

UNDERGRADUATE APPROVED COURSES

Course Numbering System

The first digit of the course number determines the level of the course, and the last two digits identify the course. Courses ending with the numeral 8 or 9 are the only courses that are repeatable for credit. Course levels are designated as follows:

- 000-099: Non-credit courses
- 100-199: Courses primarily for first-year students
- 200-299: Courses primarily for sophomore students
- 300-399: Junior/Senior courses (not acceptable for credit toward graduate degrees)
- 400-499: Junior/Senior courses (acceptable for credit toward some graduate degrees)
- 500-599: Professional school courses (Dentistry, Law, Medicine) or post-baccalaureate course (not for graduate degree credit)
- 600-898: Courses restricted to graduate students
- 799: Master's Thesis credit
- 899: Doctoral Dissertation credit

A

- AAAS - African American and Africana Studies (p. 3)
- AASP - African American Studies (p. 8)
- AAST - Asian American Studies (p. 10)
- ABRM - Anti-Black Racism (p. 33)
- AGNR - Agriculture and Natural Resources (p. 13)
- AGST - Agricultural Science and Technology (p. 14)
- AMSC - Applied Mathematics & Scientific Computation (p. 15)
- AMST - American Studies (p. 16)
- ANSC - Animal Science (p. 19)
- ANTH - Anthropology (p. 24)
- AOSC - Atmospheric and Oceanic Science (p. 30)
- ARAB - Arabic (p. 33)
- ARCH - Architecture (p. 36)
- AREC - Agricultural and Resource Economics (p. 40)
- ARHU - Arts and Humanities (p. 43)
- ARHX - Art History & Archaeology Education Abroad (p. 46)
- ARMY - Army (p. 48)
- ARSC - Air Science (p. 49)
- ARTH - Art History & Archaeology (p. 49)
- ARTT - Art Studio (p. 53)
- ARTX - Art Studio Education Abroad (p. 56)
- ARUX - Arts and Humanities Education Abroad (p. 56)
- ASTR - Astronomy (p. 57)

B

- BCHM - Biochemistry (p. 59)
- BIOE - Bioengineering (p. 60)
- BIOM - Biometrics (p. 64)
- BMGT - Business and Management (p. 64)

- BMIN - General Business Minor (p. 74)
- BSCI - Biological Sciences Program (p. 75)
- BSCV - CIVICUS (p. 83)
- BSOS - Behavioral and Social Sciences (p. 83)
- BSST - Terrorism Studies (p. 85)

C

- CCJS - Criminology and Criminal Justice (p. 88)
- CHBE - Chemical and Biomolecular Engineering (p. 91)
- CHEM - Chemistry (p. 97)
- CHIN - Chinese (p. 100)
- CHSE - Counseling, Higher Education, and Special Education (p. 96)
- CINE - Cinema and Media Studies (p. 102)
- CINX - Cinema and Media Studies Education Abroad (p. 106)
- CLAS - Classics (p. 107)
- CLAX - Classics Education Abroad (p. 111)
- CMLT - Comparative Literature (p. 111)
- CMLX - Comparative Literature Education Abroad (p. 112)
- CMSC - Computer Science (p. 112)
- COMM - Communication (p. 118)
- COMX - Communication Education Abroad (p. 123)
- CPBE - College Park Scholars-Business, Society, and Economy (p. 124)
- CPCV - College Park Scholars-Civic Engagement for Social Good (p. 124)
- CPDJ - College Park Scholars-Data Justice (p. 125)
- CPET - College Park Scholars-Environment, Technology & Economy (p. 125)
- CPGH - College Park Scholars-Global Public Health (p. 125)
- CPJT - College Park Scholars-Justice and Legal Thought (p. 126)
- CPMS - College Park Scholars-Media, Self and Society (p. 126)
- CPPL - College Park Scholars-Public Leadership (p. 127)
- CPSA - College Park Scholars-Arts (p. 127)
- CPSD - College Park Scholars-Science, Discovery & the Universe (p. 127)
- CPSF - College Park Scholars-Life Sciences (p. 128)
- CPSG - College Park Scholars-Science and Global Change (p. 128)
- CPSN - College Park Scholars-International Studies (p. 129)
- CPSP - College Park Scholars Program (p. 129)
- CPSS - College Park Scholars-Science, Technology and Society (p. 130)

D

- DANC - Dance (p. 131)
- DATA - Data Science and Analytics (p. 134)

E

- EALL - East Asian Languages and Literatures (p. 134)
- ECON - Economics (p. 135)
- EDCI - Curriculum and Instruction (p. 143)

- EDCP - Education Counseling and Personnel Services (p. 144)
- EDDI - Education Dialogues (p. 144)
- EDHD - Education, Human Development (p. 145)
- EDHI - Education Leadership, Higher Ed and International Ed (p. 150)
- EDMS - Measurement, Statistics, and Evaluation (p. 151)
- EDPS - Education Policy Studies (p. 151)
- EDSP - Education, Special (p. 151)
- EDUC - Education (p. 155)
- ENAE - Engineering, Aerospace (p. 156)
- ENBC - Biocomputational Engineering (p. 158)
- ENCE - Engineering, Civil (p. 160)
- ENEB - Cyber-Physical Systems Engineering (p. 165)
- ENED - Engineering Education (p. 167)
- ENEE - Electrical & Computer Engineering (p. 168)
- ENES - Engineering Science (p. 175)
- ENFP - Engineering, Fire Protection (p. 182)
- ENGL - English (p. 184)
- ENGX - English Education Abroad (p. 199)
- ENMA - Engineering, Materials (p. 205)
- ENME - Engineering, Mechanical (p. 209)
- ENMT - Mechatronics Engineering (p. 215)
- ENRE - Reliability Engineering (p. 215)
- ENSP - Environmental Science and Policy (p. 215)
- ENST - Environmental Science and Technology (p. 217)
- EPIB - Epidemiology and Biostatistics (p. 222)

F

- FGSM - Federal and Global Fellows (p. 222)
- FIRE - First-Year Innovation & Research Experience (p. 223)
- FMSC - Family Science (p. 223)
- FREN - French (p. 227)

G

- GEMS - Gemstone (p. 230)
- GEOG - Geographical Sciences (p. 231)
- GEOL - Geology (p. 235)
- GERM - Germanic Studies (p. 240)
- GERS - German Studies (p. 240)
- GREK - Greek (p. 244)
- GVPT - Government and Politics (p. 245)

H

- HACS - ACES-Cybersecurity (p. 252)
- HBUS - Interdisciplinary Business Honors (p. 255)

- HDCC - Design Cultures and Creativity (p. 256)
- HEBR - Hebrew (p. 256)
- HEIP - Entrepreneurship and Innovation (p. 258)
- HESI - Higher Ed, Student Affairs, and International Ed Policy (p. 258)
- HESP - Hearing and Speech Sciences (p. 259)
- HGLO - Honors Global Communities (p. 262)
- HHUM - Honors Humanities (p. 262)
- HISP - Historic Preservation (p. 263)
- HIST - History (p. 263)
- HISX - History Education Abroad (p. 276)
- HLSA - Health Services Administration (p. 277)
- HLSC - Integrated Life Sciences (p. 277)
- HLTH - Health (p. 278)
- HNUH - University Honors (p. 282)
- HONR - Honors (p. 293)

I

- IDEA - Academy for Innovation & Entrepreneurship (p. 294)
- IMDM - Immersive Media Design (p. 295)
- IMMR - Immigration Studies (p. 297)
- INAG - Institute of Applied Agriculture (p. 297)
- INST - Information Studies (p. 301)
- ISRL - Israel Studies (p. 309)
- ITAL - Italian (p. 311)
- ITAX - Italian Education Abroad (p. 313)
- IVSP - Individual Studies Program (p. 314)

J

- JAPN - Japanese (p. 314)
- JOUR - Journalism (p. 316)
- JWST - Jewish Studies (p. 320)

K

- KNES - Kinesiology (p. 326)
- KORA - Korean (p. 332)

L

- LACS - Latin American and Caribbean Studies (p. 333)
- LARC - Landscape Architecture (p. 334)
- LASX - Certificate in Latin American Studies Education Abroad (p. 338)
- LATN - Latin (p. 338)
- LBSC - Library Science (p. 338)
- LEAD - Leadership Education and Development (p. 339)
- LGBT - Lesbian Gay Bisexual Transgender Studies (p. 339)
- LGBX - Lesbian Gay Bisexual Transgender Studies Education Abroad (p. 341)
- LING - Linguistics (p. 341)

M

- MATH - Mathematics (p. 343)
- MEES - Marine-Estuarine-Environmental Sciences (p. 348)
- MIEH - Maryland Institute for Applied Environmental Health (p. 348)
- MITH - Maryland Institute for Technology in the Humanities (p. 350)
- MLAW - MPower Undergraduate Law Programs (p. 350)
- MLSC - MD Language Science Ctr (p. 351)
- MUED - Music Education (p. 351)
- MUET - Ethnomusicology (p. 353)
- MUSC - School of Music (p. 353)
- MUSP - Music Performance (p. 357)

N

- NAVY - Navy (p. 358)
- NEUR - Neuroscience (p. 359)
- NFSC - Nutrition and Food Science (p. 360)

O

- OURS - Office of Undergraduate Research (p. 363)

P

- PEER - Health Center (p. 363)
- PERS - Persian (p. 365)
- PHIL - Philosophy (p. 367)
- PHIX - Philosophy Education Abroad (p. 372)
- PHPE - Philosophy, Politics, and Economics (p. 372)
- PHPX - Philosophy, Politics, and Economics Education Abroad (p. 373)
- PHSC - Public Health Science (p. 374)
- PHYS - Physics (p. 376)
- PLCY - Public Policy (p. 381)
- PLSC - Plant Sciences (p. 383)
- PORT - Portuguese (p. 387)
- PSYC - Psychology (p. 389)

Q

- QMMS - Quantitative Methodology: Measurement and Statistics (p. 394)

R

- RDEV - Real Estate Development (p. 395)
- RELS - Religious Studies (p. 396)
- RELX - Religious Studies Education Abroad (p. 847)
- RUSS - Russian (p. 398)

S

- SLAA - Second Language Acquisition and Application (p. 400)

- SLLC - School of Languages, Literatures and Cultures (p. 400)
- SLLX - School of Languages, Literatures & Cultures Education Abroad (p. 403)
- SMLP - Southern Management Leadership Program (p. 405)
- SOCY - Sociology (p. 405)
- SPAN - Spanish (p. 412)
- SPAX - Spanish Education Abroad (p. 420)
- SPHL - Public Health (p. 421)
- STAT - Statistics and Probability (p. 423)
- SURV - Survey and Data Science (p. 424)

T

- TDPS - Theatre, Dance and Performance Studies (p. 425)
- THET - Theatre (p. 426)
- THEX - Theatre Education Abroad (p. 431)
- TLPL - Teaching and Learning, Policy and Leadership (p. 432)
- TLTC - Teaching and Learning Transformation Center (p. 439)

U

- UMEI - Maryland English Institute (p. 440)
- UNIV - University Courses (p. 440)
- URSP - Urban Studies and Planning (p. 441)
- USLT - Latina/o Studies (p. 442)

V

- VIPS - Vertically Integrated Projects (p. 443)

W

- WEID - Words of Engagement Intergroup Dialogue Program (p. 443)
- WGSS - Women, Gender, and Sexuality Studies (p. 444)
- WMSX - Women's Studies Education Abroad (p. 450)

X

- XPER - xFoundry (p. 451)

AAAS - African American and Africana Studies

AAAS100 Introduction to African American and Africana Studies (3 Credits)

Significant aspects of the history of African Americans with particular emphasis on the evolution and development of black communities from slavery to the present. Interdisciplinary introduction to social, political, legal and economic roots of contemporary problems faced by blacks in the United States with applications to the lives of other racial and ethnic minorities in the Americas and in other societies.

Credit Only Granted for: AASP100 or AAAS100.

Formerly: AASP100.

AAAS101 Public Policy and the Black Community (3 Credits)

The impact of public policies on the Black community and the role of the policy process in affecting the social, economic and political well-being of minorities. Particular attention given to the post-1960 to present era.

Credit Only Granted for: AASP101 or AAAS101.

Formerly: AASP101.

AAAS187 The New Jim Crow: African-Americans, Mass Incarceration and the Prison Industrial Complex (3 Credits)

Students will examine the birth of the racial caste system following the abolition of slavery, the parallels between the racial hierarchy of the Jim Crow system and contemporary mass incarceration, and the rise of the prison industrial complex as a multi-billion business which thrives on the oppression of low-income populations and poor communities of color.

Recommended: AASP100.

Credit Only Granted for: AASP187 or AAAS187.

Formerly: AASP187.

AAAS190 HIV/AIDS in a Global Perspective (3 Credits)

Who is getting infected with HIV/AIDS? Who is dying from it? These are two questions that feature prominently on both the domestic and international health agendas. Even though the statistics from Africa garner the greatest global attention, the situation in the US, in particular the DC/Baltimore area and among certain groups, has recently raised concern and intensified the call for action. The goal of this "I" course is to engage students in a critical examination of 1) the factors that put people at risk for getting infected and 2) the factors that determine the type of treatment that people receive in the US as well as globally with a particular focus on Africa and the African diaspora.

Credit Only Granted for: AASP189I or AAAS190.

Formerly: AASP189I.

AAAS200 African Civilization (3 Credits)

A survey of African civilizations from 4500 B.C. to present. Analysis of traditional social systems. Discussion of the impact of European colonization on these civilizations. Analysis of the influence of traditional African social systems on modern African institutions as well as discussion of contemporary processes of Africanization.

Credit Only Granted for: AASP200 or AAAS200.

Formerly: AASP200.

AAAS202 Black Culture in the United States (3 Credits)

The course examines important aspects of African American life and thought which are reflected in African American literature, drama, music and art. Beginning with the cultural heritage of slavery, the course surveys the changing modes of Black creative expression from the 19th-century to the present.

Credit Only Granted for: AASP202 or AAAS202.

Formerly: AASP202.

AAAS210 Intro to Research Design and Analysis in African American and Africana Studies (3 Credits)

Introduces students to quantitative and qualitative research methods used in social science with a focus on Black populations and African American Studies Research. Uses practical exercises, such as class surveys and mock focus groups, to examine fundamental concepts of the research process from conceptualization of research questions to interpretation of data and research articles. The course is designed for undergraduate students with little or no background knowledge in social science research methods.

Credit Only Granted for: AASP210 or AAAS210.

Formerly: AASP210.

AAAS211 Get Out: The Sunken Place of Race Relations in the Post-Racial Era (3 Credits)

Prevailing thought suggests that we live in an era that is post-racial, particularly after the election of Barack Obama. Media often serves to drive our assessment of where our nation stands on issues like race, gender and sexuality. This course uses the film *Get Out* to delve into the production, evolution and significance of race in present day America. The course will engage multiple forms of media to investigate life in "Post-Racial" America, including but not limited to the role of stereotypes, interracial relationships, police-community relations, etc.

Credit Only Granted for: AASP211 or AAAS211.

Formerly: AASP211.

AAAS230 Social (In)Justice and African-American Health and Well-Being (3 Credits)

African Americans suffer worse outcomes than non-Hispanic whites on nearly every health measure and outcomes that link to overall well-being like depressive symptoms or homicides. Health disparities are experienced by other underrepresented minority groups, but because of the unique historic and current experiences of African Americans, the determinants and solutions to African American health disparities are unique. The premise of this course is that African American health disparities are due to social injustices perpetuated on the institutional level that have permeated the lived experiences of African Americans leading to racial disparities in health and well-being. As such, the solutions on the both policy, and community, level must have a social justice approach.

Credit Only Granted for: AASP230 or AAAS230.

Formerly: AASP230.

AAAS234 African-American Literature and Culture (3 Credits)

An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.

Cross-listed with: ENGL234.

Credit Only Granted for: ENGL234, AAAS234 or AASP298L.

AAAS254 African-American History to 1865 (3 Credits)

Survey of the principal developments in the history and culture of the peoples of African descent in colonial North America and the United States to 1865. Examines the African past, the Atlantic slave trade, variation in slavery, the growth of free black communities, the transformations of families and cultural forms, and patterns of resistance.

Cross-listed with: HIST254.

Credit Only Granted for: HIST254, AAAS254 or AASP298C.

AAAS255 African-American History, 1865 - Present (3 Credits)

An introductory course in the African-American experience in the United States from 1865 to the present. Topics include the aftermath of the Civil War on US race relations, the rise of segregation, northern migration, World War I and II, Civil Rights Movements, and the Black Power Movement.

Cross-listed with: HIST255.

Credit Only Granted for: HIST255, AASP255, AAAS255 or AASP298A.

AAAS260 Africa in World Politics (3 Credits)

Introduction to the politics of Africa, especially Sub-Saharan Africa, on the world stage from the colonial period era to recent push towards democracy in Africa and the rise of religious extremism. It also engages such themes as culture, religion and progress, dictatorship, former colonial powers and international influence, etc.

Credit Only Granted for: AASP260 or AAAS260 .

Formerly: AASP260.

AAAS263 Introduction to Black Women's Studies (3 Credits)

Interdisciplinary exploration of Black women, culture and society in the United States. Drawn primarily from the social sciences and history with complementary material from literature and the arts.

Cross-listed with: WGSS263.

Credit Only Granted for: WMST263, AASP298I, WGSS263, AAAS263 or AASP263.

Formerly: WMST263.

AAAS264 Quare/Queer Contentions: Exploration of Sexualities in the Black Community (3 Credits)

Centering the subjectivities of queer people of color generally and more specifically, Black people (as the word "quare" invites us to do), Quare/ Queer Contentions takes up key moments within the history of the Black community and asks us to consider the work and presence of LGBTQ people in these moments. The course also contends with the everyday experiences of LGBTQ subjects in the Black community. Quare/Queer Contentions, therefore, interrogates the material realities of Black queer people in the context of family, religion, cultural/creative work, among others. Interdisciplinary in orientation, the course will employ primary and secondary texts, film, art, autobiographical narratives and policy data.

Cross-listed with: LGBT264, WGSS264.

Credit Only Granted for: LGBT264, AASP264, AAAS264, WMST264 or WGSS264.

AAAS265 Constructions of Manhood and Womanhood in the Black Community (3 Credits)

Investigates the ways that African Americans are represented and constructed in public and private spheres and explores the social constructions and representations of Black manhood and womanhood from various disciplinary perspectives.

Cross-listed with: WGSS265.

Credit Only Granted for: WMST265, AASP298B, AAAS265, WGSS265 or AASP265.

Formerly: WMST265.

AAAS271 Monsters and Racism: Black Horror and Speculative Fiction (3 Credits)

The previous decade has been considered a renaissance for Black Horror. From Get Out to Lovecraft Country, the genre has enjoyed unprecedented mainstream media buzz and accolades. This course looks at contemporary Black horror and speculative fiction as cultural texts which put into question our notions of human(e) and inhuman(e) through critiques of white supremacy and accompanying oppressions. Students will learn a host of critical skills through close reading and analysis of literature and film by Black creators such as Jordan Peele, Misha Green, Toni Morrison, Jewelle Gomez, and Octavia Butler. With the ability to interpret cultural texts using literary criticism, film analysis, history, cultural studies, ethnic studies, feminist theory, and the social sciences, students will connect these texts to continuing historical and contemporary issues of racial and cultural oppression such as medical discrimination, policing and criminalization, misogynoir, and racialized capitalism.

Cross-listed with: WGSS271, ENGL289J.

Credit Only Granted for: AAAS271, ENGL289J, HONR299Y, HNUH238W, WGSS271 or WGSS298W.

Formerly: HNUH238W.

AAAS297 Research Methods in African American and Africana Studies (3 Credits)

Introduces African American and Africana Studies majors to the basic research skills, methodologies, sources, and repositories for studying African Diaspora. Students will be required to select a research topic, write a research proposal, develop an annotated bibliography, and in the process will be prepared for completing their senior thesis or other significant writing projects necessary to fulfill the requirements of the major.

Prerequisite: AAAS101 or AAAS202.

Restriction: Must be in African American and Africana Studies program.

Credit Only Granted for: AASP297 or AAAS297.

Formerly: AASP297.

AAAS298 Special Topics in African American and Africana Studies (3 Credits)

An introductory multi-disciplinary and inter-disciplinary educational experience to explore issues relevant to black life, cultural experiences, and political, economic, and artistic development.

Repeatable to: 6 credits if content differs.

Formerly: AASP298.

AAAS298M Martin Luther King Jr. (3 Credits)

Examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual, who articulated a moral compass of the nation, to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community", the Social Gospel, liberalism, "socially conscious democracy", militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.

Cross-listed with: HIST108C, AMST189C.

Credit Only Granted for: HIST108C, AASP298M, AAAS298M, or AMST189C.

AAAS299 Selected Topics in African American and Africana Studies (1-3 Credits)

An introductory multi-disciplinary academic exploration of the cultural, political, and economic issues relevant to Africans and African-Americans.

Repeatable to: 6 credits if content differs.

Formerly: AASP299.

AAAS301 Applied Policy Analysis and the Black Community (3 Credits)

Development and application of the tools needed for examining the effectiveness of alternative policy options confronting minority communities. Review policy research methods used in forming and evaluating policies. Examination of the policy process.

Prerequisite: AAAS101.

Recommended: Completion of one semester of statistics is recommended.

Credit Only Granted for: AASP301 or AAAS301.

Formerly: AASP301.

AAAS306 Race, Gender and Artificial Intelligence (AI) (3 Credits)

With the recent rise of accessible AI technologies, concerns about not only the potential flaws built into technology but also the impact of those issues on already marginalized communities loom large. From medical applications of AI in the personalizing of treatment and disease diagnosis, to the use of facial recognition software in the criminal justice system, AI is being integrated into all facets of everyday life. This class will explore the intersection of Artificial Intelligence (AI), race, and gender. There will be assigned readings on race, gender, difference, algorithms, and artificial intelligence. Students will engage with AI platforms, such as ChatGPT or Peo to gain hands-on experience about the platforms and how they work.

AAAS310 African Slave Trade (3 Credits)

The relationship of the slave trade of Africans to the development of British capitalism and its industrial revolution; and to the economic and social development of the Americas.

Prerequisite: AAAS202 or AAAS100; or permission of BSOS-African American and Africana Studies department.

Credit Only Granted for: AASP310 or AAAS310.

Formerly: AASP310.

AAAS313 Black Women in United States History (3 Credits)

Black American women's history from slavery to the present. Focused on gaining a fuller understanding of the effect of race, class and gender on the life cycles and multiple roles of Black women as mothers, daughters, wives, workers and social-change agents.

Cross-listed with: WGSS314.

Restriction: Sophomore standing or higher.

Credit Only Granted for: AASP313, AAAS313, WMST314 or WGSS314.

Formerly: WMST314.

AAAS317 Black in Latin America and the Caribbean (3 Credits)

The goal of this course is to have an understanding of race, color, and blackness across the Americas. We will compare and contrast forms of racial categorization, discrimination, and ideologies, whether in the form of nation-building projects, addressing racial inequality, or sexuality and family formation. We will draw primarily on social science perspectives, including the work of sociologists and political scientists.

Credit Only Granted for: AASP317 or AAAS317.

Formerly: AASP317.

AAAS330 Music of the African Diaspora: From Jazz to Modern Black Music (3 Credits)

The goal of this course is to explore a myriad of musical traditions created by Africans in the Diaspora, especially the music of African Americans. Explorations will notably encompass the infusion of Western/Classical Music and its mixing with "Black Music." The traditions and musical styles are related to experiences of culture, history, customs, legends, aesthetic musical forms, and the functional use of this music (e.g., Blues, Jazz, Gospel, Spirituals, Black Message Music, Neo Soul, RAP, and Hip-Hop) as a cultural repository. This cultural repository has subsequently impacted American history, the arts, literature, global values, and Diaspora Studies.

Credit Only Granted for: AASP330 or AAAS330.

Formerly: AASP330.

AAAS361 Caribbean Women (3 Credits)

An interdisciplinary analysis of the lives and experiences of women across the Caribbean region, through an examination of their roles in individual, national, social and cultural formations. Special emphasis on contemporary women's issues and organizations.

Cross-listed with: WGSS360.

Credit Only Granted for: WGSS360, WMST360, AAAS361 or AASP361.

Formerly: WMST360.

AAAS371 Black Feminist Thought (3 Credits)

Examines the ideas, words and actions of Black women writers, speakers, artists, and activists in the United States.

Prerequisite: 1 course in AASP; or 1 course in WGSS.

Cross-listed with: WGSS370.

Credit Only Granted for: WMST370, WGSS370, AAAS371 or AASP371.

Formerly: WMST370.

AAAS386 Experiential Learning (3-6 Credits)

Updating course code to align with department name change

Restriction: Permission of BSOS-African American and Africana Studies department; and junior standing or higher.

Credit Only Granted for: AASP386 or AAAS386.

Formerly: AASP386.

AAAS395 Fundamentals of Quantitative Research in Socio-Cultural Perspective (3 Credits)

Introduction to quantitative methods for African American and Africana Studies majors in the cultural and social analysis concentration. Basics of survey design and experimental design and data analysis and use of statistical software programs.

Restriction: Must be in African American and Africana Studies program; and junior standing or higher.

Credit Only Granted for: AASP395 or AAAS395.

Formerly: AASP395.

AAAS397 Senior Thesis (3 Credits)

Directed research in African American Studies resulting in the completion and defense of a senior thesis.

Restriction: Permission of BSOS-African American and Africana Studies department.

Credit Only Granted for: AASP397 or AAAS397.

Formerly: AASP397.

AAAS398 Selected Topics in the African Diaspora (3 Credits)

Analysis of the historical experiences and cultures of African-descendant peoples globally.

Repeatable to: 6 credits if content differs.

Formerly: AASP398.

AAAS399 Research in African-American and Africana Studies (1-3 Credits)

African American Studies research labs are the settings in which the most recent scholarly work of each faculty member takes place with the enterprise of conducting and disseminating research. Faculty members operate as the team leader and faculty mentor working with undergraduate students around a specific research topic or project. Students will have the opportunity to assist with reviewing literature, data gathering, data management, coding analysis, and the preparation of conference presentations and scholarly publications while advancing their own scholarship and interests, cultivating integrative skills, and gain training in a specialized aspect of the African American Studies discipline, which may not be otherwise available from other experiences on campus.

Prerequisite: Two of the following courses: AAAS100, AAAS101, AAAS200, or AAAS202.

Recommended: AASP210 or equivalent.

Restriction: Must be in the Africa-American and Africana Studies major; and must have completed 30 credits; and must have earned a minimum cumulative GPA of 2.00.

Repeatable to: 6 credits.

Formerly: AASP399.

AAAS400 Directed Readings in African American and Africana Studies (3 Credits)

The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.

Prerequisite: AAAS202 or AAAS100.

Credit Only Granted for: AASP400 or AAAS400.

Formerly: AASP400.

AAAS402 Classic Readings in African American and Africana Studies (3 Credits)

Classic readings of the social, economic and political status of Blacks and other minorities in the United States and the Americas.

Prerequisite: AAAS202 or AAAS100.

Credit Only Granted for: AASP402 or AAAS402.

Formerly: AASP402.

AAAS403 The Development of a Black Aesthetic (3 Credits)

An analysis of selected areas of black creative expression in the arts for the purpose of understanding the informing principles of style, techniques, and cultural expression which make up a Black aesthetic.

Prerequisite: ENGL443 or AAAS302; or permission of instructor.

AAAS410 Contemporary African Ideologies (3 Credits)

Analysis of contemporary African ideologies. Emphasis on philosophies of Nyerere, Nkrumah, Senghor, Sekou Toure, Kaunda, Cabral, et al. Discussion of the role of African ideologies on modernization and social change.

Credit Only Granted for: AASP410 or AAAS410.

Formerly: AASP410.

AAAS411 Black Resistance Movements (3 Credits)

A comparative study of the Black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.

Prerequisite: AAAS100.

Credit Only Granted for: AASP411 or AAAS411.

Formerly: AASP411.

AAAS413 Gentrification: Have You Met the New Neighbors?: Issues of Belonging and Displacement in Urban Areas (3 Credits)

Explores and considers current scholarship on the history, modes and implications of the process of gentrification in various areas within the United States. The course will engage with history, culture, and policy factors related to the redevelopment of urban areas. Course texts will be interdisciplinary in their methodology and genre, and will include themes of race, gender, and class. These texts, combined with student engagement, class discussion, and directed assignments will help to develop a theoretical framework for the understanding of gentrification as systematic, profound and in most if not all cases, irreversibly detrimental.

Credit Only Granted for: AASP413 or AAAS413.

Formerly: AASP413.

AAAS441 Science, Technology, and the Black Community (3 Credits)

Scientific knowledge and skills in solving technological and social problems, particularly those faced by the Black community. Examines the evolution and development of African and African American, and Africa Diasporic contributions to science. Surveys the impact of technological changes on minority communities.

Prerequisite: HIST255, AAAS202, or AAAS100; or permission of BSOS-African American and Africana Studies department.

Credit Only Granted for: AASP441 or AAAS441.

Formerly: AASP441.

AAAS443 Law and the Black Community (3 Credits)

The relationship between Black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.

Prerequisite: HIST255, AAAS202, or AAAS100; or permission of BSOS-African American and Africana Studies department.

Credit Only Granted for: AASP443 or AAAS443.

Formerly: AASP443.

AAAS468 Special Topics in Africa and the Americas (3 Credits)

Cultural, historical and artistic dimensions of the African experience in Africa, the Americas and the African Diaspora.

Repeatable to: 6 credits if content differs.

Formerly: AASP468.

AAAS498 Special Topics in Black Culture (3 Credits)

Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.

Prerequisite: AASP100, AAAS100, AASP202, or AAAS202.

Repeatable to: 6 credits if content differs.

Formerly: AASP498.

AAAS499 Advanced Topics in Public Policy and the Black Community (3 Credits)

Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.

Prerequisite: AASP301 or AAAS301; or permission of BSOS-African American and Africana Studies department.

Repeatable to: 6 credits if content differs.

AASP - African American Studies

AASP100 Introduction to African American Studies (3 Credits)

Significant aspects of the history of African Americans with particular emphasis on the evolution and development of black communities from slavery to the present. Interdisciplinary introduction to social, political, legal and economic roots of contemporary problems faced by blacks in the United States with applications to the lives of other racial and ethnic minorities in the Americas and in other societies.

AASP101 Public Policy and the Black Community (3 Credits)

The impact of public policies on the black community and the role of the policy process in affecting the social, economic and political well-being of minorities. Particular attention given to the post-1960 to present era.

Formerly: AASP300.

AASP187 The New Jim Crow: African-Americans, Mass Incarceration and the Prison Industrial Complex (3 Credits)

Students will examine the birth of the racial caste system following the abolition of slavery, the parallels between the racial hierarchy of the Jim Crow system and contemporary mass incarceration, and the rise of the prison industrial complex as a multi-billion business which thrives on the oppression of low-income populations and poor communities of color.

Recommended: AASP100.

AASP200 African Civilization (3 Credits)

A survey of African civilizations from 4500 B.C. to present. Analysis of traditional social systems. Discussion of the impact of European colonization on these civilizations. Analysis of the influence of traditional African social systems on modern African institutions as well as discussion of contemporary processes of Africanization.

AASP202 Black Culture in the United States (3 Credits)

The course examines important aspects of African American life and thought which are reflected in African American literature, drama, music and art. Beginning with the cultural heritage of slavery, the course surveys the changing modes of black creative expression from the 19th-century to the present.

AASP210 Intro to Research Design and Analysis in African American Studies (3 Credits)

Introduces students to quantitative and qualitative research methods used in social science with a focus on Black populations and African American Studies Research. Uses practical exercises, such as class surveys and mock focus groups, to examine fundamental concepts of the research process from conceptualization of research questions to interpretation of data and research articles. The course is designed for undergraduate students with little or no background knowledge in social science research methods.

AASP211 Get Out: The Sunken Place of Race Relations in the Post-Racial Era (3 Credits)

Prevailing thought suggests that we live in an era that is post-racial, particularly after the election of Barack Obama. Media often serves to drive our assessment of where our nation stands on issues like race, gender and sexuality. This course uses the film *Get Out* to delve into the production, evolution and significance of race in present day America. The course will engage multiple forms of media to investigate life in "Post-Racial" America, including but not limited to the role of stereotypes, interracial relationships, police-community relations, etc.

Credit Only Granted for: AASP298G or AASP211.

Formerly: AASP298G.

AASP230 Social (In)Justice and African-American Health and Well-Being (3 Credits)

African Americans suffer worse outcomes than non-Hispanic whites on nearly every health measure and outcomes that link to overall well-being like depressive symptoms or homicides. Health disparities are experienced by other underrepresented minority groups, but because of the unique historic and current experiences of African Americans, the determinants and solutions to African American health disparities are unique. The premise of this course is that African American health disparities are due to social injustices perpetuated on the institutional level that have permeated the lived experiences of African Americans leading to racial disparities in health and well-being. As such, the solutions on the both policy, and community, level must have a social justice approach.

AASP258 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

AASP260 Africa in World Politics (3 Credits)

Introduction to the politics of Africa, especially Sub-Saharan Africa, on the world stage from the colonial period era to recent push towards democracy in Africa and the rise of religious extremism. It also engages such themes as culture, religion and progress, dictatorship, former colonial powers and international influence, etc.

AASP274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)

Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

Restriction: Must not have completed ENGL271, ENGL274, ENGL294, or AASP274. Cross-listed with ENGL274.

Credit Only Granted for: ENGL274 or AASP274.

AASP297 Research Methods in African American Studies (3 Credits)

Introduces African American Studies majors to the basic research skills, methodologies, sources, and repositories for studying African Diaspora. Students will be required to select a research topic, write a research proposal, develop an annotated bibliography, and in the process will be prepared for completing their senior thesis or other significant writing projects necessary to fulfill the requirements of the major.

Prerequisite: AASP101 or AASP202.

Restriction: Must be in African American Studies program.

Credit Only Granted for: AASP297 or AASP299R.

Formerly: AASP299R.

AASP298 Special Topics in African American Studies (3 Credits)

An introductory multi-disciplinary and inter-disciplinary educational experience to explore issues relevant to black life, cultural experiences, and political, economic, and artistic development.

Repeatable to: 6 credits if content differs.

AASP299 Selected Topics in African American Studies (1-3 Credits)

An introductory multi-disciplinary academic exploration of the cultural, political, and economic issues relevant to Africans and African-Americans.

Repeatable to: 6 credits if content differs.

AASP301 Applied Policy Analysis and the Black Community (3 Credits)

Development and application of the tools needed for examining the effectiveness of alternative policy options confronting minority communities. Review policy research methods used in forming and evaluating policies. Examination of the policy process.

Prerequisite: AASP101.

Recommended: Completion of one semester of statistics is recommended.

AASP303 Computer Applications in African American Studies (3 Credits)

Introduction to statistics and database processing software used in model estimation and simulation in policy analysis. Special emphasis on applications for applied research on policy problems confronting minority communities.

Prerequisite: STAT100, MATH107, MATH111, or SOCY201; or students who have taken courses with comparable content may contact the department.

AASP305 Theoretical, Methodological and Policy Research Issues in African American Studies (3 Credits)

Theories and concepts in the social and behavioral sciences relating to problems in minority communities. Issues include validity and soundness of theoretical arguments, epistemological questions of various methodologies and the relationship between policy making and policy research.

Prerequisite: AASP301; and (STAT100, MATH111, PSYC200, BMGT230, or SOCY201). Or students who have taken courses with comparable content may contact the department.

Formerly: AASP401.

AASP310 African Slave Trade (3 Credits)

The relationship of the slave trade of Africans to the development of British capitalism and its industrial revolution; and to the economic and social development of the Americas.

Prerequisite: AASP202 or AASP100; or permission of BSOS-African American Studies department.

Formerly: AASP311.

AASP317 Black in Latin America and the Caribbean (3 Credits)

The goal of this course is to have an understanding of race, color, and blackness across the Americas. We will compare and contrast forms of racial categorization, discrimination, and ideologies, whether in the form of nation-building projects, addressing racial inequality, or sexuality and family formation. We will draw primarily on social science perspectives, including the work of sociologists and political scientists.

AASP320 Poverty and African American Children (3 Credits)

The United States has high levels of child poverty compared to other industrialized nations. Poverty rates are particularly high among African American children. This course focuses on how poverty and race intersect to influence the development of children and youth. Specific topics that we will consider include definitions of poverty, theories about the causes of poverty, racial disparities in child poverty, family functioning in the context of poverty, neighborhood influences, risk and protective processes, and social policies and programs designed to mitigate the impact of poverty.

Credit Only Granted for: AASP320 or AASP298P.

Formerly: AASP298P.

AASP358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

AASP360 Issues in African Development (3 Credits)

An introduction to the study of development on the African continent. Students will have an opportunity to think critically about the ways in which Africa is portrayed in the academic literature, popular press, and media. Issues of focus include population dynamics, gender, health, migration, HIV/AIDS, and globalization with particular attention paid to the role of culture.

Credit Only Granted for: AASP398D, GEOG398A, GVPT359F, SOCY398Y, or AASP360.

Formerly: AASP398D.

AASP386 Experiential Learning (3-6 Credits)

Restriction: Permission of BSOS-African American Studies department; and junior standing or higher.

AASP395 Fundamentals of Quantitative Research in Socio-Cultural Perspective (3 Credits)

Introduction to quantitative methods for African American Studies majors in the cultural and social analysis concentration. Basics of survey design and experimental design and data analysis and use of statistical software programs.

Restriction: Must be in African American Studies program; and junior standing or higher.

AASP396 Independent Study Non-Thesis Option (3 Credits)

A research seminar that allows African American Studies majors to complete an independent study research project in lieu of completing the AASP397: Senior Thesis. Students will examine various concepts of race, gender, labor and ethnicity in the seminar lecture component to be applied toward their specific research projects.

Prerequisite: AASP386 and AASP297.

Restriction: Must be in African American Studies program.

Credit Only Granted for: AASP396 or AASP397.

AASP397 Senior Thesis (3 Credits)

Directed research in African American Studies resulting in the completion and defense of a senior thesis.

Restriction: Permission of BSOS-African American Studies department.

AASP398 Selected Topics in the African Diaspora (3 Credits)

Analysis of the historical experiences and cultures of Africans in the diaspora.

Repeatable to: 6 credits if content differs.

AASP399 Research in African-American Studies (1-3 Credits)

African American Studies research labs are the settings in which the most recent scholarly work of each faculty member takes place with the enterprise of conducting and disseminating research. Faculty members operate as the team leader and faculty mentor working with undergraduate students around a specific research topic or project. Students will have the opportunity to assist with reviewing literature, data gathering, data management, coding analysis, and the preparation of conference presentations and scholarly publications while advancing their own scholarship and interests, cultivating integrative skills, and gain training in a specialized aspect of the African American Studies discipline, which may not be otherwise available from other experiences on campus.

Prerequisite: Two of the following courses: AASP100, AASP101, AASP200, or AASP202.

Recommended: AASP210 or equivalent.

Restriction: Must be in the Africa-American Studies major; and must have completed 30 credits; and must have earned a minimum cumulative GPA of 2.00.

Repeatable to: 6 credits.

AASP400 Directed Readings in African American Studies (3 Credits)

The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.

Prerequisite: AASP202 or AASP100.

AASP401 Research Directions in African-American Studies (3 Credits)

Utilizing a pro seminar format, this course offers an overview of recent research on the experiences of African Americans and the African diaspora. The course will cover selective topics from research portfolios of department faculty related to the status of African Americans and the diaspora across a number of topics. Students will read recent original research studies and discuss with the authors both the theoretical underpinnings of the research, the methods and evaluate the interpretations. This course fulfills the capstone requirement for African American studies majors and certificate students by providing an opportunity to consolidate and integrate a range of ideas encountered in the curriculum.

Restriction: Must have earned a minimum of 90 credits; and must be major in African-American Studies.

AASP402 Classic Readings in African American Studies (3 Credits)

Classic readings of the social, economic and political status of blacks and other minorities in the United States and the Americas.

Prerequisite: AASP202 or AASP100.

AASP411 Black Resistance Movements (3 Credits)

A comparative study of the black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.

Prerequisite: AASP100.

AASP413 Gentrification: Have You Met the New Neighbors?: Issues of Belonging and Displacement in Urban Areas (3 Credits)

Explores and considers current scholarship on the history, modes and implications of the process of gentrification in various areas within the United States. The course will engage with history, culture, and policy factors related to the redevelopment of urban areas. Course texts will be interdisciplinary in their methodology and genre, and will include themes of race, gender, and class. These texts, combined with student engagement, class discussion, and directed assignments will help to develop a theoretical framework for the understanding of gentrification as systematic, profound and in most if not all cases, irreversibly detrimental.

AASP441 Science, Technology, and the Black Community (3 Credits)

Scientific knowledge and skills in solving technological and social problems, particularly those faced by the black community. Examines the evolution and development of African and African American contributions to science. Surveys the impact of technological changes on minority communities.

Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP443 Blacks and the Law (3 Credits)

The relationship between black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.

Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP468 Special Topics in Africa and the Americas (3 Credits)

Cultural, historical and artistic dimensions of the African experience in Africa and the Americas.

Repeatable to: 6 credits if content differs.

AASP478 Humanities Topics in African American Studies (3 Credits)

Advanced studies in the humanities, often requiring prerequisites, focusing on the literary, artistic and philosophical contributions of Africans and African Americans.

Repeatable to: 6 credits if content differs.

AASP479 Special Research in African-American Studies (1-9 Credits)

Supervised research activity within the African American Studies Department. This course is for both majors and non-majors who seek to work for a faculty member on their research project(s) and/or work in their research lab as a Research Assistant (RA). The purpose of this course is to expose undergraduate students to theories and methods used to understand the lives and experiences of Black people across the diaspora via hands-on/applied research experience. A faculty member must agree to supervise your research activity before students can enroll for course credit.

Recommended: AASP210.

Restriction: Permission of BSOS- African American Studies department; and sophomore standing or higher.

Repeatable to: 9 credits.

AASP493 Feminist and Nationalist Thought in Black Communities (3 Credits)

The historical and theoretical foundations of feminist and nationalist thought in Black Communities will be examined. Further, we will discover why feminist and nationalist thought has been routinely ignored or misrepresented as disparate, if not oppositional, themes in Black intellectual and political life.

Prerequisite: AASP101 or AASP100.

Credit Only Granted for: AASP493 or AASP499W.

Formerly: AASP499W.

AASP498 Special Topics in Black Culture (3 Credits)

Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.

Prerequisite: AASP202 or AASP100.

Repeatable to: 6 credits if content differs.

AASP499 Advanced Topics in Public Policy and the Black Community (3 Credits)

Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.

Prerequisite: AASP301; or permission of BSOS-African American Studies department.

Repeatable to: 6 credits if content differs.

AAST - Asian American Studies

AAST200 Introduction to Asian American Studies (3 Credits)

The aggregate experience of Asian Pacific Americans, from developments in the countries of origin to their contemporary issues. The histories of Asian Pacific American groups as well as culture, politics, the media, and stereotypes, viewed from an interdisciplinary perspective.

Cross-listed with: AMST298C.

Credit Only Granted for: AAST200 or AMST298C.

AAST201 Asian American History (3 Credits)

Introduction to the history of Asian Americans and Asians in the United States and the Americas and to the field of Asian American Studies, from an interdisciplinary perspective. Topics include theories of race and ethnicity; Asian migration and diaspora to the Americas; Asian American work and labor issues; gender, family, and communities; nationalism and nativism, and anti-Asian movements; Asian Americans in World War II, the Cold War, and the issues in the civil rights & post-civil rights era.

Cross-listed with: HIST221.

Credit Only Granted for: AAST201 or HIST221.

AAST233 Asian American Literature and Culture (3 Credits)

What is the role of literature in the lives of contemporary Asian Americans? How do Asian American authors imagine identity, violence, and social justice? Consider the role of Asian American literature in forming our understanding of past and present Asian America, and explore Asian American cultures and experiences.

Cross-listed with: ENGL233.

Credit Only Granted for: ENGL233 or AAST233.

AAST250 Asian American Foodways (3 Credits)

Kimchi, chop suey, Spam, "curry," poke: while these foods are now widely embraced, we will inquire how "hallmark" Asian/American foods have assumed cultural meaning and significance in the U.S., often through their transnational entanglements with histories of colonialism, exclusion, immigration, war, and globalization. We will think about how the aesthetics and significations of taste are bound up in the ways Asian Americans perceive themselves and are perceived by others, inquiring how ideas of the "perpetual foreigner" and the "model minority" might inform consumption practices. As the title of this course suggests, foodways will be a central area of analysis, never static but defined by mobility and transmission for Asian American communities. You will also be invited to explore your own relationships to Asian American food cultures through personal and academic accounts, a diverse range of media (TV, film, social media), cookbooks, and memoirs.

Credit Only Granted for: AAST298G or AAST250.

Formerly: AAST298G.

AAST262 Asian American Psychology (3 Credits)

An overview of how socio-cultural influences impact the development and psychological health of Asian Americans. Other topics include how minority group status, adaptation and identity development influence various aspects of psychological functioning; the role of historic systematic racism; and, how the COVID-19 pandemic has negatively impacted Asian Americans. Students develop a deeper understanding of the role of stereotypes and racism, acculturation, racial identity development, cultural values, gender socialization, behavioral norms, family roles, stressors and social support systems on the mental health, well-being and health of Asian Americans.

Cross-listed with: PSYC262.

Credit Only Granted for: PSYC262, AAST262 or PSYC489Z.

Formerly: PSYC489Z.

AAST298 Special Topics in Asian American Studies (3 Credits)

An introductory multidisciplinary and interdisciplinary educational experience to explore issues relevant to Asian American life, cultural experiences; and political, economic, and artistic development.

Repeatable to: 6 credits if content differs.

AAST310 Introduction to Comparative Ethnic and Racial Studies (3 Credits)

Introduces students to the study of race and ethnicity in the United States. The class is organized according to the following five units: (1) Introduction; (2) Key concepts; (3) Mechanisms of racial formation; (4) Prevailing myths about race; and (5) Contemporary issues related to race and ethnicity. Through readings, film clips, and presentations, we will explore how the concept of race has developed and endured over time and become familiar with key concepts, such as "race" and "intersectionality". We will attempt to better understand how race is associated with other forms of difference, such as class, gender and ethnicity. We will identify and confront the prevailing myths about race and ethnicity in the United States. Finally, we examine the ways in which contemporary issues reveal the dynamics of race and ethnicity.

Cross-listed with: AMST310.

Credit Only Granted for: AMST310, AAST398F, AAST310, or AMST328L.

Formerly: AMST328L and AAST398F.

AAST322 Immigration and Ethnicity in the US (3 Credits)

Explores historical and contemporary Asian immigration to the US in comparison to and in the context of other immigrant groups. From low-skilled laborers to highly-skilled professionals, Asian and other immigrants have been an integral part of the shifting US economy and society since its inception. The course includes theories on why immigration occurs, determinants of its continuation, the uses of migrant labor, and immigrant adaptation and settlement. The second part of the course focuses on theories of ethnicity and racial formation and how immigrants develop and challenge the definitions of race, ethnicity, the "other", and ultimately, who is American. Students will also have the opportunity to gain first-hand knowledge of the immigrant experience through a life history interview project.

Cross-listed with: SOCY322.

Credit Only Granted for: AAST322, SOCY222, HIST322 or SOCY322.

Formerly: AAST222, SOCY222.

AAST350 South Asian American Experiences (3 Credits)

Explores the historical and current day experiences of diverse South Asian groups in the United States. Drawing from an array of materials, including historical, literary, visual and media texts, the course examines several key issues-- such as immigrant family and generational gap, racial stereotyping, media representation, the intersections of gender, race, and sexuality, the model minority and identity politics, casteism, and interracial relations and ethnic identity formation-- from both national and transnational frameworks for understanding historical and contemporary experiences of South Asian Americans.

Credit Only Granted for: AAST298O or AAST350.

Formerly: AAST298O.

AAST351 Asian Americans and Media (3 Credits)

From yellow peril invaders to model minority allies, Asian Americans have crafted their own dynamic cultural expressions in a number of media from film, television, and music to fashion, sports, and food that reveal and contest the contradictions of the U.S. nation-state. Asian American culture also uniquely sits at the nexus of immigration flows and digital technologies, providing a transnational lens to view the US place in the world. This advanced course, then, will introduce students to the study and practice of Asian American culture as multiple, hybrid, and heterogeneous. It will do so through three sections: section one will introduce students to classical, cultural, and media concepts as well as relevant keywords outlined by Asian American Studies scholars; section two will review the work of Asian American cultural theorists; section three will focus on analyses of particular Asian American cultural productions. In doing so, students will gain an understanding of the shifting and interlocking tensions among the local, the national, and the global that form the cultural geographies of Asian America.

Credit Only Granted for: AAST351, AAST398M or AAST398N.

Formerly: AAST398M, AAST398N.

AAST355 Asian Americans in Film (3 Credits)

Explores how Asian Americans have historically been represented in the U.S. by Hollywood, and in turn, how independent and Hollywood Asian American filmmakers have represented themselves. It covers the history of racial, gendered, and sexualized representations of Asian Americans in Hollywood, as well as Asian American filmic responses within and outside Hollywood. It also introduces how four basic tools of film analysis mise-en-scene, cinematography, editing and sound work together to create meaning in moving images. It examines how these elements are put together in three different types of films by Asian American filmmakers: narrative, documentary, and experimental. How films function in society to circulate ideas that reproduce and challenge stereotypes about Asian Americans.

Cross-listed with: AMST328W.

Credit Only Granted for: AAST355, AAST398L or AMST328W.

Formerly: 398L.

AAST363 Filipino American History and Biography (3 Credits)

Focus is placed on Filipino American experiences with an emphasis on identity, community building and organizing to influence public policy. We will cover pertinent events from the US and Philippine history in order to understand the impact of colonialism, migration, immigration and assimilation on Filipino Americans.

Cross-listed with: AMST323.

Credit Only Granted for: AAST363, AMST323, AAST398D, or AMST328J.

Formerly: AAST398D.

AAST378 Experiential Learning (3 Credits)

Field experience/internship in professional organizations and appropriate private and governmental agencies serving the Asian American community.

Restriction: Permission of UGST-Undergraduate Studies.

Repeatable to: 6 credits.

AAST388 Independent Research (1-3 Credits)

Directed, independent study in Asian American Studies resulting in the completion of an original research paper.

Restriction: Permission of UGST-Undergraduate Studies.

Repeatable to: 6 credits if content differs.

AAST394 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)

An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.

Cross-listed with: AMST324, IMMR394.

Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.

Formerly: AAST398E.

AAST398 Selected Topics in Asian American Studies (3 Credits)

Study of a specific theme or issue involving the Asian American experience.

Repeatable to: 6 credits if content differs.

AAST420 Asian American Women: The Social Construction of Gender (3 Credits)

Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.

Cross-listed with: WGSS420.

Restriction: Must not have completed WMST420.

Credit Only Granted for: AAST420, WMST420 or WGSS420.

AAST421 Asian American Public Policy (3 Credits)

Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.

Cross-listed with: AMST418N.

Credit Only Granted for: AAST421, AAST498M or AMST418N.

Formerly: AAST498M.

AAST422 Asian American Women and Gender (3 Credits)

Examines Asian/American cultural production along with theories of gender and sexuality in the field of Asian American Studies. We consider how Asian American femininities/masculinities are conceived and circulated, drawing from a diverse selection of twentieth-century and contemporary texts, films and images that connect Asian American bodies to ideas of absence, danger, inscrutability, hyper- or hypo-sexuality, and virulence. Beginning with early to mid-twentieth century representations, the course attends to theories that clarify the contested relationship between the East/West and Asia/U.S. Also examined are the methods through which bodies differentiated by sex, gender, and race are managed, surveilled, and rehabilitated, with close attention to the enduring legacies of American expansionism and conquest, anti-immigration policies in the U.S., and twentieth-century wars and occupations in Asia. The course engages Women of Color feminisms, queer theory, and disability studies.

Credit Only Granted for: AAST498G or AAST422.

Formerly: AAST498G.

AAST424 Sociology of Race Relations (3 Credits)

Encourages sociological thinking about US racial and ethnic minority populations, with a focus on African Americans, Latinos, Asian Americans, and Native Americans. The central concern is to understand and explain racial/ethnic inequality. A wide array of topics are discussed, including prejudice and discrimination, slavery, residential segregation, cultural inequality, skin tone stratification, economic and educational disparities, and assimilation/generational processes.

Prerequisite: 6 credits in SOCY courses; or permission of the Sociology department.

Cross-listed with: SOCY424.

Credit Only Granted for: SOCY424 or AAST424.

AAST440 South Asian American Literature and Culture (3 Credits)

Examines writing by South Asian American authors and authors writing about South Asian American issues. It explores major South Asian diaspora themes, considering how migration, war, the events of 9/11, global capitalism, and the changing socio-political and racial scene have affected South Asians in the United States. We will use a transnational approach to consider how writers and filmmakers explore gender, class, religious, caste, and other differences amongst South Asian Americans. We will also examine the place of South Asian Americans in relation to other Asian American populations. We will consider how South Asian American texts disrupt traditional literary classifications based on national identities by reflecting the complex global conditions, imperialistic and capitalistic expansion, and interconnectedness of peoples, nations, and cultures that have transformed American literature and conceptions of American identity.

Credit Only Granted for: AAST440 or AAST498W.

Formerly: AAST498W.

AAST443 Asian American Politics (3 Credits)

Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.

Cross-listed with: AMST498J, GVPT368C.

Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.

Formerly: AAST498T.

AAST498 Advanced Topics in Asian American Studies (3 Credits)

Advanced study of the cultural and historical antecedents of contemporary Asian American society. Emphasis on the social, political, economic, and behavioral factors affecting Asian Americans and their communities.

Repeatable to: 6 credits if content differs.

AAST499 Senior Thesis (3 Credits)

Under the supervision of faculty, research regarding a specific topic of the Asian American experience will be completed.

Prerequisite: AAST201 and AAST200.

Restriction: Permission of UGST-Undergraduate Studies; and must be in Asian American Studies program.

Repeatable to: 6 credits if content differs.

AGNR - Agriculture and Natural Resources

AGNR100 Agriculture Discovery: An Educational Odyssey Exploring Food, Culture, and the Environment (3 Credits)

Explores the history, cultural impact, and current issues of agriculture. Students are exposed to the wide range of professional opportunities associated with the use of plants and animals in the production and processing of food for human consumption. Students learn from Agriculture and Natural Resources (AGNR) faculty and USDA collaborators through lectures, labs and field trips to facilities in the Baltimore-Washington area.

AGNR200 AGNR 2+2 Program Extended Orientation Seminar (1 Credit)

Introduces AGNR 2+2 students to University and "American" life. Assists with their successful transition to the College and Agriculture and Natural Resources and the University of Maryland. Helps students to understand their place in AGNR at to learn about the resources available to them.

Prerequisite: Must be a first semester international student enrolled in the AGNR 2+2 Program.

Restriction: Must be a first year international student enrolled in the College of Agriculture and Natural Resources 2+2 Program.

Additional Information: It is strongly recommended that AGNR 2+2 students take AGNR 200 during the first semester at the University. One class meeting per week. This courses is initiated by International Programs and will be coordinated in conjunction with the College of AGNR.

AGNR270 Technology Training Seminar (2-3 Credits)

A hands-on training seminar about pedagogical applications of information technology and mastery of several technical skills. Special emphasis is placed on gainfully understanding technological issues such as copyright and intellectual property, accessibility, and usability.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-College of Agriculture & Natural Resources.

Credit Only Granted for: AGNR270 or BSCI279.

AGNR301 Sustainability (3 Credits)

Designed for students whose academic majors would be enhanced by the complementary study of a widely shared but hard-to-operationalize aspiration: that present choices should preserve or improve future options rather than foreclose or degrade them. How should we understand sustainability? How might we achieve it? How would we know if we had achieved it? And how could sustainability activists of a rising generation lead by example?

Cross-listed with: PLCY301.

Credit Only Granted for: AGNR301, PUA301, or PLCY301.

Formerly: PUA301.

AGNR386 Experiential Learning (3-6 Credits)

Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

Formerly: AGRI386.

AGNR388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Restriction: Must be admitted to AGNR Honors program.

Repeatable to: 6 credits if content differs.

Formerly: AGRI388.

AGNR489 Field Experience (1-4 Credits)

Credit according to time scheduled and organization of the course. A lecture series organized to study in depth a selected phase of agriculture not normally associated with one of the existing programs.

Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

Repeatable to: 4 credits if content differs.

Formerly: AGRI489.

AGNR499 Special Problems (1-3 Credits)

Formerly: AGRI499.

AGST - Agricultural Science and Technology

AGST130 Did Yeast Create Civilization? (3 Credits)

Did yeast create civilization? Fermented foods have played a major role in the transition from nomadic to settled agrarian societies, the establishment of social and religious customs, the expansion of empires, and modern economies. To what extent are our past and current attitudes towards fermented foods rooted in historical and cultural imprints?

Explore the central role of fermentation in human history and culture, the basic microbiological processes underlying fermentation processes, and the processes used to produce and distribute fermented foods.

Find out how the fruits, grains, and dairy products used to produce fermented foods are grown and selected. Students will learn about the development and modern use of fermented dairy products, pickles, bread, tea, chocolate, wine, beer, distilled liquors, and pharmaceutical/manufactured products.

Recommended: CHEM103, CHEM131, CHEM135, or CHEM146.

Cross-listed with: PLSC130.

Credit Only Granted for: AGST130 or PLSC130.

AGST275 Fundamentals of Agricultural and Environmental Chemistry (3 Credits)

An in-depth discussion of chemistry targeted to students enrolled in plant and animal management curricula offered in AGNR. Covers the nomenclature and basic functional groups in organic chemistry, natural products and pesticides. Current practices of crop, agriculture and environmental management and genetic engineering also discussed.

Prerequisite: Minimum grade of C- in CHEM131 and CHEM132; and minimum grade of C- in (PLSC110 and PLSC11) or (PLSC112 and PLSC113) or (BSCI160 and BSCI161) or (BSCI170 and BSCI171).

Restriction: Must not have completed CHEM104 or CHEM105; and must be in a major within the AGNR-College of Agriculture and Natural Resources; or permission of instructor.

Credit Only Granted for: AGST275 or PLSC275.

Formerly: PLSC275.

AGST333 Crafty Beverage Crops (3 Credits)

From soda to wine, a scientific introduction to "crafty beverage crops". Students will expand their horticulture knowledge and gain an appreciation for craft beverages and the plants that made them. Topics include history, biology, production and management techniques, harvest, storage and market potential for crafty beverage crops.

Recommended: PLSC110 or PLSC112; or 1 course in BSCI, BCHM, BIOL.

AGST389 Internship in Agricultural Education (1-3 Credits)

An experiential learning course with a focus on non-formal agricultural education. This is a supervised learning experience within a career focused environment to assist in refinement of a student's career interests prior to graduation.

Restriction: Permission of the instructor.

Repeatable to: 6 credits if content differs.

AGST399 Special Problems in Agricultural Science & Technology (1-3 Credits)

A problem based learning course with a focus on class or group based research projects in Agricultural Science and Technology with a focus on addressing outreach targeted needs.

Restriction: Permission of the instructor.

Repeatable to: 6 credits if content differs.

AGST400 Advanced Crop Science (3 Credits)

Focuses on the study of the agronomic principles and practices required for the production of food, feed, fiber and fuel crops. This is a project-based course where students will develop a farm plan from knowledge gained in previous courses and built upon in this course. Students will learn to integrate data and information from many sources in order to build and operate a successful and sustainable agronomic farm operation using current and new technology. The use of farm management software will be an integral part of the course and farm project.

Prerequisite: PLSC112, PLSC113, BSCI160, BSCI161, and MATH113 or higher.

Recommended: ANSC101.

Credit Only Granted for: PLSC407 or AGST400.

Formerly: PLSC407.

Additional Information: There will be two required Saturday field trips during the semester. Because of the changing nature of agriculture, the dates of these field trips will be decided upon at the beginning of the semester by discussion among the students and based on cooperators availability and environmental factors. Students will have a minimum of two weeks notice as to the dates of the field trips.

AGST401 Tractor and Equipment Operation, Safety and Maintenance (1 Credit)

Provides students with basic skills needed to safely operate and maintain farm equipment, such as tractors and implements used in agronomic production. Students will receive introductory background training in the basic safety and operation of tractors through hands-on learning. Emphasis will also be placed on the mechanical functioning of equipment and the functional similarities and differences between gasoline (two-stroke and four-stroke) and diesel engines as well as electric motors as they relate to farm equipment (mobile and stationary). This knowledge will be used to teach students to safely perform basic care and maintenance of different tractor types as well as various implements. Students will also learn basic implement connection and disconnection, including the safe use of implements that employ a power take-off unit. Included in the course will be an introduction to the equipment and use of satellite navigation systems used in agronomic production.

Prerequisite: PLSC112 and PLSC113; MATH113 or higher MATH course; and must have completed or be concurrently enrolled in AGST400.

Restriction: Must be in the Agricultural Science and Technology major (01010) with priority given to Agronomy students (0101A); and must have earned a minimum of 60 credits; and permission of the Department of Plant Sciences and Landscape Architecture.

Additional Information: Course location will be the University of Maryland Wye Research & Education Center, Queenstown, Maryland. Because students will be working around machinery with moving parts, there is a strict dress code based on information from the United State Department of Agriculture Cooperative States Research, Education and Extension Service's Hazardous Occupations Safety Training for Agriculture (HOSTA), National Safe Tractor and Machinery Operation Program (NSTMOP) standards. YContact instructor for more information?.

AGST426 Scientists Teaching and Translating Science (3 Credits)

Explore methods in pedagogy, andragogy, and heutagogy to facilitate science learning through the development of a teaching philosophy, outreach teaching skills, motivation in learning, assessment foundations, and review of current literature on instruction in science fields.

Credit Only Granted for: AGST426 or PLSC489L.

Formerly: PLSC489L.

AGST440 Exploring Maryland Agriculture, Agricultural Industry, and Agricultural Literacy (3 Credits)

Explore the mission and history of the Land Grant System as well as current work conducted through the University of Maryland to extend research to citizens. Often referred to as America in miniature, Maryland boasts diverse people, agricultural practices, cultures, and ecosystems which students will examine to perceive the decision making processes within and across ecological systems as well as the development of advisory boards.

AGST489 Special Topics in Agricultural Science and Technology (1-3 Credits)

Selected novel topics of study in Agricultural Science & Technology (AGST).

Restriction: Permission of the instructor.

Repeatable to: 9 credits if content differs.

AGST499 Independent Studies in Agricultural Science and Technology (1-3 Credits)

An inquiry based learning course with individualized projects designed by student and faculty focused on: research or advanced learning experiences in Agricultural Science and Technology including field, greenhouse, laboratory, educational site, travel abroad and/or library studies. Conducted under the direction of a faculty member.

Restriction: By permission of instructor.

Repeatable to: 6 credits if content differs.

AMSC - Applied Mathematics & Scientific Computation

AMSC420 Mathematical Modeling (3 Credits)

The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and 1 course with a minimum grade of C- from (STAT400, STAT410); and 1 course with a minimum grade C- from (CMSC106, CMSC131).

Cross-listed with: MATH420.

Credit Only Granted for: AMSC420 or MATH420.

AMSC452 Introduction to Dynamics and Chaos (3 Credits)

An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.

Prerequisite: MATH341; or MATH246 and one of (MATH240 or MATH461).

Cross-listed with: MATH452.

Credit Only Granted for: AMSC452 or MATH452.

AMSC460 Computational Methods (3 Credits)

Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246.

Cross-listed with: CMSC460.

Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

AMSC466 Introduction to Numerical Analysis I (3 Credits)

Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410.

Cross-listed with: CMSC466.

Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC498 Selected Topics in Applied Mathematics (1-3 Credits)

Topics in applied mathematics of special interest to advanced undergraduate students.

Repeatable to: 6 credits if content differs.

AMST - American Studies

AMST101 Introduction American Studies (3 Credits)

Introduces students to the interdisciplinary field of American Studies by examining concepts such as culture, identity, cultural practices, and globalization, as well as theories underlying these concepts. Engages key themes, especially constructions of difference and identity, cultures of everyday life, and America and the world.

Credit Only Granted for: AMST101 or AMST201.

Formerly: AMST201.

AMST189C Martin Luther King Jr. (3 Credits)

Examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual, who articulated a moral compass of the nation, to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community", the Social Gospel, liberalism, "socially conscious democracy", militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.

Cross-listed with: HIST108C, AAAS298M.

Credit Only Granted for: HIST108C, AASP298M, AAAS298M, or AMST189C.

AMST202 Cultures of Everyday Life in America (3 Credits)

Examine the structures and patterns of everyday life in the U.S., utilizing methods such as ethnography, oral history, survey research, and textual, visual, and material cultural analysis.

AMST203 Popular Culture in America (3 Credits)

An introduction to American popular culture, its historical development, and its role as a reflection of and influence on our culture and society.

AMST204 Film and American Culture Studies (3 Credits)

Exploration of the American film from a historical perspective, illustrating the motion picture's role as an institutional phenomenon, as a form of communication, and as a source of cross-cultural study.

AMST205 American Material Culture: The Study of People, Places, and Things (3 Credits)

Historical survey of American material culture. Ways of describing and interpreting accumulated material evidence (e.g., buildings, town plans) introduced by stressing relationship between artifact and culture.

AMST210 Introduction to Ethnography (3 Credits)

A qualitative research method course used to study social worlds communities, cultures, institutions, and other social groups from the perspectives of the people who inhabit those social worlds. Ethnographic research involves understanding cultural traditions from an insider's perspective by studying the everyday lives of people steeped in those traditions.

AMST212 Diversity in American Culture (3 Credits)

Exploration of the role of diversity in the shaping of American culture. Special emphasis will be placed on the multicultural origins of American popular and material culture, such as foodways and entertainment, and on the experience of "Americanization."

AMST213 Heroes and Villains in American Film (3 Credits)

We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.

Cross-listed with: CINE282.

Credit Only Granted for: AMST213, HONR219F, CINE282 or FILM298V.

Formerly: HONR219F, FILM298V.

AMST250 Empire and Settler Colonialism (3 Credits)

Engages with the connections between settler colonialism and empire/imperialism and what their effects are on race, land, dispossession, and migration. The course will begin by grounding students in course key concepts including Settler Colonialism, Empire, Imperialism, Sovereignty, and Legality, situating these concepts in relation to space, place, and geography. The second half of the course will use these theoretical lenses to analyze the social conditions faced by BIPOC peoples. These topics will cover criminalization and police violence, Indigenous and women of color feminist and two spirit/queer experience, environmental racism, and state-based forms of racial documentation. The course will end with a discussion of decolonization and what it means in relation to settler colonialism and empire.

AMST260 American Culture in the Information Age (3 Credits)

Examines the ways in which content and form of public information interact with the culture, families & individuals.

Credit Only Granted for: AMST260 or AMST298I.

Formerly: AMST298I.

AMST262 Houses, Schools, and Prisons in American Life (3 Credits)

This interdisciplinary course explores the role of property, discipline, and punishment in American life. By exploring the ideological underpinnings in property, discipline, and punishment and their manifestations in houses, schools, and prisons we will explore how these entities reflect American society and its values.

AMST269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

AMST290 Constructing Cultural Mainstreams and Margins in the U.S. (3 Credits)

Examines the construction, operation, and meaning of cultural mainstreams and margins in a range of contexts, spaces, and times in the U.S. Using a variety of primary sources, research methods, and interdisciplinary scholarship, we will explore how Americans make and assign meaning to cultural mainstreams and margins. We will examine how and why cultural margins and mainstreams shift over time and what their consequences have been for social policies, laws, power relations, and national identity.

Credit Only Granted for: AMST289A or AMST290.

Formerly: AMST289A.

AMST298 Selected Topics in American Studies (3 Credits)

Cultural study of a specific theme or issue involving artifacts and documents from both past and contemporary American experience.

Repeatable to: 6 credits if content differs.

AMST298Q U.S. Latinx Literature and Culture (3 Credits)

Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.

Cross-listed with: ENGL235.

Credit Only Granted for: ENGL235 or AMST298Q.

AMST310 Introduction to Comparative Ethnic and Racial Studies (3 Credits)

Introduces students to the study of race and ethnicity in the United States. The class is organized according to the following five units: (1) Introduction; (2) Key concepts; (3) Mechanisms of racial formation; (4) Prevailing myths about race; and (5) Contemporary issues related to race and ethnicity. Through readings, film clips, and presentations, we will explore how the concept of race has developed and endured over time and become familiar with key concepts, such as "race" and "intersectionality". We will attempt to better understand how race is associated with other forms of difference, such as class, gender and ethnicity. We will identify and confront the prevailing myths about race and ethnicity in the United States. Finally, we examine the ways in which contemporary issues reveal the dynamics of race and ethnicity.

Cross-listed with: AAST310.

Credit Only Granted for: AMST310, AAST398F, AAST310, or AMST328L.

Formerly: AMST328L and AAST398F.

AMST312 Introduction to Native American and Indigenous Studies (3 Credits)

Key concepts and theories in Native American Studies beginning with an overview of the field and some of its foundational readings and history, then will move into an understanding of Native American identity and representation and a discussion of Indigenous sovereignty and self-determination. The course will outline past and present genocidal practices that seek to eliminate Native people and Indigenous responses to those structures such as the concept of survivance, Native feminisms, and theories of Indigenous resurgence. The course seeks to move students through an understanding of past and present structures affecting Native American people in the United States and Canada and move into readings that highlight Native articulations of present and future agency. While the focus of the course is Native peoples with the United States and Canada, understanding Indigenous histories and concepts always includes a hemispheric and transnational analysis.

Credit Only Granted for: AMST328N, ANTH468F, RELS319N, or AMST312.

Formerly: AMST328N, ANTH468F, or RELS319N.

AMST315 Religion in American Culture (3 Credits)

Introduces students to the world's major religious traditions and examines how American culture informs, and is informed by, the variety of religious beliefs and practices in the U.S. This course is primarily concerned with religion as a system of meaning. The focus of the course is not on the history of religion or on analysis of religious texts, but rather on the meaning of a religion to its believers.

Recommended: AMST101.

Credit Only Granted for: AMST315 or AMST328R.

Formerly: AMST328R.

AMST320 (Dis)ability in American Film (3 Credits)

Explores the connection between film and disability through an analysis of independent and mainstream American films in various film genres. Specifically, we will consider how these film representations reflect and/or challenge the shifting social perspectives of disability over the 20th and 21st centuries. Beginning with the presentation of disability as theatrical spectacle in the traveling sideshow and early cinema, we will work our way through film history to develop an understanding of our society's complicated relationship with disability.

Credit Only Granted for: AMST320 or AMST328X.

Formerly: AMST328X.

AMST323 Filipino American History and Biography (3 Credits)

Focus is placed on Filipino American experiences with an emphasis on identity, community building and organizing to influence public policy. We will cover pertinent events from the US and Philippine history in order to understand the impact of colonialism, migration, immigration and assimilation on Filipino Americans.

Cross-listed with: AAST363.

Credit Only Granted for: AAST363, AMST323, AAST398D, or AMST328J.

Formerly: AAST398D.

AMST324 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)

An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.

Cross-listed with: AAST394, IMMR394.

Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.

Formerly: AAST398E.

AMST328 Perspectives on Identity and Culture (3 Credits)

Analysis of the cultural aspect of identity formation and the role of individual or community identities in cultural production. Examination of cultural texts such as film, literature, fashion, artifacts, archival records, architecture, monuments, sports, and paintings.

Repeatable to: 9 credits if content differs.

AMST328W Asian Americans in Film (3 Credits)

Explores how Asian Americans have historically been represented in the U.S. by Hollywood, and in turn, how independent and Hollywood Asian American filmmakers have represented themselves. It covers the history of racial, gendered, and sexualized representations of Asian Americans in Hollywood, as well as Asian American filmic responses within and outside Hollywood. It also introduces how four basic tools of film analysis mise-en-scene, cinematography, editing and sound work together to create meaning in moving images. It examines how these elements are put together in three different types of films by Asian American filmmakers: narrative, documentary, and experimental. How films function in society to circulate ideas that reproduce and challenge stereotypes about Asian Americans.

Cross-listed with: AAST355.

Credit Only Granted for: AAST355, AAST398L or AMST328W.

Formerly: 398L.

AMST340 Introduction to History, Theories and Methods in American Studies (3 Credits)

Introduction to the process of interdisciplinary research, including research literatures, questions, first-hand sources and library and analytic methods in American Studies. Each student will craft a prospectus for original research.

Prerequisite: Must have completed AMST201; and 2 courses in AMST.

Restriction: Must be in American Studies program; and sophomore standing or higher.

AMST369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

AMST386 Experiential Learning (3-6 Credits)

Restriction: Permission of ARHU-American Studies department; and junior standing or higher.

AMST388 Honors Thesis (3-6 Credits)

Individual research, thesis and oral defense. The research project will be conducted under the supervision of a faculty member.

Restriction: Must be admitted to AMST honors program; and permission of ARHU-American Studies department; and senior standing.

Repeatable to: 6 credits if content differs.

AMST398 Independent Studies (1-3 Credits)

Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.

Restriction: Permission of ARHU-American Studies department.

Repeatable to: 6 credits if content differs.

AMST418 Cultural Themes in America (3 Credits)

Examination of structure and development of American culture through themes such as "growing up American," "culture and mental disorders," "race," "ethnicity," "regionalism," "landscape," and "humor."

Repeatable to: 6 credits if content differs.

AMST418N Asian American Public Policy (3 Credits)

Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.

Cross-listed with: AAST421.

Credit Only Granted for: AAST421, AAST498M or AMST418N.

Formerly: AAST498M.

AMST425 Film and American Landscape (3 Credits)

Explores how representations of various geographic spaces in American film impact our understanding of community, identity, and place. In particular, we will think about how these spaces are culturally produced and changeable rather than static. The same space can hold diverse meanings for various groups of people and how such a space is represented in film is often wrapped up with issues of power, the reinforcement of stereotypes, and the creation of self/other dichotomies. By analyzing a variety of narrative, documentary, major studio, and independent films, we will seek to understand how American films' representations of rural, urban, and suburban spaces both reflect, contradict, and often influence our lived experiences of these spaces; in other words, this course will examine how the "reel" intersects with the "real".

