of C- in CHBE424 and CHBE440; and permission of instructor.

Jointly offered with: CHBE493.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE493 or CHBE693.

Additional Information: Neither the students nor the instructor will be making or working with alcoholic beverages in the course.

CHBE694 Sustainable Separations and Carbon Capture (3 Credits)

Provides a comprehensive overview of sustainable separations and carbon dioxide capture using synthetic membranes and sorbents.

Prerequisite: Minimum grade of C- in CHBE424, CHBE426 and CHBE440; and permission of instructor.

Jointly offered with: CHBE494.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and must have permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE494 or CHBE694.

CHBE697 Protein Engineering (3 Credits)

Covers the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.

Cross-listed with: BIPH697.

Jointly offered with: CHBE497.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE497, BIOE489R, BIPH697, ENCH648P or CHBE697.

Formerly: ENCH648P.

CHBE799 Master's Thesis Research (1-6 Credits)

Repeatable to: 18 credits.

CHBE898 Pre-Candidacy Research (1-8 Credits)

Repeatable to: 18 credits.

CHBE899 Doctoral Dissertation Research (1-8 Credits)

Repeatable to: 18 credits.

CHEM - Chemistry

CHEM401 Inorganic Chemistry (3 Credits)

An overview of basic concepts of the electronic structure of the elements, chemical bonding and reactivity, from simple diatomic molecules to coordination compounds. These are viewed from simple (Lewis) to the most comprehensive molecular orbital theory. Symmetry and group theory are used throughout the course.

Prerequisite: CHEM276 or CHEM271; and (CHEM247 or CHEM241).

CHEM403 Radiochemistry (3 Credits)

Radioactive decay; introduction to properties of atomic nuclei; nuclear processes in cosmology; chemical, biomedical and environmental applications of radioactivity; nuclear processes as chemical tools; interaction of radiation with matter.

Prerequisite: Must have completed one year of college chemistry and one year of college physics.

CHEM425 Instrumental Methods of Analysis (4 Credits)

Modern instrumentation in analytical chemistry. Electronics, spectroscopy, chromatography and electrochemistry.

Prerequisite: CHEM272 and CHEM271; or (CHEM276 and CHEM277).

CHEM433 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer.

Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146. And MATH241; or permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Chemistry & Biochemistry department. Cross-listed with AOSC433.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

Formerly: CHEM434.

CHEM441 Advanced Organic Chemistry (3 Credits)

An advanced study of the compounds of carbon, with special emphasis on molecular orbital theory and organic reaction mechanisms.

Prerequisite: Must have completed or be concurrently enrolled in CHEM480 or CHEM481; and 1 course with a minimum grade of C- from (CHEM241, CHEM247).

Jointly offered with: CHEM641.

CHEM460 Structure Determination Using Spectroscopic Methods (3 Credits)

The use of infrared, ultraviolet-visible, proton and carbon-13 nuclear magnetic resonance and mass spectroscopy for structure determination in organic chemistry.

Prerequisite: Must have completed CHEM243; or CHEM247; or (CHEM241 and CHEM242).

Formerly: CHEM660.

CHEM471 Techniques in Pulse NMR (1 Credit)

NMR techniques to operate, adjust, and calibrate the spectrometers and acquire and process NMR data in one and two dimensional NMR applications.

Prerequisite: CHEM241 and CHEM242; or CHEM247.

Recommended: CHEM460.

Restriction: Senior standing or higher.

Additional Information: Persons with heart pacemakers and/or metal implants cannot take the course due to potential health hazards.

CHEM480 Principles of Physical Chemistry (3 Credits)

Covers elementary thermodynamics, principles of kinetics and catalysis and selected topics in molecular quantum mechanics, spectroscopy and statistical mechanics. Topics will emphasize core subjects along with applications to biosciences, materials science, environmental science and related areas.

Prerequisite: (CHEM276 or CHEM271); and (CHEM277 or CHEM272); and (MATH140 or MATH136); and (PHYS260 and PHYS261) or PHYS132.

Credit Only Granted for: CHEM480 or CHEM481; CHEM480, BCHM485 or CHEM482.

CHEM481 Physical Chemistry I (3 Credits)

Thermodynamics and kinetics of chemical and molecular systems. Topics may include internal energy, heat, work, enthalpy, entropy, free energy, and spontaneity as well as reaction order, differential rate laws, integrated rate laws, and rate laws for multi-step processes.

Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

Credit Only Granted for: CHEM481 or CHEM480.

CHEM482 Physical Chemistry II (3 Credits)

Quantum mechanical nature of atoms and molecules. Topics may include model systems for electronic, vibrational, rotational and translational energies as well as connections to molecular spectroscopy and thermal distributions.

Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

Credit Only Granted for: CHEM482, BCHM485 or CHEM480.

CHEM483 Physical Chemistry Laboratory I (2 Credits)

An introduction to the principles and application of quantitative techniques in physical chemical measurements. Experiments will be coordinated with topics in CHEM481.

Prerequisite: Must have completed or be concurrently enrolled in CHEM481.

CHEM484 Physical Chemistry Laboratory II (2 Credits)

Advanced quantitative techniques necessary in physical chemical measurements. Experiments will be coordinated with topics in CHEM482.

Prerequisite: Must have completed or be concurrently enrolled in CHEM482.

CHEM498 Special Topics in Chemistry (3 Credits)

Prerequisite: Prerequisite varies with the nature of the topic being considered.

CHEM601 Structure and Bonding of Molecules and Materials (3 Credits)

Development of the tools necessary to use the knowledge of structure and bonding of molecules and solids in the practice of synthetic inorganic and materials chemistry. Several bonding models are covered, from the simple valence bond and ligand field models to a quantitative group theoretical treatment of molecular orbital theory and band structure descriptions of solids. Concepts of electron counting and oxidation state and ligand characteristics are revisited in terms of the more sophisticated bonding models. Finally, these models are used to analyze the reactivity, magnetic and spectroscopic properties of inorganic coordination compounds. Prior advanced inorganic and/or advanced quantum chemistry courses are not prerequisites.

CHEM602 Advanced Inorganic Chemistry II (3 Credits)

A continuation of CHEM 601 with emphasis on the application of contemporary spectroscopic techniques to inorganic problems.

Prerequisite: CHEM601; or permission of instructor.

CHEM608 Selected Topics in Inorganic Chemistry (1-3 Credits)

Topics of special interest and current importance.

Prerequisite: CHEM602 and CHEM601; or students who have taken courses with comparable content may contact the department.

Repeatable to: 6 credits if content differs.

CHEM611 Professional Skills for New Graduate Students (1 Credit)

Covers a wide range of topics in professional development for new graduate students.

Restriction: Must be in one of the following programs (Chemistry (Master's); Biochemistry (Master's); Biochemistry (Doctoral); Chemistry (Doctoral)); and must be a new graduate student.

CHEM612 Scientific Presentations (1 Credit)

Workshops will cover all aspects of giving scientific presentations. Each student will give a presentation based on the topic of his/her final paper in CHEM611. Presentations will be critiqued by peers and faculty members.

Prerequisite: CHEM611.

CHEM623 Optical Methods of Quantitative Analysis (3 Credits)

The quantitative applications of various methods of optical spectroscopy.

Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM624 Electrical Methods of Quantitative Analysis (3 Credits)

The use of conductivity, potentiometry, polarography, voltammetry, amperometry, coulometry, and chronopotentiometry in quantitative analysis.

Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM625 Separation Methods in Quantitative Analysis (3 Credits)

The theory and application for quantitative analysis of various forms of chromatography, ion exchange, solvent extraction, distillation, and mass spectroscopy.

Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM633 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146.

Cross-listed with: AOSC633.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

CHEM640 Problems in Organic Reaction Mechanisms (1 Credit)

A tutorial type course dealing with the basic description of the fundamentals of writing organic reaction mechanisms.

CHEM641 Organic Reaction Mechanisms (3 Credits)

Jointly offered with CHEM441.

CHEM647 Organic Synthesis (3 Credits)

The use of new reagents in organic reactions; multistep syntheses leading to natural products of biological interest; stereospecific and regiospecific reactions and their use in total synthesis.

CHEM648 Special Topics in Organic Chemistry (1-3 Credits)

Topics of special interest and current importance.

Repeatable to: 9 credits if content differs.

CHEM650 Problems in Organic Synthesis (1 Credit)

A tutorial type course dealing with mechanistic problems from the current literature of organic synthesis.

CHEM678 Special Topics in Environmental Chemistry (3 Credits)

In-depth treatment of environmental chemistry problem areas of current research interest. The topics will vary somewhat from year to year.

Prerequisite: CHEM474.

Repeatable to: 6 credits if content differs.

CHEM682 Chemical Kinetics and Dynamics (3 Credits)

The dynamics of atoms and molecules as they undergo chemical and physical change. Topics will be developed from a fundamental perspective and modern applications will be discussed. Topics include: chemical kinetics rate equations, atomic and molecular collisions; rate theories; atomic, molecular and chemical lasers; control of matter with light.

Prerequisite: CHEM482; or permission of instructor.

Restriction: Restricted to graduate students or advanced undergraduates with prerequisites.

CHEM684 Chemical Thermodynamics (3 Credits)

Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM687 Statistical Mechanics and Chemistry (3 Credits)

Prerequisite: CHEM684; or students who have taken courses with comparable content may contact the department.

CHEM688 Selected Topics in Physical Chemistry (2 Credits)

Repeatable to: 6 credits if content differs.

CHEM689 Special Topics in Physical Chemistry (3 Credits)

Repeatable to: 9 credits if content differs.

CHEM690 Quantum Chemistry I (3 Credits)**CHEM691 Quantum Chemistry II (3 Credits)**

Prerequisite: CHEM690 or PHYS622.

CHEM698 Literature Seminar in Chemistry (1 Credit)

Students will prepare and present a departmental seminar based on a topic in the current research literature.

Restriction: Must be in a major within CMNS-Chemistry & Biochemistry department.

CHEM699 Special Problems in Chemistry (1-6 Credits)

Laboratory experience in a research environment.

Prerequisite: One semester of graduate study in chemistry.

Restriction: Restricted to students in the non-thesis M.S. option.

Repeatable to: 6 credits.

CHEM703 Introduction to Nonequilibrium Statistical Physics (3 Credits)

Analysis and microscopic modeling of systems away from thermal equilibrium. Linear response theory, ergodicity, Brownian motion, Monte Carlo modeling, thermal ratchets, far-from-equilibrium fluctuation relations. Introduction to the theoretical tools of nonequilibrium phenomena and their application to problems in physics, chemistry and biology.

Prerequisite: PHYS603 or CHEM687; or permission of instructor.

Cross-listed with: BIPH703, CHPH703, PHYS703.

Credit Only Granted for: BIPH703, CHEM703, CHPH703, or PHYS703.

CHEM705 Nuclear Chemistry (3 Credits)

Nuclear structure models, radioactive decay processes, nuclear reactions in complex nuclei, fission, nucleosynthesis and nuclear particle accelerators.

CHEM729 Special Topics in Geochemistry (1-3 Credits)

A discussion of current research problems.

Repeatable to: 6 credits if content differs.

CHEM799 Master's Thesis Research (1-6 Credits)**CHEM889 Seminar (1 Credit)****CHEM898 Pre-Candidacy Research (1-8 Credits)****CHEM899 Doctoral Dissertation Research (1-8 Credits)**

CHIN - Chinese

CHIN401 Readings in Modern Chinese I (3 Credits)

Readings in history, politics, economics, sociology, and literature.

Emphasis on wide-ranging, rapid reading, reinforced by conversations and compositions.

Prerequisite: CHIN302; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN402 Readings in Modern Chinese II (3 Credits)

Continuation of CHIN401.

Prerequisite: CHIN401; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN403 Classical Chinese I (3 Credits)

Close readings and discussion of literary, philosophical and historical texts in the original language. The course situates texts in their historical context and also discusses differences between classical and modern Chinese.

Prerequisite: CHIN302 or CHIN306; or permission of instructor.

Additional Information: Texts in Chinese. Class discussion and course work mainly in English.

CHIN408 Selected Readings in Classical Chinese (3 Credits)

Selected readings in Classical Chinese, including important representative works of history, poetry, and parallel prose. Close attention is paid to matters of grammar and phonology in the readings. Content will differ each time this course is offered.

Prerequisite: CHIN321; and must have knowledge of Pinyin.

Repeatable to: 9 credits if content differs.

CHIN411 Business Chinese I (3 Credits)

Conversation, reading, and writing applicable to Chinese business transactions, social meetings, and meetings with government organizations, plus background material in English on professional business practices and social customs associated with business.

Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN415 Readings in Current Newspapers and Periodicals (3 Credits)

Reading of periodical literature on selected topics with discussions and essays in Chinese.

Prerequisite: CHIN402; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN418 Special Topics in Contemporary Chinese Fiction and Film (3 Credits)

Various approaches to the most recent textual productions of China and Taiwan. Taught in Chinese.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 12 credits if content differs.

CHIN425 Ethnic and Cultural Diversity in China (3 Credits)

This course looks into ethnic and cultural diversity in China. It examines the evolution of the People's Republic of China's (PRC) ethnic policies in relation to nation-state building over the last six decades. Specifically, it studies how the PRC has categorized the Chinese people into 56 ethnic groups, how it has made affirmative action policies to accommodate ethnic diversity, and what problems its approaches have experienced and what solutions it has proposed in its accommodation of ethnicity and diversity in the 21st century. To examine the above issues, the course introduces and applies the concepts of ethnicity, nationality, ethnic nationalism, civic nationalism, identity, social Darwinism, the Soviet model of multinational state building, the Chinese model of inclusive Chinese nation state building, citizenship, individual rights, group rights, equality, and diversity.

Recommended: Any CHIN course or course on China.

Credit Only Granted for: CHIN425 or CHIN429G.

Formerly: CHIN429G.

CHIN428 Selected Topics in Chinese Linguistics (3 Credits)

Undergraduate seminar in Chinese linguistics. Topics may include the ancient writing system, historical phonology, dialectology, prosody and rhyming, grammar and the history of the language as a whole. This course may be repeated with different content, and satisfies the linguistics requirement for the Chinese major. Students are expected to be in at least Third Year Chinese. Taught in English.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Sophomore standing or higher.

Repeatable to: 12 credits if content differs.

CHIN429 Selected Topics in Chinese Studies (3 Credits)

In-depth study of a particular aspect of Chinese cultural, linguistic, literary studies. Specific topic to be announced when course is offered. Taught in English.

Prerequisite: CHIN315.

Repeatable to: 6 credits if content differs.

CHIN441 Traditional Chinese Fiction (3 Credits)

Major works of fiction from the 4th century tales of the marvelous through the 19th century Qing novel. Readings are in classical Chinese and English. Designed for students with advanced language skills. Taught in English.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN443 Cultural Histories of Medicine in China (3 Credits)

Investigates medical knowledge through traditional Chinese approaches to the body and beliefs about healing, including acupuncture, herbal medicine, prayer, ritual and folk medicine. Taught in English.

Restriction: Permission of department, School of Languages, Literatures and Cultures.

CHIN499 Directed Study in Chinese (1-3 Credits)

Readings in Chinese under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

CHIN602 The Language of Contemporary Chinese Audio Media (3 Credits)

Oral Chinese non-fiction in the high diglossic register, with emphasis on contextually and culturally appropriate interpretation of lexicon, style, and idiom. Conducted entirely in Chinese, intended for non-native speakers of the language pursuing professional levels of competence.

Prerequisite: Must have taken a placement test offered by the department.

CHIN603 The Language of Contemporary Chinese Written Fiction (3 Credits)

Chinese fiction writing, with emphasis on contextually and culturally appropriate interpretation of lexicon, style, and idiom in various genres. Conducted entirely in Chinese; intended for non-native speakers of the language pursuing professional levels of competence.

Prerequisite: Must have taken a placement test offered by the department.

CHIN611 Structure of the Chinese Language (3 Credits)

An overview of the basic linguistic characteristics of modern standard (Mandarin) Chinese, including phonology, morphology and syntax. Emphasis on the analysis of functional linguistic models and the development of student skills in critically appraising existing interpretations of Chinese language structure.

CHIN621 Chinese Historical Linguistics (3 Credits)

An introduction to the origin and development of the Chinese language, and its relationship to other languages.

CHPH - Chemical Physics

CHPH618 Special Projects in Chemical Physics (1-3 Credits)

Independent reading and study covering chemical physics subject areas not available in other courses.

Restriction: Permission of instructor.

Repeatable to: 6 credits.

CHPH633 Advanced Characterization of Soft Matter Materials (3 Credits)

This course is focused on both the theories and experimental works of studying structure and dynamics of soft matter materials using scattering techniques (light, x-ray and neutron scattering). These scattering techniques can probe the structure from a few Angstrom to micrometer and the dynamics from picosecond to second, are thus widely used to reveal the structure-performance relationship of different materials. The course discusses the physics principles of these techniques and explains the details of general theories and commonly used models in characterizing soft matter materials such as polymer, protein, colloidal, thin film, and gel systems.

Cross-listed with: ENMA633.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA633 or CHPH633.

CHPH703 Introduction to Nonequilibrium Statistical Physics (3 Credits)

Analysis and microscopic modeling of systems away from thermal equilibrium. Linear response theory, ergodicity, Brownian motion, Monte Carlo modeling, thermal ratchets, far-from-equilibrium fluctuation relations. Introduction to the theoretical tools of nonequilibrium phenomena and their application to problems in physics, chemistry and biology.

Prerequisite: PHYS603 or CHEM687; or permission of instructor.

Cross-listed with: CHEM703, BIPH703, PHYS703.

Credit Only Granted for: BIPH703, CHEM703, CHPH703, or PHYS703.

CHPH707 Advanced Laboratory - Photon Correlation Spectroscopy of Soft Matter (3-4 Credits)

The course is based at the Photon Correlation Spectroscopy facility, also known as Dynamic Light Scattering (DLS). The DLS has three state-of-the-art instruments for the characterization of nano-and meso-scale heterogeneities in soft-matter materials, such as nanoparticles, polymers, protein molecules in solution, gels, and microemulsions.

CHPH709 Seminar in Chemical Physics (1 Credit)

Current research and developments in chemical physics.

CHPH718 Special Topics in Chemical Physics (1-3 Credits)

A discussion of current research problems in chemical physics.

Repeatable to: 99 credits if content differs.

CHPH799 Master's Thesis Research (1-6 Credits)**CHPH898 Pre-Candidacy Research (1-8 Credits)****CHPH899 Doctoral Dissertation Research (1-8 Credits)**

CLAS - Classics

CLAS409 Classics Capstone Seminar (3 Credits)

Comparative study of selected central aspects of both ancient Greek and Roman cultures as viewed from the standpoints of literary study, history, art history, and other fields as appropriate. Seminar format involving intensive student research.

Restriction: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

CLAS419 The Classical Tradition (3 Credits)

Examination of the role of Greek and Roman civilization in shaping the arts and ideas of western culture.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: CLAS419 or CLAS420.

Formerly: CLAS420.

CLAS470 Approaches to Greek Mythology (3 Credits)

Ancient and modern approaches to understanding Greek myth as expression of human experience, including interpretations drawn from psychology, anthropology, and comparative mythology.

Prerequisite: CLAS170; or permission of ARHU-Classics department.

CLAS488 Independent Study in Classical Civilization (3 Credits)

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

CLAS499 Independent Study in Classical Languages and Literatures (1-3 Credits)

Prerequisite: Permission of ARHU-Classics department.

CLAS621 The Classical Tradition (3 Credits)

The role the classics have played in western thought, with particular attention to literature.

CLAS688 Special Topics in Classical Civilization (3 Credits)

Repeatable to: 9 credits if content differs.

CLAS699 Independent Study in Classical Civilization (1-3 Credits)

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

CLAS799 Master's Thesis Research (1-6 Credits)

CLFS - Chemical and Life Sciences

CLFS608 Seminar in Current Topics in Chemical and Life Science (1-4 Credits)

Seminar in current topics in the Life Sciences. Contact Program Director or instructor before registering.

Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.

Repeatable to: 6 credits if content differs.

Formerly: LFSC608.

CLFS609 Special Topics (1-3 Credits)

Individual instruction course. Contact Program Director or instructor before registering.

Prerequisite: Two years of teaching experience; and CLFS510.

Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.

Repeatable to: 6 credits if content differs.

Formerly: LFSC609.

CLFS610 Natural Products Chemistry (3 Credits)

Foundations of natural products chemistry; how nature goes about making (biosynthesizing) these compounds and elements of enzymology and genomics relevant to production of these compounds; relevance of natural products chemistry as a driving force for drug discovery and innovation in biotechnology.

Restriction: Permission of CMNS-Chemical & Life Sciences department.

Credit Only Granted for: LFSC609D or LFSC610.

Formerly: LFSC609D.

CLFS619 Special Topics in Chemistry (1-3 Credits)

Topics of current interest and special importance.

Repeatable to: 9 credits if content differs.

Formerly: LFSC619.

CLFS620 Modern Molecular Genetics (3 Credits)

An overview of genetics including the genetic basis/components in prevalent diseases, genetically engineered organisms and foods, the importance of knowing the complete DNA sequence of organisms.

CLFS630 Principles of Transmission Genetics: A Historical and Modern Perspective (3 Credits)

Examines the origins of modern genetics, model genetic systems, and the role of chromosomes in vertical transmission of genetic information from parent to offspring. Classical gene mapping, population genetics and the various applications of modern genetics will also be studied.

CLFS640 Human Physiology (3 Credits)

Examination of the major organ system of the human body and of the neural and hormonal mechanisms responsible for their regulation and control.

Prerequisite: Two years of teaching experience; and CLFS510.

Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.

CLFS655 The Chemistry and Applications of Electrochemical Cells (3 Credits)

Chemistry of electrochemical cells including the thermodynamic basis for the production of electrical energy by cells, the chemical reactions utilized by the most common cells, the manufacture of cells, and the application of cells in energy production.

CLFS660 Biodiversity and Conservation Biology (3 Credits)

Application of ecological and evolutionary principles to assess the impact of the human species on the environment and its inhabitants. Specific case studies are included to illustrate problems of biodiversity loss and actions required to reverse the trends.

CLFS665 Ecology and Global Change (3 Credits)

Ecological concepts across scales ranging from the individual, to populations, communities, ecosystems, and landscapes will be presented. Global change issues will encompass alteration of atmospheric trace gases, biogeochemistry cycles, land use changes, and introduction of non-native species to new habitats.

Credit Only Granted for: LFSC609C or LFSC665.

Formerly: LFSC609C.

CLFS680 Chemical Ecology (3 Credits)

An examination of the utilization of organic natural products by plants and animals for various life processes. Examples will include how materials are utilized for sexual selection, defense against predators, sexual attractants, and as natural herbicides and repellants.

CLFS690 Biochemistry (3 Credits)

An advanced overview of general biochemistry including a study of protein structure and their physical properties; how these properties relate to catalysis, regulation of catalysis and metabolic chemistry with respect to their relationship to physiological conditions.

CLFS710 Experimental Biology (6 Credits)

Participants develop skills in four areas of biological research while investigating a variety of biological systems. Those areas include: (1) iterative scientific methods, (2) basic laboratory techniques, (3) experimental design and analysis, and (4) critical evaluation of published research.

Formerly: LFSC710.

CLFS725 Experimental Design (2 Credits)

Experimental design and statistics for science teachers that emphasizes the underlying structure of data and how this affects the quality and reliability of experiments. Examines the nature of data, the methods for designing rigorous experiments, important experimental design formats, and the relationships between data structure and analysis. Course work focuses on the design and analysis of original experiments for a series of research problems.

Credit Only Granted for: LFSC710, LFSC719, or LFSC725.

Formerly: LFSC719.

500-level courses

CLFS510 Concepts of Modern Biology (3 Credits)

Discussion of recent advancements in the biological sciences. Includes in depth treatment of the background information responsible for the advancements. Not acceptable for credit towards a degree.

Prerequisite: Permission of CMNS-Chemical & Life Sciences department.

CLFS520 Concepts of Modern Chemistry (3 Credits)

Basic concepts and recent advances in the chemical sciences. It is designed to be a review of the first two years of college chemistry for the student pursuing the Master of Life Science degree with a concentration in chemistry. Also includes material preparatory for LFSC courses such as LFSC 690 and LFSC 655. A basic text supplemented by on line text, problems and links. (Not acceptable for credit towards a degree).

CMLT - Comparative Literature

CMLT469 The Continental Novel (3 Credits)

The novel in translation from Stendhal through the existentialists, selected from literatures of France, Germany, Italy, Russia, and Spain.

CMLT479 Major Contemporary Authors (3 Credits)**CMLT488 Genres (3 Credits)**

A study of a recognized literary form, such as tragedy, film, satire, literary criticism, comedy, tragicomedy, etc.

Repeatable to: 6 credits if content differs.

CMLT489 Major Writers (3 Credits)

Each semester two major writers from different cultures and languages will be studied. Authors will be chosen on the basis of significant relationships of cultural and aesthetic contexts, analogies between their respective works, and the importance of each writer to his literary tradition.

CMLT498 Selected Topics in Comparative Studies (3 Credits)**CMLT639 Studies in the Renaissance (3 Credits)**

Repeatable to: 9 credits.

CMLT649 Studies in Eighteenth Century Literature (3 Credits)

Studies in eighteenth century literature: as announced.

Repeatable to: 9 credits.

CMLT658 Studies in Romanticism (3 Credits)

Studies in romanticism: as announced.

Repeatable to: 9 credits.

CMLT679 Topics in Comparative Studies (3 Credits)

Seminar in modern and contemporary literature: as announced.

Repeatable to: 9 credits.

CMLT699 Independent Study (1-6 Credits)

Research and writing on specific readings on a topic selected by the student which is approved and supervised by a faculty member.

Restriction: Permission of instructor.

Repeatable to: 9 credits if content differs.

CMLT702 Cultures of Theory (3 Credits)

An exploration of the socio-historic, material, and cultural contexts of various theoretical practices and traditions.

Prerequisite: Must have completed an introductory course in critical theory.

Cross-listed with: ENGL702.

Credit Only Granted for: CMLT702 or ENGL702.

CMLT709 Seminar in Transnational Literatures and Cultures (3 Credits)

Examines cultural and political ideas as they circulate across nations in literary and/or other forms (film, song, visual culture, digital works, etc.) in both historical and modern-day contexts.

Cross-listed with: ENGL709.

Restriction: Permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

CMLT788 Practicum in Comparative Studies (1-6 Credits)

Practical professional training for individuals and groups of students in supervised settings.

Prerequisite: Permission of ARHU-English department.

Repeatable to: 20 credits if content differs.

CMLT799 Master's Thesis Research (1-6 Credits)**CMLT898 Pre-Candidacy Research (1-8 Credits)****CMLT899 Doctoral Dissertation Research (1-8 Credits)**

CMSC - Computer Science

CMSC401 Algorithms for Geospatial Computing (3 Credits)

An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.

Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.

Cross-listed with: GEOG470.

Jointly offered with: GEOG770.

Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.

Formerly: GEOG498I.

CMSC411 Computer Systems Architecture (3 Credits)

Input/output processors and techniques. Intra-system communication, buses, caches. Addressing and memory hierarchies. Microprogramming, parallelism, and pipelining.

Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: ENEE446 or CMSC411.

CMSC412 Operating Systems (4 Credits)

A hands-on introduction to operating systems, including topics in: multiprogramming, communication and synchronization, memory management, IO subsystems, and resource scheduling policies. The laboratory component consists of constructing a small kernel, including functions for device IO, multi-tasking, and memory management.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457).

Restriction: Permission of CMNS-Computer Science department; or must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)).

Credit Only Granted for: CMSC412 or ENEE447.

CMSC414 Computer and Network Security (3 Credits)

An introduction to the topic of security in the context of computer systems and networks. Identify, analyze, and solve network-related security problems in computer systems. Fundamentals of number theory, authentication, and encryption technologies, as well as the practical problems that have to be solved in order to make those technologies workable in a networked environment, particularly in the wide-area Internet environment.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC414, ENEE459C, or ENEE457.

CMSC416 Introduction to Parallel Computing (3 Credits)

Introduction to parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development, and performance analysis of parallel programs.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.

Jointly offered with: CMSC616.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC416, CMSC498X, CMSC616, or CMSC818X.

Formerly: CMSC498X.

CMSC417 Computer Networks (3 Credits)

Computer networks and architectures. The OSI model including discussion and examples of various network layers. A general introduction to existing network protocols. Communication protocol specification, analysis, and testing.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC420 Advanced Data Structures (3 Credits)

Description, properties, and storage allocation functions of data structures including balanced binary trees, B-Trees, hash tables, skiplists, tries, KD-Trees and Quadrees. Algorithms for manipulating structures. Applications from areas such as String Processing, Computer Graphics, Information Retrieval, Computer Networks, Computer Vision, and Operating Systems.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC421 Introduction to Artificial Intelligence (3 Credits)

Introduces a range of ideas and methods in AI, varying semester to semester but chosen largely from: automated heuristic search, planning, games, knowledge representation, logical and statistical inference, learning, natural language processing, vision, robotics, cognitive modeling, and intelligent agents. Programming projects will help students obtain a hands-on feel for various topics.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC422 Introduction to Machine Learning (3 Credits)

Machine Learning studies representations and algorithms that allow machines to improve their performance on a task from experience. This is a broad overview of existing methods for machine learning and an introduction to adaptive systems in general. Emphasis is given to practical aspects of machine learning and data mining.

Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and permission of CMNS-Computer Science department.

CMSC423 Bioinformatic Algorithms, Databases, and Tools (3 Credits)

An introduction to the main algorithms, databases, and tools used in bioinformatics. Topics may include assembly and analysis of genome sequences, reconstructing evolutionary histories, predicting protein structure, and clustering of biological data. Use of scripting languages to perform analysis tasks on biological data. No prior knowledge of biology is assumed.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC424 Database Design (3 Credits)

Students are introduced to database systems and motivates the database approach as a mechanism for modeling the real world. An in-depth coverage of the relational model, logical database design, query languages, and other database concepts including query optimization, concurrency control; transaction management, and log based crash recovery. Distributed and Web database architectures are also discussed.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC425 Game Programming (3 Credits)

An introduction to the principles and practice of computer game programming and design. This includes an introduction to game hardware and systems, the principles of game design, object and terrain modeling, game physics, artificial intelligence for games, networking for games, rendering and animation, and aural rendering. Course topics are reinforced through the design and implementation of a working computer game.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.

Restriction: Permission of CMNS-Computer Science department.

CMSC426 Computer Vision (3 Credits)

An introduction to basic concepts and techniques in computervision. This includes low-level operations such as image filtering and edge detection, 3D reconstruction of scenes using stereo and structure from motion, and object detection, recognition and classification.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351 and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program; or permission of the instructor.

Restriction: Permission of CMNS-Computer Science department.

CMSC427 Computer Graphics (3 Credits)

An introduction to 3D computer graphics, focusing on the underlying building blocks and algorithms for applications such as 3D computer games, and augmented and virtual reality (AR/VR). Covers the basics of 3D image generation and 3D modeling, with an emphasis on interactive applications. Discusses the representation of 3D geometry, 3D transformations, projections, rasterization, basics of color spaces, texturing and lighting models, as well as programming of modern Graphics Processing Units (GPUs). Includes programming projects where students build their own 3D rendering engine step-by-step.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Restriction: Permission of CMNS-Computer Science department.

CMSC430 Introduction to Compilers (3 Credits)

Topics include lexical analysis, parsing, intermediate representations, program analysis, optimization, and code generation.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC433 Programming Language Technologies and Paradigms (3 Credits)

Programming language technologies (e.g., object-oriented programming), their implementations and use in software design and implementation.

Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

CMSC434 Introduction to Human-Computer Interaction (3 Credits)

Assess usability by quantitative and qualitative methods. Conduct task analyses, usability tests, expert reviews, and continuing assessments of working products by interviews, surveys, and logging. Apply design processes and guidelines to develop professional quality user interfaces. Build low-fidelity paper mockups, and a high-fidelity prototype using contemporary tools such as graphic editors and a graphical programming environment (eg: Visual Basic, Java).

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC435 Software Engineering (3 Credits)

State-of-the-art techniques in software design and development. Laboratory experience in applying the techniques covered. Structured design, structured programming, top-down design and development, segmentation and modularization techniques, iterative enhancement, design and code inspection techniques, correctness, and chief-programmer teams. The development of a large software project.

Prerequisite: 1 course with a minimum grade of C- from (CMSC412, CMSC417, CMSC420, CMSC430, CMSC433, ENEE447); and permission of CMNS-Computer Science department.

CMSC436 Programming Handheld Systems (3 Credits)

Fundamental principles and concepts that underlie the programming of handheld systems, such as mobile phones, personal digital assistants, and tablet computers. Particular emphasis will be placed on concepts such as limited display size, power, memory and CPU speed; and new input modalities, where handheld systems differ substantially from non-handheld systems, and thus require special programming tools and approaches. Students will apply these concepts and principles in the context of an existing handset programming platform.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

CMSC437 Introduction to Quantum Software Laboratory (3 Credits)

Introductory Programming/Software laboratory for quantum computing. Understand the existing programming tools for quantum computers and the characteristics of quantum hardware. Develop quantum application prototypes and tools to characterize and mitigate the limitations of quantum hardware.

Prerequisite: Minimum grade of C- in CMSC457 or PHYS467; and familiarity with basic programming, languages (e.g., Python).

Restriction: Permission of CMNS-Computer Science department.

CMSC451 Design and Analysis of Computer Algorithms (3 Credits)

Fundamental techniques for designing efficient computer algorithms, proving their correctness, and analyzing their complexity. General topics include graph algorithms, basic algorithm design paradigms (such as greedy algorithms, divide-and-conquer, and dynamic programming), network flows, NP-completeness, and other selected topics in algorithms.

Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC452 Elementary Theory of Computation (3 Credits)

Techniques are developed to determine the difficulty of a problem relative to a model of computation. Topics include Finite Automata, P, NP, decidability, undecidability, and communication complexity.

Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC454 Algorithms for Data Science (3 Credits)

Fundamental methods for processing a high volume of data. Methods include stream processing, locally sensitive hashing, web search methods, page rank computation, network and link analysis, dynamic graph algorithms as well as methods to handle high dimensional data/dimensionality reduction.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.

Restriction: Permission of CMSC-Computer Science department.

CMSC456 Cryptography (3 Credits)

The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.

Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor .

Cross-listed with: MATH456, ENEE456.

Credit Only Granted for: MATH456, CMSC456 or ENEE456.

CMSC457 Introduction to Quantum Computing (3 Credits)

An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).

Restriction: Permission of CMNS-Computer Science department.

Additional Information: No previous background in quantum mechanics is required.

CMSC460 Computational Methods (3 Credits)

Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects.

Intended primarily for students in the physical and engineering sciences.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246.

Cross-listed with: AMSC460.

Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

CMSC466 Introduction to Numerical Analysis I (3 Credits)

Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410.

Cross-listed with: AMSC466.

Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

CMSC470 Introduction to Natural Language Processing (3 Credits)

Introduction to fundamental techniques for automatically processing and generating natural language with computers. Machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of natural language. Application of these techniques in a series of assignments designed to address a core application such as question answering or machine translation.

Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Restriction: Permission of CMNS-Computer Science department.

CMSC471 Introduction to Data Visualization (3 Credits)

Datasets are becoming increasingly large and complex, requiring intuitive ways to explore and interpret them quickly and efficiently. In this case, a picture is worth a thousand words: visualizations enable us to transform data into images that are easier to understand and reason about, compared to raw numbers and raw text. Visualizations are critical tools in externalizing and organizing our knowledge and insights, whether to explore collected datasets to improve our understanding of the physical world, to assess and debug analysis/experimental workflows, or to present new and interesting results to diverse audiences. In this course we will study techniques and algorithms for creating effective visualizations based on principles from graphic design, perceptual psychology, and cognitive science. Students will learn how to design and build interactive visualizations for the web, using the D3.js (Data-Driven Documents) framework.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science Department.

Restriction: Permission of the CMNS-Computer Science Department.

Credit Only Granted for: CMSC471 or CMSC4980.

Formerly: CMSC4980.

CMSC472 Introduction to Deep Learning (3 Credits)

An introduction to deep learning, a machine learning technique, as well as its applications to a variety of domains. Provides a broad overview of deep learning concepts including neural networks, convolutional neural networks, recurrent neural networks, generative models, and deep reinforcement learning, and an intuitive introduction to basics of machine learning such as simple models, learning paradigms, optimization, overfitting, importance of data, and training caveats.

Prerequisite: Minimum grade of C- or higher in CMSC330 and CMSC351; and 1 course with a minimum grade of C- or higher from (MATH240, MATH461).

Restriction: Permission of the CMNS-Computer Science department.

Or must be in the (Computer Science (Doctoral), Computer Science (Master's) program.

Credit Only Granted for: CMSC498L or CMSC472.

Formerly: CMSC498L.

CMSC473 Capstone in Machine Learning (3 Credits)

Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.

Prerequisite: Minimum grade of C- or higher in CMSC421 or CMSC422.

Recommended: Background or exposure to machine learning topics is strongly encouraged.

Restriction: Permission of instructor and Permission of CMSC - Computer Science department.

Credit Only Granted for: CMSC498P or CMSC473.

Formerly: CMSC498P.

Additional Information: Students will be paired with project advisors from the UMD faculty or alternatively, an industry advisor. Students are encouraged to plan for projects results that can be published at academic conferences or will impact academic research.

CMSC474 Introduction to Computational Game Theory (3 Credits)

Game theory deals with interactions among agents (either human or computerized) whose objectives and preferences may differ from the objectives and preferences of the other agents. It will also provide a comprehensive introduction to game theory, concentrating on its computational aspects.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Credit Only Granted for: CMSC474, ECON414, GVPT390 or GVPT399A.

CMSC475 Combinatorics and Graph Theory (3 Credits)

General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340). And permission of CMNS-Computer Science department; or permission of CMNS-Mathematics department. Cross-listed with MATH475 .

CMSC477 Robotics Perception and Planning (3 Credits)

A hands-on introduction to perception and planning for robotics, including rigid body transformations and rotations, dynamics and control of mobile robots/drones, graph based and sampling based planning algorithms, Bayesian and Kalman filtering, camera models and calibration, projective geometry, visual features, optical flow, pose estimation, RANSAC and Hough transform, structure from motion, visual odometry, machine learning basics, visual recognition and learning.

Prerequisite: 1 course from (MATH240, MATH341, MATH461); and (ENEE467 or CMSC420).

Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Computer Science department.

CMSC488 Special Topics in Computer Science (1-3 Credits)

Seminar courses that allow students to pursue new and emerging areas of Computer Science.

Restriction: Permission of CMNS-Computer Science department.

Repeatable to: 6 credits if content differs.

Additional Information: Course may be used as electives for the undergraduate degree and minor.

CMSC498 Selected Topics in Computer Science (1-3 Credits)

An individualized course designed to allow a student or students to pursue a selected topic not taught as a part of the regular course offerings under the supervision of a Computer Science faculty member. In addition, courses dealing with topics of special interest and/or new emerging areas of computer science will be offered with this number. Selected topics courses will be structured very much like a regular course

with homework, project and exams. Credit according to work completed
Restriction: Permission of CMNS-Computer Science department.

CMSC499 Independent Undergraduate Research (1-3 Credits)

Students are provided with an opportunity to participate in a computer science research project under the guidance of a faculty advisor. Format varies. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper delineating their contribution to the field.

Restriction: Must be in one of the following programs (Computer Science; Engineering: Computer) ; and permission of CMNS-Computer Science department.

CMSC601 Computational and Mathematical Analysis of Biological Networks across Scales (3 Credits)

Describe, implement and analyze algorithms that solve fundamental problems in biological network analysis: descriptive summaries of network structure and properties, probabilistic and dynamical network models, statistical models for networked data and network visualization.

Prerequisite: CMSC423; or equivalent.

Credit Only Granted for: CMSC8280 or CMSC601.

Formerly: CMSC8280.

CMSC614 Computer and Network Security (3 Credits)

Advanced topics in computer and network security, including: anonymity, privacy, memory safety, malware, denial of service attacks, trusted hardware, security design principles, and empirically measuring security "in the wild". This will be a largely paper-driven course (there is no textbook), preparing students for research in (or around) the broad area of security. Students will gain first-hand experience launching attacks in controlled environments. The bulk of the grade will be based on a final, semester-long group project.

Recommended: Knowledge of C programming.

Restriction: Must be in the Computer Science Master's or Doctoral programs.

Credit Only Granted for: CMSC8180 or CMSC614.

Formerly: CMSC8180.

CMSC616 Foundations of Parallel Computing (3 Credits)

Covers the foundations of parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development and analysis of parallel programs.

Prerequisite: CMSC411 and CMSC412; or permission of instructor.

Restriction: Must be in the Computer Science or Applied Mathematics and Scientific Computation master's or doctoral programs.

Credit Only Granted for: CMSC616 or CMSC818X.

Formerly: CMSC818X.

CMSC630 Foundations of Software Verification (3 Credits)

Topics in program verification. Operational semantics of programs. Preconditions and postconditions. Axiomatic proof systems and predicate transformers. Temporal logic and model checking. Process algebra, semantic equivalences and algebraic reasoning.

Prerequisite: CMSC330; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC631 Program Analysis and Understanding (3 Credits)

Techniques for static analysis of source code and modern programming paradigms. Analysis techniques: data flow analysis, program dependence graphs, program slicing, abstract interpretation. The meaning of programs: denotational semantics, partial evaluation. Advanced treatment of abstraction mechanisms: polymorphic types, operation overloading, inheritance, object-oriented programming and ML-like programming languages.

Prerequisite: CMSC330; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC634 Empirical Research Methods for Computer Science (3 Credits)

A graduate-level introductory course on empirical research methods for computer scientists. Experimental techniques for evaluating software systems and processes, human performance using interfaces, programming environments, and software engineering methods. Introduction to constructs and methods of measurements, qualitative and quantitative design, quasi-experimental and non-experimental design, baseline design, and statistical analysis.

Recommended: An introductory statistics class.

Restriction: Must be in Computer Science (Master's) program; or must be in Computer Science (Doctoral) program; or permission of instructor.

Credit Only Granted for: CMSC838G (Fall2005) or CMSC634.

CMSC651 Analysis of Algorithms (3 Credits)

Efficiency of algorithms, orders of magnitude, recurrence relations, lower-bound techniques, time and space resources, NP-complete problems, polynomial hierarchies, and approximation algorithms. Sorting, searching, set manipulation, graph theory, matrix multiplication, fast Fourier transform, pattern matching, and integer and polynomial arithmetic.

Prerequisite: CMSC451.

CMSC652 Complexity Theory (3 Credits)

This course will define what it means for a problem to be hard (or easy) in a variety of ways. The emphasis will be on natural problems. Topics may include NP-completeness, Sparse Sets, Graph Isomorphism (why it is thought to not be NP-complete), Counting problems, and approximation problems.

Prerequisite: CMSC451 or CMSC452; or permission of instructor.

Credit Only Granted for: CMSC652 or CMSC858G.

Formerly: CMSC858G.

CMSC656 Introduction to Cryptography (3 Credits)

Introduction to modern cryptography. Topics include symmetric-key encryption, hash functions, message-authentication codes, block-cipher design, theoretical foundations, number theory, public-key encryption, and digital signatures.

Prerequisite: CMSC451, CMSC452, or CMSC456.

Credit Only Granted for: CMSC656 or CMSC858K.

Formerly: CMSC858K.

CMSC657 Introduction to Quantum Information Processing (3 Credits)

An introduction to the field of quantum information processing. Students will be prepared to pursue further study in quantum computing, quantum information theory, and related areas.

Prerequisite: Familiarity with complex numbers and basic concepts in linear algebra (e.g., eigenvalues, eigenvectors, Hermitian and unitary matrices) is required.

Credit Only Granted for: CMSC657 or CMSC858K.

Formerly: CMSC858K.

Additional Information: Previous background in quantum mechanics or theory of computation is not required.

CMSC660 Scientific Computing I (3 Credits)

Fundamental techniques in scientific computation with an introduction to theory and software for each topic. Computer numbers and sources of errors, numerical linear algebra, optimization, and Monte Carlo methods.

Prerequisite: Must have knowledge of Matlab or Python.

Cross-listed with: AMSC660.

Credit Only Granted for: AMSC660 or CMSC660.

CMSC661 Scientific Computing II (3 Credits)

Numerical methods for solving ordinary and partial differential equations (elliptic, parabolic, hyperbolic, and dispersive): motivation, analysis, and implementation. Finite difference methods, finite element methods, Fourier and Chebyshev spectral methods, and meshless methods.

Prerequisite: Must have knowledge of Matlab or Python. Must have basic knowledge of ordinary and partial differential equations (MATH246 and MATH462 or equivalent, or permission of instructor).

Cross-listed with: AMSC661.

Credit Only Granted for: AMSC661 or CMSC661.

CMSC662 Computer Organization and Programming for Scientific Computing (3 Credits)

This course presents fundamental issues of computer hardware, software parallel computing, and scientific data management for programming for scientific computation.

Prerequisite: Must have Knowledge of C or Fortran.

Cross-listed with: AMSC662.

Credit Only Granted for: AMSC662 or CMSC662.

CMSC663 Advanced Scientific Computing I (3 Credits)

In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (CMSC663/CMSC663 and AMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.

Prerequisite: AMSC660 or CMSC660; and (AMSC661 or CMSC661).

Cross-listed with: AMSC663.

Restriction: Permission of instructor.

Credit Only Granted for: AMSC663 or CMSC663.

CMSC664 Advanced Scientific Computing II (3 Credits)

In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (AMSC663/CMSC663 and CMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.

Prerequisite: AMSC663 or CMSC663.

Cross-listed with: AMSC664.

Restriction: Permission of instructor.

Credit Only Granted for: AMSC664 or CMSC664.

CMSC666 Numerical Analysis I (3 Credits)

Approximation theory, numerical solution of initial-value problems, iterative methods for linear systems, optimization.

Prerequisite: CMSC466 or AMSC466; and MATH410.

Cross-listed with: AMSC666.

Credit Only Granted for: AMSC666 or CMSC666.

CMSC673 Capstone in Machine Learning (3 Credits)

Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.

Prerequisite: Minimum grade of C-in CMSC421 or CMSC422.

Jointly offered with: CMSC473.

Credit Only Granted for: CMSC673, CMSC798P, CMSC473, or CMSC498P.

Formerly: CMSC798P.

CMSC701 Computational Genomics (3 Credits)

An introduction to the algorithms and heuristics used in the analysis of biological sequences. Includes an introduction to string matching and alignment algorithms, phylogenetic analysis, string reconstruction (genome assembly), and sequence pattern recognition (gene and motif finding). A particular emphasis will be placed on the design of efficient algorithms and on techniques for analyzing the time and space complexity of these algorithms. Computational concepts will be presented in the context of current biological applications. No prior knowledge of biology necessary.

CMSC702 Algorithmic Evolutionary Biology (3 Credits)

Covers fundamental computational problems from comparative genomics and evolutionary biology. Topics include multiple sequence alignment and the reconstruction of evolutionary histories (e.g., phylogenetic trees and networks). These tasks are typically framed as NP-hard optimization problems, motivating the development of heuristics based on constraints, graph algorithms, and more recently machine learning. We analyze algorithms from the empirical and theoretical perspectives (e.g., computational complexity, optimality guarantees, and statistical consistency under popular models of evolution). Lastly, we discuss how algorithms are leveraged in emerging applications, like evolutionary analyses of tumors and pathogens, along with their limitations and directions for future research.

Restriction: Restricted to Master's/Doctoral students in Computer Science, Electrical and Computer, Engineering, Mathematics, Bioengineering, or permission of instructor.

Credit Only Granted for: CMSC702 or CMSC829A.

Formerly: CMSC829A.

CMSC711 Computer Networks (3 Credits)

Principles, design, and performance evaluation of computer networks. Network architectures including the ISO model and local area networks (LANs). Communication protocols and network topology.

Prerequisite: CMSC412; or students who have taken courses with comparable content may contact the department.

CMSC712 Distributed Algorithms and Verification (3 Credits)

Study of algorithms from the distributed and concurrent systems literature. Formal approach to specifying, verifying, and deriving such algorithms. Areas selected from mutual exclusion, resource allocation, quiescence detection, election, Byzantine agreements, routing, network protocols, and fault-tolerance. Formal approaches will handle system specification and verification of safety, liveness, and real-time properties.

CMSC715 Wireless and Mobile Systems for the IoT (3 Credits)

Research on the Internet of Things (IoT), from the perspective of wireless networking and mobile sensing. Various techniques, algorithms, and systems that leverage the sensors in smartphones, smartwatches, drones, and IoT devices, to deliver real-world applications

Prerequisite: CMSC417; or permission of instructor.

Recommended: STAT100, MATH141, MATH240, and CMSC106; or equivalent courses .

Credit Only Granted for: CMSC818W or CMSC715.

Formerly: CMSC818W.

CMSC722 Artificial Intelligence Planning (3 Credits)

Automated planning of actions to accomplish some desired goals. Basic algorithms, important systems, and new directions in the field of artificial intelligence planning systems.

Prerequisite: CMSC421; or students who have taken courses with comparable content may contact the department; or permission of CMNS-Computer Science department.

CMSC723 Natural Language Processing (3 Credits)

Introduce fundamental concepts, techniques, and algorithms for the computational handling of natural language. Statistical and machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of human language. Approaches that focus on uncovering linguistic structure, such as syntactic or semantic parsing, as well as those that focus on manipulating text in useful ways, such as question answering or machine translation.

Prerequisite: Minimum grade of C- in CMSC422; and permission of CMNS-Computer Science department.

Cross-listed with: INST735, LING723.

Credit Only Granted for: CMSC723, LING723, or INST735.

Additional Information: CMSC students may only receive PhD Comp. credit for CMSC723 or CMSC823, not both.

CMSC724 Database Management Systems (3 Credits)

Theoretical and implementation issues in advanced database systems. Topics include distributed databases, parallel databases, database client-server architectures, multimedia access methods, advanced query optimization techniques, data semantics and models, object-oriented databases, and deductive and expert database systems.

Restriction: Must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)) ; or permission of instructor; or permission of CMNS-Computer Science department.

CMSC725 Geographical Information Systems and Spatial Databases (3 Credits)

Topics in geographic information systems and spatial databases. Integrates related results from databases, cartography, geography, computer graphics, file access methods, computational geometry, image processing, data structures, and programming languages. Topics include: cartographic modeling, principles of cartography, methods from computational geometry, principles of spatial databases, access methods, and spatial data structures. The architecture of some existing spatial databases and geographic information systems will be examined in greater detail.

Prerequisite: CMSC424 and CMSC420; or permission of instructor.

CMSC726 Machine Learning (3 Credits)

An introduction to modern statistical data analysis using machine learning techniques. The course quickly surveys elementary statistical models (decision trees, nearest neighbors and linear regression) and moves on to more complex algorithms such as support vector machines, boosting, neural networks, structured prediction, apprenticeship learning, online learning, bandits, recommender systems and reinforcement learning. Throughout an emphasis is placed on mathematical rigor.

Prerequisite: CMSC421 or CMSC422; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC727 Neural Modeling (3 Credits)

Fundamental methods of neural modeling. Surveys historical development and recent research results from both the computational and dynamical systems perspective. Logical neurons, perceptrons, linear adaptive networks, attractor neural networks, competitive activation methods, error back-propagation, self-organizing maps, and related topics. Applications in artificial intelligence, cognitive science, and neuroscience.

Prerequisite: CMSC421; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC730 Interactive Technologies in Human-Computer Interaction (3 Credits)

Ubiquitous and mobile computing, wearables, virtual/augmented reality, natural user interfaces, tangible UIs, interactive fabrication.

Restriction: Must be in the Computer Science Master's or Doctoral program; or permission of instructor.

Credit Only Granted for: CMSC838J or CMSC730.

Formerly: CMSC838J.

CMSC732 Human Factors in Security and Privacy (3 Credits)

Introducing a variety of important topics at the intersection of human factors and privacy and security, and developing skills in designing human-subjects studies to evaluate problems and solutions related to these topics.

Recommended: Previous coursework in human-computer interaction, security and privacy.

Credit Only Granted for: CMSC818D or CMSC732.

Formerly: CMSC818D.

CMSC733 Computer Processing of Pictorial Information (3 Credits)

Input, output, and storage of pictorial information. Pictures as information sources, efficient encoding, sampling, quantization, approximation. Position-invariant operations on pictures, digital and optical implementations, the pax language, applications to matched and spatial frequency filtering. Picture quality, image enhancement and image restoration. Picture properties and pictorial pattern recognition. Processing of complex pictures; figure extraction, properties of figures. Data structures for pictures description and manipulation; picture languages. Graphics systems for alphanumeric and other symbols, line drawings of two- and three-dimensional objects, cartoons and movies.

Prerequisite: CMSC420.

CMSC734 Information Visualization (3 Credits)

Information visualization defined in relation to graphics, scientific visualization, databases, data mining, and human-computer interaction. Visualizations for dimensional, temporal, hierarchical and network data. Examines design alternatives, algorithms and data structures, coordinated views, and human factors evaluations of efficacy.

Prerequisite: CMSC434; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC737 Fundamentals of Software Testing (3 Credits)

Examine fundamental software testing and related program analysis techniques. In particular, the important phases of testing will be reviewed, emphasizing the significance of each phase when testing different types of software. Concepts include: test generation, oracles, prioritization and coverage, regression and mutation testing, and program analysis.

Prerequisite: CMSC435; or students who have taken courses with comparable content may contact the department; or permission of instructor.

Formerly: CMSC838M.

CMSC740 Advanced Computer Graphics (3 Credits)

An introduction to advanced concepts in computer graphics. Includes an introduction to realistic rendering based on physical properties of light transport, radiometric concepts, and the rendering equation; Monte Carlo integration techniques to solve the rendering equation such as path tracing and multiple importance sampling; and neural network techniques for efficient sampling and denoising. Further discusses recent advances in 3D modeling and reconstruction, such as neural network-based 3D reconstruction; inverse rendering using neural radiance fields and differentiable rendering; and generative modeling for images, videos, and 3D data.

Prerequisite: MATH240 and CMSC420; or permission of instructor.

CMSC742 Algorithms in Machine Learning: Guarantees and Analyses (3 Credits)

Machine learning studies automatic methods for learning to make accurate predictions, to understand patterns in observed features and to make useful decisions based on past observations. This course introduces theoretical machine learning, including mathematical models of machine learning, and the design and rigorous analysis of learning algorithms. Topics include: (1) Learning theory (traditional and modern), including PAC learning basics, Boosting theory and PAC learning in neural nets. (2) Latent variable graphical models, including spectral methods for learning latent variable models. (3) Reinforcement learning theory, including algorithms, sample complexity and analyses.

Prerequisite: CMSC422 or equivalent; or permission of instructor.

Credit Only Granted for: CMSC828U or CMSC732.

Formerly: CMSC828U.

CMSC751 Parallel Algorithms (3 Credits)

A presentation of the theory of parallel computers and parallel processing. Models of parallel processing and the relationships between these models. Techniques for the design and analysis of efficient parallel algorithms including parallel prefix, searching, sorting, graph problems, and algebraic problems. Theoretical limits of parallelism.

Prerequisite: CMSC451; or ENEE641; or students who have taken courses with comparable content may contact the department.

Cross-listed with: ENEE651.

Credit Only Granted for: ENEE459P, ENEE651, ENEE759K or CMSC751.

Formerly: ENEE759K.

CMSC752 Ramsey Theory and its Applications (3 Credits)

Theorems about when a coloring of a graph (or other objects) has to yield a nice monochromatic object. Applications will be to computer science theory and to mathematics.

Prerequisite: Any CMSC45X course or any 400-level math course.

Credit Only Granted for: CMSC858R or CMSC752.

Formerly: CMSC858R.

CMSC754 Computational Geometry (3 Credits)

Introduction to algorithms and data structures for computational problems in discrete geometry (for points, lines, and polygons) primarily in two and three dimensions. Topics include triangulations and planar subdivisions, geometric search and intersection, convex hulls, Voronoi diagrams, Delaunay triangulations, line arrangements, visibility, and motion planning.

Prerequisite: CMSC451 and CMSC420; or permission of instructor.

CMSC756 Robotics (3 Credits)

Overview on fundamental components of robotic systems, including the sensing and actuation, control and modeling of motion and perception, dynamics and kinematics, motion planning and manipulation of robots.

Prerequisite: CMSC420, CMSC106, CMSC466, and MATH240; or equivalent.

Restriction: Must be in the Computer Science Master's or Doctoral programs.

Credit Only Granted for: CMSC818N or CMSC756.

Formerly: CMSC818N.

CMSC763 Advanced Linear Numerical Analysis (3 Credits)

Advanced topics in numerical linear algebra, such as dense eigenvalue problems, sparse elimination, iterative methods, and other topics.

Prerequisite: AMSC666 or CMSC666; or permission of instructor.

Cross-listed with: AMSC763.

Credit Only Granted for: AMSC600, AMSC763, CMSC760, or CMSC763.

Formerly: AMSC600 and CMSC760.

CMSC764 Advanced Numerical Optimization (3 Credits)

Modern numerical methods for solving unconstrained and constrained nonlinear optimization problems in finite dimensions. Design of computational algorithms and the analysis of their properties.

Prerequisite: MATH410 or equivalent; or permission of instructor.

Credit Only Granted for: AMSC607, AMSC764, or CMSC764.

CMSC773 Computational Linguistics II (3 Credits)

Natural language processing with a focus on corpus-based statistical techniques. Topics include: stochastic language modeling, smoothing, noisy channel models, probabilistic grammars and parsing; lexical acquisition, similarity-based methods, word sense disambiguation, statistical methods in NLP applications; system evaluation.

Prerequisite: CMSC723, INST735, or LING723; or permission of instructor.

Cross-listed with: LING773, INST736.

Credit Only Granted for: CMSC773, LING773, or INST736.

Additional Information: CMSC students may only receive PhD Comp. credit for CMSC723 or CMSC823, not both.

CMSC798 Master's Non-Thesis Research (1-3 Credits)

Restriction: Permission of CMNS-Computer Science department.

Repeatable to: 6 credits.

CMSC799 Master's Thesis Research (1-6 Credits)**CMSC800 How to Conduct Great Research (1 Credit)**

Develop research skills so as to promote high quality and high impact.

Restriction: Must be in the Computer Science doctoral program.

Credit Only Granted for: CMSC798F or CMSC800.

Formerly: CMSC798F.

CMSC801 Department Internal Research Seminar (1 Credit)

Research overviews from faculty to help introduce departmental research to graduate students.

Credit Only Granted for: CMSC798E or CMSC801.

Formerly: CMSC798E.

CMSC818 Advanced Topics in Computer Systems (1-3 Credits)

Advanced topics selected by the faculty from the literature of computer systems to suit the interest and background of students.

Restriction: Permission of instructor.

Repeatable to: 99 credits.

CMSC828 Advanced Topics in Information Processing (1-3 Credits)

Advanced topics selected by the faculty from the literature of information processing to suit the interest and background of students.

Restriction: Permission of instructor.

Repeatable to: 99 credits.

CMSC829 Advanced Topics in Bioinformatics and Computational Biology (3 Credits)

Advanced topics selected by the faculty from the literature of bioinformatics to suit the interest and background of students.

CMSC838 Advanced Topics in Programming Languages (1-3 Credits)

Advanced topics selected by faculty from the literature of programming languages to suit the interest and background of students.

Restriction: Permission of instructor.

Repeatable to: 99 credits.

CMSC839 Advanced Topics in Human-Computer Interaction (1-3 Credits)

Advanced topics selected by the faculty from the literature of human-computer interaction to suit the interest and background of students.

Repeatable to: 15 credits.

CMSC848 Selected Topics in Information Processing (1-3 Credits)

Selected topics by the faculty from the literature of information processing to suit the interest and background of students.

Repeatable to: 99 credits if content differs.

CMSC858 Advanced Topics in Theory of Computing (1-3 Credits)

Advanced topics selected by the faculty from the literature of theory of computing to suit the interest and background of students.

Restriction: Permission of instructor.

Repeatable to: 99 credits.

CMSC878 Advanced Topics in Numerical Methods (1-3 Credits)

Advanced topics selected by the faculty from the literature of numerical methods to suit the interest and background of students.

Restriction: Permission of instructor.

Repeatable to: 99 credits.

CMSC898 Pre-Candidacy Research (1-8 Credits)

Advanced topics selected by the faculty from the literature of applications of computer science to suit the interest and background of students.

Restriction: Permission of instructor.

CMSC899 Doctoral Dissertation Research (1-8 Credits)

COMM - Communication

COMM400 Research Methods in Communication (3 Credits)

Philosophy of scientific method; role of theory; research ethics; empirical research methods (measurement, sampling, design, analysis).

Prerequisite: COMM250; and must have an introductory course in statistics.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM400 or COMM307.

COMM401 Interpreting Strategic Discourse (3 Credits)

Principles and approaches for practical analysis of discourse designed to shape audience opinion.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

COMM402 Communication Theory and Process (3 Credits)

Philosophical and conceptual analysis of communication theories.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

COMM419 Special Topics in Health Communication (3 Credits)

Covers a variety of topics of health communication. Blends theoretical concepts and practical concerns that impact upon health communication processes. This course covers a specific topic of health communication in greater depth and applies scholarly discoveries to real-world examples.
Prerequisite: COMM304.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM420 Theories of Group Discussion (3 Credits)

Current theory, research and techniques regarding small group process, group dynamics, leadership and decision-making.

COMM421 Communicating Leadership (3 Credits)

Examines the nature of leadership, theories of leadership from a communication perspective, relationships between leadership, authority, power, and ethics. Explores leadership responsibilities, commitments, and actions.

COMM422 Communication Management (3 Credits)

Communication policies, plans, channels, and practices in the management of the communication function in organizations.

COMM423 Communication Processes in Conferences (3 Credits)

Group participation in conferences, methods of problem solving, semantic aspects of language, and the function of conferences in business, industry and government settings.

COMM424 Communication in Complex Organizations (3 Credits)

Structure and function of communication within organizations: organizational climate and culture, information flow, networks and role relationships.

COMM425 Negotiation and Conflict Management (3 Credits)

Role of communication in shaping negotiation and conflict processes and outcomes.

COMM426 Conflict Management (3 Credits)

Role of communication in managing conflict processes.

Recommended: COMM425 and COMM250.

COMM427 Crisis Communication (3 Credits)

Explores theories and research related to communication before, during, and after a crisis. Students examine the fundamentals of organizational communication, crisis management, and strategic and crisis communication planning before examining case studies of a number of real-life crises: organizational crises, natural disasters, accidents, terrorism incidents, health crises, and major crises of credibility.

COMM428 Special Topics Seminar in Dialogues and Deliberation (3 Credits)

A study in public dialogue and deliberation theory and practice. This course will integrate recorded lectures, readings, videos, Public Dialogues, teamwork, and historical research.

Prerequisite: COMM250; and must have completed or be concurrently enrolled in COMM306.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM435 Theories of Interpersonal Communication (3 Credits)

Major theoretical approaches and research trends in the study of interpersonal communication.

COMM436 Interpersonal Arguing (3 Credits)

An examination of face to face arguing.

Prerequisite: COMM400 and COMM250.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM436 or COMM498I.

Formerly: COMM498I.

COMM448 Special Topics in Public Relations (3 Credits)

Courses seek to examine historical and current communication management theories, literature and practices for the purposes of understanding the business environment in which public relations/ communication management operates and applying the best of these theories and practices toward the management of the public relations/ communications functions of an organization.

Prerequisite: COMM201.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM449 Special Topics in Digital Communication (3 Credits)

Explores the topics that have arisen around computers, digital technologies, the internet, big data, surveillance capitalism, and network infrastructures.

Repeatable to: 12 credits if content differs.

COMM450 Ancient Worlds of Rhetoric (3 Credits)

A survey of rhetorical theory across different cultures in antiquity. Emphasizes cultural contexts in which rhetorical acts of advising, instructing, persuading, and arguing emerge. Draws connections between ancient theories and contemporary communication problems.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM450 or COMM650.

COMM452 Rhetoric, Technology, and Culture (3 Credits)

An investigation of the intersections between rhetoric, technology, and culture. Emphasizes critical and cultural approaches to communication technologies. Draws lessons from the history of rhetoric and media to inform contemporary understandings of communication in the context of digitality.

COMM454 Rhetoric of the 1960s (3 Credits)

Study of key rhetoric of the 1960s. Treats rhetoric of relevant Presidents and several protest movements including civil rights, anti-war, and women's liberation. Contrasts traditional modes of argument with alternative rhetorical forms.

Prerequisite: COMM301.

COMM455 Speechwriting (3 Credits)

The study of message strategies in order to research and develop effective speech texts appropriate to speakers and their audiences in various public contexts.

COMM456 Freedom of Speech & the First Amendment (3 Credits)

Examines the U.S. Supreme Court's rulings on freedom of speech cases as grounded in the First Amendment to the U.S. Constitution. It also considers the political and ideological role of "freedom of speech" as a rhetoric organizing and ordering U.S. political culture.

Credit Only Granted for: COMM498Y or COMM456.

Formerly: COMM498Y.

COMM458 Seminar in Political Communication (3 Credits)

The examination of special topics for and theories of political communication.

Prerequisite: COMM250.

Repeatable to: 12 credits if content differs.

COMM459 Special Topics in Science Communication (3 Credits)

This seminar course is designed to help students learn a variety of topics of science communication.

Repeatable to: 12 credits if content differs.

COMM460 Public Life in American Communities, 1634-1900 (3 Credits)

Ways that Americans have used their voice to create public life. Focus is on the diverse social communities that have characterized American life and the place and characteristics of oral discourse in each.

COMM461 Voices of Public Leadership in the Twentieth Century (3 Credits)

Study of the use of speaking in the power struggles of the twentieth century. Focus is on important speakers of the century, their social and policy influence, and the struggle to expand the diversity of voices with power in the public sphere.

COMM462 Visual Communication (3 Credits)

The study of visual communication should change the way one sees the world. Students will observe, analyze, and critique visual images. The ascendance of images in our contemporary world will be demonstrated, methods for critically comprehending how images do persuasive work will be identified, and students will develop a vocabulary for critiquing images, and assist students in creating compelling images.

Credit Only Granted for: COMM462 or COMM498V.

Formerly: COMM498V.

COMM468 Seminar in Mediated Communication (3 Credits)

The examination of special topics related to the study of mediated communication.

Restriction: Junior standing or higher.

Repeatable to: 12 credits if content differs.

COMM469 The Discourse of Social Movements (3 Credits)

Study of key social movements that have influenced American social and political life.

Recommended: COMM301.

Restriction: Junior standing or higher.

Repeatable to: 12 credits if content differs.

COMM470 Listening (3 Credits)

The principles of listening behavior.

COMM472 Nonverbal Communication (3 Credits)

Nonverbal communication in human interaction theory and research on proxemics, kinesics and paralanguage as expression of relationship, affect and orientation within and across cultures.

COMM475 Persuasion (3 Credits)

Bases of persuasion, with emphasis on recent experimental developments in persuasion.

COMM476 Language, Communication, and Action (3 Credits)

Communication as symbolic action through the study of communication ethics. Emerging ethical principles and decision-making in public discourse, interpersonal communication, organizational communication, public relations, health communication, and crisis communication.

Restriction: Must be in the Communication major.

COMM477 Discourse Analysis (3 Credits)

Concepts of textual and discourse analysis applied to speech situations.

COMM478 Communication Colloquium (1 Credit)

Current trends and issues in the field of communication, stressing recent research methods. Recommended for senior and graduate student majors and minors in communication.

Repeatable to: 4 credits if content differs.

COMM482 Intercultural Communication (3 Credits)

The major variables of communication in an intercultural context: cultural, racial and national differences; stereotypes; values; cultural assumptions; and verbal and nonverbal channels.

COMM483 Senior Seminar in Public Relations (3 Credits)

Integration of theory, techniques and research methods into the planning and execution of public relations campaigns for specific organizations. Analysis of research on the case studies of public relations.

Prerequisite: COMM351; and 1 course from (COMM305, COMM306, COMM307, or COMM400).

Additional Information: Students who enrolled after Fall 2020 should not take COMM400 as a prerequisite.

COMM488 Communication Portfolio Project (1 Credit)

Preparation of the professional communication portfolio.

Restriction: Senior standing; and must be in Communication program.

Repeatable to: 3 credits if content differs.

COMM489 Topical Research (1-3 Credits)

Individualized research projects conducted with a faculty sponsor.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 6 credits if content differs.

COMM498 Seminar (3 Credits)

Present-day communication research.

Restriction: Permission of instructor; and senior standing.

Repeatable to: 12 credits.

COMM600 Empirical Research in Communication (3 Credits)

Formerly: SPCH600.

COMM601 Historical-Critical Research in Communication (3 Credits)

Intense study in critical and historical methodology as applicable to research in communication. Emphasis will be placed on the composition and the evaluation of historical-critical studies of significance in the field of rhetorical communication scholarship.

Formerly: SPCH601.

COMM602 Communication Theory (3 Credits)

Fundamental concepts, approaches, and problems in communication theory.

Restriction: Must be in one of the following programs (Communication (Master's); Communication (Doctoral)).

COMM604 Argumentation Theory (3 Credits)

Fundamental concepts, approaches, and problems in argumentation theory.

COMM606 Seminar in Communication Management (3 Credits)

Communication and public relations as a managed function of organizations are introduced. Students learn how managing communication contributes to organizational effectiveness. Using organizational theory, theories of Excellence in public relations and communication management, communication metrics and communication ethics, students build their communication strategic management skills beyond the programmatic level to the functional and organizational levels of decision-making.

Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM607 Seminar in Communication Management Publics (3 Credits)

Research and analysis of publics and how the use of this information builds more effective relationships with strategic constituencies of organizations are emphasized. Students learn and apply to communication management problems the theories of audience segmentation, stakeholders, behavior of activist organizations, conflict resolution, environmental scanning, ethics of organization-public relationships and the situational theory of publics.

Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM609 Fundamentals of Interpreting (1-6 Credits)

Develops a systematic, reflective approach to interpreting tasks in real-world settings and outlines the use of different modes of interpreting under professional working conditions. Provides an overview of interpreting skills with exercises to develop them, including focus on active listening and analysis, effective use of memory, and delivery of the target message. Interpreting strategies and techniques in both dialogue and formal consecutive settings are discussed and practiced in a range of interpreting domains. Includes sight translation.

Prerequisite: Students must complete an admissions test for first year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits.

COMM610 Introduction to Translation and Interpreting Studies (3 Credits)

Provides an overview of the interdisciplinary fields of Translation and Interpreting Studies and establishes relationships between scholarly study and professional practice. Examines how theories and concepts inform practice, guide to a higher level of competence, and address issues of interlingual, intercultural mediation in authentic, real-world settings both past and present. serves as a foundation course for reflective practice and portfolio work through action research methodology and process

Prerequisite: Students must complete an admissions test for first year courses; and permission of ARHU-Communication department.

COMM611 Semniar in Global Communcation Mangement (3 Credits)

Global Communication Management extends the theories of communication management developed in COMM606 and COMM607 to a global level. Students move beyond Western communication management assumptions to examine how practices of communication management differ in different national and/or cultural contexts. Students are challenged to build generic principles of communication management with specific applications that can be used and adapted in the differing countries and cultures of the world whether working in multinational corporations, national governments, or non-governmental organizations (NGO's).

Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM618 Professional Communication: Rhetoric & Style (3 Credits)

Writing instruction in English for professional communicators with a focus on rhetoric, style, and grammar. Designed to teach English writing skills focused on message creation and organization, sentence structure, and language use, typologies of rhetorical genres, registers, and style, research skills, summary-writing skills, to editing skills, and vocabulary building in English writing.

Repeatable to: 6 credits.

COMM619 Consecutive Interpretation (1-6 Credits)

Builds upon the systematic, reflective approach to interpreting in real-world settings introduced in Fundamentals of Interpreting. Consecutive interpreting skills are consolidated through individual and group practice, and any remaining challenges related to consecutive interpreting sub-skills are identified and addressed. Stresses effective analysis, note-taking, and use of voice during exercises in sight translation, dialogue, and formal consecutive interpreting.

Prerequisite: COMM609; and must have completed an admissions test for first year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits.

COMM628 Organization Communication: Research and Intervention (3 Credits)

The role of the internal and external communication consultant as an organizational change-agent. Emphasis upon data gathered to facilitate the communication development of the organization.

Prerequisite: COMM424; or permission of instructor.

Repeatable to: 6 credits if content differs.

Formerly: SPCH628.

COMM629 Introduction to Simultaneous Interpretation (1 Credit)

Builds upon the overview of the simultaneous mode in Fundamentals of Interpreting by reviewing the relationship between consecutive and simultaneous skills and introducing work in the booth. Challenges of simultaneous interpreting, including split attention, ear-voice span, and voice and microphone technique are addressed. Participants become familiar with the booth and exercises required to build simultaneous skills. Role and use of portable equipment in professional settings are discussed. Recommended as preparation for the M.A. entrance examination.

Prerequisite: Admissions test for Graduate Certificate in Interpreting; and COMM609; and permission of ARHU-Communication department.

Recommended: COMM619.

Repeatable to: 3 credits if content differs.

COMM630 Seminar in Public Relations Management (3 Credits)

Relationship of public relations management to organizational structure and communication functions. Objectives, planning, staffing, budgeting, administering, and evaluation of public relations programs.

Credit Only Granted for: COMM630 or JOUR630.

Formerly: JOUR630.

COMM631 Seminar in Public Relations Publics (3 Credits)

Analysis of public relations programs aimed at organizational publics. Media, issue-related, community, employee, governmental, consumer, financial, and student/educator publics. Theories of the nature of publics, communication behavior of publics, and effects of public relations programs aimed at different publics.

Credit Only Granted for: COMM631 or JOUR631.

Formerly: JOUR631.

COMM633 Global Public Relations (3 Credits)

Application of principles of public relations to countries or regions with different cultures, political systems, economic systems, levels of development, media systems, and levels of activism.

Credit Only Granted for: COMM633 or JOUR633.

Formerly: JOUR633.

COMM637 Professional Practice Forum in Translation: Career Portfolio and Exams (1 Credit)

Serves as final preparation for entry into the profession through development of career portfolio to meet summative degree requirement and development of strategies for gaining work as a professional translator. Prepares participants for degree examinations and employer tests through the review of previous exam material and employer testing requirements. Serves as venue for degree examinations, career goal setting and planning for future employment. Participants present and defend career portfolio as summative requirement for MA in translation; MA in Trans. and Localization Project.

Prerequisite: Admissions test for second year courses; and (COMM659 and COMM679); and permission of ARHU-Communication department.

COMM638 Professional Communication: Rhetoric & Voice (3 Credits)

A skills-based course in speaking instruction in English for professional communicators with a focus on public speaking, voice, diction, and pronunciation. Focuses on developing public speaking, voice, diction, and pronunciation skills. Designed to teach message creation and organization, sentence structure, and language use, vocal qualities designed to enhance proper pronunciation, breathing, and articulation skills, register variation, listening skills, English vocabulary, audience adaptation skills with attention to cultural distinctions, presentational skills with visual aids, and interpretive skills.

Repeatable to: 6 credits.

COMM639 Fundamentals of Translation (1-6 Credits)

Develops a systematic, reflective approach to translation involving both the written and spoken word. Provides an overview of domains of translation, associated text categories and translation tasks. Develops strategies to identify, analyze and resolve translation challenges in specific, authentic, real-world contexts. Working with a series of current texts, explores general translation concepts and language-specific strategies. Includes sight translation exercises and introduction to translation resources and computer tools used in the translators workplace.

Prerequisite: Admissions test for first year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits if content differs.

COMM641 Introduction to Computer-Assisted Translation (1 Credit)

Introduces the use of computer-assisted translation tools to support large-scale translation projects and streamline translation processes. Focuses on industry software products that utilize translation memory and terminology management systems. Discusses the role of tools in the entire translation process from pre- to post-editing.

Prerequisite: Admissions test for first year courses; and COMM639; and permission of ARHU-Communication department.

COMM649 Translation for Specific Domains (1-6 Credits)

Builds upon the systematic, reflective approach introduced in Fundamentals of Translation by addressing the development of translation skills required for specialization in specific domains. In written and sight translation exercises include researching specialized subject material, developing and maintaining terminology, and consulting experts in the field. Includes authentic, real-world translation projects in translation teams. Overview of computer-assisted translation tools and continued work on sight translation enable higher levels of productivity under time constraints.

Prerequisite: Admissions test for first year courses; and COMM639; and permission of ARHU-Communication department.

Repeatable to: 8 credits if content differs.

COMM652 Contemporary Rhetorical Theory (3 Credits)

A study of twentieth century theories of rhetoric. Special attention will be devoted to Richard Weaver, Kenneth Burke, Lloyd Bitzer, Ernest Bormann, Walter Fisher, and the continental theorists of communication such as Chaim Perelman and Jurgen Habermas.

Formerly: SPCH652.

COMM655 Seminar in Speechwriting (3 Credits)

Theoretical and practical aspects of speechwriting at an advanced level.

Formerly: SPCH655.

COMM657 Professional Practice Forum in Interpreting: Career Portfolio and Exams (1 Credit)

Serves as final preparation for entry into the profession through development of strategies for gaining work as a professional translator. Prepares participants for degree examinations and employer tests through the review of previous exam material and employer testing requirements. Serves as venue for degree examinations, career goal setting and planning for future employment. Participants present and defend career portfolio and summative requirement for degree.

Prerequisite: COMM719, COMM769, and COMM729; and admissions test for second-year courses; and permission of ARHU-Communication department.

COMM659 Translation for Language-Specific Markets (1-3 Credits)

Builds translation skills to a highly professional level by developing autonomy in completing authentic, real-world translation projects based upon the reflective approach developed in the first-year curriculum. Develops one or more specializations. Completion of individual and group projects covering all aspects of professional translation from subject matter research, terminology work, and use of computer-assisted translation tools. Sight translation and timed exercises to increase production and meet deadlines.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits.

COMM661 Communication and Social Change (3 Credits)

Place of rhetoric as the union of the moral and historical in moments of social definition. Reviews theories of discourse in social change including political change, social movements, consciousness change, and more global change. Application to contemporary change.

COMM668 Risk Communication (3 Credits)

Principles and approaches to risk communication. Emphasis is placed on theoretical trends in risk communication and application to industry. Topics include how to be an effective source of risk communication, understanding audiences, handling the media and designing messages.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 9 credits if content differs.

COMM669 Professional Practice Forum in Translation: Practicum (1-3 Credits)

Provides opportunities to complete real-world translation projects on campus and in the public service, legal, business, and political communities as translators, project managers and translators/reviewers working on group projects. Collaboration with participants in the interpreting practicum is also sought to prepare multilingual texts for practicum events and familiarize participants with conference translation. Complements Translation for Specific Markets, and practicum projects are included in course and career reflective practice portfolios. Requires independent study plan agreed with course instructor.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

Repeatable to: 9 credits if content differs.

COMM679 Professional Practice Forum in Translation: Workplace Processes and Procedures (1 Credit)

Provides in-depth exploration of processes and procedures in public service, legal, and political settings requiring translation services.

Prepares for translation in real-world settings by discussing procedures across sectors and institutions, enabling informed career plans and choices. Discusses ethics, professional conduct and business practices. Reinforces identity as a professional translator, develops specializations, and pursues professional and career development opportunities through interaction with members of the profession, professional organizations, and institutions in the language industry.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

Repeatable to: 3 credits if content differs.

COMM680 Communication Programs in Education and Training (3 Credits)

An analysis of instructional development in communication. Instructional objectives, strategies and evaluation are applied to educational, corporate and industrial training programs.

Formerly: SPCH680.

COMM681 Communication Issues in Human Resource Development (3 Credits)

Research in and theory of contemporary communication issues in the human resource development of governmental, corporate, business organizations.

Formerly: SPCH681.

COMM683 Intercultural Communication Theory (3 Credits)

An in-depth coverage of the essential theories of intercultural communication is provided.

COMM686 Teaching Communication (1 Credit)

Principles of effective teaching—content and process—in the college communication classroom.

Formerly: SPCH686.

COMM687 Professional Development in the Communication Discipline (1 Credit)

Knowledge and skills required for advancement as an academic professional in the communication discipline. Topics include types of academic institutions and posts, elements of academic performance, documentation of professional qualifications, how academic posts are secured, processes associated with tenure and promotion, processes of academic publication and history of the discipline.

COMM688 Communication Field Experience (1-6 Credits)

Applications of communication principles and research in professional communication settings.

Restriction: Permission of instructor.

Formerly: SPCH688.

COMM698 Special Problems in Communication (1-3 Credits)

Formerly: SPCH698.

COMM700 Introduction to Graduate Study in Communication (3 Credits)

Basic skills in communication research.

Restriction: Must be in Communication (Doctoral) program.

Formerly: SPCH700.

COMM701 Quantitative Methods in Communication Research (3 Credits)

Logic and methods of quantitative data collection and statistical analysis as applied to communication studies. Research strategies for communications: experimentation, survey research, field research, and content analysis.

Prerequisite: COMM700.

Formerly: SPCH701.

COMM703 Advanced Quantitative Data Analysis in Communication**Research: Structural Equation Models (3 Credits)**

Model evaluation and theory construction in communication research. Causal systems in current communication research: recursive, nonrecursive, and unobserved variable models. Students must have a dissertation research project requiring quantitative methods.

Prerequisite: COMM702.

Restriction: Permission of instructor.

Formerly: SPCH703.

COMM708 Professional Communication: Rhetoric and Context (3 Credits)

A skills-based course in speaking and writing in English for professional communicators adapting to a diversity of contexts, including business, health, law, politics, and science. Focus on diversifying the different contexts in which speaking and writing take place. Designed to develop an ability to adapt messages to a diversity of professional communication contexts, address the role of culture in adapting messages to a diversity of professional communication contexts, hone English speaking and writing skills based on a diversity of language registers, gain experience working with technical vocabulary, enhance analytical skills, strengthen research skills, enhance critical thinking skills, develop software technology skills.

Repeatable to: 6 credits.

COMM710 Translation and Localization Project Management (3 Credits)

Introduces basic principles of project management in the translation industry based upon globalization and localization processes for software, websites, and other translation-driven products. Focuses on information technology and workflow in large-scale multilingual projects. Examines planning, execution, and evaluation processes grounded in best practices and standards of the translation and localization industry.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

COMM711 Historical/Critical Methods in Communication Research (3 Credits)

Methods for historical and critical research in communication.

Formulation of significant research questions, systematic collection of bibliographic and phenomenal information, formulating substantial claims, organizing and writing research for disciplinary outlets.

Prerequisite: COMM700; or permission of instructor.

Formerly: SPCH711.

COMM712 Advanced Historical/Critical Methods in Communication Research (3 Credits)

Critical assessment of qualitative approaches to communication. Introduction to significant schools of historical and critical research. Advanced techniques for inquiry and manuscript preparation. Students must have dissertation research project requiring historical or critical method.

Restriction: Permission of instructor.

COMM713 Translation Technology (3 Credits)

Builds upon the principles outlined in Introduction to Computer-Assisted Translation to develop comprehensive knowledge of the current and future roles of technology in translation processes involving both the spoken and the written word, including use of widely available software tools and systems for terminology management, translation memory, and machine translation. Students carry out projects using translation technology, enabling them to apply newly acquired knowledge in applied contexts. Examination of case studies highlights how translation technology is leveraged across public and private sector organizations and the latest developments in the field.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

COMM714 Introduction to Qualitative Methods in Communication Research (3 Credits)

Methods for field research in communication including interviewing, ethnographic and participant intervention, focus groups, and content analysis. Formulation of significant research questions, systematic collection of field data, formulating substantial claims from the research, organizing and writing research from disciplinary outlets.

Restriction: Permission of instructor.

COMM715 Advanced Qualitative Methods in Communication Research (3 Credits)

Advanced data analysis of qualitative data in Communication research. In-field research and techniques for analysis of data from in-field work.

COMM718 Practicum in Research Proposal and Design (3 Credits)

Development of research proposal through research team interaction. In different semester the course focuses on different subdisciplines of communication.

Repeatable to: 6 credits.

Credit Only Granted for: COMM718 or JOUR632.

Formerly: JOUR632.

COMM719 Advanced Consecutive Interpretation (1-3 Credits)

Builds consecutive interpreting skills to a highly professional level by sharpening listening, processing, memory, note-taking, and delivery skills, enabling interpretation of highly complex material requiring particular attention to nuance, tone, and style. Includes dialogue and monologue interpreting exercises with specialized subject material. Participants emerge from the course as reflective practitioners with the simultaneous interpreting skills required to perform competently in real-world settings.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits if content differs.

COMM724 Seminar in Organizational Communication (3 Credits)

Theories and problems of human communication within, between, and/or among formal organizations will be emphasized.

Restriction: Permission of instructor.

Formerly: SPCH724.

COMM729 Simultaneous Interpretation (1-3 Credits)

Builds upon the discussion of the simultaneous mode and exercises in Introduction to Simultaneous Interpreting by reviewing the relationship between consecutive and simultaneous skills and introducing work in the booth in a series of progressive exercises. Addresses challenges such as coordination of split attention, ear-voice span, memory and delivery / presentation. Reinforces principles of collegial teamwork and good microphone technique in the booth. Enhances preparation skills required for interpretation of specialized subject matter.

Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

Repeatable to: 8 credits if content differs.

COMM730 Seminar in Health Communication (3 Credits)

Communication processes in health care and promotion.

Formerly: SPCH730.

COMM738 Seminar in Mediated Communication (3-12 Credits)

The examination of special topics related to the study of mediated communication.

Restriction: Permission of instructor.

Repeatable to: 12 credits if content differs.

COMM739 topics in Public Relations (3 Credits)

Seminar on specialized areas of scholarly research in public relations or on the practice of public relations in specialized organizational settings.

Repeatable to: 6 credits if content differs.

Formerly: JOUR739.

COMM748 The Rhetoric of the Presidency (3 Credits)

The study of the historical and contemporary rhetoric of the presidency in appropriate historical and political contexts. Scholarship related to public address studies and theories of the presidency will be featured.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: COMM748 or COMM768.

Formerly: COMM768.

COMM749 Advanced Simultaneous Interpretation (1-3 Credits)

Builds simultaneous interpreting skills to a highly professional level, including highly complex material requiring particular attention to nuance, tone, and style. Resolves any remaining challenges of split attention, ear-voice span, memory and delivery / presentation. Introduces simultaneous interpretation with text, based upon sight translation techniques. Participants emerge from the course as reflective practitioners with the simultaneous interpreting skills required to perform competently in real-world settings.

Prerequisite: COMM729; and admissions test for second-year courses; and permission of ARHU-Communication department.

Repeatable to: 4 credits if content differs.

COMM758 Seminar in Rhetorical Theory (3 Credits)

Examination of selected theories of style drawn from the fields of rhetoric and literature, and analysis of model speeches.

Prerequisite: COMM460, COMM461, or COMM450.

Repeatable to: 12 credits if content differs.

Formerly: SPCH758.

COMM759 Professional Practice Forum in Interpreting: Practicum (1-3 Credits)

Provides opportunities to interpret consecutively and simultaneously in real-world settings on campus and in the public service, legal, business, and political communities. Develops team leader skills by organizing and convening an event or series of events (conference, debate, or negotiation), selecting topics and delegates, and preparing speeches and arguments to deliver and interpret. Collaboration with participants in M.A. translation courses is sought. Requires independent study plan agreed with course instructor.

Prerequisite: Admissions test for second-year courses; and permission of ARHU-Communication department.

Repeatable to: 9 credits if content differs.

COMM760 Seminar in Political Communication (3 Credits)

A blend of theory and practice to integrate rhetorical-critical theory and empirical methods with politics. Practitioners in political communication will be drawn in as resource persons. Students will map the communication strategy for candidates and analyze actual campaign strategies.

Formerly: SPCH760.

COMM762 The Rhetoric of Political Institutions (3 Credits)

The role of discourse in major political institutions is examined. The specific institutional focus may change from instructor to instructor. Examples include Congress, the courts, or the state legislatures.

COMM768 Seminar in Public Address (3 Credits)

An in-depth study of national and international speakers and issues throughout the history of the spoken word. Emphasis will be placed upon the application of rhetorical principles to the analysis of world speakers and their speeches.

Repeatable to: 12 credits if content differs.

Formerly: SPCH768.

COMM769 Professional Practice Forum in Interpreting: Workplace Processes and Procedures (1-2 Credits)

Provides in-depth exploration of processes and procedures in public service, legal, and political settings where interpreting services are commonplace. Enables students to make informed career plans and choices. Empowers participants by helping to establish and reinforce identity as a professional interpreter, develop specializations, and pursue professional and career development opportunities through interaction with members of the profession, professional organizations, and institutions in the language industry.

Prerequisite: Admissions test for second-year courses; and permission of ARHU-Communication department.

Repeatable to: 3 credits if content differs.

COMM775 Seminar in Persuasion and Attitude Change (3 Credits)

This seminar will concentrate on the problem of making message strategy decisions. Course content will consist of study of both theoretical and empirical research on attitude and attitude change in persuasive communication.

Prerequisite: Permission of ARHU-Communication department.

Formerly: SPCH775.

COMM776 Seminar in Interpersonal Communication (3 Credits)

Interpersonal communication theory, research, and practice.

Formerly: SPCH776.

COMM777 Persuasive Message Strategies (3 Credits)

Examines which persuasive messages are effective to change attitudes and behavior at what times and with what people.

Credit Only Granted for: COMM698P or COMM777.

Formerly: COMM698P.

COMM778 Special Topics in Health and Risk Communication (3 Credits)

This graduate seminar introduces students to special topics in health and risk communication such as media and public health, health message design, risk perception and communication, health and environmental communication, health literacy, etc. It blends theoretical concepts with practical concerns and covers a specific topic with breadth and depth appropriate for a high-level graduate seminar.

Restriction: Permission of instructor.

Repeatable to: 9 credits if content differs.

COMM779 Seminar: Special Topics in Persuasion and Attitude Change (3 Credits)

This seminar explores special topic areas with the study of persuasion and attitude change, such as social cognition, humor, message production, and cognitive oscillation.

Recommended: COMM775.

Repeatable to: 9 credits if content differs.

COMM789 Seminar: Special Topics in Intercultural Communication (3 Credits)

Explores special topic areas within the study of intercultural communication, such as culture and conflict, intercultural negotiation, cross-cultural relationships.

Recommended: COMM683.

Repeatable to: 9 credits if content differs.

COMM798 Independent Study (1-3 Credits)

An individual course designed for intensive study or research of problems in communication.

Restriction: Permission of instructor.

Formerly: SPCH798.

COMM799 Master's Thesis Research (1-6 Credits)

Formerly: SPCH799.

COMM879 Special Research Problems in Persuasion and Attitude Change (1-4 Credits)

Directed team and individual research projects.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 9 credits if content differs.

COMM888 Doctoral Practicum in Communication (3-9 Credits)

Analysis of professional activity through personal observation. Evaluation of the purpose, process, effectiveness, and efficiency of professional activity. Recommendations for training and further research.

Repeatable to: 9 credits if content differs.

Formerly: SPCH888.

COMM889 Doctoral Tutorial in Communication (3-9 Credits)

Individual research in communication.

Repeatable to: 9 credits if content differs.

Formerly: SPCH889.

COMM898 Pre-Candidacy Research (1-8 Credits)**COMM899 Doctoral Dissertation Research (1-8 Credits)**

Formerly: SPCH899.

CONS - Sustainable Development & Conservation Biology

CONS608 Seminar in Sustainable Development and Conservation Biology (1-4 Credits)

Special topics and current literature in conservation biology and sustainable development.

Repeatable to: 6 credits if content differs.

CONS609 Special Topics in Conservation Biology (1-3 Credits)

Lectures, experimental courses and other special instructions in various subjects in conservation biology.

Repeatable to: 6 credits if content differs.

CONS670 Conservation Biology (3 Credits)

Conservation in the Anthropocene means conserving biodiversity and ecosystem function in the midst of climate change, habitat loss, overexploitation, altered nutrient cycling, and invasive species with protected areas and reserve networks, ecosystem restoration, and other biodiversity conservation and management schemes. Cross-listed with MEES670.

Credit Only Granted for: CONS670 or MEES670.

CONS680 Problem Solving in Conservation/Development (4 Credits)

Students will be exposed to current problems in conservation and development through great lectures, field trips, interviews and appropriate literature. Working in teams, students will formulate recommendations based on a synthesis of biological, economic and policy considerations.

CONS798 Research Papers in Sustainable Development and Conservation Biology (1-4 Credits)

Work on the required scholarly paper.

Restriction: Must be in Sustainable Development & Conservation Biology (Master's) program.

Repeatable to: 4 credits if content differs.

DANC - Dance

DANC405 Dance Education II: Education & Policy (3 Credits)

Curricula in dance in K-12 settings, classroom management, assessment/grading, and best practices in dance education in public schools. Current research and policy issues are included. This course counts towards teacher certification in the State of Maryland.

Restriction: Permission of ARHU-Dance department.

DANC409 Contact Improvisation (2 Credits)

Discovery and cultivation of the principles and skills of Contact Improvisation dance technique.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

Credit Only Granted for: DANC489C or DANC409.

DANC410 Technical Theater Production for Dance (3 Credits)

A study of the theoretical principles of production and the practical application of those principles to the presentation of dance works.

Prerequisite: DANC210; or students who have taken courses with comparable content may contact the department; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC418 Contemporary Modern (2 Credits)

Physical practice that sources postmodern dance influences, endurance training, improvisation, and choreographic composition to present movement practices as a form of investigation.

Prerequisite: DANC218; or permission of instructor.

Repeatable to: 6 credits.

Credit Only Granted for: DANC418 or DANC489O.

Formerly: DANC489O.

DANC420 Partnering (2 Credits)

Elements of contemporary partnering including weight sharing, counter balancing, momentum/leverage, lifting and moving responsively.

Restriction: Permission of ARHU-Dance department.

DANC429 Advanced Ballet Technique II (1 Credit)

Intensive work in ballet technique for the professionally-oriented dancer.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 3 credits.

DANC448 Modern Dance V (3 Credits)

Complex phrases of modern dance movement with emphasis on articulation and expression.

Prerequisite: DANC349; and must audition.

Repeatable to: 6 credits.

DANC449 Modern Dance VI (3 Credits)

Continuation of DANC448.

Prerequisite: DANC448; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC466 Laban Movement Analysis (3 Credits)

Introduction to Rudolf Laban's system of qualitative movement analysis in relation to understanding personal movement style. Application to dance performance, teaching, composition and research.

DANC468 Dance Repertory (3 Credits)

Form, content, music, design and performance of modern dance works.

Prerequisite: DANC349; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

DANC479 Advanced Practicum in Dance (1-3 Credits)

Advanced level performing experience for the student dancer who has developed an advanced professional level of competence.

Repeatable to: 6 credits.

DANC485 Seminar in Dance (3 Credits)

Individual research leading to a presentation with written documentation of the process, serving as a culmination of undergraduate study for dance majors.

Prerequisite: DANC483.

Restriction: Must be in Dance program; and senior standing.

DANC488 Project-Based Learning (3 Credits)

A specific project, is addressed, in dance from the perspectives of the investigator, the creator/choreographer, and the performer. Projects are cross-disciplinary and/or cross-cultural, and may involve both on- and off-campus experiences.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC489 Special Topics in Dance (1-3 Credits)

Theoretical, choreographic, pedagogic, or performance study.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC499 Practicum in Choreography, Production and Performance IV (1-6 Credits)

Advanced workshop in dance presentation, including performing, production and planned field experiences.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC600 Graduate Dance Research (3 Credits)

Supervised writing of reports and articles on selected dance subjects. Study of library resources and interviewing techniques. Preparation for written documentation of thesis project.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC604 Graduate Studies in Dance Pedagogy (3 Credits)

Curriculum writing, lesson planning, class structure, assessment/grading, and practice in dance pedagogy. Includes preparation of syllabi and studio teaching practice. This course counts towards teaching certification in the State of Maryland.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC606 Pedagogy Practicum (1 Credit)

An embodied laboratory where students deepen their teaching practices and develop new and innovative curricular formats and structures for their dance studio courses. Students will serve as an apprentice to faculty instructors of record teaching a course in order to deepen their understanding of course content delivery. The course culminates in the student developing their own syllabus for the course they have attended for the semester.

Restriction: Permission of department.

DANC608 Graduate Choreography I: Creative Process (3-6 Credits)

Developing and defining individual choreographic voice and vision in a shared studio setting.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC610 Workshop in the Direction of Dance Production (1 Credit)

A lecture/laboratory course dealing with the relationship of the director to all of the activities involved in the presentation of a dance concert.

Prerequisite: DANC410; or students who have taken courses with comparable content may contact the department.

DANC611 Dance Technology and Media (1 Credit)

Project-based development of media and technological support for dance performance, archiving, and portfolio design, development and implementation.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC628 Graduate Ballet (1 Credit)

Execution of the vocabulary of ballet movement with technical accuracy.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

DANC647 Dance and Movement Practice (2 Credits)

Experiential studio work that generates common movement vocabulary and innovations of same in a shared, faculty-led exploration of movement for the purpose of generating vocabulary for technique, choreography, and pedagogy.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC648 Advanced Modern Dance Technique I (1 Credit)

Professional level training in contemporary dance techniques.