Credit Only Granted for: AMST418K or AMST425.

Formerly: AMST418K.

AMST428 American Cultural Eras (3 Credits)

Investigation of a decade, period, or generation as a case study in significant social change within an American context. Case studies include "Antebellum America, 1840-1860" and "American culture in the Great Depression."

Repeatable to: 6 credits if content differs.

AMST429 Perspectives on Popular Culture (3 Credits)

Topics in popular culture studies, including the examination of particular genres, themes, and issues.

Repeatable to: 6 credits if content differs.

AMST450 Seminar in American Studies (3 Credits)

Developments in theories and methods of American Studies scholarship, with emphasis upon interaction between the humanities and the social sciences in the process of cultural analysis and evaluation.

Prerequisite: AMST201 and AMST340; and 1 course in AMST.

Restriction: Senior standing; and must be in American Studies program.

AMST498 Special Topics in American Studies (3 Credits)

Topics of special interest.

Repeatable to: 9 credits if content differs.

AMST498J Asian American Politics (3 Credits)

Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.

Cross-listed with: AAST443, GVPT368C.

Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.

Formerly: AAST498T.

AMST499 Independent Studies (1-3 Credits)

Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.

Restriction: Permission of ARHU-American Studies department; and must be in American Studies program.

Repeatable to: 6 credits if content differs.

ANSC - Animal Science

ANSC101 Principles of Animal Science (3 Credits)

A comprehensive overview of the application of biology in the care and use of animals that live in close association with humans including food animals, companion animals, lab animals, zoo animals, etc. The role of science in modern food production using animals will be emphasized.

ANSC103 Principles of Animal Science Laboratory (1 Credit)

Laboratory focusing on the application of biology in the care and use of animals that live in close association with humans including livestock and companion animals. Labs will include live animals.

Prerequisite: Must have completed or be concurrently enrolled in ANSC101.

Restriction: Must be in one of the following programs (Environmental Sci & Pol-Environment & Agriculture; Agricultural and Veterinary Medicine; Agricultural Science and Technology) ; or must be in a major within the AGNR-Animal & Avian Sciences department; or permission of department required for students in other College of AGNR programs.

ANSC105 Horse Care Practicum (1 Credit)

This practicum course provides the opportunity for students to be involved in the routine care of the horses housed at the Campus Farm including grooming, feeding, turnout, first aid, record-keeping, and cleaning. Practical skills are supplemented with online learning.

Restriction: Permission of the instructor.

Credit Only Granted for: ANSC108 or ANSC105.

Formerly: ANSC108.

ANSC115 Careers in the Animal Sciences (1 Credit)

Discussion of current employment opportunities in Animal Science, primarily by invited speakers. In addition, students will have the opportunity to prepare resumes and improve oral presentation skills while working with their peers.

Prerequisite: ANSC101 and ANSC103.

ANSC120 Introduction to Dairy Judging (2 Credits)

Students will establish an understanding of dairy cattle anatomy and importance in dairy production, while gaining the ability to evaluate dairy cattle for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of evaluation and gain confidence in public speaking.

ANSC121 Introduction to Livestock Judging (2 Credits)

Students will establish a working understanding of the structural anatomy of several livestock species- cattle, sheep, pigs, goats- and their individual importance in the Agricultural Industry, while gaining the ability to evaluate these species for soundness and show-ring appeal. Additionally, the class aims to provide students with confidence in justifying decisions of based on their evaluations and gain skills in public speaking. The course will include two weekend field trips to farms in order to practice judging skills.

ANSC201 Anatomy and Physiology of Domestic Animals (4 Credits)

The anatomy and physiology of domesticated animals with emphasis on functions related to homeostasis. Students will be developing an ability to think about material in processes. They will also gain experience in scientific writing and data analysis.

Prerequisite: ANSC101, ANSC103, BSCI170, and BSCI171.

ANSC204 Anatomy of Domestic Animals (2 Credits)

Covering the anatomy of major species of domestic animals. Utilizes a systemic approach to provide a general knowledge of both gross and microscopic mammalian structure. Comparative differences between the major domestic species are covered.

Prerequisite: ANSC101, ANSC103, BSCI170 and BSCI171.

Corequisite: ANSC205.

Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

Credit Only Granted for: ANSC211 or ANSC204 AND ANSC205.

Formerly: ANSC211.

ANSC205 Anatomy of Domestic Animals Laboratory (2 Credits)

A regional approach is taken to study the gross anatomy of major domestic species in the laboratory portion of this course.

Prerequisite: ANSC101, ANSC103, BSCI170 and BSCI171.

Corequisite: ANSC204.

Restriction: Must be in one of the following programs (Environmental Sci&Pol-Wildlife Resources & Cons; Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

Credit Only Granted for: ANSC211 or ANSC204 and ANSC205.

Formerly: ANSC211.

ANSC210 Veterinary Terminology (1 Credit)

Students will learn terminology related to the clinical practice of small and large animal medicine including medical record terminology and a systems-based consideration of common practices and pathologies.

Prerequisite: ANSC204 and ANSC205; or ANSC201.

Restriction: Must be a major in Animal Sciences.

Additional Information: The course is offered on-line through a series of self-paced modules on ELMS.

ANSC212 Applied Animal Physiology (3 Credits)

The physiology of domesticated animals with emphasis on functions related to homeostasis, and the physiological adaptation to environmental influences.

Prerequisite: ANSC211; or (ANSC204 and ANSC205); or students who have taken courses with comparable content may contact the department.

ANSC214 Applied Animal Physiology Laboratory (1 Credit)

Application of physiological laboratory techniques to domestic and lab animals.

Prerequisite: Must have completed or be concurrently enrolled in ANSC212.

ANSC220 Livestock Management (3 Credits)

Management of meat animals including beef, sheep, and swine. This course will emphasize obtaining optimal efficiency of production through the integration of leading edge breeding, feeding, management, and marketing practices.

Prerequisite: ANSC101 and ANSC103.

ANSC226 The Future of Animal Agriculture (3 Credits)

Offers students the opportunity to learn about the history of animal agriculture in the United States and envision what its future might be as it adapts to major challenges such as our growing global population, climate change, food injustice, antimicrobial and insecticide resistance, animal welfare concerns, and farmer distress. The course will examine technological & biotechnological, agroecological, and social innovations that address these issues while providing healthy, safe, nutritious food. Students are invited to learn about these issues and to create and propose their own solutions through weekly "extend your learning" opportunities and a course project in animal agricultural extension.

Additional Information: The course is hosted on ELMS-Canvas and will require students to have reliable access to the internet.

ANSC227 Eating with Eyes Wide Open (3 Credits)

Are our diet and agricultural production methods sustainable? Students will investigate tensions created by trade-offs made by consumers relative to dietary choices which, in turn, can influence agricultural production methods. The course will inform students about their food supply so they can make informed dietary decisions and practice intentional/informed eating.

ANSC232 Horse Management (3 Credits)

An introductory course on the care, management, and use of horses. Major topics include the industry, breeds, conformation, feeding, health, reproduction, facilities and business.

Prerequisite: ANSC101 and ANSC103.

Credit Only Granted for: ANSC232 or ANSC332.

Formerly: ANSC332.

ANSC233 Equine Behavior (2 Credits)

Both normal and anomalous behavior of horses will be covered. Emphasis will be given to techniques based on knowledge of behavior that are known to be safe and effective in handling horses.

Prerequisite: ANSC101, ANSC103, and ANSC232.

Credit Only Granted for: ANSC489B or ANSC233.

Formerly: ANSC489B.

ANSC235 Applied Small Ruminant Parturition (2 Credits)

Popularly known as "Lamb Watch", the course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning. Covered topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal delivery, management of lambs, qualitative assessment, breeding principles, etc.

Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.

Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

ANSC237 Equine Reproductive Management (3 Credits)

Students learn the fundamental skills necessary to manage an equine breeding herd including anatomy/physiology of genital tracts, estrus detection, manipulation of the estrous cycle, semen collection, pre- and post-foaling techniques, infertility, and health and nutrition of the mare, foal and stallion. Students will be required to spend ~ 30 hours during the spring semester caring for broodmares and foals and attending at least one foaling and estrous detection checks on broodmares outside of regularly scheduled class time.

Prerequisite: ANSC232.

Credit Only Granted for: ANSC237 or INAG233.

Additional Information: Course participation will include nightly checks of mares in the two weeks prior to parturition, and out-of-class time imprinting and working with newborn foals.

ANSC242 Dairy Cattle Management (3 Credits)

All aspects of dairy production, including nutrition, reproduction, mastitis control, milking management, farmstead facilities, financial management and forage production.

Prerequisite: ANSC101 and ANSC103.

Formerly: ANSC240 and ANSC241.

ANSC245 Sheep Management (3 Credits)

Popularly known as "Lamb Watch", this course provides an immersion environment for learning and understanding pre- and post-natal care of ewes and lambs through direct, hands-on involvement in the birthing process and care of the neonate through weaning on the campus farm. Course topics include zoonoses, basic reproductive physiology of the sheep, normal and abnormal parturition, management of lambs, qualitative assessment, breeding principles, nutrition, products and their marketing, and ram management.

Prerequisite: Minimum grade of C- in ANSC101 and ANSC103.

Restriction: Must be in one of the following programs (Animal Sciences: Animal Care & Management; Animal Sciences: Equine Studies; Animal Sciences: Laboratory Animal Care; Animal Sciences: Sciences/Preprofessional; Animal Sciences: Animal Biotechnology; Agricultural and Veterinary Medicine).

Credit Only Granted for: ANSC235 or ANSC245.

ANSC246 Beef Management (3 Credits)

Provides an interactive environment for learning and understanding all areas of beef cattle management including hands-on involvement in the birthing process and care of newborn calves on the campus farm. Course topics will include: An introduction to Beef Production, Breeding and Selection, Reproduction, Nutrition, Cattle Health and Diseases, Cattle Behavior, facility design and management, and Careers working in the American Beef industry.

Prerequisite: ANSC101 and ANSC103.

Additional Information: Students will participate in night watches at the campus farm.

ANSC250 Companion Animal Care and Management (3 Credits)

Care and management of the companion small animals. Species covered include the cat, dog, rodents, lagomorphs, reptiles, amphibians, birds and others as class interest and schedule dictate. Basic description, evolutionary development, breeding, nutritional and environmental requirements, and public health aspects will be presented for each species.

Credit Only Granted for: ANSC250 and ANSC305.

Formerly: ANSC305.

ANSC252 Introduction to the Diseases of Wildlife (3 Credits)

The principal diseases of North American wildlife will be briefly considered. For each disease, specific attention will be given to the following: signs evidenced by the affected animal or bird, causative agent, means of transmission and effects of the disease on the population of the species involved.

Prerequisite: BSCI105; or (BSCI170 and BSCI171); or permission of AGNR-Animal & Avian Sciences department; or students who have taken courses with comparable content may contact the department.

ANSC255 Introduction to Aquaculture (3 Credits)

Introduces the art and science of rearing aquatic animals and the essential principles of aquaculture. Students receive hands-on training in the methods required for successful husbandry and management of aquatic animals in their water environment.

Prerequisite: ANSC101 and ANSC103; or must have completed an introductory biology course.

ANSC260 Laboratory Animal Management (3 Credits)

A comprehensive course in care and management of laboratory animals. Topics covered include regulations governing the use of animals in research, laboratory animal facility design and management, animal research models, animal health management and husbandry, responsibilities of lab animal workers and career opportunities in the field. Hands-on labs focus on lab animal handling, husbandry and common techniques. Field trips are required, and you must attend a minimum number of field trips which will be held during lab time.

Prerequisite: ANSC101 and ANSC103.

Credit Only Granted for: ANSC260 or ANSC413.

Formerly: ANSC413.

ANSC262 Commercial Poultry Management (3 Credits)

Theory and science of rearing poultry and marketing poultry meat and eggs in the commercial sector. Includes current issues, organization of the industry, as well as fundamental biology of the domestic chicken. Students will help raise a flock of broiler chickens. Field trips to commercial poultry operations are required.

Prerequisite: ANSC101 and ANSC103.

ANSC270 Animal Enterprise Management (3 Credits)

General principles of enterprise organization, management, and operation as applicable to food, livestock, and companion animals. Enterprise planning and establishment, management of financial, human, and animal resources, and other related topics will be investigated.

Prerequisite: ANSC101 and ANSC103; or permission of instructor.

Credit Only Granted for: ANSC270 or AREC306.

ANSC282 Grazing Animal Management (3 Credits)

For students interested in acquiring knowledge and skills in pasture management, grazing management of livestock (large and small ruminants, horses), and hay production. Fundamental information regarding best management practices for soils, plants, and grazing livestock will be covered

Prerequisite: ANSC101 and ANSC103; or permission of instructor.

Credit Only Granted for: ANSC110, ANSC282, or INAG116.

Formerly: ANSC110.

ANSC314 Comparative Animal Nutrition (3 Credits)

The fundamental role and implications of dietary preference, gastrointestinal physiology and nutrients in animal nutrition. Biochemical roles of nutrients in metabolism, digestion, absorption and assimilation as it relates to various life processes.

Prerequisite: ANSC101 and ANSC103; and (CHEM231, PLSC275 or AGST275).

ANSC315 Applied Animal Nutrition (3 Credits)

Elements of nutrition, source characteristics and adaptability of various feedstuffs to several classes of livestock. A study of the composition of feeds, nutrient requirements and computerized formulation of economic diets and rations for livestock.

Prerequisite: ANSC314.

ANSC327 Molecular and Quantitative Animal Genetics (3 Credits)

Classical, molecular, and population genetics with specific emphasis on animal systems will be covered. Also, disseminate information on molecular approaches for manipulating genetics at the whole animal level (transgenic and cloning). Other model organisms will be discussed to provide a conceptual framework.

Prerequisite: ANSC101, CHEM131, and ANSC103. And BSCI105; or (BSCI170 and BSCI171).

ANSC330 Equine Science (3 Credits)

Students will explore key principles of equine anatomy, physiology, exercise, genetics, nutrition, and health management. Emphasis is placed on recognizing, managing, and preventing common equine disorders, providing students with the skills to address challenges faced by horse owners and farm managers. Through case studies and practical applications, students will develop a comprehensive understanding of maintaining equine well-being and optimizing performance.

Prerequisite: ANSC232; or permission of instructor.

Recommended: ANSC212 and ANSC214; or ANSC201.

Credit Only Granted for: ANSC230 or ANSC330.

Formerly: ANSC230.

ANSC340 Health Management of Animal Populations (3 Credits)

A study of common and emerging animal diseases and their prevention and control. The main focus will be on livestock and poultry diseases. However, zoonotic, wildlife, and laboratory animal diseases will also be discussed along with risk assessment, bioterrorism counter-measures, and animal welfare, especially as these topics interface or impact animals used in food production.

Prerequisite: BSCI223; and (ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, or ANSC262).

Recommended: ANSC212.

Credit Only Granted for: ANSC340 or ANSC412.

Formerly: ANSC412.

ANSC359 Internship Experience in Animal and Avian Sciences (3-6 Credits)

Experiential learning is a key component in an animal science education. Through the internship program, you will have the opportunity to develop your expertise in a specific species and discipline within the animal science curriculum. You will arrange an on- or off-campus internship experience related to animal science. You will spend a specified number of hours at the internship site each week and attend biweekly classroom sessions where we will discuss how the study of animal science fits into your specific internship experience as well as understand how to achieve each of the course learning outcomes.

Prerequisite: ANSC220, ANSC232, ANSC237, ANSC242, ANSC245, ANSC246, ANSC250, ANSC262, or ANSC282.

Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; and permission of instructor.

Repeatable to: 6 credits if content differs.

Additional Information: Students are required to submit an application to the Animal Science Internship Coordinator to enroll in this course.

ANSC371 Sustainable Agriculture and Environment: Global Seminar (1 Credit)

Students will learn how developing countries are building their agricultural economies to address multiple goals including reducing poverty, improving food security, as well as decreasing impacts from climate change and decreasing greenhouse gas emissions. The historical, political and social context will be discussed, and perspectives will be provided from representatives from diverse groups including farm workers, farm owners, women, and indigenous peoples. We will discuss examples of sustainable agroecology and incentives and impediments to their implementation.

Additional Information: This course is a prerequisite and companion to an optional winter-term study abroad course, ANSC372. Together these courses provide 3 General Education credits for Scholarship in Practice (DSSP) and Diversity: Cultural Competence (DVCC), and an elective for the Sustainability Minor.

ANSC372 Sustainable Agriculture and Environment: Study Abroad (2 Credits)

A short-term study abroad course on agriculture in developing countries. Travel destination will vary from year to year among member countries with campuses of the Latin American Institute of Agroecology, and member organizations in the international farm organization, La Via Campesina. Travel will include farm visits, women's cooperatives, and cultural organizations. Students will focus on poverty reduction, food security, and climate change, and the historical, political, and social context. A research paper is required based on interviews.

Prerequisite: ANSC371.

Additional Information: This course and the prerequisite (ANSC371) together provide 3 General Education credits for Scholarship in Practice (DSSP) and Diversity: Cultural Competence (DVCC), and an elective for the Sustainability Minor.

ANSC379 Animal Science Undergraduate Teaching Assistant Seminar (2 Credits)

Seminar course for undergraduate teaching assistants within ANSC.

Prerequisite: Permission of instructor.

Repeatable to: 8 credits.

Formerly: ANSC390.

ANSC386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of AGNR-Animal & Avian Sciences department.

Restriction: Junior standing or higher.

ANSC388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Restriction: Must be in the AGNR Honors program.

Repeatable to: 6 credits if content differs.

ANSC389 Experiential Learning (3-6 Credits)

Prerequisite: Permission of AGNR-Animal & Avian Sciences department.

Restriction: Junior standing or higher.

Repeatable to: 6 credits if content differs.

Formerly: ANSC386.

ANSC398 Seminar - Research (1 Credit)

Presentation and discussion of current literature and research work in animal science.

Prerequisite: ANSC101 and ANSC103.

Repeatable to: 2 credits if content differs.

ANSC399 Special Problems in Animal Science (1-2 Credits)

Work assignments are designed to be proportional to the amount of credit. Students are expected to develop an abstract, fact sheet, manuscript, oral presentation, poster, webpage, journal-log, or other scholarly product associated with their study and/or project.

Prerequisite: ANSC101 and ANSC103.

Restriction: Permission of AGNR-Animal & Avian Sciences department; and junior standing or higher.

Repeatable to: 6 credits if content differs.

ANSC401 Animal Growth and Development for Production Agriculture (3 Credits)

An integration of the physiological, genetic, and nutritional bases of animal growth, development, and body composition with application to livestock production.

Prerequisite: ANSC201.

ANSC410 The Gut Microbiome and its Roles in Health and Disease (3 Credits)

A comprehensive perspective of the role of gut microbiome/microflora in nutrition, metabolism, disease prevention and health issues including farm animal health and food value, and human gastrointestinal health and immunity.

Prerequisite: BSCI223, ANSC212, ANSC327, EPIB301, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC489M or ANSC410.

Formerly: ANSC489M.

ANSC417 Regulatory Issues in Animal Care and Management (3 Credits)

A study of regulatory issues affecting animal care and management in the livestock industry. Guest speakers and classroom discussions will focus on key topics including animal welfare, feed and drug regulations, animal identification, CAFO management, processing and marketing of animal products.

Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, ANSC262, or ANSC282; or permission of instructor.

Additional Information: Field trips may be required for this course.

ANSC435 Experimental Embryology (3 Credits)

Experimental approaches in animal embryology with emphasis on, domestic livestock systems as applied to research and production systems. Lab will, include hands-on experiments and demonstrations of techniques that are commonly, used in industry and research.

Prerequisite: ANSC212 or ANSC201.

Recommended: ANSC446.

Credit Only Granted for: ANSC435 or ANSC489M.

Formerly: ANSC489M.

ANSC436 Animal Health Policy and Communication (3 Credits)

Intended for upper level students in Veterinary Medicine or Animal Science as well as other students who are interested in understanding how science and politics interact and influence animal health policy and how veterinarians and animal scientists can effectively communicate science to non-scientists such as legislators and policymakers.

Recommended: Completion of ANSC225 and ANSC340 recommend.

Cross-listed with: VMSC436.

Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; or permission of AGNR-VA-MD Regional COL Veterinary Med.

Credit Only Granted for: ANSC489A, ANSC436, or VMSC436.

Formerly: ANSC489A.

ANSC437 Animal Biotechnology (3 Credits)

Key concepts and current issues in animal biotechnology are covered. Current techniques and applications systems as well as social, ethical, and regulatory issues associated with biotechnology will be discussed.

Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

ANSC440 Zoonotic Diseases and Control (3 Credits)

Global perspective of foodborne diseases common to animals and man, specifically those caused by farm animal-originated human pathogens (zoonoses) and their control. A selection of important zoonoses and food safety issues will be specifically covered with an emphasis on the principles of zoonotic disease transmission and control, risk factors to humans, and surveillance methods.

Prerequisite: BSCI223, ANSC212, ANSC327, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC440 or ANSC489R.

Formerly: ANSC489R.

ANSC443 Physiology of Lactation (3 Credits)

A comprehensive survey of lactation in laboratory and domestic animals. Other species are discussed where possible. Emphasis will be placed on physiological aspects of milk synthesis and secretion and on the cellular and molecular biology of mammary gland development.

Prerequisite: ANSC212; and (CHEM231, PLSC275 or AGST275).

Recommended: BCHM463.

ANSC444 Domestic Animal Endocrinology (3 Credits)

Current developments in endocrinology as it relates to animals used in the production of food and other products important to the well being of humans will be covered.

Prerequisite: ANSC212; or permission of instructor.

Restriction: Must not have completed ANSC644.

Credit Only Granted for: ANSC489I, ANSC444, or ANSC644.

Formerly: ANSC489I.

ANSC445 Comparative Digestive Physiology (3 Credits)

Comparative gastrointestinal physiology and the pathophysiology of diseases involved in animal-related research. A comparative approach will be presented for much of this material, using the human, canine, porcine, equine, bovine, and avian when information is available. The ultimate aim of the course is to provide a comprehensive knowledge of comparative gastrointestinal pathophysiology, and to give students an insight into the current field of human and veterinary gastroenterology. Students should feel more comfortable reading cutting edge literature by the end of the course, and should acquire a greater understanding of potential digestive disease areas for their future career such as graduate, medical, and veterinary students.

Prerequisite: ANSC212.

ANSC446 Physiology of Mammalian Reproduction (3 Credits)

Anatomy and physiology of reproductive processes in domesticated and wild mammals.

Prerequisite: ANSC212 or BSCI440.

ANSC447 Physiology of Mammalian Reproduction Laboratory (1 Credit)

Gross and micro-anatomy, artificial insemination, estrous cycle synchronization and invitro-fertilization procedures and analytical techniques useful in animal management and reproduction.

Prerequisite: Must have completed or be concurrently enrolled in ANSC446.

ANSC450 Animal Breeding Plans (3 Credits)

Design of animal breeding programs for the genetic improvement of livestock and companion animal species. Principles of population and quantitative genetics. Genetic evaluations of animals, selection strategies and crossbreeding systems. Incorporation of statistics and biotechnology into animal breeding plans.

Prerequisite: ANSC101; and 1 course with a minimum grade of C- from (MATH120, MATH136, MATH140, or BIOM301).

Restriction: Junior standing or higher.

ANSC452 Avian Physiology (3 Credits)

The digestive, excretory, respiratory, circulatory, immune, skeletal muscle, endocrine and nervous systems of avian species will be examined.

Prerequisite: ANSC212.

Restriction: Junior standing or higher.

ANSC453 Animal Welfare and Bioethics (3 Credits)

Ethical concerns related to the use of animals in modern society. Historical and philosophical overview of animal welfare and bioethics. Applied ethical discussions on human/animal interrelationships, physical and genetic manipulation, and other current issues associated with the treatment of animals used in food production, research, zoos, and as pets.

Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161); or permission of instructor.

Restriction: Junior standing or higher.

ANSC454 Nutritional Aspects of Metabolic Disease (3 Credits)

Biochemical and physiological fundamentals of nutrition. Discussion of protein, fat, carbohydrate, minerals and vitamins and their roles and interrelationships in nutrition, metabolism and diseases in humans and animals. The course will use recommended texts for foundation material as well as research papers to provide in-depth coverage and illustrate emerging themes in metabolic aspects of nutrition and disease.

Prerequisite: CHEM131 and ANSC101, or BSCI170; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: ANSC489O or ANSC454.

Formerly: ANSC489O.

ANSC455 Applied Animal Behavior (3 Credits)

Principles of animal behavior applied to production systems in animal agriculture.

Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161).

ANSC460 Comparative Vertebrate Immunology (3 Credits)

Basic concepts in immunology, and comparing immunity in different vertebrates, including organization of immune systems, innate and adaptive immune responses. Special attention will be paid to how cell-mediated and humoral immune responses are induced in natural infections, and what are the effector mechanisms in both of these processes. Immune response in representative disease models such as infections with viruses and bacteria, cancer, and autoimmune disease will be discussed. Lectures concerning cutting-edge research will also be given.

Prerequisite: ANSC212, BSCI201, or BSCI440.

Credit Only Granted for: ANSC460 or ANSC489I.

Formerly: ANSC489I.

ANSC489 Current Topics in Animal Science (1-3 Credits)

Examination of current developments in the animal sciences.

Repeatable to: 6 credits if content differs.

ANSC497 Animal Biotechnology Recombinant DNA Laboratory (3 Credits)

An advanced course offering hands-on experience in performing recombinant DNA experiments. Current molecular biology techniques used for cloning genes, analyzing the gene products, and modifying the genes of animals will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.

Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

Recommended: ANSC437 and ANSC435.

ANTH - Anthropology

ANTH138 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ANTH210 Introduction to Medical Anthropology and Global Health (3 Credits)

An introduction to the central concepts in medical anthropology and the anthropology of global health. This course is a survey of anthropological notions of health, disease, and the body in cross-cultural and global contexts, including classic and contemporary texts. It will provide an examination of systems of knowledge and practice with regard to illness, healing, and global health inequities.

ANTH221 Introduction to Forensic Sciences (3 Credits)

Provides a brief history of forensic sciences, an introduction to some of the techniques used, and a demonstration of some of the applications of forensic sciences. A survey course designed to give the student some exposure to the kinds of scientific knowledge and techniques applied to the medico-legal investigation of death and other crimes.

Credit Only Granted for: ANTH298A or ANTH221.

Formerly: ANTH298A.

ANTH222 Introduction to Ecological and Evolutionary Anthropology (4 Credits)

An introduction to the evolution of human physiology and human behavior, the relationship between hominid and non-hominid primates, and the study of relationships between a population of humans and their biophysical environment.

Credit Only Granted for: ANTH220 or ANTH222.

ANTH238 Special Topics Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ANTH240 Introduction to Archaeology (3 Credits)

Exploration of the variety of past human societies and cultures through archaeology, from the emergence of anatomically modern humans to the more recent historical past.

ANTH242 Fire, Farming and Climate Change: An Archaeology Take on the History of Human Impacts on our Planet (3 Credits)

An examination of why climate changes, the methods for recording climate change, and case studies of the varied responses of past human societies to climate change in different geographic regions and time periods with varying socio-political and economic systems.

ANTH260 Introduction to Sociocultural Anthropology and Linguistics (3 Credits)

Culture and social relationships in a wide variety of settings from small-scale to complex societies. An overview of how anthropology analyzes human behavior. Particular attention to the relationship between language and culture.

ANTH263 Sexuality and Culture (3 Credits)

An overview of sexuality from an anthropological perspective, looking at aspects of sexuality within our own culture and in cultures around the world. Course topics include the biology and culture of sex, gender, physical attraction, sexual orientation, marriage and mating taboos, fertility control, sexually transmitted diseases, and commercial aspects of sex.

Credit Only Granted for: ANTH298K or ANTH263.

Formerly: ANTH298K.

ANTH264 Immigration Policy, Immigrant Lives (3 Credits)

An examination of the phenomenon of international migration, or immigration. Students develop awareness of how immigration has been framed in the general public and examined by social science disciplines, most prominently anthropology. Examination of case studies of different immigrant groups in distinct geographic contexts will illuminate the varied incorporation experiences of immigrants into U.S. society.

Cross-listed with: IMMR219C.

Credit Only Granted for: ANTH264 or IMMR219C.

ANTH265 Anthropology of Global Health (3 Credits)

An overview of the growing field of global health including health care systems, medical practices, ideas about illness in cross-cultural contexts, issues of health development, global health inequity, and human rights issues. The course will focus on the history of global health, the critique of major international health agencies and their development paradigms, and the political economy of social inequalities and health.

ANTH266 Changing Climate, Changing Cultures (3 Credits)

Explore past, present, and future interactions between humans and climate. Discussions, methods-oriented activities, and case study analyses provide students a foundation for appreciating the role of anthropology in understanding, responding to, and preparing for climate change.

ANTH267 Organic, Mechanical, Digital (3 Credits)

Beginning in the middle to late 20th century, human organization and experience has increasingly been influenced by digital forms of communication and production. Do these changes make us new types of people and societies? By putting the digital world in the context of the major periods associated with organic and mechanical technology, this course examines who contemporary people are and whether or not they are unique. The answer to this question will focus on how technological changes the individual, social organization and the relationship with the natural world. Sources from historians, anthropologists, sociologists, philosophers, political scientists and ecologists will be used to reconstruct these worlds.

ANTH298 Special Topics in Anthropology (3 Credits)

Anthropological perspectives on selected topics of broad general interest.

Repeatable to: 6 credits if content differs.

ANTH298E Approaches to Sustainable Development (3 Credits)

An overview of the history of sustainable development, major development and environmental theories, and development strategies as they relate to an anthropological concern for an integrated, holistic, comparative, and humane approach to sustainable development.

Jointly offered with: ANTH657.

Credit Only Granted for: ANTH357 or ANTH657.

ANTH299 Student Initiated Course (1-3 Credits)

Student Initiated Course (STIC) in Anthropology. Course is student initiated and taught under close supervision of a faculty mentor.

Repeatable to: 6 credits if content differs.

Additional Information: ANTH299 will serve as a "special topics" kind of number for any Student Initiated Courses (STIC) offered in Anthropology. So far, we have only offered one ANTH299A, sample syllabus attached.

ANTH305 Archaeological Methods and Practice (3 Credits)

A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.

Prerequisite: ANTH240, ARTH200, CLAS180, or CLAS190.

Cross-listed with: ARTH305, CLAS305, JWST319Y.

Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ANTH310 Method & Theory in Medical Anthropology and Global Health (3 Credits)

Provides a critical perspective to global health that encompasses key political, economic, and cultural factors associated with the nature and magnitude of global health issues such as HIV/AIDS, tuberculosis and malaria, paying particular attention to how poverty and inequalities within and between societies has accelerated current global health challenges. Introduces students to how medical anthropologists have contributed to the debates surrounding the globalization of health.

Prerequisite: ANTH210. Jointly offered with ANTH665.

Credit Only Granted for: ANTH310, ANTH465, or ANTH665.

Formerly: ANTH465.

ANTH322 Method and Theory in Ecological Anthropology (3 Credits)

A theoretical consideration of ecological anthropology, focusing on issues related to cooperation, the management of common property, resilience, and sustainability. Explores the methods of sociocultural anthropology, including ethnology, evolutionary game theory and agent-based modeling; and natural-science approaches including behavioral and systems ecology.

Prerequisite: ANTH220 or ANTH222.

Restriction: Must be in a major within the BSOS-Anthropology department.

Credit Only Granted for: ANTH320, ANTH322, ANTH425, or ANTH625.

ANTH323 Plagues, Pathogens and Public Policy (3 Credits)

The impact of diseases on populations from prehistoric times through the present will be examined, along with public perceptions of disease, scientific breakthroughs on treatment and prevention, and the ways that politics and public health policies can enhance or impede the advancement of disease treatment. The natural history of disease, population structure, and immunity will be discussed. The class will address emerging and re-emerging diseases and the ways that first responders, researchers, and policy makers may affect the outcome of an outbreak.

Credit Only Granted for: ANTH429A or ANTH323.

Formerly: ANTH429A.

ANTH338 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ANTH340 Method and Theory in Archaeology (3 Credits)

Theory, method, and practice which guides modern anthropological archaeology. Includes research design and execution (from survey through excavation and interpretation), the reconstruction of aspects of past cultures, and the understanding of cultural change and meaning.

Prerequisite: ANTH240.

Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH341 Introduction to Zooarchaeology (3 Credits)

Zooarchaeology is the study of animal remains, especially bones, from archaeological contexts. This course will address both methodology as well as many of the main issues in contemporary zooarchaeology. Zooarchaeology stands at the intersection of a number of social and biological sciences, such as Biology, Osteology, Ecology, History, Anthropology and Economics. We will discuss basic animal osteology and the concepts and practices behind the identification of animal remains from archaeological contexts. We will cover the nature of the data in zooarchaeology, especially issues around using proxy data.

Credit Only Granted for: ANTH298D, ANTH641 or ANTH341.

Formerly: ANTH298D.

ANTH345 Introduction to Laboratory Methods in Archaeology (3 Credits)

The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn the basics of laboratory techniques necessary for the final analysis and interpretation of field data.

ANTH357 Approaches to Sustainable Development (3 Credits)

An overview of the history of sustainable development, major development and environmental theories, and development strategies as they relate to an anthropological concern for an integrated, holistic, comparative, and humane approach to sustainable development.

Jointly offered with: ANTH657.

Credit Only Granted for: ANTH357 or ANTH657.

ANTH358 Undergraduate Teaching Assistant (1-3 Credits)

Individual instruction course: contact department or instructor to obtain section and index numbers.

Prerequisite: ANTH220, ANTH260, or ANTH240.

Restriction: Junior standing or higher; and must be in Anthropology program.

Repeatable to: 6 credits if content differs.

ANTH360 Method and Theory in Sociocultural Anthropology (3 Credits)

Theoretical approaches and research methods in sociocultural anthropology. Emphasis on current debates, new directions, and their historical antecedents.

Prerequisite: ANTH260.

Restriction: Must be in Anthropology program; or permission of BSOS-Anthropology department.

ANTH368 Regional Ethnography (3 Credits)

Peoples and cultures of a particular region of the world, on the basis of ethnographies, archaeological evidence, and relevant works by social historians and political economists. The regional focus and thematic emphasis will vary by semester.

Prerequisite: ANTH260; or permission of BSOS-Anthropology department.

Repeatable to: 6 credits if content differs.

ANTH380 Culture and Discourse (3 Credits)

Contemporary discourse analysis and pragmatics applied to ethnographic research problems with particular attention to roots in recent linguistic anthropological work in ethnographic semantics and ethnography of speaking.

ANTH386 Experiential Learning (1-6 Credits)

Recommended: Completion of advanced courses in relevant subfield of anthropology recommended.

Restriction: Permission of BSOS-Anthropology department; and junior standing or higher; and must be in Anthropology program.

ANTH398 Independent Study (1-3 Credits)

Independent interdisciplinary research and reading in specific areas of anthropology.

Restriction: Permission of BSOS-Anthropology department.

Repeatable to: 9 credits if content differs.

ANTH407 Anthropology and Development (3 Credits)

An examination of the intersection of Anthropology, international development and foreign policy. The course provides students with conceptual tools to engage with international development and other assistance projects in areas including conservation and climate change, governance and human security, gender, human rights, and political stability from a variety of viewpoints.

Jointly offered with: ANTH607.

Credit Only Granted for: ANTH407 or ANTH607.

ANTH411 Global Migration and Health (3 Credits)

The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.

Jointly offered with: ANTH611.

Credit Only Granted for: ANTH411 or ANTH611.

ANTH412 Hypermarginality and Urban Health (3 Credits)

Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality—the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.

Credit Only Granted for: ANTH412 or ANTH612.

ANTH413 Health Inequities, Care, and Justice in the United States (3 Credits)

Systematic health inequities in the United States are well documented, shaped by structural forces that determine who gets sick, what illnesses/diseases they are vulnerable to, what their care options are, how they are treated while seeking care, and their ultimate health outcomes. This course applies the concepts, methods, and theoretical approaches of medical anthropology to examine the roots and implications of these health inequities. Students will also assess efforts to address these inequities through tailored interventions and social movements organized around equity and justice.

Jointly offered with: ANTH613.

Credit Only Granted for: ANTH413 or ANTH613.

ANTH415 Critical Global Health (3 Credits)

Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.

Recommended: ANTH210, ANTH310, or ANTH265 or a similar course focused on global health or medical anthropology course.

Jointly offered with: ANTH615.

Credit Only Granted for: ANTH415 or ANTH615.

ANTH416 Anthropology of Global Violence (3 Credits)

An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts. Jointly offered with ANTH616.

Credit Only Granted for: ANTH4680, ANTH66 80, ANTH416 or ANTH616.

Formerly: ANTH4680.

ANTH421 Nutritional Anthropology (3 Credits)

The study of nutrition from an anthropological perspective which includes both biological and cultural aspects of nutrition. We will explore how nutrition can affect culture how culture can affect nutrition. Nutritional anthropology includes the study of cross-cultural variation in diet, nutritional status and subsistence systems as well as variation in these factors over the evolutionary course of human existence, from prehistoric and historic to modern times. Students will be introduced to nutritional anthropology and provided with the basics for assessing reliability and feasibility of nutritional advice and policy encountered in everyday modern life in a global setting.

Credit Only Granted for: ANTH421, ANTH428N, or ANTH621.

Formerly: ANTH428N.

ANTH422 Human-Plant-(Human & Bioactive Plant) Interaction (3 Credits)

This seminar course will discuss the evolutionary, historical, cultural, and ecological aspects of coevolution with respect to humans and their interactions with specific bioactive plants. Case studies of human-plant-(pathogen) interactions will be discussed as well as an inclusive survey of anthropologically important phytochemicals. The seminar incorporates human-plant-(pathogen) interactions into models of human evolution and ecology.

Prerequisite: ANTH220 and ANTH320; or permission of BSOS-Anthropology department.

Credit Only Granted for: ANTH422.

Formerly: ANTH428I.

ANTH424 Human Skeletal Anatomy (3 Credits)

In addition to descriptive information about bone identification, the lectures will address the history of human anatomical studies, the development of analytical techniques, and the application of these techniques in paleoanthropology, comparative anatomy, functional anatomy (and related fields, such as physical therapy), and skeletal analysis in museum, historic cemetery, archaeological, and forensic settings. Emphasis will be on the development of the skeleton and recognition of normal variation in bones. The laboratory sessions will allow the students access to human bones for the purpose of identification, documentation of human variation, and application of techniques to obtain information about the living individual from the skeleton.

ANTH428 Special Topics in Bioanthropology (3 Credits)

Advanced research courses in biological anthropology on changing topics that correspond to new theoretical interests, faculty research interests, or the specialties of visiting scholars. Prerequisites or background knowledge vary with the topic. Check with the department for requirements.

Repeatable to: 6 credits if content differs.

ANTH429 Advanced Special Topics in Biological Anthropology (3 Credits)

Upper level biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH433 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)

Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.

Jointly offered with: ANTH633.

Credit Only Granted for: ANTH433 or ANTH633.

ANTH435 Archaeological Ethnography and Heritage Ethnography (3 Credits)

Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit. This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.

Jointly offered with: ANTH635.

Credit Only Granted for: ANTH435 or ANTH635.

ANTH436 Norse Archaeology (3 Credits)

The archaeology of the Norse world from the 8th century through to the end of the 11th century. We will investigate the possible causes of the Norse expansion out of Scandinavia. The various settlements and colonies of Norse Russia, the Baltic, Britain, Ireland and the North Atlantic Islands (Orkney, the Shetlands, the Faroes, Iceland, Greenland and Newfoundland) will be examined. While we will look at the Norse in detail we will also attempt to put their raiding, trading, and settlements into a larger Eurasian context through a study of the archaeology of this period.

Credit Only Granted for: ANTH436 or ANTH636.

ANTH438 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ANTH440 Theory and Practice of Historical Archaeology (3 Credits)

Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.

Prerequisite: ANTH240. Jointly offered with ANTH640.

Credit Only Granted for: ANTH440 or ANTH640.

ANTH441 Archaeology of Diaspora (3 Credits)

"Diaspora" is defined, theorized, deconstructed, and employed throughout the social sciences. There are context specific relations that define who leaves, when, and how they are received in the new place of settlement. Over the course of the semester the class will actively and critically examine the relevance of historical archaeology and material culture studies in the understanding of the formation, experiences, and transformation of diasporic groups over time and space.

Prerequisite: ANTH240.

Credit Only Granted for: ANTH448A, ANTH688Z, or ANTH441.

Formerly: ANTH448A.

ANTH442 Public Archeology (3 Credits)

Explores the uses and environments for archaeological work through a discussion of museum, electronic media, heritage settings, outdoor history museums, including the legal environment that offers protection for archaeological remains. The course exposes students to the majority of cultural media within which archaeology is currently practiced. The interdisciplinary course is a survey of the progress made within and beyond anthropology in understanding the function of heritage, public memory, tourism, and the other popular uses of materials from the past, including the progress made in linguistics psychology and other cognitive disciplines in understanding the purpose of the past.

Credit Only Granted for: ANTH442, ANTH448V, or ANTH642.

Formerly: ANTH448V.

ANTH444 Theories of the Past (3 Credits)

The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern society. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.

Prerequisite: ANTH240. Jointly offered with ANTH740.

Credit Only Granted for: ANTH448P, ANTH444, or ANTH740.

Formerly: ANTH448P.

ANTH445 Laboratory Methods in Archaeology (3 Credits)

The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn that basics of laboratory techniques necessary for the final analysis and interpretation of field data.

Prerequisite: ANTH496.

Recommended: ANTH240.

ANTH447 Material Culture Studies in Archaeology (3 Credits)

An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.

Prerequisite: ANTH240.

Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.

Formerly: ANTH448C.

ANTH448 Special Topics in Archaeology (3 Credits)

Advanced topics in archaeological research, corresponding to new theoretical developments, faculty research interests, or specialties of visiting scholars. Prerequisites may vary with course topic; check with the department for requirements.

Prerequisite: ANTH240.

Repeatable to: 6 credits if content differs.

ANTH449 Advanced Special Topics in Archaeology (3 Credits)

Upper level archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH450 Theory and Practice of Environmental Anthropology (3 Credits)

An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.

Restriction: Junior standing or higher. Jointly offered with ANTH650.

Credit Only Granted for: ANTH450 or ANTH650.

ANTH451 Environmental Archaeology (3 Credits)

An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.

Credit Only Granted for: ANTH451, ANTH651, ANTH448F, ANTH668F.

Formerly: ANTH448F.

ANTH452 Anthropology and Climate Change (3 Credits)

Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.

Prerequisite: ANTH220, ANTH222, ANTH240, or ANTH260.

Credit Only Granted for: ANTH452 or ANTH652.

ANTH453 Archaeology of the Modern City (3 Credits)

An overview of how social scientists, in particular historical archaeologists, approach modern cities as being part of the materiality of the social structure and order.

Prerequisite: ANTH240; or permission of instructor.

Credit Only Granted for: ANTH448Q or ANTH453.

Formerly: ANTH448Q.

ANTH454 Political Ecology (3 Credits)

The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.

Jointly offered with: ANTH654.

Credit Only Granted for: ANTH454 or ANTH654.

ANTH456 Conservation and Indigenous People in South America (3 Credits)

Considers indigenous peoples and their relation to the lands on which they live, issues of traditional indigenous knowledge and land management as well as new contributions by indigenous peoples to changing landscapes. Reviews legal mechanisms and instruments through which indigenous peoples have rights to the resources they occupy and utilize. Taking specific cases and examining them through the lens of political and social ecology, the role of indigenous peoples in local and worldwide conservation efforts is considered. Case studies will emphasize the indigenous peoples and conservation policies of Latin America.

Jointly offered with: ANTH656.

Credit Only Granted for: ANTH468L, ANTH456, ANTH688L, or ANTH656.

Formerly: ANTH468L.

ANTH461 Language as Practice (3 Credits)

An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.

Jointly offered with: ANTH661.

Credit Only Granted for: ANTH461, ANTH468I or ANTH661.

Formerly: ANTH468I.

ANTH462 Amazon Through Film (3 Credits)

An interdisciplinary course that utilizes film to consider the Amazon basin, its history, peoples, and landscapes through cinematic representations. The course places the films in the context of film history and critical theory. The course takes into consideration the Brazilian, North American, Mexican, European and Argentine creators of the films and their visions of Amazonia, as well as the audiences and markets to which the films are intended.

Credit Only Granted for: ANTH468D or ANTH462.

Formerly: ANTH468D.

ANTH463 Climate Cultures (3 Credits)

Climate change is an inherently global problem. To a significant degree, its causes and consequences are cultural in nature: Climate change impacts, mitigation and adaptation efforts are perceived and addressed in culture-specific ways. This course will be an overview of the holistic and anthropological approaches to the study of how culture frames what we know and how we respond to climate change. Readings, lectures, and discussions will focus on how culture is expressed through the interplay of processes and practices in specific economic, social and political contexts.

ANTH464 Anthropology of Cultural Heritage (3 Credits)

A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.

Prerequisite: ANTH260. Jointly offered with ANTH664. Credit only granted for: ANTH469T, ANTH689T, ANTH464, ANTH664.

Formerly: ANTH469T.

ANTH465 Applied Ethnoecology (3 Credits)

Introduces theory and methodology for applied ethnoecology, the study of human relationships with and knowledge about the environment. Students will examine human relationships with both biotic (e.g. plants and animals) and abiotic (e.g. glaciers, weather) elements of ecological systems to better understand how knowledge frameworks and cultural practices shape human experiences of the natural world. The history of ethnoecology as a discipline will be covered, before moving to applied case studies where different ecological knowledge systems intersect as a result of conservation projects, bioprospecting, and other contemporary environmental issues. This course involves both discussion and project-based learning including StoryMaps, cultural domain analysis and text analysis.

Credit Only Granted for: ANTH465 or ANTH688E.

ANTH466 Anthropology of Work (3 Credits)

Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.

Jointly offered with: ANTH666.

Credit Only Granted for: ANTH466 or ANTH666.

ANTH467 Researching Environment and Culture (3 Credits)

In this applied course, students use mixed methods to research a locally-based, environmental sustainability issue. Classroom time will be split between seminar discussions of theory, methods, and relevant case studies, and lab work focused on project development, data analysis, and report write up. Students are expected to spend additional time outside class on data collection, analysis, and writing

Recommended: ANTH322, ANTH360, ENSP101, or ENSP102.

ANTH468 Special Topics in Cultural Anthropology (3 Credits)

Advanced courses in varying specialty areas of cultural anthropology that respond to new theoretical developments, faculty research interests, or specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH469 Advanced Special Topics in Cultural Anthropology (3 Credits)

Upper level cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.

Repeatable to: 6 credits if content differs.

ANTH473 Native American Languages and Cultures (3 Credits)

An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the structure of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.

Jointly offered with: ANTH673.

Credit Only Granted for: ANTH473 or ANTH673.

ANTH474 Language, Racism & Identity (3 Credits)

An exploration of the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.

Jointly offered with: ANTH674.

Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH476 Senior Research (3-4 Credits)

Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of a senior thesis in anthropology.

Restriction: Must be in Anthropology program.

Credit Only Granted for: ANTH476 or ANTH486.

ANTH477 Senior Thesis (3-4 Credits)

Capstone course in which students write a senior thesis on independent research into a current problem in anthropology. The thesis is defined before a committee of faculty.

Prerequisite: ANTH476.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program.

Credit Only Granted for: ANTH477 or ANTH487.

ANTH478 Special Topics in Linguistics (3 Credits)

Advanced courses in specialty areas that respond to new theoretical developments and faculty research interests in linguistics.

Recommended: LING200.

Repeatable to: 6 credits if content differs.

ANTH481 Environmental Ethnographies of Asia (3 Credits)

Examines social and ecological environments in Asia through the lens of classic and contemporary ethnographies from across the continent. Considers how cultural, political and economic dynamics interact with ecological systems in both recurring and unexpected ways. Ethnographies include case studies of global commodity chains, technoscientific management, borders and migration, conservation, and local knowledge as they intersect with changing environments.

Credit Only Granted for: ANTH481 or ANTH681.

ANTH485 Honors Research Preparation (3 Credits)

Honors Research Preparation is an independent study course during which the Honors candidate will work with their Honors Thesis Advisor to establish not only the structure of the thesis and timeline, but also the formation of Thesis Review Committee.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

ANTH486 Honors Research (3-4 Credits)

Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of an honors thesis in anthropology.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

Credit Only Granted for: ANTH486 or ANTH476.

ANTH487 Honors Thesis (3-4 Credits)

Capstone course in which students write a thesis on the results of independent research into a current problem in anthropology.

Prerequisite: ANTH486.

Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

Credit Only Granted for: ANTH487 or ANTH477.

ANTH496 Field Methods in Archaeology (6 Credits)

Field training in the techniques of archaeological survey and excavation.

ANTH498 Advanced Field Training in Ethnography (1-8 Credits)

Experience in field research utilizing a variety of ethnographic methods of inquiry.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: ANTH498 or ANTH698.

AOSC - Atmospheric and Oceanic Science

AOSC123 Causes and Consequences of Global Change (3 Credits)

Study of the major components of Earth's climate system and climate change history. Discussion of 21st century climate change prediction, mitigation and adaptation efforts.

Cross-listed with: GEOL123.

Credit Only Granted for: AOSC123, GEOG123, or GEOL123.

AOSC200 Weather and Climate (3 Credits)

What are weather and climate? Most people think they know but if you ask people to explain the differences and similarities you're bound to get a range of answers. Weather affects not just our daily activities but other important aspects of society such as transportation, commerce, security and agriculture. Most people understand what weather is to some extent. Climate and climate change are concepts that evoke strong emotional responses from people but are less well understood. In this class, students examine fundamental issues such as the greenhouse effect, severe weather, and global weather patterns and how they relate to a changing climate. Instruction in the lectures will provide the basic knowledge needed to understand these issues. In the discussion sections, students will be divided into groups to address the implications of these topics through group projects.

Prerequisite: MATH107, MATH110, or MATH115.

Recommended: Concurrent enrollment in AOSC201.

AOSC201 Weather and Climate Laboratory (1 Credit)

Laboratory exercises to supplement AOSC200, including weather observations, weather map analysis, forecasting practice and climate modeling.

Corequisite: AOSC200.

AOSC247 Scientific Programming: Python (3 Credits)

A comprehensive introduction to scientific computation and visualization techniques with Python applied to data intensive questions in the Natural Sciences. The class emphasizes real-world applications, providing students with essential hands-on experience using Python for data analysis and visualization, developing analytical skills for observational and modeling data, and performing virtual experiments to distinguish data contributing factors. Students will gain an understanding of the scientific data issues including: signal vs noise, trend vs periodicity, mean vs extreme changes, and accuracy vs uncertainty. Students will gain extensive experience using command line linux. Skills including local and remote file transfer and synchronization, file and directory permission, utilities for diagnosing performance issues, and data compression.

Prerequisite: MATH140.

Recommended: Familiarity with basic descriptive statistics.

Credit Only Granted for: AOSC458J or AOSC247.

Formerly: AOSC458J.

AOSC358 Special Topics in Atmospheric and Oceanic Science (1-4 Credits)

Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.

Repeatable to: 12 credits.

AOSC375 Introduction to the Blue Ocean (3 Credits)

The global ocean is a major component of the Earth System that shapes life on earth, including our weather and climate. We explore the observation-based interdisciplinary science of oceanography, identifying its strong connections to related sciences like meteorology, and geography. We apply this developing understanding to environmental issues such as marine pollution, fish and fisheries, as well as to climate variability and to the changes to the marine environment that are resulting from steadily rising levels of atmospheric greenhouse gasses. Focusses include the biogeochemical and physical changes we can observe in the nearby Chesapeake Bay and the coastal waters of Eastern Shore, Maryland.

Prerequisite: MATH120 or higher.

Recommended: MATH121, MATH141, PHYS161, or PHYS171.

Cross-listed with: GEOL375.

Credit Only Granted for: AOSC375 or GEOL375.

AOSC386 Experiential Learning (3-6 Credits)

Experiential learning in atmospheric and oceanic science.

Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor and student's internship sponsor.

AOSC399 Independent Study in Academic Peer Mentoring (1-3 Credits)

Earn academic credit for the time spent supporting an AOSC course in the Academic Peer Mentoring Program (AMP).

Corequisite: TLTC333.

Repeatable to: 6 credits.

AOSC400 Physical Meteorology (3 Credits)

The application of basic classical physics, chemistry and mathematics to the study of the atmosphere. Composition of the atmosphere; energy sources and sinks (radiation in the atmosphere; radiative balance and radiative forcing of atmospheric processes); atmospheric thermodynamics; clouds and precipitation physics; atmospheric electricity and optics; mesoscale processes (e.g., orographic mesoscale phenomena and instabilities); air mass boundaries; severe weather, tropical cyclones; storms; global circulation.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of CMNS-Atmospheric & Oceanic Science department.

AOSC401 Climate Dynamics and Earth System Science (3 Credits)

Introduction of the earth and global climate systems and their major components: atmosphere, land, ocean, biosphere and cryosphere. Key processes governing the function of the earth's climate: Global energy balance and water cycle, climate dynamics (general circulation of the atmosphere and ocean) and climate physics (aerosol, cloud and rain), as well as climate variability and climate changes. Phenomena resulting from this coupled system including El Nino-Southern Oscillation, monsoons, and the hydrological cycle will be discussed, with a focus on how the Earth System responds to global warming.

Prerequisite: AOSC400 or AOSC200; and MATH141; and (PHYS161 or PHYS171). Or permission of instructor.

AOSC420 Physical Oceanography (3 Credits)

Ocean observations. Water masses, sources of deep, intermediate, and surface water. Mass, heat, and salt transport, and the meridional overturning circulation. Geochemical tracers and cycles, including carbon. Western boundary currents, mixed layers, and processes maintaining the thermocline. Coastal and estuarine processes. Surface waves and tides. the ocean's role in climate.

Prerequisite: MATH141 and PHYS141.

Recommended: AOSC200. Also offered as: GEOL670, AOSC670.

Credit Only Granted for: AOSC420, AOSC670, or GEOL670.

AOSC424 Remote Sensing of the Atmosphere and Ocean (3 Credits)

Many of the properties of the atmosphere, ocean, and land surface are most easily observed from satellite remote sensing. This course will provide students with a hands-on introduction to a variety of passive and active sensing techniques and sensors observing our changing environment. Topics include: orbital dynamics and electromagnetic properties of the atmosphere and surface; atmospheric emission characteristics and scattering; chemical composition and spectroscopy; temperature retrievals; detection and retrieval of aerosol, cloud and rain; ocean surface properties; sea surface temperature and color; active sensing of wind stress, sea level, and internal waves; time-dependent gravity; properties of vegetation and ice.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of instructor.

AOSC431 Atmospheric Thermodynamics (3 Credits)

Classical thermodynamics applied to both the dry and the moist atmosphere. Composition; phase changes of water; stability concepts; Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry.

Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141).

Recommended: MATH246.

AOSC432 Dynamics of the Atmosphere and Ocean (3 Credits)

Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Geostrophic/balanced and ageostrophic/unbalanced motion. Circulation, vorticity, and potential vorticity. Introduction to the boundary layer.

Prerequisite: AOSC431.

Corequisite: MATH246.

Credit Only Granted for: AOSC432 or AOSC632.

Formerly: METO432.

AOSC433 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146. And MATH241; or permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Chemistry & Biochemistry department. Cross-listed with CHEM433.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

Formerly: AOSC434.

AOSC434 Air Pollution and Environmental Justice (3 Credits)

Basic concepts in physics and chemistry of the atmosphere as applied to air pollution and environmental justice. Production, transformation, spatial scales, transport, and removal of air pollutants. The problems of photochemical smog, the greenhouse effect & climate change, stratospheric ozone, visibility. Numerical simulation of air pollution. Health and environmental effects of air pollution in the developed and developing world; why some communities suffer disproportionately

Prerequisite: CHEM131 and MATH241; or permission of instructor.

AOSC436 Principles of Biogeochemistry (3 Credits)

An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.

Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).

Cross-listed with: GEOL436.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL436 or AOSC436.

AOSC437 Global Climate Change: Past and Present (3 Credits)

Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.

Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).

Cross-listed with: GEOL437.

Credit Only Granted for: AOSC437 or GEOL437.

AOSC440 Polar Remote Sensing (3 Credits)

The harsh environment of the vast polar regions makes them some of the most inaccessible places on Earth. With widespread environmental change already underway, satellite remote sensing provides the only means by which to obtain year-round observations of the polar climate system. The objective of this course is to provide students with an overview of polar remote sensing techniques, including the physical principles of active and passive sensors, orbits, electromagnetic radiation, atmospheric transmission, calibration and validation. We will focus on measurements of the polar oceans, sea ice, glaciers, ice sheets, snow and permafrost, and examine the response of the cryosphere to climate change.

Prerequisite: PHYS171 or PHYS161; and AOSC401 or GEOG301; or with permission of instructor.

Cross-listed with: GEOG440.

Jointly offered with: AOSC642.

Credit Only Granted for: AOSC440, GEOG440, AOSC642, or GEOG640.

AOSC447 Machine Learning in Earth Science (3 Credits)

A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.

Prerequisite: Must have completed MATH140.

AOSC458 Advanced Topics in Atmospheric and Oceanic Science (1-4 Credits)

Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.

Repeatable to: 12 credits.

AOSC462 Ecohydrology (3 Credits)

Focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC662.

Credit Only Granted for: AOSC462 or AOSC662.

AOSC463 Water and Climate Systems (3 Credits)

Focuses on exploring the relationships between water, climate, land, energy, and the economy (the so called "nexus") through an interwoven understanding of the physical, economic, and institutional relationships and constraints that influence management and decision-making process in water supply, energy generation and food production. The course emphasizes the use of integrated assessment (IA) modeling tools as a way to formalize these relationships and explore their implications. Lectures will be complemented with online discussion sessions and applied modeling exercises to get hands-on knowledge of practical solutions to nexus challenges.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC663.

Credit Only Granted for: AOSC463 or AOSC663.

Additional Information: This course is offered through a joint effort of the Earth System Science Interdisciplinary Center (ESSIC, part of UMDb Sciences) and the Joint Global Change Research Institute (a collaboration between UMD and the US Dept of Energy's Northwest National Laboratory).

AOSC470 Synoptic Meteorology (3 Credits)

Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitude and mesoscale weather systems. Tropical meteorology. Weather forecasting using numerical and statistical models. Prediction of weather phenomena on the global, synoptic, meso, and local scales. Analysis of surface and upper air data; Norwegian cyclone model; introduction to weather forecasting.

Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.

Credit Only Granted for: AOSC470, AOSC600, or METO600.

AOSC472 Mesoscale Meteorology (3 Credits)

Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.

Prerequisite: AOSC432, AOSC600, AOSC610, or AOSC470.

Jointly offered with: AOSC602.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: AOSC472 or AOSC602.

AOSC475 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)

The fundamentals of the Earth's carbon cycle, a key biogeochemical cycle that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO₂ and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.

Jointly offered with: AOSC675.

Credit Only Granted for: AOSC475 or AOSC675.

AOSC480 Introduction to Earth System Science (3 Credits)

Focuses on exploring the relationships between the atmosphere, the oceans, water, climate, land, vegetation, energy, and human systems through an interwoven understanding of the physical, biogeochemical and socioeconomic relationships and constraints that influence management and decision-making processes in societal issues such as water supply, power generation, food production, ecosystem services and others. The course introduces integrated assessment (IA) science as a framework to formalize these relationships and explore their implications.

Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor.

Jointly offered with: AOSC680.

Credit Only Granted for: AOSC480 or AOSC680.

Additional Information: This course is offered through a joint effort of the Department of Atmospheric and Oceanic Science (AOSC) and the Earth System Science Interdisciplinary Center (ESSIC).

AOSC484 Climate System Modeling (3 Credits)

Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Niño and global warming.

Jointly offered with: AOSC684.

Credit Only Granted for: AOSC484 or AOSC684.

AOSC493 Senior Research Project I (3 Credits)

Technical writing and oral presentation skills. Planning, writing, and presenting a plan for research in the geosciences.

Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.

Restriction: Must be in Atmospheric and Oceanic Science program; or permission of instructor.

AOSC494 Atmospheric and Oceanic Science Seminar (1 Credit)

Exposure to a wide range of contemporary topics in atmospheric, oceanic, and climate sciences, to foster research interests and promote critical thinking through the weekly AOSC departmental seminar series.

Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.

Restriction: Permission of the Atmospheric and Oceanic Science Department.

AOSC498 Senior Research Project II (3 Credits)

The project will be based on the research or development plan created in AOSC493. It may be completed with the approval of a faculty advisor in conjunction with an internship. Final written thesis and oral defense will be expected.

Prerequisite: AOSC493.

AOSC499 Special Problems in Atmospheric Science (1-3 Credits)

Research or special study in the field of meteorology and the atmospheric and oceanic sciences.

Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.

Repeatable to: 6 credits.

ABRM - Anti-Black Racism

ABRM330 Introduction to Anti-Black Racism (3 Credits)

This interdisciplinary course seeks to provide a broad overview of this rich and dynamic history. Built around the expertise of top UMD faculty in five colleges, this course will introduce students to the history and legacy of anti-Black racism from the perspective of multiple disciplines. In this course you will examine the development, spread, and articulations of anti-Black racism in the United States.

Additional Information: This interdisciplinary course will consist of two-week modules from key faculty/scholars in College of Behavioral and Social Sciences, College of Arts and Humanities, School of Public Health, School of Public Policy, and College of Education to explore how anti-Black racism operates in society.

ABRM450 Applied Anti-Black Racism (3 Credits)

The purpose of this course is to apply knowledge rooted in Anti-Black Racism to a real-world problem or issue within your chosen discipline or planned career path. You will meet with the course instructor and each other to discuss the readings, ideas and frameworks of anti-Black racism. The rest of the course will operate similar to an independent study; you will choose a mentor from your home department to work with on a self-directed, practice-oriented project. Beginning with a framework rooted in understanding anti-Black racism, you will identify issues of anti-Black racism specific to your discipline, select one of those issues within which to explore current solutions and their shortcomings, and draft a proposal that addresses the anti-Black racism embedded within the issue itself.

Prerequisite: ABRM330.

ARAB - Arabic

ARAB101 Elementary Arabic I (3 Credits)

Introduction to modern standard Arabic in both its spoken and written form. Equal emphasis on all four skill areas: speaking, listening, reading, and writing.

ARAB102 Elementary Arabic II (3 Credits)

Continuation of ARAB101. Introduction to both spoken and written Arabic. Equal emphasis on all four skill areas: speaking, listening, reading, and writing.

Prerequisite: ARAB101; or must have appropriate World Language Placement Test (FLPT) score.

ARAB104 Elementary Modern Standard Arabic I-II (6 Credits)

An intensive course focusing on developing functional proficiency in the standard Arabic language, both written and formal spoken. Begins with script and phonology, and develops into a limited range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.

Prerequisite: Must have appropriate World Language Placement Test (FLPT) score.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB105 Elementary Modern Standard Arabic III-IV (6 Credits)

Continuation of ARAB104, developing further linguistic proficiency in Standard Arabic, both written and formal spoken. Covers an extended range of situation-based texts and topics that build vocabulary, grammar, general communicative competence and cultural awareness.

Prerequisite: ARAB104; or must have appropriate World Language Placement Test (FLPT) score.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARAB190 Introduction to Arab Cultures & Societies (3 Credits)

Provides an introduction to key topics related to the study of the Arabic-speaking world, including features of Arab identity in the Middle East North Africa as well as in the diaspora. Addresses religious, racial, and ethnic diversity, the history of language and culture, political economy, and migration. Students will learn about the diverse cultures and societies that have formed the changing conceptions of the Arab world through history and across different geographies. A fundamental premise is that the "Arab world" is not a monolithic, unchanging, bounded region "over there," but has long been deeply intertwined with other societies, including our own. Taught in English.

ARAB201 Intermediate Arabic I (3 Credits)

The study of Arabic in both its spoken and written forms at the intermediate level. Course will continue to develop all four skills of language acquisition: listening, speaking, reading, and writing.

Prerequisite: ARAB102; or must have appropriate World Language Placement Test (FLPT) score.

ARAB202 Intermediate Arabic II (3 Credits)

Continuation of ARAB201, the study of Arabic in both its spoken and written forms at the intermediate level. Course will continue to develop all four skills of language acquisition: listening, speaking, reading, and writing.

Prerequisite: ARAB201; or must have appropriate World Language Placement Test (FLPT) score.

ARAB204 Intermediate Modern Standard Arabic I (6 Credits)

Covers topics related to contemporary Arabic society, literature and culture in standard written and formal spoken Arabic. Acquisition of more complex grammatical structures, expanding vocabulary, and reading, to develop a better understanding of the formal aspects of using MSA.

Prerequisite: ARAB105; and must have appropriate World Language Placement Test (FLPT) score.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB205 Intermediate Modern Standard Arabic II (6 Credits)

Continuation of ARAB204, with exposure to a wide range of Arabic texts from different domains. Focus on vocabulary, more complex grammatical forms, and a better understanding of the formal aspects of using MSA as well as the cultural aspects of using the language.

Prerequisite: ARAB204; or must have appropriate World Language Placement Test (FLPT) score.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB206 Egyptian Colloquial Arabic I (3 Credits)

Develops communicative skills and cultural knowledge in Egyptian Arabic. Focuses on various social interactions, work and school situations, as well as specifics of pronunciation and grammar of the Egyptian dialect. Designed for students who have completed two years of the regular Arabic sequence classes (104-105 and 204-205) or equivalent.

Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB207 Egyptian Colloquial Arabic II (3 Credits)

Further develops communicative skills and cultural knowledge in Egyptian Arabic, extending range of contexts and types of social interaction. Focuses on various aspects of Egyptian popular culture.

Prerequisite: ARAB206; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB222 Arabic for Daily Life I (3 Credits)

Develops students' speaking and listening abilities in both formal Arabic and a dialect. Focus on activating vocabulary and grammar structures, speaking at the sentence level, and selecting an appropriate register based on context.

Prerequisite: ARAB102; or equivalent; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not have completed ARAB202.

ARAB225 Roots and Patterns: Verb Meaning in Arabic (3 Credits)

Examines the templatic morphology of the Arabic verb system, and asks what the workings of such a system tell us about the way that humans construct and encode meaning. Moves beyond the traditional labels that are used to name the different categories of Arabic verb, to explore the conceptual structures that are coded linguistically by the various verb patterns.

Prerequisite: ARAB102; or must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: ARAB499K or ARAB225.

Formerly: ARAB499K.

Additional Information: No prior linguistic training is required, but an interest in language and linguistics is assumed.

ARAB250 Food Cultures in the Global Middle East (3 Credits)

Food is the stuff of everyday routine and rich symbolic meaning, from holiday meals to daily staples. Studying food offers new perspectives on modernization, colonialism, and nationalism, and illuminates popular experiences of major historical events. This course introduces students to the history and cultures of the modern Middle East and North Africa using secondary literature and primary source materials addressing the sources and methods used in humanistic food studies scholarship. Students will gain a nuanced understanding of the diversity and complexities of the region as well as a lens for analyzing its cultures and societies from an everyday human perspective.

Credit Only Granted for: ARAB250 or ARAB499C.

Formerly: ARAB499C.

ARAB253 The Arabian Nights and the Art of Storytelling (3 Credits)

One Thousand and One Nights (Arabic *Kitab alf laylah wa laylah*; English *The Arabian Nights*) is a collection of stories and folk tales compiled in Arabic during the Islamic Golden Age, and explores how this text has shaped Western perceptions of the Arabic-Islamic world as well as its impact on the literary production of similar works in Europe and the Middle East. Taught in English.

ARAB269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARAB282 The Arab-Israeli Conflict through Readings in Translation (3 Credits)

Literary works by both Arab and Jewish authors depicting the impact of the conflict on society and individuals. In English.

ARAB298 Special Topics in Arabic Studies (1-3 Credits)

Language and content to be announced when course is offered.

Repeatable to: 9 credits if content differs.

ARAB301 Arab Culture and Society: Skills and Topics I (3 Credits)

Discussion of factors that drive migration from and across Arab societies, including structures of economic and social marginalization and experiences within Arab diaspora communities. Continued study of Arabic in both its spoken and written forms and study of daily life in Arabic-speaking societies. Listening, speaking, reading and writing are emphasized through engagement with increasingly advanced authentic materials.

Prerequisite: ARAB202; or must have appropriate World Language Placement Test (WLPT) score.

ARAB302 Arab Culture & Society: Skills and Topics II (3 Credits)

Discussion of cultural, ethnic, and religious diversity in the Arabic-speaking world, including social norms and practices related to religious occasions. Continued study of Arabic in both its spoken and written forms through texts that cover major social issues in the Arab world. Listening, speaking, reading and writing are emphasized through engagement with increasingly advanced authentic materials.

Prerequisite: ARAB301; or must have appropriate World Language Placement Test (WLPT) score.

ARAB304 Advanced Modern Standard Arabic I (3 Credits)

Advanced grammar, reading, writing, speaking in Arabic; study of contemporary Arabic society, politics, and culture.

Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Arabic.

Formerly: ARAB301.

ARAB305 Advanced Modern Standard Arabic II (3 Credits)

Further advanced grammar, reading, writing, speaking in Arabic; study of current issues within the Arab World.

Prerequisite: ARAB304; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB315 Intensive Advanced Arabic I (6 Credits)

Intensive training in written and spoken Arabic at the Advanced-low level of proficiency. Additional intensive training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.

Prerequisite: ARAB205; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not have completed ARAB304.

ARAB316 Intensive Advanced Arabic II (6 Credits)

Intensive training in written and spoken Arabic at the Advanced-mid level of proficiency. Additional training in effective listening and reading skills. Substantial cultural component exploring traditions and customs of the Middle East in addition to current social issues.

Prerequisite: ARAB304 or ARAB315; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not have completed ARAB305.

Credit Only Granted for: ARAB305 or ARAB316.

ARAB317 Key Moments in the History of the Middle East (3 Credits)

Provides students with an overview of major political and social events in the history of the Middle East and North Africa, with a focus on Arabic-speaking regions in the modern period. Makes use of a range of source materials and secondary readings (in Arabic and English) to illuminate how major events and changes impacted everyday life for different groups across the region. Assessments are intended to develop linguistic competence in Arabic and to guide students to become self-directed language learners and to conduct and present research on a topic of their choosing in modern Arab history.

Prerequisite: ARAB202 or must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: ARAB499I or ARAB317.

Formerly: ARAB499I.

ARAB321 Arabic Media (3 Credits)

Examines the role of the Arabic media in shaping public opinion and influencing relations between the Arab world and the non-Arab world. Focus on content and acquisition of Modern Standard Arabic. Taught in Arabic.

Prerequisite: ARAB305; or permission of instructor.

ARAB322 Arabic for Daily Life II (3 Credits)

Develops students' speaking and listening abilities in both formal Arabic and a dialect, aiming to bring them to the advanced low level in speaking. Focus on activating vocabulary and grammar structures, speaking at the paragraph level, self-correction, and using both formal and informal registers of Arabic.

Prerequisite: ARAB202; or equivalent, or must have appropriate World Language Placement Test (WLPT) score.

ARAB325 Structure and Function of the Arabic Language (3 Credits)

Facilitates logic-based understanding of Arabic grammar and syntax. Explores different grammatical structures and related elements, including through writing and translation.

Prerequisite: ARAB102; or must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: ARAB398I or ARAB325.

Formerly: ARAB398I.

ARAB341 Filming War Zones: Representations of Wars in Iraq & Chechnya (3 Credits)

Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.

Cross-listed with: CINE341.

Credit Only Granted for: ARAB341, CINE341 or FILM341.

Formerly: FILM341.

ARAB369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARAB386 Experiential Learning (3-6 Credits)

Pre-professional experience in research, analysis and writing in a work setting. Project proposal approved by faculty and internship sponsor. Junior standing.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB398 Special Topics in Arabic Studies (3 Credits)

In-depth study of a particular aspect of Arabic culture, literature, and language. Specific topic to be announced when offered. Taught in Arabic.

Prerequisite: ARAB304.

Repeatable to: 6 credits if content differs.

ARAB399 Independent Study In Arabic (1-3 Credits)

Research and writing or specific readings on a topic selected by the student and supervised by a faculty member on the Department of Arabic Studies. To be planned during semester preceding registration.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB401 Readings in Arabic Literature (3 Credits)

A survey of Modern Arabic literature is given through a range of selected texts. Texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Taught in Arabic.

Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Arabic.

ARAB410 Ideology of Stereotyping: American and Middle Eastern Film and Television (3 Credits)

Exploration of cultural stereotyping, using examples from American and Middle Eastern cinema and television. Students will examine ideological constructs of Otherness and its history, including Orientalism; propaganda techniques; and audiovisual aspects of stereotyping. While the focus is on American and Middle Eastern cultural production, the course will engage broader issues of stereotyping in contemporary society and media. Readings include theories of propaganda and cultural ideology.

Credit Only Granted for: ARAB410, ARAB499Q, FILM429Q.

Formerly: ARAB499Q.

ARAB489 Special Topics in Arabic Studies (3 Credits)

In-depth study of particular aspect of Arabic language and culture. Specific topics to be announced when course is offered. Taught in Arabic.

Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB499 Special Topics in Arabic Studies (3 Credits)

In-depth study of particular aspect of Arabic culture, literature and language. Specific topic to be announced when course is offered.

Repeatable to: 18 credits if content differs.

ARCH - Architecture

ARCH150 Discovering Architecture (3 Credits)

Introduction to architecture and design studio education. The course examines fundamental design principles and skills related to architecture. The design studio projects apply ideas and concepts introduced in lectures, readings and on site visits. The design studio projects are both analytic and synthetic in nature. The explicit goals of the course are: To explore the discipline of architecture; To promote visual thinking and representational skills; To develop analytic design thinking skills; To learn some of the conventions of architectural representation; To enhance cultural awareness of architecture and design.