Prerequisite: DANC449; or admitted to the MFA in Dance program, or students who have taken courses with comparable content may contact the department.

Repeatable to: 6 credits.

DANC649 Advanced Modern Dance Technique II (1 Credit)

A continuation of DANC 648.

Prerequisite: DANC648; or students who have taken courses with comparable content may contact the department.

Repeatable to: 6 credits.

DANC678 Individual Movement Practice (2 Credits)

Students in consultation with the adviser, propose a specific movement practice and can select the practice from the range of technique offerings in the program. Additional work in documenting and providing evidence of growth towards individual outcomes is required.

Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 10 credits.

DANC679 Graduate Dance Performance (1 Credit)

An advanced performance course focusing on the restagings from noted scores of the choreographic works of significant artists in the field.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC689 Special Topics in Dance (1-6 Credits)

Special Topics in dance theory, research or creative projects.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 12 credits if content differs.

DANC698 Independent Study in Dance (1-3 Credits)

Directed independent study in theoretical topics.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC699 Thesis Writing Lab (1 Credit)

The final writing project in MFA dance degree demonstrates students' ability to write critically about their creative work in relation to the dance field at large. A successful written thesis demonstrates a familiarity with concepts from dance history and critical theory as well as an ability to analyze movement and choreography. During the thesis writing lab, each student organizes ideas and establishes individual goals for the written project.

Repeatable to: 3 credits.

Formerly: DANC689W.

DANC705 Arts Education (3 Credits)

History of arts education in the U.S., recent policy changes and trends, current and recent research findings, proposed legislation at the state and federal level and the relationship of research designed to, in part, prepare students to be K-12 arts education and/or researchers and/or policy professionals.

DANC708 Graduate Choreography II: Collaboration (3-6 Credits)

Collaborative work across disciplines and genres.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC719 Graduate Choreography III: Projects (3 Credits)

Research-based choreographic projects in preparation for the choreographed thesis project.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC766 Graduate Movement Observation and Analysis (3 Credits)

Aspects of cultural and nonverbal analysis, developmental movement, kinesiological analysis, Laban Movement Analysis, with the goal of developing the student/teacher's ability to observe macro and micro levels of detail.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC777 Internship in Dance (1-5 Credits)

Internship in dance advocacy, administration, education, community building, choreography, or performance with an agency off campus and with a national or international profile.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC779 Master's Tutorial for Performance (1 Credit)

Supervised performance experience for advanced dancers.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC784 Dance in a Global Context (3 Credits)

Topics that illuminate dance in global context and provides an overview of methods, challenges and perspectives to the study of dance cross-culturally will be considered. Simultaneously, surveys select dance practices spanning many geographical areas, and offers insight into the diverse social, cultural, religious, and political environments from which dance extends.

Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC788 Master's Tutorial for Choreography (1-3 Credits)

Supervised production and presentation of a significant choreographic project.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC789 Directed Study in Dance Theory (2-6 Credits)

Advanced directed study in dance history, theory or criticism culminating in a paper for presentation or publication.

Repeatable to: 6 credits if content differs.

DANC799 Master's Thesis Project (1-6 Credits)

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DATA - Data

DATA400 Applied Probability and Statistics I (3 Credits)

Random variables, standard distributions, moments, law of large numbers and central limit theorem. Sampling methods, estimation of parameters, testing of hypotheses.

Prerequisite: 1 course with a minimum grade of C- from (MATH131, MATH141); or students who have taken courses with comparable content may contact the department.

Cross-listed with: STAT400.

Credit Only Granted for: DATA400, ENEE324, or STAT400.

Additional Information: Not acceptable toward graduate degrees in MATH/STAT/AMSC.

DATA601 Probability and Statistics (3 Credits)

Provides a solid understanding of the fundamental concepts of probability theory and statistics. The course covers the basic probabilistic concepts such as probability space, random variables and vectors, expectation, covariance, correlation, probability distribution functions, etc. Important classes of discrete and continuous random variables, their inter-relation, and relevance to applications are discussed. Conditional probabilities, the Bayes formula, and properties of jointly distributed random variables are covered. Limit theorems, which investigate the behavior of a sum of a large number of random variables, are discussed. The main concepts random processes are then introduced. The latter part of the course concerns the basic problems of mathematical statistics, in particular, point and interval estimation and hypothesis testing.

Prerequisite: Undergraduate courses in calculus and basic linear algebra.

Cross-listed with: BIOI601, MSML601.

Credit Only Granted for: BIOI601, DATA601 or MSML601.

DATA602 Principles of Data Science (3 Credits)

An introduction to the data science pipeline, i.e., the end-to-end process of going from unstructured, messy data to knowledge and actionable insights. Provides a broad overview of what data science means and systems and tools commonly used for data science, and illustrates the principles of data science through several case studies.

Cross-listed with: BIOI602, MSML602.

Restriction: Must be in one of the following programs: (Data Science Post-Baccalaureate Certificate, Master of Professional Studies in Data Science and Analytics, or Master of Professional Studies in Machine Learning).

Credit Only Granted for: BIOI602, DATA602, MSML602 or CMSC641.

Formerly: CMSC641.

DATA603 Principles of Machine Learning (3 Credits)

A broad introduction to machine learning and statistical pattern recognition. Topics include: Supervised learning: Bayes decision theory, discriminant functions, maximum likelihood estimation, nearest neighbor rule, linear discriminant analysis, support vector machines, neural networks, deep learning networks. Unsupervised learning: clustering, dimensionality reduction, PCA, auto-encoders. The course will also discuss recent applications of machine learning, such as computer vision, data mining, autonomous navigation, and speech recognition.

Cross-listed with: BIOI603, MSML603, MSQC603.

Restriction: Must be in one of the following programs: (Data Science Post-Baccalaureate Certificate, Master of Professional Studies in Data Science and Analytics, or Master of Professional Studies in Machine Learning).

Credit Only Granted for: BIOI603, DATA603, MSML603, MSQC603 or CMSC643.

Formerly: CMSC643.

DATA604 Data Representation and Modeling (3 Credits)

An introductory course connecting students to the most recent developments in the field of data science. It covers several fundamental mathematical concepts which form the foundations of Big Data theory. Among the topics included are Principal Component Analysis, metric learning and nearest neighbor search, elementary spectral graph theory, minimum and maximum graph cuts, graph partitions, Laplacian Eigenmaps, manifold learning and dimension reduction concepts, clustering and classification techniques such as k-means, kernel methods, Mercer's theorem, and Support Vector Machines. Some relevant concepts from geometry and topology will be also covered.

Prerequisite: DATA601 or MSML601.

DATA605 Big Data Systems (3 Credits)

An overview of data management systems for performing data science on large volumes of data, including relational databases, and NoSQL systems. The topics covered include: different types of data management systems, their pros and cons, how and when to use those systems, and best practices for data modeling.

Prerequisite: DATA602.

Restriction: Must be in the Data Science Post-Baccalaureate Certificate of Professional Studies or Master of Professional Studies in Data Science and Analytics program.

Credit Only Granted for: DATA605 or CMSC642.

Formerly: CMSC642.

DATA606 Algorithms for Data Science (3 Credits)

Provides an in-depth understanding of some of the key data structures and algorithms essential for advanced data science. Topics include random sampling, graph algorithms, network science, data streams, and optimization.

Prerequisite: DATA602.

Restriction: Must be in the Data Science Post-Baccalaureate Certificate of Professional Studies or Master of Professional Studies in Data Science and Analytics program.

Credit Only Granted for: DATA606 or CMSC644.

Formerly: CMSC644.

DATA607 Communication in Data Science and Analytics (3 Credits)

Expected learning outcomes include that, in the context of data science and analytics, students should be able to: summarize, report, organize prose, statistics, graphics, and presentations; explain uncertainty, sensitivity/robustness, limitations; describe model generation and representation; discuss interpretations and implications; communicate effectively to diverse audiences within a business organization, and possibly other outcomes.

Prerequisite: DATA602.

DATA612 Deep Learning (3 Credits)

Provides an introduction to the construction and use of deep neural networks: models that are composed of several layers of nonlinear processing. The class will focus on the main features in deep neural nets structures. Specific topics include backpropagation and its importance to reduce the computational cost of the training of the neural nets, various coding tools available and how they use parallelization, and convolutional neural networks. Additional topics may include autoencoders, variational autoencoders, convolutional neural networks, recurrent and recursive neural networks, generative adversarial networks, and attention-based models. The concepts introduced will be illustrated by examples of applications chosen among various classification/clustering questions, computer vision, natural language processing.

Prerequisite: DATA603 or MSML603.

Cross-listed with: MSML612.

Credit Only Granted for: DATA612 or MSML612.

DATA640 Computer Vision (3 Credits)

An introduction to basic concepts and techniques in computer vision. Topics include low-level operations such as image filtering, correlation, edge detection and Fourier analysis. Image segmentation, texture and color analysis. Perspective, cameras and 3D reconstruction of scenes using stereo and structure from motion. Deep learning for object detection, recognition and classification in images and video.

Prerequisite: BIOI603, DATA603, or MSML603.

Cross-listed with: MSML640.

Credit Only Granted for: MSML640 or DATA640.

DATA641 Natural Language Processing (3 Credits)

Introduces fundamental concepts and techniques involved in getting computers to deal more intelligently with human language. Focused primarily on text (as opposed to speech), the class will offer a grounding in core NLP methods for text processing (such as lexical analysis, sequential tagging, syntactic parsing, semantic representations, text classification, unsupervised discovery of latent structure), key ideas in the application of deep learning to language tasks, and consideration of the role of language technology in modern society.

Prerequisite: DATA603 or MSML603.

Cross-listed with: MSML641.

Credit Only Granted for: DATA641 or MSML641.

DATA650 Cloud Computing (3 Credits)

Presents the state of the art in cloud computing technologies and applications. Topics will include: telecommunications needs, architectural models for cloud computing, cloud computing platforms and services. Data center networking, server, network and storage virtualization technologies, and containerization. Cloud operating and orchestration systems. Security, privacy, and trust management; resource allocation and quality of service; interoperability and internetworking.

Cross-listed with: MSML650.

Credit Only Granted for: MSML650 or DATA650.

DATA698 Research Methods and Study Design (3 Credits)

Expected learning outcomes include that students should be able to: compose problem specifications relevant to work environment, create project descriptions, determine data and resource requirements, propose appropriate methods analytical methods, construct research plans; determine reporting requirements appropriate to various employment situations, identify intended audiences and uses, propose supporting documentation, and possibly other outcomes. Includes ethical and legal considerations in data science.

Restriction: Must have completed at least 4 courses in the program.

ECON - Economics

ECON401 Current Issues in American Economic Policy (3 Credits)

Analysis of current economic problems and public policies. Topics could include poverty, income inequality, social insurance, education, environmental sustainability, immigration, and innovation. Other issues may be substituted depending on current events.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422, ECON426).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON402 Macroeconomic Models and Forecasting (3 Credits)

Analysis of the fluctuations in economic activity and the formulation and use of forecasting models of the economy. Illustrations of computer macro models and forecasting problems.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON406 Advanced Microeconomics (3 Credits)

Expands on the assumptions of rational decision-making used in intermediate microeconomics and develops more complicated, more realistic models which address uncertainty, intertemporal choices, strategic interactions, social preferences and considerations of what is fair.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON407 Advanced Macroeconomics (3 Credits)

An in-depth analysis of current issues in macroeconomic theory and policy. Topics covered include: 1. alternative perspectives on macroeconomics including monetarism, new classical equilibrium models, rational expectations, and real business cycle models; 2. long term growth, the slowdown in productivity growth, and concerns about U.S. competitiveness; 3. the effectiveness of macroeconomic policy in an open economy; 4. the effects of finance on the real sector.

Prerequisite: Minimum grade of C- in ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON410 Comparative Economic Institutions (3 Credits)

Institutions are the sets of rules that constrain the decisions and interactions of economic agents. The course uses economic analysis to understand both formal institutions (e.g. laws) and informal institutions (e.g. cultural norms). Practical examples are drawn from economics, law, and politics, and reflect the experience of many different countries.

Prerequisite: Minimum grade of C- in ECON325 and ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON412 Economic History and Modern Development (3 Credits)

Analysis of major economic, political, and social change in the developed world since 1800. This includes factors contributing to increases in economic performance, changes in the form of government, technological change (including industrialization), and integration and disintegration of the global economy. Emphasis is on institutional changes in how societies organize economic and political activities.

Prerequisite: Minimum grade of C- in ECON325 and ECON326.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON414 Game Theory (3 Credits)

Studies the competitive and cooperative behavior that results when several parties find that their individual outcomes are jointly determined. Students will learn how to use game theory to analyze situations of potential conflict. Applications are drawn from economics, business, and political science.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor).

Credit Only Granted for: CMSC474, ECON414, GVPT399A or GVPT390.

ECON415 Market Design (3 Credits)

Focuses on recent developments in the design of markets to improve economic performance and to open new economic opportunities. It is divided into three main segments – auction design, the design of matching mechanisms, and antitrust theory and policy.

Prerequisite: Minimum grade of C- in ECON414.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON416 Analysis of Economic Development (3 Credits)

Analysis of the determinants and influences on economic development. Emphasis on both theoretical models and econometric methods of explaining why some countries are poor, along with examination of policies to promote development.

Prerequisite: Minimum grade of C- in ECON325, ECON326, and ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON315 or ECON416.

ECON417 Estimating Policy and Program Impact (3 Credits)

Governments, businesses, non-profits, funders, and other organizations must allocate scarce resources between competing uses. Understanding the causal effect of policies, programs or investments on key outcomes can guide the choices of these decision-makers. Correlations between policies and outcomes or changes in outcomes after new policies are adopted are rarely sufficient for estimating the causal effect, however. This course focuses on econometric strategies for obtaining unbiased causal estimates, including experimental methods, instrumental variables, regression discontinuity, and differences-in-differences. There will be an emphasis on using Stata and on interpreting the results of econometric analysis

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326) and 1 course with a minimum grade of C- from (ECON424, ECON422).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON418 Economic Development of Selected Areas (3 Credits)

Economic and institutional characteristics of a specific geographic area are identified and discussed, and alternate strategies and policies for development are analyzed.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Repeatable to: 6 credits if content differs.

ECON422 Econometrics (3 Credits)

Emphasizes the interaction between economic problems and the assumptions employed in statistical theory. Formulation, estimation, and testing of economic models, including single variable and multiple variable regression techniques, theory of identification, and issues relating to inference.

Prerequisite: 1 course with a minimum grade of C- from (ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON422, ECON424, or AREC422.

ECON423 Advanced Topics in Econometrics (3 Credits)

Interaction between economic problems and specification and estimation of econometric models. Topics may include: autocorrelation, heteroscedasticity, functional form, simultaneous equation models, logit and probit models, instrumental variables, qualitative choice models, and other computational methods.

Prerequisite: Minimum grade of C- in ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON424 Applied Econometrics (3 Credits)

Provide the knowledge and skills necessary to accomplish and utilize basic applied econometric analysis utilized by many business service providers, government agencies, and nonprofits engaged in policy analysis. Topics include simple and multiple regressions using cross section, time series, and panel data, issues of heteroskedasticity, serial correlation, and multicollinearity, models with binary dependent variable, and program evaluation. Course emphasizes application of knowledge using software packages but still covers essential theoretical background.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON422, ECON424 or AREC422.

ECON425 Mathematical Economics (3 Credits)

Covers mathematical tools and skills utilized in upper undergraduate and master's level coursework in Economics and Public Policy. Reviews calculus and math of finance and growth. Introduces techniques of optimization, linear algebra, and differential equations and connects them to micro and macro theory and applications. Topics will also include coverage of probability theory to explore how economists model uncertainty, as well as economic applications of integration.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON426 Economics of Cost-Benefit Analysis (3 Credits)

Study of how to use cost benefit analysis and other similar tools of applied microeconomics to conduct policy analyses. Cost-benefit analysis is an empirical method of identifying an optimal choice from a set of policy alternatives, where optimal is defined in terms of economic efficiency. Real world examples are addressed, so that students understand limitations of the methods and also interactions of economic analysis with political and administrative processes.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON427 Experimental Economics (3 Credits)

An introduction to the methodology of experimental economics and its application to issues such as decision-making under uncertainty, auctions, and public goods. Also an introduction to behavioral economics as a relatively new area of economic research.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON432 Applied Machine Learning (4 Credits)

Offers a comprehensive examination of the concepts and techniques used in machine learning, with a specific emphasis on their applications in economics. Focuses on the practical aspects of machine learning, including the use of different methods, model selection, and performance evaluation. Students will explore both supervised and unsupervised learning techniques, such as linear and non-linear regression, k-nearest neighbors, tree-based approaches, support vector machines, neural networks, and dimensionality reduction methods. Additional advanced methods may be covered, depending on the time available. Hands-on implementation of these techniques will be conducted using the R programming language.

Prerequisite: 1 course with a minimum grade of C- from (ECON422, ECON424).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON433 Economics of Big Data (4 Credits)

The importance of big data in the global economy is rising. Students will explore the definition and characteristics of big data, the impact of big data on individuals, use of big data by firms, entrepreneurs and nonprofits, as well as how big data reshapes various public policies.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON434 The Economics of Information and Uncertainty (3 Credits)

How do rational agents make decisions when faced with uncertainty? How do markets and other institutions deal with risks? How do markets behave when some actors are better informed than others? What incentives influence whether economic decision-makers hide or reveal information? Topics include the value of information, the purchase of warranties, agency problems in management, adverse selection and moral hazard in insurance, and signaling in education.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON498U or ECON434.

Formerly: ECON498U.

ECON435 Financial Markets and the Macroeconomy (3 Credits)

Provides students with the necessary tools to understand financial decisions investors and firms make. The course will cover two of the main areas of financial economics: Asset pricing and corporate finance. Asset pricing topics include the valuation of bonds, stocks, derivatives, portfolio decisions, and arbitrage. Corporate finance topics include the valuation of investment projects, the cost of capital, capital structure, and financial distress.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: BMGT343 or ECON435.

Additional Information: Finance majors will not receive credit for ECON435.

ECON436 Financial Econometrics (3 Credits)

An introduction to financial econometrics, which is data science applied to understanding the financial system. Students will learn modern techniques in financial econometrics with an emphasis on the interaction between modeling (theory) and empirical analysis. Topics include relevant economic theory, optimization techniques, probability models, statistical analysis, and use of statistical software.

Prerequisite: Minimum grade of C- in ECON325 and ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON441 Theory of International Economics (3 Credits)

Theoretical treatment of international trade and international finance. Includes Ricardian and Heckscher-Ohlin theories of comparative advantage, analysis of tariffs and other trade barriers, international factor mobility, balance of payments adjustments, exchange rate determination, and fiscal and monetary policy in an open economy.

Prerequisite: Minimum grade of C- in ECON326 and ECON325.

Restriction: Must be in a major within the BSOS-Economics department; and must not have completed ECON340, ECON442, or ECON443.

Credit Only Granted for: ECON340, ECON441, ECON442, or ECON443.

ECON442 Globalization and Capital Markets (3 Credits)

Uses models of open-economy macroeconomics to explain the causes and consequences of international capital flows. Analysis is made of private consumption, investment, the government sector, current accounts, the labor market, and the money and foreign exchange markets in small open economies. This framework is then used to study examples of how speculative attacks on currencies, sudden reversals of capital inflows, and the effects of the lack of credibility of economic policy affect economic development.

Prerequisite: Minimum grade of C- in ECON326 and ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor); and must not have completed ECON441.

Credit Only Granted for: ECON441 or ECON442.

ECON443 International Trade and Trade Policy in the New Global Economy (3 Credits)

Examines the economics of international economic integration, including the theory of customs unions and free trade areas, the role of GATT and the WTO, changes in individual countries' foreign trade policies during the new era of globalization, the special role of multinational firms in world trade, and recent controversies about the benefits and costs of globalized trade.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics); and must not have completed ECON441.

Credit Only Granted for: ECON441 or ECON443.

ECON444 Research in Globalization (3 Credits)

As globalization continues, individual countries must confront a variety of related issues including rising inequality, decline of domestic industries, climate change, and disputes over intellectual property rights. Various economic models and research methods will be covered to develop the analytic and empirical skills needed to perform independent research in globalization. Students will prepare literature reviews, conduct preliminary empirical investigations using STATA, and produce well-designed research proposals.

Prerequisite: Minimum grade of C- in ECON326 and ECON422.

Restriction: Must be in Economics Bachelor of Science program.

Credit Only Granted for: ECON498G or ECON444.

Formerly: ECON498G.

ECON451 Public Choice (3 Credits)

Analysis of collective decision making, economic models of government, program budgeting, and policy implementation; emphasis on models of public choice and institutions which affect decision making.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON453 Natural Resources and Public Policy (3 Credits)

Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.

Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).

Cross-listed with: AREC453.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: AREC453 or ECON453.

ECON454 Public Finance and Public Policy (3 Credits)

The role of the the public sector in a market economy constitutes the over-arching topic of this course. Emphasis lies on analyzing government expenditure programs and the microeconomics of tax policy.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321 or STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON455 Economics of Education Policy (3 Credits)

Examines the role that government plays in providing and financing education. Analyzes why people invest in education. Considers the effects of education on long-term social and economic outcomes, the behavior of institutions that produce education, and how to design and implement public policies affecting the level and distribution of educational resources. Uses microeconomic models and empirical findings to analyze current issues in education policy.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON468E or ECON455.

Formerly: ECON468E.

ECON456 Law and Economics (3 Credits)

Relationship of the exchange process to the system of institutions and rules that society develops to carry out economic transactions. Topics covered include: Property rights; torts, negligence, and liability; contracts and exchanges; criminal control and enforcement; equity and efficiency issues .

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Prerequisite: At least one intermediate theory course and/or statistics.

Repeatable to: 15 credits if content differs.

ECON460 Industrial Organization (3 Credits)

Examines different theoretical models of firm behavior in markets with varying amounts of market power. Relates theory to specific industries and examines how market structure evolves over time.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON461 Economics of Regulation and Antitrust (3 Credits)

Considers government intervention in economic activity of three types: antitrust policy, regulation of natural monopolies, and health safety regulation. Covers theoretical models, real-world policy applications, and empirical studies relevant to the impact of regulation.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON462 Economics of Entrepreneurship (3 Credits)

Economic theory highlights the role of entrepreneurs in fueling economic growth and accomplishing reallocation of resources in response to changes in preferences, technology, demographics, and resource. This course uses empirical evidence to examine the extent to which these predictions are valid. To more fully understand the motivations and constraints relevant to entrepreneurs, student will write a business plan as if s/he were starting a new business.

Prerequisite: Minimum grade of C- in ECON422.

Restriction: Must be in Economics Bachelor of Science program.

Credit Only Granted for: ECON3980 or ECON462.

Formerly: ECON3980.

ECON463 Economics of Sports (3 Credits)

The application of theoretical and empirical economic tools to the sports industry, including competition at professional,collegiate, and international levels. Microeconomic models from labor, industrial organization and public finance will be applied to the sports industry and combined with data from sports markets, providing students with opportunities to produce and interpret economic analysis. The topic of discrimination will also be explored in the context of this particular economic activity.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON465 Health Economics (3 Credits)

An examination of the structure, conduct and performance of the health care market, including a study of physician services, the pharmaceutical industry, the hospital market and health insurance. Students will analyze markets for health care and related products by examining the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Analysis will combine both theoretical models and empirical tools.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Jointly offered with: ECON671.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON465 or ECON671.

ECON468 Special Topics in Applied Economics (3 Credits)

Selected topics in applied economics. Designed to meet the changing interests of students and staff.

Prerequisite: 1 course with a minimum grade of C- from (BMGT230, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON306).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Repeatable to: 15 credits if content differs.

ECON470 Labor Economics: Theory and Evidence (3 Credits)

Analysis of labor markets in theory and the real world. Topics include labor supply, labor demand, human capital, performance incentives, unemployment, discrimination, and immigration. Students will develop an understanding of how formal economic research is used to analyze U.S. labor markets and how research influences policy debates.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON470 or ECON471.

ECON471 Labor Market Policies and Research (3 Credits)

Economic analysis of labor based on modern theory and empirical analysis. Focus on public policy, studying the interactions between labor demand and labor supply in the labor market and how policies impact those interactions. Possible policies include welfare policy, minimum wage policy, immigration policy, and anti-discrimination policies. Uses statistical software to summarize and create visualizations of economic data.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).

Restriction: Permission of BSOS-Economics department; Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

Credit Only Granted for: ECON470 or ECON471.

ECON472 Economics of Social Safety Nets (3 Credits)

Analysis of the economic issues associated with social safety nets. Topics to be covered include the cash transfer programs for breaking the cycle of poverty, labor market policies aimed at combating unemployment, childhood interventions to improve human capital development, and the challenges faced by pension systems over the world. The approach is based on a life-cycle perspective. Evidence and experiences from developed and developing countries will be covered.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON481 Environmental Economics (3 Credits)

An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC481.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: ECON481 or AREC481.

ECON484 The Economics of Climate Change (3 Credits)

The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC454.

Credit Only Granted for: AREC454 or ECON484.

ECON485 Economics of Land Use (3 Credits)

Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC455.

Credit Only Granted for: AREC455 or ECON485.

ECON486 Energy and Environmental Economics (3 Credits)

Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation, climate change, and transportation policies.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC456.

Credit Only Granted for: AREC456 or ECON486.

ECON488 Applied Research Practicum (1-3 Credits)

Students gain experience applying economic knowledge and producing research valued by businesses, non-profits, and/or government agencies. Students engage in activities similar to what an intern or entry-level employee would perform. Students work in small groups to find different kinds of data and facts, analyze and interpret this information, and use research findings to develop and present recommendations for simulated clients.

Prerequisite: 1 course with a minimum grade of B- from (BMGT230, ECON321, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).

Recommended: ECON422, ECON402, or ECON424.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON489 Applied Economics Practicum (1-3 Credits)

Students gain experience explaining economic knowledge to people who have not studied economics. Students engage in activities preparing them for careers in banking, business consulting, financial education, wealth management, and related services.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON490 Urban & Regional Economics: Issues and Policies (3 Credits)

Exploration of urban and regional economics and policies, including economic forces leading to formation of city and regional networks. Conceptual and empirical analysis of policies affecting land use, housing, transportation and other aspects of sub-national economic development.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON321, BMGT230, ECON230).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON398I or ECON490.

Formerly: ECON398I.

ECON498 Special Topics in Economic Analysis (3 Credits)

Selected topics in economic analysis. Designed to meet the changing interests of students and staff.

Prerequisite: 1 course with a minimum grade of C- from (ECON321, STAT401); and 1 course with a minimum grade of C- from (ECON325, ECON326).

Restriction: Must be in Economics Bachelor of Science program.

Repeatable to: 15 credits if content differs.

ECON499 Independent Research in Economics (1-3 Credits)

Directed research under the supervision of a faculty member. Contact department for additional information.

Prerequisite: 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230, STAT400); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum of 3 credits from ECON400-499 course range.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON601 Macroeconomic Analysis I (3 Credits)

Introductory technical treatment of standard Keynesian, classical and new classical macroeconomic models. Expectations formation and microeconomic foundations of consumption, investment, money demand, and labor market behavior.

Restriction: Permission of BSOS-Economics department.

ECON602 Macroeconomic Analysis II (3 Credits)

Further issues regarding macroeconomic topics. First half emphasis will be placed on dynamic macroeconomic theory as pertaining to monetary issues, policy ineffectiveness and effectiveness. The second half of the course will focus on theories of investment and growth.

Prerequisite: ECON601; or permission of BSOS-Economics department.

ECON603 Microeconomic Analysis I (3 Credits)

A detailed treatment of the theory of the consumer and of the firm, particularly emphasizing the duality approach. Topics include the household production model, imperfect competition, monopolistic and oligopolistic markets.

Restriction: Permission of BSOS-Economics department.

ECON604 Microeconomic Analysis II (3 Credits)

Analysis of markets and market equilibria; the Arrow-Debreu model of general equilibrium, the two-sector model, welfare theorems, externalities, public goods, markets with incomplete and asymmetric information.

Prerequisite: ECON603.

Restriction: Permission of BSOS-Economics department.

ECON611 Seminar in American Economic Development (3 Credits)

Selected topics in the long-term movements of the American economy. Quantitative studies of the growth of output; applications of econometric methods and economic theory to topics in American economic history.

Restriction: Permission of BSOS-Economics department.

ECON613 Origins and Development of Capitalism (3 Credits)

Institutions and technology shaping pre-capitalist economies: Archaic, Greek and Roman, Feudal, and Mercantile. Rise of the market system, national economies, and capitalism. The nature of industrial society. Imperialism.

ECON615 Development Economics I (3 Credits)

Explore both the causes and consequences in development economics from a historical and scientific approach. Presents theoretical models and applied work that test alternative hypotheses. Explore models of economic growth and institutions, with emphasis on property rights and political regimes as causal factors affecting development. Discuss empirical methods widely used in the field and important related topics including poverty, inequality, education and health.

Prerequisite: ECON603; or permission of BSOS-Economics department.

ECON616 Economic Development II (3 Credits)

Survey of a variety of models explaining how market failures may lead to poverty and underdevelopment, with an emphasis on the empirical evaluation of constraints faced by individuals in developing countries and the programs that attempt to alleviate those constraints. Topics include: agricultural and land markets, labor markets, human capital in developing countries, credit markets, and consumption smoothing and risk coping.

Prerequisite: ECON615, ECON603, and ECON604; or permission of BSOS-Economics department.

ECON617 Topics in Development Economics (3 Credits)

Introduces students to the factors underlying contemporary trends in the economic development of low-income countries. Combining economic theory and empirical studies, students will learn about the unique challenges currently faced by policy makers in low-income settings, their economic determinants, and the evaluation of policy solutions. The course will center around a replication and extension exercise of a recent study in the development literature. A primary aim of the course is to prepare students to conduct independent research in development economics, with a particular focus on modern research methodology and applied econometrics.

Prerequisite: ECON615 or ECON616; or by permission of BSOS-Economics Department.

Restriction: Permission of BSOS-Economics Department.

ECON623 Econometrics I (3 Credits)

Topics covered include problems of specification, estimation, hypothesis testing, and prediction in linear models. Topics include: classical linear regression and ordinary least squares, generalized linear models and generalized least squares, identification and estimation of simultaneous equation models including discussion of two-stage and three-stage least squares and other instrumental variable estimation methods. Both finite and large sample analysis of econometric procedures will be covered, and there will also be discussion of general hypothesis testing principles including discussion of misspecification tests. In addition, the course will provide instructions on the use of a major statistical package such as Stata.

Prerequisite: Must have advanced knowledge of probability, statistics, and linear algebra.

Restriction: Permission of BSOS-Economics department.

ECON624 Econometrics II (3 Credits)

A continuation of ECON623. Topics include: Nonlinear models and nonlinear estimation methods (generalized method of moments and maximum likelihood estimation), panel data models, univariate dynamic models, multivariate dynamic models including simultaneous equation models, and non-parametric/semiparametric estimation methods. The course will also provide instructions on the use of a major statistical package such as Stata or TSP.

Prerequisite: ECON623; or permission of BSOS-Economics department.

ECON625 Computational Economics (3 Credits)

An examination of the specification, computation, estimation and interpretation of structural models that are widely used in Industrial Organization, and in a range of other applied microeconomic contexts (marketing and public, environmental, education and urban economics). The focus will be on the connections between these models and relevant economic theories, and on the details of their implementation in practice.

Prerequisite: ECON604 and ECON624.

Credit Only Granted for: ECON625 or ECON698R.

Formerly: ECON698R.

ECON626 Empirical Microeconomics (3 Credits)

An overview is provided of modern microeconomic methods with a focus on reduced form causal inference. Tools discussed include linear regression and selection on observables, instrumental variables including LATE and the role of heterogeneity in causal inference, difference-in-difference, regression discontinuity, synthetic control, matching, propensity score methods, and inverse probability weighted estimation. In addition, inferential issues such as weak instruments and techniques for robust standard errors, clustering, bootstrap and randomized inference are discussed, time permitting. The course places strong emphasis on relating statistical methods to substantive empirical applications. Each topic is introduced with an empirical paper that uses the technique. The discussion of technical material is at an intuitive level that focuses on applications and recommendations for empirical practice. The course offers an opportunity to work on a number of extended empirical exercises that are based on published papers and original data. Students practice working with data, implementing code in Stata and conducting their own empirical analysis. These exercises also offer practice in scientific writing relevant for empirical work.

Prerequisite: ECON624.

Restriction: Must be in Economics (Doctoral) program.

ECON630 Computational Methods in Macroeconomics (3 Credits)

Essential computational methods used in macroeconomics. There will be particular focus on approximating the solution to dynamic stochastic general equilibrium models. Methods for representative-agent and heterogeneous-agent models will be extensively studied. Econometric methods such as Generalized Method of Moments, Maximum Likelihood, Vector Autoregressions will also be covered.

Prerequisite: ECON602 and ECON601.

Restriction: Must be in one of the following programs (Economics (Master's); Economics (Doctoral)); or permission of BSOS-Economics department.

ECON635 Experimental Economics (3 Credits)

An introduction to the methodology of laboratory and field experiments. The course concentrates on a series of experiments to show how experiments build on one another, allowing researchers with different theoretical dispositions to narrow the range of potential disagreement.

Restriction: Permission of instructor.

ECON636 Behavioral Economics (3 Credits)

An exploration of how people make decisions, questioning the concept of "perfect rationality" in the standard economic theory, providing improved models in line with the observed biases of decision makers. Focusing on decision making under risk and ambiguity, endowment effect, status quo bias, loss aversion, intertemporal choice, and selfish and pro-social preferences.

Prerequisite: ECON603 and ECON604; and permission of BSOS-Economics department.

ECON637 Decision Theory (3 Credits)

Decision making is a process in which we select a course of action among available options. This course will explore the various behavioral biases observed in decision making processes by adjusting our normative theories to capture these biases.

Prerequisite: ECON603 and ECON604.

Restriction: Must be in the Economics program; or must have completed ECON603 and ECON604 with a letter grade of B+ or better.

Credit Only Granted for: ECON698B or ECON637.

Formerly: ECON698B.

ECON641 Microeconomic Analysis (3 Credits)

Microeconomic analysis applied to public policy problems with an emphasis on practical examples and how they illustrate microeconomic theories. Policy issues such as pollution, welfare and income distribution, market design, industry regulation, price controls, tax policy and health insurance are practical examples used to illustrate the abstract principles of microeconomics.

Restriction: Must be in M.Prof.Studies: Applied Economics program; or permission of BSOS-Economics department.

Credit Only Granted for: ECON641 or ECON506.

Formerly: ECON506.

ECON642 Topics in Applied Macroeconomics (3 Credits)

Focus is on applied macroeconomic models used by federal agencies to explain and predict economic behavior. Course emphasizes macroeconomic data: NIPA accounts, GDP, construction and application of CPI, labor force data and economic indicators. Students will also study a selected set of current macroeconomic topics including models of economic growth, economic fluctuations, monetary policy, inflation and financial markets.

Restriction: Must be in M.Prof.Studies: Applied Economics program; or permission of BSOS-Economics department.

ECON643 Empirical Analysis I: Foundations of Empirical Research (3 Credits)

Fundamental aspects of data management and interpretation emphasizing sampling, descriptive statistics, index numbers and construction of aggregated variables. Students will learn probability theory, confidence intervals, hypothesis testing and regression analysis using the EXCEL spreadsheet program and STATA statistical software.

Credit Only Granted for: ECON643 or ECON521.

Formerly: ECON521.

ECON644 Empirical Analysis II: Introduction to Economic Models (3 Credits)

An introduction to econometric methods with applications to public policy analysis. Primary focus on application and interpretation of multiple regression analysis.

Prerequisite: ECON643.

ECON645 Empirical Analysis III: Econometric Modeling and Forecasting (3 Credits)

Study of empirical techniques that are particularly relevant to the analysis of microeconomic models. Emphasis is on advanced panel data methods, time series regressions, instrumental variables, limited dependent variables, and sample selection corrections.

Prerequisite: ECON644.

Credit Only Granted for: ECON645 or ECON523.

Formerly: ECON523.

ECON652 Public Economics I (3 Credits)

The foundations of public economics, taxation, inequality, and behavioral public economics are reviewed. Major topics include welfare economics, tax incidence, behavioral responses to tax incentives and the efficiency cost of taxation, optimal taxation, income and wealth inequality, optimal tax systems and tax evasion, capital taxation and business income taxes, and taxation and behavioral economics. The course material is aimed to give students an understanding of both the foundations and methods of modern public economics, and important recent advances in our understanding of public economics. This is the first course in the two-part Ph.D. sequence in public economics.

Prerequisite: ECON604 and ECON624.

ECON661 The Corporate Firm (3 Credits)

This course examines firms' strategic behavior in a variety of settings and considers theories of the firm and industrial structure. Topics may include product choice, quality, advertising, consumer search and switch costs, manufacturer-retailer relations, manufacturer-supplier relations, vertical integration, and alternative industrial structures.

Prerequisite: ECON604 and ECON603.

ECON662 Theories of Industrial Organization (3 Credits)

Dynamic models are important tools to understand intertemporal individual choices and industry evolution. The course discusses a number of issues estimating and solving dynamic models, complimenting and building on the methods and topics introduced in 625. The course also covers models of endogenous product choice, matching and market design. There will be two main sets of assignments, where students simulate data by solving models, estimate models based on simulated or real data and perform counterfactual analyses. The students will also be expected to submit a research proposal.

Prerequisite: ECON604 and ECON603.

ECON664 Empirical Studies in Industrial Organization (3 Credits)

Introduces students to the recent empirical literature of industrial organization. It consists of four themes: pricing and contracting; cartels, collusion and merger reviews; demand estimation; and information economics.

Prerequisite: ECON603, ECON604, and ECON624.

Credit Only Granted for: ECON664 or ECON698J.

Formerly: ECON698J.

ECON668 The Economics of Retail Systems (3 Credits)

This course is designed mainly but not exclusively for students in the third year of the economics Ph.D program and for students at a similar stage in a marketing program. Its main objective is to help the student generate their first professional research paper. In terms of interests it targets those in the area of microeconomics (advanced micro, industrial organization, or more generally applied microeconomics or micro aspects of any field). The course will be conducted as a seminar.

Repeatable to: 6 credits if content differs.

ECON670 Financial Economics (3 Credits)

The course applies microeconomic theory and applied econometric techniques to the study of financial institutions and markets for financial assets. Students will learn how economists model and estimate the value of financial assets. The economic and empirical models are of interest to public policy makers and private wealth managers. Specific topics can include financial intermediation, the regulation of financial institutions, risk management, portfolio theory, the capital asset pricing model and the efficient markets hypothesis.

Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON671 Economics of Health Care (3 Credits)

An examination of the structure, conduct and performance of the health care market, including a study of physician services, the pharmaceutical industry, the hospital market and health insurance. Students will analyze markets for health care and related products by examining the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Extensive use of quantitative and analytic economic tools with special emphasis on regulatory responses to market imperfections.

Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

Jointly offered with: ECON465.

Restriction: Must be in MS Applied Economics program; or with permission from the program director.

Credit Only Granted for: ECON671 or ECON465.

ECON672 Program Analysis and Evaluation (3 Credits)

Students study the tools used to evaluate the effectiveness of public policies. All evaluations have weaknesses, and some have more weaknesses than others. You will learn how to distinguish high from low quality evaluations. We will discuss the basic economics and econometrics of program evaluation, focusing on the application of methods used for causal inference and cost-benefit analyses in public policy contexts. We will examine published evaluation research with the intent of showing how the research does or does not lead to clear conclusions regarding program performance.

Prerequisite: ECON641 and ECON645.

ECON673 Information, Game Theory and Market Design (3 Credits)

A study of the strategic decision-making and the theory and practice of market design. Focus is on the design of organized market and incentives created by market rules. Topics include online auction markets, government auctions procurement auctions and matching markets. The analysis includes documenting the rules of real-world markets, game theoretic analysis, empirical analysis, and experimental work.

Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

ECON674 Economic Analysis of Law (3 Credits)

A study of the application of economics to law with a focus on game theory, strategic behavior and public policy.

Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

ECON675 Environmental Economics (3 Credits)

Application of microeconomics and econometrics to analysis of environmental regulation. Many examples based on US policies, but the methods are broadly applicable in other contexts.

Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

ECON676 Economic Development (3 Credits)

Analysis of economic development. The course will focus on the consequences of poverty and poor institutions for the behavior and welfare of individuals, households, firms and the aggregate economy in developing countries. Theoretical models and empirical evidence will be used to understand the intended and unintended consequences of policies designed to enhance economic development.

Prerequisite: ECON641; and ECON642; and must have completed or be concurrently enrolled in ECON644.

Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON677 International Trade and Applications (3 Credits)

A mix of theory and empirical work. Students will analyze the causes and consequences of international trade. The course will cover a set of conceptual tools that are useful for understanding "globalization" and the usage of these tools to address interesting and important questions about how countries, firms, and workers respond to international trade.

Prerequisite: ECON641 and ECON644.

Restriction: Must be in MS Applied Economics program; or with permission from the program director.

ECON681 Comparative Institutional Economics I (3 Credits)

Theory, empirics, and practice of economic institutions. Genesis, functions, and effects of institutions. Examinations of three major institutions, property, contract, and decentralization. Historical, cultural, political, and economic origins of institutions. Case studies from English history, comparative legal studies, China, history of world economic development, transition, and socialism. Perspectives from law and economics, contract theory, and information theory.

ECON683 International Macroeconomics and Finance (3 Credits)

Economic analysis of international macroeconomic issues and policy. Topics can include the study of exchange rates, balance of payments, international financial markets, international business cycles, contagion, and the roles played by international economic institutions.

Prerequisite: ECON641 and ECON642; and must have completed or be concurrently enrolled in ECON644.

Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON684 Applied Time Series Analysis and Forecasting (3 Credits)

This course builds on the brief introduction to time series econometrics offered in ECON 645. Students will learn the theory of stationary processes and how it applies to econometric techniques for estimation and forecasting based on time series data. The techniques will be applied in macroeconomic, financial and business applications.

Prerequisite: ECON642; and ECON645.

Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON687 Economics Applications of R Programming (3 Credits)

Builds on the data analysis and econometric skills learned in the Empirical analysis sequence of ECON 643, 644, and 645. The STATA skills acquired in that sequence, such as basic data manipulation and econometric estimation, will be extended to the R programming language. The fundamentals of more advanced scientific programming—objects, data structures, loops, functions, simulation, parallel computing—will be introduced with applications to economics and the social sciences. Additional emphasis is placed on good coding practices and tools for version control and collaboration such as Git and R Markdown.

Prerequisite: Must have completed or be concurrently enrolled in ECON645.

Restriction: Must be in Applied Economics Master of Science program; or permission of the program director.

ECON698 Selected Topics in Economics (3 Credits)**ECON699 Applied Economics Internship Experience (1-3 Credits)**

Variable credit course for MS Applied Economics and Economic Analysis graduate certificate students participating in internships with well-established organizations and regular supervision from experienced professionals.

Restriction: Must be the Applied Economics Master's Program (ECAO or ECAM), or Economic Analysis Certificate Program (Z074 or Z098); and permission of program director.

Repeatable to: 6 credits.

Additional Information: Students may only earn credits during the term in which they are participating in the internship.

ECON701 Advanced Macroeconomics I (3 Credits)

Recent developments in macroeconomics with an emphasis on topics and techniques useful for conducting research in macroeconomics. Topics include advanced treatment of fiscal and monetary policy issues; the role of imperfect competition; real, sectoral and nominal business cycle models.

Prerequisite: ECON602 and ECON601.

ECON702 Advanced Macroeconomics II (3 Credits)

Recent advances in the fast-growing subfield of behavioral macroeconomics, with applications to business cycles and monetary economics. We will discuss surveys and controlled laboratory experiments that test the full information rational expectations (FIRE) hypothesis, and characterize deviations from FIRE in individual beliefs and actions, and we will study models that relax both the FI and the RE assumptions in general equilibrium settings, to bridge the gap between individual biases and constraints on the one hand and aggregate consequences and policy implications on the other.

Prerequisite: ECON602 and ECON601.

ECON703 Advanced Microeconomics I (3 Credits)

A formal treatment of game theory and its microeconomic applications is presented. Equilibrium concepts for static and dynamic games, and games with complete and incomplete information are studied. Topics also discussed: the relation between games in strategic form and games in extensive form, equilibrium refinement, Bayesian games, multi-dimensional mechanism design, dominant strategy and Bayesian implementation, Nash-in-Nash bargaining solutions.

Prerequisite: ECON604 and ECON603.

ECON704 Advanced Microeconomics II (3 Credits)

This is the second half of a two-semester sequence in Advanced Microeconomics, intended for second-year Ph.D. students. The course material varies from year-to-year, but currently it focuses on auction theory, matching theory, and the relationship between matching and auction theory. Other topics that are treated in some years include: sequential bargaining under incomplete information; and equilibrium refinements.

Prerequisite: ECON604 and ECON603.

ECON708 Advanced Topics in Applied and Theoretical Microeconomics (2 Credits)

Read, discuss, and analyze current topics in microeconomics, including public economics, environmental economics, labor economics, industrial economics, microeconomic theory, public choice and international trade. Specific topics covered will change from semester to semester depending on the students' and faculty's interests. Intended primarily for students beginning thesis research in economics.

Prerequisite: Must have completed a one-year graduate sequence in one of the microeconomic fields.

Repeatable to: 12 credits if content differs.

ECON709 Advanced Topics in Applied and Theoretical Macroeconomics (2 Credits)

Read, discuss, and analyze current topics in macroeconomics, including asset pricing models, models of economic growth, investment, and the labor market. Specific topics covered will change from semester to semester depending on the students' and faculty's interests. Intended primarily for students beginning thesis research in economics.

Prerequisite: Must have completed a one-year graduate sequence in one of the macroeconomic fields.

Repeatable to: 12 credits if content differs.

ECON721 Econometrics III (3 Credits)

Oriented towards macro-econometric methods. Topics covered will be selected from the following: Further discussion of topics covered in ECON624, non-stationary time series models (models with deterministic trends, unit roots, co-integration, error correction models, vector autoregressive models), econometric models of conditional heteroskedasticity (ARCH and GARCH models), Bayesian econometrics and methods for Bayesian computation, large-dimensional factor analysis, models of changes in regime, and methods for time series forecasting.

Prerequisite: ECON624; or permission of BSOS-Economics department.

ECON722 Econometrics IV (3 Credits)

Orientated towards micro-econometric methods. Topics covered will be selected from the following: Further discussion of topics covered in ECON624, binary and multinomial response models, semiparametric and non-parametric estimation, machine learning algorithms, neural nets, and applications of ML to program evaluation and treatment effects methods. Introduces students to Python programming and Python ML toolkits Scikit and PyTorch. Structural econometrics, the identification problem, stratified and clustered samples, spatial and social network models, dynamic panel data models, weak instruments, non-parametric and semi-parametric estimation methods, boot strap and Jack Knife methods, pre-test estimators.

Prerequisite: ECON624; or permission of BSOS-Economics department.

ECON741 Advanced International Economics I (3 Credits)

International Business Cycles; Exchange Rate Determination; Imperfect Financial Markets; Deviations from Full Information Rational Expectations; Monetary and Exchange Rate Policy

Prerequisite: ECON601; or permission of BSOS-Economics department.

ECON742 Advanced International Economics II (3 Credits)

Comparative advantage, Heckscher-Ohlin theory, specific-factors model, empirical verification, economies of scale, imperfect competition, commercial policy, factor mobility.

Prerequisite: ECON603; or permission of BSOS-Economics department.

ECON743 Topics in International Finance (3 Credits)

Covers research in quantitative macroeconomics in international finance and with heterogeneous agents. The aim is to learn these models and how to solve them numerically to equip you with computational tools to apply in your own research on these topics.

Prerequisite: ECON630; or permission of BSOS-Economics department.

ECON744 Advanced Topics in International Economics (3 Credits)

Focuses on key topics in international macroeconomics. We will cover classic and recent papers on business cycles, exchange rates, capital flows, monetary and fiscal policy, sovereign debt, default, and currency denomination. The course will be orientated towards students initiating research in the field.

Prerequisite: ECON601 and ECON602.

Credit Only Granted for: ECON698M or ECON744.

Formerly: ECON698M.

ECON745 Advanced Topics in International Trade (3 Credits)

Designed primarily for students planning to write dissertations on a topic related to international trade. Its focus is on recent research in this field including tests of trade theories; the effects of trade on growth and knowledge diffusion; the political economy of trade policy and the theory and practice of trade agreements.

Prerequisite: ECON604 and ECON624.

Credit Only Granted for: ECON698L or ECON745.

Formerly: ECON698L.