Prerequisite: Permission of ARCH-Architecture Program.

ARCH170 Design Thinking and Architecture (3 Credits)

Examines conceptual, perceptual, behavioral, and technical aspects of the built environment, and methods of analysis, problem-solving, and design implementation.

ARCH171 Design Thinking and Making in Architecture (3 Credits)

Examines iterative design processes and critical thinking skills through active learning and design thinking methodologies to solve problems and apply design as a lens of inquiry and exploration. Students will understand Design Thinking through interactive and experiential learning.

Restriction: Must be a major in ARCH-Architecture Program; and must be a freshman; or have permission of the School of Architecture, Planning and Preservation.

ARCH200 Design Media and Representation I (3 Credits)

Study of architectural representation in physical and digital design media. Examine visual literacy and visual communications through applied drawing, modeling and visual making to explore the role of design media and representation in design and design thinking.

Restriction: Must be in a major in ARCH-Architecture Program.

ARCH201 Elements and Principles of Architecture (1 Credit)

Survey of fundamental elements and principals of architecture and architectural education. Frames study of architecture as a profession, discipline and critical practice.

Restriction: Must be in a major in ARCH-Architecture Program.

ARCH225 History of World Architecture I (3 Credits)

Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture

ARCH226 History of World Architecture II (3 Credits)

Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture

ARCH270 Design in Practice (3 Credits)

Case studies and hands-on design projects ranging in scale from a product to a building to give students insight into the process by which architects work both individually and collaboratively to put disciplinary knowledge and expertise into practice to shape our built environment.

ARCH271 People, Planet, and Profit: Building Sustainable Places (3 Credits)

An introduction to the four disciplines represented in the School: architecture and urban design, community planning, historic preservation, and real estate development, that work to create a more sustainable environment for the future to create a more sustainable environment for the future using our interpretation of the quadruple bottom line: socio-cultural, economic, environmental, and design sustainability. Students will be provided with an understanding of the fundamental scholarship and processes of each of these disciplines and examine the intersections between them. Additionally, they will learn by applying the approaches of the four disciplines through a series of field studies.

Cross-listed with: RDEV250.

Credit Only Granted for: ARCH271 or RDEV250.

ARCH272 Sustainability at College Park (3 Credits)

Explore the ways and the degrees to which University of Maryland, College Park campus master planning and operations incorporate principles of sustainability including smart growth, LEED and other building rating systems, higher education rating systems, sustainable agriculture and transportation planning. Among other subjects, students will learn about the Campus and the City of College Park and survey the relationship between local, national and global sustainability concerns. Students will learn about the University's Climate Action Plan and the roles, and extent to which, the UMD Office of Sustainability and other campus units are helping develop a carbon-neutral and resource-efficient campus infrastructure.

ARCH289 Independent Studies in Architectural Sustainability (1-4 Credits)

Independent Studies in Architectural Sustainability. Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH300 Design Media and Representation II (3 Credits)

Study of architectural representation in physical and digital design media. Examine visual communications and speculative visual studies through applied drawing, modeling and making to explore expanded roles of representation in design and design thinking.

Prerequisite: ARCH200; or permission of ARCH-Architecture Program.

Restriction: Must be in a major in ARCH-Architecture Program.

ARCH350 Intro to Creative Placemaking: Practices & Principles (3 Credits)

This case-study based seminar introduces students to Creative Placemaking as a practice that leverages the power of the arts, culture, and design to support equitable, vibrant, and sustainable communities. Students analyze Creative Placemaking initiatives that elevate our shared humanity and address critical challenges, such as conversations about racial injustice, inequitable development, climate change or celebrations of the diverse communities and cultures around us. Such projects enable us to consider and imagine ethical development practices, especially in underserved and historically marginalized neighborhoods. Based on participation in creative placemaking and presentations from practitioners, they will capture the ways that artists and designers in partnership with local culture bearers and knowledge keepers can play a vital role in shaping, keeping, and making meaningful places.

Restriction: Must be in the Creative Placemaking Minor; or by permission of instructor or program director.

Credit Only Granted for: ARCH458 or ARCH350.

Formerly: ARCH458.

Additional Information: Priority will be given to students in the Creative Placemaking Minor or interested in the minor. Course may include off-campus field trips.

ARCH386 Experiential Learning (1-6 Credits)

Learning experience tied to internship of specified duration with targeted learning outcomes.

Restriction: Must have learning proposal approved by faculty sponsor and student's internship sponsor; and sophomore standing or higher; and permission of ARCH-Architecture Program.

ARCH400 Architecture Design Studio I (6 Credits)

Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

ARCH401 Architecture Design Studio II (6 Credits)

Continuation of ARCH 400 with introduction to building typology, urban and contextual issues, design of the vertical surface, and architectural interiors.

Prerequisite: Minimum grade of C- in ARCH400.

Restriction: Must be in Architecture (B.S.) program.

ARCH402 Architecture Design Studio III (6 Credits)

Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical.

Prerequisite: Minimum grade of C- in ARCH401.

Restriction: Must be in Architecture (B.S.) program.

ARCH403 Architecture Design Studio IV (6 Credits)

Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.

Prerequisite: Minimum grade of C- in ARCH402.

Restriction: Must be in Architecture (B.S.) program.

ARCH404 Graduate Architecture Design Studio I (6 Credits)

Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses. Offered fall only.

Recommended: For 3 1/2 year graduate students only.

Restriction: Must be in Architecture (Master's) program.

ARCH405 Graduate Architecture Design Studio II (6 Credits)

Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical. Offered spring only.

Prerequisite: Minimum grade of C- in ARCH404.

Restriction: Must be in Architecture (Master's) program.

ARCH406 Graduate Architecture Design Studio III (6 Credits)

Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.

Prerequisite: Minimum grade of C- in ARCH405.

Restriction: Must be in Architecture (Master's) program.

ARCH407 Graduate Architecture Design IV (6 Credits)

Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high-density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit Oriented Development, density, sustainable development, building typology, and street design.

Prerequisite: Minimum grade of C- in ARCH406.

Restriction: Must be in Architecture (Master's) program.

ARCH408 Special Topics Architecture Design Studio (6 Credits)

Design Studio course to examine topical problems in architecture and urban design.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 12 credits if content differs.

Additional Information: May also be taken for repeat credit for ARCH400, ARCH401, ARCH402, or ARCH403 only by permission of Architecture Program Director.

ARCH418 Selected Topics in Architectural Technology (3 Credits)

Selected Topics in Architectural Technology

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH419 Independent Studies in Architectural Technology (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH420 History of American Architecture (3 Credits)

American architecture from the late 17th to the 21st century.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture program.

ARCH423 History of Roman Architecture (3 Credits)

Survey of Roman architecture from 500 B.C. To A.D. 325.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH425 History of Architecture I (3 Credits)

Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH225 or ARCH425.

Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH426 History of Architecture II (3 Credits)

Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH226 or ARCH426.

Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH427 Theories of Architecture (3 Credits)

Survey of architectural theories - theories of architectural design, representation and urban design from antiquity to the present day.

Prerequisite: ARCH426; or permission of ARCH-Architecture Program.

Restriction: Must be in Architecture (B.S.) program.

ARCH428 Selected Topics in Architectural History (1-4 Credits)

Selected Topics in Architectural History

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH429 Independent Studies in Architectural History (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH430 Measuring Sustainability in Architecture (3 Credits)

Studies metrics of sustainability as included in rating standards, including LEED. All students will take the LEED GA test.

Credit Only Granted for: ARCH430 or ARCH418M.

Formerly: ARCH418M.

ARCH435 History of Contemporary Architecture (3 Credits)

Architectural history from World War II to the present.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH443 Visual Communication For Architects (3 Credits)

Investigation of the relationship between drawing from life and architectural drawing, the conventions of architectural drawing and the role of architectural drawing as a means to develop, communicate, and generate architectural ideas.

Corequisite: ARCH400.

Restriction: Must be in Architecture (Master's) program; and must be in the 3.5 year M. ARCH program.

ARCH445 Visual Analysis of Architecture (3 Credits)

Study of visual principles of architectural and urban precedents through graphic analysis. Exercises include on-site observation, documentation and analysis. Focuses on the development of an architect's sketchbook as a tool for life-long learning.

Prerequisite: ARCH400; or permission of ARCH-Architecture Program.

Restriction: Must be in Architecture (B.S.) program.

ARCH448 Selected Topics in Visual Studies in Architecture (3 Credits)

Selected Topics in Visual Studies in Architecture

Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH449 Independent Studies in Visual Studies in Architecture (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH456 Great Cities (3 Credits)

Case studies from a selection of the great cities of the world.

Prerequisite: Permission of ARCH-Architecture Program.

ARCH458 Selected Topics in Urban Design (3 Credits)

Selected Topics in Urban Design

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH459 Independent Studies in Urban Design (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH460 Site Analysis and Design (3 Credits)

Principles and methods of site analysis; the influence of natural and man-made site factors on site design and architectural form.

Restriction: Must be in the Master of Architecture program; or permission of the School of Architecture, Planning and Preservation.

ARCH461 Sustainability in Architecture (3 Credits)

Strategies of sustainability as related to the broader context of architectural problem solving.

Restriction: Permission of ARCH-Architecture Program.

Credit Only Granted for: ARCH418S or ARCH461.

Formerly: ARCH418S.

ARCH462 Methods & Materials of Building Construction (3 Credits)

Building Construction methods and materials are examined through case studies to explore the means and techniques applied to the material execution of buildings and BIM. Focus on an understanding of the organization of the design and construction process and awareness of building and zoning codes, material systems and types.

Prerequisite: PHYS121 or equivalent; and MATH120 or MATH140 or equivalent; or permission of the ARCH-Architecture Program.

Restriction: Must be in a major in undergraduate or graduate ARCH program or Construction Project Management Minor.

Credit Only Granted for: ARCH410 or ARCH462.

ARCH463 Sustainable Systems in Architecture (3 Credits)

Sustainable systems in architecture examines the nature of the global problem, environmental economics, understanding the local environment, bioclimatic design, solar control and shading, solar access zoning, residential scale energy design issues, commercial scale energy design issues, and urban scale energy design issues.

Prerequisite: ARCH462.

Restriction: Must be in a major in undergraduate or graduate ARCH program.

ARCH464 Architectural Structures I (3 Credits)

This course covers the basic principles of architectural structures, including the influence of geometric, sectional, and material properties related to flexure and shear in beam and framed systems; vector mechanics with application to analysis of trusses, catenaries, and arches; diagrammatic analysis of beams for bending moment, shear, and deflection as well as the study of structural framing systems for vertical and lateral loads.

Prerequisite: ARCH462, ARCH463, and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.

Corequisite: ARCH401 or ARCH406.

Restriction: Must be in either BS in Architecture or M.Architecture Program.

Credit Only Granted for: ARCH411 or ARCH464.

ARCH465 Architectural Structures II (3 Credits)

The basic principles of elastic behavior for different materials such as wood, steel, concrete, and composite materials and compares the properties and applications of materials generally will be covered. It investigates cross sectional stress and strain behavior in flexure and in shear, and torsion as well as the stability of beams and columns. The qualitative behavior of combined stresses and fracture in materials is also covered.

Prerequisite: ARCH464 and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.

Restriction: Must be in either BS in Architecture or M. Architecture Program.

Credit Only Granted for: ARCH412 or ARCH465.

ARCH466 Environmental Systems in Architecture (3 Credits)

Environmental systems in architecture presents the theory, quantification, and architectural design implications for heating ventilating and air conditioning, water and waste, fire protection, electricity, illumination, acoustics, and vertical transportation.

Prerequisite: ARCH462 and ARCH463.

Corequisite: ARCH403 or ARCH406.

Restriction: Must be in either BS in Architecture or M. Architecture Program.

Credit Only Granted for: ARCH413 or ARCH466.

ARCH467 Integrated Project Delivery (3 Credits)

Integrated Project Delivery is examined from design to implementation through an exploration of building construction, architectural design and construction management perspectives.

Restriction: Must be in a major in ARCH-Architecture Program; or must be in Construction Project Management Minor.

ARCH468 Selected Topics in Architecture (1-4 Credits)

Selected Topics in Architecture

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH470 Computer Applications in Architecture (3 Credits)

Introduction to computer utilization, with emphasis on architectural applications.

Prerequisite: ARCH400; or permission of ARCH-Architecture Program.

ARCH472 Building Information Modeling Communication and Collaboration (3 Credits)

Building Information Modeling is explored as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.

Restriction: Must be in a major in ARCH-Architecture Program; or must be in the Construction Project Management Minor.

Credit Only Granted for: ARCH678I or ARCH472.

Formerly: ARCH678I.

ARCH478 Selected Topics in Architecture (1-4 Credits)

Selected Topics in Architecture

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH479 Independent Studies in Architecture (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH481 The Architect in Archaeology (3 Credits)

The role of the architect in field archaeology and the analysis of excavating, recording, and publishing selected archaeological expeditions.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH482 The Archaeology of Roman and Byzantine Palestine (3 Credits)

Archaeological sites in Palestine (Israel and Jordan) from the reign of Herod the Great to the Moslem conquest.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH483 Field Archaeology (3 Credits)

Participation in field archaeology with an excavation officially recognized by proper authorities of local government.

Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH488 Selected Topics in Architectural Preservation (1-4 Credits)

Selected Topics in Architectural Preservation.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

ARCH489 Independent Studies in Architectural Preservation (1-4 Credits)

Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.

Restriction: Permission of ARCH-Architecture Program.

Repeatable to: 6 credits if content differs.

AREC - Agricultural and Resource Economics

AREC200 The Chesapeake Bay Ecosystem: Intersection of Science, Economics, and Policy (3 Credits)

The Chesapeake Bay is one of the most studied and monitored ecosystems in the world. To develop effective policies to restore this system to a healthier status requires integrating what we know about the biological and physical properties of the system with our understanding of the human dimension. Issues such as achieving nutrient reduction goals, restoring healthy blue crab and oyster fisheries in the bay will be used to demonstrate how economics interacts with science to guide policies that can be effective in achieving Bay restoration goals.

AREC210 The Food Chain: What Happens As Your Food Goes From Farm to Table (3 Credits)

How can we feed a growing global population, reduce farming's environmental damage, and provide a healthier diet, all in the face of climate change? The course explores these global food system challenges in the context of the food supply chains that link farms, input providers, traders, food processors, retailers, consumers, and governments. We assess how supply chains are organized; how they use technologies; and how they can create organizations, develop new technologies, and adapt food production practices to meet these four major challenges facing the global food system.

AREC240 Introduction to Economics and the Environment (4 Credits)

Costs and social impacts of pollution and human crowding in the modern environment. The economic, legal and institutional causes of these problems. Public policy approaches to solutions and the costs and benefits of alternative solutions.

Credit Only Granted for: AREC240 or AREC250 .

AREC241 Environment, Economics and Policy (4 Credits)

How can economics help us understand modern environmental problems and design better policies to solve them? This course studies the relationship between the economy, environment and policy. The importance of production, consumption, externalities, property rights and public goods in environmental issues is examined. Technological and incentive-based solutions are considered. Students will apply these concepts to evaluate current controversial environmental problems.

Credit Only Granted for: AREC240 or AREC241.

AREC250 Elements of Agricultural and Resource Economics (3 Credits)

An introduction to economic principles of production, marketing, agricultural prices and incomes, farm labor, credit, agricultural policies, and government programs.

Credit Only Granted for: AREC240 or AREC250.

AREC254 Charting a Sustainable Future: Integrating Economics and Policy for Climate Action (3 Credits)

Explores climate change through an economic perspective, focusing on how economic principles can inform effective climate policies. Students will learn about the causes and impacts of a changing climate, evaluate various policy approaches, and develop critical thinking skills. By the end of the semester, they will understand economic tools for addressing climate change and the associated political, socioeconomic, and ethical complexities.

AREC260 The Science of Gender in Economics and Development (3 Credits)

Is science an objective enterprise that qualifies researchers to investigate gender free from the constraints and prejudice of their culture? We will investigate the process by which various scientific disciplines, including anthropology, evolutionary biology, psychology, and economics do research on the topic of gender. We will describe the current state of the literature on why different sexes exist and how sex translates into gender across different societies today. With a better understanding of the sources of sex and gender, we will examine how to research the reasons behind the highly divergent economic outcomes for men and women today. We will discuss these issues in the context of the labor market in developed countries like the US as well as a variety of contexts in developing countries. A particular focus will be the techniques for learning more about the underlying reasons for these differences, how and whether they can be overcome, and if women play a specific role in improving economic outcomes in the poorest parts of the world.

Recommended: Completion of introductory statistics recommended but not required.

AREC280 Harvesting Big Data to Examine Agriculture and Climate Change (3 Credits)

Can agricultural production keep up with climate change? The digital revolution has changed the way we analyze and interpret the world. Big data offers both opportunities and challenges that require new tools and methods of analysis. This course applies sophisticated digital tools to an age-old concern: the impact of climate on agricultural productivity. In this hands-on introduction to data analysis and visualization with real-world data, students acquire the tools to understand the impacts of environmental change and more.

Credit Only Granted for: HNUH258A or AREC280.

Formerly: HNUH258A.

AREC306 Farm Management and Sustainable Food Production (3 Credits)

The organization and operation of farm businesses are explored through principles of management, financial analysis, production economics, marketing, and business planning. These farm management principles are presented in the context of a sustainable food production system.

AREC326 Intermediate Applied Microeconomics (3 Credits)

Deepens and broadens your ability to apply rigorous economic analysis skills to a broad range of problems.

Prerequisite: ECON200, AREC250, or AREC240; and ECON201. And MATH120, MATH130, MATH136, or MATH140; or must have completed MATH220.

Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.

Formerly: AREC489M.

AREC345 Global Poverty and Economic Development (3 Credits)

This interdisciplinary course explores social and economic development around the world. Topics include geography, democratization, political instability and conflict, health and education, agricultural development, micro-entrepreneurship, and an introduction to impact evaluation methods used to evaluate the efficacy of public policy aimed at alleviating poverty.

AREC357 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)

Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.

Cross-listed with: GERS457.

Credit Only Granted for: AREC357 or GERS457.

AREC360 Global Agriculture: Developing Extension Education & Agriculture Technologies in Africa (3 Credits)

Identifies challenges faced by farmers in Nimba County, Liberia, and works collaboratively across borders to discuss these challenges and develop extension education programming that will be implemented in the region in order to empower local farmers. The course is designed to create a paradigm shift for both cohorts of students who will educate and learn from each other in what is now becoming a critical context - the globalized workspace. UMD and LICC students will be grouped together to identify and develop particular thematic areas most needed by local farmers, and then as a cohort create a week-long extension program to be implemented on the ground.

AREC365 World Hunger, Population, and Food Supplies (3 Credits)

An introduction to the problem of world hunger and possible solutions to it. World demand, supply, and distribution of food. Alternatives for leveling off world food demand, increasing the supply of food, and improving its distribution. Environmental limitations to increasing world food production.

AREC370 From Poverty to Progress in The World's Largest Democracy: India's Political Economy in Transition (3 Credits)

India, the largest country in the world, is home to nearly 18% of the global population. As such, India's growth and progress have profound implications for humanity's trajectory in the 21st century. This course explores India's past, present, and future through the lens of political economy. We will explore the incentives of politicians and bureaucrats as well as issues related to local governance and social movements.

Prerequisite: ECON200, AREC250 or AREC240; and one of the following: STAT100, MATH107, BMGT230, ECON230 or STAT400.

AREC380 Data Science for Environmental and Resource Economics (3 Credits)

An introduction to principles of data science using modern, open source software tools with applications to important problems in environmental, energy and resource economics. Topics include data wrangling, exploratory data analysis and visualization, modeling, forecasting, practices for reproducible research, and communication of results.

Prerequisite: AREC240, AREC241, AREC250, or ECON200.

AREC386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of AGNR-Agricultural & Resource Economics department.

Restriction: Junior standing or higher.

AREC388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Restriction: Must be in the AGNR Honors program.

Repeatable to: 6 credits if content differs.

AREC399 Special Problems (1-3 Credits)

Concentrated reading and study in some phase of a problem in agricultural and/or natural resource economics.

Repeatable to: 6 credits if content differs.

AREC405 Economics of Production (3 Credits)

The use and application of production economics in analysis of firm and policy decisions. Production functions, cost functions, multiple product and joint production, and production processes through time.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC422 Econometric Analysis in Agricultural and Environmental Economics (3 Credits)

This course offers a hands-on introduction to econometrics. Students will explore the linear regression model from the ground up by analyzing real-world datasets and learning how to distinguish causation from correlation. They will gain practical experience using econometrics to address important questions in agricultural economics and environmental economics.

Prerequisite: 1 course from (AREC326 or ECON326); and 1 course from (ECON230, ECON321, or BMGT230).

Credit Only Granted for: ECON422, ECON424, or AREC422.

AREC426 Economic Methods and Food Consumption Policy (3 Credits)

An overview of major econometric tools used by policy makers, economists and social scientists to analyze the effects of food consumption policy. Major food assistance programs in the United States such as SNAP, the School Lunch Program and the School Breakfast Program will be discussed.

Prerequisite: AREC326; or ECON326.

Credit Only Granted for: AREC4890 or AREC426.

Formerly: AREC4890.

AREC427 Commodity Pricing and Markets (3 Credits)

Economic theory as applied to the marketing of agricultural commodities. How commodity prices vary with current demand and production, and how prices are linked over time, across space, and across grades.

The role played by contractual arrangements, cooperative marketing, vertical integration, and governmental policies in commodity marketing strategies.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC430 Introduction to Agricultural and Resource Law (3 Credits)

Survey of law with emphasis on problems and applications related to agricultural and natural resource economics. The course emphasizes strategies for managing legal risk arising from ownership, management, and use of agricultural resources. Students will get practical information to utilize in personal or professional settings. Contract law, constitutional law, tort law, property law, real estate transactions, business organization, estate planning, and debtor.

Prerequisite: ECON326 or AREC326.

Credit Only Granted for: AREC430 or AREC489K.

Formerly: AREC489K.

AREC431 Agricultural Water Quality: Policy and Legal Issues (3 Credits)

An overview of the American and Maryland legal systems and sources of legal information as it pertains to water quality and agriculture.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: AREC489L or AREC431.

Formerly: AREC489L.

AREC433 Food and Agricultural Policy (3 Credits)

Economic and political context of governmental involvement in the farm and food sector. Historical programs and current policy issues. Analysis of economic effects of agricultural programs, their benefits and costs, and comparison of policy alternatives. Analyzes the interrelationship among international development, agricultural trade and general economic and domestic agricultural policies.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC435 Commodity Futures and Options (3 Credits)

The economics and institutional features of commodity futures and options markets. Students will develop a basic understanding of the underlying price relationships between cash and futures markets and will apply this information to business risk management decision making.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

AREC445 Agricultural Development, Population Growth and the Environment (3 Credits)

Development theories, the role of agriculture in economic development, the agricultural policy environment, policies impacting on rural income and equity, environmental impacts of agricultural development.

Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC446 Sustainable Economic Development (3 Credits)

Examine why socially equitable and environmentally sustainable economic growth is difficult to achieve. It explores the interactive dynamics of environmental degradation, human capital, inequality and institutions. Emphasis is on the role of market imperfections and political failure in explaining the persistence of extractive economic institutions that hinder sustainable development.

Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: AREC446 or AREC489G.

Formerly: AREC489G.

AREC447 The Economy of China (3 Credits)

An introductory survey course of economic development in China with emphasis on understanding the process of economic reform in mainland China since 1978.

Prerequisite: AREC326, ECON306, or ECON326.

AREC453 Natural Resources and Public Policy (3 Credits)

Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.

Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).

Cross-listed with: ECON453.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: AREC453 or ECON453.

AREC454 The Economics of Climate Change (3 Credits)

The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON484.

Credit Only Granted for: AREC454 or ECON484.

AREC455 Economics of Land Use (3 Credits)

Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON485.

Credit Only Granted for: AREC455 or ECON485.

AREC456 Energy and Environmental Economics (3 Credits)

Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation, climate change, and transportation policies.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON486.

Credit Only Granted for: AREC456 or ECON486.

AREC457 Energy, Climate Change, and Options for a Low-Carbon Economy (3 Credits)

Provides a primer in the physics and atmospheric chemistry of climate change, describes what the effects of climate change may be and explains how energy generation and use in various sectors of the economy contribute to greenhouse gas. It presents policy options meant to curb the use of fossil fuels (e.g., carbon taxes), improve energy efficiency (e.g., standards and incentives), and identifies possible drawbacks or unintended effects of such policies. Students will also study adaptation from the engineering, policy and anthropology points of view. The course further covers other aspects of climate change, as the potential effect of climate change on human health, cultural artifacts and the built environment, and sensitive ecological systems, and the legal implications of carbon storage options.

Recommended: ECON200. And AREC326; or ECON326.

Restriction: Junior standing or higher.

AREC466 Transportation Engineering, Economics, and Policy (3 Credits)

The transportation system moves people and goods around the world, but transportation has downsides: harming local air quality, contributing to climate change, causing traffic accidents, and wasting people's time on congested roads. Mitigating these downsides will require new policies, new technologies, and new decisions by households and businesses. Focusing on the US transportation system, students will apply an integrated economics, policy, and engineering perspective to analyze transportation's most pressing challenges. Students are expected to have some background in one of the three disciplines—economics, engineering, or policy—but not all three. The beginning of the semester will include tutorials for students without much economics or engineering background.

Prerequisite: BMGT230, ECON230, ECON321, ENCE302, or PLCY304; or permission of the instructors.

Recommended: AREC326, ECON306 or ECON326.

Credit Only Granted for: AREC466 or ENCE489T.

AREC481 Environmental Economics (3 Credits)

An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: ECON481.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: ECON481 or AREC481.

AREC489 Special Topics in Agricultural and Resources Economics (3 Credits)

Repeatable to: 9 credits.

ARHU - Arts and Humanities

ARHU158 Explorations in Arts and Humanities (3 Credits)

A first-year innovation and research experience. It introduces multiple disciplinary perspectives within a given theme to understand human beings, cultures and societies. Students will learn about key questions, concepts, methods, and practices within ARHU and will engage in original humanistic research while working with campus and college tools and resources.

Restriction: Must be in a major in ARHU-College of Arts & Humanities; and freshman standing.

ARHU230 Introduction to Humanities, Health, and Medicine (3 Credits)

An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.

Cross-listed with: ENGL254, HIST219N, WGSS230.

Restriction: Permission of ARHU-English Department.

Credit Only Granted for: ARHU230, ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

ARHU240 Arts Organizations and Audiences in the United States (3 Credits)

An introduction to the history and role of arts organizations in the U.S., as well as the respective audiences and populations they serve. This grounding allows artists and emerging administrators to understand the events and questions that have shaped the field, and develop strategies for advancing sustainable arts organizations in the future.

Cross-listed with: TDPS240.

Credit Only Granted for: TDPS258C, TDSP240 or ARHU240.

Formerly: TDPS258C.

ARHU269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARHU269A Morocco: In the Footsteps of the Beat Generation (3 Credits)

Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the "orient" has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppression

Cross-listed with: ENGL269M.

Credit Only Granted for: ARHU269A or ENGL269M.

ARHU270 Quantum Steampunk Science-Fiction Workshop (3 Credits)

Steampunk is a science-fiction genre in which futuristic technologies populate Victorian-era settings. Recently, steampunk has come to life in the scientific field of quantum thermodynamics. Thermodynamics, the study of energy, grew out of the Industrial Revolution. Two centuries later, quantum physics is transforming computing and cryptography. Quantum science is now revolutionizing 19th-century thermodynamics in quantum thermodynamics, which features quantum engines, automata, and more. Quantum thermodynamics inspired the growing subgenre of quantum steampunk. In this course, you will read science fiction, write quantum steampunk short stories, receive feedback, and critique classmates' writing. In parallel, you will learn about quantum physics, technologies, and thermodynamics.

Cross-listed with: CMSC298Q, ENME299Q, PHYS299Q.

Credit Only Granted for: ARHU270, CMSC298Q, ENME299Q or PHYS299Q.

ARHU271 Creative Writing Cross-Cultural Perspectives in Poetry and Fiction (3 Credits)

Students immerse themselves in the study and practice of multicultural fiction and poetry, fostering a broad appreciation of diverse voices and storytelling styles. Through engaging discussions, students will explore themes and techniques from various cultural perspectives. Writing exercises encourage experimentation across genres, allowing students to discover and refine their unique voices. In a supportive workshop environment, students will share their original work, receive constructive feedback, and engage in collaborative refinement. The course culminates with students compiling their work into an online portfolio and presenting selected pieces in a final reading with peers.

Credit Only Granted for: ARHU298J or ARHU271.

Formerly: ARHU298J.

ARHU275 Writing for the Stage and Screen: An Introductory Workshop (3 Credits)

Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.

Cross-listed with: ENGL275.

Credit Only Granted for: ENGL275 or ARHU275.

ARHU286 Experiential Learning (3-6 Credits)

Designed for students who are in their first semester at the University of Maryland and/or students who wish to complete legislative internships, some start-up internships and some remote internships. All students must be enrolled in an ARHU major or minor and the internship must be in one of the academic fields covered within the College of Arts and Humanities. In addition to completing their required hours on site, students will be required to attend three bi-weekly seminars at the beginning of the semester to help develop their para-professional goals and understandings.

Prerequisite: Permission of ARHU-College of Arts & Humanities.

Restriction: Minimum cumulative GPA of 2.5; and must be in a major or minor in ARHU - College of Arts and Humanities.

ARHU298 Special Problems in Arts and Humanities (3 Credits)

Repeatable to: 6 credits if content differs.

ARHU298L "Are you - Nobody - too?" Why we create and share stories, poems, comics and zines (3 Credits)

Our ability to create and maintain meaningful social connections tells us that we are not alone; it reminds us that we are connected to something larger, a community, a group of people willing to celebrate our triumphs and help us cope during difficult times. Emphasizing the principles of participation, connection, and collaboration, this course explores how various traditionally marginalized people form their own cultural communities and develop a sense of reciprocal belonging through the creation (and independent distribution) of stories, poems, spoken word poetry, comics and zines. In spite of intersectional obstacles such as the lack of political power, access to resources and economic opportunities, these communities may find it possible to redefine their place in society by demonstrating originality, resilience, and talent.

ARHU299 Studies in Humanities Technology (1-3 Credits)

Selected topics in the use of Information Technology in the Humanities.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

ARHU300 Writers' House Colloquium: Welcome to Writers' House; Writing Your Manifesto (1 Credit)

Welcomes new students into Jimenez-Porter Writers' House, a literary center for the study of creative writing across cultures and languages, and helps them to understand, develop and write their own artist statement (aka Artist Manifesto). Students will explore the creative and intellectual traditions of our community, their craft and future careers, understand what these traditions are, how they have evolved over time and place, and why they matter. Emphasis will be placed on community building, engagement and participation, with presentations from the editorial staff of Stylus, executive board of Terpoets, Novelist Support Group as well as other professional development opportunities.

Restriction: Must be in the Jimenez-Porter Writers' House Living-Learning Program.

ARHU308 Critical Eras: An Interdisciplinary View (3 Credits)

An interdisciplinary exploration of a critical period, ranging from a year to an era, stressing the relationship between different forms of human expression and the social milieu.

Repeatable to: 6 credits if content differs.

ARHU309 Writers' House Colloquium: Creative Writing in Community (1-3 Credits)

Colloquium designed to improve students' skills in literary and communication arts through lectures, workshop and discussions on the history and craft of writing across cultures. Topics include poetry and fiction in translation, and exploration of modes of critique, elements of craft of fiction and poetry, writing for different media, genre writing, writing for performance, screen or scriptwriting and creative non-fiction.

Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.

Repeatable to: 6 credits if content differs.

ARHU318 Writers' House Colloquium: Creative Writing Across Languages and Cultures (1-3 Credits)

Colloquium designed to improve students' skills in literary and communication arts through lectures and discussions on the history and craft of writing across cultures. Topics for the different versions of ARHU 318 include poetry, fiction, writing for different media, autobiography and memoir, scriptwriting, screenwriting, and community engagement projects.

Prerequisite: Permission of ARHU-College of Arts & Humanities; and must be admitted to the Jimenez-Porter Writers' House.

Repeatable to: 6 credits if content differs.

ARHU319 Writers' House Second Year Colloquium: Form and Theory of Creative Writing (1-3 Credits)

Required course for Writers' House students pursuing the notation program. Offered in either poetry or imaginative prose writing. Students work at the intermediate level, refining creative writing skills through cross-cultural reading and writing exercises. As part of the course, students attend a series of lectures and readings given by professional writers.

Restriction: Must be in the Jimenez-Porter Writer's House program.

Repeatable to: 6 credits if content differs.

ARHU320 Writers' House Second Year Colloquium: Writing for Publication (3 Credits)

Students write, discuss and revise for multiple forms of publication: reading their own work at least once in public, sending work out for publication to literary journals, and producing a chapbook of high quality by end of semester.

Recommended: Completion of ARHU318 and ARHU319 recommended.

Restriction: Currently enrolled in Writers' House or permission of program.

Credit Only Granted for: ARHU319A or ARHU320.

Formerly: ARHU319A.

ARHU338 Undergraduate Teaching Assistantship in a Living Learning Program (1-3 Credits)

Offers exceptional students the opportunity to work closely with a faculty member and gain valuable experience. ARHU Living learning program UTAs also serve as peer mentors and program leaders. They assist with course planning, research, and student advising (as appropriate). We are also allowing for variable credit (1-3 cr hrs).

Restriction: Sophomore standing or higher; and must be in an ARHU Living Learning Program or be a graduate of the program; and must have permission of the Living Learning Program to enroll.

Repeatable to: 6 credits if content differs.

ARHU340 Arts Entrepreneurship and the Creative Profession (3 Credits)

Introduces students to arts entrepreneurship in preparation for diverse and ever-changing careers in the creative fields. Students will practice and develop their entrepreneurial mindsets and learn about different frameworks for audience engagement. Topics include financial management, revenue development, business planning, and the "need-to-knows" of the gig economy. Throughout the semester, students will have the opportunity to learn from a variety of entrepreneurs in the arts and to evaluate their future career paths.

Recommended: ARHU240.

Cross-listed with: MUSC448E.

Credit Only Granted for: ARHU340 or MUSC448E.

ARHU350 Chilean Culture, Democracy, and Social Change (3 Credits)

Short term education abroad course offered in Summer term, in Santiago and Valparaiso, Chile. An exploration of both the conditions that led to the 1973 coup d'etat in Chile, and the complex legacy left by the following dictatorship, including competing economic philosophies that are underpinned by religious, historical, and ideological components. This course focuses on how the arts and literature continued to flourish during the dictatorship, and how they have played a continuing role in the country's recovery from its traumatic past.

Credit Only Granted for: ARHU350, ARHU369C, CMLT498C, GVPT309F, HIST329N, HONR349C.

Formerly: ARHU369C.

ARHU351 James Joyce's Dublin: A multi-media Odyssey (3 Credits)

Chapter by chapter analysis of the text with in situ tours to settings important to the book, and examination of the culture and circumstances from which it arose; review of the impact of Ulysses, and continuing controversies around the text. Multi-media explorations and creative projects will be included in course activities: collaborations on tumblr, and the use of such technologies as vine, instagram, twitter, etc., in an exploration of how our subjective experiences and the expressions they inspire are impacted by new technologies.

Credit Only Granted for: ARHU369I, ARHU351, ENGL369J, or HONR349L.
Formerly: ARHU369I.

ARHU358 Becoming Worldwise and Worldready: Finding Success in College and Life (1 Credit)

Designed to help students navigate the various resources that exist at a large, Research 1 university like the University of Maryland. The course focus is helping them better understand the groundwork needed to transition successfully from underclassman to upperclassman, from an outside major into ARHU or from an external school to UMD, and ultimately from college into life post-graduation.

Restriction: Must be enrolled in a major in the College of Arts and Humanities.

Repeatable to: 3 credits if content differs.

ARHU369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARHU375 The TV Writers Room Screenwriting for Television and Video (3 Credits)

Students engage with the theory and practice of screenwriting for television and video. Students read and watch teleplays designed to teach advantages of the television format. Students apply what they learn to prepare frequent writing exercises, share and provide feedback for peers scripts in a workshop format, and work together as a Writers Room to prepare an original pilot episode.

Prerequisite: ARHU275, ARHU318, or FILM370; and permission of instructor.

Additional Information: Priority in enrollment will be given to students participating in the Jimenez-Porter Writers' House and FILM studies programs.

ARHU376 Writing the Feature Film (3 Credits)

Examines the creative process of developing and writing a feature-length screenplay. Students will experience a collaborative workshop environment, researching stories, pitching feature film ideas, creating a logline, developing a detailed beat sheet and, ultimately, writing a complete first draft of the screenplay.

Prerequisite: ENGL275, ARHU275, ARHU375 or THET340; or permission of instructor.

Cross-listed with: CINE376.

Credit Only Granted for: ARHU376 or CINE376.

ARHU380 Arts & Humanities in Social Innovation, Change, and Justice: Do Good Now (3 Credits)

The course serves as the core course for the Arts-and-Humanities track in PLCY's minor in "Nonprofit Leadership and Social Innovation." Students will be introduced to the role that the Arts and Humanities can play in social innovation and social change, while exploring various mechanisms for achieving impact with a focus on advancing social justice, equity and systems change. This course deepens understandings of nonprofit leadership, entrepreneurship and social innovation by guiding students through the creation and implementation of social change projects and ventures of their choice.

Cross-listed with: JWST319P.

Credit Only Granted for: ARHU380, BSOS388B, JWST319P, or PLCY388D.

ARHU386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of ARHU-College of Arts & Humanities.

Restriction: Junior standing or higher.

ARHU398 Special Topics in Arts and Humanities (3 Credits)

An in-depth exploration of thematic topics in Arts and Humanities.

Repeatable to: 9 credits if content differs.

ARHU439 Interdisciplinary Studies in Arts and Humanities (3 Credits)

An interdisciplinary exploration of chronological, geographical or thematic topics in Arts and Humanities.

Repeatable to: 6 credits if content differs.

ARHU440 Arts Leadership Seminar (3 Credits)

An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.

Cross-listed with: TDPS440.

Credit Only Granted for: TDPS440 or ARHU440.

ARHU441 Arts Entrepreneurship: Theory and Practice (3 Credits)

Establishes arts entrepreneurship as a unique discipline with the goal of connecting creative initiatives (products, artforms, and programs) to audiences, resources, and communities. Introduces students to the ways in which creative initiatives both create value and offer solutions to social, political, environmental, and cultural issues. Students will develop artist impact statements and identify different contexts and ways to apply their talents and creative initiatives in society.

Prerequisite: ARHU240 or TDPS240; or permission of instructor.

Recommended: ARHU440 or TDPS440.

Cross-listed with: TDPS441.

Jointly offered with: ARHU640, TDPS640.

Restriction: Limited to 4 undergraduate students (2 in ARHU and 2 in TDPS).

Credit Only Granted for: TDPS458E, ARHU441, TDPS441, ARHU640 or TDSP640.

Formerly: TDPS458E.

ARHU458 Graduate School Preparation (1 Credit)

Designed for Juniors and Seniors who are interested in applying to graduate school. Topics include skills needed for the graduate school search and application process, evaluation and reflection of application materials, preparation for GRE exam, and exploration into career options after graduate school. Focus on the Humanities fields.

Restriction: Must have earned a minimum of 60 credits.

Repeatable to: 3 credits if content differs.

ARHU468 Peer Mentoring Program (1 Credit)

A workshop for sophomore, junior or senior students who wish to serve as peer mentors helping first-year students to cope with the numerous issues which often arise in the transition to the university.

Restriction: Sophomore standing or higher; and permission of ARHU-College of Arts & Humanities.

Repeatable to: 3 credits if content differs.

ARHU486 Internship Practicum in Arts and Humanities (3-6 Credits)

An internship intended for students who have already completed an internship for credit. ARHU486 must be a different experience from the internship students have already taken for credit. Generally students intern with a different company, but they may continue working for the same company if the job is significantly different. See ARHU internship coordinator for details.

Prerequisite: Have completed previous internship at U of MD.

Restriction: Must be in a major in ARHU-College of Arts & Humanities; and permission of ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits; and completed 12 credits at U of MD.

ARHU489 Advanced Internship Practicum in ARHU (3-6 Credits)

Designed for students who have already completed at least 2 upper level internship courses for academic credit. It is an advanced practicum to assist students in continuing to develop and hone their professional writing, presentation and analytical skills.

Prerequisite: ARHU486.

Restriction: Must be in a major in ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and permission of instructor.

Repeatable to: 6 credits if content differs.

Additional Information: Course is designed to follow ARHU486.

ARHU498 Special Topics in Arts and Humanities (3 Credits)

Repeatable to: 6 credits if content differs.

ARHX - Art History & Archaeology Education Abroad

ARHX100 Art of Rome (3 Credits)

An introductory course in the history of art. The course focuses on Rome, from its origin to contemporary times. Masterpieces of painting, sculpture, architecture and urban planning are examined within their historical contexts. The course hones a method of description, critical analysis and interpretation of art and builds an understanding of traditional forms and cultural themes useful in the comprehension of all western art.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

ARHX201 Media, Art and Social Activism (3 Credits)

Focuses on media that have been created expressly for communicating and/or promoting positive social change, blending social theory with aesthetics and civics. The course investigates current trends in visual communication, as well as the methods for how to analyze and contextualize these, with an emphasis on politics in art and new media.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

ARHX205 Art Histories: An Introduction to the Visual Arts in London (3 Credits)

Focuses on the rich visual resources of London by exploring histories and theories of art while examining issues of museology, curatorial practice, and art criticism. This course helps develop skills of visual analysis and provides an understanding of a range of artistic movements and the themes, preoccupations, and stylistic forms which characterize them.

Additional Information: This course is offered as part of the ARHU-in-London study abroad program. Students must apply for this program through Education Abroad: More information at globalmaryland.umd.edu/offices/education-abroad/program/11854. Education Abroad processes registrations for this course on behalf of students.

ARHX206 History of Italian Design (3 Credits)

The history of design and production in Italy from the industrial revolution to the present, ranging from industrial, to product, to furniture design; giving attention to the extraordinary blend of imagination and exactitude that characterizes Italy. During the semester we will trespass in the world of fashion design as well as that of car styling. Particular importance will be given to the parallel production of visual arts, cinema, literature and other fields of culture.

Credit Only Granted for: ARTH269D or ARHX206.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX300 The Art of Florence: Exploring Visual Culture (3 Credits)

During the Renaissance, the city of Florence was the site of some of the most remarkable artistic experiences in European history. Why, though, should one city have contributed so much to the course of the arts? Why should so many of the city's works of art, monuments, and buildings have played a major role in the development of the visual arts? What set of circumstances and conditions made this possible? This course is designed to explore these questions through an examination of historical factors that made Florence the birthplace and point of reference for what we now call "Renaissance art."

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX301 New Perspectives: Visual Technology in Renaissance and Baroque Art (3 Credits)

This interdisciplinary course explores the depiction of visual space in Renaissance and Baroque Art through the medium of modern technologies. The visual theories of authors including Leon Battista Alberti, Piero della Francesca and Leonardo da Vinci will be given practical application through the use of the digital design software Autodesk Autocad.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX302 Raphael and The High Renaissance in Florence and Rome (3 Credits)

This course will examine the career and achievements of Raphael (1483-1520), and will consider the artist in the context of the High Renaissance in Florence and Rome. It will consider the sources and documents for his career, as well as the later historiography, and it will include study of the many works by Raphael in Rome and in the Vatican Museums.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARHX303 Nordic Contemporary Art (3 Credits)

Focuses on current trends and the dynamics of regional identity in contemporary art, art history, and curating. The Stockholm art scene is used as an entry-point to analyze artworks, exhibitions and texts: What is contemporary, and what is Nordic, about the art and issues that surface here?

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARHX304 Contemporary Spanish Art (3 Credits)

A dynamic, multi-disciplinary introduction to Contemporary Art in Spain. We will discuss recent classics as well as emerging artists, and we will cover a wide range of artistic practices, from photography to afterpop music, including installation art, performance art and comic art.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ARHX310 The Business of Art: The Economics and Management of Culture (3 Credits)

Markets for visual arts provide a particularly fertile ground for those concerned with the economics of culture. The study of the past and current structure of the market for visual art, the mechanisms that fuel this flourishing market and the involvement of public and private institutions in the context of the current globalization of the arts, provides significant instruments for the development of museum management studies, as well as a different methodological approach to art history and history of culture management.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX311 Feminism in Art (3 Credits)

Explores the developing presence of female artists in visual art and contemporary culture through seminars, exhibitions, and theater shows. Analyzes the relationship of women in the history of contemporary art and their contribution to both conceptual and linguistic innovation, and feminism as the most radical cultural transformation of the contemporary era.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX312 20th Century Italian Art (3 Credits)

Explores artistic movements in Italy over the last century, beginning with an exploration of the roots of avant-garde trends in the 19th century and moving into Divisionism, Macchiaioli, Futurism, Metaphysical painting, the abstract movement of the 1930's, Arte Povera as well as the art of the present.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX313 London and its Museums (3 Credits)

Through weekly visits to varying museums around London, this course equips students to consider history in a broader perspective, evaluate exhibition experiences, and apply research to museum studies. Explores London's collections to contextualize and critically evaluate the cultural and historical value, purpose, and educational role different types of exhibiting space hold.

Additional Information: This course is offered as part of the ARHU-in-London study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/ARHULondon. Education Abroad processes registrations for this course on behalf of students.

ARHX314 Michelangelo: Painter, Sculptor, Architect (3 Credits)

Explores the life and work of Michelangelo, one of the most revolutionary, respected, and influential Renaissance artists. Focuses on four main and interrelated areas, and the dynamic relationships between them: painting, sculpture, architecture, and drawing. Looks at Michelangelo's works, working process, interactions with patrons, and his impact on others. Also explores Michelangelo's works in person in museums, churches, piazza, and town halls.

Credit Only Granted for: ARTH369M or ARHX314.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARHX315 Archaeology and Art of Ancient Italy (3 Credits)

Provides an overview of Ancient Italy from the 8th century B.C.E. to the 5th century C.E. as interpreted through archaeology, the study of past cultures and societies through their material remains. Explores varieties of archaeology and examines theory, methods, and techniques for investigating and reconstructing the past through a combination of in-class lectures, field trips, site visits to museums and archaeological digs in Tuscany.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11293>. Education Abroad processes registrations for this course on behalf of students.

ARMY - Army

ARMY105 Basic Military Science II (3 Credits)

Exploration of the Army Leadership Model through classroom instruction, leadership training and mentorship. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.

Credit Only Granted for: ARMY119 or ARMY105.

ARMY106 Basic Military Science I (3 Credits)

Introduction to the personal challenges and competencies that are critical for effective leadership and communication. Develops knowledge and competency in physical fitness through rigorous training and experiential leadership education through leadership laboratories.

Restriction: Students must meet Officer candidate criteria to participate in field training.

ARMY110 Intro to Army Military History (3 Credits)

This course is composed of 46 modules, including 43 lessons and 3 exams, covering military history from early colonial warfare in the eighteenth century to the global war on terrorism in the twenty-first century. The course begins with a pretest, which provides the learner with insight into what will be covered in the course and an opportunity to gauge their knowledge coming into the course. Each lesson will include readings and an Interactive Multimedia Instruction (IMI) piece. Discussion activities, writing assignments, and midterm and final exams will allow students to synthesize what they have learned.

Restriction: Must be in the Army ROTC program.

ARMY119 ARMY ROTC INDEPENDENT STUDY (1 Credit)

Exploration of the Army Leadership Model through group discussion, leadership exercises and research.

Restriction: Permission of UGST-Army ROTC.

Repeatable to: 2 credits.

Credit Only Granted for: ARMY119 or ARMY105.

Additional Information: -Intended to impart the lecture curriculum of ARMY105 without the labs.

ARMY201 Army Leadership Development (3 Credits)

This course is an intensive examination of the Army Leadership Model in practice. The model is compared to leadership styles and techniques from government and industry and the comparative effectiveness of each. Students form their own personal leadership styles.

Restriction: Sophomore standing or higher.

ARMY202 Military Leadership in Practice (3 Credits)

This course uses the case study method to examine the Army Leadership Model as applied to assigned missions in U.S. history. Students learn to evaluate and assimilate effective leadership methods and techniques. Includes a laboratory period in which case studies are worked out and presented by individuals and groups.

ARMY301 Advanced Military Leadership I (3 Credits)

Reinforces understanding and application of Army leadership strategies, critical decision making methodologies, physical and mental fitness excellence. Includes a laboratory period in applied leadership, common military tasks and physical fitness.

ARMY302 Advanced Military Leadership II (3 Credits)

Prepares contracted students for certification at the Army National Advance Camp, a prerequisite for commissioning as an officer in the U.S. Army. Focus is directed to military tactics, squad and platoon drills, marksmanship, land navigation and fitness excellence. Includes a laboratory period in applied leadership skills as well as a three day field exercise.

ARMY401 Advanced Military Leadership III (3 Credits)

Introduces contracted students to the study of Army structure, practices and processes exercised by Army Commanders and Staff in completing personnel, logistics, training and combat operations. Includes a laboratory in applied leadership skills and two field exercises.

ARMY402 Advanced Military Leadership IV (3 Credits)

The military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

ARSC - Air Science

ARSC100 Heritage and Values I (1 Credit)

Freshman course for AFROTC cadets. Introduces students to the United States Air Force and encourages participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AFROTC cadets must also register for ARSC059.

ARSC101 Heritage and Values II (1 Credit)

Freshman course for AFROTC. Continuation of ARSC100 for freshmen AFROTC cadets. Study of topics relating to the Air Forces and defense. Focuses on organizational structure and missions of the Air Force; officership and an introduction to both written and oral communication skills.

Corequisite: AFROTC cadets must also register for ARSC059.

ARSC200 Team and Leadership Fundamentals I (1 Credit)

Sophomore course for AFROTC cadets. Study of factors contributing to the development of air power from its earliest beginnings through two world wars; the evolution of air power concepts and doctrine; introductory leadership; and assessment of communicative skills.

Corequisite: AFROTC cadets must also register for ARSC059.

ARSC201 Team and Leadership Fundamentals II (1 Credit)

Continuation of ARSC 200 for sophomore AFROTC cadets. The study of historical events, leaders, and technical developments which surrounded the growth of air power; the basics of leadership; environment of an Air Force officer; and concepts of ethical behavior.

Corequisite: AFROTC cadets must also register for ARSC059.

ARSC300 Leading People and Effective Communication I (3 Credits)

The study of leadership and management fundamentals, professional knowledge, Air Force doctrine, and written and oral communication skills. Case studies are used to examine leadership and management situations. This course will satisfy credit toward a minor in military studies.

Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Junior standing or higher.

ARSC301 Leading People and Effective Communication II (3 Credits)

Continuation of ARSC300. Study of leadership and management skills and leadership ethics as well as written and oral communication skills required of Air Force officers. This course will satisfy credit towards a minor in military studies.

Corequisite: AFROTC cadets must also register for ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Junior standing or higher.

ARSC399 Independent Study in Air and Space Power Implementation (1-3 Credits)

Independent study to broaden understanding of the implementation of air and space power. Topics of research are selected by the student and instructor to focus the student on a particular aspect of air and space power implementation during a particular campaign or conflict.

Prerequisite: Permission of UGST-AFROTC-Air Science.

Recommended: ARSC401 and ARSC400.

ARSC400 National Security and Preparation for Active Duty I (3 Credits)

Study of American national security policy and processes to include information and implementation, impact of major national and international actors, and development of major policy issues. This course will satisfy credit towards a minor in military studies.

Prerequisite: Permission of UGST-AFROTC-Air Science; or (ARSC300 or ARSC301).

Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Senior standing.

ARSC401 National Security and Preparation for Active Duty II (3 Credits)

This course examines various subjects including: military law/justice, preparation for active duty, and current issues affecting military professionalism. This course will satisfy credit towards a minor in military studies.

Prerequisite: ARSC300 or ARSC301; or permission of UGST-AFROTC-Air Science.

Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.

Restriction: Senior standing.

ARTH - Art History & Archaeology

ARTH169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTH200 Art and Society in Ancient and Medieval Europe and the Mediterranean (3 Credits)

Examines the material culture and visual expressions of Mediterranean and European societies from early times until ca. 1300 CE, emphasizing the political, social, and religious context of the works studied, the relationships of the works to the societies that created them, and the interrelationship of these societies.

ARTH201 Art and Society in the West from the Renaissance to the Present (3 Credits)

Examines representative European and American works of art from the later Middle Ages to the present, highlighting the dynamic exchange between artistic and cultural traditions both within periods and across time.

ARTH230 Symbolic Images: The Theory and Practice of Iconography in European Art, 1400-1850 (3 Credits)

Iconographic interpretation of visual narratives, signs and symbols has long been a topic of art-historical inquiry. In early modern European art, images were often conceived with the deliberate intent of posing a 'puzzle' or 'problem' for the beholder to solve; yet in most cases we have little or no evidence of how contemporary beholders solved such enigmas. Provides students with the opportunity to take command of these research methods and source materials, addressing a genuine iconographic problem, researching the relevant literature, identifying the essential primary source evidence, making contextually appropriate assumptions, and producing a valid result.

ARTH240 Humanists on the Move (3 Credits)

Introduces students to the practices of a field that is only about twenty years old: the Digital Humanities. We will explore how humanities scholars can reexamine their materials, configuring them as "data" that can be gathered and visualized in order to ask new questions about the past. Using traditional humanities source materials from this different perspective, students will produce entirely new data; using new digital platforms, they will create visualizations of that data; and using humanistic methods, they will interpret those visualizations. Focusing on the original Humanists from the Renaissance period, this course will teach students to engage closely with the most traditional materials of the humanities - primary texts produced in an historical period - and with the newest tools to work with humanities data. Students will complete two major projects by collecting data on the same humanist figures: mapping their travels, and tracing their networks. We will also consider how texts can be treated as data.

ARTH255 Art and Society in the Modern American World (3 Credits)

Explores the origins and evolution of art in the modern American world, from the late colonial era to the present, comparing major artistic movements and their historical contexts. Considers the diversity of art across Latin America and the United States, and the ways in which artworks mediate social, ethnic, political, and national identities.

ARTH260 Art and Activism (3 Credits)

Can art effect social change? How may we use the history of radical and avant-garde art to inform present-day movements and models of artistic and creative activism? This course explores the modern and contemporary history of political art and arts activism on local, national, and global scales.

ARTH261 Monuments, Monumentality, and the Art of Memorial (3 Credits)

Why do societies create monuments? And why do they preserve and destroy, change and remove them? How do monuments embody cultural values, shape historical narratives, and become sites of mourning and memory? This course investigates the political and cultural work of monuments across time and space, from the ancient world to European empires to the contemporary United States. The issues we consider include intercultural exchange and religious contexts, race and representation, and appropriation and iconoclasm.

ARTH262 Public Art (3 Credits)

How does public art function on a university campus, in major cities, and across the United States? This course invites students to empirically study the modern history and civic values of public art spanning sculpture, painting, mixed-media, and installation. We consider the nature of public space, the politics of representation and community, and the civic and memorial functions of art. The course is built around a semester-long project in which students will commission a work of public art for our College Park campus.

ARTH263 Art and Difference (3 Credits)

A comparative and thematic approach to studying the representation of otherness in art and visual culture from the eighteenth century to the present. Students will work to expand the definition of otherness, and consider the roles that ethnicity, nationality, and politics play in representations of otherness across various continents and chronologies.

ARTH265 How (and Why) to Look at Art in the Era of Climate Change (3 Credits)

How can art help us build the mindset necessary for fashioning a sustainable civilization? Paintings, photographs, films, novels, songs, and other creative works as they shape beliefs related to sustainability and justice.

Credit Only Granted for: ARTH265 or ARTH465.

Formerly: ARTH465.

ARTH269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Additional Information: No more than 3 credits total of ARTH 269 or ARTH 289 can be used to satisfy the art history major requirement.

ARTH289 Special Topics in Art History and Archaeology (3 Credits)

Selected topics in the visual arts to introduce students to the history of various modes of visual expression and communication.

Repeatable to: 6 credits if content differs.

Additional Information: No more than 3 credits total of ARTH269 or ARTH289 can be used to satisfy the art history major requirement.

ARTH290 Art and Society in Asia (3 Credits)

A comparative, interrelational study of the different visual arts and material cultures produced by societies in Asia. An examination of the historical traditions and forms in political, social, and religious contexts.

ARTH292 Discovering Japan: How the Arts Shaped a Nation (3 Credits)

Explores the origins and creation of Japan from ancient to contemporary times through East Asian and European exchange. Acquaints students with painting, sculpture, architecture, ceramics, gardens, and other art forms in relation to the various cultural contexts within which they were produced and used.

ARTH300 Egyptian Art and Archaeology (3 Credits)

Sites and monuments of painting, sculpture, architecture, and the minor arts of ancient Egypt from earliest times through the Roman conquest. Emphasis on the pharaonic period.

ARTH301 Aegean Art and Archaeology (3 Credits)

Sites and monuments of painting, sculpture, architecture, and the minor arts of Crete, the Cycladic islands, and the Greek mainland from the earliest times to the downfall of the Mycenaean empire.

ARTH302 Greek Art and Archaeology (3 Credits)

Sites and monuments of painting, sculpture, architecture, and the minor arts from the Geometric through the Hellenistic period with emphasis on mainland Greece in the Archaic and Classical periods.

ARTH303 Roman Art and Archaeology (3 Credits)

Sites and monuments of painting, sculpture, architecture, and the minor arts from the earliest times through the third century A.D. with emphasis on the Italian peninsula from the Etruscan period through that of Imperial Rome.

ARTH305 Archaeological Methods and Practice (3 Credits)

A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.

Prerequisite: ANTH240, ARTH200, CLAS180, or CLAS190.

Cross-listed with: ANTH305, CLAS305, JWST319Y.

Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

ARTH313 Medieval Art: Cultural Exchanges in the Byzantine World (3 Credits)

Focuses on the art and architecture from the eastern Mediterranean, specifically, the Byzantine empire. Our broad focus will be on the formation and evolution of the visual arts in Byzantium as a result of exchanges with various cultural, ethnic, and religious entities and traditions. In this context, we will be looking at the legacy of the Graeco-Roman past, contacts with Islamic world, as well as with people and cultures along the periphery of Byzantium: from the Balkan peninsula, to Sicily and Russia.

Recommended: ARTH200 or ARTH201.

ARTH320 Fourteenth and Fifteenth-Century Northern European Art (3 Credits)

The art of northern Europe with an emphasis on painting in the Netherlands and France.

ARTH321 Northern European Art of the 16th Century: Art in the Age of Renaissance and Reformation (3 Credits)

Painting in France, Germany, England, and the Low Countries during the Renaissance and Reformation.

ARTH322 Van Eyck to Bruegel: The Renaissance in Northern Europe (3 Credits)

The tradition of pictorial art in the Netherlands from its flowering in the courts and cities of the early 15th century to the cataclysmic moment of iconoclasm in 1566. It will feature works by famous masters like Jan van Eyck, Hieronymus Bosch, Albrecht Durer, and Pieter Bruegel, but also objects created by lesser-known and anonymous makers. It will treat artworks – illuminated books, tapestries, paintings, and printed images – as complexly embedded in the great economic, social, and religious upheavals of this period, particularly considering the transition from feudalism to capitalism, the Reformation, and the sense of "discovery" of new worlds.

ARTH323 Fifteenth-Century Italian Renaissance Art (3 Credits)

Painting, sculpture, architecture, and the decorative arts of the fifteenth century in Italy.

ARTH324 Leonardo's World: Art and Experience in Renaissance Italy (3 Credits)

Painting, sculpture, architecture, and the decorative arts of the sixteenth century in Italy.

ARTH330 Seventeenth-Century European Art (3 Credits)

Painting, sculpture and architecture concentrating on Italy, Spain, France, and England.

ARTH335 Seventeenth-Century Art in the Netherlands (3 Credits)

Painting, sculpture and architecture in seventeenth-century Netherlands.

ARTH337 Cities and the Arts (3 Credits)

Cities and the Arts, as taught by different faculty members in the Department of Art History and Archaeology, will investigate the urban environment and visual culture(s) of one or several major centers. The class will consider how a large city's culture absorbs, transforms, and utilizes multiple external sources in developing a particular local brand defined as its "identity." It examines the visualization of ideals of local coherence as well as the arts of fragmentation and competing internal cultures. Cities and the Arts considers how a large city's interface with an expanding external world, even a global one, allows for appropriations and the rise of discriminations; it examines how exclusions form within the city itself, and how social groups visually articulate identities that may run counter to the larger urban mythology.

ARTH346 Nineteenth-Century European Art from 1850 (3 Credits)

Major trends from Realism and Impressionism to Symbolism, exploring the historical context, in which concepts of gender, class, and race are integral to the transformation of Western art.

ARTH350 Twentieth-Century Art to 1945 (3 Credits)

Painting, sculpture, and architecture in Europe and America from the late nineteenth century to the end of World War II.

Prerequisite: ARTH201.

ARTH351 Picturing Contemporary Life: Art Since 1945 (3 Credits)

Visual art since 1945, with an emphasis on North America and Europe.

ARTH357 History of Photography (3 Credits)

An exploration of the historical, social, aesthetic, and technological developments of the photographic medium and its relationship to other modes of visual representation in the creation of the modern world.

Credit Only Granted for: ARTH357 or ARTH457.

ARTH359 Film as Art (3 Credits)

The study of film as a visual art, from theoretical, cultural and aesthetic perspectives. Content varies by semester.

Repeatable to: 6 credits if content differs.

ARTH360 History of American Art to 1876 (3 Credits)

Painting, sculpture, architecture, and decorative arts in North America from the colonial period to 1876.

ARTH361 American Art from Civil War to Civil Rights (3 Credits)

Explores diverse artistic movements and makers in the United States, beginning at the end of the Civil War in 1865 and concluding with the art of Civil Rights era in the 20th century. We will ask how the visual arts construct and challenge formations of race, class, gender, and citizenship in the context of political transformations and social movements over a century of US history. This course emphasizes the practice of close looking as we encounter works art across a range of media—photography, painting, sculpture, film, material culture, performance art and public art.

ARTH362 Presently Black: Contemporary African American Art (3 Credits)

Looks critically at African-American and African diaspora art, focusing particularly on works made in the 20th and 21st centuries. Organized chronologically, this class will provide students with a more thorough understanding of this period of art, as well as the overall connection of visual material to the social, the political, and the aesthetic frames of its production. We will study the ways in which African-American visual production has been shaped by larger discourses about American art, but has also responded to the very real circumstances of racial exclusion in both the mainstream art world and larger society. Students will also have a chance to interact directly with the collection of the David C. Driskell Center throughout the semester.

ARTH369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Additional Information: No more than 6 credits of ARTH 369 can be used to satisfy the art history major requirements.

ARTH370 Latin American Art and Archaeology before 1500 (3 Credits)

Pre-Hispanic painting, sculpture, and architecture, with a focus on the major archaeological monuments of Mexico.

ARTH372 Modern Latin American Art to 1945 (3 Credits)

Painting and sculpture in Latin America, with an emphasis on avant-garde movements in Mexico City, Havana, Buenos Aires, Sao Paulo, and Rio de Janeiro.

ARTH376 Living Art of Africa (3 Credits)

Art styles among the segmentary, centralized, and nomadic people of Africa. The iconography and function of their art and its relationship to their various societies, cults and ceremonies.

ARTH377 Global African Art (3 Credits)

A survey of the African-inflected arts around the world, focusing on such countries as Brazil, Haiti, Cuba and the United States

ARTH378 Special Topics for Honors Students (3 Credits)

Writing of a research paper. With an instructor's permission work may be done in conjunction with a graduate colloquium or seminar.

Prerequisite: Must be admitted to art history honors; and permission of ARHU-Art History & Archaeology department.

Restriction: Must be in Art History program.

Repeatable to: 6 credits.

ARTH383 Art of Japan after 1500 (3 Credits)

Thematically-focused topics in the painting, sculpture, architecture, gardens and decorative arts of early modern, modern and contemporary Japan, from 1500 to present.

ARTH385 Art of China (3 Credits)

A chronological survey of Chinese painting, sculpture, and the applied arts.

ARTH386 Experiential Learning (3-6 Credits)

Supervised internship experience in diverse areas of art historical, archaeological, and museological work.

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Restriction: Junior standing or higher.

ARTH389 Special Topics in Art History and Archaeology (3 Credits)

Repeatable to: 6 credits if content differs.

ARTH391 Transnational Chinese Cinema (3 Credits)

Chinese cinema has made a big impact on contemporary world film culture. This course will introduce students to the films directed by some of the most representative filmmakers working in different geopolitical locations (mainland China, Taiwan, Hong Kong) and the Chinese diaspora. The films of these directors, in a spectrum of genres, themes, and styles, have inspired global scholarship, not only in visual culture and cinema, but also in the study of women's issues, gender and ethnic studies, as well as the fields of adaptation and intermedia studies. Students will explore these films in their socio-historical and artistic contexts, considering the influences and innovations that have shaped them and analyzing their reception by audiences and critics. After reading about the films they view, and participating in class discussions, students will be ready to complete their analytical written assignments, for which they will critically examine the films by applying key concepts such as gender, sexuality, race, gaze, style, representation, power, diaspora, etc.

Cross-listed with: CINE335.

Credit Only Granted for: ARTH391 or CINE335.

ARTH392 Contemporary Chinese Art and Film (3 Credits)

Contemporary Chinese art and film are arguably the most vibrant of all national arts at the turn of the millennium and have become the face - both figuratively and literally - of contemporary China, a complex society with historic overlays of Confucianism, Taoism, Buddhism, Communism, Post-socialism, and state capitalism. Students will consider a wide range of art forms (painting, photography, video, installation, web-based media, and film) in four broad themes (uses of the past; critiques of power; representations of race, gender, and sexuality; socially engaged art) and explore the complex intertwining of the political, historical, and aesthetic aspects in Chinese contemporary art and film, as well as the multiple contexts in which these artworks are created and circulated.

Cross-listed with: CINE337.

Credit Only Granted for: ARTH392, FILM329L or CINE337.

Formerly: FILM329L.

ARTH418 Special Problems in Italian Renaissance Art (3 Credits)

Focus upon aspects of painting, sculpture, and architecture of Renaissance.

Repeatable to: 6 credits if content differs.

ARTH426 Renaissance and Baroque Sculpture in Northern Europe (3 Credits)

Sculpture in France, Germany, England, and the Low Countries from the fourteenth to the seventeenth century.

ARTH472 Ecuador: Andean Spaces-Traversing the Colonial City and the Natural World (3 Credits)

Introduces students to the history and cultures of Ecuador from the colonial period to the beginning of the 19th century. By studying the socio-spatial configuration of the colonial city as exemplified by Quito, students will be immersed in the art, architecture, and other rich cultural legacies of Ecuador. Quito, a World Heritage site, offers students visually stunning churches, monasteries, colonial squares, a famed tradition of Baroque painting and sculptures, and vibrant indigenous and mestizo communities. As a contrast, students will explore also travel narratives that represent the natural Andean world while visiting Quito's surrounding areas. This course will interrogate the European influence on urban design and representations of the landscape of the Americas. Understanding this colonial past enhances the understanding of the modern history of the Andean region and Latin America as a whole. The students will gain a full appreciation of the European and Indigenous living heritage that composes the region today. Taught in English.

Cross-listed with: SPAN435.

Credit Only Granted for: SPAN435, SPAN448E, ARTH472 or ARTH369E.

Formerly: SPAN448E and ARTH369E.

ARTH484 Modern Chinese Film and Visual Culture (3 Credits)

Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.

Cross-listed with: CINE426.

Credit Only Granted for: ARTH484, CINE426 or FILM426.

Formerly: FILM426.

ARTH488 Colloquium in Art History (3 Credits)

Colloquium to investigate a specific topic in depth.

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 9 credits if content differs.

ARTH489 Special Topics in Art History (3 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 9 credits if content differs.

ARTH496 Methods of Art History and Archaeology (3 Credits)

Methods of research and criticism applied to typical art-historical/archaeological problems, familiarizing the student with bibliography and other research tools. Introduction to the historiography of art history and archaeology, surveying the principal theories, encouraging methodological debates within the discipline. Course for majors who intend to go on to graduate school.

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Restriction: Must be in Art History program.

ARTH498 Directed Studies in Art History I (2-3 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Restriction: Junior standing or higher.

Repeatable to: 99 credits if content differs.

ARTH499 Honors Thesis (1-6 Credits)

Prerequisite: Permission of ARHU-Art History & Archaeology department.

Repeatable to: 6 credits if content differs.

ARTT - Art Studio

ARTT100 Two-Dimensional Design Fundamentals (3 Credits)

Principles and elements of two-dimensional design. Introduction to visual communication.

ARTT110 Elements of Drawing I (3 Credits)

Fundamental concepts, media, and processes of drawing. Emphasis on observation and representation in combination with individual expression. Subject matter includes still life, human figure, nature, the built environment, and conceptual projects.

ARTT150 Introduction to Art Theory (3 Credits)

Fundamental concepts of global, philosophic, and critical art theory examined through various historic and contemporary texts, and the analysis of works of art.

ARTT169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTT200 Three-Dimensional Art Fundamentals (3 Credits)

Fundamental concepts of three-dimensional form and space examined through the manipulation and organization of various materials.

Prerequisite: ARTT100 and ARTT110.

ARTT208 Intermediate Special Topics in Art (3 Credits)

Intermediate special topics in Art.

Repeatable to: 6 credits if content differs.

ARTT210 Elements of Drawing II (3 Credits)

Continuation of ARTT110 with additional emphasis on color, figure drawing, and contemporary issues.

Prerequisite: ARTT110.

ARTT255 Introduction to Digital Art and Design Processes (3 Credits)

Introduction to basic software and principles of digital imaging, and how they are applied to art and design. Topics covered: Digital image construction and manipulation, Vector-Based digital techniques layout, typography, etc), time-based digital techniques (video and audio composition and manipulation), and basic interactivity (web-design). Digital media used to explore visual principles established in ARTT100.

Prerequisite: ARTT100 and ARTT110.

Credit Only Granted for: ARTT255 or ARTT354.

Formerly: ARTT354.

ARTT260 Dangerous Art: Censorship or Subsidy (3 Credits)

Combines a broad historical analysis of the relationship between art and authority with an examination of contemporary culture criticism and art practice. Explores the uses and abuses of art and culture in totalitarian and theocratic states as a prelude to a review of the role of official culture in the United States. Examines art and culture in the public arena and many related areas where the arts and policy interact.

ARTT269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTT320 Elements of Painting (3 Credits)

Concepts and fundamental processes of oil and/or acrylic painting.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT330 Elements of Sculpture: Metal Casting (3 Credits)

Sculptural concepts and fundamental processes related to metal casting.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT331 Elements of Sculpture: Steel (3 Credits)

Sculptural concepts and fundamental processes related to steel fabrication; torch cutting, welding, hot forging, and finishing.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT333 Elements of Sculpture: Wood and Mixed Media (3 Credits)

Sculptural concepts and fundamental processes using wood and mixed media.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT341 Elements of Printmaking: Woodcut and Relief (3 Credits)

Concepts and fundamental processes related to woodcuts, linocuts, and other relief printing media.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT343 Elements of Printmaking: Screen Printing (3 Credits)

Concepts and fundamental processes related to silkscreen printing.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT353 Elements of Photography (3 Credits)

Introduction to digital photographic image-making. With an emphasis on technical, aesthetic and conceptual understanding of the photographic medium, camera operation, and photographic composition. Students must have access to a Digital SLR or mirrorless camera capable of interchangeable lenses for this class.

Prerequisite: ARTT200, ARTT210, and ARTT150; or permission of ARHU-Art department.

ARTT355 Intermediate Graphic Design Principles (3 Credits)

Investigation of basic concepts, history, techniques, and materials used by professional graphic designers, focusing on typography. Explores various aspects of design related to typography through examination and production of many types of finished work.

Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must be admitted to the Graphic Design Concentration (Track 3).

Credit Only Granted for: ARTT350 or ARTT355.

Formerly: ARTT350.

ARTT356 Graphic Design Processes (3 Credits)

Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.

Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; and must have been admitted to Graphic Design Concentration (Track 3).

Credit Only Granted for: ARTT351 or ARTT356.

Formerly: ARTT351.

ARTT357 Interactive Design (3 Credits)

In-depth exploration of interactive design and website construction.

Emphasis on concept-driven and community-based projects using variety of interactive software programs.

Prerequisite: ARTT355 and ARTT356.

ARTT360 African American Art Theory: Exploration/Expression of Identity (3 Credits)

Examines how African American artists have used their work to represent, reinvent, and subvert racial identity. By examining changes in modes of expression, formal concerns, and pictorial themes, it will explore the impact of black aesthetics in American art.

Prerequisite: ARTT150.

Credit Only Granted for: ARTT360 or HONR279C.

ARTT361 Design Literacy: Decoding Our Visual Culture (3 Credits)

Holistic presentation of design history and theory from pre-history to present. Covers primarily visual communication design and includes the interrelationship of interior-, furniture-, industrial-, fashion-design, and architecture.

Prerequisite: ARTT355 and ARTT356.

Credit Only Granted for: ARTT361 or ARTT489L.

Formerly: ARTT489L.

ARTT369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTT370 Elements of Digital Media (3 Credits)

Exploration of image creation and manipulation, interactivity, and linkages between digital audio and video. Emphasis on issues in contemporary digital art.

Prerequisite: ARTT150, ARTT200, ARTT210, and ARTT255; or permission of ARHU-Art department.

ARTT386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of ARHU-Art department.

Restriction: Junior standing or higher.

ARTT389 Department of Art Undergraduate Teaching Assistantship (3 Credits)

Individual contractual agreement with faculty/mentor. Individualized assistantship in the teaching of a specified department course offering.

Must have previously received an "A" grade for the class to be assisting.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT399 Department of Art Research Assistantship (1-3 Credits)

Individual contractual agreement with faculty/mentor. Individualized experiential learning developed in relation to art-related research issues.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT409 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ARTT418 Advanced Drawing Studio (3 Credits)

Multi-level drawing studio emphasizing advanced concepts and processes related to drawing; emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT200, ARTT210, and ARTT150; and must have completed one 300-level studio course. Or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT426 Advanced Painting: Painting on Site I (3 Credits)

Designed for Art and design, architecture, urban planning, and public engagement majors seeking to gain more experience in the public art process. Through public artworks, students will explore ethical methods of community engagement, mural design and production. This course will have 1-2 visiting artists give lectures and/or participate in a workshop.

Prerequisite: ARTT320; or permission of the Art Department.

ARTT427 Advanced Painting: Painting on Site II (3 Credits)

Designed for Art and design, architecture, urban planning, and public engagement majors and Creative Placemaking minors seeking to build and strengthen relationships through public place-based artwork. This course will teach ethical methods of public outreach through community engagement, the stages of mural design, and research to aid the mural design phase. This course will also examine the various materials used to create a public work of art and apply them throughout the semester effectively.

Prerequisite: ARTT320.

Restriction: Permission of the Art Department.

ARTT428 Advanced Painting Studio (3 Credits)

Multi-level painting studio emphasizing advanced concepts and processes related to oil and acrylic painting; emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: ARTT320.

Repeatable to: 12 credits.

ARTT438 Advanced Sculpture Studio (3 Credits)

Multi-level sculpture studio; continuation of media-specific sculpture courses with emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: Must have completed one 300-level sculpture course; or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT448 Advanced Printmaking Studio (3 Credits)

Multi-level printmaking studio; continuation of media-specific printmaking courses with emphasis on contemporary art issues and individual directions in chosen media.

Prerequisite: Must have one 300-level printmaking course; or permission of ARHU-Art department.

Repeatable to: 12 credits.

ARTT449 Advanced Photography Studio (3 Credits)

Advanced photographic processes and theory. Emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT353; or permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT454 Advanced Graphic Design Principles: Design in Society (3 Credits)

Focus on social responsibility and community activism. History and theory of propaganda and advocacy-based design. Students explore current design practices, work individually, and collaborate in teams with non-profits or other clients with community-based or socio-cultural agendas. Research and writing-intensive course.

Prerequisite: ARTT355 and ARTT356.

ARTT455 Three Dimensional Graphic Design (3 Credits)

Continued exploration of advanced graphic design practices with primary emphasis on 3-D object and packaging design. Includes research, course reading discussion, oral presentations, and specific project assignments which will require a proficient level of hand-skills (craft) and computer skills.

Prerequisite: ARTT355, ARTT356, and ARTT357.

Recommended: ARTT333.

Credit Only Granted for: ARTT352 or ARTT455.

Formerly: ARTT352.

ARTT456 Motion Design (3 Credits)

Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.

Prerequisite: ARTT355, ARTT356, and ARTT357; or permission of ARHU-Art department.

ARTT457 Advanced Interactive Design (3 Credits)

Advanced concepts and techniques of interactive design and interactive software. Examination of corporate, client-based, and public service-based interactive graphic design. Emphasis on web-based interactive design structures.

Prerequisite: ARTT357.

ARTT458 Graphic Design Portfolio (3 Credits)

Creation of a comprehensive professional portfolio. Curriculum includes portfolio preparation and presentation, contracts, copyright issues, interviewing skills, resume and cover-letter writing, design briefs and proposals, and freelance business issues. Portfolio presentation includes basics of book arts.

Prerequisite: ARTT454.

Repeatable to: 9 credits if content differs.

ARTT459 Advanced Graphic Design Studio (3 Credits)

Student-run design firm working with non-profits and other organizations. Organizations act as clients; the students as a creative firm. Under guidance and supervision of faculty, students learn first-hand about working with clients, working within a budget, working with printers and press runs, and working under real deadlines.

Prerequisite: ARTT454; or permission of ARHU-Art department.

Repeatable to: 9 credits if content differs.

ARTT460 Seminar in Art Theory (3 Credits)

Exploration of relationship between content and processes of art in a contemporary multi-cultural context.

Restriction: Senior standing.

ARTT468 Seminar on the Interrelationship Between Art and Art Theory (3 Credits)

The relationship between a student's work and the theoretical context of contemporary art.

Restriction: Junior standing or higher; or permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT469 Professional Practice (3 Credits)

Business aspects of being an artist, with an emphasis on starting and maintaining a professional career.

Restriction: Senior standing; or permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

Formerly: ARTT462.

ARTT479 Advanced Digital Media Studio (3 Credits)

Variable multi-level studio emphasizing advanced concepts and processes related to time-based, projection, installation, interactive, and audio/visual integrated digital art. Emphasis on contemporary art issues and individual directions.

Prerequisite: ARTT370; or permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT481 Advanced Specialization Seminar (3 Credits)

Seminar combines contemporary art theory, criticism, professional practice and career preparation in relation to students works from all areas of specialization.

Prerequisite: Permission of ARHU-Art department.

ARTT487 Capstone for Citation in Interdisciplinary Multimedia and Technology (1 Credit)

Independent study: a paper or website synthesizing the various citation learning experiences.

Prerequisite: Permission of ARHU-Art department.

ARTT488 Advanced Special Topics in Graphic Design (1-3 Credits)

Variable topics in Graphic Design theory and practice.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 6 credits if content differs.

ARTT489 Advanced Special Topics in Art (1-3 Credits)

Advanced studio art and theory within the context of a special topic.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT498 Directed Studies in Studio Art (1-3 Credits)

Advanced independent work in Studio Art. Meeting with faculty and studio time arranged.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTT499 Directed Studies in Graphic Design (1-3 Credits)

Advanced independent studies in Graphic Design. Meetings with faculty and studio time arranged.

Prerequisite: Permission of ARHU-Art department.

Repeatable to: 12 credits if content differs.

ARTX - Art Studio Education Abroad

ARTX201 Historic Artistic Techniques (1 Credit)

This intensive one-credit course introduces students to the materials and techniques of the past through a practical workshop. The course also introduces the history of the ancient technique, with examples from Rome and the Mediterranean world. Techniques for the conservation and restoration of mosaics will also be covered through relevant case-studies.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX202 The Making of Art: History of Art Material (3 Credits)

Introduces students to the history of artistic media through practical examples, focusing on the history of painting, sculpture, prints, and drawings as media. Practical classes will take place in the studio and on-site in museums and churches in Rome and in the classroom.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX203 Photo Documentary and Discovery (3 Credits)

In this course, you learn to research and tell your individual story through photography. Utilizing workshops and excursions outside the classroom, you develop the skills to dive into different cultures and use your camera as a medium for understanding a community and telling your story through photographs.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX204 Ways of Seeing: Storytelling Through Photography (3 Credits)

This class is an effort to make sense of your study abroad stay: rather than creating photographs as mementos, you will make pictures that are unique to your stay in Stockholm, but still refer back to your life in general. This class combines a studio critique and a survey of the history and theory of photography.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ARTX301 Painting Workshop (3 Credits)

This is an advanced course in painting techniques, which may include other media, such as photography and printmaking as research aids. Students will further develop and explore personal concepts in the painting medium to produce a coherent body of work.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARTX302 Printmaking Workshop (3 Credits)

This is an advanced course in printmaking techniques. Students will further develop and explore personal concepts in the printmaking medium to produce a coherent body of work.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ARUX - Arts and Humanities Education Abroad

ARUX301 Tour Guiding & Multicultural Competence (Community Engagement Practicum) (3 Credits)

Develops student competencies in mediating between cultures and professional tour guiding through working as tour guides in one of the main churches in Florence. Students attend a seminar alongside their tour guiding to promote their understanding of the cultural and religious importance of the main Florentine churches and the fundamental importance of these monuments for Italian national identity and Florentine local identity.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ARUX302 Global Internship Course (3 Credits)

Engages students in an internship and living abroad experience and supports them through academic mentoring and on-line sessions to further develop their personal and professional skills as they earn academic credit. Students participate in a variety of out-of-class guided and self-guided activities and excursions, and move through the course's three main themes of Personal and Professional Development, Intercultural Competence, and Comparative Analysis of their host location in relation to the USA.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ARUX303 Discovering Abilities: Narratives, Disabilities, and Identities (Cultural Engagement Practicum) (3 Credits)

Students work with intellectual disabilities within local social enterprise institutions, such as a restaurant or shop. These associations help individuals with sensorial and/or intellectual disabilities integrate into a real work environment. While these are inclusive institutions aimed at people with disabilities, they are real businesses that have to turn a profit in order to survive. Students volunteering for this practicum will be helping staff in a practical way, but also learn how to relate to people with disabilities and observe how people with disabilities deal with the challenges of a real enterprise.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ASTR - Astronomy

ASTR100 Introduction to Astronomy (3 Credits)

An elementary course in descriptive astronomy, especially appropriate for non-science students. Topics include the Sun, Moon, planets, stars, and nebulae, galaxies, and evolution of the Universe.

Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR101 General Astronomy (4 Credits)

Descriptive astronomy, appropriate for non-science majors. Sun, moon, planets, stars, nebulae, galaxies and evolution. Laboratory exercises include use of photographic material, computer simulations, and standard laboratory equipment.

Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR120 Introductory Astrophysics - Solar System (3 Credits)

For students majoring in astronomy or with a strong interest in science. Topics include development of astronomy, planetary orbits, electromagnetic radiation, telescopes as well as constituents and origin of the solar system (planets, satellites, comets, asteroids, meteoroids, etc.).

Prerequisite: Must have completed or be concurrently enrolled in MATH140.

Restriction: Must not have completed ASTR101 or ASTR100.

Credit Only Granted for: ASTR100, ASTR101, or ASTR120.

ASTR121 Introductory Astrophysics II - Stars and Beyond (4 Credits)

For students majoring in astronomy or with a strong interest in science. Includes instrumentation, stellar properties, stellar evolution, structure of the galaxy, other galaxies, large scale structure, Big Bang Theory, and future of the universe.

Prerequisite: ASTR120 and MATH140; or permission of CMNS-Astronomy department.

Restriction: Must be in Astronomy program; or permission of CMNS-Astronomy department.

ASTR220 Collisions in Space - The Threat of Asteroid Impacts (3 Credits)

Should we defend our planet against potential asteroid impacts? Collisions in Space will evaluate the threat of asteroid impacts with the Earth using knowledge of asteroid characteristics and orbits. The merits of possible defense plans will be discussed, as well as the budgetary and political concerns associated with implementing any such plan. Appropriate for non-science majors.

Restriction: Must not be in the Astronomy major.

ASTR230 The Science and Fiction of Planetary Systems (3 Credits)

Have you ever wondered if humans will ever terraform Mars or Europa so we could live there without a spacesuit? Has it ever crossed your mind how lucky you are that you live on a water-rich planet with an oxygen-rich atmosphere? Have you ever suspected novelists and scriptwriters of creating ridiculous planets that violate scientific laws? Does the fate of our planet's thin biosphere keep you up at night? How common is life in the Universe? These are difficult questions, but armed with the right information, you can answer all of them. The Science and Fiction of Planetary Systems will help you develop a deeper understanding of why planets are the way they are. Along the way, you'll see examples of mistakes made in classic science fiction movies, novels and short stories and get the chance to invent your own plausible planets!

Prerequisite: Must have math eligibility of MATH115 or higher; or MATH113.

ASTR288 Special Projects in Astronomy (1-3 Credits)

Independent study, short research projects, tutorial reading, and assisting with faculty research and teaching under special supervision.

Prerequisite: Permission of CMNS-Astronomy department.

Repeatable to: 6 credits.

ASTR300 Stars and Stellar Systems (3 Credits)

Designed primarily for non-science majors. Study of stars-types, properties, evolution, and distribution in space; supernovae, pulsars, and black holes.

Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR310 Observational Astronomy (4 Credits)

Introduction to current optical observational techniques, with brief coverage of infrared, ultraviolet, and x-ray techniques. Statistics, spherical trigonometry time, catalogs, geometrical and physical optics, telescopes, and optical instruments. Effects of the atmosphere. Practical work at the observatory using a CCD camera. Some nighttime observing sessions.

Prerequisite: ASTR121; and (PHYS171 or PHYS161). Or permission of CMNS-Astronomy department.

Restriction: Must be in Astronomy program.

ASTR315 Astronomy in Practice (4 Credits)

Students learn astronomy research techniques and contribute significantly to the existing body of astronomical knowledge. Students apply methods and tools such as celestial coordinates, telescopes and CCD cameras, and appropriate analysis software to a specific observational goal. Students produce a work detailing their scientific result which will be submitted for publication in a professional venue. Each semester, the course focuses on a specific astronomical topic or type of object, such as asteroids, extrasolar planets, supernovae in other galaxies, quasars, etc.

Restriction: Must not be in Astronomy program.

Additional Information: Appropriate for non-science majors.

ASTR320 Theoretical Astrophysics (3 Credits)

Application of selected physics concepts in an astrophysical context. Topics would include gravity (Keplerian motion, Virial theorem, Roche limit, dynamical friction); gas dynamics (hydrostatic equilibrium, stellar models, spiral density waves), thermodynamics and statistical physics (Boltzmann distribution, Wien displacement, convective instability, degenerate gas); atomic physics (quantum principles, H atom, permitted and forbidden lines); radiation processes (line radiation, opacity).

Prerequisite: ASTR121; and (PHYS270 and PHYS271; or PHYS273).

Restriction: Must be in Astronomy program.

ASTR330 Solar System Astronomy (3 Credits)

Designed primarily for non-science majors. The structure of planets and of their atmospheres, the nature of comets, asteroids, and satellites. Comparison of various theories for the origin of the solar system. Emphasis on a description of recent data and interpretation.

Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or the General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR330 or GEOL212.

ASTR340 Origin of the Universe (3 Credits)

Designed primarily for non-science majors. A study of our progression of knowledge about the universe. Topics include: early cosmological models, geocentric vs. heliocentric theory, curvature of space, Hubble's Law, Big Bang Theory, microwave background radiation, evolution of stars and galaxies, dark matter, active galaxies, quasars and the future of the universe.

Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

ASTR350 Black Holes (3 Credits)

Black holes are the most exotic prediction of Einstein's Theory of General Relativity and, amazingly, the Universe seems to manufacture these bizarre objects in copious numbers. As well as being the ultimate laboratory for studying the nature of space and time, they drive some of the most energetic and extreme phenomena known to astronomers (with quasars and gamma-ray bursts being just a couple of examples). In this introduction to the physics and astrophysics of black holes, we start by examining the basic physics of black holes, which fundamentally means understanding gravity. We then look at the nature of stellar-mass black holes and supermassive black holes. We will discuss the fairly recent realization that black holes may be crucial agents for regulating the growth of galaxies. Finally, we dive into the realm of theoretical physics and probe how black holes may provide a route for uncovering new laws of physics governing the structure of space and time.

Prerequisite: ASTR100 or ASTR101; and completion of the CORE Distributive Studies requirement in Mathematics and Sciences or General Education Fundamental Studies requirement in Mathematics. Or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR398B or ASTR350.

Formerly: ASTR398B.

ASTR380 Life in the Universe - Astrobiology (3 Credits)

Designed primarily for non-science majors. Study of the astronomical perspective on the conditions for the origin and existence of life in the universe.

ASTR386 Experiential Learning (1-3 Credits)

Restriction: Junior standing or higher; and permission of CMNS-Astronomy department.

ASTR398 Special Topics in Astronomy (3 Credits)

This course is designed primarily for students not majoring in astronomy and is suitable for nonscience students. It will concentrate study in some limited field in astronomy which will vary from semester to semester. Possible subjects for study are the solar system, extragalactic astronomy and cosmology, the inconstant universe.

Restriction: Junior standing or higher; or permission of CMNS-Astronomy department.

Repeatable to: 6 credits if content differs.

ASTR399 Honors Seminar (1-16 Credits)

Credit according to work done.

Restriction: Must be admitted to the departmental honors program in astronomy.

ASTR406 Stellar Structure and Evolution (3 Credits)

Study of stellar internal structure, nuclear reactions, and energy transport. Study of stellar evolution of both low-mass and high-mass stars, including the stellar end states of white dwarfs, neutron stars, and black holes.

Prerequisite: ASTR320; or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR498N or ASTR406.

Formerly: ASTR498N.

ASTR410 Radio Astronomy (3 Credits)

Introduction to current observational techniques in radio astronomy. The radio sky, radiophysics, coordinates and catalogs, antenna theory, Fourier transforms, interferometry and arrays, aperture synthesis, and radio detectors.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR415 Computational Astrophysics (3 Credits)

Introduction to the most important computational techniques being used in research in astrophysics. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department. Jointly offered with ASTR615.

Credit Only Granted for: ASTR415 or ASTR615.

ASTR421 Galaxies (3 Credits)

Introduction to structure, kinematics, and dynamics of normal and peculiar galaxies. Quantitative descriptions of normal spiral galaxies (like our Milky Way) and elliptical galaxies will be followed by more exotic considerations such as interacting and merging galaxies, and active galactic nuclei.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR422 Cosmology (3 Credits)

Introduction to modern cosmology. Topics include large scale structure of universe, the intergalactic medium, the nature of dark matter cosmological models and galaxy formation.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR430 The Solar System (3 Credits)

Formation and evolution of the Solar System. Planetary surfaces, interiors, atmospheres, and magnetospheres. Asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the Solar System. Intended for students majoring in the physical sciences.

Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR435 Astrophysics of Exoplanets (3 Credits)

Introduction to exoplanets. Topics include historical development, advantages, and limitations of detection methods, the statistics of exoplanet characteristics, the bulk properties of known exoplanets, and remote sensing for characterization of exoplanets.

Prerequisite: ASTR121; and (PHYS273; or (PHYS270 and PHYS271)). Or permission of CMNS-Astronomy department.

Credit Only Granted for: ASTR498X or ASTR435.

Formerly: ASTR498X.

ASTR450 Orbital Dynamics (3 Credits)

Vectorial mechanics, motion in a central force field, gravitational and non-gravitational forces, the two-body and three-body problems, orbital elements and orbital perturbation theory, resonances in the solar system, chaos. Intended for students majoring in any of the physical sciences.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR480 High Energy Astrophysics (3 Credits)

The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined. Phenomena such as supernovae and high-energy particles are also covered.

Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR498 Special Problems in Astronomy (1-6 Credits)

Research or special study. Credit according to work done.

Restriction: Must be in one of the following programs (Physics; Astronomy); and permission of CMNS-Astronomy department.

BCHM - Biochemistry

BCHM386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and must have a learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BCHM461 Biochemistry I (3 Credits)

First semester of a comprehensive introduction to modern biochemistry. Structure, chemical properties, and function of proteins and enzymes, carbohydrates, lipids, and nucleic acids. Basic enzyme kinetics and catalytic mechanisms.

Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.

Credit Only Granted for: BCHM461 or BCHM463.

BCHM462 Biochemistry II (3 Credits)

A continuation of BCHM 461. Metabolic pathways and metabolic regulation, energy transduction in biological systems, enzyme catalytic mechanisms.

Prerequisite: Minimum grade of C- in BCHM461.

Credit Only Granted for: BCHM462 or BCHM463.

BCHM463 Biochemistry of Physiology (3 Credits)

A one-semester introduction to general biochemistry. A study of protein structure, enzyme catalysis, metabolism, and metabolic regulation with respect to their relationship to physiology.

Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.

Credit Only Granted for: BCHM461, BCHM462 or BCHM463.

BCHM464 Biochemistry Laboratory (3 Credits)

Biochemical and genetic methods for studying protein function. Site-directed mutagenesis and molecular cloning, protein purification, enzyme activity assays, computer modeling of protein structure.

Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for all College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: BCHM465.

Restriction: BCHM, CHEM, and Nutritional Sciences majors have first priority, followed by other life science majors.

BCHM465 Biochemistry III (3 Credits)

CORE Capstone (CS) Course. An advanced course in biochemistry. Biochemical approach to cellular information processing. DNA and RNA structure. DNA replication, transcription, and repair. Translation of mRNA to make proteins.

Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Recommended: BCHM462.

BCHM477 Biomolecular Measurement and Data Analysis (3 Credits)

Covers a range of classic and modern biochemical assays and techniques as well as introducing data science approaches to "omics" data. Upon successful completion of this course, students should have the necessary preparation and experience to collaborate productively with research scientists in industrial, clinical or academic contexts.

Prerequisite: CHEM271 or CHEM276; and (CHEM277 or CHEM272).

Restriction: Must be in the Chemistry or Biochemistry major.

BCHM485 Physical Biochemistry (3 Credits)

Physical Chemistry with applications to biological systems. Principal topics: quantum chemistry, spectroscopy, structural methods for biological macromolecules, statistical thermodynamics, transport processes in liquid phase, chemical and biochemical kinetics, modeling and simulation, polymer dynamics.

Prerequisite: Minimum grade of C- in CHEM481.

Restriction: Must be in Biochemistry program; or permission of instructor.

Credit Only Granted for: CHEM482 or BCHM485.

BIOE - Bioengineering

BIOE120 Biology for Engineers (3 Credits)

Introduction to the functions and interactions of biological systems from a quantitative perspective. Introduction to the modern experimental techniques and methods of data analysis. Roles for bioengineers in biology, and the role of biology in bioengineering will be elucidated.

Prerequisite: Must have completed or be concurrently enrolled in MATH140.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE121 Biology for Engineers Laboratory (1 Credit)

Bioengineering encompasses numerous sub-disciplines that apply engineering principles to analyze biological systems and that utilize engineering design strategies to solve biological and biomedical problems. This course is aimed at providing students with the opportunity to learn how biology and engineering can synergistically contribute to our understanding of such problems, and to gain hands-on experience in basic techniques relevant to Bioengineering.

Prerequisite: Must have completed or be concurrently enrolled in BIOE120.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE221 Academic and Career Planning (1 Credit)

Provides practical tools to help Bioengineering majors think critically about their goals and career paths. Guides Bioengineering students through accessing useful resources both on- and off-campus.

Prerequisite: BIOE120 and BIOE121.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE232 Bioengineering Thermodynamics (3 Credits)

A quantitative introduction to thermodynamic analysis of bioengineering systems. Bioengineering encompasses a wide range of applications from nanoscale interactions (e.g. reactions between molecules), to cellular interactions (e.g. membrane electrical currents), to overall balances on organisms, all the way to large scale manufacturing. Each of these applications (and many others not mentioned) involve energy interactions which is the domain of thermodynamics. The basic laws of thermodynamics will be introduced and explained through a series of examples related to bioengineering systems.

Prerequisite: PHYS261 and PHYS260.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE232, ENES232, ENME232, or ENME320.

BIOE241 Biocomputational Methods (3 Credits)

Application of computer technology to biological and natural resource systems considering engineering aspects. Designed to help students in the use of computer technology for problem solving. The course will cover 4-5 software packages important for later use by the student.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE246 Differential Equations for Bioengineering (3 Credits)

Students will learn to solve differential equations, including linear first order differential equations, higher order differential equations, and partial differential equations. In addition, students will learn to apply differential equations to concepts in bioengineering.

Prerequisite: Minimum grade of C- in MATH243 .

Restriction: Must be in Engineering: Bioengineering program or permission of the Fischell Department of Bioengineering.

BIOE331 Biofluids (3 Credits)

Principles and applications of fluid mechanics with a focus on bioengineering topics. Content includes conservation of mass, momentum, and energy, as well as the application of these fundamental relations to hydrostatics, control volume analysis, internal and external flow, and boundary layers. Applications to biological and bioengineering problems such as tissue engineering, bioprocessing, imaging, and drug delivery.

Prerequisite: MATH246, BIOE120, BIOE121, BIOE241, and BIOE371; and must have completed or be concurrently enrolled in BIOE232.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE331, ENCE305, ENFP300 or ENME331.

BIOE332 Transport Process Design (3 Credits)

Fluid flow, heat transfer, and mass transfer with applications in medicine, environment, biotechnology, food, agriculture, and other biosystems. Design of solutions to current problems in biological engineering is emphasized.

Prerequisite: BIOE331.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE340 Modeling Physiological Systems and Lab (4 Credits)

Topics covered will include cell and general physiology, membrane physiology, blood cells and clotting, circulation, metabolism, respiration, and the nervous system. A lab component will also be included.

Prerequisite: Minimum grade of C- in BSCI330 and BIOE331.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE340 or (BSCI440 and BSCI441).

BIOE371 Linear Systems and Ordinary Differential Equations for Bioengineering Applications (3 Credits)

This class utilizes fundamentals in linear systems, including eigenvalues and eigenvectors, as well as linear differential equations, to study various problems in bioengineering and biological systems, with a particular emphasis on feedback, stability, controllability, and control design.

Prerequisite: BIOE241; and must have completed or be concurrently enrolled in MATH246.

Restriction: Permission on ENGR-Fischell Department of Bioengineering department.

BIOE372 Biostatistics for Experimental Design and Data Analysis (3 Credits)

This course will instruct students in the fundamentals of probability and statistics through examples in biological phenomenon, the design of bioengineering experiments, and clinical data analysis. Fundamentals covered in the course include probability distributions, hypothesis testing, power analysis, regression analysis, and correlation analysis.

Prerequisite: BIOE120, BIOE121, and BIOE241.

Recommended: MATH246.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE372 or STAT464.

BIOE386 Bioengineering Design and Teamwork (3 Credits)

Focuses on the engineering design process, including needs finding, problem definition, inclusive design, and prototyping. Students will join an existing senior capstone design team and contribute to the project. This elective is designed to be taken directly prior to BIOE485, and will collaborate with the students and projects in that course. Students who complete BIOE386 may have the option to continue their capstone project in BIOE485.

Prerequisite: Minimum grade of C- in BIOE120, BIOE121, BIOE241, and MATH246.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department and must have earned a minimum of 60 credits.

BIOE389 Special Projects in Bioengineering (1-3 Credits)

Exploring a variety of projects in Bioengineering.

Restriction: Permission of instructor; and permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 6 credits.

BIOE399 Independent Study in Bioengineering (1-3 Credits)

Independent study.

Prerequisite: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 12 credits if content differs.

BIOE404 Biomechanics (3 Credits)

Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.

Prerequisite: MATH246, BIOE120, ENES102, BIOE121, and BIOE241; and must have completed or be concurrently enrolled in BIOE371.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE411 Tissue Engineering (3 Credits)

A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.

Prerequisite: Must have completed at least one biology course; and (BIOE120, BIOE121, BIOE241, MATH246, and MATH241). Or permission of ENGR-Fischell Department of Bioengineering department.

Recommended: BSCI330 and BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE411 or CHBE487.

BIOE413 Stem Cell Engineering (3 Credits)

Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.

Prerequisite: BIOE241, BIOE120, BIOE121, and MATH246; and must have completed or be concurrently enrolled in BIOE340.

Jointly offered with: BIOE613.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE413, BIOE689J, or BIOE613.

BIOE414 Macroscale Biomechanics (3 Credits)

An overview of current problems in movement biomechanics. After taking this course, students will be able to 1) Describe the engineering tools needed to study human movement 2) Recognize a variety of clinical research and practice, and 3) Use the framework provided by the course to pursue their own self-teaching and research on these topics. Topics covered include muscle mechanics, joint mechanics, EMG and EEG signal applications, ultrasonography and elastography, anthropometry, human movement 3-D kinematics, inverse dynamics, forward dynamics, work, power and energy. Biomechanics tools will be used to investigate clinical problems. Students will also do research projects on related topics.

Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and ENES102.

Jointly offered with: BIOE614.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE414, BIOE614 or BIOE489Z.

Formerly: BIOE489Z.

BIOE415 Engineering Design for Global Health (3 Credits)

Many medical technologies are not available in low and middle-income countries due to the cost, infrastructure, and medical expertise required to implement and sustain them. There is tremendous potential to increase access to health care through developing more affordable biomedical technologies, but effective design requires deep understanding of the problem. The goal of this course is to introduce the human-centered design framework and how it can be applied to design new biomedical technologies to solve challenges in global health.

Prerequisite: BIOE120, BIOE121, and MATH246.

Jointly offered with: BIOE615.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE415, BIOE615, BIOE489Y, or BIOE689I.

Formerly: BIOE489Y.

BIOE416 Cardiovascular Engineering (3 Credits)

An overview of engineering applications in the cardiovascular system. Covers cardiovascular anatomy, physiology and pathophysiology in the context of cell and tissue mechanics, fluid mechanics, thermodynamics, biotransport, neurovascular coupling, and imaging. Includes design of cardiovascular devices, sensors, biomaterials, and tissue engineered constructs.

Prerequisite: BIOE331 and BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE416 or BIOE489V.

Formerly: BIOE489V.

BIOE420 Bioimaging (3 Credits)

Covers the fundamental principles of major biomedical imaging techniques, including X-ray Imaging, Computer Tomography (CT), Magnetic Resonance Imaging (MRI), Ultrasound Imaging, Nuclear Medicine Imaging (SPECT/PET/CT), Optical Coherent Tomography (OCT), and Optical and Hyperspectral Imaging. The course will explore the underlying concepts of imaging system architectures, image reconstruction algorithms, and software implementation. Additionally, it will discuss the clinical interpretation of biomedical images and newer ways to use images for bio-related applications for diagnosis and analysis.

Prerequisite: MATH246, BIOE120, BIOE121, and BIOE241.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE431 Fundamentals of Biosensor Techniques, Instrumentation, and Applications (3 Credits)

A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.

Prerequisite: CHEM135, PHYS260, PHYS261, BSCI330, BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE433 Optical Microscopy (3 Credits)

Includes a large variety of techniques central in many fields of biological and engineering research as well as clinical medicine. This course will provide a comprehensive overview of the fundamentals of optical microscopy. At a fundamental level, the course will cover the interaction of light with tissue, cells and biomaterials, and the mathematical foundations that describe optical systems.

Prerequisite: BIOE120, BIOE121, BIOE241, BIOE371, and MATH246.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489I or BIOE433.

Formerly: BIOE489I.

BIOE437 Computer-Aided Design in Bioengineering (3 Credits)

Introduction to Computer-Aided Design (CAD). Lecture topics will summarize design methodology, review best-practices in hardware development, and discuss engineering applications. The course will culminate in a student-selected project leveraging CAD.

Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE437, BIOE689V, ENME414, ENME272, or ENAE488D.

Formerly: BIOE689V.

BIOE442 Python: Introduction to Programming and Data Analysis (3 Credits)

Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.

Prerequisite: BIOE241, BIOE120, BIOE121, and MATH241; or permission of ENGR-Fischell Department of Bioengineering department.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489A or BIOE442.

Formerly: BIOE489A.

BIOE447 Clinical Experiences in Bioengineering (3 Credits)

An immersion experience in the clinical settings in which biomedical engineering strategies, technologies, and practices are applied. An emphasis will be placed on both clinical problems and engineering solutions.

Prerequisite: BIOE221.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489O or BIOE447.

Formerly: BIOE489O.

BIOE453 Biomaterials (3 Credits)

Examination of the structure and function of natural biomaterials, and cell-extracellular matrix interactions. Study physical properties of synthetic biomaterials for biomedical applications. Understanding molecular level interactions between biomolecules and biomaterials to design novel biomaterials with desirable characteristics. Application of biomaterials as implants, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds will be covered.

Prerequisite: CHEM231, MATH246, CHEM232, BIOE120, BIOE121, and BIOE241.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

BIOE457 Biomedical Electronics & Instrumentation (4 Credits)

Students learn fundamental concepts of electronics, assembly of electronic components into functional circuits, and integration of functional electronic devices and circuits into a system. In the lab component, students will learn to assemble and evaluate circuits and systems.

Prerequisite: BIOE120, BIOE121, BIOE241, PHYS261, MATH246, and PHYS260.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE461 Synthetic Biology and Biological Engineering (3 Credits)

Students are introduced to the scientific foundation and concepts of synthetic biology and biological engineering. Current examples that apply synthetic biology to fundamental and practical challenges will be emphasized. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.

Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.

Recommended: Completion of BSCI222 and/or BSCI330 recommended.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE462 Therapeutic Development and Delivery (3 Credits)

The ultimate purpose of the pharmaceutical and biotechnology industries is the development and delivery of therapeutics. This course covers fundamentals of engineering and the pharmaceutical sciences related to therapeutics, including basic pharmaceuticals/drug delivery, pharmacokinetics, biomolecular kinetics, and regulatory issues. Specific focus is placed on biotherapeutics, including antibodies and protein engineering, RNA and DNA therapeutics (gene therapy and RNAi), extracellular vesicle biotechnology (exosomes), and cell-based therapies, including stem cells. The use of delivery technologies to enable therapeutics (e.g. nanomedicine) will also be discussed.

Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE489P or BIOE462.

Formerly: BIOE489P.

BIOE464 Introduction to Computational Molecular Bioengineering (3 Credits)

Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.

Prerequisite: Minimum grade of C- in BIOE232, BIOE372, and BIOE442; and minimum grade of C- in BIOE371 or BIOE246; or permission of Fischell Department of Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE468 Selected Topics in Bioengineering (3 Credits)

Selected topics in Bioengineering will be covered and taught by a variety of department faculty.

Prerequisite: BIOE120 and BIOE121.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 9 credits if content differs.

BIOE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Prerequisite: BIOE120.

Jointly offered with: BIOE674.

Restriction: Must have earned a minimum of 60 credits, Permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE474, BIOE674, CHBE474, BIOE489T, or BIOE689E.

Formerly: BIOE489T.

BIOE485 Capstone Design I: Entrepreneurship, Regulatory Issues, and Ethics (3 Credits)

This is the first part of a two-semester senior capstone design course which covers principles involved in engineering design, design approaches, economics of design, ethics in engineering, and patent regulations. It also helps students learn team work and write design project proposals under the mentorship of a faculty advisor.

Prerequisite: 21 credits in BIOE courses; and must have completed or be concurrently enrolled in BIOE457.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and senior standing; and must be in Engineering: Bioengineering program.

BIOE486 Capstone Design II (3 Credits)

This is the second part of the senior capstone design course. This part is independent instruction where faculty mentoring each project team works with students to order supplies, fabricate their proposed design under BIOE485, test the design, write the report and present it to their fellow seniors and board of faculty mentors. Students are taught to convert the blue print of a design to actual device and test it.

Prerequisite: Must have completed BIOE485 in the immediately preceding semester.

Restriction: Senior standing; and must be in Engineering: Bioengineering program; and permission of ENGR-Fischell Department of Bioengineering department.

Credit Only Granted for: BIOE486 or ENBE486.

Formerly: ENBE486.

BIOE488 Research Methods in Bioengineering (1-3 Credits)

Exploring a variety of research methods in the field of Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 9 credits if content differs.

BIOE489 Special Topics in Bioengineering (1-3 Credits)

Exploring a variety of topics with Bioengineering.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

Repeatable to: 6 credits.

BIOM - Biometrics

BIOM301 Introduction to Biometrics (3 Credits)

Descriptive statistics, introduction to probability, sampling, confidence interval estimation, hypothesis testing, simple regression and correlation. Emphasis on simple applications of statistical techniques and interpretation of statistical results.

Prerequisite: MATH113 or MATH115.

BIOM386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

BIOM405 Computer Applications in Biometrics (1 Credit)

An introduction to computer applications for data analysis. This is equivalent to the computer lab of 601 and is required for students that have taken BIOM301 and BIOM402 and wish to go directly into BIOM602.

BMGT - Business and Management

BMGT110 Introduction to the Business Value Chain (3 Credits)

Students are provided with an introduction to the business value chain with an emphasis on inter-organizational and intra-organizational coordination of core business processes. Emphasis is on cross-functional integration and the efficient and effective management of core processes with an emphasis on marketing, operations and supply chain management.

BMGT160 The Intentional Self (3 Credits)

As you navigate adulthood, you will constantly be making decisions that impact your personal and professional well being and success. Making these life choices with intention and a perspective of your whole self will increase your life satisfaction. In this course, you will examine who have been, who you are, and who you want to become. We will be exploring the six pillars of the whole self including purpose/character, relationships, wellness, community, prosperity, and nature and creating a vision for your future self.

Credit Only Granted for: BMGT160, BMGT198A, or BMGT198B.

BMGT161 Creative Problem Solving (3 Credits)

Examines the concept of creative problem solving as it applies in today's and tomorrow's complex business environment. Students will develop an understanding of the creative problem solving process with its distinctive cognitive steps of Divergent Thinking, Emergent Thinking and Convergent Thinking. Topics include creativity techniques for groups and individuals, creativity as a foundation to recognize business opportunities and develop innovative products and services, selecting ideas and making them stick, mental and organizational obstacles to creativity as well as an overview of electronic tools to increase creative capability.

BMGT162 The Future of You, Business and Society (3 Credits)

Designed to help you (students) explore the future of you, business, and society. Even as the nature of business (the how) evolves with technology, the purpose of business –to create individual and social prosperity (the why) –remains the same. This course will integrate the "why" and the "how" to prepare students for the future of work. Students will learn the foundational concepts of how to lead themselves with purpose and develop win-win relationships. Students will also learn how organizations solve unmet needs in society, and how they develop and leverage the power of technology and new business practices to create value in a sound and ethical way.

BMGT198 Special Topics in Business and Management (1-3 Credits)

Introductory special topics in business and management.

Repeatable to: 6 credits if content differs.

BMGT207 Ethics of Artificial Intelligence (3 Credits)

What ethical considerations should govern the creation, distribution, and use of artificial intelligence innovations in industry, polity, and society in the future? New and emerging innovations in artificial intelligence (AI) are disrupting sectors as diverse as healthcare, medicine, finance, operations, supply chain, manufacturing, media and journalism, and the creative industries. In the near future, the dependence of humans on AI for a myriad of social activities including companionship and care is also expected to accelerate. This course deals with the question of how we should ensure AI will create ethical economic and social systems that reflect the kind of world we want to live in 20 to 30 years from now. The values and ethics of society will influence and govern how AI can either contribute to humanity or lead to a dystrophic future.

BMGT210 Foundations of Accounting for Non Business Majors (3 Credits)

Provides an understanding of the common statements that report a company's profitability and financial health, and are useful to all economic agents who are engaged with the firm. Students will also recognize and understand managerial accounting as a system for accumulating and modeling information to support decision-making.

Restriction: Must not have completed BMGT221; and must not be in a major in the R.H. Smith School of Business.

Credit Only Granted for: (BMGT220 and BMGT221) or BMGT210.

Additional Information: Does not apply to a Smith School degree.

Students pursuing a Smith School minor who have completed both BMGT220 and BMGT221 may substitute these courses for BMGT210. Credit will not be given for both BMGT210 and the combination of BMGT220 and BMGT221.

BMGT220 Principles of Accounting I (3 Credits)

Basic theory and techniques of contemporary financial accounting. Includes the accounting cycle and the preparation of financial statements for single owner and partnership forms of business organizations operating as service companies or merchandisers.

BMGT221 Principles of Accounting II (3 Credits)

Basic theory and techniques of accounting for managerial decision making. Involves the introduction of the corporation and manufacturing operations. Includes cost-volume-profit analysis and capital budgeting. Introduces the topics of income taxation and international accounting.

Prerequisite: BMGT220.

BMGT230 Business Statistics (3 Credits)

Introductory course in probabilistic and statistical concepts including descriptive statistics, set-theoretic development of probability, the properties of discrete and continuous random variables, sampling theory, estimation, hypothesis testing, regression and decision theory and the application of these concepts to problem solving in business and management.

Prerequisite: MATH113 or MATH115; or must have math eligibility of MATH120 or higher.

Restriction: Must not have completed ENCE302, ENME392, STAT400, BMGT231, or ENEE324.

BMGT262 The Enterprising Leader (3 Credits)

Designed to help students develop their leadership skills in order to identify their personal and professional purpose with an entrepreneurial mindset, and create strategies that will help them develop their abilities and achieve their aspirations by collaborating within teams and organizations. Students will apply insights from recent scholarship in entrepreneurship, leadership and strategic management to themselves in order to identify solutions to problems they find meaningful to solve in their own world. This self-discovery course will introduce students to the "CEO of ME, Inc." framework and tools such as the strategic initiatives matrix and business model canvas that they can use to help guide the choices that lie ahead, and develop collaborative, win-win relationships. In doing so, students will learn how to unlock the value of business in society and develop entrepreneurial and leadership skills that enable personal happiness and upward mobility.

BMGT263 Challenge your Thinking, Challenge the Conversation (3 Credits)

Provides conceptual frameworks and experiential opportunities that will enable students to engage in rational and respectful discourse. The course uses the latest pedagogical techniques and relevant literature to develop skills such as thinking like a scientist, negotiating conflict, and giving and receiving constructive feedback. Specific conversations will draw from current events and issues in business and in society.

BMGT264 SBLF Capstone Professional Practicum (3 Credits)

Provides students in the Smith Business Leadership Fellows Program (SBLF) with a capstone opportunity to learn in teams in a real-world setting. Companies engage teams of SBLF students with meaningful organizational challenges and dedicate resources to help students address these problems. Student teams enhance their skills in critical thinking, collaboration, negotiation, quality management and communication. These teams then apply these skills to offer value to a client. In the process, students will improve their teamwork skills.

Prerequisite: BMGT162, BMGT262 and BMGT263.

BMGT271 Globalization & Sustainability; How Does the Transformation of Global Value Chains Drive Equity and Sustainability? (3 Credits)

We live in an increasingly interconnected world. This course explores the fundamentals of international trade that form the basis for the complex modern network of global value chains and how these relationships can be adapted to address their vulnerability while also transformed to build a more equitable and sustainable future.

Cross-listed with: HNUH239I.

Credit Only Granted for: BMGT271 or HNUH239I.

BMGT289A Social Enterprise: Changing the World through Innovation and Transformative Action (3 Credits)

In this course, students will hear from real-life social entrepreneurs, explore current day social issues of sustainability, climate change, leadership, disruptive innovations, and create or blueprint business plans to generate positive social change. This class will focus on innovative thinking skills, personal narratives, and social interaction strategies and plans.

BMGT289B How Do Innovators Think? (3 Credits)

In this course, students will learn about: a) the innovation process and the role of the individual in generating innovations and b) the attributes, habits, and skills of individuals who have successfully started innovative new businesses or significantly added value to an existing company.

BMGT289D Frauds, Scams, and Thefts: What, How and Why? (3 Credits)

"Why" does fraud happen? "How" does society address fraud? And "What" can you do to avoid and prevent fraud in your personal and future career life? This course is designed to give future professionals and managers of all disciplines a general background of fraud. Topics include the psychology of fraud, the mechanics of fraud, the legal landscape, securities fraud, cybercrime, and what all of us should know to protect ourselves from becoming victims of fraud. Additionally, students experience 21st century lessons in fraud examination that have practical application to our daily lives: avoiding cognitive biases, interviewing techniques, basic business controls, and opening our minds to see what others might miss...the red flags of fraud.

BMGT289E Entrepreneurial Thinking for Non-Business Majors: How Not to Miss Great Opportunities Your Life Throws at You (3 Credits)

In this course, students learn how to analyze the world around them and then notice and define new trends, emerging problems, impending gaps, and how to turn these into exciting opportunities by providing creative solutions. Students will have a chance to not only sharpen their critical thinking skills, but also learn how to take initiative, develop a working solution, identify and resolve conflicts, and be confident and persistent, yet flexible enough to respond to changes. Student teams identify a compelling problem in present day life and then propose a creative solution taking into account possible difficulties in implementation. In addition, students will also be given problems on a much smaller scale and asked to create and present a workable solution. Students will be exposed to how a visionary's mind works and the creative solution process. In addition, students will also learn how entrepreneurial thinking can improve their day-to-day life.

BMGT289I Why Good Managers Make Bad Decisions (3 Credits)

This course provides an overview of the concepts, approaches, and vocabulary of evidence-based management (EBM) and provides an understanding of how experts in many disciplines can employ evidenced based decision making. EBM is an emerging movement in business to explicitly use the current best information in management decision making with special emphasis on relevant scientific findings and unbiased organizational facts. The course stresses how individuals practicing EBM learn how to rethink their approaches to data and knowledge in order to make more effective decisions.

BMGT289L The Proper Role of Government in a Free Enterprise System (3 Credits)

This course examines the proper role of the government in overseeing, promoting, or regulating various business activities in a free market system. Areas that warrant government involvement are identified and appropriate government responses are evaluated. The course identifies causes of market failure and discusses when, how and to what extent the government should act to remedy those failures. Finally, varieties of capitalism and the role of the government in other free enterprise countries are evaluated.

BMGT289M European Debt Crisis: More Integration or Withering of a Dream? (3 Credits)

This course explores the developments and events that led to the formation of the Economic and Monetary Union (EMU) and analyzes the causes for the eruption of the debt crisis. In addition, the course evaluates the policy steps taken to stabilize the crisis (monetary, banking, fiscal and institutional measures), and it discusses policy options to overcome in a lasting manner the design flaws and strengthen the governance of the EMU, so as to improve its overall economic growth performance.

BMGT298 Special Topics in Business and Management (1-3 Credits)

Introductory special topics in business and management.

Repeatable to: 6 credits if content differs.

BMGT299 Student Initiated Special Topics (1 Credit)

Student initiated special topics in business and management.

Repeatable to: 3 credits if content differs.

BMGT301 Introduction to Information Systems (3 Credits)

Comprehensive overview of information systems (IS), which explores the strategic and tactical nature of IS. The basic concepts in analyzing and designing information systems for business applications will be presented. Aspects of data management such as databases, data warehousing, data analysis, and data mining will be analyzed, and the basics of web page and web site design will be outlined. Students will also be introduced to modern information systems infrastructure such as telecommunications, networks, and information systems security. Knowledge of Excel or a similar spreadsheet tool.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major. All BMGT majors, including students who are a double major in CMSC, must complete BMGT301 for their BMGT degree.

BMGT302 Essential Programming Skills for Business Analytics (3 Credits)

The course introduces structured and object-oriented programming and its applications in business functions and analytics. Students will apply problem-solving skills to create software solutions using programming logic and data structures. The course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.

Prerequisite: BMGT301; or permission of BMGT-Robert H. Smith School of Business.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must not be in the Computer Science major.

BMGT310 Intermediate Accounting I (3 Credits)

Comprehensive analysis of financial accounting topics related to financial statement preparation and external reporting.

Prerequisite: BMGT221.

BMGT311 Intermediate Accounting II (3 Credits)

Continuation of BMGT310.

Prerequisite: BMGT310.

BMGT313 Financial Statement Analysis (3 Credits)

Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. Involves understanding and using the information that financial statements are communicating to users.

Prerequisite: BMGT221.

BMGT321 Managerial Accounting (3 Credits)

A study of the basic concepts of product costing and cost analysis for management planning and control. Emphasis is placed on the role of the accountant in organizational management, analysis of cost behavior, standard cost budgeting, responsibility accounting and relevant costs for decision-making.

Prerequisite: BMGT221.

BMGT323 Taxation of Individuals (3 Credits)

Federal taxation of individuals focusing on income, exclusions, deductions, depreciation, credits and capital transactions. Property coverage includes the tax consequences of sales and dispositions of investment and business assets. Both tax planning and compliance issues are covered.

Prerequisite: BMGT221.

BMGT326 Accounting Systems (3 Credits)

A study of accounting systems and computer and communications technology.

Prerequisite: BMGT221; and (BMGT201 or BMGT301).

BMGT332 Quantitative Models for Management Decisions (3 Credits)

The aim of this course is to introduce management science techniques for informed decision-making that can be applied in spreadsheet models to assist in the decision-analysis process. Models include Linear Programming, Transportation and Assignment problems, network flow models, Integer and non-linear programming, Simulation and Decision Trees.

Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.

BMGT340 Business Finance (3 Credits)

Topics include: the principles and practices involved in the organization, financing and rehabilitation of business enterprises; the various types of securities and their use in raising funds, apportioning income, risk and control; intercorporate relations; and new developments. Emphasis on solution of problems of financial policy faced by management.

Prerequisite: BMGT220; and (BMGT231 or BMGT230).

BMGT341 Financial Markets (3 Credits)

Shows the interconnectedness of the markets. The role of the Central bank and monetary policy is included in this context. Students develop an understanding of: (i) the determination of interest rates; (ii) financial instruments, markets and institutions; (iii) the impact of monetary policy on institutions; and (iv) how financial innovations create markets.

Prerequisite: Must have completed or be concurrently enrolled in BMGT340.

BMGT342 Wall Street Finance (3 Credits)

Using concepts and tools of finance, students will examine a wide range of business problems and explore possible solutions. The course is designed to improve a student's problem solving capabilities, business writing and communication skills, teamwork, and planning skills. Students will also gain experience in analyzing issues frequently faced by financial decision-makers.

Prerequisite: BMGT340.

BMGT343 Investments (3 Credits)

An introduction to financial investments. Topics include: securities and securities markets; investment risks, returns and constraints; portfolio policies; and institutional investment policies.

Prerequisite: BMGT340.

Credit Only Granted for: BMGT343 or ECON435.

Additional Information: This course cannot be used to fulfill any requirements for majors in Economics.

BMGT345 Foundations of Financial Management for Non Business Majors (3 Credits)

Provides students an overview of financial management. Students will understand how a business allocates financial resources in an uncertain environment to maximize shareholder value. In addition students will learn the following: how to apply accounting principles to corporate finance; how to value assets, projects, companies and investment securities; understand the relationship between risk and return and how it impacts investment and corporate decisions; how to calculate a company's cost of capital, and develop an intuitive comprehension of financial concepts and analysis.

Prerequisite: BMGT210 or BMGT220.

Restriction: Must not have completed BMGT340; and must not be a major in the R.H. Smith School of Business.

Credit Only Granted for: BMGT345 or BMGT340.

Additional Information: Course does not apply to a Smith School degree. BMGT340 may substitute for BMGT345.

BMGT347 Quantitative Financial Analysis (3 Credits)

Introduces students to data science for financial applications using an industry-standard programming language. Students will use tools ranging from regression models to machine learning to investigate questions across a variety of areas within finance including asset management, corporate finance and FinTech. The course will illustrate how big data and data analytics can improve financial decision-making by focusing on problems facing finance professionals.

Prerequisite: BMGT340; must have completed or be concurrently enrolled in BMGT343.

Credit Only Granted for: BMGT347 or BMGT448G.

Formerly: BMGT448G.

BMGT349 Private Equity and Venture Capital (3 Credits)

The New Markets Private Equity/Venture Capital Clinic allows students to gain professional experience commensurate with that of an Associate in a Venture Capital Firm. Students are trained to buy, own, actively manage and sell high growth technology companies in private transactions. The class format includes: lectures; presentations from guest speakers, including the regions leading CEOs, private equity and service providers; and a series of facilitated exercises that simulate buying, owning and selling businesses. The course exposes students to real life activities covering the entire deal process from market research, diligence, selection, negotiation valuing, and structuring an investment, as well as management, growth and exit of portfolio companies.

Prerequisite: Must have completed or be concurrently enrolled in BMGT313 and BMGT340.

Repeatable to: 6 credits.

Formerly: BMGT448B.

BMGT350 Marketing Principles and Organization (3 Credits)

An introduction to the concepts and principles of marketing including the marketing of service and nonprofit organizations. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.

Recommended: ECON200.

BMGT351 Marketing Research Methods (3 Credits)

Focuses on aiding marketing decision-making through exploratory, descriptive and causal research. Develops student skills in designing market research studies, including selection of data collection method, development of data collection instrument, sample design, collection and statistical analysis of data and reporting the results, including data visualization.

Prerequisite: BMGT230; and must have completed or be concurrently enrolled in BMGT350.

Credit Only Granted for: BMGT351 or BMGT452.

Formerly: BMGT452.

BMGT354 Consumer Analysis (3 Credits)

Identifying buyer behavior concepts relevant to a specific marketing problem so that appropriate marketing decisions can be made. Conceptual frameworks are drawn from psychology, sociology, economics, and other social sciences to aid in understanding the behavior of ultimate and industrial buyers.

Prerequisite: BMGT350.

Credit Only Granted for: BMGT354 or BMGT451.

Formerly: BMGT451.

BMGT355 Foundations of Marketing for Non Business Majors (3 Credits)

Introduces the concepts and principles of marketing. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.

Restriction: Must not have completed BMGT350; and must not be a major in the R.H. Smith School of Business.

Credit Only Granted for: BMGT355 or BMGT350.

Additional Information: Course does not apply to a Smith School degree. BMGT350 may substitute for BMGT355.

BMGT357 Marketing Internship (3-6 Credits)

Supervised work experience with a firm engaged in marketing goods or services. Students apply concepts learned in marketing classes and analyze the firm's organizational structure, environment and marketing strategy.

Prerequisite: BMGT350.

Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT360 Strategic Management of Human Capital (3 Credits)

Provides students with the basic knowledge needed to help organizations attract, select, develop, engage, evaluate, and retain talent. Topics covered may include strategic HRM, the role of globalization, legal issues in HRM, work analysis, HR planning, recruitment, personnel selection, performance management and appraisal, training and development, career development, compensation systems, motivating and rewarding performance, labor relations, and employee health and safety.

BMGT361 Entrepreneurship: Starting and Managing the Entrepreneurial Venture (3 Credits)

Focuses on the early development of a new venture. Topics include: idea-getting, opportunity recognition, feasibility studies, new venture financing and startup. Guests speakers and practicing entrepreneurs offer real world guidance. Restricted to students admitted to the Smith Entrepreneurship Fellows Program.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; and must be in the Smith Entrepreneurship Fellows Program; and must not have completed BMGT461.

Credit Only Granted for: BMGT261, BMGT361, or BMGT461.

Formerly: BMGT261.

BMGT362 Negotiations (3 Credits)

By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, this experiential course is designed to enhance students' negotiating self-confidence and improve students' analytical skills, interpersonal skills, creativity and persuasive abilities.

Restriction: Must not have completed COMM425.

Credit Only Granted for: BMGT362 or COMM425.

BMGT363 Leadership and Teamwork in Organizations (3 Credits)

Provides a comprehensive understanding of fundamental leadership concepts, theories, and skills in organizations and applies to assessing and developing effective leadership practices in organizations.

BMGT364 Managing People and Organizations (3 Credits)

An introduction to selected aspects of human behavior in organizations generally known as organizational behavior (OB). This course is designed to help students develop systematic and fundamental understanding of people and their behaviors in organizations, as well as useful abilities and skills required to effectively and ethically manage various individual, interpersonal, group, and organization-level processes.

BMGT365 Entrepreneurial Finance and Private Equity (3 Credits)

Studies venture capital and private equity using a combination of cases, lectures and guest speakers. Addresses how venture capitalists provide capital to start-up firms in growing industries and how private equity markets provide capital to help established medium-sized firms (often family businesses) grow and restructure. Focuses on how financial, legal, and economic issues are dealt with in the financial contracts between venture capitalists and their limited partners and between capitalists (or other private equity investors) and the firms in which they invest.

Prerequisite: BMGT461 or BMGT361.

Restriction: Junior standing or higher.

Credit Only Granted for: BMGT365, ENES466, SMLP471 or HLMN471.

BMGT366 Growth Strategies for Emerging Companies (3 Credits)

Offers practical management tools that are needed to build a new venture into a significant enterprise. The competencies, strategies and structures of successful high performance businesses are studied through cases, videos and guest lecturers. Topics include leadership, internal growth strategies, merger, acquisition and franchising.

Prerequisite: BMGT461 or BMGT361.

Restriction: Junior standing or higher.

BMGT367 Career Search Strategies in Business (1 Credit)

An overview and opportunity to practice job search skills critical to obtaining internships and full-time positions. Course will cover strategies for exploring career options, preparing job search materials, development of job search skills such as interviewing and networking. Students are encouraged to take this course in the sophomore or junior year.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT369 Experiential Learning in Business Innovation and Entrepreneurship (1-3 Credits)

Selected experiential learning opportunities in business innovation and entrepreneurship

Repeatable to: 15 credits if content differs.

Additional Information: Priority will be given to students enrolled in the Management Major, Innovation and Entrepreneurship Minor, and the General Business Minor.

BMGT370 Introduction to Transportation (3 Credits)

An overview of the transportation field with an emphasis on freight movements from the perspective of both providers of capacity and users of freight services. Examines the characteristics of the freight modes and the role of each mode as a major component of logistics and supply chain management. Explores the economics, energy use, and finances of each mode as well as the impact of government policies on each mode's future. Discussion of infrastructure and capacity needs of the transportation system and its ability to support the economy.

BMGT372 Introduction to Logistics and Supply Chain Management (3 Credits)

Supply chain management involves the coordination of suppliers, manufacturers, distributors, and retailers to ensure that products and services are available to the final consumer in a timely and cost-effective fashion. Logistics management is the subset of supply chain management dealing with the physical flows of product and includes such activities as transportation management, warehousing, materials handling, inventory management, and order fulfillment. Attention is paid to the logistics cost trade-offs within the firm and between members of the supply chain.

Credit Only Granted for: BMGT375 or BMGT372.

BMGT373 Supply Chain Management Internship (3-6 Credits)

Involves supervised work experience in supply chain management, logistics and/or transportation. Students will be expected to relate course material to work experience in an analysis of a firm's operations.

Prerequisite: BMGT370 or BMGT372.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT374 Supply Chain Risk Management (3 Credits)

Since supply chain risk is increasingly more recognized as an organizational threat, and therefore a critical part of corporate strategy; this course examines a wide range of supply chain risk and develops a process to identify, assess, and prioritize this risk. Through a series of readings and case studies, the course focuses on factors that contribute to supply chain risk within the firm as well as the supply chain. Strategies to mitigate risk are explored.

Credit Only Granted for: BMGT478C or BMGT374.

Formerly: BMGT478C.

BMGT375 Supply Chain Management for Non Business Majors (3 Credits)

Examines management decision-making in the design, implementation and coordination of a firm's supply chain activities. Topics include transportation management, warehousing, materials handling, inventory management, and order fulfillment.

Restriction: Must not have completed BMGT372; and must not be a major in the Robert H. Smith School of Business.

Credit Only Granted for: BMGT375 or BMGT372.

Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT372 for General Business minor students only.

BMGT380 Business Law I (3 Credits)

Legal aspects of business relationships. Examination of torts and business crimes, contracts and agency. The law of personal property and bailment relationships. Survey of public policy issues.

BMGT382 Marketing and Innovation for Entrepreneurs (3 Credits)

Marketing and Innovation are two critically important activities that determine success in any business venture. This course will focus on understanding the fundamentals of marketing and innovation from the perspective of an entrepreneur. At a broad level, we will apply proven marketing frameworks (STP and 4Ps) to effectively deliver innovation in an entrepreneurial context.

Restriction: Must not have completed BMGT352.

Credit Only Granted for: BMGT352, BMGT382 or BMGT456.

Additional Information: Course will not satisfy a Marketing major requirement.

BMGT383 The Business of Sports (3 Credits)

An overview of the history of sports management as a profession, while examining the many essential business principles necessary for effective leadership in the industry.

BMGT385 Operations Analytics (3 Credits)

Designed to equip the student with analytical tools to make capacity, inventory, quality, and other operational decisions in both manufacturing and service business enterprises. Examines the strategic role the operations function can play and offers techniques that the firm can use for execution using a systems approach. Analyze operational systems to align supply with demand to maximize value for the organization. Covers critical operations analytics concepts and models, including process flowcharting, capacity and bottleneck analysis, waiting line management, inventory management, Six Sigma, and Lean.

Credit Only Granted for: BMGT385 or ENME426.

BMGT386 General Business Internship (3-6 Credits)

Supervised work experience in business. Students will be expected to relate course material to work experience in an analysis of a firm's operations.

Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in a major in BMGT-Robert H. Smith School of Business.

BMGT390 Designing Innovative Systems (3 Credits)

The QUEST systems thinking course challenges students to analyze how processes interact in larger systems. Students will learn how to use process improvement tools and a systems thinking approach to solve problems and design innovative solutions. By drawing upon their multidisciplinary backgrounds, students will be able to understand and reframe problems from multiple perspectives to uncover new solutions.

Prerequisite: ENES190, BMGT190, ENED290 or BMGT290.

Cross-listed with: ENED390.

Restriction: Must be in the QUEST program.

Credit Only Granted for: BMGT390, ENES390 or ENED390.

Formerly: ENES390.

BMGT392 Introduction to International Business Management (3 Credits)

A study of the domestic and foreign environmental factors affecting the international operations of U.S. business firms. The course also covers the administrative aspects of international marketing, finance and management.

Prerequisite: ECON200.

BMGT394 Applied Quantitative Analysis (3 Credits)

The QUEST data analysis course takes a human-centered approach to data analysis and focuses on teaching students how to frame the core problem, choose the right data, and uncover deep insights from data to build an understanding of people and expose opportunities for innovation. Students will use visualization and statistical techniques to explore data, generate insights, and share the human stories behind the data to move people to action.

Cross-listed with: ENED394.

Restriction: Must be in the QUEST Program.

Credit Only Granted for: BMGT394, ENED394, ENES489A or BMGT438A.

Formerly: BMGT438A and ENES489A.

BMGT395 Principles of Management for Non Business Majors (3 Credits)

Introduces concepts related to organization behavior. Topics include leadership, team decision making and management, conflict resolution and negotiations, organizational culture, and organization change. Students will learn how to apply those concepts and theories to understanding and critically analyzing various individual, interpersonal, group, and organizational management processes.

Restriction: Must not have completed BMGT364; and must not be a major in the Robert H. Smith School of Business.

Credit Only Granted for: BMGT395 or BMGT364.

Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT364 for General Business minor students only.

BMGT397 Mentoring Multidisciplinary Teams (3 Credits)

QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.

Cross-listed with: ENES397.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT397 or ENES397.

BMGT398 Individual Study in Business and Management (1-3 Credits)

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 6 credits.

BMGT399 Special Topics in Business and Management (1-3 Credits)

Special topics in business and management.

Repeatable to: 9 credits if content differs.

BMGT400 Data Visualization and Web Analytics (3 Credits)

Data-driven decisions are increasingly embedded in business organizations. Business professionals must be able to explore and communicate data with understandable and powerful visualizations. This course provides an interactive introduction to data visualization and web analytics using industry standard data visualization tools, techniques, and frameworks to aid in business communication. Additionally, students will explore the use of data visualizations in understanding networks and web analytics.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT400 or BMGT408V.

Formerly: BMGT408V.

BMGT401 Big Data and AI using Cloud Computing (3 Credits)

Big data represents unprecedented opportunities for companies to generate insights and create wealth. Artificial intelligence (AI) has penetrated our daily routines, showing promise in many business areas such as finance, transportation, and healthcare. With cloud computing advances, big data and AI tools are more accessible and cost effective to average businesses; however, key challenges exist in initiating, implementing, and managing AI projects that analyze large, unstructured data. This course provides students with essential knowledge of key big data and AI technologies through hands-on, experiential learning using cloud computing platforms. Students will be able to help guide the successful design and implementation of complex data strategies.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT401 or BMGT408E.

Formerly: BMGT408E.

BMGT402 Database Systems (3 Credits)

The fundamentals of database management systems (DBMS), data models, query processing, and data warehouses, and their application in the development of business information systems will be covered. An important goal of this course is to understand the value of information resources and information management challenges within an organization.

Recommended: BMGT302.

Credit Only Granted for: INST327 or BMGT402.

BMGT403 Systems Analysis and Design (3 Credits)

Techniques and tools applicable to the analysis and design of computer-based information systems. System life cycle, requirements analysis, logical design of databases and performance evaluation. Emphasis on case studies. Project required that involves the design, analysis and implementation of an information system.

Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.

Recommended: BMGT302.

BMGT404 Essential Data Skills for Business Analytics (3 Credits)

Building on prior programming knowledge, this course introduces principles of data science to collect, analyze, and visualize business data. Students will explore application of business analytics in areas such as finance, accounting, marketing, and operations. This course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.

Prerequisite: BMGT302.

Credit Only Granted for: BMGT404 or CMSC320.

Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major.

BMGT406 Developing Applications for the Web and Social Media (3 Credits)

The design and development of Web applications and the underlying platforms and standards for Web application development will be covered. It will examine the phenomenon of social media, social networking and crowdsourcing and understand their use within organizations.

Prerequisite: BMGT402 and BMGT302.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Credit Only Granted for: INST377 or BMGT406.

BMGT407 Information Systems Projects (3 Credits)

Senior capstone course for the information systems major. Collected knowledge from the IS courses and application to significant problems of size and complexity. State-of-the-art research ideas and current business and industrial practices in information systems.

Prerequisite: BMGT302, BMGT402 and BMGT403.

Restriction: Senior standing.

BMGT408 Emerging Topics in Information Systems (3 Credits)

Selected advanced topics covering emerging developments in the field of decision and information technologies.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 9 credits if content differs.

BMGT410 Government Accounting (3 Credits)

An introduction to the theory and practice of accounting and financial reporting as applied in both federal and state/local governments, with a focus on generally accepted accounting principles applicable in each. Topics include analyzing transactions; recognizing transactions in the accounting cycles; and preparing and analyzing financial statements and the overall financial reports at both the federal and state/local government levels.

Prerequisite: BMGT221.

BMGT411 Ethics and Professionalism in Accounting (3 Credits)

Analysis and discussion of issues relating to ethics and professionalism in accounting.

Prerequisite: BMGT311.

Restriction: Must be in Accounting program.

BMGT417 Taxation of Corporations, Partnerships and Estates (3 Credits)

Federal taxation of corporations using the life-cycle approach-formation, operation, assessment, merger, reorganization and liquidation. Overviews of pass-through entities - partnerships and s-corporations -using the life-cycle approach, and the tax consequences of wealth transfers by individuals - gift and estate taxation. Both tax planning and compliance issues are addressed.

Prerequisite: BMGT221.

BMGT422 Auditing Theory and Practice (3 Credits)

A study of the independent accountant's attest function, generally accepted auditing standards, compliance and substantive tests and report forms and opinions.

Prerequisite: BMGT310; and must have completed or be concurrently enrolled in BMGT311.

BMGT423 Fraud Examination (3 Credits)

The focus of this course in fraud accounting is on fraud prevention, detection, and investigation as relevant to accountants and fraud examiners. Most organizations are affected to some degree by the occurrence of fraud, whether or not reported. It is estimated that organizations, WORLDWIDE, lost roughly 5% of their annual revenues to fraud. Despite advances in technology, the problem of fraud continues to escalate; and in particular, cybercrime is growing at an alarming rate. The course will serve as an introduction to all of the topics covered in the Certified Fraud Examiner (CFE) examination. While not purporting to be an exam preparation course, the diligent student could be CFE exam ready soon after taking this course. This course provides an introduction to the profession of fraud examination for accounting majors or for individuals seeking to satisfy the educational requirements for the CPA examination.

Prerequisite: BMGT220 or BMGT210.

BMGT424 Advanced Accounting (3 Credits)

Advanced accounting theory applied to specialized topics and current problems. Emphasis on consolidated statements and partnership accounting.

Prerequisite: BMGT311.

BMGT428 Special Topics in Accounting (3 Credits)

Selected advanced topics in Accounting.

Repeatable to: 9 credits if content differs.

BMGT430 Data Modeling in Business (3 Credits)

Explores the role of statistical models in business analytics to drive managerial decision-making and improve performance through the use of relevant data-motivated examples. Topics include regression models (both simple and multiple regression, as well as logistic regression for binary data), model validation, variable transformation, variable selection, discriminant analysis, and forecasting. These topics are modeled using state-of-the-art data analytics software.

Prerequisite: BMGT231 or BMGT230; or permission of BMGT-Robert H. Smith School of Business.

BMGT431 Data Analytics (3 Credits)

An introduction to the tools and techniques that are central to the analysis of abundant data that is being collected in many forms including web traffic, social network data, and reviews and comments on websites.

Prerequisite: BMGT430.

BMGT434 Analytics Consulting: Cases and Projects (3 Credits)

This course assumes that students have already been introduced to the concepts and techniques of operations research/business analytics (OR/BA). Published papers, short cases, and projects in OR/BA will be analyzed and discussed in a thoughtful way, taking into account the soft (people-related) issues and the hard (mathematical/optimization) issues.

Prerequisite: BMGT332.

BMGT435 Business Process Simulation (3 Credits)

Covers the methods for computer simulation modeling and analysis of complex systems. Students are assumed to have been introduced to the basic techniques and applications in the field of operations management and business analytics. Course emphasis is on modeling of real-world systems (for example, inventory or queueing systems), implementing simulations in special purpose software, and analyzing simulation results.

Prerequisite: BMGT332.

BMGT438 Special Topics in Operations Management (1-3 Credits)

Selected advanced topics in operations management.

Repeatable to: 6 credits if content differs.

BMGT440 Advanced Financial Management (3 Credits)

Analysis and discussion of cases and readings relating to financial decisions of the firm. The application of finance concepts to the solution of financial problems is emphasized.

Prerequisite: BMGT340.

BMGT441 Fixed Income (3 Credits)

Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.

Prerequisite: BMGT340.

BMGT442 Advanced Portfolio Management (3 Credits)

An in-depth coverage of statistical methods for choosing stocks is provided. Financial markets data is used in the class. Students are also expected to learn and use an industry-standard programming language during the class to implement the concepts of the class.

Prerequisite: BMGT343 and BMGT347.

BMGT443 Applied Equity Analysis and Portfolio Management (3 Credits)

Study and application of the concepts, methods, models, and empirical findings to the analysis, valuation and selection of securities, especially common stock.

Prerequisite: BMGT343.

BMGT444 Futures and Options Contracts (3 Credits)

The institutional features and economic rationale underlying markets in futures and options. Hedging, speculation, structure of futures prices, interest rate futures, efficiency in futures markets and stock and commodity options.

Prerequisite: BMGT343.

Credit Only Granted for: BMGT444 or MATH424.

BMGT445 Banking and Financial Institutions (3 Credits)

Analysis and discussion of cases and readings in commercial bank management. The loan function is emphasized; also the management of liquidity reserves, investments for income and source of funds. Bank objectives, functions, policies, organization, structure, services and regulation are considered.

Prerequisite: BMGT340.

Recommended: ECON330 or BMGT341.

BMGT446 International Finance (3 Credits)

Financial management from the perspective of the multinational corporation. Topics covered include the organization and functions of foreign exchange and international capital markets, international capital budgeting, financing foreign trade and designing a global financing strategy. Emphasis of the course is on how to manage exchange and political risks while maximizing benefits from global opportunity sets faced by the firm.

Prerequisite: BMGT340.

BMGT448 Special Topics in Finance (1-3 Credits)

Selected advanced topics in finance.

Repeatable to: 9 credits if content differs.

BMGT449 Investment Fund Management: Lemma Senbet Fund (3 Credits)

The Lemma Senbet Fund is a year-long, advanced finance course available to undergraduate finance majors in their senior year. Ten to twelve students will be selected in the spring of their junior year to participate on the fund, two as portfolio managers and eight to ten as equity analysts. The course provides students with the opportunity to apply what they have learned in finance classes to actual investment decisions, through researching real companies and managing a portfolio of real money.

Prerequisite: BMGT343.

Corequisite: BMGT443.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

Repeatable to: 6 credits if content differs.

BMGT450 Integrated Marketing Communications (3 Credits)

In-depth study of coordinated marketing activities including advertising, sales promotion, Internet marketing, direct marketing and personal selling. Emphasizes strategic planning to effectively use these promotional tools to communicate with customers and meet marketing goals. Blends theory and current practice to provide managerial orientation.

Prerequisite: BMGT350.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT453 Retail Management (3 Credits)

Planning and implementing retail marketing strategy. Application to store and non-store (catalog, internet) retailing. Evaluation of how environmental trends in the consumer market, competition, the economy and technology affect retail strategy in the U.S. and global market.

Prerequisite: BMGT220 and BMGT350.

Credit Only Granted for: BMGT353 or BMGT453.

Formerly: BMGT353.

BMGT454 Global Marketing (3 Credits)

Marketing functions from the global executive's viewpoint, including coverage of global marketing policies relating to product adaptation, data collection and analysis, channels of distribution, pricing, communications and cost analysis. Consideration is given to the cultural, legal, financial and organizational aspects of global marketing.

Prerequisite: BMGT350.

BMGT455 Sales Management (3 Credits)

The roles of the sales executive as a planner, manager of resources and marketing functions and recruiter, trainer, motivator and leader of field sales personnel. Techniques and sequence of problem analysis for selling and sales management decisions and to the practical framework in which these decisions take place. Teaching vehicles feature strong classroom interactions, cases, journal articles, research findings, guest sales managers, debates, and modern company practices.

Prerequisite: BMGT350.

BMGT456 Customer-Centric Innovation (3 Credits)

Addresses the management of new products and services with a focus on the innovation process, specifically the development and launching of new products or services: Opportunity Identification, Concept Generation, Design, Testing and Launch.

Prerequisite: BMGT350.

Credit Only Granted for: BMGT352, BMGT382 or BMGT456.

Formerly: BMGT352.

BMGT457 Marketing Policies and Strategies (3 Credits)

This capstone course ties together various marketing concepts using the fundamentals of strategic market planning as the framework. Application of these principles is accomplished by analyzing and discussing cases and by playing a marketing strategy computer simulation game. Analysis of current business articles to understand the link between theory and real-world problem solving.

Prerequisite: BMGT350.

BMGT458 Special Topics in Marketing (1-3 Credits)

Selected advanced topics in marketing.

Repeatable to: 6 credits if content differs.

BMGT461 Entrepreneurship (3 Credits)

Process of creating new ventures, including evaluating the entrepreneurial team, the opportunity and the financing requirements. Skills, concepts, mental attitudes and knowledge relevant for starting a new business.

Restriction: Must not have completed BMGT361.

Credit Only Granted for: BMGT261, BMGT361, BMGT461, ENES460, SMLP470 or HLMN470.

BMGT463 Cross-cultural Challenges in Business (3 Credits)

Examines in depth the nature of international cultural value-differences and their behavioral-related effects in the workplace. Topics include decision-making and leadership styles and reactions to various work assignments and reward structures.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT465 Business Plan For The New Venture (3 Credits)

Each student focuses on the production of a business plan that will be accepted for an annual business plan competition. Business plans of sufficient quality may be submitted to attract financing. Topics include a deep review of business construction and its derivative short forms.

Prerequisite: BMGT461 or BMGT361.