ECON747 The Macroeconomics of Imperfect Capital Markets (3 Credits)

A field course designed for students who have completed introductory graduate course work in macroeconomics. The course is built around three main ideas. First, its objective is to understand the role of financial markets for fluctuations in the macroeconomy. More specifically, starting from a complete markets benchmark, we study canonical types of credit market frictions that give rise to macroeconomic effects. Second, the course aims to enhance the students' toolkit to carry out state-of-the-art research in macroeconomics in general. It provides plenty of practical exercise to take models (usually DSGE models with financial frictions) to the computer. Third, alongside the methodological content, we revisit empirical facts on the regularities of financial variables, the 2008-09 global financial crisis and the Covid-19 recession.

Prerequisite: ECON602 and ECON601; or (ECON604 and ECON603); or permission of BSOS-Economics department.

Restriction: Must be in one of the following programs (Economics (Master's); Economics (Doctoral)).

Credit Only Granted for: ECON698K or ECON747.

Formerly: ECON698K.

ECON752 Public Economics II (3 Credits)

Students will study a set of issues related to the government's role in the economy, focusing on government redistribution and social insurance. Major topics covered include the optimal design of government redistribution programs; theoretical and empirical analyses of major U.S. government transfer programs; the optimal design of social insurance programs; and theoretical and empirical analyses of major U.S. social insurance programs.

Prerequisite: ECON751.

ECON754 Theory of Political Economy (3 Credits)

Basic Electoral Models of Aggregating Preferences and Information. Political Participation and Voter Turnout. Pivotal and Ethical Voters. Opportunistic versus Policy-Motivated Candidates. Credibility of Policy. Political Agency and Accountability - Moral Hazard and Selection. Legislatures - Legislative Bargaining and Legislative Dynamics. Special Interest Politics. Campaign Financing. Political Polarization and Ambiguity. Behavioral Political Economy. Populism and Authoritarianism. Political Parties.

Prerequisite: ECON603 and ECON604; or permission of BSOS-Economics department.

ECON756 Empirical Political Economics (3 Credits)

An introduction to empirical political economy. Determinants of individual political behavior, the impact of political institutions on economic outcomes, and economic determinants of political institutions will all be analyzed. Modern applied econometric techniques will also be covered.

ECON757 Topics in Political Economy II (3 Credits)

A continuation of ECON754 Topics in Political Economy I. Topics will include: the informational role of special interest groups; campaign finance, including welfare analysis of campaign finance reform; advanced models of the political economy of redistribution, with emphasis on inefficient redistribution, intergenerational redistribution, and "pork barrel" politics; fairness and redistributive politics; the effects of alternative electoral systems; theoretical models of parliamentary democracies, government formation and political parties; accountability of government officials; and the political economy of federalism.

Prerequisite: ECON602 and ECON604; or permission of BSOS-Economics department.

Recommended: ECON754.

ECON771 Advanced Labor Economics: Theory and Evidence (3 Credits)

Provides students the theoretical background and econometric tools to engage and conduct research in labor economics. The course highlights the importance of a good balance between theory and solid empirical work. The topics include human capital, empirical earning functions, labor demand, incentive, discrimination, minimum wage, labor supply, tasks and skills, and inequality. In addition, it goes over essential topics in applied economics, including selection bias, instrumental variables, structural vs. reduced-form analysis, dynamic discrete choice models, and unobserved heterogeneity. During the term, students work with different data sets.

Prerequisite: ECON603 and ECON624; or permission of BSOS-Economics department.

Restriction: Must be in the Economics Doctoral program.

ECON772 Population Economics (3 Credits)

Explore topics in labor and public economics. Study the empirical evidence and the applied methodology used within labor and public economics. Discuss important topics in labor and public economics including immigration, education, discrimination, crime, and the role of family background. Provide instruction on how to perform empirical labor and public economic research by familiarizing students with available data sources, current research methodology, and practice with statistical packages such as Stata.

Prerequisite: ECON603 and ECON604; and (ECON623 and ECON624) or ECON626; or permission of BSOS-Economics Department.

ECON773 Topics in Applied Public and Labor Economics (3 Credits)

Explore topics in labor and public economics. Study the empirical evidence and the applied methodology used within labor and public economics. Discuss important topics in labor and public economics including immigration, education, discrimination, crime, and the role of family background. Provide instruction on how to perform empirical labor and public economic research by familiarizing students with available data sources, current research methodology, and practice with statistical packages such as Stata.

Prerequisite: ECON603, ECON604, and ECON623; and (ECON624 or ECON626).

ECON781 Valuing Environmental Benefits (3 Credits)

The theory and practice of valuing environmental benefits, including the health, recreation and aesthetic benefits associated with controlling air and water pollution, and the damages associated with climate change. Estimation of the benefits of energy efficiency improvements-including the benefits of fuel economy standards.

Prerequisite: ECON603; and ECON623. Or students who have taken courses with comparable content may contact the department.

ECON785 Advanced Economics of Natural Resources (3 Credits)

The use of exhaustible and renewable natural resources from normative and positive points of view. Analysis of dynamic resource problems emphasizing energy, mineral, groundwater, forestry, and fishery resources; optimal, equilibrium, and intergenerational models of resource allocation.

Prerequisite: Permission of AGNR-Agricultural & Resource Economics department; or (ECON603 and AREC623).

Cross-listed with: AREC785.

Credit Only Granted for: AREC785 or ECON785.

ECON799 Master's Thesis Research (1-6 Credits)**ECON808 Workshop on Macroeconomics, International Macroeconomics and International Finance (2 Credits)**

*

Restriction: Permission of BSOS-Economics department.

Repeatable to: 12 credits if content differs.

ECON818 Workshop in Microeconomic Theory (2 Credits)

Current research in microeconomic theory. Topics drawn from game theory, mathematical economics, and the economics of information and will include applications of the theory to diverse areas of economics. Specific topics: bargaining, auctions, mechanism design, signaling, general equilibrium, industrial organization theory, and financial markets theory.

Repeatable to: 12 credits if content differs.

ECON825 Advanced Economic Welfare Analysis (3 Credits)

Theory of economic welfare measurement, problems of path dependence in evaluating multiple price changes, welfare measurement under risk, general equilibrium welfare measurement with multiple distortions, and applications in evaluation of agricultural and resource policies.

Prerequisite: ECON604 and ECON603; or permission of BSOS-Economics department.

Credit Only Granted for: ECON825 or AREC825.

ECON828 Workshop in Econometrics (2 Credits)

Current research in econometrics. Topics drawn from theoretical and applied econometrics. Special topics include: maximum likelihood and generalized method of moments estimation of linear and non-linear models, analysis of stationary and non-stationary time series, cross section time series estimation, spatial estimation methods, Bayesian methods, semi-and non-parametric methods, rational expectations models, numerical methods, and various applications.

Repeatable to: 12 credits if content differs.

ECON848 Workshop in International Trade, Institutional Economics and Political Economy (2 Credits)

*

Restriction: Permission of BSOS-Economics department.

Repeatable to: 12 credits if content differs.

ECON858 Workshop in Public Economics (3 Credits)

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON868 Workshop in Industrial Organization, Microeconomic Theory and Behavioral and Experimental Economics (2 Credits)

Workshops designed to provide a structured environment for our faculty and graduate students to meet regularly to discuss and present their research ideas.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 12 credits if content differs.

ECON878 Workshop in Development, Labor and Public Economics (2 Credits)

*

Restriction: Permission of BSOS-Economics department.**Repeatable to:** 12 credits if content differs.**ECON888 Workshop in Comparative Institutional Economics (2 Credits)**

Current research in institutional economics and closely related fields such as economic transition, economic development, economic theory, law and economics, political economics, and economic history. Topics are drawn from both theoretical analysis of institutions and empirical studies of the effects and determinants of institutions.

Restriction: Permission of BSOS-Economics department.**Repeatable to:** 12 credits if content differs.**ECON898 Pre-Candidacy Research (1-8 Credits)****ECON899 Doctoral Dissertation Research (1-8 Credits)**

EDCI - Curriculum and Instruction

EDCI422 Student Teaching in Secondary Schools: Social Studies/Geography (12 Credits)**Prerequisite:** EDCI321.**Corequisite:** EDCI420.**EDCI428 Field Experience in Secondary Social Studies Teaching (1 Credit)**

Practical experience as an aide to a regular social studies teacher; assigned responsibilities and participation in a variety of teaching/learning activities. Students must reserve one full day per week for internship placement.

Corequisite: EDCI427.**Restriction:** Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.**EDCI438 Field Experience in Second Language Education (1 Credit)**

Practical experience as an aide to a regular foreign language teacher; assigned responsibilities and participation in a variety of teaching/learning activities.

Corequisite: EDCI330.**Restriction:** Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Foreign Languages program.**Repeatable to:** 3 credits if content differs.**EDCI448 Student Teaching in Secondary Schools: Theatre/English (12 Credits)**

Practical experience as an aide to a regular English, speech or drama teacher; assigned responsibilities and participation in a variety of teaching/learning activities.

Prerequisite: EDCI417.**Corequisite:** EDCI440.**Restriction:** Must be in Secondary Educ: English Language Arts program.**EDCI464 Assessment for Reading (3 Credits)**

Examination of reading assessment theory, materials and procedures; Topics include validity and reliability in reading assessment, formal and informal assessment, reading instruction that is informed by ongoing assessment, and the effects of assessment on students and schooling in a diverse society.

Prerequisite: EDCI362.**Restriction:** Senior standing. And must be in Elementary Education program; or must be in Early Childhood Education program.**EDCI497 The Study of Teaching (3 Credits)**

Identification and examination of learner and teacher outcome variables related to teaching systems, methods, and processes. Methods of conducting classroom research.

Prerequisite: EDCI481.**Corequisite:** EDCI489.**EDCI498 Special Problems in Teacher Education (1-6 Credits)**

Individual study of approved problems.

Restriction: Must be in a major within EDUC-Teaching, Learning, Policy and Leadership department; or must be in Curriculum and Instruction (Doctoral) program; or must be in Curriculum and Instruction (Master's) program; or permission of EDUC-Teaching, Learning, Policy and Leadership department.**Repeatable to:** 6 credits.**EDCI499 Workshops, Clinics, and Institutes (1-6 Credits)**

The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits.**EDCI618 Proseminar for Teaching Internship (1-3 Credits)**

Supports and complements candidates' internship experiences. Extends skills in implementing lesson plans (lesson planning), culturally competent teaching, classroom management, issues of professionalism, and portfolio development.

Prerequisite: Admission to a masters certification program in EDCI.**Corequisite:** Participation in an arranged school placement.**Formerly:** EDCI688E.**EDCI619 Developing a Professional Portfolio (1-3 Credits)**

Students will examine issues of performance assessment and develop professional portfolios following the guidelines established by the National Board for Professional Teaching Standards. Drawing on the research data collected throughout their program and relying on inquiry, reflections, and analysis, they will synthesize and present the body of their teaching experience.

Repeatable to: 3 credits.**Credit Only Granted for:** EDCI614 or EDCI619.**EDCI637 Internship in World Language/TESOL Education (2-6 Credits)**

Practical experience as a full-time intern with a fully licensed World Language/TESOL teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences.

Prerequisite: EDCI434 and EDCI634; or permission of EDUC-Teaching, Learning, Policy and Leadership department.**Additional Information:** Internship lab fee applies. See current program description for details.**EDCI694 Transformative Pedagogy and School Subjects (3 Credits)**

Examines the potential of various pedagogies to be transformative in relation to school subject matters, school identities, and school contexts.

EDCI788 Selected Topics in Teacher Education (1-3 Credits)

Current topics and issues in teacher education.

Repeatable to: 6 credits if content differs.

EDCI790 Epistemological Bases of Education Research (3 Credits)

A course on research theory, method, and design issues for doctoral students. Focuses on conceptual and theoretical understanding of methodology, the broad range of both qualitative and quantitative methodologies, and underlying epistemologies as they apply to the study of schools, curriculum, teaching, and teacher education.

Prerequisite: EDCI780.

EDCI798 Special Problems in Teacher Education (1-6 Credits)

Intended for Masters, AGS, or doctoral students in education who desire to pursue a research problem.

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI799 Master's Thesis Research (1-6 Credits)**EDCI822 Seminar in Secondary Education (3 Credits)****EDCI888 Apprenticeship in Education (1-8 Credits)**

Apprentice practice under professional supervision. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI889 Internship in Education (3-8 Credits)

Internship experiences with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI898 Pre-Candidacy Research (1-8 Credits)**EDCI899 Doctoral Dissertation Research (1-8 Credits)**

EDCP - Education Counseling and Personnel Services

EDCP411 Principles of Mental Health (3 Credits)

Mechanisms involved with personal adjustment, coping skills, and the behaviors that lead to maladjustment.

Prerequisite: 9 semester hours in the behavioral sciences; or permission of Counseling, Higher Education and Special Education department.

EDCP420 Advanced Topics in Human Diversity and Advocacy (3 Credits)

This course will build upon students' knowledge of diversity in American society and will examine contemporary topics related to multiculturalism in educational and community contexts as well as strategies for advocacy in such venues.

Restriction: Permission of the Counseling, Higher Education and Special Education department.

EDCP462 Disability in American Society (3 Credits)

Critical examination of the history of discrimination and analysis of current policies toward people with severe physical and mental disabilities.

Restriction: Must have earned a minimum of 30 credits; and sophomore standing or higher.

EDCP489 Field Experiences in Counseling and Personnel Services (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP498 Special Problems in Counseling and Personnel Services (1-3 Credits)

Available only to major students who have formal plans for individual study of approved problems.

Prerequisite: Available only to major students who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP499 Workshops, Clinics, Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Department of Counseling and Personnel Services (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing; clinical experiences in counseling and testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups.

Repeatable to: 6 credits.

EDCP605 Developmental Issues in Counseling Adults (3 Credits)

Theoretical approaches to adult development. The scope and variety of settings (industry, education, government) in which programs of adult counseling and guidance take place, and the nature of such programs.

EDCP610 Professional Orientation (3 Credits)

Survey of knowledge base and practices in counseling and personnel services specializations, professional ethics, credentialing relevant legislation, current issues.

EDCP611 Career Development Theory and Programs (3 Credits)

Research and theory related to career and educational decisions; programs of related information and other activities in career decision.

EDCP612 Multicultural Issues in Counseling and Personnel Services (3 Credits)

Socio-psychological, philosophical, clinical, and research topics related to the provision of counseling and personnel services, academic support, and career development for minority students on predominantly white college and university campuses. Implications of race and/or national origin on opportunities for personal, social, academic, and career development in educational settings.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP614 Counseling Skills: Introduction to Practicum (3 Credits)

Development and utilization of counseling skills.

Corequisite: EDCP616.

EDCP615 Counseling I: Appraisal (3 Credits)

Collection and interpretation of appraisal data, synthesis of data through case study procedures. Development of interview skills.

Corequisite: EDCP618.

Restriction: Must be in a major within EDUC-Counseling, Higher Education and Special Education department.

EDCP616 Counseling II: Theory and Practice (3 Credits)

Counseling theories and the practices which stem from such theories.

Corequisite: EDCP614.

EDCP617 Group Counseling (3 Credits)

A survey of theory, research and practice of group counseling and psychotherapy, with an introduction to growth groups and the laboratory approach, therapeutic factors in groups, composition of therapeutic groups, problem clients, therapeutic techniques, research methods, theories, ethics and training of group counselors and therapists.

Prerequisite: EDCP616.

EDCP619 Practicum in Counseling (2-6 Credits)

Sequence of supervised counseling experiences of increasing complexity. Limited to eight applicants in advance. Two hours class plus laboratory.

Prerequisite: EDCP616.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP620 Introduction to Mental Disorders (3 Credits)

Understanding diagnosis and assessment of mental, addictive, and co-occurring mental/addictive disorders, using the diagnostic criteria of the most prevalent psychiatric disorders as specified by the American Psychiatric Association Diagnostic and Statistical Manuals.

Credit Only Granted for: EDCP789W or EDCP620.

Formerly: EDCP789W.

EDCP621 Practicum in School Counseling (3-6 Credits)

Sequence of supervised counseling experiences of increasing complexity.

Prerequisite: EDCP616.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDCP619D or EDCP621.

Formerly: EDCP619D.

EDCP622 Human Development in the Counseling Context (3 Credits)

An examination of the development of individuals over the lifespan. A focus on human development theories and the ways in which those theories are utilized within the counseling process to promote optimal development of individuals and families across the lifespan.

Credit Only Granted for: EDCP789X or EDCP622.

Formerly: EDCP789X.

EDCP625 Counseling the Chemically Dependent (3 Credits)

Chemical dependency and its effects on the individual's personal, social, and work functioning. Counseling procedures for persons with drug and alcohol problems.

Restriction: Must be in the School Counseling program; or permission of instructor.

EDCP627 Process Consultation (3 Credits)

Study of case consultation, systems consultation, mental health consultation and the professional's role in systems intervention strategies.

Prerequisite: Graduate course in group process.

EDCP630 School-Based Behavioral Interventions (3 Credits)

Behavior assessment and intervention techniques from behavioral, cognitive-behavioral, and ecological models. Planning, implementation, and evaluation of behavior change techniques.

Restriction: Permission of instructor; and must be in a major in EDUC-College of Education.

EDCP631 Serving Culturally and Linguistically Diverse Clients in the Schools (3 Credits)

Conceptual and empirical literature about racially, ethnically, culturally, and linguistically diverse clients. Examination and integration of cross-cultural literature.

Restriction: Must be in the School Psychology or Counselor Education programs.

EDCP632 Cognitive Assessment (3 Credits)

Assessment of cognitive functioning of children and adolescents in reference to school learning and behavior problems. Administering, scoring and interpreting cognitive assessment instruments commonly used in school systems.

Restriction: Must be in the School Psychology program; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP633 Diagnostic Appraisal of Children I (3 Credits)

Assessment of development, emotional and learning problems of children.

Prerequisite: EDCP632.

EDCP635 School Counselor Leadership: Consultation and Collaboration (3 Credits)

Designed to prepare students to lead programs and employ consultation and collaboration strategies in the development and implementation of data driven school counseling programs. Students will learn leadership and school-based consultation principles, theories, skills, and models necessary to address mental health, academic, and behavior issues in the school. Emphasis is placed on the role of the school counselor as a systemic change agent. Ultimately, the course will assist future school counselor leaders to build effective stakeholder collaboration and consultation teams that promote equitable services for all K-12 students.

Restriction: Must be in the School Counseling program; or must be in the School Psychology program; or permission of instructor.

EDCP636 School Consultation II (3 Credits)

Didactic practicum in consultation services in the school setting. Case consultation and organizational consultation in the schools. Practicum experience.

Prerequisite: EDCP635.

Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP640 School Psychology Seminar: Overview of the Specialty (1-2 Credits)

Overviews the specialty of school psychology, including history of the specialty, roles and functions of school psychologists, and current professional issues related to the specialty.

Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP641 School Psychology Seminar: Professional Ethics (1-2 Credits)

Overviews ethical issues in the specialty of school psychology.

Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP651 Group Counseling in Schools (3 Credits)

Issues and techniques of group counseling in schools.

Prerequisite: EDCP616; and for school counseling and school psychology students only.

Restriction: Permission of instructor.

EDCP652 Research in Counseling (3 Credits)

An exploration of basic and applied research, program evaluation, and associated measurement and evaluation skills crucial for professional school counselors.

Restriction: Must be in the School Counseling program.

Credit Only Granted for: EDCP652 or EDCP789Y.

Formerly: EDCP789Y.

EDCP654 History of Psychological Science (3 Credits)

This course, intended for doctoral students in psychology, explores the historical development of psychological science and practice. Students will examine and discuss the original writings of persons involved in the making of psychology and of historians and others who have described and interpreted historical developments in psychology-as well as historical developments that influenced the making of psychology. The focus will be on understanding how the social, cultural, political and legal context of the times; developments in psychology and other sciences; technological advances; the evolution of the educational and scientific infrastructure; funding; and the growth in numbers of persons involved in psychological science and mental health have influenced psychology and been influenced by psychology. In other words, we will examine how psychological ideas about human nature, mental life, and behavior influence social and political events and arrangements as well as how social and political contexts influence psychological thinking and research.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDCP654 or EDCP789F.

Formerly: EDCP789F.

EDCP662 Psychosocial and Medical Aspects of Disability (3 Credits)

Appraisal and understanding of the psychosocial and medical aspects of disability and chronic illness, including their nature, causes, functional aspects and treatment; understanding of how psychological and social factors influence the adjustment processes in disability.

Prerequisite: EDCP610; or students who have taken courses with comparable content may contact the department.

EDCP663 Rehabilitation and Treatment of Mental and Emotional Disorders (3 Credits)

Purpose and principles of rehabilitation and treatment methods of adolescents and adults with significant mental health disorders and dual diagnoses. Focus is on the individual as well as the family. The course includes information regarding etiology, assessment, treatment interventions, program planning, and program evaluation.

Prerequisite: EDCP610; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP665 Family and Social Support Systems (3 Credits)

Principles and methods useful for understanding the role of family support systems in counseling. Specialized skills for counseling impaired adults and their families.

Recommended: EDCP610.

EDCP668 Special Topics in Rehabilitation (1-6 Credits)

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits if content differs.

EDCP669 Professional Issues in Counseling Psychology (1 Credit)

Introduction to counseling psychology, including history and development of the field, and current professional and scientific issues. Exploration of career, research, and professional development opportunities.

Prerequisite: Must be in the Counseling Psychology program.

Cross-listed with: PSYC669.

Repeatable to: 3 credits if content differs.

Formerly: EDCP695.

EDCP672 Social & Cognitive Foundations of Counseling & School Psychology (3 Credits)

In depth examination of theoretical approaches and issues of social and cognitive psychology.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDCP672 or EDCP789E.

Formerly: EDCP789E.

EDCP680 Basic Didactic Practicum in Counseling Psychology (3 Credits)

In depth examination of counseling theories and techniques, and supervised experience in application of a range of counseling and therapy approaches.

Prerequisite: For Counseling Psychology majors only.

Formerly: PSYC776.

EDCP682 Counseling Psychology Didactic Practicum in Group Interventions (3 Credits)

In depth examination of theories and techniques of group interventions; supervised experience in group counseling.

Prerequisite: For Counseling Psychology majors only.

Cross-listed with: PSYC682.

Formerly: EDCP718.

EDCP685 Counseling Psychology Didactic Practicum in Counseling Supervision (3 Credits)

In depth examination of theories and techniques of counseling supervision, supervised experience in the process of supervising counselors.

Cross-listed with: PSYC685.

Restriction: Must be in the Counseling Psychology program.

Formerly: EDCP745.

EDCP686 Counseling Psychology Didactic Practicum in Career Interventions (3 Credits)

In depth examination of theoretical approaches and issues in career interventions; supervised experience in career counseling and assessment.

Prerequisite: For Counseling Psychology majors only.

Formerly: EDCP777.

EDCP689 Seminar in Counseling Psychology (3 Credits)

Special topics in counseling psychology. Examples of topics include multicultural counseling, the counseling relationship, counseling and victimology, psychology treatment and health.

Prerequisite: For Counseling Psychology majors only.

Cross-listed with: PSYC689.

Repeatable to: 12 credits if content differs.

Formerly: EDCP789.

EDCP690 Research in Counseling Psychology I (3 Credits)

Critical analysis of strategies, methodological, conceptual, and content trends.

Prerequisite: For Counseling Psychology majors only.

Cross-listed with: PSYC690.

Formerly: EDCP778.

EDCP691 Research in Counseling Psychology II (3 Credits)

Critical analysis of trends and issues in counseling psychology science.

Prerequisite: For Counseling Psychology majors only. Cross-listed with PSYC691.

Formerly: EDCP717.

EDCP692 Assessment in Counseling Psychology I (3 Credits)

Broad introduction to the construction of psychological tests and measures, and experience in test interpretation, with consideration of historical, legal, ethical, and cultural issues surrounding the assessment process.

Prerequisite: For Counseling Psychology majors only. Cross-listed with PSYC692.

Formerly: EDCP789F.

EDCP693 Assessment in Counseling Psychology ii (3 Credits)

Supervised experience in administration, scoring, and interpreting major psychodiagnostic instruments used by counseling psychologists, as well as writing integrative assessment reports. Emphasis on hypothesis testing approach to assessment and on the counseling interview as an assessment tool.

Prerequisite: For Counseling Psychology majors only.

Formerly: EDCP789F.

EDCP694 Student Leadership Development (3 Credits)

Explores the development of leadership among college students including the study of leadership theory; a focus on how leadership is learned and developed; cultural dimensions of leadership; and exposure to the current national scene in leadership associations, programs, and resources.

Credit Only Granted for: EDCP694 or EDCP789D.

Formerly: EDCP789D.

EDCP695 Ethical and Professional Issues in Counseling Psychology (3 Credits)

Exploration of ethical and professional issues in Counseling Psychology.

Prerequisite: Must be in the Counseling Psychology program. Also offered as: PSYC695.

Credit Only Granted for: EDCP669, EDCP688, EDCP695, PSYC688, or PSYC695.

Formerly: EDCP669 and EDCP688.

EDCP697 Multicultural Issues in Counseling Psychology (3 Credits)

Exploration of knowledge, attitudes and skills for providing counseling and psychological services to culturally diverse populations.

Prerequisite: Only open to Counseling Psychology majors.

Credit Only Granted for: EDCP697, EDCP699, or PSYC697.

Formerly: EDCP699.

EDCP698 advanced Didactic Practicum in Counseling Psychology (3 Credits)

In depth examination of approaches to or theories about intervention, and supervised experience in the application of those approaches or theories. Each practicum focuses on a particular approach, e.g., psychodynamic, cognitive-behavioral, cross-cultural.

Prerequisite: For Counseling Psychology majors only.

Cross-listed with: PSYC698.

Repeatable to: 12 credits if content differs.

Formerly: EDCP776.

EDCP700 Theories and Strategies of Counseling Psychology (3 Credits)

Introduction to the professional field, examination of pertinent scientific and philosophical backgrounds, and survey of the major theories, principles, and training models in counseling. Correlated laboratory analogue experiences in dyadic and group interrelationships.

Prerequisite: For Counseling Psychology majors only.

Cross-listed with: PSYC700.

Formerly: EDCP789J.

EDCP701 Theories and Methods of Intervention (3 Credits)

An in-depth review of different theories and methods related to psychological interventions for children and adolescents.

Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.

Credit Only Granted for: EDCP789B or EDCP701.

Formerly: EDCP789B.

EDCP715 Appraisal Measures in Counseling (3 Credits)

Prerequisites: EDCP 615 and EDMS 646 or their equivalents.

Interpretation and utilization in counseling of the career interest and personality measures.

Prerequisite: EDCP615 and EDMS646; or students who have taken courses with comparable content may contact the department.

EDCP716 Advanced Counseling Theory Seminar (3 Credits)

Systematic investigation of methods of theory analysis and their application to counseling theory.

Prerequisite: Master's degree in counseling; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP717 Evaluation of Research in Counseling (3 Credits)

Research on process and outcome in counseling. A review of research and appropriate research methodologies.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP718 Advanced Seminar in Group Processes (2-6 Credits)

Prerequisite: Must have completed EDCP626.

Repeatable to: 6 credits.

EDCP738 Practicum in Child Assessment (1-6 Credits)

Administration of complete test batteries to children; supervision of initial interviews; test administration and scoring; interpretation and synthesis of test battery and interview material; the psychological report; verbal interpretation of test results; and recommendations. Taken initially with EDCP 633; repeated with EDCP 634 in the subsequent semester.

Corequisite: EDCP633 and EDCP634.

Restriction: Must be in the School Psychology program; or permission of instructor.

Repeatable to: 6 credits.

EDCP741 Multicultural Practice in Student Affairs: Self, Education, and Society (3 Credits)

Develop knowledge and skills in the area of multicultural practice in student affairs through the examination of oppression, power, and privilege and how these dynamics impact individuals, educational institutions, and societies.

Prerequisite: EDCP771.

Credit Only Granted for: EDCP741 or EDCP789Z.

Formerly: EDCP789Z.

EDCP742 Examining College Environments and Outcomes (3 Credits)

Explores theory and research on the impact of the college environment on undergraduate student outcomes. Discusses environmental theory and assessment, college impact theory, outcomes assessment, and implications of the above for higher education and student affairs.

Prerequisite: EDMS651; or permission of instructor.

Credit Only Granted for: EDCP742 or EDCP789K.

Formerly: EDCP789K.

EDCP743 Developmental Psychopathology (3 Credits)

Explore psychopathology from a developmental perspective and with an emphasis on affective bases of behavior

Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.

Credit Only Granted for: EDCP789Q or EDCP743.

Formerly: EDCP789Q.

EDCP745 Supervision of Counseling (3 Credits)

Survey of knowledge base, research approaches, and applied skills in supervision of counseling.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and must be in a major within EDUC-Counseling, Higher Education and Special Education department.

EDCP746 Clinical Supervision of Pupil Personnel Services (3 Credits)

Supervision of role of psychologists and counselors in school settings; applied skills in supervision of services.

Prerequisite: Advanced Doctoral Students Only.

Restriction: Permission of instructor.

EDCP750 Therapeutic Approaches with Children (3 Credits)

Theoretical and empirical underpinnings of the therapeutic process with children.

Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.

Credit Only Granted for: EDCP789N or EDCP750.

Formerly: EDCP789N.

EDCP770 Service-Learning and College Student Development (3 Credits)

Historical roots, concepts, and principles of practice of service-learning in higher education; includes community service component.

Credit Only Granted for: EDCP770 or EDCP789Y.

Formerly: EDCP789Y.

EDCP772 Research in Student Affairs (3 Credits)

Research designs and approaches to research in student development and higher education. Development of research for research competency or dissertation proposal.

Prerequisite: EDCP656; or permission of instructor.

Restriction: Must be in the College Student Personnel program.

EDCP774 Advanced Seminar in Theories of College Student Development (3 Credits)

An opportunity for in-depth study, dialogue, and reflection about theoretical frameworks for understanding the development of college students. Specific attention is given to enhancing knowledge and understanding of the development of students when social identities and their intersections are considered.

Prerequisite: EDCP771; or students who have taken courses with comparable content may contact the department.

EDCP775 Facilitating Student Learning in Higher Education (3 Credits)

Application of selected models of college student development, learning styles, and related models of instruction to the assessment of characteristics and the design of learning environments.

Prerequisite: EDCP771; or permission of EDUC-Counseling, Higher Education and Special Education department.

Restriction: Must be in Counseling and Personnel Services (Doctoral) program.

EDCP776 Social Justice in Student Affairs and Higher Education (3 Credits)

An exploration of differences, biases, assumptions, limitations, and challenge with diversity in the context of higher education and student affairs. Focusing on issues of inequities with social identity group membership and the systems of power, privilege, and oppression in society.

Prerequisite: EDCP771 or EDCP741; or permission of instructor.

Restriction: Limited to college student personnel students only.

EDCP778 Research Proposal Seminar (3 Credits)

The development of thesis, dissertation or other research proposals.

EDCP788 Advanced Practicum (1-6 Credits)

Individual supervision in one of the following areas: (a) individual counseling, (b) group counseling, (c) consultation, or (d) administration.

Prerequisite: Previous practicum experience.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP789 Advanced Topics in Counseling and Personnel Services (1-6 Credits)

Repeatable to: 6 credits.

EDCP797 Capstone Course: Program Planning (3-6 Credits)

Restriction: Must be in the School Counseling program.

Credit Only Granted for: EDCP789T or EDCP797.

Formerly: EDCP789T.

EDCP798 Special Problems in Counseling and Personnel Services (1-6 Credits)

Master's AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisers may register for credit under this number.

Prerequisite: Master's AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisers may register for credit under this number.

EDCP799 Master's Thesis Research (1-6 Credits)

Registration required to the extent of six hours for Master's thesis.

EDCP870 Professional Issues Seminar (3 Credits)

Examination of issues that bear on professional issues such as ethics, inter-professional relationships and research.

Credit Only Granted for: EDCP656 or EDCP870.

Formerly: EDCP656.

EDCP871 Student Affairs Doctoral Capstone Seminar (3 Credits)

Broadening perspectives on issues in student affairs and higher education by exploring the multiple roles and responsibilities of campus administrators and faculty members.

Prerequisite: EDCP870; or permission of instructor.

Restriction: Must be in the College Student Personnel program.

Credit Only Granted for: EDCP789I or EDCP871.

Formerly: EDCP789I.

EDCP879 Internship in School Counseling (4-8 Credits)

Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 9 credits.

Credit Only Granted for: EDCP888G or EDCP879.

Formerly: EDCP888G.

EDCP888 Apprenticeship in Counseling and Personnel Services (1-8 Credits)

Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP889 Internship in Counseling and Personnel Services (1-8 Credits)

Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.

Prerequisite: Open only to students advanced to candidacy for doctoral degree.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 8 credits if content differs.

EDCP898 Pre-Candidacy Research (1-8 Credits)**EDCP899 Doctoral Dissertation Research (1-8 Credits)**

Registration required to the extent of 12-18 hours for a Ph.D. Dissertation.

EDHD - Education, Human Development

EDHD400 Introduction to Gerontology (3 Credits)

Multidisciplinary survey of the processes of aging. Physiological changes, cultural forces, and self-processes that bear on quality of life in later years. Field study of programs, institutions for elderly, individual elders, their families and care providers.

EDHD402 Social Development (3 Credits)

Social Development. Critical concepts and ideas of the study of child and adolescent social development. Focus on changes in interpersonal relationships, emotions, achievement-related behavior and competence, and functioning within the broader social context.

Recommended: EDHD411.

EDHD405 Information Weaponization: Thinking Critically in a Changing World (3 Credits)

Contemporary challenges—such as climate change, food, energy and water security, and deadly virus transmission—demand that people think critically. While many societal challenges are seriously impacting local, regional and global communities, an increasing availability of information has contributed to what many call a "Post-Truth Era." We will consider the institutional use of post-truth a form of information weaponization. This course asks how information weaponization impacts the evaluation of valid lines of evidence and explanations. How do we evaluate and what is needed to improve individuals' evaluations of claims? This course will focus on mythological and unproductive thinking, increased digital literacy, enhanced reasoning, evaluation skills, and critical thinking.

Credit Only Granted for: HNUH238Y or EDHD405.

Formerly: HNUH238Y.

EDHD411 Child Growth and Development (3 Credits)

Theoretical approaches to and empirical studies of physical, psychological and social development from conception to puberty. Implications for home, school and community.

EDHD412 Infant Development (3 Credits)

Infant development across domains, including perceptual, motor, cognitive, language, social and emotional functioning from pre-natal through third year of life.

EDHD413 Adolescent Development (3 Credits)

Adolescent development, including special problems encountered in contemporary culture. Observational component and individual case study.

EDHD414 Development of the Scientific Mind Across the Lifespan (3 Credits)

Study of the educational, cognitive, social, and cultural factors that underlie the development of the scientific mind across the lifespan.

Recommended: EDHD320.

EDHD415 Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms (3 Credits)

Teachers must have knowledge and skill regarding how to appropriately manage the classroom so that all children, those with and without disabilities, will be able to learn from their school experiences. Classroom management extends beyond responding to student misbehavior to include a comprehensive approach to addressing the social/emotional competence of typically and atypically developing children. The goal of this course is to prepare early childhood teachers who are able to sensitively, responsively, and effectively manage a classroom of young students who are typically developing and those who have disabilities. Includes Field Experience.

Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).

Corequisite: EDSP423, EDSP424, and EDHD431.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD420 Cognitive Development and Learning (3 Credits)

Current developmental theories of cognitive processes such as language, memory, and intelligence and how differences in cognitive level (infancy through adolescence) mediate learning of educational subject matters.

Prerequisite: EDHD320, EDHD411, PSYC341, or PSYC355; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD421 Developmental Perspectives on Peer Interactions, Relationships, and Groups (3 Credits)

Explores the historical and theoretical foundations of contemporary research on peer interactions, relationships, and groups. It examines the interplay between individual characteristics, social behaviors, and relationships, and familial and extra-familial factors with an emphasis on diversity in the peer experience across various cultural, ethnic, gender, ability, and socioeconomic contexts.

Recommended: EDHD411 and EDHD306.

EDHD424 Culture, School & Community: Contexts for Learning (PreK-3rd) (3 Credits)

Explores the development of the young child (with and without disabilities, as well as those at environmental risk) in the context of the family and community, with emphasis on the impact of state, federal and school system policy on the child's world. Course will consider issues within the family, and the wider socio-cultural ecology that relate to the child's ability to develop and learn. In addition, students will develop strategies for respectful and culturally responses approaches to actively engage families in their children's development and learning. Includes Field Experience.

Prerequisite: EDHD425 and EDHD314; and (EDHD419 or EDSP420).

Corequisite: EDSP315, EDHD431, EDHD415, and EDSP423.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD425 Language Development and Reading Acquisition (3 Credits)

This course focuses on young children's language development and the relationship between language and reading acquisition. Students will learn: concepts central to language development; language achievements at different ages; concepts of emergent literacy; models of reading acquisition and skilled reading.

EDHD426 Cognitive and Motivational Literacy Content (3 Credits)

Students preparing for secondary teaching will learn about the cognitive and motivational aspects of literacy and learning from text for the content areas of literature, science, history and mathematics. Different evidenced-based literacy approaches appropriate for content learning are presented. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

EDHD427 Constructing and Integrating the Early Childhood Curriculum (3 Credits)

Explores the world from the child's perspective and constructs curriculum based on cognition, learning, and children's experiences. The integrated curriculum is the overarching framework for this course. Includes field experience.

Prerequisite: EDHD314, EDHD313, EDHD424, and EDSP470.

Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD435.

Restriction: Must be in Early Childhood Education program; and senior standing.

EDHD431 Child Development and Learning, Three to Eight Years (3 Credits)

Provides a basic understanding of child development theory and research, as well as specific knowledge about the development of children during the early and middle childhood "stages," specifically from ages 3 years to 8 years. A major emphasis will be the application of theory and research from the field of educational psychology to an understanding of how young children learn and achieve academically. Because the course will address the developmental and academic functioning of children with and without disabilities, a particular focus will be on individualization.

Prerequisite: Minimum grade of C- in EDHD314 and EDHD425; and 1 course with a minimum grade of C- from (EDHD419, EDSP420).

Corequisite: EDSP423 and EDSP315; and TRACK I: Must be concurrently enrolled in EDSP430, EDSP433; or TRACK 2: Must be concurrently enrolled in EDHD415, EDHD424.

EDHD432 Internship in EC/ECSE (12 Credits)

Interns spend five days per week in the classroom/home-based setting (under the mentorship of a certified teacher) where they gradually assume full responsibility for the planning, delivery and assessment of instruction or an intervention. Track I students will have an Infant/Toddler placement with special educator, Track II students will be in a Pre-K/K or Grade 1,2,3 classroom with general or special educator (must be opposite grade level and mentor from Phase I/fall of the senior year).

Prerequisite: EDHD323, EDHD322, EDSP417, EDHD441, EDHD442, EDHD443, EDHD444, and EDSP321.

Corequisite: EDHD437.

Restriction: Must be in Early Childhood and Early Childhood Special Education program; and senior standing or higher.

EDHD434 Child Development, Birth to Three Years (3 Credits)

Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.

Prerequisite: EDHD210, EDHD220, and EDSP211.

Corequisite: EDHD314 and EDHD425.

Cross-listed with: EDSP420.

Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

Formerly: EDHD419A.

EDHD435 Effective Components of the Early Childhood Classroom (3 Credits)

Explores three topics integral to effective, child-centered early childhood classrooms: assessment, classroom management and parent involvement. Includes field experience.

Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.

Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD427.

Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD436 Cognition and Motivation in Content Area Literacy for Middle-School Students (3 Credits)

Cognitive and motivational processes of literacy and learning from texts across subjects. Structured approaches to using reading, writing, and speaking for content learning based on approaches to knowledge, motivation, and strategies. Classroom contexts that enable middle-school students to engage with diverse texts and Internet resources are provided

EDHD437 EC/ECSE Teachers as Researchers and Reflective Practitioners (3 Credits)

Students use action research to improve instructional delivery or familial interactions in an effort to enhance the overall educational experiences/outcomes of children in classrooms or home-based contexts. Students will design and implement an action research project in an effort to meet a goal articulated in an applicable Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP) as the basis of their project.

Prerequisite: Minimum grade of C- in EDHD322, EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

Corequisite: EDHD432.

EDHD440 Adult Development (3 Credits)

Major conceptual approaches to the study of adult development including physical, cognitive, social, emotional and self processes that take place within individuals as they progress from emerging adulthood through middle age.

Prerequisite: EDHD320; or permission of EDUC-Human Development and Quantitative Methodology department.

Recommended: EDHD413.

EDHD441 Data Driven Decision Making in EC/ECSE (1 Credit)

Students will be exposed to formative (e.g., classroom based, ongoing) and summative (e.g., standardized testing) assessments. Students will collect and analyze formative assessment data from their internship classrooms as the bases of planning and delivering instruction to meet the diverse needs of all learners. They will also analyze standardized assessment data to gain an understanding of measures used to determine cross-school and cross-teacher effectiveness. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP433 or TRACK 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDSP321, EDSP417, EDHD442, EDHD443, and EDHD444.

EDHD442 Interventions for Children with Behavioral Challenges (1 Credit)

Students will expand knowledge of and develop skills to address challenging behaviors in inclusive early childhood classrooms. Students examine the causes underlying challenging behaviors during the early childhood years, and identify appropriate resources and support services for working with families to develop a unified approach when responding to behavioral challenges. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.

Corequisite: EDSP321, EDSP417, EDHD322, EDHD323, EDHD441, EDHD443, and EDHD444.

EDHD443 Interventions for Children with Social and Communication Challenges (1 Credit)

Students will learn about the characteristics of children with autism spectrum disorder, pervasive developmental disorder, social communication disorder, and other related challenges and will be equipped to meet the needs of this group of children in the early childhood classroom. The utilization of Universal Design for Learning (UDL), Response to Intervention (RTI) and other early childhood special education approaches, as they apply to this specific group of children, will be addressed. Interventions designed to improve the functioning of children with autism spectrum disorders and related disorders will be reviewed. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.

Corequisite: EDHD322, EDSP321, EDSP417, EDHD323, EDHD441, EDHD442, and EDHD444.

EDHD444 Action Research in EC/ECSE (1 Credit)

Students will become familiar with the EC/ECSE research process, literature and how teachers use action research to improve pedagogy and the experiences of children in classrooms or home-based contexts. Students will utilize this knowledge, as well as either a goal in an Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP), to develop an action research study commenced during the following semester. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDHD441, EDHD442, EDHD443, EDSP417, and EDSP321.

EDHD460 Educational Psychology (3 Credits)

Application of psychology to learning processes and theories. Individual differences, measurement, motivation, emotions, intelligence, attitudes, problem solving, thinking and communicating in educational settings.

Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD474 Human Development Honors Seminar (3 Credits)

This seminar will have three overarching goals: (1) expose students to fundamental research questions in human development; (2) create professional development opportunities through invited speakers and (3) communicate an understanding of diversity, equity, and inclusion in all aspects of the research process.

Restriction: Must be in the Human Development Honors program.

EDHD475 Human Development Honors Thesis Preparation Course (3 Credits)

This is an individual instruction course with the thesis faculty advisor. In this course, students will work towards writing and completing their honors thesis, which will include a review of relevant literature, the rationale for the research project, research questions, methods for data collection, analysis plan, results, and a discussion of the findings. Faculty advisors will communicate the goals of the major surrounding issues of diversity, equity, and inclusion.

Prerequisite: EDHD474.

Restriction: Must be in the Human Development Honors program.

EDHD476 Human Development Honors Thesis Research (3 Credits)

This is an individual instruction course with the thesis advisor, culminating in the presentation and defense of the student's thesis. Students will address the aspects of their research that reflect diversity, equity, and inclusion.

Prerequisite: EDHD475.

Restriction: Must be in the Human Development Honors program.

EDHD488 Special Topics in Human Development (3 Credits)

Special and intensive treatment of current topics and issues in human development.

Prerequisite: EDHD320.

Recommended: PSYC100.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits if content differs.

EDHD489 Field Experiences in Human Development (3-6 Credits)

Planned field experience (internship or research-based activities) related to Human Development. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDHD498 Special Research Problems in Human Development (1-4 Credits)

Exploration of current research problems in the study of human development. Available only to students who have definite plans for individual study of approved research problems. Credit according to extent of work.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDHD499 Workshops, Clinics, and Institutes (1-6 Credits)

The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits.

EDHD600 Introduction to Human Development and Child Study (3 Credits)

An overview of the multidisciplinary, scientific principles which describe human development and behavior and an application of these principles in an analysis of a behavioral record. Techniques of observation, recording, and analysis of human behavior. Emphasis on critiquing and applying research findings.

EDHD601 Biological Bases of Behavior (3 Credits)

Emphasizes that understanding of human life, growth and behavior depends on understanding physical processes. Application throughout is made to brain-behavior relationships and implications for understanding and working with people.

Prerequisite: Must have completed or be concurrently enrolled in EDHD600; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD602 Social Bases of Behavior (3 Credits)

The social forces and expectations that influence behavior from infancy through old age and death. The effects of ethnicity, social learning values, attitudes, historical events and mass media on perception and behavior in societal interactions.

EDHD605 Curriculum in Early Childhood Education (3 Credits)

Curriculum theory, research and practice in educational settings for infants and children to age eight.

EDHD611 Cultural and Contextual Influences on the Young Child (3 Credits)

Theory and research on social and cultural influences in early child development.

EDHD617 Achievement Motivation in Adolescence (3 Credits)

Study of different aspects of motivation and how they develop in the secondary school years. Focus on how different instructional practices influence motivation and design of various strategies for improving students motivation.

Credit Only Granted for: EDHD779W or EDHD617.

Formerly: EDHD779W.

EDHD619 Advanced Scientific Concepts in Human Development (3 Credits)

A critical examination of concepts and issues in contemporary culture as these relate to the development and learning of children and youth.

Repeatable to: 6 credits if content differs.

EDHD624 Cognitive and Motivational Bases of Literacy Instruction in the Content Areas (6 Credits)

Secondary and middle school teachers learn about and apply knowledge and skills related to the cognitive and motivational dimensions of literacy and learning from text for a variety of content areas. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

Credit Only Granted for: EDHD624 or EDHD779G.

Formerly: EDHD779G.

EDHD629 Developmental Science Seminar and Colloquium (1 Credit)

A seminar and colloquium series featuring speakers from the department, the college, the university, and other universities and institutions from across the world that aims to cover issues pertaining to contemporary theory and research in human development, child development, and developmental science. The seminar format is a weekly colloquia series, along with discussion sessions related to a range of developmental science topics.

Recommended: For graduate students in the Human Development program.

Repeatable to: 8 credits if content differs.

EDHD635 Adolescents at Risk (3 Credits)

Study of current research on risky behaviors that impact adolescent student learning and achievement particular in underserved populations. General diversity issues and topics specific issues that put adolescents at risk for academic failure and other negative trajectories will be explored.

Recommended: EDHD600.

Credit Only Granted for: EDHD635 or EDHD779L.

Formerly: EDHD779L.

EDHD659 Direct Study of Individuals (3 Credits)

Observational techniques to record the behavior of an individual. Procedures to ensure objectivity in data collection. Methods used to analyze, categorize, quantify observational data in research.

EDHD662 Research Methods in Education Settings (3 Credits)

Research methods associated with studying the development, achievement, and school adjustment of children and adolescents in educational settings, with an emphasis on quantitative methodologies.

EDHD674 Self Processes in Adolescence: Implications for Academic Achievement and School Adjustment (3 Credits)

Study of the development of the self from infancy through adolescence, and examination of the literature on the self processes of special adolescent populations as they relate to achievement-related orientations and school adjustment in secondary settings.

Credit Only Granted for: EDHD619L or EDHD674.

Formerly: EDHD619L.

EDHD690 Theoretical Foundations of Human Development (3 Credits)

Theoretical foundations in the field of human development with a focus on connections between the major theoretical paradigms in the literature and current research in developmental science.

EDHD692 Cognitive Basis of Instruction (3 Credits)

Psychological and educational research literature on human cognition, especially as applied to learning and teaching in classroom settings.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD700 Infant Development (3 Credits)

An examination of recent research findings in physical, social, emotional and language development during infancy. A review of prenatal and perinatal factors in relation to their influence on later development.

EDHD703 Source Selection, Multimedia, & Misinformation: How Students Learn to Navigate Evidence in the 21st Century (3 Credits)

Explores how students come to understand how evidence is acquired, produced, and used to make inferences and draw conclusions about the world. Topics will include selective trust, source selection, navigating multiple mediums and modalities, epistemic cognition, scientific reasoning, motivated cognition, and confirmation bias. We will explore both basic research on these topics as well as ways in which this research can be used to foster critical thinking and scientific literacy in childhood and beyond, in both formal and informal educational settings.

EDHD711 Peer-Culture and Group Processes in Human Development (3 Credits)

The process of group formation, role-taking and status-winning, and the emergence of the peer-culture during childhood and the evolution of the child society at different maturity levels to adulthood. The developmental tasks and adjustment problems associated with winning, belonging, and playing roles in the peer group.

Prerequisite: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD718 Apprenticeship in College Teaching (1 Credit)

For graduate students teaching autonomously for the first, second, or third time at the University of Maryland, College Park; not intended for teaching assistants. This course provides graduate student teachers with a set of structured experiences that foster professional growth and development in the role of college instructor. Includes seminars on the scholarship of college teaching and principles of optimal college classroom environments, peer and faculty in-class observations of teaching, and guided reflective analysis of experience in the classroom.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD720 Social Development and Socialization Processes (3 Credits)

This course covers social development and socialization processes across the life-span. The course typically covers the following topics: parent-child relationships, peer relationships, moral development, social cognition, social competence, social motivation, self-regulation, and cultural influences on development. This is core doctoral course.

EDHD721 Cognitive Development and Learning: An Introduction (3 Credits)

Introductory survey into contemporary theory and research in cognitive development; applications to classroom learning.

EDHD722 Learning Theory and the Educative Process (3 Credits)

Advanced study of theories, issues and research in several categories of cognition and learning applied to education and the helping professions.

Prerequisite: EDHD721; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD750 Culture, Context, and Development (3 Credits)

This course will cover theory and research on cultural and contextual influences on social development.

EDHD751 Child Development and Poverty (3 Credits)

This course examines the theoretical, methodological, and empirical literature on the effects of poverty on children's development from a multidisciplinary perspective. It includes basic concepts in methodology, measurement design, and issues related to connecting basic research on poverty and children to policy and program interventions.

Prerequisite: EDHD720; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD760 Advanced Educational Psychology (3 Credits)

Application of psychology to learning processes and theories. Individual differences, measurement, motivation, and intelligence.

Prerequisite: Prior course in educational psychology, learning, or cognition; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD768 Laboratory Methods in Developmental Psychophysiology (3 Credits)

Covers basic electrophysiology and human electrophysiology. Topics include recording, processing, and analyzing EEG and ERP. Emphasis will be placed on the testing of infant and child populations.

Recommended: EDHD775.

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

EDHD775 Human Development and Neuroscience (3 Credits)

Course focuses on the biological bases of human behavior including physiological processes which have an impact on human development.

Prerequisite: EDHD601; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD779 Selected Topics in Human Development (1-6 Credits)

This course focuses on topics of current significance in human development research. Topics covered change each semester, and vary by instructor.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits if content differs.

EDHD780 Research Methods in Human Development (3 Credits)

Research methodology for studying human development: research design, hypothesis formulation, instrument development, methodological and statistical approaches, survey of methodologies.

Prerequisite: EDMS651; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD789 Internship in Human Development (3-8 Credits)

Internship experience in one or more human service agencies in the community.

Prerequisite: 9 credits in EDHD courses.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 9 credits.

EDHD798 Laboratory in Human Development (1-6 Credits)

Independent research supervised by an instructor in a research setting.

Repeatable to: 9 credits if content differs.

EDHD799 Master's Thesis Research (1-6 Credits)

Registration required to the extent of six hours for master's thesis.

EDHD800 Seminar in Early Childhood Education (3 Credits)

This seminar explores relevant current issues in early childhood development and education.

EDHD820 Advanced Topics in Social Development (3 Credits)

Advanced doctoral seminar on socialization and social development with consideration of selected topics. Identification of research problems and areas of application.

Prerequisite: EDHD720; or permission of EDUC-Human Development and Quantitative Methodology department.

Credit Only Granted for: EDHD820 or EDHD821.

Formerly: EDHD821.

EDHD835 The Development of Achievement Motivation (3 Credits)

Development of achievement motivation and how it relates to academic achievement during the elementary and secondary school years.

Expectancy-value theory, attribution theory, self-efficacy theory, socialization of achievement motivation.

Prerequisite: EDHD830 or EDHD721; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD840 Language and Literacy Development (3 Credits)

Content of this course is current theoretical and empirical research on children's language developments and on the linguistic basis of beginning reading.

EDHD842 Learning in Context (3 Credits)

Educational and home context that influence development of motivation, cognitive strategies, and knowledge will be explored.

Prerequisite: EDHD721.

EDHD850 Social Cognition and Moral Reasoning (3 Credits)

Theory and research on social-cognition development and moral development, from infancy to adolescence will be covered.

EDHD872 Young Children at Environmental Risk: Developmental and Intervention Issues (3 Credits)

Examination of impact of poverty on young children, their families, and communities. Epidemiological, physiological, and sociological studies will be reviewed.

EDHD875 Advanced Human Development and Neuroscience (3 Credits)

Advanced doctoral seminar in the biological bases of behavior. Identification of research problems and areas of application.

Prerequisite: EDHD775; or permission of EDUC-Human Development and Quantitative Methodology department.

Credit Only Granted for: EDHD811 or EDHD875.

Formerly: EDHD811.

EDHD878 Applied Research and Strategies (3 Credits)

Examine current human development research literature, define a research problem and design and implement a research study or review in collaboration with faculty.

Prerequisite: EDMS651; or permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits if content differs.

EDHD888 Apprenticeship in Human Development Research (1-8 Credits)

Apprenticeship in Human Development research.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD889 Practicum in Human Development (3-9 Credits)

Field experience in applied human development at a professional level of competence in a particular role with appropriate supervision.

Prerequisite: Credit not to be granted for experience accrued prior to registration; and open only to degree and certificate-seeking graduate students.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 9 credits if content differs.

EDHD898 Pre-Candidacy Research (1-8 Credits)**EDHD899 Doctoral Dissertation Research (1-8 Credits)**

Registration required to 12-18 hours for a Ph.D. dissertation.

EDHI - Education Leadership, Higher Ed and International Ed

EDHI488 Special Topics in Education Policy and Administration (1-3 Credits)

Special and intensive treatment of current topics and issues in education policy and administration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits.

Formerly: EDPL488.

EDHI489 Field Experiences in Education (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL489.

EDHI498 Special Problems in Education (1-3 Credits)

Available only to students who have definite plans for individual study of approved problems.

Prerequisite: Available only to students who have definite plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL498.

EDHI499 Workshops, Clinics, and Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.

Repeatable to: 6 credits.

Formerly: EDPA499.

EDHI600 Education and Society (3 Credits)

Education and Society is an introductory course to graduate studies in the Department of Education Policy and Leadership. Students consider how social institutions influence – and in turn are influenced by – education policies and practices.

Credit Only Granted for: EDHI600, EDPL600, or EDPS600.

Formerly: EDPL600.

EDHI605 Comparative Education (3 Credits)

Analyzes and compares leading issues in education in various countries of the world, particularly as they relate to crucial problems in American education.

Credit Only Granted for: EDHI605, EDPL605, or EDPS605.

Formerly: EDPL605.

EDHI606 Political Economy of Education in a Global Context (3 Credits)

Examination of alternative economics perspectives and their implications for education policy and practice internationally, from local to global levels. The connection of education to issues of development, inequality, poverty, gender, and race will be discussed.

Credit Only Granted for: EDHI606, EDPL606, or EDPS606.

Formerly: EDPL606.

EDHI607 Culture and Education in a Global Context (3 Credits)

Examines cultural theories and analyzes cultural influences in education. Course materials and discussion critically analyze cultural transmission and schooling practices. Also examined are politics of culture, multiculturalism, global cultural clashes, and educators as critical culture workers.

Credit Only Granted for: EDHI607, EDPL607, or EDPS607.

Formerly: EDPL607.

EDHI608 Gender and Education (3 Credits)

The course examines feminist theories on gender inequity, and analyzes social impacts on girls' and women's education. Also examined are women's ways of knowing, issues of race and class, gender and development, ecofeminism, and technology for women.

Credit Only Granted for: EDPL788B or EDPL608.

Formerly: EDPL608.

EDHI630 Analyzing Systemwide Education Policy (3 Credits)

Analysis of how assessments are made of systemwide education policy based on the approaches used in studies of national education policy by international agencies.

Credit Only Granted for: EDHI630, EDPL630, or EDPS630.

Formerly: EDPL630.

EDHI642 Management of Change in Educational Organizations (3 Credits)

Role of individual as a change agent; issues related to effecting change within organizational sub-systems and total systems are considered. Specific strategies for successful change in schools are addressed.

Credit Only Granted for: EDHI642, EDPL642, or EDPS642.

Formerly: EDPL642.

EDHI643 Management of Human Resources In Education (3 Credits)

Examination of knowledge and development of awareness and capabilities needed by educational leaders to promote student success by managing school system personnel needs. Emphasis on recruitment, selection and supervision as well as labor relations and collective bargaining.

Credit Only Granted for: EDHI643, EDPL643, or EDPS643.

Formerly: EDPL643.

EDHI650 Professional Seminar in Higher and Adult Education (3 Credits)

Introduction to higher and adult education as a field of study. Origins, current dimensions and problems, and emerging issues. Field trips to state and national capitols, and involvement in professional conferences.

Credit Only Granted for: EDHI650, EDPL650, or EDPS650.

Formerly: EDPL650.

EDHI652 Higher Education in American Society (3 Credits)

Examines the concepts of academic freedom, corporate autonomy and institutional accountability with emphasis on twentieth century relationships between higher education and government in the United States.

Credit Only Granted for: EDHI652, EDPL652, or EDPS652.

Formerly: EDPL652.

EDHI653 Organization and Administration of Higher Education (3 Credits)

Basic concepts and terminology related to organizational behavior and institutional governance structures. The governance and organization of higher education in the United States.

Credit Only Granted for: EDHI653, EDPL653, or EDPS653.

Formerly: EDPL653.

EDHI654 The Community and Junior College (3 Credits)

Historical development and philosophical foundations of community and junior colleges in America with emphasis on organizational and administrative structures in two year institutions and the clientele they serve.

Credit Only Granted for: EDHI654, EDPL654, or EDPS654.

Formerly: EDPL654.

EDHI657 History of Higher Education in the United States (3 Credits)

History of higher education in America from colonial times to the present with emphasis on expansion of higher education and the growing complexity of its structures, organization, and purposes.

Credit Only Granted for: EDHI657, EDPL657, or EDPS657.

Formerly: EDPL657.

EDHI660 Retention Theories and the Impact of College (3 Credits)

An introduction to retention theories and the college impact literature. The primary focus will be to examine the disciplinary and philosophical frameworks that have informed the development of leading theories and policies.

Credit Only Granted for: EDHI660, EDPL660, or EDPS660.

Formerly: EDPL660.

EDHI662 Research on Ethnic Minorities and Demographic Trends in Higher Education (3 Credits)

Current research on ethnic minority student populations including issues of access, campus climate, racial identity, achievement and motivation. In addition to student issues, course examines issues for faculty of color in higher education, curriculum and teaching, and leadership and governance. The application of broad demographic changes in the nation and their impact on higher education over time.

Credit Only Granted for: EDHI662, EDPL662, or EDPS662.

Formerly: EDPL662.

EDHI663 Philanthropy and Fundraising in Higher Education (3 Credits)

A critical look at how philanthropy and fundraising has affected American Higher Education. Topics will include: a history and overview of philanthropy, motivations of and traditions of giving in different populations, ethics, and critical issues within educational and advancement.

Credit Only Granted for: EDHI663 or EDHI788D.

Formerly: EDHI788D.

EDHI664 The College Experience (3 Credits)

Designed to provide students with an overview of the research and scholarship on two of the major stakeholders in higher education – students and faculty. Examines the educational experiences of college students in and out of the classroom in higher education in the United States by focusing on what students learn and the different collegiate experiences that influence their learning.

Credit Only Granted for: EDHI664, EDPL664, or EDPS664.

Formerly: EDPL664.

EDHI665 College Access and Choice (3 Credits)

Examines the college-going process, how and why some students successfully navigate it, and what policies and programs can help students from disadvantaged or underrepresented backgrounds overcome barriers to college access and entry.

Credit Only Granted for: EDHI665 or EDHI788L.

Formerly: EDHI788L.

EDHI666 The Academic Profession (3 Credits)

Explores how faculty demographics, discipline, graduate socialization, and organizational context (institutional type, mission, and culture) matter to critical higher education outcomes, such as student learning, community engagement, research, shared governance and access and equity.

Credit Only Granted for: EDHI666 or EDHI788P.

Formerly: EDHI788P.

EDHI667 Women in Higher Education (3 Credits)

A comprehensive overview of the history, present condition, and current research on women students, faculty, administrators, and staff in higher education. Explores why and how women and men experience higher education differently, by drawing on historical, cultural, and psychological contexts, feminist theoretical and research perspectives and recent research in various disciplines.

Credit Only Granted for: EDHI667 or EDHI788A.

Formerly: EDHI788A.

EDHI672 Modes of Inquiry in Education Research (3 Credits)

Introduction to modes of inquiry appropriate to research on issues and problems in education. Examination of qualitative, quantitative and mixed research methods and designs with a focus on related standards of quality.

Restriction: Must be in a program in the Counseling, Higher Education, or Special Education department; or permission of the instructor.

Credit Only Granted for: EDHI672 or EDPS672.

EDHI673 Economic Evaluation of Education (3 Credits)

Examination and application of economic approaches - cost, cost-effectiveness, and cost-benefit analysis - to the evaluation of education programs and policies.

Credit Only Granted for: EDHI673, EDPL673, or EDPS673.

Formerly: EDPL673.

EDHI674 Minority Serving Institutions (3 Credits)

Definitions and designations of Minority Serving Institutions vary; however they traditionally include Historically Black Colleges and Universities, Hispanic-Serving Institutions, and Tribal Colleges and Universities. Exploring these institutions as well as some non-traditional MSIs including, Deaf Serving Institutions and Asian American and Pacific Islander Serving Institutions.

Credit Only Granted for: EDHI674 or EDHI788Q.

Formerly: EDHI788Q.

EDHI677 Ranking System in Higher Education: How They Work and Why They Matter (3 Credits)

A critical examination of domestic and international university rankings systems from their historic origins to current day. Students explore the criteria used to identify quality, the methods used to collect data, and the impact of ranking systems on institutional decision-making.

Credit Only Granted for: EDHI677 or EDHI788W.

Formerly: EDHI788W.

EDHI679 Master's Seminar (3 Credits)

Directed study for master's degree students writing seminar papers.

Formerly: EDPL679.

EDHI680 Gender, Development, and Education (3 Credits)

Focusing on gender as an analytical frame and a discrete variable, a comprehensive view of the relationship between gender and education in the context of national development is presented. It identifies the conditions of men and women's education and policy efforts to promote equity and social transformation.

Credit Only Granted for: EDHI674, EDHI680 or EDHI788K.

Formerly: EDHI788K.

EDHI681 Education for Global Peace (3 Credits)

This course will examine how education can address the threats of violence and wars. It prepares students to teach about peace, nonviolence, and conflict resolution, and also to analyze and implement changes in school and society to contribute to peace and non-violence.

Credit Only Granted for: EDHI681, EDPL681, or EDPS681.

Formerly: EDPL681.

EDHI682 Ecological Ethics and Education (3 Credits)

An exploration of the paradigms, approaches, and ways of knowing offered through ecological ethics and environmental sustainability education.

Credit Only Granted for: EDHI682 or EDHI788E.

Formerly: EDHI788E.

EDHI683 World Religions and Their Implications for Education (3 Credits)

Students develop a basic understanding of world religions, looking at their origins, development, teachings, and primary figures. Students explore the roles, meaning, purpose that education plays in the various religions and examine their implications for education in the 21st century.

Credit Only Granted for: EDHI683 or EDHI788C.

Formerly: EDHI788C.

EDHI684 Alternative Education, Alternative Development (3 Credits)

A critical examination of the political economy of education and international development policies and practices. Focus is on the implications of these critiques for alternative education and development policies and practices.

Recommended: EDHI606.

Credit Only Granted for: EDHI684 or EDHI788D.

Formerly: EDHI788D.

EDHI689 Practicum In Educational Administration and Supervision (1-3 Credits)

Promotes skill development in managerial, leadership and supervisory areas. Practicum is based on results of diagnostic instruments and an individual professional development plan.

Repeatable to: 3 credits if content differs.

Formerly: EDPL689.

EDHI700 Qualitative Research Methods in Education (3 Credits)

Qualitative methods in education research, emphasizing the paradigms of philosophy, history, sociology, anthropology, and comparative studies as they rely on narrative rather than quantitative ordering of data.

Credit Only Granted for: EDHI700, EDPL700, or EDPS700.

Formerly: EDPL700.

EDHI704 Issues and Institutions in International Educational Development (3 Credits)

Examines the role of educational institutions in international development and the issues involved in educational planning and policymaking at the local, national and international levels.

Credit Only Granted for: EDHI704, EDPL704, or EDPS704.

Formerly: EDPL704.

EDHI710 Globalization and Education (3 Credits)

Multiple education policies, practices, and innovations linked to economic, technological, and cultural dimensions of globalization are affecting education systems. The consequences of such forces on educational equality, equity, and quality, noting similarities and differences between industrialized and developing countries will be explored.

Recommended: EDHI605.

Credit Only Granted for: EDHI710 or EDHI788J.

Formerly: EDHI788J.

EDHI713 Non-Formal Education (3 Credits)

An examination of forms of education outside the formal education system—known generally as nonformal (NFE) education and including popular education—to identify how these forms can assist marginalized populations in both Third World and industrialized countries to improve their quality of life and undertake collective action for social advancement.

Recommended: EDHI605.

Credit Only Granted for: EDHI707, EDHI713 or EDHI788N.

Formerly: EDHI788N.

EDHI725 Education in East Asia (3 Credits)

The course traces the cultural and intellectual history of education in East Asia, and examine features and important issues in East Asian education systems. School reform and social changes are studied.

Credit Only Granted for: EDHI725, EDPL725, or EDPS725.

Formerly: EDPL725.

EDHI743 Leadership Theory (3 Credits)

Critical analysis of contemporary leadership theoretical constructs. Consideration of implications for organizational improvement.

Prerequisite: EDHI642.

Credit Only Granted for: EDHI743, EDPL743, or EDPS743.

Formerly: EDPL743.

EDHI744 Organizational Theory in Research and Practice (3 Credits)

This course provides an overview of the study of organizations for graduate students interested in education and social policy. Class lectures focus on contrasting theories and critiquing application of theories to social policy problems with an emphasis on education. Case materials focus on a variety of organizational areas including: schools, hospitals, non-profit community based organizations, the arts, elected bodies, higher education and private business.

Credit Only Granted for: EDHI744, EDPL744, or EDPS744.

Formerly: EDPL744.

EDHI750 International Higher Education (3 Credits)

Comparison of higher education systems in several countries, and of the problems and issues in higher education faced by these countries.

Credit Only Granted for: EDHI750, EDPL750, or EDPS750.

Formerly: EDPL750.

EDHI752 State Systems of Higher Education (3 Credits)

Creation, operation, alteration and evaluation of state systems of higher education. Campus autonomy versus public accountability. Analysis of topics such as state planning, budget and program review, and administration of student aid and federal programs.

Credit Only Granted for: EDHI752, EDPL752, or EDPS752.

Formerly: EDPL752.

EDHI754 Higher Education Finance (3 Credits)

Economic perspectives on higher education. Ways of financing higher education and current finance issues. Higher education budget concepts and processes.

Credit Only Granted for: EDHI754, EDPL754, or EDPS754.

Formerly: EDPL754.

EDHI755 Federal Policies in Post-Secondary Education (3 Credits)

Evolution of the federal role, its current scope and funding. Policy issues associated with federal student aid programs, research grants and social equity regulations.

Cross-listed with: EDPS755.

Credit Only Granted for: EDHI755, EDPL755, or EDPS755.

Formerly: EDPL755.

EDHI759 Seminar in Adult and Continuing Education (3 Credits)

Current issues and problems in adult and continuing education and lifelong learning in America.

Formerly: EDPL759.

EDHI788 Special Topics in Education Policy and Administration (1-3 Credits)

Special and intensive treatment of current topics and issues in education policy and administration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits.

EDHI789 Doctoral Practicum in Administration and Supervision (1-3 Credits)

Experiential activities designed to enhance student skills. Based on Individual Professional Development Plan for each student.

Repeatable to: 3 credits if content differs.

Formerly: EDPL789.

EDHI798 Special Problems in Education (1-6 Credits)

Master's, AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisors may register for credit under this number.

Formerly: EDPL798.

EDHI799 Master's Thesis Research (1-6 Credits)

Formerly: EDPL799.

EDHI805 Seminar in Comparative Education (3 Credits)

Analysis of educational issues on a worldwide basis with opportunities to focus on a particular country on an individual basis. Analysis of qualitative research methods as used in cross-cultural and comparative education studies.

Credit Only Granted for: EDHI805, EDPL805, or EDPS805.

Formerly: EDPL805.

EDHI839 Seminar in Teacher Education (3-6 Credits)

A problem seminar in teacher education.

Repeatable to: 6 credits.

Formerly: EDPL839.

EDHI853 Leadership in Higher Education (3 Credits)

Theories of organizational leadership applied to institutions of higher education.

Prerequisite: EDHI653.

Credit Only Granted for: EDHI853, EDPL853, or EDPS853.

Formerly: EDPL853.

EDHI855 Lifelong Learning Policy (3 Credits)

Policies and programs for training and continued learning in business and industry, government agencies, unions, professional societies, and nonprofit organizations.

Credit Only Granted for: EDHI855, EDPL855, or EDPS855.

Formerly: EDPL855.

EDHI862 Seminar: Theoretical Basis of Administrative Behavior (3 Credits)

Study of administrative behavior in educational institutions. Development of a research design for the study of administrative behavior in one educational institution.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDHI862, EDPL862, or EDPS862.

Formerly: EDPL862.

EDHI888 Apprenticeship in Education (1-8 Credits)

Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL888.

EDHI889 Internship in Education (3-8 Credits)

Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL889.

EDHI895 Research Critique Seminar (3 Credits)

Critiques of research designs in preparation for the doctoral dissertation.

Credit Only Granted for: EDHI895, EDPL895, or EDPS895.

Formerly: EDPL895.

EDHI898 Pre-Candidacy Research (1-8 Credits)

Formerly: EDPL898.

EDHI899 Doctoral Dissertation Research (1-8 Credits)

Registration required to the extent of 6-9 hours for an Ed.D. Project and 12-18 hours for a Ph.D. Dissertation.

Formerly: EDPL899.

EDMS - Measurement, Statistics, and Evaluation

EDMS410 Classroom Assessment (3 Credits)

Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.

Restriction: Junior standing or higher.

EDMS451 Introduction to Educational Statistics (3 Credits)

Introduction to statistical reasoning; location and dispersion measures; computer applications; regression and correlation; formation of hypotheses tests; t-test; one-way analysis of variance; analysis of contingency tables.

Restriction: Sophomore standing or higher.

EDMS489 Field Experiences in Measurement and Statistics (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 4 credits.

EDMS498 Special Problems in Measurement and Statistics (1-3 Credits)

Available only to education majors who have formal plans for individual study of approved problems.

Prerequisite: Available only to education majors who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDMS610 Classroom Assessment and Evaluation (3 Credits)

Develop the understandings and skills needed to validly, reliably, and accurately assess student learning and to provide focused leadership in the area of classroom assessment.

EDMS622 Theory and Practice of Standardized Testing (3 Credits)

Principles of interpretation and evaluation of aptitude, achievement, and personal-social instruments; theory of reliability and validity; prediction and classification; norm- and criterion-referenced testing concepts.

Prerequisite: EDMS451; or EDMS645.

EDMS623 Applied Measurement: Issues and Practices (3 Credits)

Measurement theory and its application at an intermediate level; test development, validation and interpretation; issues and recent developments in measurement.

Prerequisite: EDMS410. And EDMS645; or students who have taken courses with comparable content may contact the department.

EDMS626 Instrumentation (3 Credits)

Theory, development, and applications of various affective, cognitive, or behavioral measurement instruments and procedures, including questionnaire and test items, observational protocols, and cutting-edge innovative game and scenario-based assessments.

Prerequisite: EDMS623.

EDMS645 Quantitative Research Methods I (3 Credits)

Research design and statistical applications in educational research: data representation; descriptive statistics; estimation and hypothesis testing. Application of statistical computer packages is emphasized.

EDMS646 General Linear Models I (3 Credits)

A first post-introductory inferential statistics course, with emphasis on analysis of variance procedures and designs from within the general linear modeling framework. Assignments include student analysis of education and related data; application of statistical software packages is emphasized.

Prerequisite: EDMS645; or an equivalent introductory statistics course.

EDMS647 Causal Inference and Evaluation Methods (3 Credits)

Counterfactual (potential outcomes) framework for causal inference, design/analysis strategies for confounder control, and specific best-practice applications to the evaluation of programs.

Prerequisite: Must have completed or be concurrently enrolled in EDMS651.

EDMS651 General Linear Models II (3 Credits)

Multiple regression and correlation analysis; trend analysis; hierarchical and stepwise procedures; logistic regression; software for regression analysis.

Prerequisite: EDMS646; or students who have taken courses with comparable content may contact the department.

EDMS655 Introduction to Multilevel Modeling (3 Credits)

Introduction to multilevel models and methodology as strategies for modeling change and organizational effects.

Prerequisite: EDMS651; or students who have taken courses with comparable content may contact the department.

EDMS657 Exploratory Latent and Composite Variable Methods (3 Credits)

Development of models for exploratory factor analysis and their practical applications. Additional topics will draw from latent class analysis, cluster analysis, mixture models, canonical correlation, multidimensional scaling, and configural frequency analysis.

Prerequisite: EDMS651.

EDMS665 Data Analysis and Statistical Consulting (3 Credits)

Advanced data analysis procedures applied to real-world clients' problems arising in a wide variety of substantive research settings within and beyond education.

Prerequisite: EDMS651; or students who have taken courses with comparable content may contact the department.

EDMS722 Structural Modeling (3 Credits)

Statistical theory and methods of estimation used in structural modeling; computer program applications; multisample models; mean structure models; structural models with multilevel data (e.g., sampling weights, growth models, multilevel latent variable models).

Prerequisite: EDMS657.

EDMS724 Modern Measurement Theory (3 Credits)

Theoretical formulations of measurement from a latent trait theory perspective.

Prerequisite: EDMS623 and EDMS651.

EDMS738 Seminar in Special Problems in Measurement (1-3 Credits)

An opportunity for students with special interests to focus in depth on contemporary topics in measurement. Topics to be announced, but will typically be related to applied and theoretical measurement.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 3 credits.

EDMS747 Design of Program Evaluations (3 Credits)

Analysis of measurement and design problems in program evaluations.

Prerequisite: EDMS626, EDMS651, and EDMS647. Or permission of instructor; and permission of EDUC-Human Development and Quantitative Methodology department.

EDMS769 Special Topics in Applied Statistics in Education (1-4 Credits)

Designed primarily for students majoring or minoring in measurement, statistics or evaluation.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS771 Multivariate Data Analysis (3 Credits)

Principal components, canonical correlation, discriminant functions, multivariate analysis of variance/covariance and other multivariate techniques.

Prerequisite: EDMS651.

EDMS779 Seminar in Applied Statistics (1-3 Credits)

Enrollment restricted to students with a major or minor in measurement, statistics or evaluation. Seminar topics will be chosen by individual student interest.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department. And must be in Measurement, Statistics and Evaluation (Master's) program; or must be in Measurement, Statistics and Evaluation (Doctoral) program.

Repeatable to: 3 credits if content differs.

EDMS787 Bayesian Inference and Analysis (3 Credits)

Models and model fitting methods commonly used in Bayesian Inference, such as Markov Chain Monte Carlo methods (e.g., Gibbs, Metropolis Sampling), with applications within and beyond the social and behavioral sciences. Analytical and philosophical differences between Frequentist and Bayesian statistics will also be highlighted.

Prerequisite: EDMS779 or permission of the instructor.

Credit Only Granted for: EDMS769B or EDMS787.

Formerly: EDMS769B.

EDMS798 Special Problems in Education (1-6 Credits)

Master's, EDMS majors, or doctoral candidates who desire to pursue special research problems under the direction of their advisors may register for credit under this number.

Restriction: Must be in Measurement, Statistics and Evaluation (Master's) program; or must be in Measurement, Statistics and Evaluation (Doctoral) program.

EDMS799 Master's Thesis Research (1-6 Credits)

Registration required to the extent of 6 credits.

Restriction: Must be in a major within the EDUC-Human Development and Quantitative Methodology department.

EDMS879 Doctoral Seminar (1-3 Credits)

Seminar that supports analysis of doctoral projects and theses, and of other on-going research projects.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS889 Internship in Measurement and Statistics (3-12 Credits)

Provides internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.

Prerequisite: Open only to students advanced to candidacy for doctoral degree.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS898 Pre-Candidacy Research (1-8 Credits)**EDMS899 Doctoral Dissertation Research (1-8 Credits)**

Registration required to the extent of 12 credits.

EDPS - Education Policy Studies

EDPS401 Educational Policy, and Social Change (3 Credits)

An examination of education policy in relation to the social environment and change. Contemporary education and social issues are examined, including technology as a complex force which influences social change. This is a Social Foundations course.

Credit Only Granted for: EDPL401 or EDPS401.

Formerly: EDPL401.

EDPS610 History of Western Education (3 Credits)

Educational institutions through the ancient, medieval and early modern periods in western civilization, as seen against a background of socio-economic development.

Credit Only Granted for: EDHI610, EDPL610, or EDPS610.

Formerly: EDPL610.

EDPS623 Education Policy and Theories of Change (3 Credits)

The work of change theorists in history, economics, political science, philosophy, sociology and anthropology as it impinges upon education policy.

Credit Only Granted for: EDHI623, EDPL623, or EDPS623.

Formerly: EDPL623.

EDPS626 Educatin Policy and the Young (3 Credits)

The systematic exploration of education policy as it has organized, reflected and influenced the lives of children, youth, and families, with particular emphasis on American policies and systems.

Credit Only Granted for: EDHI626, EDPL626, or EDPS626.

Formerly: EDPL626.

EDPS636 Communication and the School Curriculum (3 Credits)

Curriculum development based on communication as the major vehicle for describing the learner's interactions with persons, knowledge, and materials in the classroom and school environment.

Credit Only Granted for: EDHI636, EDPL636, or EDPS636.

Formerly: EDPL636.

EDPS663 Policy Formulation in Education (3-6 Credits)

Various levels of school governance. Analysis of policy formation, administration and evaluation issues.

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

Credit Only Granted for: EDHI663, EDPL663, or EDPS663.

Formerly: EDPL663.

EDPS712 Analysis of Educational Concepts (3 Credits)

Analyses of selected concepts used in thinking about education.

Credit Only Granted for: EDHI712, EDPL712, or EDPS712.

Formerly: EDPL712.

EDPS811 Seminar in History of Education (3 Credits)

Examination of current developments and continuing controversies in the field of history of education. The analysis of the various ways in which history of education is approached methodologically and interpretatively.

Credit Only Granted for: EDHI811, EDPL811, or EDPS811.

Formerly: EDPL811.

EDPS812 Seminar in Philosophy of Education (3 Credits)

Examination of current developments and continuing controversies in the field of philosophy of education. The function of educational philosophy, methodological approaches, and current research trends.

Credit Only Granted for: EDHI812, EDPL812, or EDPS812.

Formerly: EDPL812.

EDPS813 Seminar in Educational Sociology (3 Credits)

Sociological analysis of educational processes and institutions; emphasis on the social effects of formal organizations.

Credit Only Granted for: EDHI813, EDPL813, or EDPS813.

Formerly: EDPL813.

EDSP - Education, Special

EDSP400 Instruction of Students with Severe Disabilities I (3 Credits)

Functional assessment procedures and instructional methods for students with severe disabilities.

Restriction: Must be in Special Education program. Jointly offered with EDSP602.

Credit Only Granted for: EDSP400 or EDSP602.

EDSP401 Teaching Students with Disabilities in Elementary Classrooms (3 Credits)

This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.

Restriction: Permission of EDUC-Special Education department.

Credit Only Granted for: EDSP401 or EDSP499F.

Formerly: EDSP499F.

EDSP402 Field Placement: Severe Disabilities I (1 Credit)

Practicum experience in settings serving students with severe disabilities.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP403 Supporting Access for Students with Multiple Disabilities Across Settings (3 Credits)

Knowledge and practices in characteristics of multiple disabilities, assessment, individualized educational programming, universal design processes for instruction, assistive technology, environmental accessibility, and collaboration.

Prerequisite: EDSP400 or EDSP602.

Jointly offered with: EDSP603.

Credit Only Granted for: EDSP403 or EDSP603.

EDSP404 Methods of Teaching Autistic Students (3 Credits)

Characteristics of children and youth diagnosed with an autism spectrum disorder (ASD), assessment, and evidence-based instructional methods in teaching autistic students who come from diverse ethnic, cultural, and socio-economic backgrounds.

Jointly offered with: EDSP604.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP404 or EDSP604.

EDSP410 Instruction of Students with Severe Disabilities II (3 Credits)

Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.

Restriction: Must be in Special Education program. Jointly offered with EDSP614.

Credit Only Granted for: EDSP410 or EDSP614.

EDSP411 Foundations of Technology Integration for Curriculum Access (3 Credits)

Addresses ways to integrate technology and Assistive Technology (AT) into content area instruction, use Accessible Educational Materials (AEM), and the Universal Design for Learning (UDL) framework to evaluate, analyze, and develop responsive instruction.

Prerequisite: EDSP210 or EDSP470.

Restriction: Must be in Special Education program.

EDSP413 Principles and Practices in Positive Behavior Interventions and Classroom Supports (3 Credits)

Use of positive behavior supports to promote both classwide and individual student behavior skills through function-based behavior assessment, establishing classroom expectations, and examining common misbehaviors that often result in learning loss.

Jointly offered with: EDSP613.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP413 or EDSP613.

EDSP415 Assessment Techniques and Practices in Special Education (3 Credits)

Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and intervention planning within a Multi-Tiered System of Supports (MTSS).

Recommended: STAT100; or SOCY201.

Jointly offered with: EDSP615.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP415 or EDSP615.

EDSP416 Reading and Writing Instruction in Special Education I (3 Credits)

Assessment and instruction of reading and writing skills for students in special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP616.

Credit Only Granted for: EDSP416 or EDSP616.

EDSP417 Reading Diagnosis and Assessment (3 Credits)

Reading Diagnosis and Assessment prepares teacher candidates to assess children in general and special early childhood education settings in the areas of reading and writing in order to plan for instruction. The course will focus on diagnostic, screening, progress monitoring, and outcome assessments in early and beginning literacy. The course is designed to provide participants with the knowledge and skills necessary to collect and use a wide range of assessment data in general education and special education settings. Includes field experience.

Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDSP321, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP420 Child Development, Birth to Three Years (3 Credits)

Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.

Prerequisite: EDHD210, EDHD220, and EDSP211.

Corequisite: EDHD314 and EDHD425.

Cross-listed with: EDHD434.

Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

Formerly: EDHD419A.

EDSP422 Curriculum and Instruction: Early Childhood Special Education (3 Credits)

Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades.

Restriction: Must be in Special Education program. Jointly offered with EDSP627.

Credit Only Granted for: EDSP422 or EDSP627.

EDSP423 Assessment in Early Childhood Special Education (3 Credits)

Assessment procedures for infants and young children with disabilities, birth through grade 3.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP423 or EDSP624.

EDSP424 Field Placement in Special Education: Early Childhood II (2-4 Credits)

Field experience in early childhood special education.

Restriction: Must be in Special Education program.

EDSP425 Pre-Internship I (1 Credit)

This required EDSP field placement is a 3-hour per week seminar and field placement that meets across 15 weeks. Opportunities are provided to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in a four-week experience in a high incidence placement AND a four-week experience in a low incidence (LI) placement. The purpose is to provide each special education teacher candidate (TC) with practical experience to complete field-based requirements and begin to meet the CEC Initial Preparation Standards (2012). Furthermore, since EDSP 425 is the first internship experience in the Special Education Program in the College of Education at University of Maryland, teacher candidates will become familiar with the Special Education Program, College of Education, Maryland State Department of Education (MSDE), Counsel for Accreditation of Educator Preparation (CAEP), and Council for Exceptional Children (CEC) expectations and requirements for graduation and teacher licensure.

Corequisite: EDSP451 and EDSP400.

Restriction: Must be in the Special Education major.

EDSP426 Pre-Internship II (1 Credit)

A 3-hour per week seminar and field placement that meets across 15 weeks. Teacher candidates will assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.

Corequisite: EDSP415 and EDSP416.

Restriction: Must be in the Special Education major.

EDSP430 Early Intervention: Early Childhood Special Education (3 Credits)

Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP430 or EDSP631.

EDSP433 Families and Culture in Early Intervention (Birth-5) (3 Credits)

Provides students with the skills and information they need to work effectively with families of young children (birth to age 5) who have or are at risk for disabilities in early childhood or early intervention programs. Students will review current local, state and federal policies establishing the rights of families of infants and young children with disabilities to participate in decision making for their child. We will discuss relevant theoretical and research literature as well as the cultural and contextual issues involved in working with families of very young children. Includes field experiences.

Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).

Corequisite: EDSP430, EDSP315, and EDHD431.

EDSP434 Field Placement in Special Education: Secondary Middle I (2-4 Credits)

Field experience in secondary middle special education.

Restriction: Must be in Special Education program.

EDSP435 Field Placement in Special Education: Secondary Middle II (2-4 Credits)

Field experience in secondary middle special education.

Restriction: Must be in Special Education program.

EDSP443 Language and Literacy Acquisition in Children with Disabilities (3 Credits)

Language and literacy acquisition and characteristics of typical and atypical language development in supporting students with reading and writing disabilities.

Restriction: Must be in Special Education program.

Additional Information: This course is the first of four reading courses required by the Maryland State Department of Education for teacher certification in Special Education.

EDSP451 Curriculum and Instruction: Elementary/Middle Special Education (3 Credits)

Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.

Restriction: Must be in Special Education program. Jointly offered with EDSP652.

Credit Only Granted for: EDSP451 or EDSP652.

EDSP452 Internship I: Elementary/Middle Special Education (2-4 Credits)

Field experience in elementary/middle school special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP692.

Credit Only Granted for: EDSP452 or EDSP692.

EDSP453 Methods and Models of Instruction: Elementary Special Education (3 Credits)

Focus on models and methods of instruction responsive to the cognitive, linguistic, and cultural characteristics of elementary students in special education.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP453 or EDSP653.

EDSP454 Field Placement in Special Education: Elementary II (2-4 Credits)

Field experience in elementary special education.

Restriction: Must be in Special Education program.

EDSP455 Assessment in Elementary Special Education (3 Credits)

Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP654.

Credit Only Granted for: EDSP455 or EDSP654.

EDSP466 Issues and Models of Instruction: Middle/Secondary Special Education (3 Credits)

Issues, legislation, and service models in middle/secondary special education. Emphasis on career and vocational education, self-determination, and transition.

Restriction: Must be in Special Education program. Jointly offered with EDSP664.

Credit Only Granted for: EDSP466 or EDSP664.

EDSP470 Introduction to Special Education (3 Credits)

Designed to give an understanding of the needs of all types of exceptional children.

Restriction: Must not have completed EDSP210.

Credit Only Granted for: EDSP210, EDSP211 or EDSP470.

EDSP484 Reading and Writing Instruction in Special Education II (3 Credits)

Focus on the development of reading and writing programs for students in special education. Builds on foundations established in EDSP416.

Prerequisite: EDSP416.

Restriction: Must be in Special Education program. Jointly offered with EDSP684.

Credit Only Granted for: EDSP484 or EDSP684.

EDSP485 Assessment and Instruction in Mathematics in Special Education (3 Credits)

Instructional methods and assessment in mathematics in special education.

Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP683.

Credit Only Granted for: EDSP485 or EDSP683.

EDSP486 Promoting Prosocial Behavior in Special Education (3 Credits)

Focus on social development among students with and without disabilities, the relationship between pedagogy and student behavior, and classroom, school, and community approaches for developing prosocial behavior.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP486 or EDSP686.

EDSP487 Collaborative Partnerships in Special Education (3 Credits)

Strategies for positively collaborating with families, practitioners, and community stakeholders to implement Specially Designed Instruction (SDI) for students with disabilities.

Jointly offered with: EDSP687.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP487 or EDSP687.

EDSP488 Selected Topics in Teacher Education (1-3 Credits)

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; or must be in a major in EDUC-College of Education.

Repeatable to: 6 credits if content differs.

EDSP489 Field Experiences in Special Education (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP490 Teacher Candidate Research Seminar in Special Education (3 Credits)

Study of current issues and research concerning the education of students in special education.

Restriction: Must be in Special Education program.

EDSP495 Internship II: Elementary/Middle Special Education (6-12 Credits)

Internship II is a full-time 15 week field-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their field placement experience.

Corequisite: EDSP490.

Jointly offered with: EDSP695.

Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)).

Credit Only Granted for: EDSP495 or EDSP695.

EDSP498 Special Problems in Special Education (1-6 Credits)

Available only to education majors who have definite plans for individual study of approved problems. Credit according to extent of work.

Prerequisite: Available only to education majors who have definite plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP499 Workshops, Clinics, and Institutes in Special Education (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the special education department (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing. Laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits if content differs.

EDSP600 Issues and Trends in Educating Individuals with Disabilities (3 Credits)

Examines research and practice relevant to the education of individuals with disabilities.

Prerequisite: 9 credits in EDSP courses.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP601 Special Education for School Counselors (3 Credits)

Designed to give school counseling students an understanding of the needs of children with disabilities, and the school-based services that they received. The course focuses on the school counselor's role in identifying and supporting children who have disabilities.

Restriction: Must be in Counseling and Personnel Services (Master's) program.

Credit Only Granted for: EDSP470 or EDSP601.

EDSP602 Instruction of Students with Severe Disabilities I (3 Credits)

Functional assessment procedures and instructional methods for students with severe disabilities.

Restriction: Must be in Special Education (Master's) program.

Credit Only Granted for: EDSP400 or EDSP602.

EDSP603 Supporting Access for Students with Multiple Disabilities Across Settings (3 Credits)

Knowledge and practices in characteristics of multiple disabilities, assessment, individualized educational programming, universal design processes for instruction, assistive technology, environmental accessibility, and collaboration .

Jointly offered with: EDSP403.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP403 or EDSP603.

EDSP604 Methods of Teaching Autistic Students (3 Credits)

Characteristics of children and youth diagnosed with an autism spectrum disorder (ASD), assessment, and evidence-based instructional methods in teaching autistic students who come from diverse ethnic, cultural, and socio-economic backgrounds.

Jointly offered with: EDSP404.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP404 or EDSP604.

EDSP605 The Exceptional Child and Society (3 Credits)

Relationship of the role and adjustment of the child with an exceptionality to societal characteristics.

Prerequisite: EDSP600.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP606 Advanced Study in Inclusive Practices in The Schools (3 Credits)

Educational practices regarding inclusive education in the schools for students with and without disabilities. Jointly offered with EDSP450.

Credit Only Granted for: EDSP450, EDSP606 , or EDSP788P.

Formerly: EDSP788P.

EDSP607 School Violence and Disruption (3 Credits)

An examination of school violence and disruption from multiple perspectives. Societal, community, and individual factors are examined. Prevention strategies, interagency collaboration, and intervention techniques are addressed.

EDSP610 Neurodevelopment and Disability for Educators (4 Credits)

Designed for educators of students with disabilities interested in understanding cognition and learning from a neurodevelopmental perspective. Students will be introduced to the basics of neuro-anatomy as well as typical and atypical brain development as it relates to children from birth to age 21.

Restriction: Must be in the Supporting Children with Intensive Behavior Needs in a Public School Setting Post-Baccalaureate Certificate program.

EDSP611 Teaching Students with Disabilities in Elementary Classrooms (2 Credits)

This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on Universal Design for Learning (UDL) principles, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.

Restriction: Permission of EDUC-Special Education department.

Credit Only Granted for: EDSP608, EDSP611, EDSP401 or EDSP499F.

EDSP612 Transition Methods and Disability Systems (3 Credits)

Philosophical and historical foundations of transition service delivery and current methods that comprise transition services for students with disabilities.

Restriction: Permission of instructor.

EDSP613 Principles and Practices in Positive Behavior interventions and Classroom Supports (3 Credits)

Use of positive behavior supports to promote both classwide and individual student behavior skills through function-based behavior assessment, establishing classroom expectations, and examining common misbehaviors that often result in learning loss.

Jointly offered with: EDSP413.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program; or permission of instructor.

Credit Only Granted for: EDSP413 or EDSP613.

EDSP614 Instruction of Students with Severe Disabilities II (3 Credits)

Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.

Restriction: Must be in Special Education (Master's) program.

Credit Only Granted for: EDSP410 or EDSP614.

EDSP615 Assessment Techniques and Practices in Special Education (1-3 Credits)

Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and intervention planning within a Multi-Tiered System of Supports (MTSS).

Prerequisite: EDSP600 and EDMS646; or permission of EDUC-Counseling, Higher Education and Special Education department.

Jointly offered with: EDSP415.

Credit Only Granted for: EDSP415 or EDSP615.

EDSP616 Reading and Writing Instruction in Special Education I (3 Credits)

Assessment and instruction of reading and writing skills and strategies for students in special education.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP41 6.

Credit Only Granted for: EDSP416 or EDSP616.

EDSP617 Social-Communication Challenges and Strategies for Individuals with Autism Spectrum Disorder and Severe Disabilities (3 Credits)

Provides students with an in-depth analysis of social and communicative challenges typically observed in children with autism spectrum disorder (ASD) and severe disabilities. Theoretical perspectives of communication in individuals with ASD and severe disabilities will be discussed. The application of social-communication evidence-based practices will be emphasized.

Prerequisite: EDSP604; or permission of instructor.

Credit Only Granted for: EDSP617 or EDSP678G.

Formerly: EDSP678G.

EDSP621 Designing Intensive Interventions for Social and Academic Skill Development for Students with Persistent Needs (3 Credits)

Prerequisite: EDSP 600, EDSP 601 or consent of instructor. Strategies to teach social and academic skills to behaviorally disordered students.

Prerequisite: EDSP600 and EDSP601; or permission of instructor.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP622 History, Research and Context in Behavioral and Learning Disorders (3 Credits)

Examination of theoretical, historical, and contextual influences affecting the study and treatment of persons with behavioral and learning disorders.

Prerequisite: EDSP470.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP623 Challenges and Issues in Behavioral and Learning Disorders (3 Credits)

Development and outcomes for students with behavioral and learning disorders for inclusive schools, discipline, professional development and ethics.

Prerequisite: EDSP470.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP624 Assessment in Early Childhood Special Education (3 Credits)

Assessment procedures for infants and young children with disabilities, birth through age eight.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP423.

Credit Only Granted for: EDSP423 or EDSP624.

EDSP625 Evidence Based Practices for Individuals with Significant Disabilities (3 Credits)

Examine and apply empirical research aligned to current trends and areas of investigation in the field of students with significant support needs.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP626 Characteristics of Infants and Young Children: Early Childhood Special Education (3 Credits)

Focus on developmental, behavioral, and learning characteristics of infants and young children with and without disabilities. Jointly offered with EDSP420.

Credit Only Granted for: EDSP420 or EDSP626.

EDSP627 Curriculum and Instruction: Early Childhood Special Education (3 Credits)

Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades. Jointly offered with EDSP422.

Credit Only Granted for: EDSP422 or EDSP627.

EDSP631 Early Intervention: Early Childhood Special Education (3 Credits)

Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP430.

Credit Only Granted for: EDSP430 or EDSP631.

EDSP632 Embracing Diversity: Teaching Students with Disabilities and Gifted Learners in Secondary (3 Credits)

Designed for secondary education majors to prepare for teaching students with disabilities in secondary classrooms. Examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). Information is also provided on the characteristics of students who are considered gifted and/or talented, as well as instructional methods for differentiating instruction to meet their needs. Also provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching, and methods for integrating technology and assistive technology to benefit all students.

Prerequisite: Permission of instructor.

Restriction: Permission of EDUC-Special Education department.

Credit Only Granted for: EDSP609 or EDSP632.

Formerly: EDSP609.

EDSP652 Curriculum and Instruction: Elementary Special Education (3 Credits)

Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included. Jointly offered with EDSP451.

Credit Only Granted for: EDSP451 or EDSP652.

EDSP654 Assessment in Elementary Special Education (3 Credits)

Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education. Jointly offered with EDSP455.

Credit Only Granted for: EDSP455 or EDSP654.

EDSP655 Seminar in Secondary and Transition Special Education (3 Credits)

Review of research pertaining to individuals with disabilities in secondary and post-secondary vocational and transitional settings.