BMGT466 Global Business Strategy (3 Credits)

Focuses on the strategic challenges that directly result from and are associated with the globalization of industries and companies. Topics include drivers of industry globalization, difference between global and multi-domestic industry, global expansion strategies, sources of competitive advantage in a global context, and coordination of a company across a global network.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT467 Strategic Innovation and Entrepreneurship (3 Credits)

Provides an understanding of how innovation affects the competitive dynamics of markets, how firms can strategically manage innovation, and how firms can create and implement strategies to maximize their likelihood of success.

Credit Only Granted for: BMGT467, ENES463 or HLMN472.

BMGT468 Special Topics in Management and Organization (1-3 Credits)

Selected advanced topics in management and organization.

Repeatable to: 6 credits if content differs.

BMGT469 Management and Organization Short-term Study Abroad (3 Credits)

Selected short-term study abroad topics in management and organization.

Repeatable to: 9 credits if content differs.

BMGT472 Purchasing and Inbound Logistics (3 Credits)

Analysis of the resupply activities of logistics management, including purchasing policies, transportation planning, and inventory control. Attention is directed toward total cost minimization and the establishment of a sustainable competitive advantage based on procurement.

Prerequisite: BMGT372.

BMGT475 Supply Chain Strategy and Network Design (3 Credits)

Analysis of the strategic aspects of supply chain management. Emphasis on the creation of end-user value through supply chain cost reductions, service improvements or both. Attention is directed toward the enabling role of technology in support of strategy evaluation and implementation.

Prerequisite: BMGT372.

BMGT476 Technology Applications in Supply Chain Management (3 Credits)

An understanding of the role of technology in managing the supply chain. Provides students with hands-on experience in advanced software systems that build on top of enterprise resource planning systems. Major emphasis is placed on demonstrating that these systems result in supply chain cost reductions and service improvements.

Prerequisite: BMGT372.

BMGT477 International Supply Chain Management (3 Credits)

The study of the importance of the supply chain management within a global context. Topics covered include: the structure, service, pricing and competitive relationships among international carriers and transport intermediaries as well as documentation, location decisions, international sourcing/distribution and management of inventory throughout the international supply chain.

BMGT478 Special Topics in Supply Chain Management (3 Credits)

Selected advanced topics in supply chain management.

Repeatable to: 9 credits if content differs.

Additional Information: Course prerequisites will vary depending on the topic. A maximum of 3 credits of BMGT478 course work can fulfill Supply Chain Management major requirements.

BMGT483 Sports Management Program Capstone (3 Credits)

Through interdisciplinary collaboration, students will work in teams to apply their knowledge and skills in sports management to a real-world case. Student teams will be charged to develop innovative and creative solutions to sports management challenges while considering the ethical implications of their proposals.

Prerequisite: BMGT383.

BMGT484 Digital Marketing (3 Credits)

Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services through digital means, including the web, social media, and mobile apps. Both the development and analysis of digital media for marketing will be discussed.

Prerequisite: BMGT350.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT485 Project Management (3 Credits)

Modern project management techniques that are used by modern practicing professionals will be covered. Particular attention is given to the management of technology based systems and projects in a business enterprise. The topics covered include: defining project scope, alignment of projects with enterprise strategy, managing project cost, time and risks using tools such as CPM/PERT, and measuring project performance.

Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.

Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST4080 or INST453.

BMGT487 Six Sigma Innovation (3 Credits)

Enhances the overall understanding of Six Sigma Strategy, Tools and Methods to positively influence the performance of a business process, a product or service. Highlights the application of Define-Measure-Analyze-Improve-Control (DMAIC), Design For Six Sigma (DFSS), and the pursuit of Critical to Quality criteria (CTQ's) in a collaborative perspective, one that recognizes a balance between efficiency, and effectiveness and between statistical analysis and statistical thinking.

Prerequisite: STAT400, BMGT231, BMGT230, or ENME392.

BMGT488 Special Topics in Logistics, Business, and Public Policy (1-3 Credits)

Selected advanced topics in logistics, business and public policy.

Repeatable to: 6 credits if content differs.

BMGT490 QUEST Capstone Professional Practicum (4 Credits)

The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.

Prerequisite: ENES390 or BMGT390.

Cross-listed with: ENES490.

Credit Only Granted for: BMGT490 or ENES490.

BMGT491 Scoping Experiential Learning Projects (3 Credits)

QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.

Prerequisite: BMGT190 or ENES190.

Cross-listed with: ENES491.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT491 or ENES491.

BMGT493 Honors Study (3 Credits)

First semester of the senior year. The course is designed for honors students who have elected to conduct intensive study (independent or group). The student will work under the direct guidance of a faculty advisor and the Assistant Dean of Undergraduate Studies. They shall determine that the area of study is of a scope and intensity deserving of a candidate's attention. Formal written and/or oral reports on the study may be required by the faculty advisor.

Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT494 Honors Study (3 Credits)

Second semester of the senior year. The student shall continue and complete the research initiated in BMGT 493, additional reports may be required at the discretion of the faculty advisor and Assistant Dean of Undergraduate Studies.

Prerequisite: BMGT493.

Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in the Smith School Honors Fellows program.

BMGT495 Strategic Management (3 Credits)

A case-based course where students learn to play the role of the "strategic manager" who defines the scope of its business operations and, within the chosen scope, how the firm will compete against rivals. This course focuses on how a firm can both formulate effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits.

BMGT496 Business Ethics and Society (3 Credits)

A study of the standards of business conduct, morals and values as well as the role of business in society with consideration of the sometimes conflicting interests of and claims on the firm and its objectives. Emphasizes a strategic approach by business to the management of its external environment.

Prerequisite: 1 course in BMGT; or permission of BMGT-Robert H. Smith School of Business.

BMGT498 Special Topics in Business and Management (3 Credits)

Special topics in business and management designed to meet the changing needs and interests of students and faculty.

Repeatable to: 6 credits if content differs.

BMGT499 Advanced Business Topics (1 Credit)

Course will delve deeply into a specific business topic. Based on experience and knowledge from undergraduate core business classes, students will examine a particular subject from various angles.

Repeatable to: 3 credits if content differs.

BMIN - General Business Minor

BMIN210 Foundations of Accounting for Non Business Majors (3 Credits)

Provides an understanding of the common statements that report a company's profitability and financial health, and are useful to all economic agents who are engaged with the firm. Students will also recognize and understand managerial accounting as a system for accumulating and modeling information to support decision-making.

Restriction: Must not have completed BMGT221; and must not be a major in the Robert H. Smith School of Business.

Credit Only Granted for: (BMGT220 and BMGT221), BMGT210 or BMIN210.

Formerly: BMGT210.

Additional Information: Does not apply to a Smith School degree. Students pursuing a Smith School minor who have completed both BMGT220 and BMGT221 may substitute these courses for BMIN210. Credit will not be given for both BMIN210 and the combination of BMGT220 and BMGT221.

BMIN345 Foundations of Financial Management for Non Business Majors (3 Credits)

Provides students an overview of financial management. Students will understand how a business allocates financial resources in an uncertain environment to maximize shareholder value. In addition, students will learn the following: how to apply accounting principles to corporate finance; how to value assets, projects, companies and investment securities; understand the relationship between risk and return and how it impacts investment and corporate decisions; how to calculate a company's cost of capital, and develop an intuitive comprehension of financial concepts and analysis.

Prerequisite: BMIN210, BMGT210 or BMGT220.

Restriction: Must not have completed BMGT340; and must not be a major in the R.H. Smith School of Business.

Credit Only Granted for: BMIN345, BMGT345 or BMGT340.

Formerly: BMGT345.

Additional Information: Course does not apply to a Smith School degree. BMGT340 may substitute for BMIN345.

BMIN355 Foundations of Marketing for Non Business Majors (3 Credits)

Introduces the concepts and principles of marketing. Provides an overview of all the concepts in marketing including relationship marketing, product development, pricing, promotion, marketing research, consumer behavior, international marketing, distribution and internal marketing to employees.

Restriction: Must not have completed BMGT350; and must not be a major in the R.H. Smith School of Business.

Credit Only Granted for: BMIN355, BMGT355 or BMGT350.

Formerly: BMGT355.

Additional Information: Course does not apply to a Smith School degree. BMGT350 may substitute for BMIN355.

BMIN375 Supply Chain Management for Non Business Majors (3 Credits)

Examines management decision-making in the design, implementation and coordination of a firm's supply chain activities. Topics include transportation management, warehousing, materials handling, inventory management, and order fulfillment.

Restriction: Must not have completed BMGT372; and must not be a major in the Robert H. Smith School of Business.

Credit Only Granted for: BMIN375, BMGT375 or BMGT372.

Formerly: BMGT375.

Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT372 for General Business minor students only.

BMIN395 Principles of Management for Non Business Majors (3 Credits)

Introduces concepts related to organization behavior. Topics include leadership, team decision making and management, conflict resolution and negotiations, organizational culture, and organization change. Students will learn how to apply those concepts and theories to understanding and critically analyzing various individual, interpersonal, group, and organizational management processes.

Restriction: Must not have completed BMGT364; and must not be a major in the Robert H. Smith School of Business.

Credit Only Granted for: BMIN395, BMGT395 or BMGT364.

Formerly: BMGT395.

Additional Information: Course does not apply to a Smith School degree. Course may be substituted by BMGT364 for General Business minor students only.

BSCI - Biological Sciences Program

BSCI103 The World of Biology (4 Credits)

An introduction to modern biology for the non-science major. Major themes include molecular biology, cell biology, evolution and organismal biology. Relevance of study of biology to modern human life will be emphasized.

Additional Information: Not acceptable for degree requirements in Biological Sciences, Chemistry, or Biochemistry.

BSCI120 Insects (3 Credits)

A survey of the major groups of insects, their natural history, and their relationships with humans and their environment. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

BSCI124 Plant Biology for Non-Science Students (3 Credits)

A basic course in plant biology specifically designed for the non-science student. Emphasis is placed on an evolutionary and ecological approach to studying fundamental concepts and processes of plants, their place in the biosphere, the importance of plants to man, and the manner in which humans impact on plants and their environment. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources.

Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.

Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI125.

BSCI125 Plant Biology Laboratory (1 Credit)

An introduction to the biology of plants with emphasis on the processes by which plants function, the diversity of plants, and the importance of plants to humans. This course will not count toward graduation requirements for any student in Biological Sciences, Chemistry, Biochemistry or the College of Agriculture and Natural Resources. CORE Lab Science.

Corequisite: BSCI124.

Restriction: For non-science majors only; and must not have completed BSCI105; and must not have completed BSCI170 or BSCI171.

Additional Information: CORE Life Sciences Lab (LL) Course only when taken concurrently with BSCI124.

BSCI126 Pollinators in Crisis (3 Credits)

How are pollinators threatened by climate change, habitat destruction, and human interaction, and what are some ways to support and protect them? We will dissect the pollinator crisis, and in the process learn about insects, about the interaction of organisms in complex ecosystems, and about the human-nature interface. Students will work in groups that specialize in an aspect of pollinator biology and their challenges. Instruction will target methods for collecting information, interpretation of scientific information and the professional presentation of findings.

BSCI130 Calculus for Life Sciences I (1 Credit)

CALC FOR LIFE SCIENCES I

BSCI135 Amazing Green: Plants that Transformed the World (4 Credits)

In what profound ways have plants changed humanity and the world we live in today? An interactive way to learn about plants and science, focusing on how plants have changed human history, the biology of their growth, and the science behind their use.

BSCI145 The Insect Apocalypse: Real or Imagined? (4 Credits)

Could the ongoing global decline in insect populations portend the end of of, terrestrial and freshwater ecosystems? An article in the New York Times, in in, 2018, declared an "Insect Apocalypse" that for the first time brought the general, general,, unexplained declines in in insects to the public and suggested a catastrophe awaits awaits, our planet. Scientists have documented the loss of insect species at a rate rate, exceeding the extinction rates associated with the major geological events in in, Earth's history. Based on science and research, students will be provided with with, background, and discover on their own, the diversity of the form and functions of of, insects, as well as how they evolved and persisted for 400 million years. The The, course, designed for students of any major, celebrates the incredible variation of of, insect life and what they do to support life on our planet. The course will highlight highlight, the use of scientific research to understand and respond to the global crisis.

BSCI151 Beyond Race: Human Biological Diversity (3 Credits)

Do racial labels have any practical use in understanding human biological diversity? Such categorizations are inextricably linked to racism, including a history of misuse in science going back hundreds of years, yet modern biological research and medicine often include the use of race. At its core, addressing this question requires understanding the balance between genetic and non-genetic factors underlying human diversity. The course will help students make an informed critique of the biological basis of race through the study of topics such as: basic biology, data analysis and experimental design, human evolution and genetics, and biomedical research and health outcomes.

Credit Only Granted for: BSCI189I, BSCI150 or BSCI151.

Formerly: BSCI150.

BSCI155 Learning to Learn biology (4 Credits)

This course focuses on learning, understanding, and working with core ideas in biology to engage in scientific practice and applications. In the spirit of "integrated STEM learning", this course will focus on applications of biological principles particularly as they relate to design solutions for human needs and participation in socioscientific issues. A sub-thread of the course is attention to the content of the Middle School Science Praxis exam sections on "Scientific Inquiry, Methodology, Techniques and History" (a topic that runs through the course) and "Life Sciences" to prepare students in the MSMS major to excel on this section of the Praxis. A laboratory component of the course engages students in investigations using either tangible physical and biological models or computational models. These investigations align with the content structure of the main throughline of the course.

BSCI160 Principles of Ecology and Evolution (3 Credits)

Basic principles of biology with special emphasis on ecological and evolutionary biology.

Prerequisite: Must have math eligibility of MATH120 or higher.

Recommended: For Science majors.

Credit Only Granted for: BSCI106 or BSCI160.

Formerly: BSCI106.

BSCI161 Principles of Ecology and Evolution Lab (1 Credit)

Basic laboratory principles of biology with special emphasis on ecological and evolutionary biology.

Prerequisite: Must have math eligibility of MATH120 or higher.

Corequisite: BSCI160.

Recommended: For Science majors.

BSCI170 Principles of Molecular & Cellular Biology (3 Credits)

Basic principles of biology with special emphasis on cellular and molecular biology.

Prerequisite: Must have math eligibility of MATH120 or higher.

Recommended: For Science majors.

Credit Only Granted for: BSCI105 or BSCI170.

Formerly: BSCI105.

BSCI171 Principles of Molecular & Cellular Biology Laboratory (1 Credit)

Basic laboratory principles of biology with special emphasis on cellular and molecular biology.

Prerequisite: Must have math eligibility of MATH120 or higher.

Corequisite: BSCI170.

Recommended: For Science majors.

BSCI201 Human Anatomy and Physiology I (4 Credits)

Anatomy and physiology of the skeletal, muscular, neural, endocrine, and sensory systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

Prerequisite: Minimum grade of C- in BSCI170; or students who have taken courses with comparable content may contact the CMNS-Biology department.

BSCI202 Human Anatomy and Physiology II (4 Credits)

Anatomy and physiology of the cardiovascular, respiratory, immune, digestive, urinary and reproductive systems. Course not acceptable toward major requirements in Biological Sciences, Chemistry or Biochemistry.

Prerequisite: Minimum grade of C- in BSCI201; or students who have taken courses with comparable content may contact the CMNS-Biology department.

BSCI207 Principles of Biology III - Organismal Biology (3 Credits)

The diversity, structure and function of organisms as understood from the perspective of their common physicochemical principles and unique evolutionary histories.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And must have completed or be concurrently enrolled in CHEM131.

BSCI213 The Public Microbe (3 Credits)

How are microbes essential for human health yet cause so much disease? This course covers basic concepts in microbiology as they relate to human-microbe interactions by surveying the diversity of microbial life, the role our resident microbiota play in human health, modes of disease tracking, and prophylactic and therapeutic measures designed to control the spread of infectious disease.

Credit Only Granted for: BSCI213 or BSCI223.

BSCI222 Principles of Genetics (4 Credits)

Principles and mechanisms of heredity and gene expression. Considers plant, animal, and microbial organisms.

Prerequisite: CHEM131 and CHEM132; and (BSCI160 and BSCI161; or BSCI106); and (BSCI170 and BSCI171; or BSCI105). Or must have completed BSCI105 or (BSCI170 and BSCI171); and two semesters of chemistry.

BSCI223 General Microbiology (4 Credits)

How have microorganisms exploited every conceivable ecological niche, and how have humans harnessed this diversity to improve medicine, agriculture, and biotechnology? The course covers fundamental concepts in morphology, physiology, genetics, immunology, ecology, and pathogenic microbiology. Applications of microbiology to medicine, the food industry, and biotechnology.

Prerequisite: BSCI170 and BSCI171; or BSCI105.

Credit Only Granted for: BSCI223 or BSCI283.

BSCI238 Special Topics in Biology Student Initiated Courses (1 Credit)

Student Initiated Course (STIC) in Biology. Course will be student initiated and taught under close supervision of faculty mentor. Student instructor and faculty mentor must generate proposal and have approval of the Biological Sciences Program to offer a BSCI238 STIC. BSCI238 cannot be applied to the degree requirements of any biological sciences major.

Repeatable to: 5 credits if content differs.

BSCI258 College Park Scholars Internship (1-3 Credits)

Credit to be determined by CPS Director. Must be completed by end of sophomore year.

Restriction: For College Park Scholars - Life Sciences students only.

Repeatable to: 6 credits if content differs.

Additional Information: Course not acceptable towards in Biological Sciences, Chemistry, or Biochemistry.

BSCI279 Supplemental Study (1-3 Credits)

Research or special study to complement a course taken previously which is not fully equivalent to current departmental requirements. Credit according to work done.

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 6 credits.

BSCI283 Principles of Microbiology (4 Credits)

What makes microorganisms genetically, physiologically, and biochemically unique among organisms in the tree of life? An introduction to microorganisms designed for science majors. Genetic principles underlying microbial abilities; microbial structure-function relationships; metabolism, physiology, and ecology of microorganisms; interactions between microorganisms (including pathogens) and their hosts.

Prerequisite: BSCI222.

Restriction: Must be in a major within Biological Sciences; or permission of CMNS-Cell Biology & Molecular Genetics.

Credit Only Granted for: BSCI223 or BSCI283.

Additional Information: Priority given to BSCI, BCHM and CHEM majors.

BSCI289 Off-Campus Internship (1-3 Credits)

Elective credit for formally established off-campus research internship. Permission of Director of Outreach required.

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 5 credits if content differs.

Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI300 Strategies for Success (1 Credit)

Students often face an increased emphasis on critical thinking, pressure from a typically higher credit hour load, and a faster pace of exposure to new material when moving from lower- to upper-level coursework. The Biological Sciences program designed this course to help all transfer students make successful transitions, both academically and socially, to the University of Maryland at Shady Grove.

Restriction: Must be in a major in USG-Universities at Shady Grove; and must be in Biological Sciences: Physiology & Neurobiology program.

Credit Only Granted for: BSCI300 or BSCI339R.

Formerly: BSCI339R.

BSCI328 Special Topics in Entomology (1-4 Credits)

Lectures, seminars, mini-courses and other special instruction in various entomological subjects.

Repeatable to: 6 credits if content differs.

BSCI329 Instructional Assistance Practicum (1-3 Credits)

Students serve as instructional assistants in selected undergraduate biology courses. Roles and responsibilities are determined on a course-specific basis and approved by the College Undergraduate Program Committee.

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 9 credits if content differs.

Additional Information: Course not acceptable toward major requirements in the Biological Sciences.

BSCI330 Cell Biology and Physiology (4 Credits)

Biochemical and physiological mechanisms underlying cellular function. Properties of cells which make life possible and mechanisms by which cells provide energy, reproduce, and regulate and integrate with each other and their environment.

Prerequisite: Minimum grade of C- in CHEM131 and CHEM132. And minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in BSCI105.

Restriction: Must not have completed BSCI230.

Credit Only Granted for: BSCI230 or BSCI330.

Formerly: BSCI230.

BSCI333 Principles of Paleontology (4 Credits)

A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.

Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department.

Cross-listed with: GEOL331.

Restriction: Permission of instructor is required of non-degree seeking students.

Credit Only Granted for: GEOL331 or BSCI333.

BSCI334 Mammalogy (3 Credits)

Introduction to the biology of mammals, including evolution, physiological, and behavioral specializations.

Prerequisite: Minimum grade of C- in BSCI207. And minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106.

BSCI335 Mammalogy Laboratory (1 Credit)

Lab and field techniques for the study of mammals, focusing on their identification, anatomy, histology, spatial distribution, ecology, and behavior.

Prerequisite: Minimum grade of C- in BSCI160 and BSCI161; or minimum grade of C- in BSCI106. And minimum grade of C- in BSCI207; and must have completed or be concurrently enrolled in BSCI334.

BSCI337 Biology of Insects (4 Credits)

An overview of the biology, evolution and diversity of insects and their relatives. Insect morphology, physiology, behavior and ecology; the impact of insects on humanity and the management of pest insect populations; assembly of an insect collection is required.

Prerequisite: BSCI160 and BSCI161; or BSCI106; or permission of CMNS-Entomology department.

BSCI338 Special Topics in Biology (1-4 Credits)

Lectures, seminars, mini-courses and other special instruction in various biological subjects.

Repeatable to: 9 credits if content differs.

BSCI339 Selected Topics in Biology (1-4 Credits)

Lectures, seminars, and other selected instruction courses in various biological subject matter.

Prerequisite: Permission of CMNS-Biology department.

Repeatable to: 9 credits if content differs.

BSCI342 Biology of Reproduction (3 Credits)

The biology of the reproductive system with emphasis on mammals and, in particular, on human reproduction. Hormone actions, sperm production, ovulation, sexual differentiation, sexual behavior, contraception, pregnancy, lactation, maternal behavior and menopause.

Prerequisite: BSCI170 and BSCI171; or BSCI105; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies; or permission of CMNS-Biological Sciences UG Program.

Cross-listed with: WGSS326.

Credit Only Granted for: BSCI342, WMST326 or WGSS326.

Formerly: WMST326.

BSCI343 Cellular Mechanisms of Aging and Disease (3 Credits)

Explore how alterations in normal cellular and molecular processes lead to both aging and a variety of non-infectious human diseases currently plaguing our society. Students will read, analyze, and discuss current primary and secondary literature in the field of cell biology and biomedicine.

Prerequisite: Minimum grade of C- in BSCI330.

Credit Only Granted for: BSCI339I or BSCI343.

Formerly: BSCI339I.

BSCI348 Special Topics in Cell Biology and Molecular Genetics (1-3 Credits)

Presentation and discussion of special subjects in the field of cell biology and molecular genetics. A maximum of three credit hours of BSCI348 may be applied to the BSCI major.

Repeatable to: 8 credits.

Additional Information: A maximum of 8 credits of any BSCI348 course(s) can be applied to one or more undergraduate degrees. Any credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI353 Cellular and Molecular Neuroscience (3 Credits)

Students will gain an appreciation of neuroscience as the nexus of chemistry, physics, and biology. Additionally, they will gain an understanding of how: both individual and networks of neurons function as variable electrical circuits; our nervous systems transduce signals from the outside world and sets-off molecular cascades; the behavior of a neuron can be changed and or remain the same in response to changing variables. Techniques used to study the nervous system at a cellular and molecular level will be discussed.

Prerequisite: 1 course with a minimum grade of C- from NEUR200, BSCI207 or BSCI330.

Corequisite: Must have completed or be concurrently enrolled in PHYS132 or equivalent course.

Cross-listed with: NEUR306.

Credit Only Granted for: NEUR306 or BSCI353.

BSCI355 Neurobiology of Extraordinary Senses (3 Credits)

From the polarization of light in the sky, to the Earth's magnetic field— we are surrounded by a universe of invisible cues. Organisms as diverse as bacteria, birds, insects, and fish rely on these hidden stimuli to navigate, communicate and forage. We will explore the organization and function of the extraordinary sensory systems that allow organisms to detect these cues. We will consider both the environmental and evolutionary context within which these sensory systems must function, and the history behind key discoveries in each system. Readings will include primary scientific literature and book chapters. Students will give in-depth presentations on a pre-selected topic, and discuss readings each week in a journal club-style format.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

Credit Only Granted for: BSCI355, BIOL708J or NACS728I.

BSCI357 Neurobiology of Chemosensory Systems (3 Credits)

Chemosensation is essential for all forms of life, orchestrating several physiological processes, such as feeding, sexual behaviors, and body homeostasis. This course will review the function of chemosensory systems, including olfaction, gustatory and central chemoreception, among others. Through lectures and discussion of papers, we will examine the cell biology, systems neuroscience, and evolutionary aspects in these chemosensory systems.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

Credit Only Granted for: BSCI339D, BSCI357, BIOL708Q, or NACS728J.

Formerly: BSCI339D.

BSCI358 Special Topics in Biological Sciences at Shady Grove (1-4 Credits)

Elective credit designed to allow undergraduate students to partake in focused academic experiences, to gain exposure to emerging issues, or to learn specialized content not represented in the main curriculum.

Restriction: Must be a Biological Sciences-Shady Grove major.

Repeatable to: 12 credits if content differs.

Additional Information: Credit cannot be applied to the requirements of any Biological Sciences Major.

BSCI360 Principles of Animal Behavior (3 Credits)

Study of animal behavior with emphasis on its evolution and function. Topics include genetic basis of behavior, communication, aggression, foraging, cooperation, mate selection, and relevance for conservation.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And BSCI222.

BSCI361 Principles of Ecology (4 Credits)

Basic principles of population, community, and ecosystem ecology. Use of these principles to predict possible consequences of human-caused changes in the environment and to understand the level of uncertainty of those predictions.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And (MATH130, MATH136, or MATH140).

BSCI363 The Biology of Conservation and Extinction (3 Credits)

Ecology, evolutionary biology, and paleontology will be applied to the study of conservation, species invasions, and extinction.

Prerequisite: Minimum grade of C- in BSCI361.

BSCI364 Conservation Biology Lab (1 Credit)

Understanding and applying principles, practices and common tools of conservation biology. Synthesizing and applying ecological and socioeconomic knowledge to conservation issues.

Prerequisite: Must have completed or be concurrently enrolled in BSCI363.

Credit Only Granted for: BSCI338Q or BSCI364.

Formerly: BSCI338Q.

BSCI366 Environmental Physiology of Animals (3 Credits)

Explores the physiological, morphological, ecological, and behavioral adaptations of aquatic and terrestrial animals that help them manage environmental challenges. The course considers both diverse adaptations among animal lineages and striking convergence among different animal lineages and systems, as well as the physical laws that drive this convergence. Impacts of climate change on the physiology and ecology of animals are highlighted across the course.

Prerequisite: BSCI207.

BSCI370 Principles of Evolution (3 Credits)

Understanding evolutionary processes in a natural and human environment, including adaptation; DNA sequence, protein, and genome evolution; evolution of developmental mechanisms; mechanisms of evolutionary change (mutation, natural selection, drift); epidemiology; coevolution and biological control; speciation; comparative methods; extinction and conservation; human evolution.

Prerequisite: Minimum grade of C- in BSCI160, BSCI161, and BSCI222.

BSCI373 Natural History of the Chesapeake Bay (3 Credits)

Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.

Cross-listed with: ENST373.

Credit Only Granted for: BSCI373 or ENST373.

BSCI374 Mathematical Modeling in Biology (4 Credits)

Students will learn empowering mathematical techniques through the understanding of biological models. Models are chosen from a variety of biological disciplines. Mathematical skills that will be developed along the way include: solving non-linear difference equations, eigenvector analysis, and the implementation of these algorithms as computer models.

Prerequisite: MATH131, MATH136, or MATH141.

Cross-listed with: HLSC374.

Credit Only Granted for: BSCI374, BSCI474, or HLSC374.

Formerly: BSCI474.

Additional Information: The HLSC374 version of this course is restricted to students in the Honors College Integrated Life Sciences program.

BSCI378H Cell Biology and Molecular Genetics Department Honors Seminar (1 Credit)

Required seminar for all students participating in departmental honors research program.

BSCI379 Cell Biology and Molecular Genetics Department Research (1-3 Credits)

This course is arranged to provide qualified majors an opportunity to pursue research problems under the supervision of a faculty member of the department.

Prerequisite: Permission of CMNS-Biological Sciences UG Program or Cell Biology & Molecular Genetics department.

Repeatable to: 8 credits.

Additional Information: A maximum of 8 credits of any version of BSCI379 can be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI379H Cell Biology and Molecular Genetics Department Honors Research (1-4 Credits)

Student should consult program guidelines. Research project carried out under guidance of faculty advisor.

BSCI381 Molecular Neuroethology (3 Credits)

The brain generates a tremendous variety of behaviors, but how it achieves these feats remains largely unknown. Genetics and molecular tools yield fundamental insights into how the brain senses its environment and determines an appropriate course of action. This course will describe modern genetic manipulations (eg, CRISPR editing) and neuronal interventions (e. g., optogenetics), and discuss the quantification of behavioral outputs. Course consists of lectures plus readings and group discussions of primary scientific literature.

Prerequisite: Minimum grade of C- in BSCI222; and minimum grade of C- in BSCI353 or NEUR306.

Credit Only Granted for: BSCI339W, BSCI381, or BIOL709W.

Formerly: BSCI339W.

BSCI389 Entomology Department Research (1-3 Credits)

Credit to be determined by the department. A maximum of 8 credits of any version of BSCI389 can be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 8 credits if content differs.

BSCI392 Biology of Extinct Animals (3 Credits)

A survey of extinct animals that have few, if any, direct living descendants. The principles governing the functional design of animals will be used to infer life styles for extinct, and frequently bizarre, organisms.

Prerequisite: BSCI160 and BSCI161; or BSCI106.

Cross-listed with: GEOL391.

Credit Only Granted for: GEOL391 or BSCI392.

BSCI393 Biology of Extinct Animals Laboratory (1 Credit)

An overview of the techniques used in paleobiological reconstructions of extinct animals.

Prerequisite: Must have completed or be concurrently enrolled in BSCI392.

Cross-listed with: GEOL392.

Credit Only Granted for: GEOL392 or BSCI393.

BSCI394 Vertebrate Form and Function (3 Credits)

Comparative functional anatomy of vertebrates in the context of adaptation to their environments. The vertebrate body and its systems will be considered in terms of structure, physiology, evolution, and embryonic development.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105. And (BSCI207 or BSCI330).

BSCI398H Biology Department Honors Seminar (1 Credit)

Required seminar for all students participating in departmental honors research program.

BSCI399 Biology Department Research (1-3 Credits)

Research and/or integrated reading in biology under the direction and close supervision of a member of the faculty.

Prerequisite: Permission of the Biology Department.

Restriction: Minimum cumulative GPA of 3.0.

Repeatable to: 8 credits if content differs.

Additional Information: A maximum of 8 credits of any version of BSCI399 may be applied to one or more undergraduate degrees. Any research credits completed beyond the first 8 will be included in the total earned credits and factored into the GPA but not applied to any undergraduate degree.

BSCI399H Biology Department Honors Research (1-2 Credits)

A laboratory research problem; required each semester during honors participation and culminating in an honors thesis.

BSCI400 Animal Diversity and Evolution (3 Credits)

Focuses on deep-level diversity of animals and their evolutionary relationships, unique and repeated transitions in the course of animal evolution, and the evolutionary mechanisms that have shaped and continue to shape animal diversity. The course takes an integrative organismal approach to understanding animal evolution, considering morphology, development, physiology, life history, and ecology. It also explores how patterns of animal diversity have changed through time and the processes affecting animal diversity in our changing world.

Prerequisite: Minimum grade of C- in BSCI160 and BSCI207.

BSCI401 Animal Communication (3 Credits)

Examining the mechanisms by which animal produce and receive signals in each sensory modality; and quantifying the type and amount of information conveyed in signals and how animals attend to such information.

Prerequisite: BSCI160 and BSCI161; or BSCI106. And must have completed one semester of physics; and must have completed one semester of organic chemistry.

Recommended: A course in animal behavior or biopsychology.

Credit Only Granted for: BSCI401, BSCI338W or BIOL708W.

Formerly: BSCI338W.

BSCI403 Biology of Vision (3 Credits)

An upper level undergraduate course on the physical, molecular, and neural basis of vision.

Prerequisite: Minimum grade of C- in BSCI207, NEUR306, or BSCI353.

Recommended: BSCI222.

BSCI404 Cell Biology from a Biophysical Perspective (3 Credits)

An approach to cell biology by focusing on mechanisms and unifying physical paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think mechanistically and quantitatively.

Prerequisite: BSCI330.

Recommended: PHYS121 and PHYS122; or completion of PHYS131 and PHYS132 recommended. Jointly offered with BIOL704, BIPH704.

Credit Only Granted for: BSCI3380, BSCI404, BIOL704, BIOL7080, or BIPH704.

Formerly: BSCI3380.

BSCI405 Population and Evolutionary Genetics (3 Credits)

Genetic variation within a population provides the basis for future evolution as well as a record of past evolution. The genomics revolution provides data on this variation that, together with mathematical models, allow us to read this record to reconstruct evolutionary trajectories. Examples will focus on hominin and pathogen evolution. In the lab, students will use models to explore how genetic variation (allele frequencies) changes over time and space.

Prerequisite: Minimum grade of C- in BSCI222; and 1 course with a minimum grade of C- from (MATH131, MATH136, MATH141). Jointly offered with BIOL709.

Credit Only Granted for: BSCI405, BSCI339J, or BIOL709C.

Formerly: BSCI339J.

BSCI406 Membranes and Biological Interfaces (3 Credits)

An interdisciplinary approach to membrane biology, starting with the physical chemistry of interfaces and model systems and continuing into transport, excitability, and signaling. The course is oriented toward students with broad backgrounds in biology and biophysics. Success in the course will come from a background that prepares students to think mechanistically and quantitatively rather than having substantial factual biological knowledge.

Prerequisite: Minimum grade of C- in BSCI330.

Recommended: PHYS122; or PHYS132; or (PHYS260 and PHYS261).

Credit Only Granted for: BSCI339R, BSCI406, or BIOL709R.

Formerly: BSCI339R.

BSCI407 Behavioral Genetics (3 Credits)

Behavior represents an organism's most dynamic phenotype and allows an animal to respond immediately to both internal and external cues. We will explore the genetic and epigenetic mechanisms that underlie behavioral variation and the associated neurological, hormonal, and developmental pathways. We will examine modern approaches used to study behavioral genetics in model and non-model systems, and in humans. Using case studies, we will explore a range of complex phenotypes including those related to mating, parental care, aggression, circadian rhythm, locomotion, learning, anxiety, and addiction.

Prerequisite: Minimum grade of C- in BSCI222.

BSCI410 Molecular Genetics (3 Credits)

An advanced genetics course emphasizing the molecular basis of gene structure and function in the context of modern approaches to the genetics of humans and model organisms.

Prerequisite: BSCI222. And must have completed CHEM233; or (CHEM231 and CHEM232).

BSCI411 Bioinformatics and Integrated Genomics (4 Credits)

Computational methods for the study of biological data. Pairwise and multiple sequence alignment, genome assembly and annotation, RNAseq analysis, and structural bioinformatics. Introduction to UNIX, Python, and R in the context of biological sequence data. Previous computational experience is not necessary.

Prerequisite: Minimum grade of C- in BSCI222.

Recommended: BSCI410.

Credit Only Granted for: BSCI380 or BSCI411.

Formerly: BSCI380.

BSCI412 Microbial Genetics (4 Credits)

A laboratory/lecture based course that covers the fundamentals of mutation, mobile genetic elements and transmission genetics of microbial organisms using both classical and molecular approaches.

Prerequisite: BSCI222; and (BSCI223 or BSCI283).

BSCI413 Recombinant DNA (3 Credits)

An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.

Prerequisite: BSCI330, BSCI223, or BSCI230; and BSCI222.

Formerly: ZOOL452.

BSCI414 Recombinant DNA Laboratory (3 Credits)

An advanced course offering hands-on experience in performing recombinant DNA experiments. All current molecular biology techniques used for cloning prokaryotic genes, analyzing the gene products, and modifying the genes will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.

Prerequisite: BSCI222.

BSCI415 Molecular Genetics Laboratory (3 Credits)

Problem solving laboratory organized around extended projects that employ different approaches toward linking gene and function.

Prerequisite: Must have completed or be concurrently enrolled in BSCI410.

Restriction: Junior standing or higher.

Credit Only Granted for: BSCI348G or BSCI415.

Formerly: BSCI348G.

BSCI416 Human Genetics (3 Credits)

Approaches to human genetics and applications to biology and medicine focusing on specific human genetic topics using primary research papers as the main resource.

Prerequisite: Minimum grade of C- in BSCI410.

Recommended: BSCI330.

BSCI417 Microbial Pathogenesis (3 Credits)

Current research in microbial pathogenesis and the molecular and cellular basis of bacterial disease. Comprehensive overview of the molecular basis of pathogenesis with a focus on model microbial systems to illustrate mechanisms of disease pathogenesis. Topics covered: how microorganisms attach to and enter cells; how host cells are damaged by microbial products; how the host responds to invasion; and host-pathogen evolution.

Prerequisite: BSCI222; and (BSCI223 or BSCI283).

Restriction: Junior standing or higher.

BSCI420 Cell Biology Lectures (3 Credits)

Molecular and biochemical bases of cellular organization and function in eukaryotes.

Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.

Credit Only Granted for: BSCI420 or BSCI421.

BSCI422 Principles of Immunology (3 Credits)

The immune system in health and disease. Presentation and analysis of the cellular and molecular processes that comprise the immune system.

Prerequisite: BSCI222.

Recommended: BSCI330; and (BSCI223 or BSCI283).

Restriction: Junior standing or higher.

BSCI423 Immunology Laboratory (2 Credits)

Current techniques for assessment of immune status and evaluation of the immune response, including monoclonal antibody production, Western blotting, cytokine assays, ELISA and flow cytometry.

Prerequisite: BSCI222.

Corequisite: BSCI422.

Recommended: BSCI223 or BSCI283.

Restriction: Junior standing or higher.

BSCI424 Pathogenic Microbiology (4 Credits)

The role of bacteria and fungi in the diseases of humans with emphasis upon the differentiation and culture of microorganisms, types of disease, modes of disease transmission, prophylactic, therapeutic, and epidemiological aspects.

Prerequisite: BSCI223 or BSCI283.

BSCI425 Advanced Cell Biology Lab Practices (2 Credits)

Experimental techniques used to study the molecular, structural, and spatial organization of plant and animal cells. Using a combination of in vitro assays aimed at analyzing macromolecular and subcellular components and in vivo analyses designed to reveal the inner architecture of a typical eukaryotic cell, students will have an opportunity to: improve some of the basic technical and conceptual skills they acquired in an introductory cell biology course; develop a more sophisticated understanding of the nature of experimental cell manipulation; and tackle the ongoing challenge of articulating their findings in both written and oral communication.

Prerequisite: Must have completed BSCI330, BSCI222, CHEM231, and CHEM232; and must have completed or be concurrently enrolled in BSCI420.

Credit Only Granted for: BSCI421, BSCI425, or BSCI348C.

BSCI430 Developmental Biology (3 Credits)

Structural, functional and regulatory events and mechanisms that operate during development to produce an integrated, multicellular organism composed of a multitude of differentiated cell types.

Prerequisite: BSCI222 and BSCI330.

BSCI431 The Origin and Evolution of Nervous Systems (3 Credits)

Explore how brains change through evolution along the animal tree of life. By comparing the nervous system structure and development across the animal kingdom, this course aims to reveal common designs and mechanisms that generate behavior, and to inform our understanding of how biology builds minds. Topics include the origins of neurons, the universal molecular patterning of brain development across invertebrates and vertebrates, the evolution of neurotransmission, comparative mechanisms of learning and memory, and what in our brain makes us human.

Prerequisite: Minimum grade of C- in NEUR200 or BSCI207.

BSCI432 Systems View of Cell Biology (3 Credits)

An integrated understanding of cell biology based upon reading of literature, discussion of new findings, and quantitative simulations. Exploration of ten topics including Heredity, Curing Diseases, and Synthesizing Life.

Prerequisite: BSCI330.

BSCI433 Biology of Cancer (3 Credits)

Causes and consequences of neoplastic transformations at the biochemical and cellular levels.

Prerequisite: BSCI222 and BSCI330; or permission of CMNS-Biological Sciences UG Program.

BSCI436 RNA Biology and Therapeutics (3 Credits)

The prediction of RNA structure from its sequence, and how the many types of cellular and viral RNAs function in and regulate cellular processes. Use of RNA-based drugs for controlling disease through RNA targeting, editing and vaccines.

Prerequisite: BSCI330.

Recommended: BSCI410.

Restriction: Must have junior standing or higher.

BSCI437 General Virology (3 Credits)

Discussion of the physical and chemical nature of viruses, virus cultivation and assay methods, virus replication, viral diseases with emphasis on the oncogenic viruses, viral genetics, and characteristics of the major virus groups.

Prerequisite: BSCI222; or permission of CMNS-Biological Sciences UG Program.

Restriction: Junior standing or higher.

BSCI439 Undergraduate Advanced Selected Topics in Biology (1-4 Credits)

Lectures, seminars, mini-courses, and other special instruction in various biological subjects.

Repeatable to: 9 credits if content differs.

BSCI440 Mammalian Physiology (4 Credits)

A study of the cardiovascular, hemopoietic, gastrointestinal, renal and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals. Course does not count as an upper level lab for BIOL majors (see BSCI441).

Prerequisite: BSCI330; and (CHEM231 and CHEM232; or must have completed CHEM233). Or permission of CMNS-Biological Sciences UG Program.

BSCI441 Mammalian Physiology Laboratory (2 Credits)

Laboratory exercises in experimental mammalian physiology.

Prerequisite: Must have completed or be concurrently enrolled in BSCI440.

BSCI442 Plant Physiology (4 Credits)

An in-depth examination of the unique molecular and physiological principles necessary to understand how plants grow and respond to the environment at the cellular and organismal levels. Plants evolved unique metabolism and survival strategies, so students should be prepared to enter a world that may be new to them.

Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in PLSC201; and minimum grade of C- in CHEM231 and CHEM232; or minimum grade of C- in CHEM237.

Cross-listed with: PLSC400.

Credit Only Granted for: BSCI442 or PLSC400.

BSCI443 Microbial Physiology (3 Credits)

Microbial cellular and population growth. Fermentation metabolism, physiology of anaerobiosis, and energy conservation and transformation in bacterial membranes. Efficiency of energy utilization for growth. Membrane structure and transport. Bacterial motility and chemotaxis. Regulation of bacterial chromosome replication, RNA and protein synthesis. Control of metabolic pathways. Bacterial stress responses. Antimicrobials.

Prerequisite: Minimum grade of C- in BSCI223 or BSCI283; and minimum grade of C- in BCHM461 or BCHM462.

BSCI446 Advanced Systems Neuroscience (3 Credits)

Neural development, neurobiology of sensation and perception, motor and integrative systems organization in the central nervous system.

Neural systems dysfunction as related to medical pathologies and discussion of contemporary neuroscience methods used to understand brain function.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

BSCI447 General Endocrinology (3 Credits)

Functions and dysfunctions of the endocrine system with special reference to mammals.

Prerequisite: BSCI330, CHEM241, and CHEM242.

BSCI450 Mammalian Systems Physiology (3 Credits)

A study of the cardiovascular, hemopoietic, gastrointestinal, renal, and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals.

Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in CHEM233 or both CHEM231 and CHEM232.

Credit Only Granted for: BIOL708M, BSCI338L, BSCI440, or BSCI450.

BSCI451 Mammalian Systems Physiology Laboratory (2 Credits)

Laboratory exercises in experimental mammalian physiology.

Prerequisite: Must have completed with a minimum of C- or be concurrently enrolled in either BSCI440 or BSCI450.

Credit Only Granted for: BSCI441 or BSCI451.

Formerly: BSCI441.

BSCI452 Diseases of the Nervous System (3 Credits)

An advanced course covering the neuroanatomy, function, and organization of the nervous system and its implication for pathology and disease.

Prerequisite: Minimum grade of C- in BSCI330; and must have completed with a minimum of C- or be concurrently enrolled in either BSCI353 or NEUR306.

Credit Only Granted for: BSCI452, BIOL708E, or NACS728N.

BSCI453 Biology of Hearing (3 Credits)

Acoustic and neural basis of hearing. The auditory system will be described with a comparative approach across species.

Prerequisite: Minimum grade of C- in BSCI207 or NEUR200.

Recommended: BSCI353 or NEUR306.

BSCI454 Neurobiology Laboratory (2 Credits)

Basic neuroanatomical techniques, intracellular and extracellular recordings of electrical potentials from nerve and muscle.

Prerequisite: Minimum grade of C- in BSCI330; must have completed or be concurrently enrolled in BSCI353; and must have completed or be concurrently enrolled in PHYS122, PHYS132, or PHYS142.

Credit Only Granted for: BSCI454, BSCI455, NEUR405, or PSYC401.

BSCI455 Neuroscience Laboratory (3 Credits)

Students will utilize neurophysiological techniques to examine fundamental principles of neurons and neural circuits. This course will reinforce content from prerequisite NEUR courses. Students will also strengthen skills in experimental design and scientific writing.

Prerequisite: NEUR306 or BSCI353; and PHYS132.

Recommended: NEUR305.

Cross-listed with: NEUR405.

Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

BSCI456 Advanced Cellular Neuroscience (3 Credits)

Readings and discussion in cellular and molecular mechanisms underlying synaptic structure/function relationships, synaptic potentiation/depression, dendritic integration, homeostatic plasticity, and nervous system development including neurogenesis, axon guidance, synaptogenesis, and activity-dependent development among other topics.

Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

Recommended: Minimum grade of C- in BSCI440 or another upper-level neuroscience course.

Jointly offered with: NACS644.

Restriction: Permission of CMNS-Biology department.

Credit Only Granted for: BSCI339X, BSCI456, or NACS644.

Formerly: BSCI339X.

BSCI460 Plant Ecology (3 Credits)

The dynamics of populations as affected by environmental factors with special emphasis on the structure and composition of natural plant communities, both terrestrial and aquatic.

Prerequisite: Minimum grade of C- in BSCI361.

BSCI462 Population Ecology (3 Credits)

Theory of population growth and regulation, life tables, and theory of competition and predation, evolution in ecological settings, community structure and dynamics.

Prerequisite: MATH130, MATH136, or MATH140; and BSCI361.

BSCI464 Microbial Ecology (3 Credits)

Interaction of microorganisms with the environment, other microorganisms and with higher organisms. Roles of microorganisms in the biosphere. Microorganisms and current environmental problems.

Prerequisite: BSCI223 or BSCI283; and (CHEM271 or CHEM277); or permission of the instructor.

BSCI467 Freshwater Biology (4 Credits)

Biology and ecology of freshwater invertebrates in lotic and lentic habitats, their adaptation to aquatic life, their function in aquatic ecosystems, and their relationship to environmental deterioration.

Laboratory will include field trips, demonstrations, and identifications.

Prerequisite: BSCI160.

BSCI471 Molecular Evolution (3 Credits)

Patterns of DNA sequence variation within and between species, caused by nucleotide changes and the movement of transposable elements.

Theories of molecular evolution, such as the neutral theory. Molecular clock hypothesis: its importance as a practical empirical tool in molecular genetics and systematics and its theoretical foundation.

Prerequisite: BSCI222; or permission of CMNS-Biology department.

BSCI473 Marine Ecology (3 Credits)

Courses in evolution and animal behavior are strongly recommended.

A detailed analysis of the evolutionary ecology of marine invertebrates; emphasis on testing of theories and on current literature.

Prerequisite: BSCI207.

BSCI475 Sexual Selection in Nature (3 Credits)

Sexual selection drives some of the most spectacular, if not bizarre, traits in nature. We will explore how organisms select and compete for mates and fertilization success, and how this powerful and pervasive evolutionary force shapes sexual traits and regulates species boundaries. We will focus on the key theories in the field and discuss recent and classic research papers. This is a student-directed class: course topics and materials will be selected based on student interests and involvement. On occasion, experts in the field will be invited to class to discuss their research.

Prerequisite: Minimum grade of C- in BSCI207; or permission of instructor.

Recommended: BSCI360 or BSCI370. Jointly offered with BIOL708.

Credit Only Granted for: BSCI338X, BSCI475, or BIOL708X.

Formerly: BSCI338X.

BSCI476 Evolutionary Genomics (3 Credits)

Application of genomics to understanding evolutionary processes, including genome evolution, organismal evolution, genomic diversity across the tree of life, human evolution and disease. Relevant concepts of evolutionary genetics and genome biology will be covered.

Prerequisite: Minimum grade of C- in BSCI222.

Recommended: BSCI370.

Credit Only Granted for: BSCI476 or BIOL708C.

BSCI477 Ecology and Evolution of Infectious Disease (3 Credits)

Parasites are a ubiquitous feature of ecological communities, and can strongly impact population growth, extinction risk, community structure and biodiversity, as well as pose serious risks to human health and food security. This course will cover basic principles of disease ecology, including; the diversity of parasitic organisms and transmission modes, host and pathogen traits for defense and infection, mathematical models of disease spread, the impacts of disease at different ecological scales, and host-parasite co-evolution. In the latter half of the course we will apply these basic concepts to current real-world problems in disease ecology including emerging infectious diseases in humans, wildlife and agriculture. We will use examples from plants, animals and humans to about an equal degree. This course will have a strong quantitative focus, and completion of the math series is recommended.

Prerequisite: C- or better in either BSCI370 or BSCI361 and either MATH136 or MATH140.

Credit Only Granted for: BSCI477 or BIOL708D.

BSCI480 Arthropod Form and Function (4 Credits)

Survey of the morphological, systematic and physiological diversity of the phylum Arthropoda.

Prerequisite: Permission of CMNS-Entomology (AGNR).

BSCI481 Insect Diversity and Classification (4 Credits)

A summary of the morphology, systematics and evolution of insects and techniques for their collection, preservation and identification. Emphasis is placed on the diversity of insects in North America, particularly Maryland and adjacent regions. An insect collection is required.

Prerequisite: BSCI337.

BSCI482 Insect Physiology and Molecular Biology (4 Credits)

Physiological and biochemical functions of insects. Insect endocrinology, neurobiology, sensory physiology, integument and molting, development and metamorphosis, immunity, metabolism and related topics.

Prerequisite: BSCI337.

BSCI483 Insects, Pathogens, and Public Health (3 Credits)

Mosquito- and tick-borne disease transmission poses significant challenges to human health and well-being globally, and is on the rise in North America. Arthropod parasites and the pathogens they transmit to humans and animals will be introduced, and the public health significance of these arthropods will be examined. The ecology and behavior of vectors in relation to disease transmission will be emphasized.

Prerequisite: BSCI207.

BSCI487 IPM: Science-Based Decision Making for Sustainable Pest Management (4 Credits)

Long-term global food security requires a sustainable increase in agricultural productivity to ensure the availability and accessibility of safe and nutritious food. Agricultural pests reduce global food production and threaten its sustainability. This course explores sustainable pest management in agroecosystems using the integrated pest management (IPM) paradigm. IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment.

Prerequisite: BSCI160 and BSCI161.

Restriction: Must have earned a minimum of 90 credits.

Credit Only Granted for: BSCI487 or ENTM609.

BSCI488 Summer Biology Institutes (1-8 Credits)

Prerequisite: Permission of CMNS-Biological Sciences UG Program.

Repeatable to: 12 credits if content differs.

BSCI494 Animal-Plant Interactions (3 Credits)

Theoretical, conceptual and applied aspects of evolutionary and ecological interactions between plants and animals. This course gives an overview of major ideas, historical controversies, and current research on animal-plant relationships. We will explore the mechanisms and evolution of plant defenses and animal counter-adaptations, behavioral ecology and interactions across trophic levels, the role of microbial communities in mediating interactions, and how these interactions color human experience through food and medicine. The course will have a blended lecture/discussion format and will include field walks to collect herbivory data and observe animal-plant interactions.

Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI497 Insect Pests of Ornamentals and Turf (4 Credits)

The recognition, biology and management of insects and mites injurious to ornamental shrubs, trees, greenhouse crops, and turf. Emphasis on Integrated Pest Management (IPM).

Prerequisite: BSCI160 or BSCI337; or (PLSC110 and PLSC111) or (PLSC112 and PLSC113).

BSCV - CIVICUS

BSCV181 Civicus Student and the University (1 Credit)

Knowledge and skills designed to utilize CIVICUS to enhance the college experience and preparation for civic engagement.

Restriction: Freshman standing; and must be in the Civicus program.

BSCV191 Introduction to Civicus (3 Credits)

Students will explore a range of ways to think about what it means to fully engage in communities, conduct research and scholarly inquiry to explore pressing contemporary problems, consider the roots of social issues, and explore ways to create positive social change on a school, local, state, and national level.

Restriction: Must be in the CIVICUS Program.

BSCV301 Leadership in a Multicultural Society (3 Credits)

A study and application of skills, historical context, theories, and concepts for constructive leadership in a pluralistic, multicultural, and diverse society. Social science methodologies and theories will provide the structure for the study of contemporary social problems, civil society issues, and leadership practices.

Prerequisite: BSCV182.

Restriction: Must be in the CIVICUS program.

BSCV309 Civicus Seminar (1 Credit)

Review and analysis of contemporary social issues.

Restriction: Must be in the CIVICUS program.

Repeatable to: 5 credits if content differs.

BSOS - Behavioral and Social Sciences

BSOS138 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSOS180 Introduction to Data Management (1 Credit)

Learn to read data, clean data sets, and perform other vital functions (mainly in Excel). Students will develop fundamental skills that will ease the transition into future coursework (or a career) in data science or analytics. Designed for students who have minimal background in Excel or computer software.

Credit Only Granted for: BSOS180 or BSOS188B.

Formerly: BSOS188B.

Additional Information: Recommended for BSOS majors who need additional support for their disciplinary stats or research methods sequence.

BSOS188 Selected Topics in the Behavioral and Social Sciences (1-3 Credits)

Introductory selected topics course dealing with interdisciplinary issues related to the social sciences.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: EDCP1080 or BSOS188A.

BSOS201 Ensuring your Financial Future Through Stock Investing (3 Credits)

Introduces students to investing and trading, with special emphasis on the field of technical analysis. Planning for one's financial future is a critical skill for all students. Students will learn how to evaluate companies using the investors.com website and the TC2000 stock charting program. Students will develop an idea of the risks and benefits of investing, establishing a savings strategy, opening an IRA, and strategically planning for future financial security. In addition to readings, lectures, and online videos, students will participate in virtual stock market trading exercises and manage a virtual account.

Credit Only Granted for: BSOS289I or BSOS201.

Formerly: BSOS289I.

Additional Information: No prior knowledge of the stock market or investing is expected or required.

BSOS230 Introduction to Programming for the Social Sciences: Statistical Computing using R (1 Credit)

R is an open-source programming language, specialized for statistical computing, and provides a variety of statistical and graphical techniques that might be relevant for any BSOS program, such as descriptive statistics, linear and non-linear regression, text mining, image processing. The R language is increasingly often employed in advanced statistics and data analytics, offering a wide range of application packages for effective programming. This course introduces the R language and several powerful packages in form of lectures, worked-out examples, and group exercises.

Restriction: Must not have completed BSOS330; and must be enrolled in a BSOS major. Or permission of instructor.

Additional Information: Students do not need any prior experience using R.

BSOS231 Introduction to Programming for the Social Sciences: Python (1 Credit)

Python has become the most powerful programming language in advanced statistics and data analytics. It includes expansive packages for data handling and processing, including the latest developments in machine learning, and offers Integrated Development Environments (IDE) for code development, testing, debugging, and graphical representation. In addition, python is deployed on virtually all high performance computing clusters, taking advantage of multi-processing, large memory, and GPU enhanced computing environments. This course offers a thorough introduction to python and those packages that are fundamental to data processing and analysis, image processing, natural language processing, machine learning.

Restriction: Must not have completed BSOS331; and must be enrolled in a BSOS major. Or permission of instructor.

Additional Information: Students do not need any prior experience using Python.

BSOS233 Data Science for the Social Sciences (3 Credits)

An introduction to modern methods of data analysis for social scientists. This course emphasizes teaching students who have no previous coding experience how to analyze data and extract meaning in a social science context. Students will gain critical programming skills and learn inferential thinking through examples and projects with real-world relevance.

Prerequisite: Must have completed or be concurrently enrolled in STAT 100.

Restriction: Must be in a major in the College of Behavioral and Social Sciences or the College of Information Studies; or permission of instructor.

BSOS238 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSOS240 The Problem of Prejudice: Overcoming Impediments to Global Peace and Justice (3 Credits)

What is prejudice? How are our prejudices formed? What similarities and differences are there between various forms of prejudice across race, gender, nationality, politics, religion, among others? What is the relationship between prejudice and conflict? What is the role of prejudice in thinking about issues of peace and justice? How can we better understand the role that prejudice and discrimination have in a globalizing world? What can we learn from a scientific basis of knowledge about the causes of prejudice? This course will survey interdisciplinary scholarly research and popular cultural conversations about the root causes of prejudice and discrimination. You are expected to examine empirical evidence toward formulating your own views about the impact that all forms of prejudice impose on the human condition and the role it has played in your own life. Based on research evidence, the course encourages the search for solutions to the blight of prejudice.

Credit Only Granted for: BSOS240, HNUH228Z, or HONR279L.

Formerly: HNUH228Z and HONR279L.

BSOS248 Leadership Seminar I (1-6 Credits)

A topics course in the behavioral and social sciences designed to develop student leaders with skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.

Repeatable to: 9 credits.

BSOS258 Leadership Practicum I (1-6 Credits)

This course puts into practice the elements and skills learned in the seminar series that directly benefit the college.

Repeatable to: 9 credits.

BSOS288 Special Topics in Behavioral and Social Sciences (1-3 Credits)

Introductory special topics course focusing on an interdisciplinary topic related to behavioral and social sciences.

Repeatable to: 6 credits if content differs.

BSOS308 Contemporary Issues: Interdisciplinary Approaches (3 Credits)

An interdisciplinary analysis of current public policy issues of international, national and community import. Senior standing recommended.

Recommended: Must have Senior standing.

Repeatable to: 6 credits if content differs.

BSOS326 Python Programming for the Social Sciences (3 Credits)

Python has become the most powerful programming language in advanced statistics and data analytics. It includes expansive packages for data handling and processing, including the latest developments in machine learning, and offers Integrated Development Environments (IDE) for code development, testing, debugging, and graphical representation. This course offers a thorough introduction to Python and those packages that are fundamental to data processing and analysis.

Prerequisite: Minimum grade of C- in INST126 or BSOS233.

Restriction: Restricted to students in the Social Data Science major or by permission of the instructor.

BSOS338 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSOS348 Leadership Seminar II (1-6 Credits)

A topics course in the behavioral and social sciences designed to develop student leaders with advanced skills that will address important issues of the college and offers diverse viewpoints intended to challenge common perceptions of leadership, technology programs and communication.

Repeatable to: 9 credits.

BSOS355 Social Sciences Internship Practicum (3 Credits)

BSOS 355 is an internship course open to all majors. It will enable students to articulate and apply the scholarship from the discipline related to their specific internship placement into a real-work environment.

Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 2.5; and must have completed at least 1 semester at UMD.

Credit Only Granted for: BSOS388I or BSOS355.

Formerly: BSOS388I.

BSOS358 Leadership Practicum II (1-6 Credits)

This course puts into practice the advanced skills and elements learned in the seminar series that directly benefit the college.

Repeatable to: 9 credits.

BSOS361 Academic and Career Planning for Transfer Students in the College of Behavioral and Social Sciences (1 Credit)

Students will utilize the resources of the Feller Center for Academic and Career Planning and TerrapinSTRONG to explore how their individual social identities and strengths contribute to building strong communities in personal, academic, and professional career spaces.

Restriction: Must be a first-semester transfer student in a College of Behavioral and Social Sciences major.

Additional Information: Intended for first semester transfer students in BSOS majors.

BSOS385 Big-Data Analysis on the BSOS HPC Cluster (2 Credits)

Social media are a primary source of information on social interaction and personal interests. High-performance computing (HPC) is employed to search for hidden pattern and unknown correlations using advanced machine-learning algorithms available in python and R packages. The main steps of Natural Language Processing and big-data analysis are being worked out, from examining random samples to analyzing large data sets via in-memory Monte-Carlo applications and neural networks.

Prerequisite: Students must have completed a least one college-level statistics course.

Recommended: A working knowledge of python or R is expected.

Restriction: Students must be enrolled in a BSOS major; or permission of instructor.

Credit Only Granted for: BSOS385, BSOS685, or BSOS688B.

BSOS386 Experiential Learning (3-6 Credits)**BSOS388 Behavioral and Social Sciences Special Topics (1-3 Credits)**

Advanced special topics course focusing on an interdisciplinary topic related to the Behavioral and Social Sciences.

Repeatable to: 6 credits if content differs.

BSOS399 Directed Study in Behavioral and Social Sciences (1-6 Credits)

Guidance for the advanced student capable of interdisciplinary study on special projects under the supervision of the Assistant Dean for Student Affairs.

BSOS438 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSOS448 Teaching Assistant Practicum (1-6 Credits)

Supervised practicum for teaching assistants for BSOS/UNIV courses.

Repeatable to: 9 credits.

BSST - Terrorism Studies

BSST200 Terrorism Studies (3 Credits)

Theories explaining the formation of terrorist groups and the motivations behind terrorist behavior, building upon theories from social psychology, sociology, political science, criminology, and history. The course examines the different levels of analysis for terrorism studies, the different methods scholars utilize for research, and the most prominent datasets in the field of homeland security. In addition, this course provides a review of various terrorist groups and ideological movements. The course concludes with an introduction to the different approaches to counter violent extremism and terrorism.

Credit Only Granted for: BSST330 or BSST200.

Formerly: BSST330.

BSST240 Understanding The Principles and Perils of CBRN Weapons (3 Credits)

Explores the 'dark side' of scientific applications. Students will gain an understanding of CBRN Weapons, through the exploration of the scientific method, and certain fundamental principles of chemistry, biology, and physics. Students will also learn how to test hypotheses, use basic statistics, interpret results, and apply their new knowledge through discussions of practical applications in the domains of public health, emergency management, epidemiology, and threat assessment. Bringing these fields together in one class will allow students to better understand the use of and threat from CBRN weapons in terrorism.

Additional Information: If taken in the same term as BSST241 these courses will count for General Education Natural Sciences Lab.

BSST241 Understanding the Principles and Perils of CBRN Weapons (Lab) (1 Credit)

An exploration of the threat of Chemical, Biological, Radiological, and Nuclear (CBRN) weapons aimed to provide students with a basic, multidisciplinary, natural science foundation in chemistry, biology, and physics.

Corequisite: BSST240.

Additional Information: This is an optional 1-credit lab course offered in coordination with BSST240. If taken in the same term as BSST240 these courses will count for General Education Natural Sciences Lab.

BSST258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSST288 Special Topics in Terrorism Studies (3 Credits)

A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.

Repeatable to: 9 credits if content differs.

BSST331 Innovations in Counterterrorism (3 Credits)

Explore the manners in which states respond to terrorist incidents and the threat of terrorism through counterterrorism approaches and strategies. We will examine counterterrorism responses from law enforcement, military, and the intelligence community. This will include discussions about policy decisions made in response to both terrorist attacks and the threat of terrorism. Counterterrorism strategies this course will cover include deterrence, interdiction, and legal efforts to combat terrorism, including terrorist financing and online recruitment. The course is divided into four general parts. First, we will provide an overview of government counterterrorism options and review key concepts. Second, we will examine law enforcement responses to terrorism including efforts to counter cyberterrorism, social media recruitment, and terrorist financing online. Third, we will focus on military responses to attacks conducted by terrorist groups, including deterrence strategies, targeted strikes, and covert operations. Last, we will review the challenges and complexities of counterterrorism approaches, including the ethical, moral, and legal dilemmas.

Restriction: Must be in the Terrorism Studies minor program.

BSST334 States of Emergency (3 Credits)

Students will explore the manner in which crises unfold from the perspective of a variety of emergency response disciplines, including: emergency management, law enforcement, intelligence analysis, cyber analysis, risk communication, health and human services, and emergency psychiatry/psychology. Students will participate in a semester-long simulation of an unfolding terrorist attack.

BSST335 Innovations in Countering Violent Extremism (3 Credits)

Introduces students to novel innovations in the development of Countering Violent Extremism (CVE) programs. CVE is a realm of policy, programs, and interventions designed to prevent individuals from engaging in violence associated with radical political, social, cultural, and/or religious ideologies. Unlike counterterrorism strategies that often focus on targeting and disrupting terrorist plots, CVE focuses on radicalization prevention through engagement and intervention with communities. CVE also focuses on deradicalization and rehabilitation of former extremists. Throughout the course, students will work in groups to develop their own innovative CVE programs, rather than merely learn about CVE through lectures.

Credit Only Granted for: BSST335 or BSST338V.

Formerly: BSST338V.

Additional Information: It is recommended that BSST335 be taken after, or concurrent with, BSST330.

BSST337 Ideology and Social Conditions in the Making of Terrorism (3 Credits)

This class focuses on the relations of ideology with social conditions in the historical context of the Middle East and North Africa in order to explain the process of the rise and domination of Islamist extremism and suicide terrorism as a dominant oppositional discourse in the region. Resting on a cognitive conception of ideology, this class focuses on the process in which ideological discourses shape the making of the terrorist mind.

Credit Only Granted for: BSST338G or BSST337.

Formerly: BSST338G.

BSST338 Special Topics in Terrorism Studies (3 Credits)

A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.

Repeatable to: 9 credits if content differs.

BSST340 Oral Communication for National Security Careers (3 Credits)

Students will discuss perspectives on strategic communication and national security, while discussing and practicing public speaking skills and developing proficiency in three genres of security-related briefings. Students will work with the technical, scientific, and/or specialized data, vocabularies, processes, and products of the academic disciplines and/or fields of expertise relevant to national and international security careers.

Credit Only Granted for: BSST340 or BSST338E.

Formerly: BSST338E.

BSST358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

BSST370 Financing Terror and Hate (3 Credits)

This course will discuss terrorist financial activities, initiatives focused on countering those financial activities, and sanctions policy. This course approaches these topics through various techniques including, structured analytic tools, such as weighted ranking methods, scenario trees, causal flow diagramming, hypothesis testing, utility analysis, as well as game theory and logic will be incorporated into the course to provide students a better framework to form analytic judgments. At the end of the course, students will have gained a solid foundational understanding of the financing and counter-financing of terrorists.

Credit Only Granted for: BSST370 or BSST338Z.

Formerly: BSST338Z.

BSST371 Far-Right Extremism: Violent Ideologies and Actions (3 Credits)

Introduces students to the ideologies, organizing patterns, and actions within far-right extremism. This will include a focus on movements within white supremacy, anti-government extremism, male supremacy, homophobia, and anti-immigrant extremism. Using as examples specific violent extremists and groups on the far-right, we will study key theories explaining extremist radicalization, recruitment, engagement, and mobilization.

Credit Only Granted for: BSST338R or BSST371.

Formerly: BSST338R.

BSST372 Terrorist Hostage Taking (3 Credits)

Examines different forms of hostage taking, drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. We will consider these events in terms of how they are similar, how they differ and what they are designed to achieve. This course provides insights into the complicated nature of terrorism via hostage taking in order to broaden student understanding of current events. This course also gives students practical experience in finding and coding data, and studying complex human behaviors.

BSST373 Analyzing Terrorism: Simulations, Wargaming, and Strategies of Security (3 Credits)

Introduces students to novel, applied methods to study terrorism and security, including simulations, wargaming exercises, and red teaming. This course assumes no prior experience with these methods. Throughout the course, students will complete activities to understand the behavior of militant groups and develop security strategies to counter violent non-state actors.

Credit Only Granted for: BSST338J or BSST373.

Formerly: BSST338J.

BSST374 Political Assassinations (3 Credits)

Course topics include political assassinations, their consequences, and the possible means for their prevention, from profiling assassins to protection of potential targets. Research on political assassinations has developed from many different disciplines and so we will be drawing on theory and research from across a range of different fields, including international relations, political science, criminology, psychology, sociology and economics. In each lecture we will review the scholarly issues associated with political assassinations as well as considering the practical, counter attack challenges faced by security and law enforcement.

BSST375 Violent Non-State Actors in Latin America: Terrorism, Cartels, and Crime (3 Credits)

Examines why non-state actors resort to violence and crime, what tactics and strategies they use, how they fund their existence, and what can be done to counter them. Throughout the course, students will be introduced to many different types of violent non-state actors, including terrorist organizations and criminal organizations. This will all be done in the context of Latin America and students will gain an in-depth understanding of the problems that plague individual countries, as well as which issues afflict the region as a whole.

Credit Only Granted for: BSST338L or BSST375.

Formerly: BSST338L.

BSST376 Al-Qaeda, the Islamic State, and Global Jihadist Movements (3 Credits)

Provides an in-depth overview into global jihadist movements, with specific focus on the terrorist groups known as al-Qaeda and the Islamic State of Iraq and the Levant. In an effort for students to come to a common understanding of key terms that will be discussed throughout the course, a session will be devoted to understanding key concepts and terms related to Islamic history. The course will also examine the Islamic State's connection and ultimate divorce from al-Qaeda. The course will all examine group finances, as well as the rise of affiliates. The course will also explore the use of foreign fighters and social media, as well as global responses to these movements and groups.

Credit Only Granted for: BSST338V or BSST376.

Formerly: BSST338V.

BSST377 Applying Theory to the Practice of Countering Terrorism (1 Credit)

Focuses on current events related to terrorism and counterterrorism, as they are discussed in mass media, and the implications of those current events on the ethical and professional conduct of the counterterrorism community. Through a discussion-based seminar, students will bring current, terrorism-related events to classroom discussion, where they will consider the media-framed current events in relation to academic research. Students will be continually challenged to draw connections between terrorism-related events in the news and relevant academic research. Furthermore, this class will use vignettes based in current events to present students with real-world ethical dilemmas that those in the professional counterterrorism community and broader national security community have to confront.

Recommended: BSST330.

Restriction: Restricted to students enrolled in the Global Terrorism Minor (#BS07).

Credit Only Granted for: BSST327, BSST377, or BSST399K.

Formerly: BSST327.

Additional Information: It is recommended that this course be taken in the final semester in the minor program.

BSST386 Experiential Learning in Terrorism Studies (1-5 Credits)

This course will supplement student's experiential learning experience, or internship in the field of terrorism studies and homeland security with guided reflection on their experiences.

BSST389 Internship in Terrorism Studies (1-6 Credits)

Supplements student's experiential learning experience, or internship in the field of terrorism studies and homeland security, with guided reflection on their experiences.

Restriction: Must have earned a minimum cumulative GPA of 2.5.

Repeatable to: 9 credits.

BSST398 Individual Study in Terrorism Studies II (1-3 Credits)

An independent study course for START Students.

Repeatable to: 9 credits if content differs.

BSST399 Individual Study in Terrorism Studies (1-3 Credits)

An independent study course for students in the Global Terrorism Minor program.

Repeatable to: 9 credits if content differs.

BSST458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS - Criminology and Criminal Justice

CCJS100 Introduction to Criminal Justice (3 Credits)

Introduction to the administration of criminal justice in a democratic society, with emphasis on the theoretical and historical development of law enforcement. The principles of organization and administration for law enforcement; functions and specific activities; planning and research; public relations; personnel and training; inspection and control; direction; policy formulation.

CCJS105 Introduction to Criminology (3 Credits)

Criminal behavior and the methods of its study; causation; typologies of criminal acts and offenders; punishment, correction and incapacitation; prevention of crime.

CCJS158 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS188 Topics in Criminology and Criminal Justice (3 Credits)

Contemporary and emerging crimes and the response to them by criminal justice agencies. Emphasis is on the emergence of new forms of crimes or criminals.

Prerequisite: CCJS100 or CCJS105.

Repeatable to: 6 credits if content differs.

CCJS200 Statistics for Criminology and Criminal Justice (3 Credits)

Introduction to descriptive and inferential statistics, graphical techniques, and the computer analysis of criminology and criminal justice data. Basic procedures of hypothesis testing, correlation and regression analysis, and the analysis of continuous and binary dependent variables. Emphasis upon the examination of research problems and issues in criminology and criminal justice.

Prerequisite: CCJS100 or CCJS105; and 1 course with a minimum grade of C- from (STAT100, MATH107, MATH111, MATH120, MATH130, MATH135, MATH140).

Restriction: Must be in Criminology and Criminal Justice program; or permission of BSOS-Criminology & Criminal Justice department.

CCJS225 Responses to Violence (3 Credits)

What are the dimensions of violence in the United States and worldwide, and how has humanity responded to violence? Conflict is unfortunately resolved through violence in a number of settings. It ranges from interpersonal to international in its scope. This course investigates the strengths and weaknesses of a number of resolutions to reducing violence over the course of history using both state centered and informal control.

CCJS226 Out of Lock Up: Breaking the Cycle (3 Credits)

Offender reentry in the United States. Examination of experiences of prisoners during and after incarceration. Research on the experiences of special offending populations including females, juveniles, and young adults. Exploration of reentry challenges, historical trends, policy, and practice.

CCJS230 Criminal Law in Action (3 Credits)

Law as one of the methods of social control. Criminal law: its nature, sources and types; theories and historical developments. Behavioral and legal aspects of criminal acts. Classification and analysis of selected criminal offenses.

Prerequisite: CCJS100.

CCJS234 Law of Criminal Investigation (3 Credits)

General principles and theories of criminal procedure. Due process. Arrest, search and seizure. Recent developments. Study and evaluation of evidence and proof.

Prerequisite: CCJS100 and CCJS230.

CCJS258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS278 Special Topics in Criminology and Criminal Justice (3 Credits)

Topics of special interest to undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest. May be delivered online.

Repeatable to: 6 credits if content differs.

CCJS288 Special Topics in Law and Justice (3 Credits)

An analysis of recent developments in criminal law and their implications for criminal justice systems and research. Focus will be on Supreme Court decisions and legislative initiatives.

Prerequisite: CCJS105 and CCJS230.

Repeatable to: 6 credits if content differs.

CCJS300 Criminological and Criminal Justice Research Methods (3 Credits)

Introduction to the formulation of research questions covering crime and justice, research designs, data collection, and interpretation and reporting in criminological and justice-system settings.