Prerequisite: EDSP600.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP664 Issues and Models: Secondary/Middle Special Education (3 Credits)

Issues, legislation, and service models in secondary/middle special education. Emphasis on career and vocational education, self-determination, and transition.

Jointly offered with: EDSP466.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP466 or EDSP664.

EDSP665 Families, Culture, and Disability (3 Credits)

Current research on service delivery and cultural factors that influence families of children and youth with disabilities.

Prerequisite: EDSP600.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP670 Single Case Research Designs in Education (3 Credits)

Design, application, procedures, and analysis of single case research designs in special education to effectively evaluate instructional decisions.

Prerequisite: EDSP600.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP671 Qualitative Methodologies in Special Education (3 Credits)

Design and evaluation of qualitative research in special education across disabilities and ages.

Prerequisite: EDSP600.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP673 Evaluating Evidence-Based Practices in Special Education (3 Credits)

Evaluating evidence-based practices in special education, by examining theoretical origins, use of causal designs, programmatic lines of research, and research syntheses to explore the development of what it means for an intervention to have the potential to significantly impact practice.

Prerequisite: EDMS645.

Recommended: EDSP670 and EDSP600.

Credit Only Granted for: EDSP673 or EDSP798E.

Formerly: EDSP798E.

EDSP674 Assessment in Middle/Secondary Special Education (3 Credits)

Cognitive, vocational, and social assessment for students with disabilities. Emphasis on interpretation of assessment results and case management practices.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP474.

Credit Only Granted for: EDSP474 or EDSP674.

EDSP675 Legal and Policy Foundations for Individuals with Disabilities (3 Credits)

Regulatory and statutory foundations for public policies addressing the education of children and youth with disabilities.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP677 Curriculum, Assessment, and Instruction: Middle/Secondary Special Education (3 Credits)

Methods and assessment practices for effective instruction in middle and secondary content areas for students in special education. Jointly offered with EDSP477.

Credit Only Granted for: EDSP477 or EDSP677.

EDSP678 Seminar in Special Education (3 Credits)**EDSP681 Seminar in Cultural Diversity and Disability (3 Credits)**

A study of diversity issues within special education, with attention to issues of race, culture, and disability as they pertain to teaching, learning, and social justice.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP481.

Credit Only Granted for: EDSP481 or EDSP681.

EDSP682 Advanced Literacy Approaches for At-Risk Adolescents (3 Credits)

Approaches to teaching reading in the content areas for secondary students with disabilities. Jointly offered with EDSP482.

Credit Only Granted for: EDSP482, EDSP488 R, EDSP682, or EDSP788R.

Formerly: EDSP788R.

EDSP683 Assessment and Instruction in Mathematics in Special Education (3 Credits)

Instructional methods and assessment in mathematics in special education.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP485.

Credit Only Granted for: EDSP485 or EDSP683.

EDSP684 Reading and Writing Instruction in Special Education II (3 Credits)

Development of effective reading and writing programs for students receiving special education services. Builds on the foundation established in EDSP 616.

Prerequisite: EDSP616.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP484.

Credit Only Granted for: EDSP484 or EDSP684.

EDSP687 Collaborative Partnerships in Special Education (3 Credits)

Strategies for positively collaborating with families, practitioners, and community stakeholders to implement Specially Designed Instruction (SDI) for students with disabilities.

Jointly offered with: EDSP487.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP487 or EDSP687.

EDSP690 Teacher Candidate Research Seminar in Special Education (3 Credits)

Required seminar for master's certification teacher candidates in special education focusing on research methods and applications with students having disabilities.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

EDSP691 Graduate Internship in Special Education I: Early Childhood (2-4 Credits)

Internship I in early childhood special education.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP431 and EDSP691.

Formerly: EDSP431.

EDSP692 Graduate Internship I: Elementary/Middle Special Education (2-4 Credits)

Field experience in elementary/middle school special education.

Restriction: Must be in Special Education (Master's) program.

Credit Only Granted for: EDSP452 or EDSP692.

EDSP693 Graduate Internship in Special Education I: Secondary Middle (2-4 Credits)

Internship I in secondary middle special education.

Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP436 or EDSP693.

Formerly: EDSP436.

EDSP694 Graduate Internship in Special Education II: Early Childhood (6-11 Credits)

Student teaching, full-time for twelve weeks, with infants or preschool children with disabilities.

Corequisite: EDSP690.

Restriction: Must be in Special Education program; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP494, EDSP694, or EDSP889A.

EDSP695 Graduate Internship II: Elementary/Middle Special Education (6-11 Credits)

Internship II is a full-time 15 week placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their placement experience.

Corequisite: EDSP690.

Recommended: Must be in Special Education (Master's) program EDSPM Special Education.

Restriction: Must be in Special Education (Master's) program.

Credit Only Granted for: EDSP495, EDSP695 or EDSP888A.

EDSP696 Graduate Internship in Special Education II: Secondary Middle (6-11 Credits)

Student teaching, full-time for twelve weeks, with students with disabilities in secondary or middle school settings.

Corequisite: EDSP690.

Restriction: Must be in Special Education program; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

Credit Only Granted for: EDSP496, EDSP696, or EDSP889A.

EDSP788 Selected Topics in Special Education (1-3 Credits)

Current topics and issues in teacher education.

Repeatable to: 6 credits if content differs.

EDSP798 Special Problems in Special Education (1-6 Credits)

Intended for Master's, AGS, or doctoral students in education who desire to pursue a research problem.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP799 Master's Thesis Research (1-6 Credits)

Registration required to the extent of six hours for Master's thesis.

EDSP829 Doctoral Capstone (1-12 Credits)

Provides for demonstration of excellence in professional practice in the field of educational leadership. The topic, activities, and outcomes related to the Doctoral Capstone must be approved by the doctoral advisor and capstone committee and presented and defended by the student. The Doctoral Capstone in the Special Education EdD program requires scholars to identify a problem of professional practice in the field of special education. Scholars identify the antecedents, causes and issues related to this problem, subsequently conduct an extensive review of literature, and propose a defensible possible solution for which they provide the rationale.

Prerequisite: Successful completion of mid-program evaluation.

Repeatable to: 12 credits.

EDSP850 Intervention Research in Special Education (3 Credits)

Focuses on the design and implementation of intervention research studies in the field of Special Education. This course will focus on knowledge and skills necessary for (a) evaluating the quality of group and single case design intervention research and related conceptual and methodological issues (e.g., replication, fidelity of implementation), (b) designing and evaluating interventions, (c) implementing interventions in schools, and (d) translating research to practice.

Prerequisite: EDSP860.

Recommended: EDMS646.

EDSP860 Doctoral Research Seminar (3 Credits)

Issues and procedures relevant to conducting and analyzing research in special education.

EDSP870 Advanced Single-Case Research Designs in Special Education (3 Credits)

This advanced single case research methods course is specifically designed for doctoral students in the special education program. This course prepares students to conduct rigorous research using a variety of single case research designs. Students will engage in critical analysis of published single-case research studies and apply their acquired knowledge to the design and implementation of their own single-case research projects.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP670 or EDSP870.

EDSP872 Theory and Empirical Design in Educational Research (3 Credits)

Design and evaluation of quantitative research in special education across disabilities and ages.

Prerequisite: EDMS645 and EDMS646; or permission of EDUC-Counseling, Higher Education and Special Education department.

Restriction: Must be in Special Education (Doctoral) program.

Credit Only Granted for: EDSP672 or EDSP872.

Formerly: EDSP672.

EDSP875 Policy Issues Affecting Individuals with Disabilities (3 Credits)

An analysis of current educational and disability issues and policies pertaining to children, youth, and adults with disabilities.

Restriction: Permission of instructor; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

EDSP888 Apprenticeship in Special Education (1-8 Credits)

Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate- seeking graduate students.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP889 Internship in Special Education (3-8 Credits)

Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP898 Pre-Candidacy Research (1-8 Credits)**EDSP899 Doctoral Dissertation Research (1-8 Credits)**

Registration required to the extent of 6-9 hours for an Ed.D. Project and 12-18 hours for a Ph.D. dissertation.

EDUC - Education

EDUC401 International and Multicultural Perspectives in Education (3 Credits)

Comparison of historical changes and current challenges, and how culture, diversity and tolerance in the US and Netherlands impacts education systems. Experiential visits to historical sites, educational institutions and notable landmarks, with a critical reflection on similarities, differences and intersections of culture, diversity, tolerance and change.

Restriction: By permission of the College of Education and the Education Abroad Office .

Credit Only Granted for: EDUC498I or EDUC401.

Formerly: EDUC498I.

Additional Information: This is a 3-week living-learning study abroad experience in the Netherlands, Germany and Belgium. The course is offered through the Education Abroad office. Prospective students must complete the MYEA application. Myea.umd.edu.

EDUC478 Using Information Technology in Schools (1-3 Credits)

Strategies, resources, tools and organizational concepts for using technology to facilitate classroom learning and school administrative functions.

Restriction: Permission of EDUC-College of Education; and junior standing or higher.

Repeatable to: 6 credits if content differs.

EDUC498 Selected Topics in Education (1-3 Credits)

Current topics and issues in education.

Restriction: Permission of EDUC-College of Education.

Repeatable to: 9 credits if content differs.

EDUC499 Honors Thesis (1-6 Credits)

Individual thesis work under supervision of faculty advisors; includes periodic seminar meetings with other honors students engaged in thesis work.

Prerequisite: Admission to College Honors Program.

Restriction: Permission of EDUC-College of Education.

EDUC640 Introduction to Educational Leadership (3 Credits)

The focus of this course is the analysis of the role of education administrators/leaders in the social, political, and legal contexts of schools. Also examines the role of leadership in school improvement.

Credit Only Granted for: EDHI640 or EDUC640.

Formerly: EDHI640.

EDUC645 Leading Instructional Improvement (3 Credits)

Development of knowledge and skills in the use of data bases, research findings and models of supervision, to improve instruction in schools.

Credit Only Granted for: EDHI645 or EDUC645.

Formerly: EDHI645.

EDUC646 Leading Instructional Excellence (3 Credits)

Leader's role in fostering high quality teaching and learning. Exploration of the relationship between curriculum instruction assessment and the organizational structure of K-12 public schooling. Development and assessment of frameworks for understanding instructional quality. Analysis of strategies for supporting teachers as they engage in curricular and professional development. Consideration of factors involved in creating and sustaining instructionally centered schools.

Prerequisite: EDUC645; or permission of instructor.

Credit Only Granted for: EDHI646 or EDUC646.

Formerly: EDHI646.

EDUC670 Learning Communities (3 Credits)

Reviews contemporary research on student and teacher learning and schools as learning organizations. It aims to build students understanding of opportunities and challenges to implementing learning environments in various educational organizations. Readings, cases and assignments emphasize students' understanding of learning theories and their application to various organizational settings.

Credit Only Granted for: EDHI670 or EDUC670.

Formerly: EDHI670.

EDUC671 Education Law, Finance and Policy (3 Credits)

An examination of the way judicial interpretation of common, statutory, and constitutional law shapes and constrains educational policy making.

In addition, this course is designed to introduce students to issues related to the financing and resource management of public elementary and secondary schools and school systems in the United States.

All discussions include dimensions of both theory and practice and specifically address reform in terms of alternatives to current practice.

EDUC689 Practicum In Educational Administration and Supervision (1-3 Credits)

Promotes skill development in managerial, leadership and supervisory areas. Practicum is based on results of diagnostic instruments and an individual professional development plan.

Repeatable to: 3 credits if content differs.

EDUC698 Advanced Topics in Education (1-3 Credits)

Arranged study on specific topics in education.

Restriction: Permission of EDUC-College of Education.

Repeatable to: 6 credits if content differs.

EDUC701 Applied Research and Data Based Decision Making for School Leaders (3 Credits)

This course focuses on understanding school system data including student assessments, teacher and administrator evaluations and other program data. Ed.D. students will learn to evaluate the technical characteristics and implications for use of such data as well as how to design instruments to collect needed data.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC701 or EDHI701.

Formerly: EDHI701.

EDUC702 Applied Research Design for Education Leaders (3 Credits)

Emphasizes quantitative and qualitative methodologies to investigate a range of educational problems. Designed for EdD doctoral students.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC702 or EDHI702.

Formerly: EDHI 702.

EDUC703 Conducting Library Research for Capstones (2 Credits)

Course is designed to provide students in the Ed.D. doctoral program in School System Leadership with the skills necessary to conduct library research in preparation for developing the literature review for the Capstone.

Restriction: Permission of EDUC-College of Education; and must be enrolled in EdD in School System Leadership.

EDUC704 Introduction to Writing for Education Leaders (2 Credits)

This course is designed to provide students in the Ed.D. program with specific strategies and skills needed to complete their Dissertation of Practice. Skills include constructing a problem statement and developing a cohesive argument for a proposed solution.

Restriction: Permission of EDUC-College of Education and Must be in EdD School System Leadership program.

EDUC705 Education Policy Making and the School Leader (4 Credits)

Course analyzes educational K-12 policies and their impacts on school systems and the leadership of those systems

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC705 or EDPL663.

Formerly: EDPL663.

EDUC740 Managing Educational Organizations in a Diverse Society (4 Credits)

Contemporary social and cultural influences that impact on the management of schools and school systems in a diverse society. The effects on schools and school systems of changes in the economy, family structure, demographics and technology will be examined.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC740 or EDHI740.

Formerly: EDHI740.

EDUC747 Advanced Seminar on Instructional Improvement for School Leaders (4 Credits)

Course addresses current issues, research, trends, and problems in the areas of instructional improvement and the responsibilities of school-based administrators in improving student learning.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC747 or EDHI747.

Formerly: EDHI747.

EDUC760 The Human Dimension in Administration (4 Credits)

Course focuses on theory, research findings, and current practices in managing human resources in educational organizations. Issues related to performance evaluations, professional development, and legal and ethical standards are addressed.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC760 or EDHI760.

Formerly: EDHI760.

EDUC767 Seminar on School District Leadership (4 Credits)

Examination of theory and research related to school district leadership with focus on improvement sciences. Course uses improvement science model to understand organizational, political, community, instructional problems of practice.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC767 or EDHI767.

Formerly: EDHI767.

EDUC770 System Innovation and Transformation (4 Credits)

Course is designed to provide EdD students understanding how complex systems improve performance and connect educational and social objectives to goals of innovation and efficiency.

Restriction: Permission of EDUC-College of Education.

Credit Only Granted for: EDUC769, EDHI788M, or EDUC770.

Formerly: EDHI788M.

EDUC773 Seminar in School Finance and Resource Management (4 Credits)

Issues related to financing and resource management in US K-12 public education systems will be investigated including how various levels of government support public education, and the revenue-generating tools they use. A major theme throughout the course will be on how the values and concepts of educational equity drive the distribution of revenue to schools and how to use data to create a school-level resourcing plan that provides access and opportunities to learning for every student.

Prerequisite: Permission of instructor.

Restriction: Must be in the Ed.D. School System Leadership program.

EDUC828 Mid-Program Evaluation Portfolio (2-6 Credits)

Students will examine issues of performance assessment and develop a professional portfolio that follow NELP standards and assessment criteria and will compile and synthesize research/inquiry and experiential learning and reflections that demonstrate mastery of the standards.

Restriction: Permission of instructor and Must be in Ed.D. in School Leadership program.

Repeatable to: 12 credits.

EDUC829 Doctoral Capstone (1-6 Credits)

The completion of a doctoral capstone is required for all professional practice doctoral students, allowing demonstration of excellence in professional practice in the field of education leadership. The topic, activities, and outcomes related to the doctoral capstone must be approved by the doctoral advisor and capstone committee and presented and defended by the student.

Prerequisite: EDUC828.

Restriction: Successful completion of mid-program evaluation.

Repeatable to: 12 credits.

EDUC888 Applied Apprenticeship in Education (1-3 Credits)

Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals.

Restriction: Permission of EDUC-College of Education.

Repeatable to: 12 credits.

EDUC898 Pre-Candidacy Research (2-4 Credits)

Pre-Candidacy Research

Repeatable to: 12 credits.

EDUC899 Dissertation of Practice Research (1-6 Credits)

Registration required to the extent of 6-9 hours for an Ed.D. Dissertation.

Repeatable to: 9 credits.

EMBA - Executive MBA Program

EMBA610 Introduction to Financial Accounting (2 Credits)

Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.

Restriction: Must be in Executive MBA program.

EMBA611 Managerial Accounting (2 Credits)

Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Restriction: Must be in Executive MBA program.

EMBA616 Accounting for Senior Management (3 Credits)

This course is designed to give senior managers an overview of basic financial and managerial accounting principles and tools with emphasis on those principles and tools they can use to support various managerial decision-making tasks.

Restriction: Must be in Executive MBA program.

EMBA617 Accounting for Decision Making (4 Credits)

An overview of financial accounting including the emphasis on periodic financial statements, the financial reporting process, the importance of financial statements as (i) an information source for creditors and investors and (ii) a means by which managers can communicate information about their firms. Overview of managerial accounting in corporate planning and control. Specific facets include cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.

Restriction: Must be in Executive MBA program.

EMBA620 Strategic Information Systems (2 Credits)

Use of information technology to achieve competitive advantage, efficient operations, and effective decision making. Analysis of functions of information technology and its impact on competitive strategy and organizational operations.

Restriction: Must be in Executive MBA program.

EMBA621 Digital Transformation in Business (3 Credits)

Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.

Restriction: Must be in Executive MBA program.

EMBA630 Data Models and Decisions (3 Credits)

To develop probabilistic and statistical concepts, methods and models through examples motivated by real-life data from business and to stress the role that statistics play in the managerial decision making process.

Restriction: Must be in Executive MBA program.

EMBA637 Corporate Finance (4 Credits)

Presents key concepts in corporate finance as well as tools used in making corporate financial decisions. Topics include valuation of corporate securities, capital investment decision making, capital market theory, operation and efficiency of financial markets, corporate financing decisions, and risk management.

Restriction: Must be in Executive MBA program.

EMBA640 Financial Management (3 Credits)

Analysis of major corporate financial decisions using a market-oriented framework. Topics include capital budgeting, security portfolio theory, operation and efficiency of financial markets, options pricing, financing decisions, capital structure, payout policy and international finance.

Restriction: Must be in Executive MBA program.

EMBA647 Economics and Public Policy (4 Credits)

Introduction to the economic concepts essential to business decision-making. Concepts covered include supply, demand, cost pricing, competition, monopoly, non-competitive markets, game theory, vertical integration, regulation, national income accounting, fiscal policy, monetary policy, balance of payments accounting, exchange rates and international economics. Primary attention is given to cases.

Restriction: Must be in Executive MBA program.

EMBA650 Marketing Management (2 Credits)

Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.

Restriction: Must be in Executive MBA program.

EMBA654 Organizational Change (1-3 Credits)

This course is designed to assist you in developing the skills necessary to successfully manage change in a turbulent environment. As part of the course design, an overview of organizational change management strategies aimed at improving the organization's ability to cope with change will be covered. In addition, the course provides students with the models for understanding the dynamics of organizational change. Change management skills are among the most important skills that any professional can possess.

Restriction: Must be in Executive MBA program.

EMBA656 Leadership and Human Capital (3 Credits)

The overall objective of this course is to sensitize participants to the fact that managers face many dilemmas (such as the need to maintain control, yet be flexible enough to effectively change as the competitive environment requires); and therefore, managers need to have skills that will enable them to effectively manage and lead, and thus to become leader-managers. How managing versus leading-skills differ will be emphasized in this course. To raise participants' sensitivity to managerial dilemmas and the skills needed to effectively manage these, there will be extensive use of case discussions and video-clips about challenges faced by companies and their managers, and extensive opportunities for self-reflective and experiential exercises. The development of action-plans for implementing a desirable change in participants' current job-situation will also help participants to hone the skills needed to be effective change-agents, hence leaders, in their organization.

Restriction: Must be in Executive MBA program.

EMBA662 Leadership and Teamwork (2 Credits)

Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision-making, communication and conflict, work motivation, building effective teams, and organizational change and culture.

Restriction: Must be in Executive MBA program.

EMBA663 Managing Human Capital (2 Credits)

Course examines core human resource management principles and emphasizes skills for maximizing an organization's human capital. Topics include recruitment, selection, performance feedback and incentives, termination of poor performers, and managing organizational change through human resource systems and policies.

Restriction: Must be in Executive MBA program.

EMBA664 IT Transformation of Organizations, Industries and Markets (2 Credits)

Information technology enables the transformation of organizations, industries and markets. The purpose of this course is to understand the forces within organizations and industries that combine with the technology to create these transformations. The course focuses on general models of transformation as well as case studies of specific organizations and industries. Teams of students will select an industry and prepare a report on how technology is now or will transform it, and examine the implications for how businesses will function in the future.

Restriction: Must be in Executive MBA program.

EMBA674 Marketing Simulation (2 Credits)

This is a capstone marketing course that is taught primarily through the simulation MARKSTRAT. As we go through the simulation we will discuss marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented. The material is then complemented with the MARKSTRAT simulation. The prerequisite for this course is Marketing Management or Marketing Strategy.

Prerequisite: Must have completed Marketing Management or Marketing Strategy coursework.

Restriction: Must be in Executive MBA program.

EMBA678 Ethical Leadership (1-3 Credits)

This course will explore the following topics; Recognize the scope of managerial agency and the economic, legal and ethical responsibilities to various stakeholders, Conduct elementary ethical analyses of managerial situations using the principal schools of ethical reasoning, Identify the economic and ethical properties of a market mechanism, and the means for addressing the limitations of a market, and Recognize ethical leadership as the exercise of managerial agency in changing existing values and practices.

Restriction: Must be in Executive MBA program.

Repeatable to: 3 credits if content differs.

EMBA681 Managerial Economics and Public Policy (2 Credits)

Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, marketing structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.

Restriction: Must be in Executive MBA program.

EMBA683 The Global Economic Environment (2 Credits)

Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.

Restriction: Must be in Executive MBA program.

EMBA688 Strategic Management (1 Credit)

This course aims to give you the tools, frameworks, and ideas necessary to develop business units and corporate strategies for your organizations that fit, both in the short run and long run. As noted above, this requires that we appreciate how best to analyze and identify profit opportunities and threats in different industries and competitive environments; how best to analyze and identify your organization's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; how to organize your firm to be best prepared to adapt its strategy over time as the market environment changes; how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that your organization around its strategy to maximize the probability of successful strategy implementation.

Restriction: Must be in Executive MBA program.

Repeatable to: 3 credits if content differs.

EMBA690 Strategic Management (2 Credits)

Integrative strategic management focusing on strategy formulation and implementation in domestic and global settings. Industry and competitor analysis, industry and firm value chain, leadership, goal setting, organizational structure and culture. Case study approach to top management and organizational problems.

Restriction: Must be in Executive MBA program.

EMBA693 Supply Chain (2 Credits)

The age of the real-time supply chain has finally arrived. Companies can now connect instantaneously with suppliers, distributors, manufacturers, customers, and alliance partners around the world. On-line access to up-to-the minute information enables companies to improve communication and project management across the entire supply chain, promote collaboration across departments, and enhance customer service and financial operations. The results are stunning; for example, a recent survey reports dramatic increases in revenues and customer retention and decreases in operating costs and product cycle times. As competition heats up from every direction, the ability to design and manage your supply chain with precision and speed becomes a business imperative. This course offers a practical blueprint for building, implementing, and sustaining supply chains in today's rapidly changing environment.

Restriction: Must be in Executive MBA program.

EMBA694 Operations Management (2 Credits)

A firm has the opportunity to create competitive advantage through proficient management of its operations. To do so, the firm must first recognize and establish the strategic role of its operations within the organization. Then, at the more detailed operational level, the firm must execute effectively and efficiently. This course examines the strategic role that the operations function can play, and offers specific tools and techniques that the firm can use for strategy execution. We cover concepts of operations management applied to both manufacturing and services, including operations strategy, analysis of process flows and bottlenecks, waiting line models, total quality management, six sigma, and revenue management.

Restriction: Must be in Executive MBA program.

EMBA711 Financial Planning and Control Systems (2 Credits)

The role accounting plays in planning and controlling issues within organizations. It takes a high-level view of planning and control and will encourage you to take a very broad view of the topic.

Restriction: Must be in Executive MBA program.

EMBA724 International Financial Management (3 Credits)

The role of financial management in the multinational firm. The financing and managing of foreign investments, assets, currencies, imports and exports. National and international financial institutions and markets.

Prerequisite: EMBA640.

Restriction: Must be in Executive MBA program.

EMBA757 Marketing Strategy (3 Credits)

A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.

Restriction: Must be in Executive MBA program.

EMBA758 Special Topics (2-3 Credits)

Selected advanced topics in the various fields of graduate study in business.

Restriction: Must be in Executive MBA program.

Repeatable to: 12 credits if content differs.

EMBA759 Independent Study (1-6 Credits)

Independent study for Masters students in Business.

Restriction: Must be in Executive MBA program.

Repeatable to: 12 credits if content differs.

EMBA778 Special Topics (2-3 Credits)

Selected advanced topics in the various fields of graduate study in business.

EMBA788 Executive Skills Mastery (1-2 Credits)

This course is designed to focus on the development of the specific set of skills that executives need to successfully perform in today's organizational environment. Students complete assessments which help to target their specific skill level and in the aggregate give instructors clear ideas on the needs of the cohort. The assessments also augment executive coaching, when provided. This is typically registered as a one credit course except when a particular program's curriculum allocates enough contact hours to all course topics to be covered at a more advanced level.

Repeatable to: 12 credits if content differs.

Formerly: BMGT788A.

EMBA789 Leadership Mastery (1-2 Credits)

This course addresses organizational challenges from the CEO or C-level perspective. At this level, the ability to engage ambiguity and chaos effectively is essential. Creating strategy while using a systems approach and understanding how each functional area interacts with the other (with both the short-term and long-term in mind) are of very high importance. The course covers topics that consume the days of senior level leaders in organizations. This is typically registered as a one credit course except when a particular program's curriculum allocates enough contact hours to all course topics to be covered at a more advanced level.

Repeatable to: 12 credits if content differs.

Formerly: BMGT788B.

EMBA798 Action Learning Project (1-2 Credits)

This course is designed to give the student the opportunity to work on a real-time, salient business challenge or issue for the sponsoring organization. This is often the student's employer. Students are encouraged to design projects which extend beyond a single functional area and require them to examine the interaction of multiple functional areas from a systems perspective. Students work in teams for the projects. This allows them to learn from one another, as well as to learn how to work more effectively in teams - especially in a largely virtual environment. This is typically a two credit course when projects are initiated and completed entirely within a single term. It may be a one credit course when projects extend over more than one term.

Repeatable to: 9 credits if content differs.

ENAE - Engineering, Aerospace

ENAE403 Aircraft Flight Dynamics (3 Credits)

Study of motion of aircraft, equations of motion, aerodynamic force representation, longitudinal and lateral motions, response to controls and to atmospheric disturbances, handling qualities criteria and other figures of merit.

Prerequisite: ENAE414 and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE404 Space Flight Dynamics (3 Credits)

Three-dimensional motion under central fields. Solutions to orbital motion, orbital elements, time elements. Kepler's laws. Orbital maneuvering, rendezvous and station-keeping. Rigid-body attitude dynamics, spacecraft attitude dynamics.

Prerequisite: ENAE301.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE414 Incompressible Aerodynamics (3 Credits)

Aerodynamics of inviscid incompressible flows. Aerodynamic forces and moments. Fluid statics/buoyancy force. Vorticity, circulation, the stream function and the velocity potential. Bernoulli's and Laplace's equations. Flows in low speed wind tunnels and airspeed measurement. Potential flows involving sources and sinks, doublets, and vortices. Development of the theory of airfoils and wings.

Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE415 Helicopter Theory (3 Credits)

Elementary exposition on the theory and practice of aerodynamics applied to helicopters and other rotary wing aircraft.

Prerequisite: ENAE414.

Restriction: Must be in Engineering: Aerospace program.

ENAE420 Computational Structural Mechanics (3 Credits)

Introductory of finite element methods for aerospace engineering modeling and analysis; equips students with ability to understand manuals of commercial finite element analysis software.

Prerequisite: ENES220 and MATH241; and must have completed a course in linear algebra.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE423 Vibration and Aeroelasticity (3 Credits)

Dynamic response of single and multiple degrees of freedom systems, finite element modeling, wing divergence, aileron reversal, wing and panel flutter.

Prerequisite: ENAE324.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE425 Mechanics of Composite Structures (3 Credits)

Introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.

Prerequisite: MATH246, ENAE324, ENES220, and MATH241.

ENAE432 Control of Aerospace Systems (3 Credits)

An introduction to the feedback control of dynamic systems. Laplace transforms and transfer function techniques; frequency response and Bode diagrams. Stability analysis via root locus and Nyquist techniques. Performance specifications in time and frequency domains, and design of compensation strategies to meet performance goals.

Prerequisite: Minimum grade of C- in ENAE301 and ENAE283.

Restriction: Junior standing or higher; and must be in Engineering: Aerospace program.

ENAE441 Space Navigation and Guidance (3 Credits)

Principles of navigation. Celestial, radio, and inertial navigation schemes. Navigational and guidance requirements for orbital, planetary, and atmospheric entry missions. Fundamentals of communications and information theory. Link budgets, antennas and telemetry systems.

Prerequisite: ENAE404 and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE450 Robotics Programming (3 Credits)

Introduces students to the Robot Operating System (ROS) as well as to many of the available tools commonly used in robotics. Lectures focus on theory and structure, whereas laboratory sections will focus on applications and implementations. Students learn how to create software and simulations, interface to sensors and actuators, and integrate control algorithms. The course works through exercises involving a number of autonomous robots (i.e., ground and air vehicles) that students will eventually use in their subsequent RAS minor courses. Topics include: ROS architecture, console commands, ROS packages, simulation environments, visualizations, autonomous navigation, manipulation, and robot vision.

Prerequisite: ENME480 or ENAE380.

Restriction: Must be in the Robotics and Autonomous Systems (RAS) minor; or permission of department.

Additional Information: Students in the Robotics and Autonomous Systems minor should take ENME480 as a prerequisite; Aerospace Engineering students not in the minor should take ENAE380.

ENAE455 Aircraft Propulsion and Power (3 Credits)

Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of piston, turbojet, fanjet, and other variations of airbreathing aircraft power units.

Prerequisite: ENES232, ENAE414, and ENAE311.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE457 Space Propulsion and Power (3 Credits)

Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.

Prerequisite: PHYS271, ENES232, PHYS270, and ENAE311.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And senior standing.

ENAE464 Aerospace Engineering Laboratory (3 Credits)

Application of fundamental measuring techniques to measurements in aerospace engineering. Includes experiments in aerodynamics, structures, propulsion, flight dynamics and astrodynamics. Correlation of theory with experimental results.

Prerequisite: ENAE324, ENAE362, ENAE311, and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE467 Advanced Space Propulsion and Power (3 Credits)

Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.

Prerequisite: ENAE457.

Jointly offered with: ENAE667.

Restriction: Permission of Instructor.

Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.

Formerly: ENAE488I.

ENAE471 Aircraft Flight Testing (3 Credits)

Provides basic instruction to aircraft flight testing and demonstrates need for systematic, well-proven technique to allow for accurate airplane performance. Concepts of aerodynamics, airplane performance, and stability and control. Emphasis on single-engine general aviation type aircraft.

Prerequisite: ENAE414.

Corequisite: ENAE403.

Restriction: Must be in Engineering: Aerospace program.

ENAE472 Introduction to Hypersonics (3 Credits)

Introduces students to the various key aspects of flight at hypersonic speeds. Critical aerodynamic phenomena to be covered includes the qualitative behavior of flow fields in the high-Mach-number limit, approximate methods for quantifying surface pressure, and estimates of viscous drag and heating. High-speed air-breathing propulsion systems will be discussed, including cycle analysis and performance metrics for propulsion, with a main emphasis on the fundamentals of ramjet and scramjet engines. Key Guidance, Navigation and Control (GNC) concepts for various hypersonic vehicle types will also be introduced, including the design of appropriate flight trajectories and control algorithms to achieve mission goals. Finally, students will be provided with an overview of high-temperature materials, structures, and thermal protection systems.

Prerequisite: ENAE311 or enrolled in hypersonics graduate certificate program.

Corequisite: ENAE481 or ENAE483 (if not enrolled in hypersonics graduate certificate program).

Restriction: Students must be in the Hypersonic Graduate Certificate Program (code: Z165) or receive permission from the department.

Credit Only Granted for: ENAE488N or ENAE472.

Formerly: ENAE488N.

ENAE481 Principles of Aircraft Design (3 Credits)

Aircraft design principles blending both synthesis and analysis. The iterative nature of the design process. Applied aerodynamics. Elements of aircraft performance calculation and optimization. Design of aircraft including payload, crew and avionics provisions, propulsion selection and sizing, aerodynamic configuration optimization, mass properties, stability and control characteristics, and vehicle subsystems. Individual student projects in aircraft design.

Prerequisite: ENAE324, ENAE362, and ENAE432.

Corequisite: ENAE414.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE482 Aeronautical Systems Design (3 Credits)

Senior capstone design course in the aeronautics track. Introduction of computerized methods for sizing and performance analysis. More comprehensive methods to predict weight, aerodynamics and propulsion system characteristics. Consideration in design disciplines such as vulnerability, maintainability, produceability, etc. Groups of students will complete, brief and report on a major design study to specific requirements.

Prerequisite: ENAE455, ENAE423, ENAE403, and ENAE481.

Restriction: Must be in Engineering: Aerospace program; and senior standing or higher.

ENAE483 Principles of Space Systems Design (3 Credits)

Principles of space systems analysis and vehicle design. Launch vehicle performance analysis and optimization. Design of vehicle systems including avionics, power, propulsion, life support, human factors, structures, actuator and mechanisms, and thermal control. Design processes and design synthesis. Individual student projects in vehicle design.

Prerequisite: ENAE404, ENAE324, ENAE362, and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE484 Space Systems Design (3 Credits)

Senior capstone design course in the space track. Group preliminary design of a space system, including system and subsystem design, configuration control, costing, risk analysis, and programmatic development. Course also emphasizes written and oral engineering communications.

Prerequisite: ENAE423, ENAE483, ENAE441, and ENAE457.

Restriction: Must be in Engineering: Aerospace program.

ENAE488 Topics in Aerospace Engineering (1-4 Credits)

Technical elective taken with the permission of the student's advisor and instructor. Lecture and conference courses designed to extend the student's understanding of aerospace engineering. Current topics are emphasized.

Prerequisite: Permission of student's advisor required.

Restriction: Permission of instructor.

ENAE499 Elective Research (3 Credits)

Undergraduate research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference or competition.

Prerequisite: Permission from student's advisor required.

Restriction: Senior standing or higher; and must be in Engineering: Aerospace program; and permission of instructor; and permission of ENGR-Aerospace Engineering department.

Repeatable to: 6 credits if content differs.

ENAE601 Astrodynamics (3 Credits)

Mathematics and applications of orbit theory, building upon the foundations developed in ENAE 404 and ENAE 441. Topics include two body orbits, solutions of Kepler's equation, the two-point boundary value problem, rendezvous techniques, and Encke's method.

Prerequisite: ENAE404; or permission of ENGR-Aerospace Engineering department.

ENAE602 Spacecraft Attitude Dynamics and Control (3 Credits)

Rigid body rotational dynamics of spacecraft; forced and unforced motion, torques produced by the orbital environment; orbit/attitude coupling; gas jet, momentum wheel, and magnetic torque actuators. Elementary feedback attitude regulators and algorithms for linear and nonlinear attitude tracking.

Prerequisite: ENAE404 and ENAE432.

ENAE603 Near-Earth Object Exploration (3 Credits)

An overview of the near-Earth objects (NEOs) of our solar system—the asteroids and comets whose orbits closely approach Earth's orbit—and what we know about them, what we're learning about them, and how to design spacecraft missions to interact with them.

Prerequisite: ENAE601.

Restriction: Must be in one of the following programs (ENGR: MS/PhD-Aerospace Engineering (Master's); ENGR: MS/PhD-Aerospace Engineering (Doctoral)).

Credit Only Granted for: ENAE788N or ENAE603.

Formerly: ENAE788N.

ENAE631 Helicopter Aerodynamics I (3 Credits)

A history of rotary-wing aircraft, introduction to hovering theory, hovering and axial flight performance, factors affecting hovering and vertical flight performance, autorotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope, and introduction to rotor acoustics.

Prerequisite: ENAE414 and ENAE311. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE632 Helicopter Aerodynamics II (3 Credits)

Basic aerodynamic design issues associated with main rotors and tail rotors, discussion of detailed aerodynamic characteristics of rotor airfoils, modeling of rotor airfoil characteristics, review of classical methods of modeling unsteady aerodynamics, the problem of dynamic stall, review of methods of rotor analysis, physical description and modeling of rotor vortical wakes, discussion of aerodynamic interactional phenomena on rotorcraft, advanced rotor tip design, physics and modeling of rotor acoustics.

Prerequisite: ENAE631; and (ENAE414 and ENAE311; or students who have taken courses with comparable content may contact the department). Or permission of ENGR-Aerospace Engineering department.

ENAE633 Helicopter Dynamics (3 Credits)

Flap dynamics. Mathematical methods to solve rotor dynamics problems. Flap-lag-torsion dynamics and identify structural and inertial coupling terms. Overview on rotary wing unsteady aerodynamics. Basic theory of blade aeroelastic stability and ground and air resonance stability, vibration analyses and suppression.

Prerequisite: ENAE631. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE634 Helicopter Design (3 Credits)

Principles and practice of the preliminary design of helicopters and similar rotary wing aircrafts. Design trend studies, configuration selection and sizing methods, performance and handling qualities analyses, structural concepts, vibration reduction and noise. Required independent design project conforming to a standard helicopter request for proposal (RFP).

Prerequisite: ENAE631. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE635 Helicopter Stability and Control (3 Credits)

Advanced dynamics as required to model rotorcraft for flight dynamic studies. Development of helicopter simulation models and specifications of handling qualities. Methods for calculation of trim, poles, frequency response, and free flight response to pilot inputs.

Prerequisite: ENAE631.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE636 Helicopter Dynamics II (3 Credits)

Aerodynamics, dynamics and aeromechanics of helicopters and tilt rotor aircraft. Experimental testing and mathematical modeling required for the design and analysis of such aircraft.

Credit Only Granted for: ENAE788R or ENAE636.

Formerly: ENAE788R.

ENAE641 Linear System Dynamics (3 Credits)

Linear systems; state space, multi-input, multi-output models; eigenstructure; controllability, observability, singular value analysis; multivariable Nyquist condition; observer design; introduction to Kalman filtering. Full state feedback techniques including pole placement and LQR/LQG techniques; introduction to loop shaping and robustness.

Prerequisite: ENAE432.

ENAE642 Atmospheric Flight Control (3 Credits)

Exposure to flight guidance and control. Draws heavily from vehicle dynamics as well as feedback theory, and careful treatment of the non-linear aspects of the problem is critical. Conventional synthesis techniques are stressed, although modern methods are not ignored. Multivariable system analysis is included, along with flight-control design objectives and hardware limitations. Emphasis on aircraft and missiles.

Prerequisite: ENAE403 and ENAE432; or students who have taken courses with comparable content may contact the department.

ENAE644 Motion Planning for Autonomous Systems (3 Credits)

Autonomous systems (e.g., aircraft, vehicles, manipulators, and robots) must plan long-term movement that respects environmental constraints such as obstacles, other actors, and wind; system constraints such as kinematics, dynamics, and fuel; and other factors such as time and safety. Robust autonomy requires dealing with environmental changes, new information, and uncertainty. This course provides an overview of methods that solve a variety of motion planning problems. The course will cover both the theoretical and practical aspects of state-of-the-art motion planning algorithms. Course projects that use real autonomous systems will be facilitated and encouraged.

Prerequisite: Students are expected to be moderately proficient in at least one programming language.

Restriction: Must have permission from ENGR-Aerospace Engineering department.

Credit Only Granted for: ENAE644 or ENAE788V.

Formerly: ENAE788V.

ENAE646 Advanced Dynamics of Aerospace Systems (3 Credits)

Introduces the principles and methods for formulating and analyzing mathematical models of aerospace systems using Newtonian, Lagrangian, and Hamiltonian formulations of particle and rigid body dynamics. Additional topics include applied dynamical systems, geometric mechanics, and symmetry and reduction.

Prerequisite: ENAE301.

Credit Only Granted for: ENAE788G or ENAE646.

Formerly: ENAE788G.

ENAE647 Flexible Multi-body Dynamics (3 Credits)

Review of particle dynamics, rigid body kinematics, analytical dynamics, constraint equations in multibody dynamics, methods for enforcing kinematic constraint, formulation of flexible bodies in multibody dynamics, finite element modeling, and numerical integration methods.

Prerequisite: ENAE646.

Restriction: Must be in one of the following programs (ENGR: MS/PhD-Aerospace Engineering (Doctoral); ENGR: MS/PhD-Aerospace Engineering (Master's)).

Credit Only Granted for: ENAE788Q or ENAE647.

Formerly: ENAE788Q.

ENAE651 Smart Structures (3 Credits)

Topics related to the analysis, design, and implementation of smart structures and systems: modeling of beams and plates with induced strain actuation; shape memory alloys; electro-rheological fluids; magnetostrictor and electrostrictor actuators and fiber optic sensors.

ENAE652 Computational Structural Mechanics (3 Credits)

Fundamentals of structural mechanics and computational modeling. Finite element modeling of two- and three-dimensional solids, plates and shells. Geometrically nonlinear behavior. Structural stability such as buckling and postbuckling.

Restriction: Permission of instructor; and permission of ENGR-Aerospace Engineering department.

Credit Only Granted for: ENME 674, ENAE652, ENPM652 or ENPM808F.

ENAE653 Nonlinear Finite Element Analysis of Continua (3 Credits)

Finite element formulation of nonlinear and time dependent processes. Introduction to tensors, nonlinear elasticity, plasticity and creep. Application to nonlinear solids including aerospace structures, such as shells undergoing finite rotations.

Prerequisite: ENAE652; or students who have taken courses with comparable content may contact the department.

ENAE654 Mechanics of Composite Structures (3 Credits)

An introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.

ENAE655 Structural Dynamics (3 Credits)

Advanced principles of dynamics necessary for structural analysis; solutions of eigenvalue problems for discrete and continuous elastic systems, solutions to forced response boundary value problems by direct, modal, and transform methods.

ENAE656 Aeroelasticity (3 Credits)

Topics in aeroelasticity: wing divergence; aileron reversal; flexibility effects on aircraft stability derivatives; wing, empennage and aircraft flutter; panel flutter; aircraft gust response; and aeroservoelasticity of airplanes.

Prerequisite: ENAE655.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE661 Aircraft Propulsion and Power (3 Credits)

An introduction to air-breathing jet propulsion with the main emphasis on the fundamentals of gas turbine engines. It is intended for students with prerequisite knowledge of elementary fluid mechanics, gas dynamics, and thermodynamics.

Prerequisite: ENES232, ENAE414, and ENAE311.

Jointly offered with: ENAE455.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and must have Senior or graduate standing.

Credit Only Granted for: ENAE455 or ENAE661.

ENAE662 Space Propulsion and Power (3 Credits)

Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.

Prerequisite: ENES232 and ENAE311; or equivalents.

Jointly offered with: ENAE457.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and must have senior or graduate standing.

Credit Only Granted for: ENAE457, ENAE457H, ENAE662.

ENAE663 Introduction to Plasmas for Space Propulsion and Power (3 Credits)

Characteristics of plasmas, motion of charged particles in fields, collisional processes, kinetic theory, fluid description of plasmas, transport properties, equilibrium vs. non-equilibrium, generation of plasmas.

Recommended: PHYS270 or equivalent.

ENAE665 Advanced Airbreathing Propulsion (3 Credits)

Advanced treatment of airbreathing propulsion technologies, propulsion system analysis, and engine/airframe integration. Topics will vary, but may include novel engine cycles, advanced gas turbine systems, pulsed systems, and high-speed engines, including scramjets and combined cycle systems.

Prerequisite: ENAE455; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of instructor.

ENAE667 Advanced Space Propulsion and Power (3 Credits)

Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.

Prerequisite: ENAE457 or equivalent.

Jointly offered with: ENAE467.

Restriction: Permission of instructor.

Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.

ENAE673 Aerodynamics of Incompressible Fluids (3 Credits)

Introduces the fundamental concepts of incompressible flows. Topics to be addressed include the conservation equations, potential flow, lift and drag, Navier-Stokes equations, boundary layers and similarity solutions, and solutions to classical problems.

Prerequisite: Undergraduate courses in differential equations, incompressible, and compressible flow (ENAE311; and one course from ENAE414; ENME331, OR ENME640, or equivalent).

Restriction: Must be in ENGR: MS/PhD-Aerospace Engineering (Master's) program.

ENAE674 Aerodynamics of Compressible Fluids (3 Credits)

One-dimensional flow of a perfect compressible fluid. Shock waves. Two-dimensional linearized theory of compressible flow. Two-dimensional transonic and hypersonic flows. Exact solutions of two-dimensional isotropic flow. Linearized theory of three-dimensional potential flow. Exact solution of axially symmetrical potential flow. One-dimensional flow with friction and heat addition.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE675 Unsteady Aerodynamics (3 Credits)

Classical theories of incompressible unsteady aerodynamics with an introduction to modeling techniques. Topics include: unsteady Bernoulli's equation, added mass, the indicial response method, dynamic stall, and modern applications.

Prerequisite: ENAE414; and permission of instructor.

Credit Only Granted for: ENAE672 or ENAE675.

Formerly: ENAE672.

ENAE676 Turbulence (3 Credits)

Physical and statistical descriptions of turbulence; review of phenomenological theories for turbulent flows; scales of motion; correlations and spectra; homogeneous turbulent flows; inhomogeneous shear flows; turbulent flows in pipes and channels; turbulent boundary layers; theory of methods for turbulent flows (Reynolds stress equations, LES, DES, DNS); experimental methods for turbulence measurements.

Prerequisite: ENAE673.

Recommended: ENAE674.

ENAE681 Engineering Optimization (3 Credits)

Methods for unconstrained and constrained minimization of functions of several variables. Sensitivity analysis for systems of algebraic equations, eigenvalue problems, and systems of ordinary differential equations. Methods for transformation of an optimization problem into a sequence of approximate problems. Optimum design sensitivity analysis.

ENAE682 Hypersonic Aerodynamics (3 Credits)

Hypersonic shock and expansion waves, Newtonian theory, Mach methods, numerical solutions to hypersonic inviscid flows, hypersonic boundary layer theory, viscous interactions, numerical solutions to hypersonic viscous flows. Applications to hypersonic vehicles.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE683 High Temperature Gas Dynamics (3 Credits)

Aspects of physical chemistry and statistical thermodynamics necessary for the analysis of high temperature flows, equilibrium and nonequilibrium chemically reacting flows, shock waves, nozzle flows, viscous chemically reacting flow, blunt body flows, chemically reacting boundary layers, elements of radiative gas dynamics and applications to hypersonic vehicles.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE684 Computational Fluid Dynamics I (3 Credits)

Partial differential equations applied to flow modelling, fundamental numerical techniques for the solution of these equations, elliptic, parabolic, and hyperbolic equations, elements of finite difference solutions, explicit and implicit techniques. Applications to fundamental flow problems.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE685 Computational Fluid Dynamics II (3 Credits)

Continuation of ENAE 684. Basic algorithms for the numerical solution of two and three dimensional inviscid and viscous flows. Applications to internal and external flow problems.

Prerequisite: ENAE684.

Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE688 Seminar (1-3 Credits)**ENAE691 Satellite Design (3 Credits)**

Systems design of Earth-orbiting satellites, including geostationary communications satellites and low Earth orbit constellations. Basics of orbital motion, communications, and instrument design. Spacecraft systems, structural design, thermal design, power generation, and attitude determination and control. Launch vehicle interfacing and mission operations.

Prerequisite: ENAE483.

ENAE692 Introduction to Space Robotics (3 Credits)

Introduction to the kinematics, dynamics, and control of robot manipulators. DH parameters, serial and parallel manipulators, kinematic redundancy, sensors, actuators, and mechanism design. Control concepts introduced ranging from independent joint control to impedance control. Examples drawn from space robotics, wearable robotics, and other areas.

Prerequisite: ENAE301 or ENES221.

Recommended: ENAE432.

ENAE694 Spacecraft Communications (3 Credits)

Brief overview of satellite orbits. Radio frequency communications, noise, and bandwidth limitations. Link budget analysis. Modulation and multiplexing approaches, multiple access systems. Satellite transponder and Earth station technology.

ENAE696 Spacecraft Thermal Design (3 Credits)

Thermal sources in space. Black-body radiation; absorptivity and emissivity; radiative thermal equilibrium. Mutually radiating plates, view angles, and interior conduction. Techniques of spacecraft thermal analysis; approaches to passive and active thermal control.