Prerequisite: CCJS100 and CCJS105; and (PSYC200, CCJS200, ECON321, BMGT230, or SOCY201).

CCJS301 Fundamentals in Criminal Justice (3 Credits)

Provides an overview of the three major components of the American criminal justice system: police, courts, and corrections. Each component will be explored in its development over time as well as various issues surrounding each component. This course will also cover important issues that are relevant to current debates including race, reentry, technology and crime, juvenile justice, and future directions for criminal justice.

Restriction: Must be enrolled at The Universities at Shady Grove; and must be in the Criminal Justice minor; or by permission of department; and must not be in the Criminology and Criminal Justice major.

CCJS310 Criminal Investigations (3 Credits)

An introduction to modern methods used in detection, investigation, and solution of crime. Students will be taught basic and advanced investigative techniques utilized by law enforcement agencies. Analysis of actual cases will be used to demonstrate practical uses of these techniques.

Prerequisite: CCJS100 and CCJS230.

CCJS315 Ethics in Criminal Justice (3 Credits)

Introduces the study of ethics and ethical decision making as it is applied to the criminal justice system. Students will be introduced to consequential philosophers and their work, and will discuss those theories in terms of how decision making is applied in policing, courts, corrections, the juvenile system, victim services, and the medical system. There will be a special discussion of how ethical decision making intersects with racism, classism, and sexism in criminal justice. Students will be able to assess the intersections of race, gender, age, sexual orientation, ethnicity, and class and the way those identities impact ethical decision making of acts.

Prerequisite: CCJS100.

Credit Only Granted for: CCJS315 or CCJS498L.

Formerly: CCJS498L.

CCJS318 Special Topics in Criminology & Criminal Justice (3 Credits)

Special topics in various aspects of the field of criminology and criminal justice will be covered.

Repeatable to: 15 credits if content differs.

CCJS320 Introduction to Criminalistics (3 Credits)

An introduction to modern methods used in the detection, investigation and solution of crimes. Practical analysis of evidence in a crime laboratory, including fingerprints and other impressions, firearms ID and ballistics, hairs and fibers, document examination, and use of polygraph.

Prerequisite: CCJS100 and CCJS230.

CCJS325 Slavery in the Twenty First Century: Combating Human Trafficking (3 Credits)

What is human trafficking and how do we stop it? An introduction to the trafficking of human beings in its historical, legal, economic, political and social contexts. Scope of the global problem, different forms of human trafficking, and regional trends and practices. Roles of government, the international community and individual actors. Strategies to combat trafficking.

CCJS330 Contemporary Criminological Issues (3 Credits)

Topics may include career criminals, prison overcrowding, prediction, ecological studies of crimes, family and delinquency, entrepreneurship in criminal justice and criminology, and similar criminological problems.

Prerequisite: CCJS100 and CCJS105.

CCJS331 Contemporary Legal Policy Issues (3 Credits)

In-depth examination of selected topics. Criminal responsibility. Socio-legal policy alternatives with regard to deviance. Law enforcement procedures for civil law and similar legal problems. Admissibility of evidence. Representation. Indigent's right to counsel.

Prerequisite: CCJS100 and CCJS230.

CCJS332 Major Transitions: From Undergraduate to Professional (1 Credit)

This course is designed to assist criminology and criminal justice students explore career opportunities. Topics will include: graduate school, law school, career opportunities in federal, state, local, and public agencies, resume writing, and internships.

Restriction: Must be in Criminology and Criminal Justice program; and sophomore standing or higher.

CCJS333 Navigating Your Future: Transforming Your Degree into your Career (3 Credits)

Assists Criminology and Criminal Justice students in exploring and preparing for entering graduate school and/or the professional work world. Academic success and professional development in the criminal justice field will be emphasized. Specific topics covered in the course include graduate school options, the benefits of a social science degree, and careers in private industry, nonprofit organizations, and federal, state, and local agencies. Will also focus on job preparation skills including writing a resume, creating a cover letter, and preparing for an interview.

Restriction: Must be in the Criminology and Criminal Justice major (22091 and 2209L); or must be in the and Criminal Justice minor (#BS14) with 30 or more credits.

Credit Only Granted for: CCJS333 or CCJS498Q.

Formerly: CCJS498Q.

CCJS340 Policing (3 Credits)

Critical issues relating to policing. Topics include police discretion, role of police, use of force, misconduct, police research, administration, personnel, and etc.

Prerequisite: CCJS100.

CCJS342 Corrections (3 Credits)

Examination of the American correctional system. Identification of historical and contemporary themes, issues, and trends. Evaluation of correctional policies, practices and research.

Prerequisite: CCJS100.

Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.

Credit Only Granted for: CCJS342 or CCJS452.

CCJS345 Courts and Sentencing (3 Credits)

Contemporary issues in the American court system such as prosecution, sentencing and punishment. Theoretical perspectives on courtroom decision-making integrated with empirical research. Courts and sentencing processes, including initial charging, pretrial detention and final sentencing outcomes. Innovations in courts and sentencing.

Prerequisite: CCJS100.

Restriction: Must be in a major within the BSOS-Criminology & Criminal Justice department.

CCJS346 Domestic Violence (3 Credits)

A thorough and critical examination of family violence. Topics include the historical background to family violence, methods of studying this serious issue, elder abuse, child abuse, the cultural factors involved in intimate partner violence, violence in same-sex relationships, and the criminal justice response to family violence. Although the course focuses on the American family, illustrations from other cultures are provided.

Prerequisite: CCJS100.

Credit Only Granted for: CCJS346 or CCJS498Y.

Formerly: CCJS498Y.

CCJS352 Drugs and Crime (3 Credits)

An analysis of the role of criminal justice in the control of drug use and abuse.

Prerequisite: CCJS100.

CCJS358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS359 Field Training in Criminology and Corrections (1-6 Credits)

Supervised field training in public or private social agencies. Group meetings, individual conferences and written program reports.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

Repeatable to: 6 credits.

CCJS360 Victimology (3 Credits)

Overview of the history and theory of victimology. Analysis of victimization patterns with special emphasis on types of victims and crimes. The interaction between victims of crime and the criminal justice system with respect to the role of the victim and the services offered to the victim.

Prerequisite: CCJS105.

CCJS370 Race, Crime and Criminal Justice (3 Credits)

Role and treatment of racial/ethnic minorities in the criminal justice system. Course will provide students with historical and theoretical framework for understanding this dynamic.

CCJS386 Experiential Learning (3-6 Credits)

Restriction: Permission of BSOS-Criminology & Criminal Justice department; and junior standing or higher.

CCJS388 Independent Reading Course in Criminology and Criminal Justice (3 Credits)

Designed for the needs of honor students in criminology and criminal justice.

Prerequisite: CCJS100 and CCJS105.

Restriction: Must be in the Honors program.

CCJS389 Independent Research in Criminology and Criminal Justice (1-6 Credits)

Independent Research for CCJS Departmental Honors students.

Prerequisite: CCJS105.

Restriction: Must be in CCJS Honors Program.

Repeatable to: 6 credits if content differs.

CCJS398 Law Enforcement Field Training (1-6 Credits)

Supervised, structured and focused field training in law enforcement agencies.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

Repeatable to: 6 credits.

CCJS399 Independent Study in Criminology and Criminal Justice (1-3 Credits)

Integrated reading or research under direction and supervision of a faculty member.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

Repeatable to: 6 credits.

CCJS405 Gangs (3 Credits)

Provides students with a historical and contemporary examination of street and institutional gangs. We will address the nature and definition of gangs, types of gangs, and diversity of membership of gangs, theoretical explanations, and criminal and deviant behavior. In addition, we will analyze law enforcement responses, intervention and prevention strategies, and public policy issues.

Prerequisite: CCJS100 and CCJS105.

Credit Only Granted for: CCJS405 or CCJS498G.

Formerly: CCJS498G.

CCJS418 Seminar in Criminology and Criminal Justice (3 Credits)

Selected topics of interest in the field of Criminology and Criminal Justice will be covered.

Repeatable to: 18 credits if content differs.

CCJS428 Special Topics in Criminology and Criminal Justice (3 Credits)

Topics in various aspects of the field of criminology and criminal justice will be covered.

Repeatable to: 18 credits if content differs.

CCJS440 Security Administration (3 Credits)

Designed to introduce students to the complex issues of Security Administration and the critical terrorism issues facing the nation. Emphasis is placed on understanding the historical and contemporary issues effecting U.S. Counterterrorism Policy. It also explores the challenges facing today's security administrators including: ethics, classified information, intelligence, terrorist organizations and incidents, physical and personnel security, transportation and border security issues.

Prerequisite: CCJS100 and CCJS340.

Credit Only Granted for: CCJS440 or CCJS498Z.

Formerly: CCJS498Z.

CCJS444 Advanced Law Enforcement Administration (3 Credits)

The structuring of manpower, material, and systems to accomplish the major goals of social control. Personnel and systems management. Political controls and limitations on authority and jurisdiction.

Prerequisite: CCJS100 and CCJS340.

CCJS450 Advanced Juvenile Delinquency (3 Credits)

Examination of juvenile delinquency in the United States. Nature and extent of juvenile delinquency, historical approaches, sociological and criminological theories and research, social contexts including the institutions of families, schools, and peers, and social responses. Prevention, punishment, and treatment programs, both within and outside of the juvenile justice and criminal justice systems.

Prerequisite: CCJS105 and CCJS300.

Credit Only Granted for: CCJS350 or CCJS450.

CCJS451 Crime and Delinquency Prevention (3 Credits)

Methods and programs in prevention of crime and delinquency.

Prerequisite: CCJS105 and CCJS300.

CCJS453 White Collar and Organized Crime (3 Credits)

Definition, detection, prosecution, sentencing and impact of white collar and organized crime. Special consideration given to the role of federal law and enforcement practices.

Prerequisite: CCJS300; and (CCJS350 or CCJS105).

CCJS454 Contemporary Criminological Theory (3 Credits)

Examination of the main theoretical accounts that explain the underlying causes of criminal behaviors. Explore how individual choices, socialization experiences, biological factors and social structure affect criminal behaviors.

Prerequisite: CCJS300 and CCJS105.

CCJS455 Dynamics of Planned Change in Criminal Justice I (3 Credits)

An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on the development of innovative ideas using a research and development approach to change.

Prerequisite: CCJS300.

Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS458 Special Topics in Study Abroad IV (3 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CCJS460 Victim Advocacy (3 Credits)

Introduces the practice of victim advocacy as a profession. Students will develop an understanding of the impact of crime on the victim, and how crime impacts the path of the victim through the criminal justice and other administrative processes. A special emphasis of the course will be on introducing the students to different contexts of victim advocacy, e.g. system-based, campus-based, military-based, and community-based, as well as special topics impacting the profession of victim advocacy, e.g. grief, death notification, child protection, violence intervention, and trauma therapy. Students will also develop an understanding about how race, gender, age, sexual orientation, and ethnicity impact the way in which victims are offered and receive advocacy in different systems.

Prerequisite: CCJS100.

Recommended: CCJS360.

Credit Only Granted for: CCJS460 or CCJS498T.

Formerly: CCJS498T.

CCJS461 Psychology of Criminal Behavior (3 Credits)

Biological, environmental, and personality factors which influence criminal behaviors. Biophysiology and crime, stress and crime, maladjustment patterns, psychoses, personality disorders, aggression and violent crime, sex-motivated crime and sexual deviations, alcohol and drug abuse, and criminal behavior.

Prerequisite: CCJS105 and CCJS300.

CCJS489 Honors Thesis Research (3 Credits)

Designed for students completing their honors thesis.

Prerequisite: CCJS100 and CCJS105.

Restriction: Limited to CCJS Departmental Honors students.

Repeatable to: 6 credits.

CCJS498 Selected Topics in Criminology and Criminal Justice (3 Credits)

Topics of special interest to advanced undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest.

Repeatable to: 6 credits if content differs.

CHBE - Chemical and Biomolecular Engineering

CHBE100 Exploring ChBE (1 Credit)

Overview of the specializations and career paths available in chemical and biomolecular engineering. Academic planning, policies and resources will be covered including introduction to undergraduate research, study abroad, internship and co-op opportunities as well as chemical engineering student groups. A peer mentoring program will enable students to interact with successful upper-class chemical engineering students and build their chemical engineering peer network.

Prerequisite: Permission of instructor; and permission of ENGR-Chemical & Biomolecular Engineering department.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

CHBE101 Introduction to Chemical and Biomolecular Engineering (3 Credits)

Introduction to methods of chemical engineering calculations and analysis. Stoichiometric relations, material and energy balances, and behavior of gases, vapors, liquids and solids. Analytical and computer methods.

Prerequisite: CHEM135; or students who have taken courses with comparable content may contact the department.

Corequisite: MATH141.

Restriction: Must be in Engineering: Chemical program; or permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE101 or ENCH215.

Formerly: ENCH215.

CHBE250 Computer Methods in Chemical Engineering (3 Credits)

Algorithm development and application of software to the analysis of chemical engineering problems. File management and editing, graphics and numerical methods. Use of spreadsheets, statistics/math software and process simulators for the design of chemical process equipment.

Prerequisite: CHBE101; and must have completed or be concurrently enrolled in MATH241.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE250 or ENCH250.

Formerly: ENCH250.

CHBE301 Chemical and Biomolecular Engineering Thermodynamics I (3 Credits)

Principles of thermodynamics and their application to engineering problems. First and second laws of thermodynamics, properties of gases, liquids and solids, phase equilibrium, flow and non-flow systems, energy conversion, production of work from heat, thermodynamic analysis of processes, equilibrium stage operations and the thermodynamics of chemically reacting systems.

Prerequisite: CHBE101; and must have completed or be concurrently enrolled in CHBE250 and MATH241.

Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH300 or CHBE301.

Formerly: ENCH300.

CHBE302 Chemical and Biomolecular Engineering Thermodynamics II (3 Credits)

Contemporary trends in chemical engineering thermodynamics that bridge the gap between fundamentals and applications. Thermodynamic analysis of non-ideal and structured systems; such as complex fluids, strongly fluctuating and nanoscale systems, dissipative systems, biosystems, and systems under extreme conditions.

Prerequisite: CHBE301.

Corequisite: CHBE250.

Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE302 or ENCH400.

Formerly: ENCH400.

CHBE333 Chemical Engineering Seminar (1 Credit)

To develop oral communication skills through a series of class presentations of current chemical engineering topics.

Restriction: Junior standing; and must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE333 or ENCH333.

Formerly: ENCH333.

CHBE369 Teaching Experiences in Chemical Engineering (1-2 Credits)

Students will obtain pedagogical experience by assisting with the teaching of undergraduate courses in Chemical and Biomolecular Engineering.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Repeatable to: 8 credits.

CHBE409 Undergraduate Honors Seminar (1 Credit)

Students will attend and write summaries of departmental seminars, along with professional development activities

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and Permission of ENGR-Chemical & Biomolecular Engineering department; and Must be in the Chemical Engineering Honors Program.

Repeatable to: 2 credits.

CHBE410 Statistics and Design of Experiments (3 Credits)

An introduction to probability, statistics, and design of experiments for chemical engineers.

Prerequisite: Minimum grade of C- in CHBE250, MATH241, and MATH246.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE410 or ENCH476.

Formerly: ENCH476.

CHBE422 Chemical and Biomolecular Engineering Transport Phenomena I (3 Credits)

Principals of fluid dynamics as applied to model development and process design. Mass, momentum and energy conservation. Statics and surface tension. Equation of Continuity and Navier-Stokes Equation with application to laminar flow. Dimensional analysis. Macroscopic balances, Bernoulli Equation and friction factors with application to turbulent flow.

Prerequisite: Minimum grade of C- in CHBE101, CHBE250, MATH241, and MATH246.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE422 or ENCH422.

Formerly: ENCH422.

CHBE424 Chemical and Biomolecular Engineering Transport Phenomena II (3 Credits)

Principles of mass and heat transfer as applied to model development and process design. Species continuity equation with application to diffusion, and convection in laminar flow. Macroscopic balances and mass transfer coefficients with application to turbulent flow. Microscopic equation of energy with application to heat conduction, and convection in laminar flow. Macroscopic energy balance and heat transfer coefficients with application to turbulent flow. Heat exchanger design.

Prerequisite: CHBE422.

Corequisite: CHBE302.

Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE424 or ENCH424.

Formerly: ENCH424.

CHBE426 Chemical and Biomolecular Separation Processes (3 Credits)

Separation by stages operations. Rate dependent separation processes. Design application in distillation, gas absorption, liquid extraction, drying, adsorption and ion exchange.

Corequisite: CHBE302; and CHBE424.

Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE426 or ENCH426.

Formerly: ENCH426.

CHBE437 Chemical and Biomolecular Engineering Laboratory (3 Credits)

Application of chemical engineering process and unit operation principals in small-scale semi-commercial equipment. Data from experimental observations are used to evaluate performance and efficiency of operations. Emphasis on correct presentation of results in report form.

Prerequisite: CHBE424, CHBE426, and CHBE440.

Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE437 or ENCH437.

Formerly: ENCH437.

CHBE440 Chemical Kinetics and Reactor Design (3 Credits)

Fundamentals of chemical reaction kinetics and their application to the design and operation of chemical reactors. Reaction rate theory, homogeneous reactions and catalysis electrochemical reactions. Catalytic reactor design.

Prerequisite: Minimum grade of C- in CHBE301, MATH241, and MATH246.

Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE440 or ENCH440.

Formerly: ENCH440.

CHBE442 Chemical and Biomolecular Systems Analysis (3 Credits)

Dynamic response applied to process systems. Goals and modes of control, Laplace transformations, analysis and synthesis of simple control systems, closed loop response, dynamic testing.

Prerequisite: CHBE424 and CHBE426.

Credit Only Granted for: CHBE442 or ENCH442.

Formerly: ENCH442.

CHBE444 Process Engineering Economics and Design I (3 Credits)

Principles of chemical engineering economics and process design. Equipment sizing and costing. Economic evaluation of projects. Flowsheet synthesis. Introduction to flowsheet simulators and concepts of flowsheet optimization. Synthesis of Heat Exchanger Networks and Distillation Sequences.

Prerequisite: CHBE424, CHBE426, and CHBE440.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE444 or ENCH444.

Formerly: ENCH444.

CHBE446 Process Engineering Economics and Design II (3 Credits)

Application of chemical engineering principles for the design of chemical processing equipment. Representative problems in the design of chemical plants will be the focus of this capstone design class. Comprehensive reports are required.

Prerequisite: CHBE442 and CHBE444.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE446 or ENCH446.

Formerly: ENCH446.

CHBE451 Photovoltaics: Solar Energy (3 Credits)

The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.

Jointly offered with: CHBE651.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468L, CHBE451 or CHBE651.

Formerly: ENCH468L.

CHBE452 Introduction of Machine Learning in Chemical Engineering (3 Credits)

Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.

Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.

Jointly offered with: CHBE652.

Restriction: Permission of Department or Instructor.

Credit Only Granted for: CHBE452 or CHBE652.

CHBE453 Applied Mathematics and Distributive Parameter Systems (3 Credits)

Mathematical techniques applied to the analysis and solution of chemical engineering problems. Use of differentiation, integration, differential equations, partial differential equations and integral transforms. Application of infinite series, numerical and statistical methods.

Credit Only Granted for: CHBE453 or ENCH453.

Formerly: ENCH453.

CHBE454 Chemical Process Analysis and Optimization (3 Credits)

Application of mathematical models to the analysis and optimization of chemical processes. Models based on transport, chemical kinetics and other chemical engineering principles will be employed.

Credit Only Granted for: CHBE454 or ENCH454.

Formerly: ENCH454.

CHBE455 Model Predictive Control (3 Credits)

Empirical model identification from process data. Step and impulse response models. Linearization of nonlinear first principles models. Single variable Model Predictive Control. Robustness with respect to modeling error. MPC based tuning of PID controllers. Feedforward control. Multi-input multi-output processes. Multi-loop decentralized control. Centralized multivariable Model Predictive Control via on-line optimization.

Credit Only Granted for: CHBE455 or ENCH455.

Formerly: ENCH455.

CHBE457 Design and Processing of Polymers for Biomedical Devices (3 Credits)

Provides a foundation for understanding the use of various materials in medical applications. We will discuss design principles, based on biological context for drug delivery, diagnosis of disease, imaging applications, tissue engineering, among other relevant topics. The course will cover nanomedicine approaches (lipids, polymers, gold nanoparticles, carbon nanotubes, etc.), as well as scaffolds for tissue engineering and regenerative medicine. We will discuss advantages, challenges, and recent advances in the field. The course will highlight the importance of rational engineering when designing products to be used to treat and diagnose disease.

Prerequisite: MATH246; and CHEM231; and (CHBE301, ENMA461, or BIOE232).

Recommended: Knowledge of basic fluid dynamics: CHBE422/BIOE331 or equivalent.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

CHBE468 Research (1-3 Credits)

Investigation of a research project under the direction of a faculty member. Comprehensive reports are required.

Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.

Repeatable to: 6 credits.

Formerly: ENCH468.

CHBE469 Special Projects (1-3 Credits)

Special project under the direction of a faculty member. Comprehensive reports are required.

Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.

Repeatable to: 6 credits if content differs.

CHBE470 Colloid and Interface Science (3 Credits)

Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.

Prerequisite: CHBE424 and CHBE426.

Jointly offered with: CHBE670.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.

CHBE471 Particle Science and Technology (3 Credits)

Particles are everywhere. We breathe them, eat them, and use them to make many non-particulate materials. Knowledge of particle science and technology is important for manufacturing, for occupational health and safety, as well as environmental considerations. In this multidisciplinary course, the focus will be on the study of science and technology relevant to multiphase systems consisting of solid and/or liquid particles surrounded by a gas. These topics fall loosely under the headings of powder and aerosol technology. Team design projects will be an integral component.

Prerequisite: Knowledge of undergraduate engineering thermodynamics, and transport phenomena; knowledge of numerical methods for solving systems of ordinary differential equations.

Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE471 or ENCH471.

Formerly: ENCH471.

CHBE472 Control of Air Pollution Sources (3 Credits)

Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.

Jointly offered with: CHBE672.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE472, CHBE672 or ENCH672.

CHBE473 Advanced Batteries and Fuel Cells (3 Credits)

The lecture will start from the basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.

Jointly offered with: CHBE673.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE473 or CHBE673.

CHBE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)

Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.

Prerequisite: BIOE120; and permission of instructor.

Jointly offered with: CHBE674.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.

CHBE475 Ethics in Science and Engineering (3 Credits)

Ethical issues in science and engineering and their resolutions are examined. The main topics will be ethics and scientific truth (including issues of proper data analysis, proper data presentation, and record-keeping), ethics and other scientists and engineers (including issues of attribution, confidentiality, conflicts of interest, mentoring, and inclusion of under-represented groups), ethics and the practice of engineering (including responsibilities of engineers to clients, ecological issues, and conflicts of interest), and ethics and society (including funding priorities, moral issues, and human and animal subjects). Class meetings will be organized around discussions, case studies, and student reports. The course is aimed at postdoctoral students, graduate students and advanced undergraduate students who wish to ponder the important contemporary questions about the ethics of how science and engineering get done.

Credit Only Granted for: CHBE475 or ENCH475.

Formerly: ENCH475.

CHBE476 Molecular Modeling Methods (3 Credits)

Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.

Jointly offered with: CHBE476.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648P, CHBE476 or CHBE676.

Formerly: ENCH468P.

CHBE477 Mesoscopic and Nanoscale Thermodynamics (3 Credits)

Interdisciplinary course primarily for graduate and senior undergraduate students from engineering or science departments. New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artificial organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.

Prerequisite: A prior course in classical thermodynamics.

Jointly offered with: CHBE477.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE477, ENCH468Q or CHBE677.

Formerly: ENCH468Q.

CHBE480 Bionanotechnology: Physical Principles (3 Credits)

Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important for biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer structures useful in medicine. Targeted delivery of drugs, genes by nano/micro structures. Cellular assembly in the eye, in insect wings. Cellular assembly at surfaces: gecko feet, duck feathers. Cellular assembly in the presence of crystals: biomineralization.

Prerequisite: BIOE120; or students who have taken courses with comparable content may contact the department.

Jointly offered with: CHBE680.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.

CHBE481 Transport Phenomena in Small and Biological Systems (3 Credits)

Interdisciplinary course primarily for senior undergraduate and graduate students from engineering or science departments. The course's main goal is to make the students familiar with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.

Jointly offered with: CHBE681.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468W, CHBE481 or CHBE681.

Formerly: ENCH468W.

Additional Information: Adding graduate course to jointly offered and credit only granted for fields.

CHBE483 Bioseparations (3 Credits)

Engineering fundamentals of separations and purification of biological molecules. Case studies and examples illustrate principles and practice of centrifugation, precipitation, crystallization, filtration, membrane separations, chromatography, and affinity separation of recombinant proteins and other biomolecules. Process scale-up and economics of biotechnology products and processes.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH483 or CHBE483.

Formerly: ENCH483.

CHBE484 Metabolic Pathway Engineering (3 Credits)

The state-of-the-art in metabolic engineering, with a focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: (1) overview of biochemistry and metabolism; (2) metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; (3) technologies for engineering metabolic pathways; (4) metabolic control analysis and pathway regulation; (5) applications of metabolic engineering to synthesis of biofuels and therapeutics; (6) specialized and related subjects such as protein engineering and synthetic biology.

Prerequisite: CHBE101 and CHBE440.

Jointly offered with: CHBE684.

Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: ENCH468M, CHBE484 or CHBE684.

Formerly: ENCH468M.

CHBE485 Biochemical Engineering Laboratory (3 Credits)

Techniques of measuring pertinent parameters in fermentation reactors, quantification of production variables for primary and secondary metabolites such as enzymes and antibiotics, the insolubilization of enzymes for reactors, and the demonstration of separation techniques such as ultrafiltration and affinity chromatography.

Credit Only Granted for: CHBE485 or ENCH485.

Formerly: ENCH485.

CHBE486 Heterogeneous Catalysis for Energy Applications (3 Credits)

Introduction to heterogeneous catalytic science and technology for energy conversion and hydrocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogeneous reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO₂ utilization will be introduced.

Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: CHBE486, CHBE686 or ENCH686.

CHBE487 Tissue Engineering (3 Credits)

A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.

Prerequisite: Must have completed at least one biology course; and MATH241.

Recommended: BSCI330 and BIOE340.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.

Credit Only Granted for: BIOE411, CHBE487, or ENCH468T.

Formerly: ENCH468T.

CHBE490 Polymer Science (3 Credits)

The elements of the polymer chemistry and industrial polymerization, polymer structures and physics, thermodynamics of polymer solutions, polymer processing methods, and engineering applications of polymers.

Credit Only Granted for: CHBE490, ENCH490, or ENMA495.

Formerly: ENCH490.

CHBE491 Electrochemical Energy Engineering (3 Credits)

Introduces students to the fundamentals of electrochemical engineering, covering thermodynamics, kinetics, and transport in electrochemical cells, as well as electrode structures and electroanalytical techniques.

The course will next transition to focus on electrochemical devices, including batteries, fuel cells, and other devices as guided by student input. This course will serve as a foundation for students who are interested in becoming practicing electrochemical engineers, those who would like to pursue research careers, and those who wish to become familiar with a specialized area within engineering that will have a crucial and growing importance during their careers.

Prerequisite: CHBE302, CHBE440, and CHBE422.

Jointly offered with: CHBE691.

Restriction: Permission of ENGR - Chemical & Biomolecular Engineering Department.

Credit Only Granted for: CHBE691 or CHBE491.

CHBE493 Chemical Processes in Beer Brewing (3 Credits)

Covers chemical engineering principles and chemical processes involved in the brewing and quality control of beer. Topics will include extraction and isomerization of bittering compounds from hops, enzymatic reactions involved in mashing beer, colloidal chemistry of haze formation, and microbiology of yeast and fermentation. Quantitative models will be applied to these processes based on fundamental chemical engineering principles from reaction kinetics, thermodynamics, transport phenomena, and colloid and interfacial science.

Prerequisite: Minimum grade of C- in CHBE424 and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE493 or CHBE693.

Additional Information: Neither the students nor the instructor will be making or working with alcoholic beverages in the course.

CHBE494 Sustainable Separations and Carbon Capture (3 Credits)

Provides a comprehensive overview of sustainable separations and carbon dioxide capture using synthetic membranes and sorbents.

Prerequisite: Minimum grade of C- in CHBE424, CHBE426 and CHBE440; and permission of instructor.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and must have permission of ENGR- & Biomolecular Engineering department.

Credit Only Granted for: CHBE494 or CHBE694.

CHBE495 Nanoparticle Aerosol Dynamics and Particle Technology (3 Credits)

NanoParticles (NA) (< 100 nm), and their science and technology play an important role in nature and industry. From air quality standards, nuclear reactor safety, inhalation therapy, workplace exposure, global climate change, to counterterrorism, aerosols play a central role in our environment. On the industrial side, NA plays an integral part of reinforcing fillers, pigments and catalysts, and the new emerging field of nanotechnology, they are the building blocks to new materials, which encompass, electronic, photonic and magnetic devices, and bio and chemical sensors.

Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE496 Polymeric Materials: Structure, Property, and Processing (3 Credits)

An intermediate level treatment of structures of polymers. An introduction to mechanical properties and processing of polymeric materials. Emphasis will be on how to establish the structure-property relationship and on how to achieve such understanding via different characterization methods.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Cross-listed with: ENMA496.

Credit Only Granted for: ENMA496 or CHBE496.

CHBE497 Protein Engineering (3 Credits)

This course will cover the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.

Prerequisite: BIOE120, CHBE302, and CHBE440; and permission of instructor.

Jointly offered with: CHBE697.

Credit Only Granted for: CHBE497, BIOE489R, ENCH 648P or CHBE697.

CHSE - Counseling, Higher Education, and Special Education

CHSE200 College Success and Life Planning - Managing College and Career Life through Goal Development and Planning (3 Credits)

The overarching goal of this course is to guide new students affiliated with the TerpsEXCEED program in navigating the initial stages of college, career and campus life management. The course is organized around Academic and Career Habits, Cultural Know-How, Balance of Multiple Roles, and Self-Direction in order to address (a) skills and interest assessments, (b) goal setting, (c) organizational and independent living skills development, (d) travel and transportation orientation to navigate and access campus and College Park, (e) financial planning, (f) safety, (g) social activity access, and (h) basic scheduling and time management. TerpsEXCEED students will be matched with typical student peer supports for a more normalized college experience.

Restriction: Must be in the TerpsEXCEED Program; and permission from TerpsEXCEED Director.

Additional Information: Priority enrollment for students in the TerpsEXCEED program.

CHSE205 Disability: From Stigma and Sideshow to Mainstream and Main Street (3 Credits)

Explores the cultural, historical, educational, and medical roots of difference among human beings and examines the impact of cultural and technological changes on individuals traditionally identified as disabled. The course is designed to develop a broad understanding of the concept of "disability" and the emerging technologies that shape contemporary understanding of this phenomenon and the lives of those considered disabled.

Credit Only Granted for: EDSP289I or CHSE205.

Formerly: EDSP289I.

CHSE228 Common Ground Deliberative Dialogues (1 Credit)

Students will explore current societal issues through an intergroup, deliberative dialogue model. The course includes foundations of dialogue, identity reflection, peer leadership, engagement across differences, and dialogic skill-building.

Repeatable to: 2 credits if content differs.

Credit Only Granted for: CHSE228 or CHSE328.

Formerly: CHSE328.

CHSE230 Career Exploration and Development (3 Credits)

This course prepares TerpsEXCEED students for on-the-job internship experiences in future semesters by guiding them through career exploration, discovery, and skill development. Students will complete career assessments, develop resumes, practice interviews, engage employers, learn how to fill out applications, practice technical and soft skills to improve employability, and secure internship options for the next semester.

Restriction: Must be in the TerpsEXCEED program; and permission from the College of Education Student Services office.

CHSE338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)

Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on identity-based topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.

Prerequisite: Completion of on-line enrollment form.

Cross-listed with: ENES338.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: CHSE338, EDHI338, ENES338 or WEID139.

Formerly: CHSE338.

CHSE376 Fundamentals of Sign Language (3 Credits)

Receptive and expressive skills in American Sign Language. Examination of the causes of deafness, characteristics of deaf education, and aspects of the culture of the deaf community.

Credit Only Granted for: EDSP376 or CHSE376.

Formerly: EDSP376.

CHSE377 Communicating with Sign Language Lab (1 Credit)

Interactive and supportive learning environment to refine ASL skills, receive feedback from instructors and peers, and deepen understanding of ASL linguistics and culture through experiential learning.

Corequisite: CHSE376 .

CHSE389 Independent Study (3 Credits)

Customized project based on an individual topic area within Counseling, Higher Education and Special Education

Recommended: Has completed at least one full semester; CHSE200.

Restriction: Permission from the Counseling, Higher Education, and Special Education Department.

Repeatable to: 9 credits.

Formerly: CHSE398.

CHSE476 Communicating with Sign Language (3 Credits)

Intermediate level receptive/expressive skills in American Sign Language. Aspects of the culture, history, and research perspectives of the deaf community.

Prerequisite: EDSP376 or CHSE376.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP476 or CHSE476.

Formerly: EDSP476.

CHSE489 Internship - Terps Exceed (3 Credits)

Builds on students' individual career exploration process, which determines what types of internships students participate in. It is a fully experiential course that requires on-the-job experiences related to career interests and course of study; an additional semester can involve expansion of a position with new learning tasks or a new position. Students are graded on self-reflections, employer feedback, instructor observations and a final project demonstrating newly gained on-the-job knowledge and an updated career plan.

Recommended: CHSE230, CHSE388; or other career development course .

Restriction: Permission of Counseling, Higher Education, and Special Education Department.

Repeatable to: 6 credits.

CHEM - Chemistry

CHEM131 Chemistry I - Fundamentals of General Chemistry (3 Credits)

An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM131 is the first course in a four-semester sequence for students majoring in the sciences, other than Chemistry and Biochemistry majors.

Prerequisite: Must have math eligibility of MATH120 or higher.

Corequisite: CHEM132.

Recommended: For Science majors.

Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM153 or CHEM146.

Formerly: CHEM103.

CHEM132 General Chemistry I Laboratory (1 Credit)

Introduction to the quantification of chemical substances, including the concept of the mole and chemical stoichiometry. Additional work involves the synthesis of ionic substances and their qualitative characterization. Must be taken concurrently with CHEM131.

Prerequisite: Must have math eligibility of MATH120 or higher.

Corequisite: CHEM131.

Credit Only Granted for: CHEM103, CHEM132, CHEM136, CHEM143, CHEM147 or CHEM177.

Formerly: CHEM103.

CHEM134 Chemical Principles for Engineering (1 Credit)

Basic chemistry for engineering students. Introduction to organic structures and polymers, gas laws, liquids, solids, phase changes, chemical kinetics and electrochemistry.

Prerequisite: Minimum grade of C- in CHEM131; or minimum grade of C- in CHEM146.

Credit Only Granted for: CHEM 134 or CHEM 135.

CHEM135 General Chemistry for Engineers (3 Credits)

The nature and composition of matter, solutions, chemical reactions, equilibria, and electrochemistry, with applications to various fields of engineering.

Prerequisite: Must have math eligibility of MATH120 or higher.

Credit Only Granted for: CHEM103, CHEM113, CHEM131, CHEM135, or CHEM146.

CHEM136 General Chemistry Laboratory for Engineers (1 Credit)

A laboratory course for engineering majors intending to take CHEM231 and CHEM232.

Prerequisite: Must have completed or be concurrently enrolled in CHEM135 and must have math eligibility of MATH120 or higher.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

CHEM146 Principles of General Chemistry (3 Credits)

An overview of the Periodic Table, inorganic substances, ionic and covalent bonding, bulk properties of materials, chemical equilibrium, and quantitative chemistry. CHEM146 is the first course in a four-semester sequence for Chemistry and Biochemistry majors.

Prerequisite: Must have math eligibility of MATH140 or higher.

Corequisite: CHEM177.

Restriction: Must be in one of the following programs (Chemistry; Biochemistry).

Credit Only Granted for: CHEM103, CHEM131, CHEM135, CHEM143, or CHEM146.

Formerly: CHEM143.

CHEM177 Introduction to Laboratory Practices and Research in the Chemical Sciences (2 Credits)

First semester laboratory course required for CHEM and BCHM majors. Introduction to laboratory techniques, including safety practices, scientific ethics, and presentation of current research topics.

Prerequisite: Must have math eligibility of MATH120 or higher.

Corequisite: CHEM146, CHEM131, or CHEM135.

Restriction: Must be in a major within CMNS-Chemistry & Biochemistry department; or permission of CMNS-Chemistry & Biochemistry department.

Credit Only Granted for: CHEM132, CHEM136, CHEM147, or CHEM177.

CHEM231 Organic Chemistry I (3 Credits)

The chemistry of carbon: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters and spectroscopy.

Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, CHEM147, or CHEM177); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: CHEM232.

Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.

Formerly: CHEM233.

CHEM232 Organic Chemistry Laboratory I (1 Credit)

Provides experience in developing some basic laboratory techniques, recrystallization, distillation, extraction, chromatography.

Prerequisite: CHEM131 and CHEM132; or (CHEM135 and CHEM136); or (CHEM146 and CHEM147). And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: CHEM231.

Credit Only Granted for: CHEM104, CHEM231, CHEM233 or CHEM237.

Formerly: CHEM233.

CHEM237 Principles of Organic Chemistry I (4 Credits)

The chemistry of carbons: aliphatic compounds, aromatic compounds, stereochemistry, arenes, halides, alcohols, esters, and spectroscopy.

Prerequisite: CHEM131, CHEM135, or CHEM146; and (CHEM132, CHEM136, or CHEM147); and a grade of C- or better in the prerequisites is required of College of Computer, Mathematical, and Natural Sciences majors and recommended for all students. Or permission of CMNS-Chemistry & Biochemistry department.

Restriction: Must be in one of the following programs (Chemistry; Biochemistry); or must be in a major in ENGR-A. James Clark School of Engineering.

Credit Only Granted for: CHEM233, (CHEM231 and CHEM232), or CHEM237.

CHEM241 Organic Chemistry II (3 Credits)

A continuation of CHEM231 with emphasis on molecular structure; substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.

Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Credit Only Granted for: CHEM241, CHEM243 or CHEM247.

Formerly: CHEM243.

CHEM242 Organic Chemistry Laboratory II (1 Credit)

Synthetic organic chemistry through functional group manipulation, introduction to instrumentation essential to analysis and structure elucidation.

Prerequisite: CHEM231 and CHEM232; or CHEM237. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: CHEM241.

Credit Only Granted for: CHEM243 or CHEM247.

Formerly: CHEM243.

CHEM247 Principles of Organic Chemistry II (4 Credits)

A continuation of CHEM237 with emphasis on molecular structure, substitution reactions; carbonium ions; aromaticity; synthetic processes; macromolecules.

Prerequisite: Minimum grade of C- in CHEM237; or permission of CMNS-Chemistry & Biochemistry department.

Restriction: Must be in one of the following programs (Chemistry; Biochemistry); or must be an honors student.

Credit Only Granted for: CHEM243 or CHEM247.

CHEM271 General Chemistry and Energetics (2 Credits)

An introduction to the physical aspects of chemistry; chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.

Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: CHEM272.

Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.

Formerly: CHEM113.

CHEM272 General Bioanalytical Chemistry Laboratory (2 Credits)

An introduction to analytical chemistry with an emphasis on bio-analytical instrumentation and techniques.

Prerequisite: CHEM241 and CHEM242; or CHEM247. And a grade of C- or better in the prerequisites is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.

Corequisite: CHEM271.

Credit Only Granted for: CHEM227, CHEM272 or CHEM277.

CHEM276 General Chemistry and Energetics - Majors (2 Credits)

An introduction to the physical aspects of chemistry for Biochemistry and Chemistry majors. Chemical kinetics, thermodynamics and electrochemistry in the context of current chemistry research.

Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.

Corequisite: CHEM277.

Restriction: Must be in one of the following programs (Chemistry; Biochemistry).

Credit Only Granted for: CHEM113, CHEM153, CHEM271 or CHEM276.

Formerly: CHEM153.

CHEM277 Fundamentals of Analytical and Bioanalytical Chemistry Laboratory (3 Credits)

Quantitative analysis, inorganic analytical chemistry, and an introduction to bio-analytical instrumentation and techniques.

Prerequisite: Minimum grade of C- in CHEM241 and CHEM242; or minimum grade of C- in CHEM247.

Corequisite: CHEM276.

Restriction: Must be in one of the following programs (Chemistry; Biochemistry).

Credit Only Granted for: CHEM153, CHEM227, CHEM272 or CHEM277.

CHEM298 Special Topics in Chemistry (3 Credits)

Course topics to be determined by instructor.

CHEM316 Chemical Demonstrations and Outreach (1 Credit)

The purpose of this course is to provide students with the experience, skills, and knowledge of performing chemical demonstrations. The goal is to illustrate chemical principles using engaging and visually stimulating experiments. There will be an emphasis on safety and understanding the chemistry behind how each chemical demonstration works. In addition to learning experiments, students will be expected to perform an outreach project.

Prerequisite: (CHEM241 and CHEM242) or CHEM247; and (CHEM271 or CHEM276) and (CHEM272 or CHEM277).

Restriction: Permission of the Chemistry and Biochemistry Department.

CHEM386 Experiential Learning (3-6 Credits)

Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

CHEM389 Pedagogy and Instruction in Chemistry (1-2 Credits)

Methodologies, theory and educational tools applicable to the field of undergraduate chemistry education. Examples covered will use content from introductory general and organic chemistry courses.

Prerequisite: Permission of instructor; and minimum grade of B- in CHEM231; and must have completed or be concurrently enrolled in CHEM241.

Repeatable to: 6 credits.

CHEM395 Professional Issues in Chemistry and Biochemistry (1 Credit)

Seminar on professional issues. Professional responsibilities, ethics, interview techniques, career opportunities, graduate/professional school, race and gender issues.

Restriction: Junior standing or higher; and must be in one of the following programs (Chemistry; Biochemistry).

CHEM398 Special Projects (2 Credits)

Honors projects for undergraduate students.

CHEM399 Introduction to Chemical Research (1-3 Credits)

Basic (chemical) research conducted under the supervision of a faculty member.

Restriction: Junior standing or higher; and permission of CMNS-Chemistry & Biochemistry department.

Repeatable to: 6 credits.

CHEM401 Inorganic Chemistry (3 Credits)

An overview of basic concepts of the electronic structure of the elements, chemical bonding and reactivity, from simple diatomic molecules to coordination compounds. These are viewed from simple (Lewis) to the most comprehensive molecular orbital theory. Symmetry and group theory are used throughout the course.

Prerequisite: CHEM276 or CHEM271; and (CHEM247 or CHEM241).

CHEM403 Radiochemistry (3 Credits)

Radioactive decay; introduction to properties of atomic nuclei; nuclear processes in cosmology; chemical, biomedical and environmental applications of radioactivity; nuclear processes as chemical tools; interaction of radiation with matter.

Prerequisite: Must have completed one year of college chemistry and one year of college physics.

CHEM425 Instrumental Methods of Analysis (4 Credits)

Modern instrumentation in analytical chemistry. Electronics, spectroscopy, chromatography and electrochemistry.

Prerequisite: CHEM272 and CHEM271; or (CHEM276 and CHEM277).

CHEM433 Atmospheric Chemistry and Climate (3 Credits)

The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmospheric chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combustion of fossil fuels.

Prerequisite: CHEM131, CHEM135, or CHEM146. And MATH241; or permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Chemistry & Biochemistry department. Cross-listed with AOSC433.

Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

Formerly: CHEM434.

CHEM441 Advanced Organic Chemistry (3 Credits)

An advanced study of the compounds of carbon, with special emphasis on molecular orbital theory and organic reaction mechanisms.

Prerequisite: Must have completed or be concurrently enrolled in CHEM480 or CHEM481; and 1 course with a minimum grade of C- from (CHEM241, CHEM247).

Jointly offered with: CHEM641.

CHEM460 Structure Determination Using Spectroscopic Methods (3 Credits)

The use of infrared, ultraviolet-visible, proton and carbon-13 nuclear magnetic resonance and mass spectroscopy for structure determination in organic chemistry.

Prerequisite: Must have completed CHEM243; or CHEM247; or (CHEM241 and CHEM242).

Formerly: CHEM660.

CHEM471 Techniques in Pulse NMR (1 Credit)

NMR techniques to operate, adjust, and calibrate the spectrometers and acquire and process NMR data in one and two dimensional NMR applications.

Prerequisite: CHEM241 and CHEM242; or CHEM247.

Recommended: CHEM460.

Restriction: Senior standing or higher.

Additional Information: Persons with heart pacemakers and/or metal implants cannot take the course due to potential health hazards.

CHEM480 Principles of Physical Chemistry (3 Credits)

Covers elementary thermodynamics, principles of kinetics and catalysis and selected topics in molecular quantum mechanics, spectroscopy and statistical mechanics. Topics will emphasize core subjects along with applications to biosciences, materials science, environmental science and related areas.

Prerequisite: (CHEM276 or CHEM271); and (CHEM277 or CHEM272); and (MATH140 or MATH136); and (PHYS260 and PHYS261) or PHYS132.

Credit Only Granted for: CHEM480 or CHEM481; CHEM480, BCHM485 or CHEM482.

CHEM481 Physical Chemistry I (3 Credits)

Thermodynamics and kinetics of chemical and molecular systems. Topics may include internal energy, heat, work, enthalpy, entropy, free energy, and spontaneity as well as reaction order, differential rate laws, integrated rate laws, and rate laws for multi-step processes.

Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

Credit Only Granted for: CHEM481 or CHEM480.

CHEM482 Physical Chemistry II (3 Credits)

Quantum mechanical nature of atoms and molecules. Topics may include model systems for electronic, vibrational, rotational and translational energies as well as connections to molecular spectroscopy and thermal distributions.

Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

Credit Only Granted for: CHEM482, BCHM485 or CHEM480.

CHEM483 Physical Chemistry Laboratory I (2 Credits)

An introduction to the principles and application of quantitative techniques in physical chemical measurements. Experiments will be coordinated with topics in CHEM481.

Prerequisite: Must have completed or be concurrently enrolled in CHEM481.

CHEM484 Physical Chemistry Laboratory II (2 Credits)

Advanced quantitative techniques necessary in physical chemical measurements. Experiments will be coordinated with topics in CHEM482.

Prerequisite: Must have completed or be concurrently enrolled in CHEM482.

CHEM498 Special Topics in Chemistry (3 Credits)

Prerequisite: Prerequisite varies with the nature of the topic being considered.

CHIN - Chinese

CHIN100 Introduction to Chinese Language and Culture (3 Credits)

An introduction to the Chinese language and Chinese culture, covering the linguistic, ethnic, and religious diversity of China, and to explore the rich nuances of Chinese culture. The curriculum covers a wide range of topics, including the origins and evolution of Chinese characters, poetry, philosophy, calligraphy, and painting.

CHIN101 Intensive Elementary Chinese I (6 Credits)

Introduction to speaking, reading, and writing Chinese with an emphasis on mastering the essentials of pronunciation, basic characters and structural patterns.

Prerequisite: Must have attained appropriate World Language Placement Test (WLPT) score.

CHIN102 Elementary Spoken Chinese (3 Credits)

Continued study of grammatical patterns and vocabulary buildup with particular emphasis on conversation.

Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN103.

Additional Information: Must be taken in conjunction with CHIN103.

CHIN103 Elementary Written Chinese (3 Credits)

Continued study of grammatical patterns and buildup of vocabulary with particular emphasis on reading and writing.

Prerequisite: CHIN101; or students who have taken courses with comparable content may contact the department; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN102.

Additional Information: Must be taken in conjunction with CHIN102.

CHIN105 Elementary Chinese - Accelerated Track (3 Credits)

Accelerated instruction in Mandarin Chinese at the elementary level for students with prior Chinese language background, either through home use or formal instruction.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not have completed CHIN103, CHIN102, or CHIN101.

CHIN169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CHIN201 Intermediate Spoken Chinese I (3 Credits)

Emphasis on development of conversational skills with vocabulary build-up and controlled conversation.

Prerequisite: CHIN102; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN202.

Additional Information: Must be taken in conjunction with CHIN202.

CHIN202 Intermediate Written Chinese I (3 Credits)

Reading and writing skills with emphasis on grammar and Chinese characters.

Prerequisite: CHIN103; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN201.

Additional Information: Must be taken in conjunction with CHIN201.

CHIN203 Intermediate Spoken Chinese II (3 Credits)

Continuation of CHIN201.

Prerequisite: CHIN201; or students who have taken courses with comparable content may contact the department; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN204.

Additional Information: Must be taken in conjunction with CHIN204.

CHIN204 Intermediate Written Chinese II (3 Credits)

Continuation of CHIN202.

Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department; or must have attained appropriate World Language Placement Test (WLPT) score.

Corequisite: CHIN203.

Additional Information: Must be taken in conjunction with CHIN203.

CHIN205 Intermediate Chinese - Accelerated Track (3 Credits)

Accelerated instruction in Mandarin Chinese at the intermediate level for students with prior Chinese language background, either through home use or formal instruction.

Prerequisite: Must have attained appropriate World Language Placement Test (WLPT) score.

Restriction: Must not have completed CHIN201, CHIN203, CHIN202, or CHIN204.

CHIN215 Introduction to Chinese Philosophy (3 Credits)

How should one make moral choices? What is the best way to live a moral life? How should the state be organized to best encourage proper human behavior? And what happens if the state comes to be formed as an empire? What are the proper moral ways to respond? Questions such as these were at the heart of early Chinese philosophical debates (roughly fifth through first centuries BCE). This course will be study of how the early Chinese thinkers wrestled with these questions and what responses they gave. As we will quickly see, the views that arose in early China were among the most powerful and influential in human history. Regardless of whether one agrees with these views or not, they should be studied and taken seriously by anyone who cares about ethics and politics.

Additional Information: Course is taught in English. No previous knowledge of Chinese philosophy and history will be assumed and no prerequisites are required.

CHIN220 Beginning Chinese Calligraphy (3 Credits)

Introduction to techniques, history, and culture of Chinese calligraphy. Extensive hands-on practice. Taught in English.

CHIN269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CHIN301 Advanced Chinese I (3 Credits)

Readings in expository and fictional writing with conversation and composition.

Prerequisite: CHIN202; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN302 Advanced Chinese II (3 Credits)

Continuation of CHIN301.

Prerequisite: CHIN301; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN305 Life in China through TV Plays I (3 Credits)

Using authentic Chinese language material in short TV plays to learn about society and life in China.

Prerequisite: CHIN203 and CHIN204; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN306 Life in China through TV Plays II (3 Credits)

Continuation of CHIN305 using authentic Chinese language material in TV plays to learn about society and life in China.

Prerequisite: CHIN305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN307 Linguistic Landscape of China (3 Credits)

Comprehensive introduction to Chinese and other major languages in the Sino-Tibetan, Altaic, Austroasiatic, and Austronesian families, all of which are spoken in China. Taught in English.

Prerequisite: Must have completed CHIN204 or above; or permission of Chinese Program Advisor.

CHIN313 Chinese Poetry and Prose in Translation (3 Credits)

Writing of the major poets, essayists, and historians from the 10th century B.C. to the 12th century A.D. No knowledge of Chinese is required.

CHIN315 Modern Chinese Literature in Translation (3 Credits)

Major works of fiction and drama from 1920 to the present read in the context of social and literary change. Emphasis on western and traditional Chinese influences on the writers and their works. No knowledge of Chinese required.

CHIN331 Chinese Calligraphy: Theory and Practice (3 Credits)

History of the writing system; major scripts, modes, and styles. Intermediate brushwork and lectures on the culture. Characters for practice selected to correspond to lecture topics. Taught in English.

Prerequisite: CHIN220; or permission of instructor.

CHIN332 Chinese Culture through Traditional Chinese Arts (3 Credits)

Study of calligraphy, music, painting, and taichi coupled with critical readings of scholarly and literary texts. Facilitates an understanding of China and Chinese culture through traditional Chinese arts. Taught in English.

CHIN369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CHIN386 Experiential Learning (3-6 Credits)

Prerequisite: Must have learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

CHIN388 Topics in Chinese Literature in Translation (3 Credits)

Analysis of significant themes and structures in Chinese literature. No knowledge of Chinese required.

Repeatable to: 6 credits if content differs.

CHIN389 Language House Spring Colloquium (1 Credit)

For students residing in the Language House Immersion Program.

Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.

Restriction: Must be a resident of Language House.

Repeatable to: 8 credits.

CHIN401 Readings in Modern Chinese I (3 Credits)

Readings in history, politics, economics, sociology, and literature.

Emphasis on wide-ranging, rapid reading, reinforced by conversations and compositions.

Prerequisite: CHIN302; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN402 Readings in Modern Chinese II (3 Credits)

Continuation of CHIN401.

Prerequisite: CHIN401; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN403 Classical Chinese I (3 Credits)

Close readings and discussion of literary, philosophical and historical texts in the original language. The course situates texts in their historical context and also discusses differences between classical and modern Chinese.

Prerequisite: CHIN302 or CHIN306; or permission of instructor.

Additional Information: Texts in Chinese. Class discussion and course work mainly in English.

CHIN408 Selected Readings in Classical Chinese (3 Credits)

Selected readings in Classical Chinese, including important representative works of history, poetry, and parallel prose. Close attention is paid to matters of grammar and phonology in the readings. Content will differ each time this course is offered.

Prerequisite: CHIN321; and must have knowledge of Pinyin.

Repeatable to: 9 credits if content differs.

CHIN411 Business Chinese I (3 Credits)

Conversation, reading, and writing applicable to Chinese business transactions, social meetings, and meetings with government organizations, plus background material in English on professional business practices and social customs associated with business.

Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN415 Readings in Current Newspapers and Periodicals (3 Credits)

Reading of periodical literature on selected topics with discussions and essays in Chinese.

Prerequisite: CHIN402; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN418 Special Topics in Contemporary Chinese Fiction and Film (3 Credits)

Various approaches to the most recent textual productions of China and Taiwan. Taught in Chinese.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 12 credits if content differs.

CHIN425 Ethnic and Cultural Diversity in China (3 Credits)

This course looks into ethnic and cultural diversity in China. It examines the evolution of the People's Republic of China's (PRC) ethnic policies in relation to nation-state building over the last six decades. Specifically, it studies how the PRC has categorized the Chinese people into 56 ethnic groups, how it has made affirmative action policies to accommodate ethnic diversity, and what problems its approaches have experienced and what solutions it has proposed in its accommodation of ethnicity and diversity in the 21st century. To examine the above issues, the course introduces and applies the concepts of ethnicity, nationality, ethnic nationalism, civic nationalism, identity, social Darwinism, the Soviet model of multinational state building, the Chinese model of inclusive Chinese nation state building, citizenship, individual rights, group rights, equality, and diversity.

Recommended: Any CHIN course or course on China.

Credit Only Granted for: CHIN425 or CHIN429G.

Formerly: CHIN429G.

CHIN428 Selected Topics in Chinese Linguistics (3 Credits)

Undergraduate seminar in Chinese linguistics. Topics may include the ancient writing system, historical phonology, dialectology, prosody and rhyming, grammar and the history of the language as a whole. This course may be repeated with different content, and satisfies the linguistics requirement for the Chinese major. Students are expected to be in at least Third Year Chinese. Taught in English.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Sophomore standing or higher.

Repeatable to: 12 credits if content differs.

CHIN429 Selected Topics in Chinese Studies (3 Credits)

In-depth study of a particular aspect of Chinese cultural, linguistic, literary studies. Specific topic to be announced when course is offered. Taught in English.

Prerequisite: CHIN315.

Repeatable to: 6 credits if content differs.

CHIN441 Traditional Chinese Fiction (3 Credits)

Major works of fiction from the 4th century tales of the marvelous through the 19th century Qing novel. Readings are in classical Chinese and English. Designed for students with advanced language skills. Taught in English.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN443 Cultural Histories of Medicine in China (3 Credits)

Investigates medical knowledge through traditional Chinese approaches to the body and beliefs about healing, including acupuncture, herbal medicine, prayer, ritual and folk medicine. Taught in English.

Restriction: Permission of department, School of Languages, Literatures and Cultures.

CHIN499 Directed Study in Chinese (1-3 Credits)

Readings in Chinese under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

CINE - Cinema and Media Studies

CINE245 Film Form and Culture (3 Credits)

Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.

Cross-listed with: ENGL245.

Credit Only Granted for: ENGL245, CINE245 or FILM245.

Formerly: FILM245.

CINE280 Film Art in a Global Society (3 Credits)

Comparative study of a variety of film traditions from around the world, including cinema from Hollywood, Europe, Asia and developing countries, with a stress on different cultural contexts for film-making and viewing.

Cross-listed with: CMLT280.

Credit Only Granted for: CINE280, FILM298D or CMLT280.

Formerly: FILM298D.

CINE282 Heroes and Villains in American Film (3 Credits)

We will examine the complex, changing, and ever-present representations of heroes and villains in American film. Beginning with a foundational understanding of how heroes and, conversely, villains have been defined through classic Hollywood film, we will explore how these definitions have shifted throughout the 20th and 21st century in various narrative genres, including westerns, war films, film noir, fantasy, science fiction, and, of course, superhero movies. In particular, we will be focusing on how the hero and villain maintain or disrupt specific cultural ideologies concerning race/ethnicity, gender, sexuality, and ability. This course will examine how these various ideologies have evolved throughout the 20th and 21st century, impacting the ways in which heroes and villains are both represented in American film and perceived by diverse audiences. Finally, we will examine our own complicated and sometimes troubling identification with these heroes, even when they might stand in stark contrast to our cultural values and identities.

Cross-listed with: AMST213.

Credit Only Granted for: AMST213, HONR219F, CINE282 or FILM298V.

Formerly: HONR219F, FILM298V.

CINE283 Iranian Cinema (3 Credits)

Introduction to Iranian cinema, society, and culture. Taught in English.

Cross-listed with: PERS283.

Credit Only Granted for: PERS283, CINE283 or FILM298B.

CINE298 Special Topics in International Film Studies (3 Credits)

Special topics in International Film.

Repeatable to: 9 credits if content differs.

Formerly: FILM298.

CINE301 Cinema History I: The Silent Era (3 Credits)

Examines the development of silent cinema from the 1890s to the early 1930s drawing on at least five distinct national traditions (French, German, Russian, British, and American). Introduces students to key cinematic conventions as they emerged around the world.

Prerequisite: ENGL245, CINE245, or FILM245; or permission of ARHU-College of Arts & Humanities.

Credit Only Granted for: CINE301 or FILM301.

Formerly: FILM301.

CINE302 Cinema History II: The Sound Era (3 Credits)

Introduction to the international history of cinema from sound around 1930 to the present.

Prerequisite: ENGL245, FILM245, or CINE245.

Restriction: Must have permission of the Film Studies program.

Credit Only Granted for: CINE302 or FILM302.

Formerly: FILM302.

CINE310 Introduction to Filmmaking 1 (3 Credits)

This practice-based course offers an introduction to the foundational skills, techniques, and principles of filmmaking. Prior film or video production experience is not necessary.

Restriction: Permission of the Cinema and Media Studies program.

Repeatable to: 6 credits.

Credit Only Granted for: CINE319M or CINE310.

Formerly: CINE319M.

CINE311 Documentary Film (3 Credits)

A survey of currents in the history of the documentary film, beginning with early cinema and continuing through to more recent manifestations.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Credit Only Granted for: CINE311, FILM311 or ENGL329L.

Formerly: FILM311.

CINE316 Classical Antiquity and the Cinema (3 Credits)

Many films, while rooted in the time and place in which they were created, draw upon themes and stories from ancient Greek and Roman literature. While the filmmakers' understandings of modern social forces affect their representations of the ancient world, the ancient works also shape the ways in which filmmakers tell their stories. Film criticism and close reading complement each other in the analysis of films and the ancient works on which they are based.

Cross-listed with: CLAS316.

Credit Only Granted for: CLAS316 or CINE316.

CINE319 Special Topics in Documentary, Animation, Experimental Cinema, and Other Visual Media (3 Credits)

Examine the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.

Repeatable to: 6 credits.

Formerly: FILM319.

CINE329 Special Topics in National/International Cinemas (3 Credits)

Examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.

Repeatable to: 6 credits.

Formerly: FILM329.

CINE331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)

Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of *The Trial*, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's *'Kafka'*, 1991).

Cross-listed with: GERS331.

Credit Only Granted for: GERM331, GERS331, or CINE331.

CINE332 Brazilian Cinema (3 Credits)

Brazilian films from the late 1950s to the present with a special view to the relationship between cinema, society, historical dates, and social changes in Brazil. Taught in English.

Cross-listed with: PORT332.

Credit Only Granted for: PORT332, CINE332, or FILM332.

Formerly: FILM332.

CINE334 Soviet Film: Propaganda, Myth, Modernism (3 Credits)

A Survey of Soviet film from the 1920s to 1991, focusing on important directors, genres, themes, and styles. Taught in English.

Cross-listed with: RUSS334.

Credit Only Granted for: RUSS334, CINE334, or FILM334.

Formerly: FILM334.

CINE335 Transnational Chinese Cinema (3 Credits)

Chinese cinema has made a big impact on contemporary world film culture. This course will introduce students to the films directed by some of the most representative filmmakers working in different geopolitical locations (mainland China, Taiwan, Hong Kong) and the Chinese diaspora. The films of these directors, in a spectrum of genres, themes, and styles, have inspired global scholarship, not only in visual culture and cinema, but also in the study of women's issues, gender and ethnic studies, as well as the fields of adaptation and intermedia studies. Students will explore these films in their socio-historical and artistic contexts, considering the influences and innovations that have shaped them and analyzing their reception by audiences and critics. After reading about the films they view, and participating in class discussions, students will be ready to complete their analytical written assignments, for which they will critically examine the films by applying key concepts such as gender, sexuality, race, gaze, style, representation, power, diaspora, etc.

Cross-listed with: ARTH391.

Credit Only Granted for: ARTH391 or CINE335.

CINE336 Soviet Cinema and Empire (3 Credits)

Examination of the concepts of "empire" and "nation" through their representation in Soviet cinema. Taught in English.

Cross-listed with: RUSS336.

Credit Only Granted for: RUSS336, CINE336, or FILM336.

Formerly: FILM336.

CINE337 Contemporary Chinese Art and Film (3 Credits)

Contemporary Chinese art and film are arguably the most vibrant of all national arts at the turn of the millennium and have become the face - both figuratively and literally - of contemporary China, a complex society with historic overlays of Confucianism, Taoism, Buddhism, Communism, Post-socialism, and state capitalism. Students will consider a wide range of art forms (painting, photography, video, installation, web-based media, and film) in four broad themes (uses of the past; critiques of power; representations of race, gender, and sexuality; socially engaged art) and explore the complex intertwining of the political, historical, and aesthetic aspects in Chinese contemporary art and film, as well as the multiple contexts in which these artworks are created and circulated.

Cross-listed with: ARTH392.

Credit Only Granted for: ARTH392, FILM329L or CINE337.

Formerly: FILM329L.

CINE341 Filming War Zones: Representations of Wars in Iraq & Chechnya (3 Credits)

Comparative study of ideological and cultural discourses in war films covering military conflicts in Iraq and Chechnya in late 20th-early 21st centuries. Materials include American, Middle Eastern, and Russian feature films and documentaries; theories of propaganda, ideology and popular culture. Taught in English.

Cross-listed with: ARAB341.

Credit Only Granted for: ARAB341, CINE341 or FILM341.

Formerly: FILM341.

CINE342 Film Comedy (3 Credits)

Comedy as a specific cinematic genre.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC342.

Credit Only Granted for: SLLC342, CINE342, or FILM342.

Formerly: FILM342.

CINE344 Film and the Fantastic (3 Credits)

Survey of fantastic cinema, encompassing American classics, Hollywood recent productions, and independent films, as well as Asian horror films, anime, and European fantasy.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC344.

Credit Only Granted for: SLLC344, CINE344 or FILM344.

Formerly: FILM344.

CINE345 The Films of Alfred Hitchcock (3 Credits)

An examination of important Hitchcock films from the perspective of innovation, aesthetics, and cultural history.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Credit Only Granted for: CINE345, FILM345 or ENGL329J.

Formerly: FILM345.

CINE352 The Baddest Decade: The 1970s in American Film and American History (3 Credits)

The history of the United States and of its cinema in the 1970s.

Cross-listed with: HIST304.

Credit Only Granted for: CINE352, FILM352 or HIST304.

Formerly: FILM352.

CINE359 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)

Examine narrative cinema from the perspective of content (themes, issues, structures) and style through the lens of genre, auteurship (a concept of authorship in film studies), and/or historical aesthetic movements that have been influential in the development of cinema as an art and film studies as a field. Content varies.

Repeatable to: 6 credits.

Formerly: FILM359.

CINE361 Cinema and Globalization (3 Credits)

Introduction to cinema as a global phenomenon.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of Film Studies program; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC361.

Credit Only Granted for: SLLC361, CINE361, or FILM361.

Formerly: FILM361.

CINE362 Vision, Visuality, and the Gaze in Cinema (3 Credits)

Students will build a way of talking critically about film. The prism of seeing, visuality, the gaze, and the like will serve as a way to investigate the way films take on meaning as well as to understand how film participates in a wide network of interconnected ideas, concepts, and modes of thought that have contributed to the audiences' ability to make sense of what a film is conveying.

Prerequisite: ENGL245, FILM245 or CINE245; or permission of Film Studies Program; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC362.

Credit Only Granted for: SLLC362, CINE362, or FILM362.

Formerly: FILM362.

CINE369 Special Topics in Film Theories (3 Credits)

Examines specific methodologies (structuralism, feminism, postcolonialism, etc.) for the critical analysis of film. The course will also consider the historical development of theoretical concepts. Content varies.

Repeatable to: 6 credits if content differs.

Formerly: FILM369.

CINE376 Writing the Feature Film (3 Credits)

Examines the creative process of developing and writing a feature-length screenplay. Students will experience a collaborative workshop environment, researching stories, pitching feature film ideas, creating a logline, developing a detailed beat sheet and, ultimately, writing a complete first draft of the screenplay.

Prerequisite: ENGL275, ARHU275, ARHU375 or THET340; or permission of instructor.

Cross-listed with: ARHU376.

Credit Only Granted for: ARHU376 or CINE376.

CINE385 German Cinema (3 Credits)

A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.

Cross-listed with: GERS385.

Credit Only Granted for: GERM385, GERS385, CINE385 or FILM385.

Formerly: FILM385.

CINE388 Experiential Learning: Cinema and Media Studies (1-3 Credits)

Connects students' theoretical understanding of film studies, as obtained through the classroom, to professional experience.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Junior standing or higher.

Repeatable to: 6 credits.

Formerly: FILM388.

CINE410 Documentary and Narrative (3 Credits)

An examination of the relationship between film and reality, focusing on documentary film.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC410.

Credit Only Granted for: SLLC410, CINE410 or FILM410.

Formerly: FILM410.

CINE411 Experimental Film (3 Credits)

Introductory survey of European and U.S. American experimental cinema.

Cross-listed with: SLLC411.

Credit Only Granted for: SLLC411, CINE411 or FILM411.

Formerly: FILM411.

CINE412 Animation and Cinema (3 Credits)

An examination of animation in art, cinema, and other media.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Credit Only Granted for: CINE412, FILM412 or ENGL468C.

Formerly: FILM412.

CINE419 Special Topics in Documentary, Animation, Experimental Cinema, and Other Media (3 Credits)

Advanced studies in Documentary, Animation, Experimental Cinema, and Other Media. Examines the possibilities of non-narrative cinema, or cinema that is structured differently from the fiction feature film, as well as other media (television, digital imagery, and photography) that entertain a close relationship with cinema in terms of form, content, and audience. Content varies.

Prerequisite: ENGL245, FILM245, or CINE245; and or permission of ARHU College of Arts and Humanities.

Repeatable to: 6 credits if content differs.

Formerly: FILM419.

CINE420 French Cinema: A Cultural Approach (in Translation) (3 Credits)

A study of French culture, civilization, and literature through the medium of film. Taught in English.

Cross-listed with: FREN480.

Credit Only Granted for: FREN480, CINE420 or FILM420.

Formerly: FILM420.

CINE421 Francophone African Film (3 Credits)

Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.

Cross-listed with: FREN421.

Credit Only Granted for: FREN421, CINE421 or FILM421.

Formerly: FILM421.

CINE423 Women and French Cinema (3 Credits)

Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in English.

Cross-listed with: FREN423.

Credit Only Granted for: FREN423, CINE423 or FILM423.

Formerly: FILM423.

CINE426 Modern Chinese Film and Visual Culture (3 Credits)

Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.

Cross-listed with: ARTH484.

Credit Only Granted for: ARTH484, CINE426 or FILM426.

Formerly: FILM426.

CINE429 Special Topics in National/International Cinemas (3 Credits)

Courses in National/International Cinemas may examine one or more national cinematic traditions (including Hollywood cinema), or may look across traditions comparatively, for example at international and/or transnational phenomena. Content varies.

Repeatable to: 6 credits.

Formerly: FILM429.

CINE430 Critical Issues in Israeli Cinema (3 Credits)

Critical investigation of Zionist and Israeli culture and politics through film.

Cross-listed with: HEBR430.

Credit Only Granted for: HEBR430, CINE430 or FILM430.

Formerly: FILM430.

CINE431 Italian Cinema II (In Translation) (3 Credits)

A study of Italian society and culture through the medium of film from the mid 1970's to the present. Taught in English.

Cross-listed with: ITAL473.

Credit Only Granted for: ITAL473, CINE431 or FILM431.

Formerly: FILM431.

CINE433 Holocaust in Italian Literature and Cinema (3 Credits)

Review of literature and theoretical writings of Italy's most famous survivor, Primo Levi, to a sampling of Italian films that focus in vastly different and often extremely controversial ways on the experience of the concentration camp, while addressing a series of central questions from the brutal realities of the camps to the "compromises" made in order to survive, the need to bear witness, and the idea of the survivor's guilt.

Cross-listed with: ITAL433.

Credit Only Granted for: CINE433, FILM433 or ITAL433.

Formerly: FILM433.

CINE441 Italian Cinema I: Neorealism (3 Credits)

Explores representations of Italy in cinema with special focus on identity formation and the movement of Italian neorealism and post neorealism. Taught in English.

Cross-listed with: ITAL436.

Credit Only Granted for: CINE441, FILM441 or ITAL436.

Formerly: FILM441.

CINE451 Film Noir and American Culture (3 Credits)

Introduction to a variety of American movies made in the 1940s and 1950s whose dark themes and stark black-and-white lighting led to their identification as film noir.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Credit Only Granted for: CINE451 or FILM451.

Formerly: FILM451.

CINE452 The Origins of Cinema (3 Credits)

An in-depth engagement with the specificity of early cinema, dedicated to a comparative framework that compares the early cinema period (1890-1915) to other moments of media emergence, both before and after cinema, with special emphasis on the current, "digital" moment.

Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of Film Studies Program.

Credit Only Granted for: CINE452, FILM452 or ENGL468G.

Formerly: FILM452.

CINE459 Special Topics in Genres/Auteurs/Cinema Movements (3 Credits)

Special topics in genres, auteurs, and cinema movements.

Repeatable to: 6 credits.

Formerly: FILM459.

CINE461 Political Cinema (3 Credits)

Histories of cinema and politics in the 20th century.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Cross-listed with: SLLC461.

Credit Only Granted for: CINE461, FILM461 or SLLC461.

Formerly: FILM461.

CINE462 Realism and the Real in Film (3 Credits)

Exploration of the problem of realism, one of the most central theoretical issues in film studies.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of instructor.

Credit Only Granted for: CINE462 or FILM462.

Formerly: FILM462.

CINE463 Screening Time: History and Memory in Cinema (3 Credits)

An examination of the ways and techniques with which cinema produces a sense of time in the viewer.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of ARHU-College of Arts & Humanities.

Cross-listed with: SLLC463.

Credit Only Granted for: SLLC463, CINE463 or FILM463.

Formerly: FILM463.

CINE464 The Violence of Cinema (3 Credits)

An investigation of cinema's multifaceted relationship to violence.

Prerequisite: ENGL245, FILM245, or CINE245; or permission of instructor.

Credit Only Granted for: CINE464 or FILM 464.

Formerly: FILM464.

CINE467 Visions and Fictions from Spain (3 Credits)

Overview of Spanish cinema from the end of the 19th century through present day Spain. Exploration of the production of literary and cinematic texts in their social, historical, political, religious, and cultural contexts.

Prerequisite: One course from SPAN331, SPAN332, SPAN333, SPAN361, SPAN362 or SPAN363; or permission of instructor.

Recommended: SPAN333.

Cross-listed with: SPAN467.

Credit Only Granted for: CINE427, CINE467, FILM427, SPAN427, or SPAN467.

Formerly: FILM427, CINE427, and SPAN427.

CINE469 Special Topics in Film Theories II (3 Credits)

Special topics in film theories.

Repeatable to: 6 credits.

Formerly: FILM469.

CINE499 Directed Study in Cinema and Media Studies (1-3 Credits)

Readings and Research in Film Studies under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 9 credits if content differs.

Formerly: FILM499.

CINX - Cinema and Media Studies Education Abroad

CINX200 Blockbusters and Bestsellers: Italian Cinema and Literature of the 21st Century (3 Credits)

Examines some of the last three decade's most popular Italian films and novels, systematically exploring various genres such as comedy, drama, mystery, historical and epic. Explores key topics of Italian history, culture and society through an analysis of selected literary and cinematic works, with a focus on cinematic and narrative techniques as well as literary and cinematic genre criticism.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11294>. Education Abroad processes registrations for this course on behalf of students.

CINX201 Cosa Nostra: Cinema and History of the (Anti)Mafia (3 Credits)

Examines the "Cosa Nostra", or Sicilian Mafia through historical, social, and cultural perspectives. Explores the progression of the Sicilian Mafia from the Risorgimento to the present day, the myths and legends surrounding the group, and efforts by US and Italian law enforcement and collaborators to fight organized crime through analysis of important American and Italian films portraying mafia culture.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11294>. Education Abroad processes registrations for this course on behalf of students.

CINX202 Italian Cinema from Neorealism to Netflix (3 Credits)

Examines some of the most important Italian films from the post-World War II era to the present day, covering ideological and aesthetic rules of film art, and reviewing and expanding upon the most important elements of film technique as well as essential topics in the field of film theory and criticism. Explores the roots of Italian cinema, analyzes Neorealism and examines the most important directors and genres, considering recent small-screen productions from HBO/RAI television and Netflix.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11294>. Education Abroad processes registrations for this course on behalf of students.

CINX301 Glued to the Screen: TV Shows, Norms, and Culture (3 Credits)

Introduces the notion of TV as a cultural forum, a social regulator, and a social critique. Using examples from American, Scandinavian, and also British television, we will analyze how TV operates by working through social issues, and how TV shows mirror societal concerns and assumptions.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

CINX302 Spain In Cinema: Global and Local Perspectives (3 Credits)

This course examines both Spanish cinematography and foreign/transnational audiovisual productions related to Spanish culture. The transdisciplinary approach includes film studies, sociology, history, anthropology and art theory, while also applying cultural and cross-cultural studies and post-colonialist views.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

CINX304 London on Film: Representing the City in British and American Films (3 Credits)

Introduces students to key aspects of British film history and culture through consideration of the significance and meaning of London within British film culture. Students will compare and contrast the representation of London by different filmmakers in different eras, examine the social, cultural, and industrial factors that influence the making and reception of films, explore the concepts of "space" and "place", and draw links between London's history and its representation in films.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

CINX305 Spanish Cinema (3 Credits)

One of the clearest representations of a country's culture, along with its art, society and customs, is cinema. This course explores how cinema represents key aspects of Spanish history, politics, lifestyle, and community through the analysis of film format, aesthetics, and historical influences, as well as the production of a short film.

Additional Information: This course is offered as part of the Maryland-in-Sevilla study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/10249>. Education Abroad processes registrations for this course on behalf of students.

CINX310 Mafia, Murder, and Mystery: Crime in Italian and American Cinema (3 Credits)

Studies how mafia and organized crime are presented in Italian and American cinematic texts. The course will examine the different expressions of the crime film genre, which dates back to the beginnings of filmmaking, focusing on the technical, visual, and aesthetic aspects of crime films.

Cross-listed with: ENGX310.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

CINX311 Japanese Film: History, Culture, and Fantasy (3 Credits)

Examines a range of Japanese films spanning the second half of the 20th century, and situates them within their social, cultural and industrial contexts. Key periods in Japanese History will be introduced and the purpose and effect of their representation in films considered. Focusing on samurai period dramas, the rich Japanese tradition of ghost stories, and the Japanese animated film, we will think about how cultural practices, values and ideologies are refracted, circulated, enforced, and critiqued.

Additional Information: This course is offered as part of the ARHU-in-London study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/ARHULondon. Education Abroad processes registrations for this course on behalf of students.

CINX316 Introduction to Filmmaking (3 Credits)

Explores the fundamentals of fiction filmmaking to students with little to no experience. Learn how to create film story ideas, plan a shoot, basic shooting techniques, as well as basic video editing. Explores topics including: understanding the formal foundations of cinematic storytelling, scene pre-visualization using blocking and shooting diagrams, the basic skills of shooting on location, as well as the basic techniques of film editing using a mixture of lectures and analysis workshops, as well as hands-on shooting and editing exercises.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

CLAS - Classics

CLAS169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CLAS170 Ancient Myths and Modern Lives (3 Credits)

What are myths and why do we tell them? What powers do myths have? We will tackle these questions by looking at the enduring and fascinating myths from ancient Greece and Rome. In addition to studying how they shaped ancient societies, we will also look at their modern influence and reflect upon the power that myths still hold in our contemporary world. Taught in English.

Cross-listed with: RELS170.

Credit Only Granted for: CLAS170 or RELS170.

Additional Information: This course cannot be taken for language credit.

CLAS171 Classical Myths in Europe (1 Credit)

The role which Classical Myths have played in the arts, architecture and politics of a major European city. This will only be offered through the study abroad program.

CLAS180 Discovering the World of Ancient Greece (3 Credits)

An exploration of the cultural traits and developments of ancient Greek civilization and its forerunners, from the Bronze Age Mycenaeans and Minoans, through the rise of the classical Greek city-states, to the expansion of Greek cultural influence in the wake of the conquests of Alexander the Great. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of classical Greek civilization, the various institutions and values that characterized the Greeks, and the significant historical events that transformed the culture over the course of antiquity.

CLAS190 Discovering the World of Ancient Rome (3 Credits)

An exploration of the cultural traits and developments of ancient Roman civilization from its roots in Etruscan culture, through the rise of the Roman Republic, to the expansion of Roman cultural influence in the ancient world and the emergence of the Roman Empire. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of ancient Roman civilization, the various institutions and values that characterized the Romans, and the significant historical events that transformed the culture over the course of antiquity.

Cross-listed with: HIST219T.

Credit Only Granted for: CLAS190 or HIST219T.

CLAS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CLAS273 Making Sense of Death (3 Credits)

How do we make sense of death? Thinking about death can cause feelings of anxiety, stir up painful memories, or make us wish our loved ones could have lived longer. At the same time, we may think that death is not a bad thing, that we ought to joyously celebrate the lives of our beloved when they die, or even that the dead live on. This course investigates this mix of contrasting and sometimes contradictory attitudes and practices concerning death by looking at ancient Greek and Roman precedents. The ancient Mediterranean world, like ours, was a messy complex of different approaches and responses to the facts of death. By examining how ancient societies managed and constructed what death meant, we might be able to take a fresh look at our societies and our own relations to death. To aid our inquiry, we will use the field of death studies (or thanatology) to study death in Greek mythology, Roman religion, ancient philosophy, and ancient medicine.

CLAS274 What is Romance? (3 Credits)

What is romance? This course approaches the question by reading ancient Greek romance novels in tandem with works inspired by them from a range of times and places. We will attempt to identify which traits define romance in a society and how romance narratives change in translation and adaptation.

CLAS275 Why do we laugh? (3 Credits)

An introduction to the breadth and complexity of humor's role in society. Students will explore ancient Greek and Roman comedies side-by-side with contemporary sitcoms and movies, to learn the explanations that various disciplines have offered about why we laugh, and to understand the major impact humor has in how we see ourselves and our world.

Additional Information: All readings will be done in English translation.

CLAS276 Are We Rome? (3 Credits)

America, from its very origins as an independent nation, saw itself as the new Rome: its system of government is built on Roman precedents, its national buildings look as if they came from the Roman Forum, and its leisure activities take us to stadiums modeled on the Colosseum. America's relationship to Rome, however, raises its greatest anxiety: will America fall as Rome did? In 1776, the year of American independence, Edward Gibbon published his History of the Decline and Fall of the Roman Empire; America has been thinking about the trajectory of its history alongside Rome's from the very beginning.

Credit Only Granted for: CLAS276 or CLAS289A.

Formerly: CLAS289A.

CLAS277 How Do You Feel? (3 Credits)

Where do our emotions come from? Are they universal biological experiences, or are they shaped by the society in which we live, and therefore different from culture to culture? When do emotions serve the interests of those in power, and when do they resist dominant ideologies? These questions have fascinated scholars from a variety of fields, from linguistics to psychology to literary studies. This course posits that an analysis of artistic and cultural products can reveal important insights about these questions. We will thus read a variety of works of Greco-Roman literature with the above questions in mind, comparing these ancient texts to modern-day films, testing whether and how the portrayal of emotions has changed over time. Still, we will not neglect the discoveries from fields outside of literary studies: throughout the semester, we will periodically discuss relevant works of psychology, sociology, and more, interpreting the texts and films at hand through an interdisciplinary lens.

CLAS305 Archaeological Methods and Practice (3 Credits)

A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.

Prerequisite: ANTH240, ARTH200, CLAS180, or CLAS190.

Cross-listed with: ANTH305, ARTH305, JWST319Y.

Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

CLAS308 The Classics in Context (1-3 Credits)

A Study Abroad course which introduces students to the topography, archaeology and culture of the ancient Mediterranean world.

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 9 credits if content differs.

CLAS309 Special Topics in Classical Literature (3 Credits)

Readings in translation.

Repeatable to: 9 credits if content differs.

CLAS310 Ancient Greek and Roman Philosophy (3 Credits)

A study of the origins and development of philosophy in ancient Greece and Rome, focusing on Socrates, Plato, Aristotle, the Epicureans, and Stoics.

Prerequisite: Must have completed 6 credits in philosophy or classics.

Cross-listed with: PHIL310, PHPE308Y.

Credit Only Granted for: PHIL310, CLAS310, or PHPE308Y.

CLAS311 Inventing Ancient Greek Culture (3 Credits)

Who were the ancient Greeks, and were they the founders of Western civilization? The course examines the foundations of ancient Greece.

Through an analysis of the historical, archaeological, and linguistic evidence, it sheds light on the so-called Black Athena Controversy, which raised doubts about the ancient Greek contribution to Western culture.

The course also focuses on the impact of modern identity politics on scholarly discussions of antiquity and the ways in which the Culture Wars of the 1980s and 1990s have influenced analyses of the ancient Greek world.

Cross-listed with: HIST328D.

Credit Only Granted for: CLAS311 or HIST328D.

CLAS312 The Modernity of Athenian Democracy (3 Credits)

Examines the question of how Ancient Greek thought can be a tool for facing the challenges of the modern world. Topics such as political participation and engagement in politics, lawfulness and justice, freedom and autonomy, democracy and civic responsibility are found at the core of Ancient Greek thought. In addition to these topics, the course explores, through the teachings of ancient Greek philosophers, historians, and poets, the questions of virtue and happiness at a personal level and the pursuit of happiness at the societal level. Love and friendship are necessary virtues to shape a harmonious and prosperous polis. By studying selected excerpts from the primary sources of Ancient Greek literature in translation, the course defines the core values of democratic society from the viewpoint of the Greeks.

CLAS313 From the Stoa to Silicon Valley: Ancient and Modern Approaches to Stoic Philosophy (3 Credits)

Stoicism, ancient Rome's most popular philosophy, posited that virtue is the only human good and that individuals must detach themselves emotionally from the material world in order to live ethical lives.

Principles of Stoic philosophy will be explored together with the wide array of artistic, political, and intellectual traditions that have drawn inspiration from it, from the Haitian revolutionary movement of the late 18th century, to the sexist "manosphere" of Reddit and Twitter, to modern cognitive-behavioral therapy.

Cross-listed with: PHIL313, PHPE313.

Credit Only Granted for: CLAS313, PHIL313, or PHPE313.

CLAS314 Ancient Greek & Roman Cultures in Italy (3 Credits)

A study abroad course examining ancient Greek and Roman society in Italy through direct contact with original cultural sites, monuments, and museum collections in the city of Rome and the Bay of Naples area, including Pompeii, Herculaneum, and Paestum. Topics of lectures and discussions include ancient history, archaeology, art, and architecture, as well as daily life in antiquity, urbanism, the illicit trade in antiquities, and the preservation of cultural heritage.

Credit Only Granted for: CLAS308G, CLAS314, or ARTH369D.

Formerly: CLAS308G.

CLAS315 Greek and Roman Athletics (3 Credits)

The origin and evolution of athletics in ancient Greece and Rome studied as recreation, as play, as education, as a profession and as mass entertainment.

Cross-listed with: HIST339G.

Credit Only Granted for: CLAS315 or HIST339G.

CLAS316 Classical Antiquity and the Cinema (3 Credits)

Many films, while rooted in the time and place in which they were created, draw upon themes and stories from ancient Greek and Roman literature.

While the filmmakers' understandings of modern social forces affect their representations of the ancient world, the ancient works also shape the ways in which filmmakers tell their stories. Film criticism and close reading complement each other in the analysis of films and the ancient works on which they are based.

Cross-listed with: CINE316.

Credit Only Granted for: CLAS316 or CINE316.

CLAS317 Ancient Medicine and Modern Medical Terms (3 Credits)

Students are introduced to the linguistic roots of medical terminology through a systematic explanation of their Greek and Latin components.

At the same time, they learn the intellectual roots of Western medicine by studying selected aspects of medical thought and practice in the Greek and Roman worlds, including the ideas of Hippocrates and Galen, two giants of ancient medicine. Ancient theories of body systems are introduced and compared to modern medical knowledge.

CLAS320 Women in Classical Antiquity (3 Credits)

A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art.

Readings in primary sources in translation and modern critical writings.

Cross-listed with: HIST328W, WGSS320.

Credit Only Granted for: CLAS320, WMST320, WGSS320 or HIST328W.

CLAS321 Science & Society in Ancient Greece & Rome (3 Credits)

How did ancient Greek and Roman scientific practices differ from and resemble our own? How do we as historians recognize when someone is conducting scientific inquiry? What were the social and cultural contexts of scientific production in the ancient world? With a focus on the scientific practices and products of ancient Greeks and Romans from around the fifth century BCE to the second century CE, we investigate how several scientific disciplines – including medicine, astronomy, and biology – developed under the influence of ancient social and cultural contexts, and how ancient literatures, in turn, were shaped by those working in scientific fields of inquiry. In addressing these questions special attention will be paid to the methods employed by the available sources of ancient scientists and the modes of demonstration, argumentation, and rhetoric employed in scientific texts. Readings of primary materials will be supplemented with selections of secondary scholarship.

CLAS322 Roman Freedpersons (3 Credits)

The literary remains of three Roman freedpersons—the editor and biographer Tiro (c. 80-4 BCE), the poet and fabulist Phaedrus (fl. 1st cen. CE), and the philosopher Epictetus (c. 55-135 CE)—give us a rare glimpse into the internal experience of persons enslaved and emancipated by Roman elites. To contextualize these experiences, we study the legal basis of Roman slavery, epigraphic self-representations, and stereotyping representations of freedpersons by free authors. We also read our authors against comparable works by freeborn analogues—the senator Cicero, the poet Horace, and the philosopher Seneca—to test the boundaries of how the identity of libertus ("freedman") affected and failed to affect our authors' literary aims. To deepen our study of how historical conditions shape the creation of freed authorship and the transmission of freed authors, we also read, and consider the conditions surrounding the publication of, American freedpersons' literature.

CLAS330 Ancient Greek Religion: Gods, Myths, Temples (3 Credits)

Survey of Greek religious ideas and practices as they evolve from the Bronze Age to the early Christian period.

Cross-listed with: RELS370.

Credit Only Granted for: CLAS330 or RELS370.

CLAS331 Roman Religion: From Jupiter to Jesus (3 Credits)

Survey of the major institutions of Roman state and private religion and of the diverse religions, including Judaism and Christianity, practiced in the Roman empire.

CLAS340 Ancient Slavery and its American Impacts (3 Credits)

Interrogates how slavery permeated the ancient Mediterranean societies of Greece and Rome. We will pay particular attention to how hierarchical inequalities are institutionalized, experienced, and represented and to how different marginalized and dominant groups interacted. Enslaved persons performed necessary labor in Greece and Rome and their work was essential for the formation of ancient society in agriculture, mining, domestic spaces, literature, finance, and government. Studying ancient slavery offers a chance to examine Greece and Rome from the bottom up, parsing the scant literary and material evidence for the lives and struggles of enslaved persons. We will practice several different approaches in order to tease out the systematic, economic, political, and personal effects of slavery in the ancient world. The United States of America was also founded as a slave society, and discussions of slavery in the Americas often look back to the ancient Mediterranean. The course will therefore conclude with a unit on how enslavers and abolitionists in the United States utilized and responded to slavery in antiquity.

Cross-listed with: HIST339J.

Credit Only Granted for: CLAS340 or HIST339J.

CLAS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CLAS369A Ancient Greece and the Athletic Spirit (3 Credits)

From the time of the poems of Homer to the end of the Roman Empire, exercise of the body and physical competition played an essential role in ancient Greece. Athletics was regarded as both a sphere of excellence and a form of exciting entertainment. Students will travel around Greece and study firsthand the sites, monuments, and objects that defined the ancient experience of athletics, with the aim of understanding its principal forms, the spirit and values that guided it, and its interrelationship with other aspects of society and culture.

CLAS374 Greek Tragedy in Translation (3 Credits)

Study and analysis of the tragedies of Aeschylus, Sophocles and Euripides with special attention to the concepts of character and of thought as conceived by Aristotle in *The Poetics*.

CLAS375 Ancient Comedy (3 Credits)

Representative plays by Aristophanes, Menander, Plautus and Terence in translation; examination of Greek tradition in Roman and postclassical periods.

CLAS380 Archaeological Fieldwork in Greece (4 Credits)

Students will learn about the archaeology, history and culture of Greece by participating in the archaeological investigations at Kenchreai, the eastern port of ancient Corinth. Students will learn about data analysis, artifact processing, and conservation, all important components in archaeological fieldwork. This program also gives students a rare chance to live and to learn in one of the most archaeologically rich, historically important, and naturally beautiful regions in Greece, the northeastern Peloponnese. Students will visit sites and museums throughout this region, attend seminars, and experience life in a small village. In this way they will learn not only about the practice of archaeological field research, but also about Greek history and culture from ancient to modern times. While the course focuses on southern Greece during the Roman Empire and Late Antiquity, a period of prosperity and diversity at Kenchreai and in its broader area, students will also explore cultural and historical developments that influenced other regions and longer periods, from the Bronze Age to the Modern era, including religion and cult-practice, art and iconography, settlement and the environment, and the construction of identity.

Credit Only Granted for: CLAS369K or CLAS380.

Formerly: CLAS369K.

CLAS386 Experiential Learning (3-6 Credits)

Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

CLAS409 Classics Capstone Seminar (3 Credits)

Comparative study of selected central aspects of both ancient Greek and Roman cultures as viewed from the standpoints of literary study, history, art history, and other fields as appropriate. Seminar format involving intensive student research.

Restriction: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

CLAS419 The Classical Tradition (3 Credits)

Examination of the role of Greek and Roman civilization in shaping the arts and ideas of western culture.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: CLAS419 or CLAS420.

Formerly: CLAS420.

CLAS470 Approaches to Greek Mythology (3 Credits)

Ancient and modern approaches to understanding Greek myth as expression of human experience, including interpretations drawn from psychology, anthropology, and comparative mythology.

Prerequisite: CLAS170; or permission of ARHU-Classics department.

CLAS488 Independent Study in Classical Civilization (3 Credits)

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

CLAS499 Independent Study in Classical Languages and Literatures (1-3 Credits)

Prerequisite: Permission of ARHU-Classics department.

CLAX - Classics Education Abroad

CLAX101 Ancient Rome: Civilization and Legacy (3 Credits)

Introduces students to the history and culture of the Roman world, from the Rome's beginnings in myth and legend through its rise to domination of the Mediterranean world, its violent conversion from a Republic to an Empire, and the long success of that Empire down to its collapse in the fifth century A.D. Course readings are supplemented by slides, videos and an overnight field trip to Rome.

CLAX102 Greek and Roman Mythology (3 Credits)

Explores mythology by studying the origins and history of a people, their deities, ancestors and heroes. The stories of the gods and legendary heroes of the Greco-Roman tradition have provided the fountainhead for literature and the arts in the service of religious and political imagery down to the present. Explores literature, with extensive readings of such writers as Homer and Vergil (noting, in passing, the influence upon later literature), and the visual depiction of these myths will also be studied.

Credit Only Granted for: CLAS170 or CLAX102.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

CLAX192 Life and Leisure in Ancient Rome (3 Credits)

Presents a survey of the social and cultural history of Ancient Rome. Seeks to answer such questions as how the Romans organized their day, what they ate and wore, the nature of family life, education, religion, and entertainment. Introduces the methodology of ancient history and the critical analysis of a wide variety of historical source materials, including inscriptions, as well as the interpretation of classical texts. Archeological evidence, including art and architecture, will also be examined. Field trips to historical sites and museums in Rome and at Ostia Antica will be used to reanimate ancient Roman history.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

CMLT - Comparative Literature

CMLT235 Black Diaspora Literature and Culture (3 Credits)

Examination of key works by writers of the African Diaspora. Relationship among black people across multiple geographic spaces; Africa, the Caribbean, the United States, Europe, Latin America, and Asia. Specific historical, cultural, and literary contexts; themes such as gender, sexuality, migration, slavery, freedom, and equality. Readings may include literary texts (fiction, poetry, drama), music and film. All readings in English, but drawn from multiple languages of the black diaspora, including English, Spanish, French and Portuguese.

CMLT242 Diversify and Multiply: Jewish Culture and the Production of an Identity (3 Credits)

Provides students with a unique exploration of cultural products produced by a diverse array of Jewish creators of literature, comedy and film. The texts, films, and performing arts touch on the central social, economic, and cultural issues of Jews during the ages, and up to the 21st century. This course will explore Jewish creativity throughout history, as well as the Jewish encounter with modernity as a whole. We will be diving into prominent creators such as Tiffany Haddish, Larry David, Sholem Aleichem, Adam Sandler, S. Y. Abramovitsch, Judd Apatow, Philip Roth, Amy Schumer, I. B. Singer, Ben Stiller, Franz Kafka, Dan Levy, and others. Examining their creations will open a window to the diverse methods of construction of modern Jewish identities.

Cross-listed with: JWST272.

Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

CMLT269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CMLT270 Global Literature and Social Change (3 Credits)

Comparative study of literature through selected literary works from several non-Western cultures, viewed cross-culturally in light of particular social, political, and economic perspectives.

CMLT275 World Literature by Women (3 Credits)

Comparative study of selected works by women writers of several countries, exploring points of intersection and divergence in women's literary representations.

Cross-listed with: WGSS275.

Credit Only Granted for: WMST275, CMLT275 or WGSS275.

Formerly: WMST275.

CMLT277 Literatures of the Americas (3 Credits)

Comparative study of several North, South, and Central American cultures with a focus on the specificities, similarities, and divergences of their literary and cultural texts.

CMLT280 Film Art in a Global Society (3 Credits)

Comparative study of a variety of film traditions from around the world, including cinema from Hollywood, Europe, Asia and developing countries, with a stress on different cultural contexts for film-making and viewing.

Cross-listed with: CINE280.

Credit Only Granted for: CINE280, FILM298D or CMLT280.

Formerly: FILM298D.

CMLT298 Topics in Comparative Studies (3-6 Credits)

Repeatable to: 9 credits if content differs.

CMLT369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

CMLT386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and permission of ARHU-English department.

CMLT398 Special Topics in Comparative Studies (3 Credits)

Special topics in comparative studies.

Repeatable to: 9 credits if content differs.

CMLT399E Literature in the Climate Crisis (3 Credits)

An investigation of the relationship between climate and art & literature. Introduction to ecological thinking followed by study of artistic and literary works thematically grouped by the four elements: Earth, Water, Air, and Fire. Readings from the German literary tradition (Goethe, Tieck, Stifter, Kafka, Frisch, Wolf) and contemporary research in the environmental humanities, with additional readings and viewings from elsewhere on the planet. Taught in English.

Recommended: 200-level General Education and/or humanities course; and sophomore standing.

Cross-listed with: GERS367.

Credit Only Granted for: GERM399E, CMLT399E, or GERS367.

Formerly: GERM399E.

Additional Information: Priority in enrollment will be given to German majors.

CMLT469 The Continental Novel (3 Credits)

The novel in translation from Stendhal through the existentialists, selected from literatures of France, Germany, Italy, Russia, and Spain.

CMLT479 Major Contemporary Authors (3 Credits)**CMLT488 Genres (3 Credits)**

A study of a recognized literary form, such as tragedy, film, satire, literary criticism, comedy, tragicomedy, etc.

Repeatable to: 6 credits if content differs.

CMLT489 Major Writers (3 Credits)

Each semester two major writers from different cultures and languages will be studied. Authors will be chosen on the basis of significant relationships of cultural and aesthetic contexts, analogies between their respective works, and the importance of each writer to his literary tradition.

CMLT498 Selected Topics in Comparative Studies (3 Credits)

CMLX - Comparative Literature Education Abroad

CMLX300 Leonardo da Vinci: Renaissance Man and Modern Myth (3 Credits)

Leonardo da Vinci (1452-1519) is the last great figure of Western history that masterfully fills the role of both artist and scientist. In light of this achievement, the course will discuss the artistic and scientific endeavors of Leonardo and the impact he had on the shaping of modernity.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

CMLX400 Catalan Culture: Art, Literature and Soccer (3 Credits)

Offers a general introduction to modern and contemporary Catalan culture from the beginning of the twentieth to the twenty-first century. Topics covered include: nationalism, the politics of language, the avant-garde art of Salvador Dali and Miro, literature, and football (soccer).

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

CMSC - Computer Science

CMSC100 Bits and Bytes of Computer and Information Sciences (1 Credit)

Students are introduced to the fields (and disciplines) of computer science and information science within a small classroom setting. They will learn to make a successful transition from high school to the university, while exploring study skills, student success plans and research opportunities.

Cross-listed with: INST101.

Restriction: For first time freshmen and first time transfer students; or permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC100 or INST101.

CMSC106 Introduction to C Programming (4 Credits)

Design and analysis of programs in C. An introduction to computing using structured programming concepts. Intended for students with no or minimal programming experience.

Prerequisite: MATH115.

Restriction: Must not be in Computer Science program; and must not have completed any courses from CMSC131-499 course range.

Credit Only Granted for: CMSC106 or CMSC122.

CMSC115 Gender, Race and Computing (3 Credits)

Race and gender have shaped computing from its earliest histories to contemporary debates over bias in search algorithms, surveillance, and AI. As computational processes shape ever more dimensions of everyday life from the personal to the global scale, understanding how they operate and how power operates within them grows ever more important. Combating racism and sexism is not as simple as ensuring the pool of programmers and engineers is more diverse; structures of power are embedded in digital technologies as they are in all aspects of our society, and we must learn to perceive their operation if we hope to transform them. We will examine how racism and sexism operate in the field of computer science and in everyday uses of digital technologies, while studying how feminist and racial justice movements have created alternative approaches. This class is for anyone who wishes to better understand the relationships between digital technology, structural power, and social justice.

Cross-listed with: WGSS115.

Restriction: Must not have taken CMSC216 or higher.

Credit Only Granted for: WGSS115 or CMSC115.

CMSC122 Introduction to Computer Programming via the Web (3 Credits)

Introduction to computer programming in the context of developing full featured dynamic web sites. Uses a problem solving approach to teach basics of program design and implementation using JavaScript; relates these skills to creation of dynamic web sites; then explores both the potential and limits of web-based information sources for use in research. Intended to help relate a student's major to these emerging technologies.

Restriction: Must not have completed any courses from CMSC131-499 course range; and must not be concurrently enrolled in CMSC131.

Credit Only Granted for: CMSC106, or CMSC122.

CMSC125 Introduction to Computing (3 Credits)

Introduces you to the computing field as a whole. You will gain skills used across the spectrum of computing majors and learn about the great variety of routes into the various areas of study and employment in technological fields.

Prerequisite: Must have completed or be concurrently enrolled in MATH115 or higher.

Restriction: Must not be in the Computer Science program; and must not have completed any courses from CMSC131-499; and must not have completed BMGT302, IMDM127 or INST126.

Credit Only Granted for: IMDM127 or CMSC125.

CMSC131 Object-Oriented Programming I (4 Credits)

Introduction to programming and computer science. Emphasizes understanding and implementation of applications using object-oriented techniques. Develops skills such as program design and testing as well as implementation of programs using a graphical IDE. Programming done in Java.

Corequisite: MATH140.

Credit Only Granted for: CMSC131, CMSC133 or CMSC141.

CMSC132 Object-Oriented Programming II (4 Credits)

Introduction to use of computers to solve problems using software engineering principles. Design, build, test, and debug medium-size software systems and learn to use relevant tools. Use object-oriented methods to create effective and efficient problem solutions. Use and implement application programming interfaces (APIs). Programming done in Java.

Prerequisite: Minimum grade of C- in CMSC131; or must have earned a score of 5 on the A Java AP exam; or must have earned a satisfactory score on the departmental placement exam; and minimum grade of C- in MATH140.

Credit Only Granted for: CMSC132 or CMSC142.

CMSC133 Object Oriented Programming I Beyond Fundamentals (2 Credits)

An introduction to computer science and object-oriented programming for students with prior Java programming knowledge (conditionals, loops, methods). Program design, implementation, and testing using object-oriented techniques. All programming will be done in Java using a graphical IDE.

Prerequisite: Must have completed or be concurrently enrolled in MATH140.

Restriction: Permission of CMNS-Computer Science department; and student must have earned a 4 on the AP Computer Science A exam or a satisfactory score on the CMSC131 department placement exam.

Credit Only Granted for: CMSC131 or CMSC133.

CMSC198 Special Topics in Computer Science for Non-Majors (1-4 Credits)

A course designed to allow non-computer science majors and non-computer engineering majors to pursue a specialized topic or project.

Restriction: Must not be in Computer Science program.

Repeatable to: 6 credits if content differs.

CMSC216 Introduction to Computer Systems (4 Credits)

Introduction to the interaction between user programs and the operating system/hardware. Major topics include C programming, introductory systems programming, and assembly language. Other concepts covered include UNIX, machine data representation, thread management, optimization, and virtual memory. Programming is done in the Linux Environment.

Prerequisite: Minimum grade of C- in CMSC132; and minimum grade of C- in MATH141.

Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permission of CMSC - Computer Science department.

CMSC250 Discrete Structures (4 Credits)

Fundamental mathematical concepts related to computer science, including finite and infinite sets, relations, functions, and propositional logic. Introduction to other techniques, modeling and solving problems in computer science. Introduction to permutations, combinations, graphs, and trees with selected applications.

Prerequisite: Minimum grade of C- in CMSC131; and minimum grade of C- in MATH141.

Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permissions of CMSC - Computer Science department.

CMSC298 Special Topics in Computer Science (1-4 Credits)

A course designed to allow a lower level student to pursue a specialized topic or project.

Restriction: Permission of CMNS-Computer Science department.

Repeatable to: 6 credits if content differs.

CMSC298Q Quantum Steampunk Science-Fiction Workshop (3 Credits)

Steampunk is a science-fiction genre in which futuristic technologies populate Victorian-era settings. Recently, steampunk has come to life in the scientific field of quantum thermodynamics. Thermodynamics, the study of energy, grew out of the Industrial Revolution. Two centuries later, quantum physics is transforming computing and cryptography. Quantum science is now revolutionizing 19th-century thermodynamics in quantum thermodynamics, which features quantum engines, automata, and more. Quantum thermodynamics inspired the growing subgenre of quantum steampunk. In this course, you will read science fiction, write quantum steampunk short stories, receive feedback, and critique classmates' writing. In parallel, you will learn about quantum physics, technologies, and thermodynamics.

Cross-listed with: ARHU270, ENME299Q, PHYS299Q.

Credit Only Granted for: ARHU270, CMSC298Q, ENME299Q or PHYS299Q.

CMSC320 Introduction to Data Science (3 Credits)

An introduction to the data science pipeline, i.e., the end-to-end process of going from unstructured, messy data to knowledge and actionable insights. Provides a broad overview of several topics including statistical data analysis, basic data mining and machine learning algorithms, large-scale data management, cloud computing, and information visualization.

Prerequisite: Minimum grade of C- in CMSC216 and CMSC250.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC320, DATA320 or STAT426.

CMSC330 Organization of Programming Languages (3 Credits)

A study of programming languages, including their syntax, semantics, and implementation. Several different models of languages are discussed, including dynamic, scripting (e.g., Ruby, Python) functional (e.g., OCaml, Haskell, Scheme), and memory safe systems programming (e.g., Rust). Explores language features such as formal syntax, scoping and binding of variables, higher-order programming, typing, and type polymorphism. Introduces finite automata, context free grammar, parsing, lambda calculus, and basics of security attacks and software security.

Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.

Restriction: Must be in a major within the CMNS-Computer Science department; or must be in the Computer Science Minor program; or must be in Engineering: Computer program; and Permission of CMSC - Computer Science department.

CMSC335 Web Application Development with JavaScript (3 Credits)

Provides an introduction to modern ways of developing Web Applications/Services using JavaScript for both front-end and back-end. The course covers topics on fundamental JavaScript language constructs, server-side JavaScript, back-end data persistence, and client-side JavaScript to build Web Applications that interact with Web services and back-end databases.

Prerequisite: Minimum grade of C- in CMSC216 and CMSC250.

Restriction: Permission of CMNS-Computer Science Department.

Credit Only Granted for: CMSC389N or CMSC335.

Formerly: CMSC389N.

CMSC351 Algorithms (3 Credits)

A systematic study of the complexity of some elementary algorithms related to sorting, graphs and trees, and combinatorics. Algorithms are analyzed using mathematical techniques to solve recurrences and summations.

Prerequisite: Minimum grade of C- in CMSC250 and CMSC216.

Restriction: Must be in a major within the CMNS-Computer Science department; or must be in Engineering: Computer program; or must be in the Computer Science Minor program; and Permission from the CMSC - Computer Science department.

CMSC388 Special Topics in Computer Science (1-3 Credits)

Seminar courses that allow students to pursue new and emerging areas of Computer Science.

Restriction: Permission of CMNS-Computer Science department.

Repeatable to: 6 credits if content differs.

CMSC389 Special Topics in Computer Science (1-3 Credits)

Seminar courses that allow students to pursue new and emerging areas of Computer Science; course may be used as electives for the undergraduate degree and minor.

Repeatable to: 6 credits if content differs.

CMSC395 Teaching Techniques for Computer Science (1 Credit)

This course will assure that teaching assistants become better skilled at applying effective teaching practices that improve the classroom environment while learning methods to implement mechanisms to improve diversity and inclusion. Legal and ethical aspects of the role will also be considered. Students in the class will be currently working as a teaching assistant and, therefore, be able to apply what they are learning immediately in their own context.

Restriction: Students must be hired as a teaching assistant in the Computer Science Department for the semester they are registered for the course; and permission of the Computer Science Department.

CMSC396 Computer Science Honors Seminar (1 Credit)

Overview of computer science research activities, techniques, and tools. Diverse research areas will be covered, including systems, networks, artificial intelligence, human-computer interaction, software engineering, graphics, vision, and theory.

Prerequisite: Must have admission into Computer Science Departmental Honors Program.

Restriction: Permission of CMNS-Computer Science department.

CMSC398 Special Topics in Computer Science (1-3 Credits)

Seminar courses that allow students to pursue new and emerging areas of Computer Science.

Restriction: Permission of CMNS-Computer Science Department.

Repeatable to: 6 credits if content differs.

CMSC401 Algorithms for Geospatial Computing (3 Credits)

An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.

Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.

Cross-listed with: GEOG470.

Jointly offered with: GEOG770.

Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.

Formerly: GEOG498I.

CMSC411 Computer Systems Architecture (3 Credits)

Input/output processors and techniques. Intra-system communication, buses, caches. Addressing and memory hierarchies. Microprogramming, parallelism, and pipelining.

Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: ENEE446 or CMSC411.

CMSC412 Operating Systems (4 Credits)

A hands-on introduction to operating systems, including topics in: multiprogramming, communication and synchronization, memory management, IO subsystems, and resource scheduling policies. The laboratory component consists of constructing a small kernel, including functions for device IO, multi-tasking, and memory management.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457).

Restriction: Permission of CMNS-Computer Science department; or must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)).

Credit Only Granted for: CMSC412 or ENEE447.

CMSC414 Computer and Network Security (3 Credits)

An introduction to the topic of security in the context of computer systems and networks. Identify, analyze, and solve network-related security problems in computer systems. Fundamentals of number theory, authentication, and encryption technologies, as well as the practical problems that have to be solved in order to make those technologies workable in a networked environment, particularly in the wide-area Internet environment.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC414, ENEE459C, or ENEE457.

CMSC416 Introduction to Parallel Computing (3 Credits)

Introduction to parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development, and performance analysis of parallel programs.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.

Jointly offered with: CMSC616.

Restriction: Permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC416, CMSC498X, CMSC616, or CMSC818X.

Formerly: CMSC498X.

CMSC417 Computer Networks (3 Credits)

Computer networks and architectures. The OSI model including discussion and examples of various network layers. A general introduction to existing network protocols. Communication protocol specification, analysis, and testing.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC420 Advanced Data Structures (3 Credits)

Description, properties, and storage allocation functions of data structures including balanced binary trees, B-Trees, hash tables, skiplists, tries, KD-Trees and Quadrees. Algorithms for manipulating structures. Applications from areas such as String Processing, Computer Graphics, Information Retrieval, Computer Networks, Computer Vision, and Operating Systems.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC421 Introduction to Artificial Intelligence (3 Credits)

Introduces a range of ideas and methods in AI, varying semester to semester but chosen largely from: automated heuristic search, planning, games, knowledge representation, logical and statistical inference, learning, natural language processing, vision, robotics, cognitive modeling, and intelligent agents. Programming projects will help students obtain a hands-on feel for various topics.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC422 Introduction to Machine Learning (3 Credits)

Machine Learning studies representations and algorithms that allow machines to improve their performance on a task from experience. This is a broad overview of existing methods for machine learning and an introduction to adaptive systems in general. Emphasis is given to practical aspects of machine learning and data mining.

Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and permission of CMNS-Computer Science department.

CMSC423 Bioinformatic Algorithms, Databases, and Tools (3 Credits)

An introduction to the main algorithms, databases, and tools used in bioinformatics. Topics may include assembly and analysis of genome sequences, reconstructing evolutionary histories, predicting protein structure, and clustering of biological data. Use of scripting languages to perform analysis tasks on biological data. No prior knowledge of biology is assumed.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC424 Database Design (3 Credits)

Students are introduced to database systems and motivates the database approach as a mechanism for modeling the real world. An in-depth coverage of the relational model, logical database design, query languages, and other database concepts including query optimization, concurrency control; transaction management, and log based crash recovery. Distributed and Web database architectures are also discussed.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC425 Game Programming (3 Credits)

An introduction to the principles and practice of computer game programming and design. This includes an introduction to game hardware and systems, the principles of game design, object and terrain modeling, game physics, artificial intelligence for games, networking for games, rendering and animation, and aural rendering. Course topics are reinforced through the design and implementation of a working computer game.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.

Restriction: Permission of CMNS-Computer Science department.

CMSC426 Computer Vision (3 Credits)

An introduction to basic concepts and techniques in computervision. This includes low-level operations such as image filtering and edge detection, 3D reconstruction of scenes using stereo and structure from motion, and object detection, recognition and classification.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351 and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program; or permission of the instructor.

Restriction: Permission of CMNS-Computer Science department.

CMSC427 Computer Graphics (3 Credits)

An introduction to 3D computer graphics, focusing on the underlying building blocks and algorithms for applications such as 3D computer games, and augmented and virtual reality (AR/VR). Covers the basics of 3D image generation and 3D modeling, with an emphasis on interactive applications. Discusses the representation of 3D geometry, 3D transformations, projections, rasterization, basics of color spaces, texturing and lighting models, as well as programming of modern Graphics Processing Units (GPUs). Includes programming projects where students build their own 3D rendering engine step-by-step.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Restriction: Permission of CMNS-Computer Science department.

CMSC430 Introduction to Compilers (3 Credits)

Topics include lexical analysis, parsing, intermediate representations, program analysis, optimization, and code generation.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC433 Programming Language Technologies and Paradigms (3 Credits)

Programming language technologies (e.g., object-oriented programming), their implementations and use in software design and implementation.

Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

CMSC434 Introduction to Human-Computer Interaction (3 Credits)

Assess usability by quantitative and qualitative methods. Conduct task analyses, usability tests, expert reviews, and continuing assessments of working products by interviews, surveys, and logging. Apply design processes and guidelines to develop professional quality user interfaces. Build low-fidelity paper mockups, and a high-fidelity prototype using contemporary tools such as graphic editors and a graphical programming environment (eg: Visual Basic, Java).

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC435 Software Engineering (3 Credits)

State-of-the-art techniques in software design and development. Laboratory experience in applying the techniques covered. Structured design, structured programming, top-down design and development, segmentation and modularization techniques, iterative enhancement, design and code inspection techniques, correctness, and chief-programmer teams. The development of a large software project.

Prerequisite: 1 course with a minimum grade of C- from (CMSC412, CMSC417, CMSC420, CMSC430, CMSC433, ENEE447); and permission of CMNS-Computer Science department.

CMSC436 Programming Handheld Systems (3 Credits)

Fundamental principles and concepts that underlie the programming of handheld systems, such as mobile phones, personal digital assistants, and tablet computers. Particular emphasis will be placed on concepts such as limited display size, power, memory and CPU speed; and new input modalities, where handheld systems differ substantially from non-handheld systems, and thus require special programming tools and approaches. Students will apply these concepts and principles in the context of an existing handset programming platform.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Restriction: Permission of CMNS-Computer Science department.

CMSC437 Introduction to Quantum Software Laboratory (3 Credits)

Introductory Programming/Software laboratory for quantum computing. Understand the existing programming tools for quantum computers and the characteristics of quantum hardware. Develop quantum application prototypes and tools to characterize and mitigate the limitations of quantum hardware.

Prerequisite: Minimum grade of C- in CMSC457 or PHYS467; and familiarity with basic programming, languages (e.g., Python).

Restriction: Permission of CMNS-Computer Science department.

CMSC451 Design and Analysis of Computer Algorithms (3 Credits)

Fundamental techniques for designing efficient computer algorithms, proving their correctness, and analyzing their complexity. General topics include graph algorithms, basic algorithm design paradigms (such as greedy algorithms, divide-and-conquer, and dynamic programming), network flows, NP-completeness, and other selected topics in algorithms.

Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC452 Elementary Theory of Computation (3 Credits)

Techniques are developed to determine the difficulty of a problem relative to a model of computation. Topics include Finite Automata, P, NP, decidability, undecidability, and communication complexity.

Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC454 Algorithms for Data Science (3 Credits)

Fundamental methods for processing a high volume of data. Methods include stream processing, locally sensitive hashing, web search methods, page rank computation, network and link analysis, dynamic graph algorithms as well as methods to handle high dimensional data/dimensionality reduction.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.

Restriction: Permission of CMNS-Computer Science department.

CMSC456 Cryptography (3 Credits)

The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.

Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor.

Cross-listed with: MATH456, ENEE456.

Credit Only Granted for: MATH456, CMSC456 or ENEE456.

CMSC457 Introduction to Quantum Computing (3 Credits)

An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).

Restriction: Permission of CMNS-Computer Science department.

Additional Information: No previous background in quantum mechanics is required.

CMSC460 Computational Methods (3 Credits)

Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246.

Cross-listed with: AMSC460.

Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

CMSC466 Introduction to Numerical Analysis I (3 Credits)

Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410.

Cross-listed with: AMSC466.

Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

CMSC470 Introduction to Natural Language Processing (3 Credits)

Introduction to fundamental techniques for automatically processing and generating natural language with computers. Machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of natural language. Application of these techniques in a series of assignments designed to address a core application such as question answering or machine translation.

Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).

Restriction: Permission of CMNS-Computer Science department.

CMSC471 Introduction to Data Visualization (3 Credits)

Datasets are becoming increasingly large and complex, requiring intuitive ways to explore and interpret them quickly and efficiently. In this case, a picture is worth a thousand words: visualizations enable us to transform data into images that are easier to understand and reason about, compared to raw numbers and raw text. Visualizations are critical tools in externalizing and organizing our knowledge and insights, whether to explore collected datasets to improve our understanding of the physical world, to assess and debug analysis/experimental workflows, or to present new and interesting results to diverse audiences. In this course we will study techniques and algorithms for creating effective visualizations based on principles from graphic design, perceptual psychology, and cognitive science. Students will learn how to design and build interactive visualizations for the web, using the D3.js (Data-Driven Documents) framework.

Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science Department.

Restriction: Permission of the CMNS-Computer Science Department.

Credit Only Granted for: CMSC471 or CMSC4980.

Formerly: CMSC4980.

CMSC472 Introduction to Deep Learning (3 Credits)

An introduction to deep learning, a machine learning technique, as well as its applications to a variety of domains. Provides a broad overview of deep learning concepts including neural networks, convolutional neural networks, recurrent neural networks, generative models, and deep reinforcement learning, and an intuitive introduction to basics of machine learning such as simple models, learning paradigms, optimization, overfitting, importance of data, and training caveats.

Prerequisite: Minimum grade of C- or higher in CMSC330 and CMSC351; and 1 course with a minimum grade of C- or higher from (MATH240, MATH461).

Restriction: Permission of the CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's) program.

Credit Only Granted for: CMSC498L or CMSC472.

Formerly: CMSC498L.

CMSC473 Capstone in Machine Learning (3 Credits)

Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.

Prerequisite: Minimum grade of C- or higher in CMSC421 or CMSC422.

Recommended: Background or exposure to machine learning topics is strongly encouraged.

Restriction: Permission of instructor and Permission of CMSC - Computer Science department.

Credit Only Granted for: CMSC498P or CMSC473.

Formerly: CMSC498P.

Additional Information: Students will be paired with project advisors from the UMD faculty or alternatively, an industry advisor. Students are encouraged to plan for projects results that can be published at academic conferences or will impact academic research.

CMSC474 Introduction to Computational Game Theory (3 Credits)

Game theory deals with interactions among agents (either human or computerized) whose objectives and preferences may differ from the objectives and preferences of the other agents. It will also provide a comprehensive introduction to game theory, concentrating on its computational aspects.

Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

Credit Only Granted for: CMSC474, ECON414, GVPT390 or GVPT399A.

CMSC475 Combinatorics and Graph Theory (3 Credits)

General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.

Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340). And permission of CMNS-Computer Science department; or permission of CMNS-Mathematics department. Cross-listed with MATH475 .

CMSC477 Robotics Perception and Planning (3 Credits)

A hands-on introduction to perception and planning for robotics, including rigid body transformations and rotations, dynamics and control of mobile robots/drones, graph based and sampling based planning algorithms, Bayesian and Kalman filtering, camera models and calibration, projective geometry, visual features, optical flow, pose estimation, RANSAC and Hough transform, structure from motion, visual odometry, machine learning basics, visual recognition and learning.

Prerequisite: 1 course from (MATH240, MATH341, MATH461); and (ENEE467 or CMSC420).

Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Computer Science department.

CMSC488 Special Topics in Computer Science (1-3 Credits)

Seminar courses that allow students to pursue new and emerging areas of Computer Science.

Restriction: Permission of CMNS-Computer Science department.

Repeatable to: 6 credits if content differs.

Additional Information: Course may be used as electives for the undergraduate degree and minor.

CMSC498 Selected Topics in Computer Science (1-3 Credits)

An individualized course designed to allow a student or students to pursue a selected topic not taught as a part of the regular course offerings under the supervision of a Computer Science faculty member. In addition, courses dealing with topics of special interest and/or new emerging areas of computer science will be offered with this number. Selected topics courses will be structured very much like a regular course with homework, project and exams. Credit according to work completed.

Restriction: Permission of CMNS-Computer Science department.

CMSC499 Independent Undergraduate Research (1-3 Credits)

Students are provided with an opportunity to participate in a computer science research project under the guidance of a faculty advisor. Format varies. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper delineating their contribution to the field.

Restriction: Must be in one of the following programs (Computer Science; Engineering: Computer); and permission of CMNS-Computer Science department.

COMM - Communication

COMM107 Oral Communication: Principles and Practices (3 Credits)

A study of and practice in oral communication, including principles of interviewing, group discussion, listening, informative briefings, and persuasive speeches.

Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130 or THET285.

COMM130 Professional Communication and Writing (1 Credit)

Designed to enhance the clarity and grace of students' writing. Students will acquire knowledge of writing based on principles of style and grammar as well as argument and organizational structure across a diversity of professional writing contexts. Students will also engage in peer review of one another's writing.

Restriction: Must be in the Communication major.

COMM170 Foundations of Listening (3 Credits)

Role, process, and levels of listening behavior and the development of listening skills.

COMM200 Critical Thinking and Speaking (3 Credits)

Theory and practice of persuasive discourse analysis and composition. Research techniques, logical and rhetorical conceptions of argument, and technical principles for persuading in public venues.

Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130, OR THET285.

COMM201 Introduction to Public Relations (3 Credits)

Basic concepts and principles of public relations. Roles in organizations and society; history; skills and practices of public relations; theories and models of effective and ethical public relations.

Prerequisite: Must have completed or be concurrently enrolled in COMM130.

Restriction: Must be in the Communication major.

COMM207 Oral Communication for Engineers (1 Credit)

An exploration of oral communication skills which prepares engineers to engage in interpersonal communication in professional and international settings, communicate effectively in group environments, and deliver listenable presentations.

Prerequisite: ENES100.

COMM230 Argumentation and Debate (3 Credits)

A study of the fundamental principles of reasoning, analysis, and evidence preparation of debate briefs and presentation of standard academic debate.

COMM250 Introduction to Communication Inquiry (3 Credits)

An introduction to the field of communication. Definitions, models, and contexts of communication; rhetorical theory and rhetorical criticism of discourse.

COMM269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

COMM288 Communication Internship (1-6 Credits)

An individual experience arranged by the student with the instructor. Does not satisfy communication major requirements. 45 hours of supervised internship per credit hour with communication professional. Not a substitute for COMM386.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 6 credits if content differs.

COMM296 Deliberative Democracy (3 Credits)

How do we change our politics, save democracy, and move beyond the "us vs. them" culture that divides us? This course begins with the premise that how we talk to one another and debate controversial issues can promote the public good or erode it in irreparable ways. Students in each class session will put principles of public dialogue into practice as they learn deliberative theories and skills that can help save democracy. Class readings will turn to historical case studies to frame the most controversial political issues we face today.

Credit Only Granted for: HNUH238A, COMM398I (Fall 2022), or COMM296. **Formerly:** COMM398I.

COMM298 Selected Topics in Communication (3 Credits)

Special topical study of contemporary issues in communication.

Repeatable to: 6 credits if content differs.

COMM301 Rhetorical Theories (3 Credits)

Explores the idea of rhetoric, from antiquity to digitality. Rhetoric, as an art of moving bodies, is central to democratic self-governance: only through persuading each other can we develop a shared vision of a just and desirable future. This course tracks the genesis of rhetorical theory in the ancient world, 20th-century struggles against fascist rhetoric, and contemporary extensions of rhetoric in digital media ecologies.

Prerequisite: COMM130, COMM250; and one course from STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one course from COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.

Restriction: Must be in the Communication major.

Credit Only Granted for: COMM301 or COMM401.

COMM302 Communication Science Theories (3 Credits)

This class introduces students to the principles of theory construction and offers a critical overview of how communication theories can be applied to solving problems in diverse social contexts, including interpersonal, intercultural, organizational, health, and/or political issues. The ultimate goal of this course is to put students in an intellectual position to understand theories more logically and critically and use them appropriately and effectively in conducting academic research and addressing social issues.

Prerequisite: COMM130, COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.

Restriction: Must be in the Communication major.

Credit Only Granted for: COMM302 or COMM402.

COMM303 Media Theory (3 Credits)

Provides students with an introduction to media theory from multiple perspectives. We will begin by understanding how the history of mediated communication has been connected to ideology and lived experiences. Through readings, discussions, and activities, you will understand how technical, historical, economic social, and political forces have helped shape media content and the media themselves. You should also become familiar with the debate over how much influence the media have over their audiences, and what types of influences are present. The course will introduce issues relevant to consideration of media and historically underrepresented and marginalized groups, as well as individual and societal functions of the media.

Prerequisite: COMM130 and COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200, or COMM230; and must have completed or be concurrently enrolled in COMM304.

Restriction: Must be in the Communication major.

COMM304 Communication Research Literacy (3 Credits)

Explores the different research traditions in the Communication discipline. This "literacy" course will develop students' ability to locate and fully comprehend Communication research and to understand how that research is conducted, reported, analyzed, and critiqued in Communication literature.

Prerequisite: Must have completed the Communication gateway requirements (COMM250; and one of STAT100, BMGT230, EDMS451, CCJS200, PSYC200, or SOCY201; and one of COMM107, COMM200 or COMM230). Must have completed or be concurrently enrolled in COMM130.

Restriction: Must be in the Communication program.

COMM305 Qualitative Communication Research Methods (3 Credits)

Introduces undergraduate students to the methods used in qualitative communication research. Topics covered in class include ethics, field research, reflexivity, data collection, and data analysis. Over the course of the semester, students will develop a research prospectus, engage in field research (interviews and observations), analyze qualitative data, and write/present their research.

Prerequisite: COMM130 and COMM304.

Restriction: Must be in the Communication major.

COMM306 Rhetorical Methods in Communication (3 Credits)

Equips students with skills for conducting research using rhetorical-critical methods. Such methods are crucial for scholars studying all kinds of public rhetoric: speeches, popular culture, photojournalism, digital media, public monuments, laws, and more. They are also instrumental for citizens engaging with elected officials, other citizens, and democratic institutions, as well as professionals who seek to create and understand persuasive discourse. This course will equip you with critical interpretive skills important to your work as a scholar, citizen, and professional.

Prerequisite: COMM130 and COMM304.

Restriction: Must be in the Communication major.

COMM307 Quantitative Methods in Communication (3 Credits)

Designed to introduce students to the basics of quantitative communication research methods. As such, it covers the basic principles of scientific inquiry, the process for generating research questions and hypotheses, the concept of variables, sampling methods, research designs, basics of data analyses, as well as ethics in scientific research. This course prepares students to become informed consumers of quantitative communication research.

Prerequisite: COMM130 and COMM304.

Restriction: Must be in the Communication major.

Credit Only Granted for: COMM400 or COMM307.

Formerly: COMM400.

COMM311 Peer Consulting in Oral Communication (3 Credits)

Provides training in the principles and practice of peer consulting in the context of the Oral Communication Center in the Department of Communication. Students will apply and integrate the knowledge and skills acquired in their fundamental studies oral communications course with new training to help their peers become outstanding listeners and speakers. Students will also engage in a group research project designed to extend knowledge in peer consulting best practices.

Restriction: Permission of Communication department.

Credit Only Granted for: COMM398C or COMM311.

Formerly: COMM398C.

Additional Information: There will be a pre-enrollment interview conducted before students are given permission to enroll in the course. Contact the instructor for details.

COMM312 Peer Mentoring in Oral Communication (3 Credits)

Provides training in the principles and practices of peer mentoring in the context of the Oral Communication Center in the Department of Communication. As peer mentors, students will apply and integrate the knowledge and skills acquired in COMM311 to help train and develop new peer consultants. Specifically, peer mentors will utilize communicative best practices, focusing on: the establishment of shared goals; performance reviews; project management and evaluation; and negotiating the mentor/mentee relationship.

Prerequisite: COMM311.

Restriction: Permission of Department of Communication.

Credit Only Granted for: COMM398U or COMM312.

Formerly: COMM398U.

COMM324 Communication and Gender (3 Credits)

Explores how communication shapes constructions of gender, sex, sexuality and other identity markers. Topics include issues of oppression, identity, and power and social, political, and economic situations and examines how these issues impact our daily lives.

COMM330 Argumentation and Public Policy (3 Credits)

Contemporary theories of argumentation with special emphasis on methods of formulating and critiquing public policy argument.

COMM331 News Writing and Reporting for Public Relations (3 Credits)

Writing and researching news and information media for public relations; laboratory in news-gathering tools and writing techniques for public relations.

Prerequisite: COMM130 and COMM201.

Restriction: Must be in Communication program; and (sophomore standing; or junior standing).

Credit Only Granted for: JOUR201, COMM231, or COMM331.

Formerly: COMM231.

COMM340 Communicating the Narrative (3 Credits)

The role of narratives in communicating messages and development of strategies to effectively communicate the narrative form through storytelling, oral reading, and anecdotes.

COMM341 Environmental Communication (3 Credits)

Explores the theory and practice of talking about the environment. Students will explore how environmental discourses construct and challenge our identities and relationships with other beings as part of multiple complex and interconnected systems. Topics covered include historical and contemporary rhetorics of environmentalism, scholarly thought on discourses of nature and culture, and efforts to relocate the "center" of environmental communication by privileging the perspectives and strategies of marginalized knowledges, practices, and voices.

Credit Only Granted for: COMM3980 or COMM341.

Formerly: COMM3980.

COMM351 Public Relations Techniques (3 Credits)

The techniques of public relations, including news releases, publications and printed materials, audio-visual techniques, speeches and special events. Application of these techniques in laboratory and field projects.

Prerequisite: COMM331.

Restriction: Must be in Communication program.

COMM353 New Media Writing for Public Relations (3 Credits)

Students learn the uses and influence of new media on public relations practice and expand their ability to write using new and traditional media platforms and tools

Prerequisite: Minimum grade of C- in COMM351.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM352 or COMM353.

Formerly: COMM352.

COMM354 Public Relations Programs (3 Credits)

Analysis of eight major programs typically carried out by public relations professionals: employee relations, media relations, financial relations, member relations, governmental relations, community relations, fundraising and dealing with activist public.

Prerequisite: COMM201.

COMM360 The Rhetoric of Black America (3 Credits)

An historical-critical survey of the rhetoric of Black Americans from the colonial period to the present.

COMM364 Communication, Sport, and Media (3 Credits)

Communication and culture are central to sport and sports media. From youth athletics to the professional level, sport is a multi-billion dollar industry. Indeed, sport is deeply embedded within American culture. In this course, we examine the connections amongst communication, culture, sport, and media. Specifically, we examine how communication, culture, sport, and media shape our understanding of cultural identities such as gender, race and ethnicity, sexual orientation, (dis)ability, and/or nationality, as well as issues of commodification, gaming, and more.

Credit Only Granted for: COMM449E or COMM364.

Formerly: COMM449E.

COMM365 Social Media & Digital Culture (3 Credits)

An examination of the relationship between social media, communication, culture, economics, and politics. Emphasizes critical analysis of social media texts, platforms, and technologies. Engages contemporary theories of digital media alongside practical lessons on social media production.

COMM369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

COMM370 Mediated Communication (3 Credits)

Analysis and critique of structure, performance, content, effects, and future of mediated communication.

Prerequisite: COMM250.

Restriction: Junior standing or higher.

COMM371 Communication and Digital Media (3 Credits)

A basic introduction to communication in the digital age. Through class lectures, assignments and projects, students will learn to effectively use new media for the purpose of strategic message creation and management used in the field of communication. Students will apply the basics of visual layout skills and the principles of visual design to create messages using words and images.

Restriction: Must be in Communication program.

COMM372 Communication, Meaning, and Digital Media (3 Credits)

An exploration of visual communication and meaning creation. A theoretical and practical application of communication concepts and techniques in the production of visual content.

Restriction: Must be in Communication program.

COMM373 Communication and Digital Visual Narrative (3 Credits)

Examination of the traditional style of visual communication, its practices and theoretical underpinnings juxtaposed against contemporary digital media aesthetics and techniques. Utilizing a variety of communication skills and new media tools, students will plan, write, shoot, edit, and upload digital visual narratives.

Restriction: Must be in Communication program.

COMM374 Communicating Visually: Message Production and Digital Media (3 Credits)

Focus on the interplay between technology, images and sound in the creation of digital content. This is a communication process by which a digital visual message evolves from conception to completion, incorporating the creative, financial and marketing tools. Students will conceive, plan, recruit and supervise digital video projects, developing a familiarity with production management technique and execution.

Restriction: Restricted to Communication Majors at the Universities at Shady Grove.

COMM375 Documentary Theory and Practice (3 Credits)

A historical and theoretical introduction to documentary films and videos. Students will explore the power of documentaries to address socially significant issues.

Restriction: Must be in Communication program.

COMM376 Communication through Advocacy Short Film (3 Credits)

Explores the theory and practice of contemporary communication and advocacy short form video.

Restriction: Must be in Communication program.

COMM377 Digital Media in London (3 Credits)

Provides students with skills in production practice while also incorporating theory and cultural studies. Students are challenged to understand societal problems around economy, race, gender, identity and power and to extend that exploration by building projects that utilize high demand skills in the digital communication and documentary professions. Students will write, record voice over, interview people, and build projects with compelling narrative structure. The projects will be an important component of their portfolio when applying to graduate school or their first professional efforts post-graduation. Classroom discussions will contain balance between practical instruction and critical discussion built around racial, social, and economic structures and systems.

Credit Only Granted for: COMM369D or COMM377.

Formerly: COMM369D.

COMM382 Essentials of Intercultural Communication (3 Credits)

Introduction of major theories and concepts of intercultural communication; examination of processes that make up cultural differences; and use of intercultural communication competence skills.

Credit Only Granted for: COMM382 or COMM482.

COMM385 Influence (3 Credits)

Explores contemporary theories of influence and their implications for communication practice. Topics include power and influence, logical theory, rhetorical theory, persuasion theory, framing theory, social influence theory, and propagation of influence in mediated social networks.

Credit Only Granted for: COMM385 or COMM498I (Spring 2014).

Formerly: COMM498I (Spring 2014).

COMM386 Experiential Learning (3-6 Credits)

Supervised internship experience with communication professionals. Relation of academic training to professional experience.

Prerequisite: Permission of ARHU-Communication department.

Restriction: Junior standing or higher; and must be in Communication program.

COMM388 Communication Practicum (1-3 Credits)

Supervised professional-level practice in communication.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 3 credits if content differs.

COMM390 Health Communication (3 Credits)

Designed to introduce students to the academic and practical fields of health communication. It blends theoretical concepts and practical concerns that impact upon health communication processes. To be specific, this course extensively covers influential theories and models of behavior change as well as cutting-edge research on health communication interventions or campaigns, exposing students to authoritative work done in both areas. Students in this class will also learn about the process of planning a comprehensive health communication campaign and have the opportunity to work in groups to develop their own campaign plans addressing an urgent health problem.

Credit Only Granted for: COMM390 or COMM398E.

Formerly: COMM398E.

COMM398 Selected Topics in Communication (3 Credits)

Topical study of contemporary issues in communication.

Repeatable to: 12 credits if content differs.

COMM399 Honors Thesis (3 Credits)

Prerequisite: Permission of ARHU-Communication department.

Restriction: Must be in Communication program.

Repeatable to: 6 credits if content differs.

COMM400 Research Methods in Communication (3 Credits)

Philosophy of scientific method; role of theory; research ethics; empirical research methods (measurement, sampling, design, analysis).

Prerequisite: COMM250; and must have an introductory course in statistics.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM400 or COMM307.

COMM401 Interpreting Strategic Discourse (3 Credits)

Principles and approaches for practical analysis of discourse designed to shape audience opinion.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

COMM402 Communication Theory and Process (3 Credits)

Philosophical and conceptual analysis of communication theories.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

COMM419 Special Topics in Health Communication (3 Credits)

Covers a variety of topics of health communication. Blends theoretical concepts and practical concerns that impact upon health communication processes. This course covers a specific topic of health communication in greater depth and applies scholarly discoveries to real-world examples.

Prerequisite: COMM304.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM420 Theories of Group Discussion (3 Credits)

Current theory, research and techniques regarding small group process, group dynamics, leadership and decision-making.

COMM421 Communicating Leadership (3 Credits)

Examines the nature of leadership, theories of leadership from a communication perspective, relationships between leadership, authority, power, and ethics. Explores leadership responsibilities, commitments, and actions.

COMM422 Communication Management (3 Credits)

Communication policies, plans, channels, and practices in the management of the communication function in organizations.

COMM423 Communication Processes in Conferences (3 Credits)

Group participation in conferences, methods of problem solving, semantic aspects of language, and the function of conferences in business, industry and government settings.

COMM424 Communication in Complex Organizations (3 Credits)

Structure and function of communication within organizations: organizational climate and culture, information flow, networks and role relationships.

COMM425 Negotiation and Conflict Management (3 Credits)

Role of communication in shaping negotiation and conflict processes and outcomes.

COMM426 Conflict Management (3 Credits)

Role of communication in managing conflict processes.

Recommended: COMM425 and COMM250.

COMM427 Crisis Communication (3 Credits)

Explores theories and research related to communication before, during, and after a crisis. Students examine the fundamentals of organizational communication, crisis management, and strategic and crisis communication planning before examining case studies of a number of real-life crises: organizational crises, natural disasters, accidents, terrorism incidents, health crises, and major crises of credibility.

COMM428 Special Topics Seminar in Dialogues and Deliberation (3 Credits)

A study in public dialogue and deliberation theory and practice. This course will integrate recorded lectures, readings, videos, Public Dialogues, teamwork, and historical research.

Prerequisite: COMM250; and must have completed or be concurrently enrolled in COMM306.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM435 Theories of Interpersonal Communication (3 Credits)

Major theoretical approaches and research trends in the study of interpersonal communication.

COMM436 Interpersonal Arguing (3 Credits)

An examination of face to face arguing.

Prerequisite: COMM400 and COMM250.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM436 or COMM498I.

Formerly: COMM498I.

COMM448 Special Topics in Public Relations (3 Credits)

Courses seek to examine historical and current communication management theories, literature and practices for the purposes of understanding the business environment in which public relations/ communication management operates and applying the best of these theories and practices toward the management of the public relations/ communications functions of an organization.

Prerequisite: COMM201.

Restriction: Must be in the Communication Major.

Repeatable to: 12 credits if content differs.

COMM449 Special Topics in Digital Communication (3 Credits)

Explores the topics that have arisen around computers, digital technologies, the internet, big data, surveillance capitalism, and network infrastructures.

Repeatable to: 12 credits if content differs.

COMM450 Ancient Worlds of Rhetoric (3 Credits)

A survey of rhetorical theory across different cultures in antiquity. Emphasizes cultural contexts in which rhetorical acts of advising, instructing, persuading, and arguing emerge. Draws connections between ancient theories and contemporary communication problems.

Prerequisite: COMM250.

Restriction: Must be in Communication program.

Credit Only Granted for: COMM450 or COMM650.

COMM452 Rhetoric, Technology, and Culture (3 Credits)

An investigation of the intersections between rhetoric, technology, and culture. Emphasizes critical and cultural approaches to communication technologies. Draws lessons from the history of rhetoric and media to inform contemporary understandings of communication in the context of digitality.

COMM454 Rhetoric of the 1960s (3 Credits)

Study of key rhetoric of the 1960s. Treats rhetoric of relevant Presidents and several protest movements including civil rights, anti-war, and women's liberation. Contrasts traditional modes of argument with alternative rhetorical forms.

Prerequisite: COMM301.

COMM455 Speechwriting (3 Credits)

The study of message strategies in order to research and develop effective speech texts appropriate to speakers and their audiences in various public contexts.

COMM456 Freedom of Speech & the First Amendment (3 Credits)

Examines the U.S. Supreme Court's rulings on freedom of speech cases as grounded in the First Amendment to the U.S. Constitution. It also considers the political and ideological role of "freedom of speech" as a rhetoric organizing and ordering U.S. political culture.

Credit Only Granted for: COMM498Y or COMM456.

Formerly: COMM498Y.

COMM458 Seminar in Political Communication (3 Credits)

The examination of special topics for and theories of political communication.

Prerequisite: COMM250.

Repeatable to: 12 credits if content differs.

COMM459 Special Topics in Science Communication (3 Credits)

This seminar course is designed to help students learn a variety of topics of science communication.

Repeatable to: 12 credits if content differs.

COMM460 Public Life in American Communities, 1634-1900 (3 Credits)

Ways that Americans have used their voice to create public life. Focus is on the diverse social communities that have characterized American life and the place and characteristics of oral discourse in each.

COMM461 Voices of Public Leadership in the Twentieth Century (3 Credits)

Study of the use of speaking in the power struggles of the twentieth century. Focus is on important speakers of the century, their social and policy influence, and the struggle to expand the diversity of voices with power in the public sphere.

COMM462 Visual Communication (3 Credits)

The study of visual communication should change the way one sees the world. Students will observe, analyze, and critique visual images. The ascendance of images in our contemporary world will be demonstrated, methods for critically comprehending how images do persuasive work will be identified, and students will develop a vocabulary for critiquing images, and assist students in creating compelling images.

Credit Only Granted for: COMM462 or COMM498V.

Formerly: COMM498V.

COMM468 Seminar in Mediated Communication (3 Credits)

The examination of special topics related to the study of mediated communication.

Restriction: Junior standing or higher.

Repeatable to: 12 credits if content differs.

COMM469 The Discourse of Social Movements (3 Credits)

Study of key social movements that have influenced American social and political life.

Recommended: COMM301.

Restriction: Junior standing or higher.

Repeatable to: 12 credits if content differs.

COMM470 Listening (3 Credits)

The principles of listening behavior.

COMM472 Nonverbal Communication (3 Credits)

Nonverbal communication in human interaction theory and research on proxemics, kinesics and paralanguage as expression of relationship, affect and orientation within and across cultures.

COMM475 Persuasion (3 Credits)

Bases of persuasion, with emphasis on recent experimental developments in persuasion.

COMM476 Language, Communication, and Action (3 Credits)

Communication as symbolic action through the study of communication ethics. Emerging ethical principles and decision-making in public discourse, interpersonal communication, organizational communication, public relations, health communication, and crisis communication.

Restriction: Must be in the Communication major.

COMM477 Discourse Analysis (3 Credits)

Concepts of textual and discourse analysis applied to speech situations.

COMM478 Communication Colloquium (1 Credit)

Current trends and issues in the field of communication, stressing recent research methods. Recommended for senior and graduate student majors and minors in communication.

Repeatable to: 4 credits if content differs.

COMM482 Intercultural Communication (3 Credits)

The major variables of communication in an intercultural context: cultural, racial and national differences; stereotypes; values; cultural assumptions; and verbal and nonverbal channels.

COMM483 Senior Seminar in Public Relations (3 Credits)

Integration of theory, techniques and research methods into the planning and execution of public relations campaigns for specific organizations. Analysis of research on the case studies of public relations.

Prerequisite: COMM351; and 1 course from (COMM305, COMM306, COMM307, or COMM400).

Additional Information: Students who enrolled after Fall 2020 should not take COMM400 as a prerequisite.

COMM488 Communication Portfolio Project (1 Credit)

Preparation of the professional communication portfolio.

Restriction: Senior standing; and must be in Communication program.

Repeatable to: 3 credits if content differs.

COMM489 Topical Research (1-3 Credits)

Individualized research projects conducted with a faculty sponsor.

Prerequisite: Permission of ARHU-Communication department.

Repeatable to: 6 credits if content differs.

COMM498 Seminar (3 Credits)

Present-day communication research.

Restriction: Permission of instructor; and senior standing.

Repeatable to: 12 credits.

COMX - Communication Education Abroad

COMX102 Introduction to Visual Culture (3 Credits)

Utilizes theory to understand the role of visual culture within daily lives, exploring a range of media from renaissance painting to TV, magazines, internet media, gaming and infographics. Explores visual media analysis; the evolution of visual codes; the impact of changing technologies; media literacy; information graphics literacy; meme and viral culture.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

COMX103 Communication and Society (3 Credits)

Explores the relationship between communications, media, society, and culture. Within historical and contemporary contexts, the subject addresses how audiences and participants negotiate media in their lives.

Focuses on different media forms, from newspapers to television, and from books to mobile technology. Topics covered include the effects of media on audiences; issues of race and gender in the media; media ownership and regulation; the impact of technological development and institutional pressures on media uses, content, and patterns of communication. Assesses ethical and legal issues which media users and practitioners may face.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

COMX201 Social Media: an Italian Perspective (3 Credits)

The world of social media has its own specialized vocabulary. Key terms such as "social media strategy", "followers", "engagement" and "content marketing" will form the basis of our study. Nowadays, thanks to the internet, the small market downtown has enlarged its boundaries worldwide and mere shouting louder has been replaced by advertising through social media. Hence, the title of this course: Social media, yes, but from an Italian perspective.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence.

Education Abroad processes registrations for this course on behalf of students.

COMX300 Media and Gender (3 Credits)

Media representations of men and women influence and affect interpretations of sexual identities, interpretations of social roles, and perceptions of equality or inequality in society. This course reviews the extent and importance of media influences through a study of representations of men and women and alternative sexualities in the popular media and advertising in the latter half of the 20th century.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

COMX311 Social Media, Social Food (3 Credits)

What is "Social Media" and how will developing media skills help students plan successful careers in the world of food? This course will provide a perfect example of the importance of communication and social media in the food industry.

Credit Only Granted for: COMX200 or COMX311.

Formerly: COMX200.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

COMX312 Media and Globalization (3 Credits)

Provides students with critical perspectives on contemporary globalized media - where media are analyzed as industries, technological devices and transnational cultural flows. Adopts a comparative and historical perspective in the approach to the analysis of media and globalization. Explores how key areas history, industrialization, economics, and culture interact with contemporary international communication systems.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

CPBE - College Park Scholars-Business, Society, and Economy

CPBE100 College Park Scholars: Business, Society & the Economy First-Year Colloquium (1 Credit)

Introductory colloquium: Examination of issues related to business, society and the economy.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE101 College Park Scholars: Business, Society and Economy First-Year Colloquium II (1 Credit)

The course is the second of three colloquia for the BSE Scholars program scheduled for their second semester (Spring). This colloquium is designed to emphasize the entrepreneurial focus of the BSE program by giving students the opportunity for practical, real-life and personal exposure to entrepreneurial activities.

Prerequisite: CPBE100.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE225 Enterprise Communications (3 Credits)

Examines basic interpersonal communication processes within written and oral channels, with practical applications for the business environment.

Prerequisite: CPBE100.

Restriction: Must be enrolled in College Park Scholars' Business, Society and the Economy (CPBE) program.

Formerly: CPSP220.

CPBE230 College Park Scholars: Business, Society & the Economy Internship Practicum (1-3 Credits)

Supervised internship project in an area related to business, society and the economy.

Prerequisite: CPBE100.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE240 College Park Scholars: Business, Society & the Economy Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an area related to business, society and the economy.

Prerequisite: CPBE100.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE250 College Park Scholars: Business, Society & the Economy Research Practicum (1-3 Credits)

Supervised research project in an area related to business, society and the economy.

Prerequisite: CPBE100.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program.

CPBE270 Impacts of Globalization (3 Credits)

Introduces students to key global concepts, discusses a range of perspectives on globalization and cultural competence, and offers an applied learning experience.

Prerequisite: CPBE100; or by permission.

Cross-listed with: HONR298A.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program; or by permission.

Credit Only Granted for: CPBE270 or HONR298A.