ENAE697 Space Human Factors and Life Support (3 Credits)

Engineering requirements supporting humans in space. Life support design: radiation effects and mitigation strategies; requirements for atmosphere; water, food, and temperature control. Accommodations for human productivity in space: physical and psychological requirements; work station design; and safety implication of system architectures. Design and operations for extra-vehicular activity.

ENAE741 Interplanetary Navigation and Guidance (3 Credits)

Interplanetary trajectory construction; patched and multiconic techniques. Methods of orbit and attitude determination; applied Kalman filtering. Guidance algorithms and B-plane targeting. Interplanetary navigation utilizing in situ and radio techniques.

Prerequisite: ENAE601 and ENAE432.

ENAE742 Robust Multivariable Control (3 Credits)

Limitations on achievable performance in multivariable feedback systems due to uncertainty. Singular values, matrix norms, multivariable Nyquist stability theory, uncertainty modeling in aerospace systems. Loop-shaping, generalization of Bode design principles. Characterizing the uncertainty, robustness and performance analysis, and synthesis, primarily in the frequency domain. Current research directions. Aerospace examples are used to complement the theory.

Prerequisite: ENAE641.

ENAE743 Applied Nonlinear Control of Aerospace Systems (3 Credits)

Mathematics and methods of nonlinear systems analysis and nonlinear control design, including nonlinear models and phenomena, Lyapunov stability, input-output stability, passivity and frequency domain analysis, nonlinear controllability and observability, feedback linearization, sliding mode control, and integrator backstepping.

Prerequisite: ENAE641.

ENAE757 Advanced Structural Dynamics (3 Credits)

Demonstrate the practical application of Smart Materials and Spatially Distributed Transducers to the design and control of advanced structures. The course will be focused toward the active control of continuum structures using advanced Spatially Distributed Parameter System control techniques and concepts. Effective system parameterizations will be used to reduce distributed parameter system models to classical canonical state space form for the purpose of robust adaptive structure design. Application case studies, including morphing structures will be employed as necessary to enhance the students intuition and understanding of Distributed Parameter Systems.

Prerequisite: ENAE655; or students who have taken courses with comparable content may contact the department.

ENAE788 Selected Topics in Aerospace Engineering (1-3 Credits)**ENAE791 Launch and Entry Vehicle Design (3 Credits)**

Design of aerospace vehicles for atmospheric transit to and from space. Generic formulation of atmospheric flight dynamics. Ballistic and lifting entry trajectories. Estimation of vehicle aerodynamic properties and aerothermodynamic heating. Entry thermal protection design. Trajectory analysis of sounding rockets and orbital launch vehicles. Serial, parallel, and hybrid multistaging schemes, optimal multistaging. Constrained trajectory optimization. Launch vehicle economic and reliability analysis, flight termination systems, sensors and actuators.

Prerequisite: ENAE601.

ENAE799 Master's Thesis Research (1-6 Credits)**ENAE898 Pre-Candidacy Research (1-8 Credits)****ENAE899 Doctoral Dissertation Research (1-8 Credits)**

ENCE - Engineering, Civil

ENCE402 Simulation and Design of Experiments for Engineers (3 Credits)

Review of statistics and hypothesis testing, sample design and design of experiments, generation of discrete and continuous distributions and their applications. Introduction of simulation languages and simulation of discrete and continuous engineering systems. Output analysis, model validation and sensitivity and reliability analysis.

Prerequisite: ENCE302; and permission of ENGR-Civil & Environmental Engineering department.

ENCE411 Environmental Engineering Science (3 Credits)

Introduces the analytical techniques available to assess performance of engineering processes as they relate to water, soil, and air treatment and quality. The basic principles of environmental management, economics of waste treatment, by-product reutilization, and energy cycles are introduced and discussed. Alternative technologies are introduced and evaluated mostly by assessing their potential to reduce waste, minimize energy use, and promote sustainability. Students' activities include, a weekly lab to provide hands-on experience with environmental quality measurements and treatment techniques; on-site visits to regional industries that undertake sustainable practices; and a final research project where experimental design and laboratory techniques are used to assess interactions between technologies and natural systems and their potential for reducing environmental impacts.

Prerequisite: ENCE205 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE412 Environmental Engineering Unit Operations (3 Credits)

Examination of unit operations and processes encountered in environmental engineering field. Fundamental principles learned from previous classes will be applied into the design and operation of unit operations and processes, particularly in the area of water and wastewater treatment. Similar processes will be applied to air pollution control, solid waste disposal and hazardous waste treatment.

Prerequisite: ENCE305 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE420 Selection and Utilization of Construction Equipment (3 Credits)

Learn to evaluate and select construction equipment with a focus on mechanized equipment for earthwork and building construction. Learn about the parties involved in procurement, operation and maintenance, and how to cost-effectively plan, select, and utilize equipment for earthmoving, paving, formwork, trenching, rock excavation, tunneling, site preparation, and steel and concrete construction. Explore trends in equipment design, construction automation, and robotics.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor.

ENCE421 Legal Aspects of Architectural and Engineering Practice (3 Credits)

Learn the basic structure of the US legal system and court procedures and legal principles relevant to architectural and engineering design and construction contracts including principles of ethical, legal and professional conduct of engineers and architects. Topics include: contracts for design and construction, sales and warranties, torts and product liability, business agency and government agencies, professional liability of architects and engineers, labor laws, expert testimony, mediation and arbitration, tangible property including real estate, intellectual property including trademarks, patents and copyrights, insurance and sureties.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE422 Project Cost Accounting and Economics (3 Credits)

Learn: the fundamentals of accounting; project cost accounting principles as they apply to project management; project cost accounting; and the fundamentals of engineering economics. Topics include: project feasibility analysis; reading and analyzing financial statements; cash management; cash flow analysis; depreciation and taxes; and impact on profitability; the principles of activity based costing; net present value analysis; the framework for project performance measurement, cost performance indices, and earned value analysis.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE423 Project Planning, Estimating & Scheduling (3 Credits)

Learn the fundamentals of project planning, estimating, and scheduling. Understand the concepts of planning; to reduce uncertainty, improve efficiency of the operation, to set and meet objectives, and to provide a basis for monitoring and controlling the work. Be introduced to: the concepts of resource definition, assignment and management, and; the basics of project estimating (pricing) methods including global pricing strategies, types of estimates, pricing processes, overhead and profit, and project financing. Learn the basics of project scheduling including; bar charts, network-based methodologies, and linear scheduling techniques. Emphasis is placed on Critical Path Method (CPM) scheduling, a network based methodology. Be exposed to the use of scheduling software and will actually develop a CPM schedule for an actual construction project as part of a semester project.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE424 Communication for Project Managers (3 Credits)

Learn the fundamentals of communications for project managers. Emphasis is on interpersonal and group communications; through voice, electronic, and written messages; project cycle and reports and presentations during this cycle; and communications for employment.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Jointly offered with: ENCE614.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management minor.

Credit Only Granted for: ENCE424 or ENCE614.

ENCE426 Construction Documentation and BIM Applications in Engineering and Construction (3 Credits)

Learn the basics of construction documentation methods, with particular emphasis on Building Information Modeling (BIM). Topics include: the fundamentals of assembly, coordination, and maintenance of construction documents and implementation of BIM techniques in the design and construction processes, and; a review of Autodesk, Revit, and Navisworks and other leading BIM software. Lectures from project management faculty supplemented by guest lecturers from the construction industry.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE430 Introduction to Infrastructure and Resilience (3 Credits)

Develops system-level skills for the planning, design, maintenance, and operation of resilient infrastructure systems. Through this course, we will discuss a variety of infrastructure systems, both public and private, and their role in communities before and after disasters. The themes of the course will be grounded in the four phases of emergency management (mitigation, preparedness, response, and recovery) and the role that infrastructure plays in each. Through these applications areas, we will study a variety of conceptual, analytical, and computational models that support informed decision-making for these systems under uncertainty.

Prerequisite: ENCE302; or students who have taken courses with comparable content may contact the department.

Corequisite: ENCE360; or students who have taken courses with comparable content may contact the department. Jointly offered with ENCE632.

Credit Only Granted for: ENCE632, ENCE688U, ENCE430 or ENCE489U.

Formerly: ENCE489U.

ENCE431 Hydrologic Engineering (3 Credits)

An introduction to basic principles of hydrologic science including the hydrologic cycle, rainfall, surface runoff and streamflow. Special emphasis is placed on hydrologic engineering design of stormwater management and flood control facilities. Design projects are used to illustrate design practices.

Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE432 Ground Water Hydrology (3 Credits)

Concepts related to the development of the ground water resources, hydrology, hydrodynamics of flow through porous media, hydraulics of wells and basin-wide ground water development. Fundamentals of ground water pollution are introduced.

Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE441 Foundation Design (3 Credits)

Critical review of classical lateral earth pressure theories, analysis of retaining walls and reinforced earth walls, subsurface explorations, bearing capacity and settlement of shallow foundations, design of deep foundations that includes both pile foundations and drilled shafts.

Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE444 Experimental Methods in Geotechnical Structural Engineering (3 Credits)

In the geotechnical engineering part of the course, major soils testing and their interpretation including classification, compaction, strength, and compressibility will be undertaken. The structural engineering part of this course covers test planning, loading apparatus, instrumentation, data acquisition and data analysis, as well as basic aspects of structural testing techniques and shake-table test.

Prerequisite: ENCE353 and ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE447 Pavement Engineering (3 Credits)

Fundamental principles underlying the design, construction, maintenance and repair, and management of highway and airfield pavement systems. Pavement performance (functional/structural; evaluation); pavement mechanics (multi-layered elastic theory; slab theory); pavement materials (properties and characterization); environmental effects; current rigid and flexible design methods (new/rehabilitation); construction (new construction; maintenance/repair; rehabilitation); economic evaluation; pavement management.

Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE453 Computer-Aided Structural Analysis (3 Credits)

Computer-aided analysis of structural systems. Unified matrix formulation of stiffness and flexibility methods. Slope deflection method. Evaluation of truss, frame, and grid systems. Non-prismatic and curved elements. Error analysis and determination of ill-conditions. Introduction to finite element methods; formulation of simple two-dimensional elements. In laboratory, use and development of CAD software.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE454 Design of Concrete Structures (3 Credits)

Combined bending and compression, development and anchorage of reinforcement, deflections, design of slabs including one-way and two-way, design of footings, retaining walls, introduction to prestressed concrete, design of multi-story buildings.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

Formerly: ENCE451.

ENCE455 Design of Steel Structures (3 Credits)

Behavior and design of members subjected to fatigue, and combined bending and compression; plate girders, composite beams, open-web joists and connections. Methods of allowable stress design, and load and resistance factor design. Elements of plastic analysis and design. Framing systems and loads for industrial buildings and bridges.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE465 Civil and Environmental Engineering Design I (1 Credit)

Provides students an opportunity to develop their skills in project scoping and the development of design proposals. The fundamental concepts are taught using analytical and computational methods, which are necessary for designing and analyzing the sustainability of various engineering processes and technologies. The course provides the methods and skills for understanding the human-environment-infrastructure interactions needed to develop a design proposal.

Prerequisite: ENCE201 and ENCE215.

Restriction: Permission of the ENGR-Civil & Environmental Engineering Department.

ENCE466 Design of Civil Engineering Systems (3 Credits)

A major civil engineering design experience that emphasizes development of student creativity, development and use of design methodologies, evaluation of alternate solutions, feasibility considerations, and detailed system descriptions. Realistic design constraints including economic factors, safety, aesthetics, and reliability will be imposed. Students will work in design project groups and be required to exercise oral and written communication skills.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

Additional Information: Must be taken in the semester in which the student graduates.

ENCE467 Civil and Environmental Engineering Design II (2 Credits)

This experiential course provides structured and unstructured time for groupwork as part of the senior capstone design course sequence. The course builds on skills acquired throughout a student's academic career extending a project defined and scoped in ENCE465. The objective of this course is to provide students with hands on experience similar to the experience encountered by new engineers working in professional engineering and construction practice. The course offers students an opportunity to develop the leadership and groupwork skills needed to meet professional expectations.

Prerequisite: ENCE465; and must have completed or be concurrently enrolled in ENCE302 and ENCE305.

Restriction: Permission of the ENGR-Civil & Environmental Engineering Department.

ENCE470 Highway Engineering (3 Credits)

Highway location and design, highway engineering economics, traffic engineering, traffic measurement devices and technologies. Includes discussion of technological advances in traffic flow and capacity, such as signal systems, corridor control, automatic driver information, incident detection and autonomous vehicle operation.

Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE472 Transportation Engineering (3 Credits)

Transportation engineering concepts including transportation systems analysis, airport systems, airline and airport operations, marine transportation and urban public transportation systems.

Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE488 Senior Thesis (3 Credits)

Advanced study in civil engineering problems with special emphasis on mathematical modeling and experimental methods.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

ENCE489 Special Problems in Civil Engineering (1-4 Credits)

A course arranged to meet the needs of exceptionally well prepared students for study in a particular field of civil engineering.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

Repeatable to: 9 credits if content differs.

ENCE602 Project Procurement Management (3 Credits)

Fundamental concepts and techniques for project acquisition and procurement are presented. Students are introduced to the PMBOK Guide six-step procurement process and expected to develop an in-depth understanding of project evaluation, planning, financing, contracting, negotiation, and procurement execution. It will also cover emerging methods, principles, and practices in infrastructure project procurement, including Public-Private Partnerships, Carbon project procurement, and Clean Development Mechanism.

ENCE603 Bayesian Data Analytics for Engineering (3 Credits)

Introduction to identifying, analyzing, assessing, and managing data inherent to engineering projects. Includes: statistical principles, concepts, and models; decision science aspects of data systems; Bayesian methods; measurement theory; subjective aspects of statistics and data appraisal. Examples are drawn from software development, systems integration, and other large engineering projects. Covers statistical basics, subjective probability, Bayesian data analysis, introduction to decision theory, Monte Carlo simulation, value of information, and risk-based decision making from data.

Recommended: ENCE627.

ENCE604 Sustainability Fundamentals for Project Managers (3 Credits)

Addresses the fundamentals of sustainability for project managers including best practices of modern sustainable construction and project management. Commercial and residential buildings consume about 40 percent of the energy used in the United States. The course therefore emphasizes the application of the sustainable development goals to the built environment, including the practical operational aspects of sustainable facility project management and sustainable construction by contractors. The course also will cover the fundamental concepts of sustainable project development and the move towards economic prosperity, environmental protection, and social equity, taking all three dimensions into account to achieve sustainability. Project managers need to take responsibility for more sustainable development of organizations, facilities, and projects.

ENCE605 Evolving as a Project Leader (3 Credits)

Projects are now used by many organizations for the implementation of strategic initiatives. This means that project managers must be able to do more than manage, organize, and control. They must be able to lead the project team and its stakeholders through change. This course explores four themes 1) Leadership theory with an emphasis on servant and situational leadership; 2) Vital leadership skills; 3) Project leadership in traditional and agile projects; and, 4) Developing your leadership skills.

ENCE606 Graduate Introduction to Project Scheduling (3 Credits)

Students are taught the basics of project scheduling and the various scheduling approaches that are currently being used in the design and construction industry. Project planning techniques will be covered and basic scheduling methods will be taught including the use of bar charts. Critical Path Method (CPM), Program Evaluation and Review (PERT) and Linear Scheduling (Line of Balance) methods.

ENCE607 Mastering Agile Project Management (3 Credits)

Learn how and why Agile project management is the fastest growing and most successful project management philosophy today. Learn the mechanics of how to design and facilitate projects using pure Agile Scrum and Lean Kanban techniques; The tradeoffs of using hybrid techniques such as Lean Startup, Scaled Agile for the Enterprise, and Disciplined Agile Development. Then go beyond these frameworks to the science beneath with the essential principles to ensure you get the best benefits of Agile project management methods.

ENCE610 Fundamentals of Structural Analysis (3 Credits)

Cartesian tensor notation. Linear forms of the general equilibrium, compatibility, and constitutive equations. The calculus of variations. The principles of virtual work and complementary virtual work. Self-adjoint problem formulations.

ENCE611 Finite Element Methods (3 Credits)

Basic principles and fundamental concepts of the finite element method. Consideration of geometric and material nonlinearities, convergence, mesh gradation and computational procedures in analysis. Applications to plane stress and plane strain, plates and shells, eigenvalue problems, axisymmetric stress analysis, and other problems in civil engineering.

Formerly: ENCE661.

ENCE613 Structural Dynamics (3 Credits)

Analysis of the dynamic response of structures and structural components subjected to impact load, transient load, and ground excitations; study of single degree-of-freedom and multi degree-of-freedom systems in classical closed form solution and approximate numerical solution; solution in the frequency domain and the use of finite element method.

Formerly: ENCE653.

ENCE620 Risk Analysis in Engineering and Economics (3 Credits)

Covers quantitative risk analysis and management using probability theory and statistics starting with system definition, hazard and scenario identification, likelihood estimation and consequence assessment, and finishes with economic valuation and microeconomics for informing decision making. It covers the topics: uncertainty, risk, knowledge and ignorance related definitions; natural and anthropogenic hazards and fundamental risk methods; system abstraction and associated complexities; analytical and empirical reliability and resilience estimation for components and systems; consequence, severity and loss analysis and accumulation including property and life; economic valuation; risk-cost-benefit tradeoffs and analysis; microeconomics and socioeconomics in risk analysis for informing decisions; risk management, acceptance, tolerance and finance; data needs and sources; expert-opinion elicitation; applications in engineering, sciences and economics.

Prerequisite: ENCE302.

Credit Only Granted for: ENCE489L, ENCE620, ENRE648M, or ENSE698R.

ENCE621 Uncertainty Modeling and Analysis (3 Credits)

Definition of engineering systems, knowledge levels using information science concepts as applied to engineering systems, sources and types of knowledge and ignorance, uncertainty sources and types for engineering systems, probability models, statistical models, fuzziness, fuzzy sets, fuzzy logic, fuzzy arithmetic, imprecise probabilities, evidence methods, uncertainty measures, uncertainty management, uncertainty reduction, applications of these analytical methods to engineering systems and in decision making.

Prerequisite: ENCE302; or students who have taken courses with comparable content may contact the department.

ENCE622 Construction Automation & Robotics (3 Credits)

Covers advanced technologies leading to redesign and partial or full automation of selected construction processes utilizing industrial robotics. Lectures and presentations will cover topics such as basic robotic technology (robot kinematics and dynamics, industrial manipulators, mobility bases, end effectors, sensors, control systems, and robot task programming), design of automated construction processes, selection of means and methods for automated construction processes, robot ergonomics and safety, calculation of costs and benefits of construction robots in selected applications, engineering and economic feasibility of automation and robotics in the construction industry.

ENCE623 Introduction to Advanced Scheduling (3 Credits)

A Combination of lecture and hands-on use of software to develop advanced knowledge and skills necessary to master advanced scheduling techniques for project management and control will be used. No software purchase is necessary.

Prerequisite: ENCE423 or ENCE662.

Credit Only Granted for: ENCE623 or ENCE688S.

ENCE625 Project Administration (3 Credits)

Principles of project administration procedures from the viewpoint of a resident project manager or project engineer on a construction or engineering project. The course specifically addresses the project administration responsibilities of the project manager or project engineer in the engineering, design, or construction industries. Students with a background in the private sector or the government sector will benefit. The course takes a project team approach for improved job efficiency, outlining a project team operation in which the office project administrator delegates to the greatest possible extent all those project administrative functions that can be done more efficiently in the field. The class also addresses the responsibilities and risks that a project administrative manager is likely to encounter. The course is suitable for students, engineering and design professionals, project managers, experienced contract administrators, and owners interested in the special administrative problems of engineering or construction.

ENCE626 Information Technologies for Project Managers (3 Credits)

Introduction to various information technology (IT) and automation-based solutions for project managers in capital project industries, including IT and automation tools for major life-cycle stages of a project: planning, design, fabrication/construction, operation, maintenance, retrofit and demolition/recycling. Both established and experimental approaches and tools will be covered. Building/Product Information Modeling software, sensing devices, field data acquisition and processing for project controls, status reporting, materials and equipment management, environmental monitoring, work-site safety and facility operations and management will be presented and analyzed. Web-based project management software solutions and applications for mobile devices such as tablets and smart phones will be featured in classroom presentations and materials provided to the students. Real project case studies from project-based firms will be used to illustrate the feasibility and usability of the tools presented in class. Students will be expected to acquire hands-on knowledge and experience with selected tools of particular interest in support of their future career paths.

Prerequisite: ENCE662.

ENCE627 Project Risk Management (3 Credits)

Introduction to identifying, analyzing, assessing, and managing risks inherent to engineering projects. Includes: probability modeling, choice and value theory, schedule and cost risk, risk mitigation and transfer, and contract considerations of project risk. Examples are drawn from construction, software development, systems integration, and other large engineering projects; and cover probability basics, subjective probability, statistical data analysis, introduction to decision theory, Monte Carlo simulation, value of information, and risk-based decision making.

Restriction: Must not have completed ENCE627.

ENCE630 Environmental and Water Resource Systems I (3 Credits)

Application of statistical and systems engineering techniques in the analysis of information necessary for the design or characterization of environmental or hydrologic processes; emphasis on the fundamental considerations that control the design of information collection programs, data interpretation, and the evolution of simulation models used to support the decision-making process.

ENCE631 Hydrologic Analysis and Nonpoint Pollution Models (3 Credits)

A detailed analysis of the physical processes controlling the spatial distribution of runoff and constituent transport during rainfall and snowmelt events. Emphasis is on developing an understanding of the processes and translating this understanding into practical models that can be used for runoff simulation, stormwater management, and environmental impact assessment.

ENCE632 Introduction to Infrastructure and Resilience (3 Credits)

Develops system-level skills for the planning, design, maintenance, and operation of resilient infrastructure systems. Through this course, we will discuss a variety of infrastructure systems, both public and private, and their role in communities before and after disasters. The themes of the course will be grounded in the four phases of emergency management (mitigation, preparedness, response, and recovery) and the role that infrastructure plays in each. Through these applications areas, we will study a variety of conceptual, analytical, and computational models that support informed decision-making for these systems under uncertainty.

Prerequisite: ENCE302; and ENCE360. Or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ENCE688U, ENCE632, ENCE489U or ENCE430.

Formerly: ENCE688U.

ENCE633 Assessment of Natural Hazards for Engineering Applications (3 Credits)

Ensuring the resilience of infrastructure and other engineered systems requires an assessment of the natural hazards to which the systems are exposed. Probabilistic natural hazard assessment evaluates how likely a location is to experience hazard events (e.g., hurricanes or earthquakes) and how likely those events are to cause various impacts (e.g., large surges, intense rainfall, high winds, or ground shaking). This course will review the basic science of natural hazards and provide the foundational concepts of probability and statistics required for developing models to assess the frequency and severity of natural hazards. This course will present methodologies for assessment of multiple types of natural hazards (e.g., seismic, precipitation, riverine, coastal, and wind hazards).

Prerequisite: ENCE302.

Jointly offered with: ENCE433.

Credit Only Granted for: ENCE633 or ENCE433.

ENCE635 Geographic Information Systems for Watershed Analysis (3 Credits)

Emphasis is on the use of GIS to support the analysis and modeling tasks associated with watershed planning and management. This course familiarizes the student with fundamentals of GIS data models, projections, and coordinate systems. Students develop a set of GIS-based algorithms solving common engineering problems in hydrology. Internet data sources and GPS technology are also covered.

Credit Only Granted for: ENCE524 or ENCE688Z.

Formerly: ENCE688Z.

ENCE637 Biological Principles of Environmental Engineering (3 Credits)

An examination of biological principles directly affecting man and his environment, with particular emphasis on microbiological interactions in environmental engineering related to air, water and land systems; microbiology and biochemistry of aerobic and anaerobic treatment processes for aqueous wastes.

ENCE640 Advanced Soil Mechanics (3 Credits)

Introduction to the use of elastic theory in stress and displacement solutions to geotechnical engineering (soil and rock mechanics). The effect of soil moisture (at rest) relative to effective stress principles, capillary and frost. Exact and numeric techniques for the analysis for soil seepage under isotropic and anisotropic conditions. Classical settlement (consolidation) and compressibility theories, including finite difference solution for vertical and radial drainage.

Prerequisite: ENCE340; or students who have taken courses with comparable content may contact the department.

ENCE641 Advanced Foundations Systems (3 Credits)

Review of soil properties and subsurface exploration, evaluation and design of shallow foundations, including settlement and bearing capacity of spread footings and mats. Discussion of methods of soil improvement. Analysis and design of deep foundations including single pile, pile load testing, pile group actions, and drilled shaft foundations for both vertical and horizontal loads. Load and resistance factor design concepts will be presented.

Prerequisite: ENCE340; or students who have taken courses with comparable content may contact the department.

ENCE644 Advanced Pavement and Civil Engineering Materials (3 Credits)

Advanced course in Highway and Civil Engineering Materials. Dynamic Material Characterization. Elastic, Plastic and Viscoelastic Behavior. Energy Analysis. Physical and Mechanical Properties. NDT. Performance: Creep, Fatigue, Durability, other. Recent developments in Aggregate Evaluation, Portland Cement Concrete, High Performance Concrete, Conventional and Modified Asphalt Binders and Mixtures, Polymers & Composites, Geotextiles, Smart and Self Healing Materials, Recycled and Reclaimed Materials.

Prerequisite: ENCE300.

Credit Only Granted for: ENCE644 or ENCE688P.

Formerly: ENCE688P.

ENCE645 Geotechnics of Waste Disposal (3 Credits)

Fundamental aspects of geotechnical engineering that apply to problems of waste containment and remediation, basic principles of containment systems, compacted clay liners and clay mineralogy, hydraulic conductivity of compacted soils, methods of laboratory and field hydraulic conductivity measurements, design of waste containment systems, landfill stability and settlement, geosynthetic liners, waste compatibility, contaminant transport through liners, leachate collection systems, gas collection systems, covers and caps.

Credit Only Granted for: ENCE489X, ENCE645, or ENCE688X.

Formerly: ENCE688X.

ENCE647 Slope Stability and Seepage (3 Credits)

Theoretical and practical aspects of seepage effects, and groundwater flow, review of shear strength principles, flow through porous media, hydraulic conductivity, flow nets, determination of water pressure, seepage forces and quantity of seepage, laboratory and field tests for shear strength, infinite slopes, block analysis, method of slices, seismic analysis of slopes, effective and total stress analysis, computer program for slope stability analysis, slope stability problems in waste disposal, construction excavations, reinforced embankments, embankments on soft ground.

Prerequisite: ENCE340.

Credit Only Granted for: ENCE489A, ENCE647, or ENCE688A.

Formerly: ENCE688A.

ENCE650 Process Dynamics in Environmental Systems (3 Credits)

The fundamentals of heterogeneous equilibria, rates of environmental reactions, and flow and material transport are presented. Applications of these principles will be presented to small and large scale environmental problems involving liquid, gas, and solid phases. Both natural and engineered environmental systems will be examined.

Formerly: ENCE636.

ENCE651 Chemistry of Natural Waters (3 Credits)

Application of principles from chemical thermodynamics and kinetics to the study and interpretation of the chemical composition of natural waters is rationalized by considering metal ion solubility controls, pH, carbonate equilibria, adsorption reactions, redox reactions and the kinetics of oxygenation reactions which occur in natural water environments.

Credit Only Granted for: ENCE633 or ENCE651.

Formerly: ENCE633.

ENCE652 Microbiological Principles of Environmental Engineering (3 Credits)

An examination of microbiological principles directly affecting humans and the surrounding environment. Special emphasis is given to the understanding of microbial physiology and in environmental engineering related to water and land systems including aerobic and anaerobic treatment processes involved in nutrient/waste recycling as well as impact of xenobiotic compounds on processes water, soil and sediment.

Credit Only Granted for: ENCE637 or ENCE652.

Formerly: ENCE637.

ENCE655 Environmental Behavior of Organic Pollutants (3 Credits)

Introduction to the scientific data needed and methods currently available to assess the environmental risk of organic chemicals. Applications of principles from chemical thermodynamics will be used to study phase-transfer processes of organic pollutants in the environment (solid/water, solid/air, water/air). Physical-chemical properties of organic pollutants will be used to estimate partitioning.

Prerequisite: ENCE651.

ENCE660 Principles of Disaster Management (3 Credits)

Covers the complexities and unique requirements that arise in preparing for, responding to, recovering from and mitigating against natural disasters. It focuses on what the Manager should know to handle pre- and post-disaster projects. The course introduces underlying policies, programs and emergency management protocols related to managing natural disasters. It translates the lexicons of emergency management to align with project management tools and processes. The course also explores the challenges of executing and delivering projects and programs during each phase of the emergency management cycle. The student will learn to build disaster-resilient concepts and emergency management into project management processes and be better equipped to contribute to a more sustainable and disaster-resilience future.

ENCE661 Project Cost Accounting and Finance (3 Credits)

This course reviews the fundamentals of accounting; examines project cost accounting principles, applications, and impact on profitability; examines the principles of activity based costing; covers the elements involved in cash management; introduces the framework for how projects are financed and the potential impact financing has on the projects; and a framework for evaluating PC based systems and what resources are needed for an effective project cost system.

ENCE662 Introduction to Project Management (3 Credits)

Introduction to project management including: overview and concepts of project management (principles, body of knowledge, strategies); planning successful projects (defining, specifying, delivery options, scheduling, budgeting); implementing (organizing the team, work assignments, team building, effective leadership); executing (performance measurement, maintaining the schedule, adjustments/mid-course corrections, record keeping, status reporting, communications, managing conflict, time management); and closeout (performance measurement, maintaining the schedule, adjustments/mid-course corrections, record keeping, status reporting, communications, managing conflict, time management).

ENCE664 Legal Aspects of Engineering Design and Construction (3 Credits)

Examines ways in which the legal system affects the design and construction process. Focuses on contract types and the relationships between the parties in different delivery systems. Covers basics of procurement protocols along with negotiating techniques and strategies. Topics include contract law, the relationships between the parties, tort and negligence law, and the statutory principles affecting construction.

ENCE665 Management of Project Teams (3 Credits)

Experience has shown that really excellent project managers are not only technically competent but that they have above average skills in human relations and communications. The course will prepare project managers to optimize the utilization of their most important resource: people. Relying primarily on a wide range of research and experience in the Project Team, this course will help guide project managers in building the other skills needed to be truly successful in the competitive Project Team.

ENCE666 Cost Engineering and Control (3 Credits)

Analytical techniques to estimate and control project costs, including site investigation, quantity takeoff, work analysis, and bid preparation. Systematic cost control as related to job production and historical data. Includes the fundamentals of different types of cost estimating, the appropriate use of each, and examination of popular software. This course is designed to help students develop the ability to utilize techniques of cost estimating, cost and schedule control and project management as they apply to engineering and construction work. Students will understand why it is crucial to understand the various types of cost estimating and the appropriate use of each, activity-based costing, conceptual estimating and budgeting, unit cost estimating, parametric estimating, detailed estimating, learning curves and progress functions.

ENCE670 Highway Traffic Characteristics and Measurements (3 Credits)

The study of the fundamental traits and behavior patterns of road users and their vehicles in traffic. The basic characteristics of the pedestrian, the driver, the vehicle, traffic volume and speed, stream flow and intersection operation, parking, and accidents.

ENCE672 Regional Transportation Planning (3 Credits)

Factors involved and the components of the process for planning statewide and regional transportation systems, encompassing all modes. Transportation planning studies, statewide traffic models, investment models, programming and scheduling.

ENCE673 Urban Transportation (3 Credits)

The contemporary methodology of urban transportation planning. The urban transportation planning process, interdependence between the urban transportation system and the activity system, urban travel demand models, evaluation of urban transportation alternatives and their implementation.

ENCE674 Urban Transit Planning and Rail Transportation Engineering (3 Credits)

Basic engineering components of conventional and high speed railroads and of air cushion and other high speed new technology. The study of urban rail and bus transit. The characteristics of the vehicle, the supporting way, and the terminal requirements will be evaluated with respect to system performance, capacity, cost, and level of service.

ENCE675 Airport Planning and Design (3 Credits)

The planning and design of airports including site selection, runway configuration, geometric and structural design of the landing area, and terminal facilities. Methods of financing airports, estimates of aeronautical demand, air traffic control, and airport lighting are also studied.

ENCE676 Highway Traffic Flow Theory (3 Credits)

An examination of physical and statistical laws that are used to represent traffic flow phenomena. Deterministic models including heat flow, fluid flow, and energy-momentum analogies, car following models, and acceleration noise. Stochastic approaches using independent and Markov processes, Queuing models, and probability distributions.

ENCE677 OR Models for Transportation Systems Analysis (3 Credits)

Fundamental skills and concepts of the quantitative techniques of operations research including: mathematical modeling, linear programming, integer programming, network optimization (shortest paths, minimum spanning trees, minimum cost network flows, maximum flows), heuristics, and basics of probabilistic modeling. Emphasis on the application of these techniques to problems arising in transportation.

ENCE681 Freight Transportation Analysis (3 Credits)

Application of operations research and system analysis methods to freight transportation systems. Cost and output analysis, terminal location, freight transportation demand models, freight transportation network equilibrium models and analytic models for analyzing the operations of rail, motor carrier, water carrier and air cargo systems.

ENCE688 Advanced Topics in Civil Engineering (1-3 Credits)

Advanced topics selected by the faculty from the current literature of civil engineering to suit the needs and background of students. May be taken for repeated credit when identified by topic title.

ENCE689 Seminar (1-16 Credits)**ENCE710 Steel Structures I (3 Credits)**

Moment connections of beams and columns. Wind bracing connections. Plate girders. Floor systems for buildings. Strengthening of beams and trusses. Corrosion control. Fatigue and fracture.

Formerly: ENCE656.

ENCE713 Concrete Structures I (3 Credits)

The behavior and strength of reinforced concrete members under combined loadings, including the effects of creep, shrinkage and temperature. Mechanisms of shear resistance and design procedures for bond, shear and diagonal tension. Elastic and ultimate strength analysis and design of slabs. Columns in multistory frames. Applications to reinforced concrete structures.

Formerly: ENCE753.

ENCE715 Earthquake Engineering (3 Credits)

Review of SDOF and MDOF structural dynamics; characteristics of earthquakes; philosophies of seismic design; elastic and inelastic response spectra; design for ductility; principles of capacity design; design of structural systems requiring special performance criteria.

Restriction: Permission of instructor.

Formerly: ENCE755.

ENCE717 Bridge Structures (3 Credits)

The design and rating of bridge structures in accordance with the AASHTO WSD, LFD, ALFD, and LRFD specifications. Development of the basic strength and performance requirements as defined within AASHTO, area and various foreign codes. Projects requiring the design, rating and ultimate strength evaluations will be assigned for all of the predominate construction types including: simple and continuous span, straight and horizontally curved, non-composite and composite w and box section superstructure elements.

Formerly: ENCE751.

ENCE718 Advanced Structural Systems (3 Credits)

Review of classical determinate and indeterminate analysis technique; multistory buildings; space structures; suspension bridges and cables structures; arches; long span bridges.

Formerly: ENCE750.

ENCE721 Investment Theory for Project Engineers (3 Credits)

An introductory course covering investment theory and its application to project evaluation and selection. Selected topics include: basic theory of interest and fixed income securities; portfolio selection and modification; capital asset pricing; asset price dynamics; derivative securities; and project evaluation using real options.

Credit Only Granted for: ENCE652 or ENCE721.

Formerly: ENCE652.

ENCE722 Market, Spatial, and Traffic Equilibrium Models in Project Management (3 Credits)

Introduction to equilibrium models involving economics and engineering. Topics include: review of relevant optimization theory; the nonlinear complementary problem (NCP) and variational inequality problem formats to solve equilibrium problems; review of relevant game theory, equilibrium models, and algorithms.

Credit Only Granted for: ENCE654, ENCE688M, or ENCE722.

Formerly: ENCE654.

ENCE725 Probabilistic Optimization (3 Credits)

Provide an introduction to optimization under uncertainty. Chance-constrained programming, reliability programming, value of information, two stage problems with recourse, decomposition methods, nonlinear and linear programming theory, probability theory. The objectives of this course are to provide understanding for studying problems that involve optimization under uncertainty, learn about various stochastic programming formulations (chance constrained programs, two stage methods with recourse, etc.) relevant to engineering and economic settings, present theory for solutions to such problems, and present algorithms to solve these problems. Cross-listed with ENME725.

Credit Only Granted for: ENME725 or ENCE725.

ENCE730 Environmental and Water Resource Systems II (3 Credits)

Advanced topics in operational research. Applications to complex environmental and water resource systems. The use of systems simulation and probabilistic modeling.

Prerequisite: ENCE630; or permission of instructor.

ENCE741 Earth Retaining Structures (3 Credits)

Introduction to types and uses of earth retaining structures, and lateral earth pressure concepts and theories. Analysis and design of retaining walls and shoring structures and their bracing systems. These include conventional retaining walls, mechanically stabilized earth walls, cantilever and anchored sheet piling, cellular cofferdams, braced cuts, soil nailing, and the design of tiebacks and anchors. Load and resistance factor design concept will be presented.

ENCE743 Soil Dynamics and Earthquake Engineering (3 Credits)

Review of theory of vibration and wave propagation in elastic media. Field and laboratory methods for determining dynamic soil properties. Analysis and design of soil-foundation systems subjected to machinery generated vibrations and methods of foundation isolation. Earthquake causes, magnitude and intensity, seismic hazard evaluation, NEHRP site classification, site response analyses and ground motion amplification, liquefaction and response of earth structures.

Credit Only Granted for: ENCE642 or ENCE743.

Formerly: ENCE642.

ENCE744 QA/QC and Specification for Highway Materials (3 Credits)

Factorial Experiments and Analysis. Materials Variability Components: Inherent and Testing Variability. Quality Control/Quality Assurance: Analysis Methods, Assurance Plans and Components. Specifications for Asphalt and Concrete Materials: Method, End-Result, Performance Based. Life Cycle Analysis and Performance Modeling Techniques. Use of Advanced Statistical Analysis for Material Properties Monitoring and Performance Predictions: ANOVA, Time Series, Spatial Data Analysis. Advanced Highway Materials including Polymer Modified and High Performance Asphalt and Concrete.

Prerequisite: ENCE300.

ENCE751 Chemistry of Natural Waters II (3 Credits)

A continuation of ENCE651, introducing aquatic chemical kinetics and chemistry of the solid-water interface.

Prerequisite: ENCE650 and ENCE651.

ENCE799 Master's Thesis Research (1-6 Credits)**ENCE898 Pre-Candidacy Research (1-8 Credits)****ENCE899 Doctoral Dissertation Research (1-8 Credits)**

ENCH - Engineering, Chemical

ENEE - Electrical & Computer Engineering

ENEE407 Design & Testing of RF and Microwave Devices (2 Credits)

An introduction to state of the art design, and testing techniques of RF and microwave devices. Designs, simulations and layout of different devices are performed using the software package ADS (Advanced Design System). The course highlights a wide range of engineering applications including terrestrial microwave links, satellite communications, broadcasting, mobile communications and radar.

Prerequisite: Minimum grade of C- in ENEE381; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE408 Capstone Design Project (3 Credits)

Culmination of prior course work in electrical and computer engineering. Utilization of modern design tools and methodologies for the design of components or systems under realistic constraints, with particular emphasis on teamwork and oral/written communication. Areas in which projects are currently offered include: microprocessor-based systems, digital systems, VLSI design (both digital and mixed-signal), and optical systems.

Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 6 credits if content differs.

ENEE411 Advanced Analog and Digital Electronics (3 Credits)

Examination of analog and digital device models for analysis, design, and simulation of transistor level electronic circuits, emphasizing Metal Oxide Silicon Field Effect Transistors (MOSFETs); fundamental single transistor configurations; frequency response, feedback, and stability of multi-transistor circuits, such as current mirrors, differential amplifiers, voltage references, operational amplifiers and data converters; complementary Metal Oxide Silicon (CMOS) implementations of static and clocked digital as well as mixed signal circuits.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and must have permission of the department.

ENEE413 Advanced Electronic Devices (3 Credits)

Advanced devices and their physical operation, providing a thorough description of those parts not usually covered in introductory electronics courses. These include Schottky and tunnel junctions, negative resistance devices used in wireless communication, homo-structure compound semiconductor transistors, hetero-structure (quantum effect) transistors, non-volatile memory devices, photonic devices such as LEDs and solid-state lasers, solar cells, photo-detectors and camera imagers, as well as bio-related components. Special consideration will be given to achieve an understanding of noise processes that limit electronic device performance. In all cases, system-level applications will be illustrated.

Prerequisite: Minimum grade of C- in ENEE313 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE415 Advanced Manufacturing Laboratory (3 Credits)

An interdisciplinary course designed to provide students with an overview of key processes, technology, and manufacturing techniques involved in fabricating advanced devices and systems. Students will be exposed to state-of-the-art fabrication technologies, including soft lithography, 3D printing, hybrid manufacturing, material functionalization, and systems integration. In addition to developing a theoretical understanding in the classroom, students will gain hands-on fabrication and characterization experience of systems that can interface with complex environments.

Prerequisite: ENEE313 or ENEE304.

Restriction: Must be in the Department of Electrical and Computer Engineering.

Credit Only Granted for: ENEE415, ENEE419M, ENMA489M, or BIOE489J..
Formerly: ENEE419M.

ENEE416 Integrated Circuit Fabrication Laboratory (3 Credits)

Characterization of wafers and fabrication steps. Oxide growth, lithography, dopant diffusion, and metal deposition and patterning will be discussed in the lectures and carried out in the lab in fabricating NMOS transistor circuits. The transistor characteristics will be measured and related to the fabrication parameters.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE417 Microelectronics Design Laboratory (2 Credits)

Students design and build fairly sophisticated circuits, mainly composed of discrete transistors and integrated circuits. Many of the projects are designed to require that students synthesize from what they have learned in many of the disciplines in electrical engineering. Students learn they can actually use their knowledge to build something very practical, which may include a high-fidelity amplifier, a radio, a memory cell, a transmitter, etc.

Prerequisite: Minimum grade of C- in ENEE303; and minimum grade of C- in ENEE307; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE419 Topics in Microelectronics (1-3 Credits)

Selected topics of current importance in microelectronics.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Repeatable to: 99 credits if content differs.

ENEE420 Communication Systems (3 Credits)

Fourier series, Fourier transforms and linear system analysis; random signals, autocorrelation functions and power spectral densities; analog communication systems: amplitude modulation, single-sideband modulation, frequency and phase modulation, sampling theorem and pulse-amplitude modulation; digital communication systems pulse-code modulation, phase-shift keying, differential phase shift keying, frequency shift keying; performance of analog and digital communication systems in the presence of noise.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323; and minimum grade of C- in ENEE324; and completion of all lower-division technical courses in the Electrical Engineering curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE425 Digital Signal Processing (3 Credits)

Sampling as a modulation process; aliasing; the sampling theorem; the Z-transform and discrete-time system analysis; direct and computer-aided design of recursive and nonrecursive digital filters; the Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT); digital filtering using the FFT; analog-to-digital and digital-to-analog conversion; effects of quantization and finite-word-length arithmetic.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE426 Communication Networks (3 Credits)

The main design issues associated with computer networks, satellite systems, radio nets, and general communication networks. Application of analytical tools of queuing theory to design problems in such networks. Review of proposed architectures and protocols.

Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in Engineering: Computer or Engineering: Electrical program.

Credit Only Granted for: CMSC417 or ENEE426.

ENEE428 Communications Design Laboratory (2 Credits)

Advanced Laboratory course exploring signal processing and communication systems theoretical concepts and implementing them on actual DSP based hardware in real time.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323; and minimum grade of C- in ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.

Recommended: ENEE420 and ENEE425.

Restriction: Must be in Engineering: Electrical or Engineering: Computer program; and permission of Electrical and Computing Engineering Department.

ENEE429 Topics in Communications (1-3 Credits)

Selected topics of current importance in communications.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Repeatable to: 99 credits if content differs.

ENEE436 Foundations of Machine Learning (3 Credits)

A broad introduction to the foundations of Machine Learning (ML), as well as hands-on experience in applying ML algorithms to real-world data sets. Topics include various techniques in supervised and unsupervised learning, as well as applications to computer vision, data mining, and speech recognition.

Prerequisite: 1 course with a minimum grade of C- from (ENEE324, STAT400); and 1 course with a minimum grade of C- from (ENEE150, CMSC216); and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Permission of ENGR-Electrical & Computer Engineering department. And must be in one of the following programs (Engineering: Electrical; Engineering: Computer); or must be in the ECE Department's Machine Learning notation program.

Credit Only Granted for: ENEE436, ENEE439M, or CMSC422.

Formerly: ENEE439M.

ENEE439 Topics in Signal Processing (1-3 Credits)

Selected topics of current importance in signal processing.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE440 Microprocessors (3 Credits)

Microprocessor architectures, instruction sets, and applications. Bus structures, memory, I/O interfacing. Assembly language programming, LSI device configuration, and the embedding of microprocessors in systems.

Prerequisite: ENEE350; and completion of all lower division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE445 Computer Laboratory (2 Credits)

This laboratory course focuses on the hardware/software interface in computer systems. Hands-on experiments are used to teach design, construction, analysis, and measurement of both hardware and software for embedded systems. Projects emphasize using microcontrollers for control, sensing, and communication through various I/O devices.

Prerequisite: Minimum grade of C- in ENEE205 and ENEE350.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical); and permission of ENGR-Electrical & Computer Engineering department.

ENEE446 Digital Computer Design (3 Credits)

Hardware design of digital computers. Arithmetic and logic units, adders, multipliers and dividers. Floating-point arithmetic units. Bus and register structures. Control units, both hardwired and microprogrammed. Index registers, stacks, and other addressing schemes. Interrupts, DMA and interfacing.

Prerequisite: ENEE350; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE446 or CMSC411.

ENEE447 Operating Systems (4 Credits)

The course will present the theory, design, implementation and analysis of computer operating systems. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and protection and security in operating systems. Optional topics may include communications protocols, computer security, and real-time operating systems. The lectures will be complemented with a significant level of programming, bringing up a simple operating system from scratch, concurrently as the topics are discussed in lecture. A weekly recitation section will provide TA support and an informal laboratory atmosphere. Each student will have their own board, so development will be done largely outside the classroom at each student's pace.

Prerequisite: 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457); and permission of ENGR-Electrical & Computer Engineering department; and (ENEE350, CMSC330, and CMSC351).

Restriction: Must be in Engineering: Computer program; and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE447 or CMSC412.

ENEE452 Embedded Systems (3 Credits)

Embedded systems are part of most of the modern technological systems such as Industrial machines, consumer electronics, agricultural and process industry devices, automobiles, medical equipment, cameras, household appliances, airplanes, vending machines and toys, as well as mobile devices. Embedded systems are comprised of hardware, software and firmware. Design Methodologies and platforms for real time modern embedded digital systems have been evolving over time. In order to meet the system specifications, many models, tools, and operating systems exist to automate the design space exploration phase. In this course, students will be introduced to microcontroller-based embedded system design, fundamental concepts of a Real Time Operating System (RTOS), and the design of solutions for the Internet of Things (IOT). Using hands-on experience developed through practical designs, exercises, and projects, we will discuss in detail how to analyze, implement, and synthesize these systems.

Prerequisite: Minimum grade of C- in ENEE350 and ENEE244; and minimum grade of C- in ENEE150 or CMSC216.

Restriction: Permission of the Electrical and Computer Engineering Department; and must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Credit Only Granted for: ENEE452 or ENEE459V.

Formerly: ENEE459V.

ENEE456 Cryptography (3 Credits)

The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.

Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor .

Cross-listed with: MATH456, CMSC456.

Credit Only Granted for: MATH456, CMSC456 or ENEE456.

ENEE457 Computer Systems Security (3 Credits)

Theoretical and practical aspects of computer systems security. Topics covered include symmetric/asymmetric encryption, message authentication, digital signatures, access control, as well as network security, web security and cloud security. Students acquire tools necessary for designing secure computer systems and programs and for defending against malicious threats (e.g., viruses, worms, denial of service).

Prerequisite: Minimum grade of C- in ENEE350; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: CMSC414 or ENEE457.

ENEE459 Topics in Computer Engineering (1-3 Credits)

Selected topics of current importance in computer engineering.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE460 Control Systems (3 Credits)

Mathematical models for control system components. Transform and time domain methods for linear control systems. Introductory stability theory. Root locus, bode diagrams and Nyquist plots. Design specifications in the time and frequency domains. Compensation design in the time and frequency domain. Introduction to sampled data systems.

Prerequisite: ENEE322; and (ENEE290, MATH240, or MATH461); and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE461 Control Systems Laboratory (3 Credits)

Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control and familiarize them with the characteristics and limitations of real control devices. They will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.

Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical); and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE461, ENME461, or ENME489N.

ENEE463 Digital Control Systems (3 Credits)

Introduction to techniques for the analysis and design of linear control systems and implementation of control systems using digital technology. Topics include linearization, solution of linear equations, z-transforms and Laplace transforms, design of linear controllers, optimal control, and digital implementation of control designs. Students will use MATLAB for the solution of problems and the design of control systems.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE464 Introduction to Optimization (3 Credits)

Students will be introduced to linear, nonlinear, unconstrained, constrained optimization. Convex optimization will be highlighted. Applications will be considered, in particular in the area of machine learning. Some optimization algorithms may be discussed, time permitting.

Prerequisite: One of the following: ENEE290, MATH240, MATH341, or MATH461; and must have completed or be concurrently enrolled in ENEE324 or STAT400.

Recommended: Experience in Matlab or Python.

Restriction: Must be in the Department of Electrical and Computer Engineering.

Credit Only Granted for: ENEE464 or ENEE4690.

Formerly: ENEE4690.

ENEE467 Robotics Project Laboratory (3 Credits)

Teaches practical skills to build, control, and deploy robotic systems. Interdisciplinary groups of students develop real-world robotic systems, with emphasis on making a real robot do what one wants it to do.

Prerequisite: Minimum grade of C- in ENAE450.

Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Department of Electrical and Computer Engineering.

ENEE469 Topics in Controls (1-3 Credits)

Selected topics of current importance in controls.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Repeatable to: 99 credits if content differs.

ENEE473 Electrical Machines Laboratory (2 Credits)

Students will learn theory and measurement methods of passive power components, multi-phase AC power, single and three-phase transformers, single and three-phase induction machines, three-phase synchronous machines, and DC machines. Each of these topics is addressed in one or more laboratory exercises.

Prerequisite: Minimum grade of C- in ENEE205; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses.

Recommended: ENEE322 or ENEE323.

Restriction: Permission of the Electrical and Computer Engineering Department.

ENEE474 Power Systems (3 Credits)

Interconnected power systems, transmission lines, load flow studies, unit commitment and economic dispatch. Three phase networks, machine models. Symmetrical components, fault analysis and unbalanced operation. Power system transients, stability and numerical methods in power system analysis.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE475 Power Electronics (3 Credits)

This course is suitable for undergraduate and graduate students who want to learn the basic principles of power electronics and its applications. Special emphasis is placed on the interdisciplinary nature of power electronics. Strong and intimate connections between power electronics and circuit theory, electronic circuits, semiconductor devices, electric power, magnetic, motor drives and control are stressed.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer); and permission of ENGR-Electrical & Computer Engineering department.

ENEE476 Renewable Energy (3 Credits)

Solar Energy Conversion Systems: History of Photovoltaic (PV) Systems, PV Cell, Module and Array Models and Equivalent Circuits, Characteristic Resistance, Fill Factor, Effects of Parasitic Resistances, Mismatch Effects, Shading, Bypass Diodes, Sun Tracking Systems, Maximum Power Point Tracking (MPPT) Techniques, Isolated and Non-isolated Switch-mode DC/DC for PV Systems, Inverter Design and Control, Sizing the PV Panel and Battery Pack in PV Applications. Wind Energy Conversion Systems: Introduction to Wind Energy Harvesting, Horizontal and Vertical Wind Systems, Fundamentals of Wind Energy Harvesting Systems, Variable Speed and Fixed Speed Wind Energy Conversion Systems (WECS), Wind Turbines and Different Electrical Machines in Wind Applications, Induction Machine and Dynamic Model of Induction Machines, Synchronous Generators and Dynamic Model of SG, Control of Wind Energy Conversion Systems.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE484 Optoelectronic Devices (3 Credits)

Explores the fundamental physics of optoelectronic devices including lasers, solar cells, LEDs, and photodetectors. We aim at an understanding of the fundamental principles on device physics, material considerations, and significant components of optoelectronic devices. State-of-the-art device configurations and material choices in industry and academia will be discussed.

Recommended: A background in semiconductors and P-N junctions.

Restriction: Permission of the Electrical and Computer Engineering Department.

Credit Only Granted for: ENEE484 or ENEE489I.

Formerly: ENEE489I.

ENEE486 Optoelectronics Lab (2 Credits)

Hands-on experience in performing measurements in optics and electro-optics. Basics of optics, light detectors, Fourier optics, gratings and spectrometers, pulsed dye lasers, fiber optics, electro-optics, and acousto-optics.

Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in PHYS271 and PHYS270; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE488 Independent Study in Electrical and Computer Engineering (1-3 Credits)

The purpose is to provide students with an opportunity for independent study projects on advanced electrical and computer engineering topics. These projects typically involve academic investigations of technical themes that are not addressed in the established elective and special topics courses taught by the department on a regular basis. Study plans are tailored to students educational goals but are approved and supervised by faculty.

Prerequisite: Must have completed and earned a minimum grade of regular (letter) C- in all lower-division EE or CP tech electives; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 9 credits if content differs.

Additional Information: A total of 5 credits combined of ENEE488 and ENEE499 can count towards a degree in electrical and computer engineering.

ENEE489 Topics in Electrophysics (1-3 Credits)

Selected topics of current importance in electrophysics.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE490 Physical Principles of Wireless Communications (3 Credits)

This course is intended to give students an overall understanding of the physical phenomena involved in wireless communications and to allow them to make first-cut designs. Major topics covered include antennas, antenna arrays, radiowave scattering and propagation, noise sources in communications systems, cell phone systems and satcom.

Prerequisite: ENEE381.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE491 Quantum Phenomena in Electrical Engineering (3 Credits)

Wave phenomena, wave-particle duality and laws of quantum mechanics. States, observables, operators and measurement, as applied to simple quantum circuits, information transmission and quantum key distribution. Also, covered: Schrodinger's equation, bound states, tunneling, scattering, periodic potentials, superconductivity and Josephson junctions.

Prerequisite: Minimum grade of C- in PHYS270, ENEE205 and (ENEE290 or MATH461).

Restriction: Permission of Electrical and Computer Engineering Department.

Credit Only Granted for: ENEE491 or ENEE489Q.

Formerly: ENEE489Q.

ENEE492 Introduction to Quantum Technology (3 Credits)

Investigates the basic concepts/building blocks of quantum computers, quantum key distribution, quantum networks, and quantum sensors. Examines what is needed to form a working qubit and different hardware platforms that implement them (for example, trapped ions, superconducting microwave circuits, color centers, and neutral atoms.) Conceptual and computational familiarity with complex numbers, vector spaces, bases, matrices, eigenvectors, and eigenvalues will be assumed, as well as quantum states/wave functions, and quantum measurement. Familiarity with spin-1/2 systems, and Pauli matrices is highly recommended.

Prerequisite: MATH141 and MATH240 or equivalent; and one of the following: PHYS360, PHYS401, PHYS457, or ENEE491; or permission of instructor.

Cross-listed with: PHYS467.

Credit Only Granted for: PHYS467 or ENEE492.

ENEE496 Lasers and Electro-optic Devices (3 Credits)

Modern physical optics: Gaussian beams, optical resonators, optical waveguides; theory of laser oscillation, rate equations; common laser systems. Selected modern optoelectronic devices like detectors and modulators. Role of lasers and optoelectronics in modern technology.

Prerequisite: ENEE381; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE498 Topics in Electrical Engineering (1-3 Credits)

Selected topics of current importance in electrical engineering.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in Engineering: Electrical program.

Repeatable to: 12 credits if content differs.

ENEE499 Senior Projects in Electrical and Computer Engineering (1-6 Credits)

The purpose is to provide students with an opportunity to engage in independent research projects on advanced electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 499 project, the focus is to conduct an independent investigation of a technical theme by the student. The project may be used to satisfy the advanced lab requirement if it is approved as a primarily experimental research project. In that case, the student will enroll in ENEE499L.

Prerequisite: Completion of all lower-division technical courses in the electrical or computer engineering curriculum.

Restriction: Permission of ENGR-Electrical & Computer Engineering department.

Repeatable to: 6 credits if content differs.

Additional Information: For students in the ECE Honors Program, a total of 6 credits combined of ENEE488 and ENEE499/499L can count toward a degree in electrical or computer engineering. For non-honors ECE students, a total of 5 credits combined of ENEE488 and ENEE499/499L can count toward a degree in electrical or computer engineering.

ENEE600 Solid State Electronics (3 Credits)

Properties of crystals; energy bands: electron transport theory; conductivity and hall effect; statistical distributions; fermi level: impurities; non-equilibrium carrier distributions; normal modes of lattice vibration and thermal properties of crystals; tunneling phenomena; surface properties.

Prerequisite: ENEE413; and must have background in elementary quantum mechanics.

Credit Only Granted for: ENEE600 or ENEE793.

Formerly: ENEE793.

ENEE601 Semiconductor Devices and Technology (3 Credits)

The principles, structures and characteristics of semiconductor devices. Technology and fabrication of semiconductor devices.

Recommended: ENEE413 and ENEE600.

Credit Only Granted for: ENEE601 or ENEE697.

Formerly: ENEE697.

ENEE605 Design and Fabrication of Micro-Electro-Mechanical Systems (MEMS) (3 Credits)

The goals are to explore the world of Micro-Electro-Mechanical Systems (MEMS) by understanding its design and fabrication aspects.

Credit Only Granted for: ENEE605 or ENEE719R.

Formerly: ENEE719R.

ENEE610 Electrical Network Theory (3 Credits)

Matrix algebra, network elements, ports, passivity and activity, geometrical and analytical descriptions of networks, state variable characterizations, scattering matrices, signal flow graphs, sensitivity.

Prerequisite: Must have completed undergraduate-level Circuit Theory; or permission of instructor.

ENEE611 Integrated Circuit Design and Analysis (3 Credits)

Active and passive elements used in semiconductor structures. Design application of linear and digital integrated circuits.

Recommended: ENEE610.

Credit Only Granted for: ENEE611 or ENEE696.

Formerly: ENEE696.

ENEE612 Advanced Power Electronics (3 Credits)

Advanced power electronic converters, techniques to model and control switching circuits, pulse width modulation, resonant switch converters, resonant DC-link converters, series and parallel loaded resonant (SLR, PLR) DC-DC converters, zero voltage switching clamped-voltage (ZVS-CV) converters, ZVS resonant-switch DC-DC converters are explained. In addition, this course deals with small-signal and large-signal modeling and control of switched mode power converters, sliding-mode operation, state space models, generalized state-space averaging, and feedback linearization techniques. Multiple-input converters and their operational principles are explained. Furthermore, practical design procedures for type II and type III compensators with voltage-mode error-amplifier for DC/DC converters are explained.

Prerequisite: ENEE303, ENEE475, or ENEE476; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ENEE719B or ENEE612.

Formerly: ENEE719B.

ENEE614 Radio Frequency VLSI Circuit Design (3 Credits)

This course will give students the knowledge required to analyze, design and lay-out discrete and integrated circuits used in modern radio frequency communications. The course will focus on advanced amplifier concepts, frequency conversion, tuning, and low-noise techniques. Implementation of AM, FM and digital modulation techniques will be covered. Emphasis will be given to CMOS technology as applied to analog VLSI. Advanced applications of SPICE and VLSI design layout tools will be covered.

Recommended: ENEE611.

ENEE620 Random Processes in Communication and Control (3 Credits)

Introduction to random processes: characterization, classification, representation; Gaussian and other examples. Linear operations on random processes, stationary processes: covariance function and spectral density. Linear least square waveform estimating Wiener-Kolmogoroff filtering, Kalman-Bucy recursive filtering: function space characterization, non-linear operations on random processes.

Prerequisite: ENEE324; or students who have taken courses with comparable content may contact the department.

ENEE621 Estimation and Detection Theory (3 Credits)

Estimation of unknown parameters, Cramer-Rao lower bound; optimum (map) demodulation; filtering, amplitude and angle modulation, comparison with conventional systems; statistical decision theory Bayes, minimax, Neyman/Pearson, Criteria-68 simple and composite hypotheses; application to coherent and incoherent signal detection; M-ary hypotheses; application to uncoded and coded digital communication systems.

Prerequisite: ENEE620; or students who have taken courses with comparable content may contact the department.

ENEE623 Digital Communications (3 Credits)

Review of sampling and quantization, functional characterization of digital signals and transmission facilities, band-limited signals and systems. Digital modulation/demodulation techniques, error probability, intersymbol interference and its effects, adaptive equalization. Signaling with coded waveforms, fading and satellite channels, multiple access problems and protocols. Introduction to spread-spectrum Communications.

Recommended: ENEE420.

ENEE625 Multi-user Communication (3 Credits)

Basic queueing models. Store-and forward communications networks; switching modes; delay-throughput measures; capacity assignment; routing; topological design; computational aspects; flow control; error control; protocols; specification and validation; local networks; satellite and packet radio systems; multiple access schemes; stability and performance; multi-user information theory; and large scale system theory.

Prerequisite: ENEE620.

ENEE626 Error Correcting Codes (3 Credits)

Introduction to linear codes; bounds on the error correction capabilities of codes; convolutional codes with threshold, sequential and viterbi decoding; cyclic random error correcting codes; P-N sequences; cyclic and convolutional burst error correcting codes.

Prerequisite: ENEE420; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ENEE626 or ENEE722.

Formerly: ENEE722.

ENEE627 Information Theory (3 Credits)

Information measures and their properties; entropy, relative entropy and mutual information. Information source models. Lossless data compression: the Kraft inequality, Shannon-Fano and Huffman codes. Typical sequences, asymptotic equipartition property, lossy source coding. Discrete memoryless channels: capacity, channel coding theorem. The additive Gaussian channel. Source coding under a fidelity constraint: rate distortion function and rate distortion theorem.

Prerequisite: ENEE620.

Credit Only Granted for: ENEE627 or ENEE721.

Formerly: ENEE721.

ENEE630 Advanced Digital Signal Processing (3 Credits)

This is the first-year graduate course in signal processing. The objective is to establish fundamental concepts of signal processing on multirate processing, parametric modeling, linear prediction theory, modern spectral estimation, and high-resolution techniques.

Prerequisite: ENEE425.

Corequisite: ENEE620.

Credit Only Granted for: ENEE624 or ENEE630.

Formerly: ENEE624.

ENEE631 Digital Image and Video Processing (3 Credits)

Foundations of digital image and video processing. Topics covered: 2-D systems and transforms; image acquisition and perception; multi-dimensional sampling; quantization; linear and non-linear techniques for image enhancement and restoration; basics on image analysis; lossless and lossy image compression; motion estimation and compensation; still image and video coding standards; applications of image and video processing.

Prerequisite: ENEE620 and ENEE630; or students who have taken courses with comparable content may contact the department.

ENEE632 Speech and Audio Processing (3 Credits)

The objective is to apply digital signal processing techniques to speech and music signals. Topics covered include acoustic theory of speech production leading to the source-filter model; acoustic and digital vocal-tract models of speech production; speech analysis-synthesis based on the short-time Fourier transform, linear prediction, and homomorphic representations; extensions to other multiresolution analysis; time-domain models for speech processing; auditory perception and speech perception; waveform and model-based speech coding using scalar and vector quantization; time-scale modification; pitch and formant estimation; application of techniques to music analysis-synthesis.

Prerequisite: ENEE620 and ENEE630.

Credit Only Granted for: ENEE739A or ENEE632.

Formerly: ENEE739A.

ENEE633 Statistical Pattern Recognition (3 Credits)

The goal is to introduce mathematical pattern analysis and recognition. Emphasis is given to parametric and non-parametric statistical pattern recognition methods and clustering with applications to speech, image and video recognition.

Prerequisite: MATH461; or students who have taken courses with comparable content may contact the department; or permission of instructor.

Corequisite: ENEE620; or permission of instructor.

Credit Only Granted for: ENEE633 or ENEE739Q.

Formerly: ENEE739Q.

ENEE634 Learning and Statistical Signal Processing (3 Credits)

Adaptive learning and statistical signal processing, including: numerical analysis; principal component analysis and support vector machines; adaptive signal processing (supervised learning); blind equalization and identification (unsupervised learning); antenna array and MIMO signal processing; space-time and space-time-frequency coding; neural networks (nonlinear adaptive learning); advanced topics on machine learning, such as online and deep learning.

Prerequisite: ENEE620 and ENEE630.

ENEE640 Digital CMOS VLSI Design (3 Credits)

Review of MOS transistors: fabrication, layout, characterization; CMOS circuit and logic design: circuit and logic simulation, fully complementary CMOS logic, pseudo-nMOS logic, dynamic CMOS logic, pass-transistor logic, clocking strategies; sub system design: ALUs, multipliers, memories, PLAs; architecture design: datapath, floorplanning, iterative cellular arrays, systolic arrays; VLSI algorithms; chip design and test: full custom design of chips, possible chip fabrication by MOSIS and subsequent chip testing.

Prerequisite: ENEE303 and ENEE350; or students who have taken courses with comparable content may contact the department; or permission of instructor.

ENEE641 Mathematical Foundations for Computer Engineering (3 Credits)

Mathematical modeling, design, analysis and proof techniques related to computer engineering. Probability, logic, combinatorics, set theory, and graph theory, as they pertain to the design and performance of computer engineering systems. Techniques for the design and analysis of efficient computational methods from graph theory and networks. Understanding of the limits on the efficiency of such computational methods. Translation from mathematical theory to actual programming. The course emphasizes mathematical rigor.

Credit Only Granted for: ENEE641 or ENEE759F.

Formerly: ENEE759F.

ENEE644 Computer-Aided Design of Digital Systems (3 Credits)

Design methodologies for digital systems using a modern hardware description language. Algorithmic, architectural and implementation aspects of arithmetic processing elements. Design of Complex Instruction Set (CISC), Reduced Instruction Set (RISC), and floating point processors. Synthesis, simulation and testing of processors with computer-aided design tools. Students in some sections may, on permission, fabricate VLSI chips via MOSIS.

ENEE645 Compilers and Optimization (3 Credits)

The compilation, linking and loading process. Using lexical analyzers and parsers. Intermediate forms. Global, stack and heap objects, and their addressing modes. Stack implementation. Control flow analysis and optimization. Dataflow analysis and optimization including Static, single assignment. Alias analysis.

Prerequisite: ENEE350 or CMSC216; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ENPM808T, ENEE645, or ENPM617.

ENEE646 Digital Computer Design (3 Credits)

Concepts and techniques for design of computer systems with improved performance. Advanced I/O systems, memory organization, pipelined and parallel processors, bus bandwidth, processor/memory interconnections, cache memory, virtual memory, multiprocessors, performance evaluation.

Prerequisite: ENEE446; or students who have taken courses with comparable content may contact the department.

ENEE648 Advanced Topics in Electrical Engineering (3 Credits)

Every semester courses intended for a high degree of specialization are offered by visiting or regular electrical engineering faculty members in two or more of the areas listed in 488. The student should check with the electrical engineering office of graduate studies for a list and the description of the topics offered currently.

Repeatable to: 99 credits if content differs.

ENEE651 Parallel Algorithms (3 Credits)

A presentation of the theory of parallel computers and parallel processing. Models of parallel processing and the relationships between these models. Techniques for the design and analysis of efficient parallel algorithms including parallel prefix, searching, sorting, graph problems, and algebraic problems. Theoretical limits of parallelism.

Prerequisite: CMSC451; or ENEE641; or students who have taken courses with comparable content may contact the department.

Cross-listed with: CMSC751.

Credit Only Granted for: ENEE459P, ENEE651, ENEE759K or CMSC751.

Formerly: ENEE759K.

ENEE657 Computer Security (3 Credits)

An introduction to the principles of building secure systems. Topics include operating system (OS) security, secure network communications, software security, real-world attacks, applied cryptography, and hardware security. Within these topics, the course emphasizes the cross-cutting concerns of attacks, defenses and measurement.

Prerequisite: ENEE457 or CMSC414; or students who have taken courses with comparable content may contact the department.

ENEE660 System Theory (3 Credits)

General systems models. State variables and state space. Linearity and its implications. Controllability and observability. State space structure and representation. Realization theory and algorithmic solutions. Parameterizations of linear systems; canonical forms. Basic results from stability theory. Stabilizability. Fine structure of linear multivariable systems; minimal indices and polynomial matrices. Interplay between frequency domain and state space.

Prerequisite: ENEE460 and MATH463; or students who have taken courses with comparable content may contact the department.

ENEE661 Nonlinear Control Systems (3 Credits)

State space methods of stability analysis including second order systems and the phase plane, linearization and stability in the small, stability in the large and Lyapunov's second method. Frequency domain methods including the describing function. Popov's method and functional analytic methods. Introduction to Volterra series representations of nonlinear systems. Applications to control system design.

Prerequisite: ENEE660; and (MATH410 or MATH411; or students who have taken courses with comparable content may contact the department). Or permission of instructor.

ENEE662 Convex Optimization (3 Credits)

Focuses on recognizing, solving, and analyzing convex optimization problems. Convex sets, convex functions, convex and quasi-convex optimization problems. Duality theory and optimality conditions. Specific classes of problems including linear optimization (LP), semi-definite optimization (SDP), geometric programming. Algorithms for unconstrained and constrained optimization; interior-point methods. Applications in controls, communications, signal processing, statistics, and other areas.

Recommended: MATH410.

Credit Only Granted for: ENEE759F or ENEE662.

ENEE664 Optimal Control (3 Credits)

General optimization and control problems. Conditions of optimality for unconstrained and constrained optimization problems; sensitivity; duality. Introduction to linear and nonlinear programming methods. Dynamic optimization. Discrete time maximum principle and applications. Pontryagin maximum principle in continuous time. Dynamic programming. Feedback realization of optimal control.

Prerequisite: ENEE660 and MATH410; or students who have taken courses with comparable content may contact the department; or permission of instructor.

Corequisite: MATH411; or permission of instructor.

ENEE680 Fundamentals of Electromagnetics (3 Credits)

Theoretical analysis and engineering applications of Maxwell's equations: boundary value problems of electrostatics and magnetostatics, dielectric and magnetic properties of matter, energy and momentum content of fields, introduction to EM wave propagation.

Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE681 Electromagnetic Waves and Applications (3 Credits)

Review of Maxwell's equations: potentials, EM energy and momentum, EM plane waves. Properties of waves: dispersion, group velocity, diffraction, the ray optic limit. Waves in media: left-handed media, anisotropic media, wave guides, fibers, cavities. Radiation: antennas, Cherenkov radiation, radiation by accelerated charges, scattering. Additional topics: Wave chaos, Special Relativity.

Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE686 Charged Particle Dynamics, Electron and Ion Beams (3 Credits)

General principles of single-particle dynamics; mapping of the electric and magnetic fields; equation of motion and methods of solution; production and control of charge particle beams; electron optics; Liouville's theorem; space charge effects in high current beams; design principles of special electron and ion beam devices.

ENEE690 Introduction to Quantum Mechanics (3 Credits)

Introduction to the Schrodinger equation, matrix formulations of quantum mechanics, identical particles, entanglement, approximation methods, symmetries. Applications to solid-state, atomic, and quantum information science.

Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE691 Optical Communication Systems (3 Credits)

Optical components and systems. Measures of performance of optical communication systems. Topics include: single and multi-mode optical fibers, DFB and DBR lasers, transmitters and receivers, pin and APD detectors, noise analysis, receiver sensitivity modulation formats, system performance, bit-error-rate, power budget, TDM and WDM systems, network architecture.

ENEE692 Introduction to Photonics (3 Credits)

Introduction to photonic concepts and applications. In particular, high quality factor optical resonators, photonic crystals, microresonators, statistical and photon optics, spontaneous and stimulated emission, semiconductor lasers and detectors, modulators and optical switches are discussed. Finally, the concept of photons and the quantum states of light are presented.

Prerequisite: ENEE380 and ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE698 Graduate Seminar (1-3 Credits)

Every semester regular seminars are held in electrical science and in the six areas of specialization offered by the electrical engineering department. They may be taken, by arrangement with the student's advisor, for repeated credit.

Restriction: Permission of instructor.

ENEE699 Independent Studies in Electrical Engineering (1-3 Credits)

Supervised individual study or project, or supervised group study or project, at an advanced level, in electrical engineering.

Repeatable to: 99 credits if content differs.

Formerly: ENEE609.

ENEE704 Physics and Simulation of Semiconductor Devices (3 Credits)

The physics of electron transport in semiconductor devices will be covered. Numerical methods for attaining solutions to transport equations will be explored. Students will also learn how to use CAD tools for semiconductor device design. Nano-electronic devices will be introduced.

Recommended: ENEE601 and ENEE600; and exposure to quantum mechanics.

Credit Only Granted for: ENEE694 and ENEE704.

Formerly: ENEE694.

ENEE719 Advanced Topics in Microelectronics (3 Credits)

Repeatable to: 99 credits if content differs.

Formerly: ENEE718.

ENEE729 Advanced Topics in Communication (3 Credits)

Repeatable to: 99 credits if content differs.

Formerly: ENEE728.

ENEE731 Image Understanding (3 Credits)

An advanced graduate level course on image understanding. Mathematical and statistical approaches to solving image understanding problems will be discussed. Topics to be covered include: optimal edge and shape detection; image understanding using Markov random field models; Monte Carlo Markov Chain techniques for image understanding; shape from shading, stereo, texture and contour; structure from motion and object recognition. Existence, uniqueness and convergence issues for many of these problems will be discussed.

Prerequisite: ENEE631 and ENEE633.

Credit Only Granted for: ENEE739J or ENEE731.

Formerly: ENEE739J.

ENEE739 Advanced Topics in Signal Processing (3 Credits)

Repeatable to: 99 credits if content differs.

Formerly: ENEE738.

ENEE749 Advanced Digital Systems Design (3 Credits)

VLSI architecture and algorithms; design strategies; design methodologies; system-level design; area/delay/power trade-offs; high performance systems; multi-chip modules; low-power design; hardware/software co-design; design for testability, design for manufacturability; algorithm, architecture, and component design for adaptive computing systems; prototype system development and test, possible chip fabrication by MOSIS and subsequent chip testing.

Prerequisite: ENEE640 or ENEE644.

Restriction: Permission of instructor.

Repeatable to: 6 credits if content differs.

ENEE757 Security in Distributed Systems and Networks (3 Credits)

Threats and countermeasures in centralized and distributed systems; communication security techniques based on encryption; symmetric and asymmetric encryption; encryption modes, including stream and block encryption, and cipher block chaining; message origin and mutual authentication; third-party and inter-realm authentication, authentication of mobile users; data confidentiality and integrity protocols; formal analysis of authentication protocols and message integrity; access control in distributed systems and networks; firewall design; case studies of security mechanisms and policies.

Prerequisite: ENEE647; or permission of instructor.

ENEE759 Advanced Topics in Computer Engineering (3 Credits)

Topics, as announced every semester, from the field of computer engineering and its applications.

Repeatable to: 99 credits if content differs.

ENEE762 Stochastic Control (3 Credits)

Stochastic control systems, numerical methods for the Riccati equation, the separation principle, control of linear systems with Gaussian signals and quadratic cost, non-linear stochastic control, stochastic stability, introduction to stochastic games.

Prerequisite: ENEE620 and ENEE660; or students who have taken courses with comparable content may contact the department.

ENEE763 Advanced Nonlinear Control Systems (3 Credits)

General introduction to the geometric theory of nonlinear control systems. Theory of decoupling, disturbance rejection, feedback linearization, stability, stabilization, etc.

Prerequisite: ENEE661; or permission of instructor.

ENEE765 Adaptive Control (3 Credits)

General principles of adaptive control. Self-tuning regulators and model reference adaptive systems. Theoretical issues: stability, convergence, and robustness. Practical issues: implementation, computation, auto-tuning, and other successful application. Alternatives to adaptive control.

Prerequisite: ENEE660 and ENEE664; or students who have taken courses with comparable content may contact the department.

ENEE769 Advanced Topics in Controls (3 Credits)

Topics selected, as announced every semester, from the field of controls and its applications.

Repeatable to: 99 credits if content differs.

ENEE789 Advanced Topics in Electrophysics (3 Credits)

Topics selected, as announced every semester, from the field of electrophysics and its applications.

Repeatable to: 99 credits if content differs.

Formerly: ENEE788.

ENEE790 Quantum Electronics I (3 Credits)

Spontaneous emission, interaction of radiation and matter, masers, optical resonators, the gas, solid and semi-conductor lasers, electro-optical effect, propagation in anisotropic media and light modulation.

Prerequisite: Must have knowledge of quantum mechanics; or permission of instructor.

ENEE791 Quantum Electronics II (3 Credits)

Nonlinear optical effects and devices, tunable coherent light sources: optical parametric oscillator; frequency conversion and dye laser. Ultrashort pulse generation and measurement, stimulated raman effect, and applications. Interaction of acoustic and optical waves, and holography.

ENEE798 Advanced Topics in Electrical Engineering (3 Credits)

Topics selected, as announced every semester.

Formerly: ENEE648.

ENEE799 Master's Thesis Research (1-6 Credits)**ENEE889 Teaching Workshop (1 Credit)**

Provide training in education for senior PhD students who contemplate an academic career, and give them the opportunity to gain some teaching experience. Emphasis is on issues that are of special importance in electrical and computer engineering education.

Restriction: Must be in ENGR: MS/PhD-Electrical Engineering (Doctoral) program; and permission of ENGR-Electrical & Computer Engineering department.

Repeatable to: 4 credits if content differs.

ENEE898 Pre-Candidacy Research (1-8 Credits)

Provide training in education for senior PhD students who contemplate an academic career, and give them the opportunity to gain some teaching experience. Emphasis is on issues that are of special importance in electrical and computer engineering education.

Restriction: Must be in ENGR: MS/PhD-Electrical Engineering (Doctoral) program; and permission of ENGR-Electrical & Computer Engineering department.

Repeatable to: 4 credits if content differs.

ENEE899 Doctoral Dissertation Research (1-8 Credits)

ENES - Engineering Science

ENES401 Entrepreneurial Design Realization (3 Credits)

The vision for this course, and an aspect that makes it unique, is to expose students to the opportunities and challenges of bringing a product design to reality (entrepreneurship). The emphasis is on environmentally and socially sustainable projects. The end-product of this course will be full-scale implementations or complete design "packages" that can be taken to potential stakeholders.

Cross-listed with: ENME401.

Restriction: Must have senior standing and permission of instructor.

Credit Only Granted for: ENME401, ENME489B or ENES401.

Formerly: ENME489B.

ENES424 Engineering Leadership Capstone: Inclusive Leadership in Addressing Organizational & Societal Challenges (3 Credits)

The Minor in Global Engineering Leadership is designed to bring together one's understanding of leadership, organizations, culture, and global studies and apply this synthesized learning to a capstone project. The project will provide real-world application of global leadership principles to address an organizational or societal need. Students will utilize an inclusive leadership and global mindset to propose a big idea which brings about a positive organizational or societal change.

Prerequisite: ENES472 and ENES317.

Restriction: Must be in the Global Engineering Leadership minor (#EN09).

ENES428 Engineering Research for Exchange Students (3-12 Credits)

Directed research within the Clark School of Engineering for international exchange students.

Restriction: Available only to visiting exchange students taking part in an Engineering exchange program.

Repeatable to: 24 credits.

ENES440 Science, Technology, Ethics, and Policy: Minor Program Capstone (3 Credits)

Capstone research seminar for students in the Science, Technology, Ethics, and Policy Minor program.

Prerequisite: ENES240 and 2 courses from the STEP minor elective list.

Restriction: Must be in the Science, Technology, Ethics, and Policy minor.

Additional Information: This is the culminating course the STEP minor program.

ENES442 Creating Historic Woodwinds (3 Credits)

In this class, students will learn the art of woodworking and blend techniques of modern and historic instrument-making methods. Using wood lathes, metalworking tools, 3d scanners and selective laser sintering 3d printers. Student teams will first train to acquire the skills needed to use fabrication equipment. Each mixed team will then share their individual discipline's skills to help contribute to the creation of a completed musical instrument. Along the way, we'll explore the historical and cultural context of instrument making and the musical period.

Cross-listed with: MUSC442.

Credit Only Granted for: MUSC442 or ENES442.

ENES458 Topics in International Engineering (1-4 Credits)

A variety of topics related to engineering in a global context are discussed including cultural aspects, cross-cultural communication, international standards and law, and engineering and technology issues, business behavior, attitudes and values of selected countries and regions.

Prerequisite: ENES100.

Repeatable to: 12 credits if content differs.

ENES459 Study Abroad Special Topics in Engineering IV (1-6 Credits)

Special topics course in engineering science taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ENES460 Fundamentals of Technology Start-Up Ventures (3 Credits)

Fundamental aspects of creating, organizing, funding, managing, and growing a technology startup venture. This multidisciplinary course will draw on management, business, legal, financial, as well as technical, concepts. Students form teams and develop a business plan for a technology company, based on each team's own business idea and then present the plan to a panel of outside experts.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES460, BMGT461, SMLP470 or HLMN470.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES461 Advanced Entrepreneurial Opportunity Analysis in Technology Ventures (3 Credits)

Explores the factors that influence entrepreneurial opportunity analysis in technology-based ventures. Uses a cognitive theoretical framework to examine the integration of motivation, emotions and information processing modes to make complex entrepreneurial decisions in technology venture environments.

Credit Only Granted for: ENES210 or ENES461.

ENES462 Marketing High-Technology Products and Innovations (3 Credits)

Examines the opportunities and challenges of marketing high-technology products in turbulent environments requiring rapid decision making with incomplete information. Explores how innovations are introduced at frequent intervals, research-and-development spending is vital, and there are high mortality rates for both products and businesses.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES463 Strategies for Managing Innovation (3 Credits)

Emphasizes how the technology entrepreneur can use strategic management of innovation and technology to enhance firm performance. Examines the process of technological change, the ways that firms come up with innovations, the strategies that firms use to benefit from innovation, and the process of formulating technology strategy. Provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES463, BMGT467, SMLP473 or HLMN472.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES464 International Entrepreneurship and Innovation (3 Credits)

Focuses on the need for every entrepreneur and innovator to understand the global market in today's hypercompetitive world, and to appreciate how to compete effectively in domestic markets by managing international competitors, suppliers, and influences. Explore how the distinction between foreign and domestic markets is becoming less pronounced. Develop skills to identify and manage opportunities on a global basis.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES466 Leading and Financing the Technology Venture (3 Credits)

Focuses on the challenges of leading and financing new technology ventures. Leadership topics include team selection and formation, aligning rewards with relative contributions of team members, and how early decisions can enable or prevent founders from achieving results that align with their individual motivations for becoming an entrepreneur. Essential tools and methods for building a strong financial foundation for a new technology venture are examined. Includes important accounting principles as well as methods for keeping financial control of the technology venture. Insights are shared on navigating the multitude of financial barriers that may block your entrepreneurial success, as well as how to grow the technology venture from concept through launch.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES466, BMGT365, SMLP471 or HLMN471.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES467 Engineering for Social Change (3 Credits)

Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.

Cross-listed with: ENME467.

Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering.

Credit Only Granted for: ENES467 or ENME467.

ENES471 Legal Aspects of Entrepreneurship (3 Credits)

Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.

Restriction: Must be in the Minor in Technology Entrepreneurship & Corporate Innovation (#EN06).

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES472 Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology (3 Credits)

Develop global leadership capacities and an understanding of the cultural aspects pertaining to industry and international business. In a globalized world, the ability to work, lead and communicate in culturally diverse settings has become a core component to leadership. Through real-world examples, research, and simulations, students will increase their self-awareness and understanding of culture and how culture influences attitudes, behaviors, and practices at the individual, organizational, or societal levels. Students will develop the skills necessary to navigate, negotiate, and lead cross-cultural engagements and teams. The course content is relevant and applicable to anyone interested in developing cross-cultural leadership competencies and cultivating a global mindset.

Restriction: Sophomore standing or higher; must be a minor in Global Engineering Leadership (#EN09), Global Poverty (#AG06), Global Terrorism Studies (#BS07), or International Development and Conflict Management (#BS02).

Credit Only Granted for: ENES472, SLLC471, or SLLC473.

Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES474 Global Perspectives of Engineering (3 Credits)

Faculty supervised research on aspects of engineering in a foreign country including leading fields of research, key world markets, and the culture of the engineering workplace. Students will produce a comprehensive report exhibiting their expertise in their chosen country and the field of engineering within.

Prerequisite: ENES100; or permission of ENGR-A. James Clark School of Engineering.

Restriction: Must be in the International Engineering Minor.

Credit Only Granted for: ENES458M or ENES474.

Formerly: ENES458M.

ENES475 Leadership in Times of Crisis: Pandemics, Disasters, and Humanitarian Crises (3 Credits)

Students are provided with immersive opportunities to learn from industry professionals about crisis prevention and response by examining leadership throughout the crisis cycle: from identification, prevention, and preparation, to response, recovery, and rebuilding. The course brings together the study and practice of leadership with promising practices in disaster preparedness and data informed decision-making. This course will examine how leadership has been enacted to help local, national, and global communities navigate through pandemics, disasters, and other humanitarian crises. Students will develop capacities for informed leadership in times of crisis and develop an understanding for applying these skills in a variety of settings.

Restriction: Must have earned a minimum of 60 credits.

Credit Only Granted for: ENES275 or ENES475.

ENES478 Topics in Engineering Education (1 Credit)

Topics related to teaching engineering courses, particularly project-based courses. Topics can include learning styles, student development theory, multicultural issues in teaching, facilitating team experiences, assessment, and academic integrity.

Restriction: Must be in the Engineering Teaching Fellow program.

Repeatable to: 3 credits if content differs.

ENES480 Engineering Honors Seminar I (1 Credit)

Introduction to engineering leadership, professionalism, and ethics. Discussions of leadership style, elements of success, professional communication, codes of ethics, handling of ethical dilemmas, and the characteristics of a professional.

Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES481 Engineering Honors Seminar II (1 Credit)

Introduction to engineering creativity and innovation in engineering. Application of methods of creativity to topics in communication, conducting research, and leadership.

Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES489 Special Topics in Engineering (3-6 Credits)

Special topics in engineering.

Prerequisite: Permission of ENGR-A. James Clark School of Engineering.

Repeatable to: 6 credits if content differs.

ENES490 QUEST Capstone Professional Practicum (4 Credits)

The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.

Prerequisite: ENES390 or BMGT390.

Cross-listed with: BMGT490.

Credit Only Granted for: BMGT490 or ENES490.

ENES491 Scoping Experiential Learning Projects (3 Credits)

QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.

Prerequisite: BMGT190 or ENES190.

Cross-listed with: BMGT491.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT491 or ENES491.

ENES498 Special Topics in Entrepreneurship (3 Credits)

This entrepreneurship seminar and case study-based course will explore technology entrepreneurship with a focus on leadership, marketing, team-building, and management of new technology ventures and assumes baseline knowledge of entrepreneurship. Students will learn skills needed to succeed as a technology entrepreneur and how to apply best practices for planning, launching, and growing new companies. This course is a requirement of the Hinman CEOs program.

Restriction: Must be in Hinman CEOs Program.

Repeatable to: 12 credits if content differs.

ENES499 Senior Projects in Engineering (3 Credits)

Students will work in large teams to solve a multidisciplinary research/design problem. The course will begin with students identifying opportunities, brainstorming project concepts to address these opportunities, applying lean startup and design thinking strategies, and then selecting/proposing a project for the semester. Acceptable projects will require the multidisciplinary design, construction and testing of a project within limited budget and time constraints.

Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and completion of all 1XX and 2xx level (lower-division) technical courses in engineering major with a C- or better.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

Repeatable to: 6 credits if content differs.

ENES601 Future Faculty Program Seminar I (1 Credit)

Introduction to and development of skills necessary to obtain and succeed in a university faculty position. Emphasis on technical writing and effective presentations. Discussion of research diversification, networking, ethics and professionalism.

Restriction: Must be in the Clark School Future Faculty Program.

ENES602 Future Faculty Program Seminar II (1 Credit)

Effective teaching techniques. Basic principles of education and learning. Developing a course; promoting active learning, problem solving and critical thinking; designing exam and assignments; and communicating effectively with students.

Restriction: Must be in the Clark School Future Faculty Program.

ENES603 Future Faculty Program Seminar III (1 Credit)

Developing a successful faculty research program. Establishing and maintaining a research group. Finding funding opportunities and writing grant proposals. Mentoring graduate students. Faculty position application process. Preparing research and teaching statements.

Restriction: Must be in the Clark School Future Faculty Program.

ENES604 Future Faculty Program Teaching Practicum (1 Credit)

Graduate students will co-teach a course under supervision of a faculty mentor. Graduate students will be involved in all aspects of the course including development of syllabus, presenting lectures, writing and grading examinations, and evaluating the students in the course.

Prerequisite: ENES602.

Restriction: Must be a graduate student in the Clark School Future Faculty Program; and students for whom English is not the native language must pass the Maryland English Institute ITA Evaluation prior to enrolling in this course.

ENES658 Special Topics in Engineering in a Global Context (1-3 Credits)

Advanced topics in engineering in a global context.

Restriction: Graduate standing or permission of instructor.

Repeatable to: 12 credits if content differs.

ENES660 Fundamentals of Product Management (3 Credits)

Provides a comprehensive survey of product management and its growing role in producing technology-driven products that customers love. Guides students through the product lifecycle and market lifecycle, diving into the competencies needed at each stage. Topics include startup and corporate strategy, product strategy, vision setting and evangelism, development lifecycle approaches based on customer involvement and product stage, the various types of innovation at each stage of the lifecycle, and how the product manager leads the team through it all. Learn the basics of customer discovery, product discovery, product delivery, and the core-context model for managing products through maturity.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES662 Innovative Ideas and Concept Development (3 Credits)

Enables aspiring entrepreneurs to understand the content, methods, and models for new venture opportunity assessment and analysis. Focuses on how to identify and analyze entrepreneurial opportunities for technology-based ventures by first understanding the personal self and decision-making factors. Explores how to evaluate new venture opportunities and challenges within industries and markets.

Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES663 Strategies for Managing Innovation (3 Credits)

Emphasizes how innovative leaders can use strategic management of innovation and technology to enhance firm performance. It helps students to understand the process of technological change; the ways that firms come up with innovations; the strategies that firms use to benefit from innovation; and the process of formulating technology strategy. It provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.

Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES664 Business Modeling and Customer Validation (3 Credits)

Focuses on how to create and deliver value for customers and extract value for the new venture. Develop business models that encompass the product or service, customers, and the economic engine to meet the venture's financial and growth objectives. Introduces a structured way to think about, analyze, and develop a sound business model that is customer validated.

Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES665 Innovative Thinking (3 Credits)

Introduces students to new and powerful tools to boost their creative problem solving skills. Participants re-discover their communication and teaming skills. Students unlock their creativity potential, and explore win-win approaches to define and solve problems of different kinds. Students are also introduced to topics related to intellectual property.

Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES666 Creative Design, Prototyping, and Testing (3 Credits)

Transition from creative, innovative, design thinking methods to prototyping and concept testing of products and services. Learn how to translate ideas into marketable offerings to create real value for customers and the new venture. Emphasis is placed on an integrated and interdisciplinary approach to engineering design, concurrent engineering, design for manufacturing, industrial design, and the business of new product development. Topics include design methods, modeling and simulation, material and manufacturing process selection, platform and modular design, mass customization, planning and scheduling, and business issues, teamwork, group dynamics, creativity, and innovation.

Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES667 Market Development and Commercialization (3 Credits)

Provides an orientation to key marketing concepts critical to marketing technology-based products and services. Learn to identify market opportunities, understand customer preferences, evaluate market acceptance, and devise the appropriate going to market strategies for the new venture.

Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES668 Corporate Technology Entrepreneurship (3 Credits)

Focuses on the role of entrepreneurial individuals inside of existing technology organizations. Explores developing and leading innovation inside the firm. Discusses stages of innovation in the corporate entrepreneurship process and dynamics of organizational structure, politics, decisions, financing, and personal styles.

Credit Only Granted for: ENPM 808N or ENES 668.

Formerly: ENPM 808N.

ENES670 Financial Management and New Venture Financing (3 Credits)

Provides the essential tools and skills to build a strong financial foundation for a new technology venture. Examines accounting principles as well as methods for keeping firm financial control of the venture. Discusses navigating the multitude of financial barriers that may block entrepreneurial success, as well as how to raise the right amount of capital at the right time from the right source.

Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES671 Legal Aspects of Entrepreneurship (3 Credits)

Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.

Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES672 Launching Technology Startup Ventures (6 Credits)

Explores the processes and skills needed to launch and manage technology startup ventures. Learn how to apply best practices for planning, launching, and leading new companies. Discusses a wide range of issues of importance and concern to entrepreneurs, to include how to navigate uncertainty.

Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES673 Financing the Product Life Cycle (3 Credits)

Provides the essential tools and skills to build a strong financial foundation for designing, developing, and managing new products within established companies and organizations. Examines accounting principles as well as methods for managing the financials of the product. Discusses navigating the multitude of financial barriers that may block success, as well as how to raise the right amount of capital at the right time from the right source, with an emphasis on internal company financing.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES674 Managing Product Development and Operations (3 Credits)

Explores the evolution of modern management methods for operations and product development. Evaluates production and operation methods from inception to factory-based models of productivity, through the quality and lean movements, to the explosion of productivity with modern approaches. Focuses on how to effectively run large-scale agile teams with agile engineering at its core.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES676 Negotiation and Problem-Solving (3 Credits)

Explores key negotiation techniques, how to apply these techniques, and their application to real-world scenarios. Establishes an understanding of deal-making, and creates a foundation for exploring the concepts of agreements, contracts, conflicts, and how the resulting transactions formed the foundation for modern scaled economies. Examines reputation effects, customer lifetime value, the basics of civil and criminal law, and how these have formed to constrain our interactions in modern society.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES677 Data Analysis and Decision Making (3 Credits)

Provides a comprehensive understanding of making decisions under uncertainty for products, portfolios, and programs across various industries and environments. Focuses on the use of Bayesian methods for informing decisions on products and programs when directing experiments. Examines the testing of product ideas throughout the lifecycle, from customer discover, to product discovery, to product design and optimization, to channel testing and marketing for growth.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES680 Building and Leading Innovative Organizations (3 Credits)

Focuses on building a product enterprise through lean product portfolio management. Defines the conceptual groundwork that enables achieving the vision of a customer-centric value creation business model centered around lean principles. Explains the details of building a scaled product enterprise and explores alignment of organizational support functions with a product framework that lays the pathway for a sustainable value maximizing enterprise at scale.

Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENFP - Engineering, Fire Protection

ENFP405 Structural Fire Protection (3 Credits)

Effects of elevated temperature on structural materials; steel, concrete, wood, gypsum, glass and reinforced plastics. Experimental evaluation of fire resistance of building assemblies. Analytical methods to evaluate fire resistance of structural members.

Prerequisite: ENES220.

Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP405 or ENFP621.

ENFP410 Special Hazard Suppression Systems (3 Credits)

Analysis of application and theory of fire suppression systems. The key elements of fire suppression systems will be discussed along with how they interact for effective fire suppression design. Physical mechanisms for a variety of fire suppression approaches will be discussed including hose streams, sprinklers, water mist, foam, clean agents, and chemical agents.

Prerequisite: ENFP310 and ENFP312.

Jointly offered with: ENFP610.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP410, ENFP610 or ENFP653.

ENFP411 Risk-Informed Performance Based Design (3 Credits)

Appraisal and measurement of fire safety. Application of systems analysis, probability theory, engineering economy and risk management in the identification and synthesis of components of fire protection engineering. Methods for the development of criteria for the design, evaluation and assessment of fire safety or component hazards.

Restriction: Senior standing; or permission of ENGR-Fire Protection Engineering department.

ENFP413 Human Response to Fire (3 Credits)

Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety calculations. Physiology and toxicology of the fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.

Prerequisite: ENFP250.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Jointly offered with ENFP613.

Credit Only Granted for: ENFP413 or ENFP613.

ENFP415 Fire Dynamics (3 Credits)

Designed to give students a quantitative understanding of fire behavior. The fundamentals of physics and chemistry of combustion are presented and used to derive key analytical relationships that describe fire growth. Application of these relationships to the analysis of common fire scenarios is emphasized.

Prerequisite: ENFP312.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Jointly offered with ENFP651.

Credit Only Granted for: ENFP415 or ENFP651.

ENFP420 Fire Assessment Methods and Laboratory (4 Credits)

Experimental evaluation of ignition, flame spread, rate of heat release and smoke production of flammable gases, liquids, solids, and interior finish materials. Analytical and computer methods for the design, performance, and analysis of fire experiments. Preparation of laboratory reports.

Prerequisite: Student must have senior standing; and minimum grade of C- in ENFP312.

Restriction: Must be in Engineering: Fire Protection program.

Credit Only Granted for: ENFP320 or ENFP420.

Formerly: ENFP320.

ENFP425 Enclosure Fire Modeling (3 Credits)