CPCV - College Park Scholars-Civic Engagement for Social Good

CPCV100 College Park Scholars: Civic Engagement for Social Good First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to civic engagement.

Restriction: Must be in the College Park Scholars-Civic Engagement for Social Good (CPCV) program.

Credit Only Granted for: BSCV181 or CPCV100.

Formerly: BSCV181.

CPCV101 College Park Scholars: Civic Engagement for Social Good First-Year Colloquium II (1 Credit)

Examination of domestic societal issues and their national, regional, and local dimensions from political, economic, and policy perspectives. Students will work with local direct service non-profit organizations.

Prerequisite: CPCV100.

Restriction: Must be in the College Park Scholars Civic Engagement for Social Good (CPCV) program.

Credit Only Granted for: BSCV182 or CPCV101.

Formerly: BSCV182.

CPCV200 College Park Scholars: Civic Engagement for Social Good Second-Year Colloquium I (1 Credit)

Through substantive civic engagement work in local communities, in-person classes, and reflective practice, students will develop essential skills to collaborate with organizations and stakeholders in order to create meaningful change in their communities.

Prerequisite: CPCV101.

Restriction: Must be in the College Park Scholars-Civic Engagement for Social Good (CPCV) program.

CPCV225 Introduction to Civic Engagement for Social Good (3 Credits)

Foundational concepts and principles of community engagement and social change.

Restriction: Must be in the College Park Scholars-Civic Engagement for Social Good (CPCV) program.

Credit Only Granted for: BSCV191 or CPCV225.

Formerly: BSCV191.

CPCV230 College Park Scholars: Civic Engagement for Social Good Internship Practicum (3 Credits)

As the culmination of the CESG experience, students gain hands-on experience in an area related to civic engagement through internships in non-profit organizations, political engagement, community outreach, or research labs. The internship gives students authentic experiences that help them develop hard and soft skills to support their community engagement efforts and their work toward social good.

Restriction: Must be in College Park Scholars - Civic Engagement for Social Good (CPCV).

Credit Only Granted for: BSCV302 or CPCV230.

Formerly: BSCV302.

CPDJ - College Park Scholars-Data Justice

CPDJ100 College Park Scholars: Data Justice First-Year Colloquium I (1 Credit)

Colloquium I, the first course in the College Park Scholars Data Justice program curriculum, will introduce students to a wide range of information issue areas, with an overarching theme for them to consider opportunities to improve the world by making data less biased and more accessible. The deliverables are intended as low-risk opportunities to write or design in response to the topics, and to engage students every week in creating something in response to what they are learning.

Restriction: Must be in College Park Scholars Data Justice Program (CPDJ).

CPDJ101 College Park Scholars: Data Justice: First-Year Colloquium II (1 Credit)

Colloquium II is an academic course that builds upon the foundation of Scholars learning in Colloquium I. Students will continue to discuss, propose, critique, simulate, and practice. Students will be asked to apply critical thinking and ethical frameworks to Data Justice topics, issues, and principles through reading, discussion, and group projects.

Restriction: Must be in the College Park Scholars Data Justice (CPDJ) program.

Formerly: CPSP118I.

CPET - College Park Scholars-Environment, Technology & Economy

CPET100 College Park Scholars: Environment, Technology & Economy First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to the convergence of the environment, technology and the economy.

Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET101 College Park Scholars: Environment, Technology & Economy First-Year Colloquium II (3 Credits)

Introductory colloquium II: Continued examination of issues related to the convergence of the environment, technology and the economy. Group projects in sustainable development.

Prerequisite: CPET100.

Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET200 College Park Scholars: Environment, Technology & Economy Second-Year Colloquium (1 Credit)

Advanced colloquium: Continued examination of issues related to sustainable development.

Prerequisite: CPET101.

Restriction: Students must be enrolled in the College Park Scholars Environment, Technology & Economy (CPET) program.

CPET230 College Park Scholars: Environment, Technology & Economy Internship Practicum (1-3 Credits)

Supervised internship project in an area related to the environment, technology and the economy.

Prerequisite: CPET200.

Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPET240 College Park Scholars: Environment, Technology & Economy Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an area related to the environment, technology and the economy.

Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET), Science, Technology & Society (CPSS), Arts (CPSA) and Business, Society, & Economy (CPBE) programs.

CPET250 College Park Scholars: Environment, Technology & Economy Research Practicum (1-3 Credits)

Supervised research project in an area related to the environment, technology and the economy.

Prerequisite: CPET200.

Restriction: Students must be matriculated into the College Park Scholars Environment, Technology & the Economy (CPET) program.

CPGH - College Park Scholars-Global Public Health

CPGH100 College Park Scholars: Global Public Health First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of factors that determine the health status of populations around the world.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH101 College Park Scholars: Global Public Health First-Year Colloquium II (1 Credit)

Using case studies, students will examine necessary components to design successful public health interventions.

Prerequisite: CPGH100.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH200 College Park Scholars: Global Public Health Second-Year Colloquium (1 Credit)

Building on knowledge and skills gained from the first-year colloquia, students will develop public health interventions that address a public health issue of a particular community.

Prerequisite: CPGH101.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH230 College Park Scholars: Global Public Health - Internship Practicum (1-3 Credits)

Supervised internship project in an interest area related to global public health.

Prerequisite: CPGH200.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH240 College Park Scholars: Global Public Health Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an interest area related to global public health.

Prerequisite: CPGH200.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH250 College Park Scholars: Global Public Health Research Practicum (1-3 Credits)

Supervised research project in an interest area related to global public health.

Prerequisite: CPGH200.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPGH270 College Park Scholars: Global Public Health Education Abroad Practicum (1-3 Credits)

Education abroad experience in an interest area related to global public health.

Prerequisite: CPGH200.

Restriction: Students must be enrolled in the College Park Scholars Global Public Health (CPGH) program.

CPJT - College Park Scholars-Justice and Legal Thought

CPJT100 College Park Scholars: Justice & Legal Thought: First-Year Colloquium (1 Credit)

Students will gain an experiential understanding of law and justice by investigating concepts and frameworks of justice and apply them to real-world experience.

Restriction: Students must be enrolled in the College Park Scholars Justice & Legal Thought (CPJT) program.

CPJT101 Colloquium in Justice and Legal Thought (1 Credit)

An exploration of contemporary issues related to justice and legal thought.

CPJT200 Justice and legal Thought Second Year Colloquium (1 Credit)

Advanced colloquium for second year students related to research skill development

Restriction: Students must be enrolled in the College Park Scholars Justice and Legal Thought (CPJT) program.

Additional Information: When combined with the first year CPJT colloquia, students will learn how to research issues discussed and debated throughout year one.

CPJT230 Capstone for Justice and Legal Thought: Internship (2-3 Credits)

The capstone of the four-semester College Park Scholars Justice and Legal thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum internships in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunction with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final project culminating in a poster presentation.

CPJT240 Capstone for Justice and Legal Thought: Service-Learning (2 Credits)

The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform practicum volunteer experiences in professional law related settings. In all settings, students must interact directly with legal professionals in law related fields and through law-related institutions under the supervision of legal professionals and program staff. In conjunction with the experiential component, students will synthesize their experience within the learning outcomes of the Justice and Legal Thought program through an innovative final project culminating in a poster presentation.

CPJT250 Capstone for Justice and Legal Thought: Research (2 Credits)

The capstone of the four-semester College Park Scholars Justice and Legal Thought citation program is an exploration of justice and law within a rigorous academic and experiential framework. Students must develop and perform applied research in a law related setting. Students must interact directly with legal professionals under the supervision of program staff. Students will synthesize their experience within the learning outcomes of the Justice and Legal Thought Program through an innovative final research project culminating in a poster presentation.

CPMS - College Park Scholars-Media, Self and Society

CPMS100 College Park Scholars: Media, Self & Society First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to the media.

Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS101 College Park Scholars: Media, Self & Society First-Year Colloquium II (1 Credit)

Examination of the media's coverage of topical issues.

Prerequisite: CPMS100.

Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS225 Analyzing Media Practice through Theory (3 Credits)

Media analysis investigating patterns of ownership, the working of media organizations, patterns of coverage and the nature of audiences.

Prerequisite: CPMS100.

Restriction: Must be in the Scholars Media, Self & Society Program.

Formerly: CPSP222.

CPMS230 College Park Scholars: Media, Self & Society - Internship Practicum (1-3 Credits)

Supervised internship project in an area related to media, self and society.

Prerequisite: CPMS101.

Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPMS240 College Park Scholars: Media, Self & Society - Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an area related to media, self and society.

Prerequisite: CPMS101.

Restriction: Students must be enrolled in the College Park Scholars Media, Self & Society (CPMS) program.

CPPL - College Park Scholars-Public Leadership

CPPL100 College Park Scholars: Public Leadership First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to public leadership.

Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL101 College Park Scholars: Public Leadership First-Year Colloquium II (1 Credit)

Continued examination of issues related to public leadership. Development of team, community-based learning project proposals.

Prerequisite: CPPL100.

Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL200 College Park Scholars: Public Leadership - Applied Leadership Capstone I (1 Credit)

Planning and initiation of team, community-based-learning projects.

Prerequisite: CPPL101.

Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPPL201 College Park Scholars: Public Leadership - Applied Leadership Capstone II (2 Credits)

Implementation and evaluation of team, community-based-learning projects.

Prerequisite: CPPL200.

Restriction: Students must be enrolled in the College Park Scholars Public Leadership (CPPL) program.

CPSA - College Park Scholars-Arts

CPSA100 College Park Scholars: Arts First-Year Colloquium I (1 Credit)

Introductory colloquium: Aesthetic, intellectual and personal examination of the arts.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA101 College Park Scholars: Arts First-Year Colloquium II (1-2 Credits)

Introductory colloquium II: Arts workshops and Arts Festival.

Prerequisite: CPSA100.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA149 College Park Scholars: Arts Service-Learning Outreach (2 Credits)

Service-Learning outreach to Prince George's County schools and non-profit agencies.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

Repeatable to: 6 credits.

CPSA200 College Park Scholars: Arts Second-Year Colloquium I (1 Credit)

Advanced colloquium I: Examination of the arts in society; and preparation for "Scholarship-in-Practice" project.

Prerequisite: CPSA101.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

Additional Information: When paired with successful completion of CPSA 240, 250 or 260, students will earn General Education Scholarship-in-Practice credit.

CPSA201 College Park Scholars: Arts Second-Year Colloquium II (1-2 Credits)

Advanced colloquium II: Arts workshop and Arts Festival.

Prerequisite: CPSA200.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

CPSA240 College Park Scholars: Arts Service-Learning Practicum (2 Credits)

Supervised Service-Learning project in an area related to the arts.

Prerequisite: CPSA200.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA250 College Park Scholars: Arts Research Practicum (2 Credits)

Supervised research project in an area related to the arts.

Prerequisite: CPSA200.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSA260 College Park Scholars: Arts Peer-Teaching Practicum (2 Credits)

Supervised peer-teaching project in an area related to the arts.

Prerequisite: CPSA200.

Restriction: Students must be matriculated into the College Park Scholars Arts (CPSA) program.

Additional Information: When paired with successful completion of CPSA 200, students will earn General Education Scholarship-in-Practice credit.

CPSD - College Park Scholars-Science, Discovery & the Universe

CPSD100 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium A (1 Credit)

Introductory colloquium: Examination of issues related to science, discovery and the universe.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD101 College Park Scholars: Science, Discovery & the Universe First-Year Colloquium B (1 Credit)

Introductory colloquium: Examination of the intersection of astronomy and culture; and the roles of science, exploration and communication in the process of discovery.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

Additional Information: Both freshman colloquia (CPSD 100 and 101) are required for students to earn their College Park Scholars citations; however, they can be taken in any order during a student's first year.

CPSD200 College Park Scholars: Science, Discovery & the Universe Second-Year Colloquium (1 Credit)

Advanced colloquium: Continued examination of issues related to science, discovery and the universe.

Prerequisite: CPSD100 and CPSD101.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD230 College Park Scholars: Science, Discovery & the Universe - Internship Practicum (1-3 Credits)

Supervised internship project in an interest area related to science, discovery and the universe.

Prerequisite: CPSD200.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD240 College Park Scholars: Science, Discovery & the Universe - Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an interest area related to science, discovery and the universe.

Prerequisite: CPSD200.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSD250 College Park Scholars: Science, Discovery & the Universe - Research Practicum (1-3 Credits)

Supervised research project in an interest area related to science, discovery and the universe.

Prerequisite: CPSD200.

Restriction: Students must be enrolled in the College Park Scholars Science, Discovery & the Universe (CPSD) program.

CPSF - College Park Scholars-Life Sciences

CPSF100 College Park Scholars: Life Sciences First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to the life sciences.

Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSF101 College Park Scholars: Life Sciences First-Year Colloquium II (1 Credit)

Further examination of issues related to the life sciences.

Prerequisite: CPSF100.

Restriction: Students must be enrolled in the College Park Scholars Life Sciences (CPSF) program.

CPSF200 College Park Scholars: Life Sciences Second-Year Colloquium (1 Credit)

This course is the final of a three-semester sequence within the College Park Scholars- Life Sciences Program. In the first semester, our content focused on community; we built community as a program of unique individuals to create a common identity and discussed the ways in which the science community exists. The second semester allowed us to explore the life sciences through our lenses of curiosity; we asked big questions and moved toward big answers. This semester is focused on engagement. We will take time to be fully present in the life sciences community and learn why it is important to gain practical knowledge and experiences to further the goals and aims of science.

Prerequisite: CPSF101.

Restriction: Must be in the College Park Scholars Life Sciences program.

Credit Only Granted for: CPSF200 or CPSP218L.

Formerly: CPSP218L.

CPSG - College Park Scholars-Science and Global Change

CPSG100 College Park Scholars: Science & Global Change First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to science and global change.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG101 College Park Scholars: Science & Global Change First-Year Colloquium II (1 Credit)

Introductory colloquium II: Continued examination of issues related to science and global change.

Prerequisite: CPSG100.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG200 College Park Scholars: Science & Global Change Second-Year Colloquium (1 Credit)

Advanced colloquium: Continued examination of issues related to science and global change.

Prerequisite: CPSG101.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG230 College Park Scholars: Science & Global Change - Internship Practicum (1-3 Credits)

Supervised internship in an interest area related to science and global change.

Prerequisite: CPSG200.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG240 College Park Scholars: Science & Global Change - Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning experience in an interest area related to science and global change.

Prerequisite: CPSG200.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSG250 College Park Scholars: Science & Global Change - Research Practicum (1-3 Credits)

Supervised research experience in an interest area related to science and global change.

Prerequisite: CPSG200.

Restriction: Students must be enrolled in the College Park Scholars Science & Global Change (CPSG) program.

CPSN - College Park Scholars- International Studies

CPSN100 College Park Scholars: International Studies First-Year Colloquium I (1 Credit)

Introductory colloquium: Examination of issues related to international studies.

Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN101 College Park Scholars: International Studies First-Year Colloquium II (1 Credit)

Introductory colloquium II: Continued examination of issues related to international studies.

Prerequisite: CPSN100.

Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

Additional Information: When paired with the successful completion of CPSN 100, students will earn Diversity/Cultural Competence General Education credits.

CPSN230 College Park Scholars: International Studies - Internship Practicum (1-3 Credits)

Supervised internship project in an area related to international studies.

Prerequisite: CPSN101.

Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN240 College Park Scholars: International Studies - Service-Learning Practicum (1-3 Credits)

Supervised Service-Learning project in an area related to international studies.

Prerequisite: CPSN101.

Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSN250 College Park Scholars: International Studies - Research Practicum (1-3 Credits)

Supervised research in an area related to international studies.

Prerequisite: CPSN101.

Restriction: Students must be enrolled in the College Park Scholars International Studies (CPSN) program.

CPSP - College Park Scholars Program

CPSP118 College Park Scholars First-Year Colloquium I (1-3 Credits)

Introductory colloquium for specific College Park Scholars Program.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP119 College Park Scholars First-Year Colloquium II (1-3 Credits)

Intermediate colloquium for specific College Park Scholars Programs.

Prerequisite: CPSP118.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP210 Art-Tech Studio: Integrations of the Arts and Technology for Change Making (3 Credits)

Students will investigate various cultures of the arts and technology through ethnographic study. We will work collaboratively to make meaning of the relationships among these cultures in the context of social justice for communities. We will learn arts techniques and each student will envision a fusion of the arts and technology to support a more just and equitable future for a community of interest.

Restriction: Must be in the College Park Scholars Program; or permission of College Park Scholars.

Credit Only Granted for: CPSP318 or CPSP210.

Additional Information: If seats are available after CPS students have registered, permission will be granted to students outside CPS to take the course.

CPSP218 College Park Scholars Second-Year Colloquium I (1-3 Credits)

Colloquium for specific College Park Scholars Program.

Prerequisite: CPSP118.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP219 College Park Scholars Second-Year Colloquium II (1-3 Credits)

Intermediate colloquium for specific, second year, College Park Scholars Program.

Prerequisite: CPSP218.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits if content differs.

CPSP229 Practicum: Online Communication (1-3 Credits)

Supervised practicum in Website development.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits if content differs.

CPSP239 Practicum: Internship (1-3 Credits)

Supervised internship in interest area related to the theme of the students' College Park Scholars program.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP249 Practicum: Service-Learning (1-3 Credits)

Supervised Service-Learning project in area related to the theme of the students' College Park Scholars program.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP259 Practicum: Research (1-3 Credits)

Supervised research project in interest area related to the students' College Park Scholars program.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP269 Practicum: Peer Teaching (1-3 Credits)

Supervised peer teaching in students' College Park Scholars program.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP279 Practicum: Study Abroad (1-3 Credits)

Supervised international experience that satisfies students' College Park Scholars practicum requirement.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits if content differs.

CPSP300 Intergroup Dialogue Facilitator Development & Practicum (3 Credits)

Facilitation is an artform and a science. This course is designed to introduce students to foundational dialogue facilitation skills and social justice frameworks needed to effectively facilitate group interactions across and within social differences. Students will apply the skills learned by facilitating a multi-session dialogue course with either the Common Ground or the Words of Engagement Intergroup Dialogue Program (WeIDP).

Cross-listed with: EDDI300, HONR300.

Restriction: Permission of the Counseling, Higher Education, and Special Education department.

Credit Only Granted for: WEID300, CPSP300, HONR300, or EDDI300.

Formerly: WEID300.

Additional Information: Students must be given permission to enroll and be admitted to the intergroup dialogue facilitator program.

CPSP318 College Park Scholars Special Topics (1-3 Credits)

Special Topics learning opportunities in College Park Scholars.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP339 Advanced Practicum: Internship (1-3 Credits)

Independent study designed for students who wish to extend in greater depth and detail projects begun in sophomore year. Subject varies.

Overseen by faculty director or mentor.

Prerequisite: CPSP239.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP349 Advanced Practicum: Service Learning (1-3 Credits)

Advanced supervised Service-Learning project.

Prerequisite: CPSP249.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP359 Advanced Practicum: Research (1-3 Credits)

Advanced supervised internship experience.

Prerequisite: CPSP259.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 3 credits.

CPSP369 Advanced Practicum: Peer Teaching (1-3 Credits)

Supervised advanced practicum in peer instruction.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 6 credits.

CPSP379 Advanced Practicum: Study Abroad (1-3 Credits)

Advanced, supervised study-abroad experience.

Restriction: Must be in the College Park Scholars Program; or permission of UGST-College Park Scholars.

Repeatable to: 3 credits if content differs.

CPSP386 Experiential Learning (3-6 Credits)**CPSP388 Advanced Special Topics in College Park Scholars (1-3 Credits)**

Interdisciplinary topics of special interest to College Park Scholars, such as legacies of the cold war, environmental ethics, women in leadership, and other timely issues. Projects build on previous work in College Park Scholars.

Restriction: Must be in the College Park Scholars Program.

Repeatable to: 6 credits if content differs.

CPSS - College Park Scholars- Science, Technology and Society

CPSS100 College Park Scholars: Science, Technology & Society First-Year Colloquium I (2 Credits)

Introductory colloquium: Examination of issues related to science, technology and society.

Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS101 College Park Scholars: Science, Technology & Society First-Year Colloquium II (1 Credit)

Continued examination of issues related to science, technology and society.

Prerequisite: CPSS100.

Restriction: Students must be enrolled in the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS220 The Future of Communicating Science (3 Credits)

How can scientists communicate their work effectively? The field of science communication ventures that the answer is not simply a matter of improving capacity (e.g., because people lack scientific information, scientists lack communication skills, or both). Rather, it calls for sustained collaboration and empathy between laypersons and experts. In this hands-on, experiential course, we use a model of cultural competency to put forth solutions to bridge the expert-lay divide. We investigate typical venues in which science is communicated (museums, YouTube videos, federal agency websites, and much much more) and study best practices for communication. Then we explore emerging venues that support sustained contact between so-called "lay citizens" and scientific or technical experts (dance/improv techniques, ethnographic methods and citizen science). Students learn to use cross-cultural perspectives as a basis to pilot and test ways of strengthening relationships and improving communication.

Restriction: Must be in the College Park Scholars Science, Technology or Society program or have permission of the program.

CPSS225 College Park Scholars Capstone: Science, Technology, and Society (3 Credits)

Exploration and understanding of ways science and technology shape and are shaped by society.

Prerequisite: CPSS100.

Restriction: Must be in the College Park Scholars Science, Technology & Society (CPSS) program.

Formerly: CPSP227.

CPSS230 College Park Scholars: Science, Technology & Society - Internship Practicum (1 Credit)

Supervised internship in an area related to science, technology and society.

Prerequisite: CPSS101.

Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS240 College Park Scholars: Science, Technology & Society - Service-Learning Practicum (3 Credits)

Supervised Service-Learning practicum in issues related to science, technology and society.

Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program; or permission of instructor.

CPSS260 College Park Scholars: Science, Technology & Society - Peer-Teaching Practicum (1 Credit)

Supervised peer teaching in science, technology and society.

Prerequisite: CPSS101.

Restriction: Matriculation into the College Park Scholars Science, Technology & Society (CPSS) program.

CPSS270 Education Abroad Practicum: Chip Technologies in Taiwan (3 Credits)

This education abroad course provides a comprehensive exploration of Taiwan's pivotal role in the global semiconductor industry. Students will gain insights into the history, engineering culture, and impact of chip technologies on Taiwan's economy and international relations. Through lectures, discussions, readings, and field-based research and practice, students will develop a deep understanding of the semiconductor ecosystem, its challenges, and opportunities, and its influence on the world.

CPSS340 College Park Scholars: Infrastructure and Society (3 Credits)

One of the most important, and underappreciated, aspects of our society is its infrastructure (roads, buildings, communication systems, water delivery systems, sanitation systems, energy systems, etc.). We often take for granted the services infrastructure bring us. As a consequence, the United States, which at one time was a world leader in creating infrastructure, is experiencing an infrastructure crisis. Furthermore, not everyone experiences this issue equally. This course is designed to identify the root causes of the crisis. You will explore emerging social, political, legal, cultural, and social justice issues associated with the building and maintenance of infrastructure from the perspective of Science and Technology Studies (STS) and engineers. You will work with a volunteer corps of professional engineers from a variety of disciplines on a service-learning project designed to assess the safety and vitality of infrastructure.

Restriction: Must be currently enrolled in a College Park Scholars program.

Credit Only Granted for: CPSP349T or CPSS340.

Formerly: CPSP349T.

CPSS370 Education, Technology and Society: Ecuador in Context (3 Credits)

Set in the UNESCO World Heritage site of Cuenca, Ecuador, students in this short-term study abroad course use theory from Science and Technology Studies (STS) to explore, discuss and critique the design, development and implementation of technology-based social programs in Ecuador. The program looks at education and technology throughout multiple lenses and contexts. Collaboration with the University of Cuenca, participating students have the opportunity for both university and field-based research and practice. UMD students work alongside students and faculty from the leaders and practitioners from UCuenca, government agencies, nongovernmental organizations, small business and local communities.

Recommended: 1 course from (ENES240, ENES200, or ENEE200).

Cross-listed with: ENES359T, LACS370.

Restriction: Minimum cumulative GPA of 2.5.

Credit Only Granted for: ENES259T, ENES359T, CPSP279T, LASC269T, CPSS370, or LACS370.

Formerly: ENES259T.

DANC - Dance**DANC109 Choreography I: Improvisation (3 Credits)**

An introduction to the process of spontaneous movement discovery involving solo and group movement experiences.

Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC118 Beginning Tap (2 Credits)

Introduction to tap for the beginning student.

Repeatable to: 4 credits.

DANC119 Introduction to American Social Dance (2 Credits)

Social dance forms of North America.

Repeatable to: 4 credits.

DANC128 Fundamentals of Ballet (2 Credits)

Introduction to ballet technique and terminology for the beginning student.

Restriction: Must not be in Dance program.

Repeatable to: 4 credits.

DANC138 Global Dance Forms (2 Credits)

Movement course. Traditional dances and music of selected cultures.

Repeatable to: 6 credits if content differs.

DANC148 Fundamentals of Modern Dance (2 Credits)

Introduction to modern dance with emphasis on the development of fundamental movement skills.

Restriction: Must not be in Dance program.

Repeatable to: 4 credits.

DANC149 Fundamentals of Modern Dance II (2 Credits)

Continuation of the development of axial and locomotor movement skills with emphasis on the development of functional alignment, musicality, range of movement, coordination, and movement memory.

Prerequisite: DANC148.

Repeatable to: 4 credits.

DANC158 Fundamentals of Jazz (2 Credits)

Introduction to the jazz style in dance for the beginning student.

Restriction: Must not be in Dance program.

Repeatable to: 4 credits.

DANC179 Movement Integration (2 Credits)

Conditioning and re-patterning techniques for achieving integrated movement.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 4 credits if content differs.

DANC199 Practicum in Choreography, Production and Performance I (1-3 Credits)

Choreography, production, and performance of student works, both on and off campus.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC200 Introduction to Dance (3 Credits)

A study of dance as a form of communication and as an art form; a survey of the theories and styles of dance, and their relationships to other art forms.

DANC207 Choreography II: The Creative Process (3 Credits)

Explorations in movement, music, words, objects, and environments through improvisation and choreographic problem solving.

Prerequisite: DANC109.

Restriction: Permission of ARHU-Dance department.

DANC208 Choreography I (3 Credits)

Basic principles of dance composition: space, time, dynamics, and movement invention. The development of critical awareness.

Prerequisite: DANC109 and DANC102.

Repeatable to: 6 credits.

DANC209 Dance Composition (3 Credits)

Exploration of the structural elements of dance composition.

Prerequisite: DANC207.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC218 Modern Dance I (3 Credits)

Development of heightened body awareness, breath support, dynamic alignment, and spatial awareness. Focus on rhythmic clarity and musicality.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC219 Modern Dance II (3 Credits)

Continuation of the elements addressed in DANC218 with an added focus on momentum, the use of counter-tension, stability/mobility, suspension, and dynamic range.

Prerequisite: DANC218.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC228 Ballet I (2 Credits)

Barre and center work for alignment, strength, flexibility and coordination. Introduction to ballet terminology.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

DANC229 Ballet II (2 Credits)

Continuation of DANC228.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

DANC248 Modern Dance I (3 Credits)

Body alignment, rhythm, dynamics, space and dance phrases.

Restriction: Must be in Dance program; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC249 Modern Dance II (3 Credits)

Continuation of DANC248.

Prerequisite: DANC248; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC258 Jazz I (2 Credits)

Jazz warm-ups and combinations emphasizing rhythm and movement isolations.

Prerequisite: DANC158.

Restriction: Must be in Dance program.

Repeatable to: 4 credits.

DANC259 Jazz II (2 Credits)

Continuation of the principles of Jazz I. Emphasis on style and execution of movement.

Prerequisite: DANC258.

Repeatable to: 4 credits.

DANC269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

DANC299 Practicum in Choreography, Production and Performance II (1-3 Credits)

Continuation of DANC199.

Prerequisite: DANC199; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC304 Dance Education I: Foundations (3 Credits)

Organization and content of the studio dance class. Structuring developmentally appropriate dance experiences for students ages 3-18.

Restriction: Permission of ARHU-Dance department.

DANC308 Choreography II (3 Credits)

Exploration of the formal elements of choreography; theme, development, repetition, contrast, transition, continuity and structure.

Prerequisite: DANC208.

Repeatable to: 6 credits.

DANC309 Choreography III: Dance Composition (3 Credits)

Exploration of the structural elements of dance composition.

Prerequisite: DANC207.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: DANC209 or DANC309.

Formerly: DANC209.

DANC318 Modern Dance III (3 Credits)

Continuation of the elements addressed in DANC219 with an added focus on off-verticality, spirals, complex level changes, more complex and extended phrasing, responsiveness to accompaniment, vocalization.

Prerequisite: DANC219.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC319 Modern Dance IV (3 Credits)

Continuation of the elements addressed in DANC318 with an added focus on movement subtlety and complexity, and stylistic demands.

Prerequisite: DANC318.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC328 Ballet III (2 Credits)

Execution of the vocabulary of ballet movement with technical accuracy.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

DANC329 Ballet IV (2 Credits)

Continuation of DANC328.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

DANC330 Hip Hop History & Culture (3 Credits)

Places the rich movement history of hip hop in a larger cultural context. Students will be exposed to the elements of hip hop culture, including graffiti, emceeing and deejaying, in relationship to various urban dance forms influenced by the hip hop movement. Additionally, students will explore hip hop's international presence, theorize its future and create self-choreographed routines.

DANC338 Dance Techniques (2 Credits)

Intermediate/Advanced level physical practice that sources a range of dance practices relevant to the current dance field in order to expose students to a plurality of techniques as a form of inclusive investigation.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC348 Modern Dance III (3 Credits)

The body as an instrument of expression; techniques for increasing kinesthetic sensitivity.

Prerequisite: DANC249; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC349 Modern Dance IV (3 Credits)

Continuation of DANC348.

Prerequisite: DANC348; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

DANC371 Somatics (3 Credits)

Current ideas and trends in dance technique, with a focus on the incorporation of dance science and somatics into dance training.

Prerequisite: DANC179.

Restriction: Permission of ARHU-Dance department.

DANC379 Practicum in Dance (1-3 Credits)

Performing experience for the student dancer who has developed a professional level of competence.

Repeatable to: 12 credits.

DANC383 Dance History & Theory (3 Credits)

With a primary focus on Western concert dance from the 20th and 21st centuries, this course proposes an understanding of dance as it is situated in historical and cultural contexts. Rather than proposing a canon of "masterworks", this course interrogates choreography and other dance practices from multiple perspectives such as feminist theories, race, gender, and sexuality studies.

Restriction: Permission of ARHU-Dance department.

Credit Only Granted for: DANC283 or DANC383.

Formerly: DANC283.

DANC386 Experiential Learning (3-6 Credits)

Restriction: Junior standing or higher; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC398 Directed Studies in Dance (1-6 Credits)

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC399 Practicum in Choreography, Production and Performance III (1-3 Credits)

Continuation of DANC299.

Prerequisite: DANC299; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC405 Dance Education II: Education & Policy (3 Credits)

Curricula in dance in K-12 settings, classroom management, assessment/grading, and best practices in dance education in public schools. Current research and policy issues are included. This course counts towards teacher certification in the State of Maryland.

Restriction: Permission of ARHU-Dance department.

DANC409 Contact Improvisation (2 Credits)

Discovery and cultivation of the principles and skills of Contact Improvisation dance technique.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 4 credits.

Credit Only Granted for: DANC489C or DANC409.

DANC410 Technical Theater Production for Dance (3 Credits)

A study of the theoretical principles of production and the practical application of those principles to the presentation of dance works.

Prerequisite: DANC210; or students who have taken courses with comparable content may contact the department; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC418 Contemporary Modern (2 Credits)

Physical practice that sources postmodern dance influences, endurance training, improvisation, and choreographic composition to present movement practices as a form of investigation.

Prerequisite: DANC218; or permission of instructor.

Repeatable to: 6 credits.

Credit Only Granted for: DANC418 or DANC489O.

Formerly: DANC489O.

DANC420 Partnering (2 Credits)

Elements of contemporary partnering including weight sharing, counter balancing, momentum/leverage, lifting and moving responsively.

Restriction: Permission of ARHU-Dance department.

DANC429 Advanced Ballet Technique II (1 Credit)

Intensive work in ballet technique for the professionally-oriented dancer.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 3 credits.

DANC448 Modern Dance V (3 Credits)

Complex phrases of modern dance movement with emphasis on articulation and expression.

Prerequisite: DANC349; and must audition.

Repeatable to: 6 credits.

DANC449 Modern Dance VI (3 Credits)

Continuation of DANC448.

Prerequisite: DANC448; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DANC466 Laban Movement Analysis (3 Credits)

Introduction to Rudolf Laban's system of qualitative movement analysis in relation to understanding personal movement style. Application to dance performance, teaching, composition and research.

DANC468 Dance Repertory (3 Credits)

Form, content, music, design and performance of modern dance works.

Prerequisite: DANC349; and permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

DANC479 Advanced Practicum in Dance (1-3 Credits)

Advanced level performing experience for the student dancer who has developed an advanced professional level of competence.

Repeatable to: 6 credits.

DANC485 Seminar in Dance (3 Credits)

Individual research leading to a presentation with written documentation of the process, serving as a culmination of undergraduate study for dance majors.

Prerequisite: DANC483.

Restriction: Must be in Dance program; and senior standing.

DANC488 Project-Based Learning (3 Credits)

A specific project, is addressed, in dance from the perspectives of the investigator, the creator/choreographer, and the performer. Projects are cross-disciplinary and/or cross-cultural, and may involve both on- and off-campus experiences.

Restriction: Permission of ARHU-Dance department.

Repeatable to: 6 credits if content differs.

DANC489 Special Topics in Dance (1-3 Credits)

Theoretical, choreographic, pedagogic, or performance study.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits if content differs.

DANC499 Practicum in Choreography, Production and Performance IV (1-6 Credits)

Advanced workshop in dance presentation, including performing, production and planned field experiences.

Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

Repeatable to: 6 credits.

DATA - Data Science and Analytics

DATA100 Elementary Statistics and Probability (3 Credits)

Simplest tests of statistical hypotheses; applications to before-and-after and matched pair studies. Events, probability, combinations, independence. Binomial probabilities, confidence limits. Random variables, expected values, median, variance. Tests based on ranks. Law of large numbers, normal approximation. Estimates of mean and variance.

Prerequisite: MATH110, MATH112, MATH113, or MATH115; or permission of CMNS-Mathematics department; or must have math eligibility of STAT100 or higher and math eligibility is based on the Math Placement Exam or the successful completion of Math 003 with appropriate eligibility.

Cross-listed with: STAT100.

Restriction: Must not have completed MATH111; or must not have completed any STAT course with a prerequisite of MATH141.

Credit Only Granted for: DATA100 or STAT100.

DATA110 Applications of R for Data Science (1 Credit)

Intended to prepare students for subsequent courses requiring computation with R, providing powerful and easy to use tools for statistical data analysis. Covers basics of R and R Studio including file handling, data simulation, graphical displays, vector and function operations, probability distributions, and inferential techniques for data analysis.

Prerequisite: DATA100, STAT100, or MATH135; or any 400-level STAT course.

Cross-listed with: STAT110.

Credit Only Granted for: STAT110 or DATA110.

DATA120 Python Programming for Data Science (1 Credit)

An introduction to programming in Python language, using Jupyter Notebooks and Python scripts. Covers variables, conditionals, loops, functions, lists, strings, tuples, sets, dictionaries, files and visualization.

Prerequisite: STAT100, MATH135, or any 400-level STAT course.

DATA200 Knowledge in Society: Science, Data and Ethics (3 Credits)

An introduction to the fundamental concepts and principles that govern ethical data collection, analysis, and usage. Students will explore various methods of data collection and gain an understanding of the ethical implications associated with each approach. Key topics include data ownership, data privacy, data anonymity, and data validity, providing students with a solid foundation in ethical data practices.

Prerequisite: STAT100, MATH135, or any 400-level STAT course.

DATA250 Discrete Mathematics (4 Credits)

Introduction to basic discrete mathematical and linear algebraic structures and use of these mathematical structures to solve programming problems. Logic, set theory, formal proof methodology, functions, combinatorics, advanced counting techniques, and elements of linear algebra.

Prerequisite: DATA110 or DATA120; and MATH141.

DATA350 Data Visualization and Presentation (3 Credits)

Introduction to effective and intuitive visual representations of data, including customizing graphics, plotting arrays, statistical graphics, and representing time series.

Prerequisite: DATA100, STAT100, MATH135, or any 400 level STAT course; and DATA110 or DATA120.

DATA400 Applied Probability and Statistics I (3 Credits)

Random variables, standard distributions, moments, law of large numbers and central limit theorem. Sampling methods, estimation of parameters, testing of hypotheses.

Prerequisite: 1 course with a minimum grade of C- from (MATH131, MATH141); or students who have taken courses with comparable content may contact the department.

Cross-listed with: STAT400.

Credit Only Granted for: DATA400, ENEE324, or STAT400.

Additional Information: Not acceptable toward graduate degrees in MATH/STAT/AMSC.

EALL - East Asian Languages and Literatures

EALL269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

EALL300 The Languages of East Asia (3 Credits)

A survey of Chinese, Japanese, and Korean, and the languages of other East Asian nationalities. Provides a basic understanding of the structures of these languages. Topics covered include the characterizing features; the relationships of the languages to each other; the geographical, social, and historical settings. No knowledge of Asian languages is required. Taught in English.

EALL369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ECON - Economics

ECON111 Thinking Like an Economist (3 Credits)

An introduction to the modes of thought of economics. Use of simple standard tools of economics to analyze important problems that arise frequently in public policy, the news media, and in daily life. An emphasis on how economists predict what choices societies make and how economists analyze whether those are good choices. Practical application of a variety of economic tools leading to a focus on the essential unity underlying these analytical tools, viewing economics as a discipline that applies a core methodology in different ways in different situations.

Restriction: Must be sophomore standing or lower.

ECON155 Economics & the College Affordability Crisis (3 Credits)

Why have tuition and fees increased substantially over the past 30 years at almost all institutions of higher education in the US? How can quality and productivity be measured in schools? Why do most students pay considerably less than the actual cost of service provision? What is society's interest in devoting considerable resources to education beyond the high school level? How do existing and proposed governmental policies impact both the number of students pursuing a college education and the cost of this education? ECON155 uses tools from economics to examine and explore answers to these and other related questions.

Additional Information: No background in economics is required, although this course could be a nice complement for ECON200 and ECON201.

ECON175 Inequality: Determinants and Policy Remedies (3 Credits)

History shows that the gap between the rich and the poor has varied over time within and between countries, most recently seeming to increase within many countries while somewhat decreasing between countries. This course challenges students to investigate why people make different amounts of money, why income inequality has changed dramatically in recent years, what public policy tools exist to counter inequality increases, and what different institutional arrangements different countries use to lower inequality. This course will introduce students to theoretical tools used by economists to understand the sources of inequality and will also examine various empirical measures of inequality.

ECON181 Putting a Price on the Environment: An Economist's Perspective on Sustainability (3 Credits)

How does society balance the benefits of environmental protection and preservation against the costs? Though some might say that the environment is priceless, economists recognize that every action involves trade-offs. This course investigates sustainability through comparing costs and benefits. From this perspective, other questions arise: How can we design policies that incentivize sustainable choices? Why might usual market functioning fail to achieve sustainability? Do we need to put a price on the environment in order to protect it? How do we measure an economy's "success"? This course explores the answers to these and other related questions from an economist's perspective.

ECON185 Energy: Crisis or Breakthrough? (3 Credits)

Will we face an energy crisis in the near future, or will technological breakthroughs solve problems? Will we destroy the environment by careless use of polluting energy, or we will find new and clean sources of energy that resolves the environmental issue once and for all? Will politicians and governments succeed in agreeing on a coherent strategy to deal with global issues related to energy, or do we expect individual countries to move in different directions and exacerbate the problems? Students will explore the demand and supply sides of the energy market and their relationships with government policies and environmental concerns. Students will also analyze empirical evidence to better understand the factors affecting energy production and consumption in the past and possible directions in the future. By examining past situations when technological change mitigated problems in energy markets, we can make informed predictions about what could happen next.

ECON200 Principles of Microeconomics (3 Credits)

Introduces economic models used to analyze economic behavior by individuals and firms and consequent market outcomes. Applies conceptual analysis to several policy issues and surveys a variety of specific topics within the broad scope of microeconomics.

Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.

Additional Information: It is recommended that students complete ECON200 before taking ECON201.

ECON201 Principles of Macroeconomics (3 Credits)

An introduction to how market economies behave at the aggregate level. The determination of national income/output and the problems of unemployment inflation, will be examined, along with monetary and fiscal policy.

Prerequisite: MATH107 or MATH110; or must have math eligibility of MATH113 or higher.

Recommended: ECON200.

Credit Only Granted for: ECON201 or ECON205.

ECON230 Applied Economic Statistics (3 Credits)

Introductory course to develop understanding of statistical concepts used in applied economics. Students will acquire skills needed to calculate and interpret statistical concepts, including descriptive statistics, probability, discrete and continuous distributions, sampling, point and interval estimations, hypothesis testing, basic analysis of variance, and simple linear regression models. Students will apply these concepts to data using both handheld calculators and spreadsheets(Excel), and students will be introduced to an econometric software package such as SPSS or SAS or R.

Prerequisite: Must have math eligibility of MATH113 or higher; or 1 course with a minimum grade of C- from (MATH107, MATH110); and minimum grade of C- in ECON200 and ECON201.

Recommended: Students should already have basic familiarity with Microsoft Excel or similar spreadsheet software.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ECON298 Special Topics in Economics (3 Credits)

Selected topics in economics. Designed to meet the changing interests of students and staff.

Repeatable to: 6 credits if content differs.

ECON300 Methods and Tools for Economic Analysis (3 Credits)

Economic application of mathematical tools and concepts necessary for intermediate and advanced coursework in economics. Topics include: multivariable calculus, constrained optimization, foundational coverage of probability theory, and exponential/logarithmic functions.

Prerequisite: 1 course with a minimum grade of C- from (ECON200, ECON201); and minimum grade of C- in MATH140.

Restriction: Must be in Economics Bachelor of Science program; and must not have completed MATH241.

ECON305 Intermediate Macroeconomic Theory and Policy (4 Credits)

Analysis of the determination of national income, employment, and price levels. Discussion of consumption, investment, inflation, and government fiscal and monetary policy.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140).

Credit Only Granted for: ECON305 or ECON325.

ECON306 Intermediate Microeconomic Theory & Policy (4 Credits)

Analysis of the theories of consumer behavior, producer behavior, different market structures, and various sources of inefficient outcomes. Analysis of microeconomic policies designed to improve market outcomes.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140).

Credit Only Granted for: ECON306, ECON326, AREC489M, or AREC326.

ECON310 European Economic History (3 Credits)

The evolution of the capitalist system from its medieval origins to the present. Emphasis on dynamic forces of cumulative change in capitalism, including capital accumulation, technology, expansion of markets, the corporate form of private property in the means of production, and the relation of capitalism to war and revolution.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON311 American Economic History Before the Civil War (3 Credits)

Economic concepts are used to analyze various aspects of the founding and early history of the U.S., including the British settlement of the North American colonies, the economics of the American Revolutionary war, the writing of the Constitution, the development of financial markets, policies on public lands and the spread of western agriculture, slavery, banking, and early industrialization.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON312 American Economic History After the Civil War (3 Credits)

Topics include: the economics of the Civil War, the performance of southern agriculture in the late 19th century, the rise of large corporations, industrialization, the development of financial markets, the creation of the Federal Reserve Board, the economics of the Great Depression and the New Deal, the economic impact of World War II, and the rise of the modern service economy in the late 20th century. Utilizes basic economic theories to understand these episodes as well as the progress of the U.S. economy over this period.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON314 Economic History, Development and Policy (3 Credits)

Study abroad in the economic history, institutional development, and recent economic policy problems of selected areas.

Prerequisite: ECON200 and ECON201.

ECON315 Economic Development of Underdeveloped Areas (3 Credits)

Analysis of the economic and social characteristics of underdeveloped areas. Recent theories of economic development, obstacles to development, policies and planning for development.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Credit Only Granted for: ECON315 or ECON416.

ECON317 Global Economic Policies (3 Credits)

Analysis of policy options and debates on fostering economic growth and development in a global economy where national boundaries are no longer relevant. Topics covered will include real loanable funds markets in both local and international contexts during normal conditions and during financial crises, the design of trade and industrial policies, and the role of the World Bank, IMF, WTO, and other international agencies as well as regional and bilateral trade agreements. Emerging economies will be emphasized.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON321 Economic Statistics (3 Credits)

Introduction to the use of statistics in economics. Topics include: Probability, random variables and their distributions, sampling theory, estimation, hypothesis testing, analysis of variance, regression analysis and correlation.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).

Restriction: Must be in Economics Bachelor of Science program.

ECON325 Intermediate Macroeconomic Analysis (4 Credits)

Analysis of macroeconomic behavior and policy with emphasis on theoretical rigor. Topics include the determinants of economic growth, unemployment, inflation, and international economic flows.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON305 or ECON325.

ECON326 Intermediate Microeconomic Analysis (4 Credits)

Analysis of economic decision-making by individuals and firms, the resulting market outcomes, and applications to real-world problems. Emphasis on analytical logic and theoretical rigor. Topics covered include consumer preferences and utility maximization, perfect competition and market power, uncertainty and risk, externalities, and asymmetric information.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and minimum grade of C- in ECON300 or (MATH241 and any statistics course).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON306, ECON326, or AREC326.

ECON327 Behavioral Economics (3 Credits)

Integrating the insights of psychology into economics. Analysis of the ways in which individuals make decisions that systematically depart from the so-called "standard model" of homo economicus, which assumes perfect rationality, perfect selfishness, and perfect willpower. Investigating the implications of the major findings of behavioral economics for policymakers.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON330 Money and Banking (3 Credits)

The structure of financial institutions and their role in the provision of money and near money. Analysis of the Federal Reserve System, the techniques of central banks, and the control of supply of financial assets in stabilization policy. Relationship of money and credit to economic activity and the price level.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON340 International Economics (3 Credits)

Introduces economic models of international trade and finance. Analyzes policies designed to promote and restrict international trade and to manage exchange rates and impact international capital flows.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Credit Only Granted for: ECON340 or ECON441.

ECON354 Using Big Data to Solve Economic and Social Problems (4 Credits)

Shows how "big data" can be used to understand and address some of the most important social and economic problems of our time. The course will give students an introduction to frontier research and policy applications in economics and social science in a less-technical manner. Topics include equality of opportunity, education, racial disparities, innovation and entrepreneurship, health care, climate change, criminal justice, and tax policy. In the context of these topics, the course will also provide an introduction to basic methods in data science, including regression, causal inference, and machine learning.

Prerequisite: Minimum grade of C- in ECON200 and ECON201; and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Prerequisite: At least one principles level course.

Repeatable to: 15 credits if content differs.

ECON371 Economic Analysis of Good, Evil, and Fairness (3 Credits)

Examines how economic tools can be used to analyze and better understand issues of "Good", "Evil" and "Fairness". Considers questions such as: What is the relation between fairness and equal treatment? Between fairness and equality? What makes an economic or political system "fair" or "unfair"? What makes a system "good"?

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON375 Economics of Poverty and Discrimination (3 Credits)

Examination of various issues, including: the causes of persistent poverty over time for some groups within society; the relationship of poverty to technological change, to economic growth, and to education and training; economic results of discrimination; proposed remedies for poverty and discrimination.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

ECON386 Experiential Learning (3 Credits)

See Department Advising Office for course eligibility, course requirements, and application information.

Prerequisite: ECON201 and ECON200.

Restriction: Permission of BSOS-Economics department; and must be in a major within the BSOS-Economics department; and minimum cumulative GPA of 2.5; and junior standing or higher.

ECON387 Career Preparation for Economics Majors (2 Credits)

Increase student knowledge of career paths, job search tools, and strategies for successfully obtaining a job with a BA or BS in economics. Students will engage in a range of different activities which build their understanding of job opportunities in economics and hone their abilities to find positions they want. Students will reflect on specific skills employers seek from economics graduates and incorporate that knowledge in their own individual job search and career plan.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science) ; and must have earned a minimum of 30 credits.

ECON396 Independent Honors Study (3 Credits)

First semester of the departmental honors sequence. Students will develop and apply research skills required to carry out original research. By the end of the semester students will have produced a complete draft of an honors thesis resembling a scholarly journal article.

Restriction: Permission of BSOS-Economics department.

ECON397 Honors Thesis (3 Credits)

General supervision will be provided through assembled meetings with the professor in charge of the course.

Prerequisite: ECON396.

Restriction: Must be a candidate for honors in economics.

ECON398 Topics in Economics (3 Credits)

This course is designed to meet the changing interests of students and staff. Topics vary in response to those interests. Students are advised to seek information about the coverage and prerequisites during the registration period.

Prerequisite: ECON201 and ECON200.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON399 Independent Study in Economics (1-3 Credits)

Integrated readings and independent study under direction and supervision of a faculty member. Contact department for additional information.

Prerequisite: Minimum grade of C- in ECON200 and ECON201.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON401 Current Issues in American Economic Policy (3 Credits)

Analysis of current economic problems and public policies. Topics could include poverty, income inequality, social insurance, education, environmental sustainability, immigration, and innovation. Other issues may be substituted depending on current events.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422, ECON426).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON402 Macroeconomic Models and Forecasting (3 Credits)

Analysis of the fluctuations in economic activity and the formulation and use of forecasting models of the economy. Illustrations of computer macro models and forecasting problems.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON406 Advanced Microeconomics (3 Credits)

Expands on the assumptions of rational decision-making used in intermediate microeconomics and develops more complicated, more realistic models which address uncertainty, intertemporal choices, strategic interactions, social preferences and considerations of what is fair.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON407 Advanced Macroeconomics (3 Credits)

An in-depth analysis of current issues in macroeconomic theory and policy. Topics covered include: 1. alternative perspectives on macroeconomics including monetarism, new classical equilibrium models, rational expectations, and real business cycle models; 2. long term growth, the slowdown in productivity growth, and concerns about U.S. competitiveness; 3. the effectiveness of macroeconomic policy in an open economy; 4. the effects of finance on the real sector.

Prerequisite: Minimum grade of C- in ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON410 Comparative Economic Institutions (3 Credits)

Institutions are the sets of rules that constrain the decisions and interactions of economic agents. The course uses economic analysis to understand both formal institutions (e.g. laws) and informal institutions (e.g. cultural norms). Practical examples are drawn from economics, law, and politics, and reflect the experience of many different countries.

Prerequisite: Minimum grade of C- in ECON325 and ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON412 Economic History and Modern Development (3 Credits)

Analysis of major economic, political, and social change in the developed world since 1800. This includes factors contributing to increases in economic performance, changes in the form of government, technological change (including industrialization), and integration and disintegration of the global economy. Emphasis is on institutional changes in how societies organize economic and political activities.

Prerequisite: Minimum grade of C- in ECON325 and ECON326.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON414 Game Theory (3 Credits)

Studies the competitive and cooperative behavior that results when several parties find that their individual outcomes are jointly determined. Students will learn how to use game theory to analyze situations of potential conflict. Applications are drawn from economics, business, and political science.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor).

Credit Only Granted for: CMSC474, ECON414, GVPT399A or GVPT390.

ECON415 Market Design (3 Credits)

Focuses on recent developments in the design of markets to improve economic performance and to open new economic opportunities. It is divided into three main segments – auction design, the design of matching mechanisms, and antitrust theory and policy.

Prerequisite: Minimum grade of C- in ECON414.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON416 Analysis of Economic Development (3 Credits)

Analysis of the determinants and influences on economic development. Emphasis on both theoretical models and econometric methods of explaining why some countries are poor, along with examination of policies to promote development.

Prerequisite: Minimum grade of C- in ECON325, ECON326, and ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON315 or ECON416.

ECON417 Estimating Policy and Program Impact (3 Credits)

Governments, businesses, non-profits, funders, and other organizations must allocate scarce resources between competing uses. Understanding the causal effect of policies, programs or investments on key outcomes can guide the choices of these decision-makers. Correlations between policies and outcomes or changes in outcomes after new policies are adopted are rarely sufficient for estimating the causal effect, however. This course focuses on econometric strategies for obtaining unbiased causal estimates, including experimental methods, instrumental variables, regression discontinuity, and differences-in-differences. There will be an emphasis on using Stata and on interpreting the results of econometric analysis

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326) and 1 course with a minimum grade of C- from (ECON424, ECON422).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON418 Economic Development of Selected Areas (3 Credits)

Economic and institutional characteristics of a specific geographic area are identified and discussed, and alternate strategies and policies for development are analyzed.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Repeatable to: 6 credits if content differs.

ECON422 Econometrics (3 Credits)

Emphasizes the interaction between economic problems and the assumptions employed in statistical theory. Formulation, estimation, and testing of economic models, including single variable and multiple variable regression techniques, theory of identification, and issues relating to inference.

Prerequisite: 1 course with a minimum grade of C- from (ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

Credit Only Granted for: ECON422, ECON424, or AREC422.

ECON423 Advanced Topics in Econometrics (3 Credits)

Interaction between economic problems and specification and estimation of econometric models. Topics may include: autocorrelation, heteroscedasticity, functional form, simultaneous equation models, logit and probit models, instrumental variables, qualitative choice models, and other computational methods.

Prerequisite: Minimum grade of C- in ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON424 Applied Econometrics (3 Credits)

Provide the knowledge and skills necessary to accomplish and utilize basic applied econometric analysis utilized by many business service providers, government agencies, and nonprofits engaged in policy analysis. Topics include simple and multiple regressions using cross section, time series, and panel data, issues of heteroskedasticity, serial correlation, and multicollinearity, models with binary dependent variable, and program evaluation. Course emphasizes application of knowledge using software packages but still covers essential theoretical background.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON422, ECON424 or AREC422.

ECON425 Mathematical Economics (3 Credits)

Covers mathematical tools and skills utilized in upper undergraduate and master's level coursework in Economics and Public Policy. Reviews calculus and math of finance and growth. Introduces techniques of optimization, linear algebra, and differential equations and connects them to micro and macro theory and applications. Topics will also include coverage of probability theory to explore how economists model uncertainty, as well as economic applications of integration.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON426 Economics of Cost-Benefit Analysis (3 Credits)

Study of how to use cost benefit analysis and other similar tools of applied microeconomics to conduct policy analyses. Cost-benefit analysis is an empirical method of identifying an optimal choice from a set of policy alternatives, where optimal is defined in terms of economic efficiency. Real world examples are addressed, so that students understand limitations of the methods and also interactions of economic analysis with political and administrative processes.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON427 Experimental Economics (3 Credits)

An introduction to the methodology of experimental economics and its application to issues such as decision-making under uncertainty, auctions, and public goods. Also an introduction to behavioral economics as a relatively new area of economic research.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON432 Applied Machine Learning (4 Credits)

Offers a comprehensive examination of the concepts and techniques used in machine learning, with a specific emphasis on their applications in economics. Focuses on the practical aspects of machine learning, including the use of different methods, model selection, and performance evaluation. Students will explore both supervised and unsupervised learning techniques, such as linear and non-linear regression, k-nearest neighbors, tree-based approaches, support vector machines, neural networks, and dimensionality reduction methods. Additional advanced methods may be covered, depending on the time available. Hands-on implementation of these techniques will be conducted using the R programming language.

Prerequisite: 1 course with a minimum grade of C- from (ECON422, ECON424).

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON433 Economics of Big Data (4 Credits)

The importance of big data in the global economy is rising. Students will explore the definition and characteristics of big data, the impact of big data on individuals, use of big data by firms, entrepreneurs and non-profits, as well as how big data reshapes various public policies.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON434 The Economics of Information and Uncertainty (3 Credits)

How do rational agents make decisions when faced with uncertainty? How do markets and other institutions deal with risks? How do markets behave when some actors are better informed than others? What incentives influence whether economic decision-makers hide or reveal information? Topics include the value of information, the purchase of warranties, agency problems in management, adverse selection and moral hazard in insurance, and signaling in education.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON498U or ECON434.

Formerly: ECON498U.

ECON435 Financial Markets and the Macroeconomy (3 Credits)

Provides students with the necessary tools to understand financial decisions investors and firms make. The course will cover two of the main areas of financial economics: Asset pricing and corporate finance. Asset pricing topics include the valuation of bonds, stocks, derivatives, portfolio decisions, and arbitrage. Corporate finance topics include the valuation of investment projects, the cost of capital, capital structure, and financial distress.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: BMGT343 or ECON435.

Additional Information: Finance majors will not receive credit for ECON435.

ECON436 Financial Econometrics (3 Credits)

An introduction to financial econometrics, which is data science applied to understanding the financial system. Students will learn modern techniques in financial econometrics with an emphasis on the interaction between modeling (theory) and empirical analysis. Topics include relevant economic theory, optimization techniques, probability models, statistical analysis, and use of statistical software.

Prerequisite: Minimum grade of C- in ECON325 and ECON422.

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON441 Theory of International Economics (3 Credits)

Theoretical treatment of international trade and international finance. Includes Ricardian and Heckscher-Ohlin theories of comparative advantage, analysis of tariffs and other trade barriers, international factor mobility, balance of payments adjustments, exchange rate determination, and fiscal and monetary policy in an open economy.

Prerequisite: Minimum grade of C- in ECON326 and ECON325.

Restriction: Must be in a major within the BSOS-Economics department; and must not have completed ECON340, ECON442, or ECON443.

Credit Only Granted for: ECON340, ECON441, ECON442, or ECON443.

ECON442 Globalization and Capital Markets (3 Credits)

Uses models of open-economy macroeconomics to explain the causes and consequences of international capital flows. Analysis is made of private consumption, investment, the government sector, current accounts, the labor market, and the money and foreign exchange markets in small open economies. This framework is then used to study examples of how speculative attacks on currencies, sudden reversals of capital inflows, and the effects of the lack of credibility of economic policy affect economic development.

Prerequisite: Minimum grade of C- in ECON326 and ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor); and must not have completed ECON441.

Credit Only Granted for: ECON441 or ECON442.

ECON443 International Trade and Trade Policy in the New Global Economy (3 Credits)

Examines the economics of international economic integration, including the theory of customs unions and free trade areas, the role of GATT and the WTO, changes in individual countries' foreign trade policies during the new era of globalization, the special role of multinational firms in world trade, and recent controversies about the benefits and costs of globalized trade.

Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics); and must not have completed ECON441.

Credit Only Granted for: ECON441 or ECON443.

ECON444 Research in Globalization (3 Credits)

As globalization continues, individual countries must confront a variety of related issues including rising inequality, decline of domestic industries, climate change, and disputes over intellectual property rights. Various economic models and research methods will be covered to develop the analytic and empirical skills needed to perform independent research in globalization. Students will prepare literature reviews, conduct preliminary empirical investigations using STATA, and produce well-designed research proposals.

Prerequisite: Minimum grade of C- in ECON326 and ECON422.

Restriction: Must be in Economics Bachelor of Science program.

Credit Only Granted for: ECON498G or ECON444.

Formerly: ECON498G.

ECON451 Public Choice (3 Credits)

Analysis of collective decision making, economic models of government, program budgeting, and policy implementation; emphasis on models of public choice and institutions which affect decision making.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON453 Natural Resources and Public Policy (3 Credits)

Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.

Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).

Cross-listed with: AREC453.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: AREC453 or ECON453.

ECON454 Public Finance and Public Policy (3 Credits)

The role of the the public sector in a market economy constitutes the over-arching topic of this course. Emphasis lies on analyzing government expenditure programs and the microeconomics of tax policy.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321 or STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

ECON455 Economics of Education Policy (3 Credits)

Examines the role that government plays in providing and financing education. Analyzes why people invest in education. Considers the effects of education on long-term social and economic outcomes, the behavior of institutions that produce education, and how to design and implement public policies affecting the level and distribution of educational resources. Uses microeconomic models and empirical findings to analyze current issues in education policy.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON468E or ECON455.

Formerly: ECON468E.

ECON456 Law and Economics (3 Credits)

Relationship of the exchange process to the system of institutions and rules that society develops to carry out economic transactions. Topics covered include: Property rights; torts, negligence, and liability; contracts and exchanges; criminal control and enforcement; equity and efficiency issues .

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Prerequisite: At least one intermediate theory course and/or statistics.

Repeatable to: 15 credits if content differs.

ECON460 Industrial Organization (3 Credits)

Examines different theoretical models of firm behavior in markets with varying amounts of market power. Relates theory to specific industries and examines how market structure evolves over time.

Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Science; Economics minor).

ECON461 Economics of Regulation and Antitrust (3 Credits)

Considers government intervention in economic activity of three types: antitrust policy, regulation of natural monopolies, and health safety regulation. Covers theoretical models, real-world policy applications, and empirical studies relevant to the impact of regulation.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON462 Economics of Entrepreneurship (3 Credits)

Economic theory highlights the role of entrepreneurs in fueling economic growth and accomplishing reallocation of resources in response to changes in preferences, technology, demographics, and resource. This course uses empirical evidence to examine the extent to which these predictions are valid. To more fully understand the motivations and constraints relevant to entrepreneurs, student will write a business plan as if s/he were starting a new business.

Prerequisite: Minimum grade of C- in ECON422.

Restriction: Must be in Economics Bachelor of Science program.

Credit Only Granted for: ECON3980 or ECON462.

Formerly: ECON3980.

ECON463 Economics of Sports (3 Credits)

The application of theoretical and empirical economic tools to the sports industry, including competition at professional, collegiate, and international levels. Microeconomic models from labor, industrial organization and public finance will be applied to the sports industry and combined with data from sports markets, providing students with opportunities to produce and interpret economic analysis. The topic of discrimination will also be explored in the context of this particular economic activity.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON465 Health Economics (3 Credits)

An examination of the structure, conduct and performance of the health care market, including a study of physician services, the pharmaceutical industry, the hospital market and health insurance. Students will analyze markets for health care and related products by examining the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Analysis will combine both theoretical models and empirical tools.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Jointly offered with: ECON671.

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON465 or ECON671.

ECON468 Special Topics in Applied Economics (3 Credits)

Selected topics in applied economics. Designed to meet the changing interests of students and staff.

Prerequisite: 1 course with a minimum grade of C- from (BMGT230, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON306).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Repeatable to: 15 credits if content differs.

ECON470 Labor Economics: Theory and Evidence (3 Credits)

Analysis of labor markets in theory and the real world. Topics include labor supply, labor demand, human capital, performance incentives, unemployment, discrimination, and immigration. Students will develop an understanding of how formal economic research is used to analyze U.S. labor markets and how research influences policy debates.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT401).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON470 or ECON471.

ECON471 Labor Market Policies and Research (3 Credits)

Economic analysis of labor based on modern theory and empirical analysis. Focus on public policy, studying the interactions between labor demand and labor supply in the labor market and how policies impact those interactions. Possible policies include welfare policy, minimum wage policy, immigration policy, and anti-discrimination policies. Uses statistical software to summarize and create visualizations of economic data.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).

Restriction: Permission of BSOS-Economics department; Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

Credit Only Granted for: ECON470 or ECON471.

ECON472 Economics of Social Safety Nets (3 Credits)

Analysis of the economic issues associated with social safety nets. Topics to be covered include the cash transfer programs for breaking the cycle of poverty, labor market policies aimed at combating unemployment, childhood interventions to improve human capital development, and the challenges faced by pension systems over the world. The approach is based on a life-cycle perspective. Evidence and experiences from developed and developing countries will be covered.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.

Restriction: Permission of BSOS-Economics department; and must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

ECON481 Environmental Economics (3 Credits)

An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC481.

Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics; Social Data Science-Economics; Economics minor).

Credit Only Granted for: ECON481 or AREC481.

ECON484 The Economics of Climate Change (3 Credits)

The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC454.

Credit Only Granted for: AREC454 or ECON484.

ECON485 Economics of Land Use (3 Credits)

Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC455.

Credit Only Granted for: AREC455 or ECON485.

ECON486 Energy and Environmental Economics (3 Credits)

Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation, climate change, and transportation policies.

Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).

Cross-listed with: AREC456.

Credit Only Granted for: AREC456 or ECON486.

ECON488 Applied Research Practicum (1-3 Credits)

Students gain experience applying economic knowledge and producing research valued by businesses, non-profits, and/or government agencies. Students engage in activities similar to what an intern or entry-level employee would perform. Students work in small groups to find different kinds of data and facts, analyze and interpret this information, and use research findings to develop and present recommendations for simulated clients.

Prerequisite: 1 course with a minimum grade of B- from (BMGT230, ECON321, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).

Recommended: ECON422, ECON402, or ECON424.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON489 Applied Economics Practicum (1-3 Credits)

Students gain experience explaining economic knowledge to people who have not studied economics. Students engage in activities preparing them for careers in banking, business consulting, financial education, wealth management, and related services.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

ECON490 Urban & Regional Economics: Issues and Policies (3 Credits)

Exploration of urban and regional economics and policies, including economic forces leading to formation of city and regional networks. Conceptual and empirical analysis of policies affecting land use, housing, transportation and other aspects of sub-national economic development.

Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON321, BMGT230, ECON230).

Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics minor; Social Data Science-Economics).

Credit Only Granted for: ECON398I or ECON490.

Formerly: ECON398I.

ECON498 Special Topics in Economic Analysis (3 Credits)

Selected topics in economic analysis. Designed to meet the changing interests of students and staff.

Prerequisite: 1 course with a minimum grade of C- from (ECON321, STAT401); and 1 course with a minimum grade of C- from (ECON325, ECON326).

Restriction: Must be in Economics Bachelor of Science program.

Repeatable to: 15 credits if content differs.

ECON499 Independent Research in Economics (1-3 Credits)

Directed research under the supervision of a faculty member. Contact department for additional information.

Prerequisite: 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230, STAT400); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum of 3 credits from ECON400-499 course range.

Restriction: Permission of BSOS-Economics department.

Repeatable to: 6 credits if content differs.

EDCI - Curriculum and Instruction

EDCI288 Special Topics in Teacher Education (1-3 Credits)

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

Repeatable to: 6 credits if content differs.

EDCI386 Experiential Learning (3-6 Credits)

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and junior standing or higher.

EDCI422 Student Teaching in Secondary Schools: Social Studies/ Geography (12 Credits)

Prerequisite: EDCI321.

Corequisite: EDCI420.

EDCI428 Field Experience in Secondary Social Studies Teaching (1 Credit)

Practical experience as an aide to a regular social studies teacher; assigned responsibilities and participation in a variety of teaching/learning activities. Students must reserve one full day per week for internship placement.

Corequisite: EDCI427.

Restriction: Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI438 Field Experience in Second Language Education (1 Credit)

Practical experience as an aide to a regular foreign language teacher; assigned responsibilities and participation in a variety of teaching/learning activities.

Corequisite: EDCI330.

Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Foreign Languages program.

Repeatable to: 3 credits if content differs.

EDCI448 Student Teaching in Secondary Schools: Theatre/English (12 Credits)

Practical experience as an aide to a regular English, speech or drama teacher; assigned responsibilities and participation in a variety of teaching/learning activities.

Prerequisite: EDCI417.

Corequisite: EDCI440.

Restriction: Must be in Secondary Educ: English Language Arts program.

EDCI464 Assessment for Reading (3 Credits)

Examination of reading assessment theory, materials and procedures; Topics include validity and reliability in reading assessment, formal and informal assessment, reading instruction that is informed by ongoing assessment, and the effects of assessment on students and schooling in a diverse society.

Prerequisite: EDCI362.

Restriction: Senior standing. And must be in Elementary Education program; or must be in Early Childhood Education program.

EDCI497 The Study of Teaching (3 Credits)

Identification and examination of learner and teacher outcome variables related to teaching systems, methods, and processes. Methods of conducting classroom research.

Prerequisite: EDCI481.

Corequisite: EDCI489.

EDCI498 Special Problems in Teacher Education (1-6 Credits)

Individual study of approved problems.

Restriction: Must be in a major within EDUC-Teaching, Learning, Policy and Leadership department; or must be in Curriculum and Instruction (Doctoral) program; or must be in Curriculum and Instruction (Master's) program; or permission of EDUC-Teaching, Learning, Policy and Leadership department.

Repeatable to: 6 credits.

EDCI499 Workshops, Clinics, and Institutes (1-6 Credits)

The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits.

EDDI - Education Dialogues

EDDI300 Intergroup Dialogue Facilitator Development & Practicum (3 Credits)

Facilitation is an artform and a science. This course is designed to introduce students to foundational dialogue facilitation skills and social justice frameworks needed to effectively facilitate group interactions across and within social differences. Students will apply the skills learned by facilitating a multi-session dialogue course with either the Common Ground or the Words of Engagement Intergroup Dialogue Program (WeIDP).

Cross-listed with: CPSP300, HONR300.

Restriction: Permission of the Counseling, Higher Education, and Special Education department.

Credit Only Granted for: WEID300, CPSP300, HONR300, or EDDI300.

Formerly: WEID300.

Additional Information: Students must be given permission to enroll and be admitted to the intergroup dialogue facilitator program.

EDCP - Education Counseling and Personnel Services

EDCP101 The Transfer Student in the University (1 Credit)

Support transfer students in making a successful transition to the University. By making students aware of themselves as learners, introducing students to campus resources, and teaching research-based learning strategies, this course empowers students to become active and effective learners.

Credit Only Granted for: EDCP108G or EDCP101.

Formerly: EDCP108G.

EDCP108 College and Career Advancement: Concepts and Skills (1 Credit)

Knowledge and skills designed to enhance college as a learning experience or preparation for life.

Repeatable to: 3 credits if content differs.

EDCP210 Peer Counseling Skills and Mental Health Advocacy (3 Credits)

Introduction to core helping skills in peer counseling settings and three predominant theoretical approaches used in the counseling field (humanistic, psychodynamic, cognitive-behavioral). The course also explores mental health stigma and advocacy. Students will build an understanding of the practical application of underlying principles and theory in counseling and the helping professions, while exploring their own, and societal, biases, assumptions, and attitudes toward mental health.

Restriction: Must not have completed EDCP310; and must not have completed PSYC433.

Credit Only Granted for: EDCP210, EDCP310, or PSYC433.

EDCP230 The Science and Practice of Happiness and Psychological Well-Being (3 Credits)

An introduction to theory and research on positive psychology, subjective well-being, and the psychology of happiness. This will include examination of hedonic and eudaimonic models of well-being and sociocultural understandings of happiness, together with how it relates to health, relationships, money, religion, work, and social media. Students will also explore common misconceptions and myths about happiness and well-being and will engage in a variety of activities designed to deepen their understanding of happiness in their own lives and broader societal trends related to well-being.

EDCP298 Special Problems in Counseling and Personnel Services (1-3 Credits)

Individual instruction in special problems related to counseling, student leadership, and college student development.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP312 Multi-Ethnic Peer Counseling (3 Credits)

Knowledge, skills, and attitude to function as peer helpers of Multi- Ethnic students.

Restriction: Sophomore standing or higher.

Formerly: EDCP310A.

EDCP325 Substance Use and Abuse in American Society (3 Credits)

Incidence, etiology, effects and management of substance use and abuse from perspective of the individual, the family, and society.

EDCP386 Experiential Learning (3-6 Credits)

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and sophomore standing or higher.

EDCP411 Principles of Mental Health (3 Credits)

Mechanisms involved with personal adjustment, coping skills, and the behaviors that lead to maladjustment.

Prerequisite: 9 semester hours in the behavioral sciences; or permission of Counseling, Higher Education and Special Education department.

EDCP420 Advanced Topics in Human Diversity and Advocacy (3 Credits)

This course will build upon students' knowledge of diversity in American society and will examine contemporary topics related to multiculturalism in educational and community contexts as well as strategies for advocacy in such venues.

Restriction: Permission of the Counseling, Higher Education and Special Education department.

EDCP462 Disability in American Society (3 Credits)

Critical examination of the history of discrimination and analysis of current policies toward people with severe physical and mental disabilities.

Restriction: Must have earned a minimum of 30 credits; and sophomore standing or higher.

EDCP489 Field Experiences in Counseling and Personnel Services (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP498 Special Problems in Counseling and Personnel Services (1-3 Credits)

Available only to major students who have formal plans for individual study of approved problems.

Prerequisite: Available only to major students who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP499 Workshops, Clinics, Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Department of Counseling and Personnel Services (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing; clinical experiences in counseling and testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups.

Repeatable to: 6 credits.

EDHD - Education, Human Development

EDHD200 Paradigms and Perspectives in Human Development (3 Credits)

An introduction to the paradigms and perspectives that guide the study of human development across the lifespan in cognitive, social, physical and emotional domains. Topics of study include overlying principles, concepts, assumptions, theoretical frameworks, and research methods that influence ways in which development is conceptualized. The course is designed to provide insight into major questions of the day in human development and how these prevailing perspectives have evolved over time. This course will also help students understand how knowledge of theory and research is translated into practice in a variety of professional settings.

Restriction: Must have 45 or fewer credits; or must be in the Human Development program or Human Development minor.

EDHD201 Learning How to Learn (3 Credits)

Immerses students in the theoretical and empirical study of learning by engaging them in orchestrated experiences and activities drawn directly from the disciplinary research. Students achieve deep understanding of their own learning, as well as the means of enhancing that learning both in school and out-of-school contexts.

EDHD210 Foundations of Early Childhood Education (3 Credits)

Students explore historical and current research in early childhood education, primary models of curriculum and pedagogy in the field, and the relationship between critical aspects of young children's development and the creation of inclusive learning opportunities for all children, including children at risk. The concept of developmentally appropriate practice and its application across different developmental levels and early childhood classrooms will be introduced and connected with discussion in EDHD220 and EDSP211. Students examine issues in developing and implementing high quality early childhood education experiences for young children with and without disabilities, including the influence of family, culture, and community, the needs of children at risk (e.g., poverty, immigrant status, English Language Learners), and the role of assessment in early learning.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD220 Exploring Early Childhood General and Special Education (3 Credits)

Students who are considering a career in education will consider information about the teaching profession. Students reflect on their personal strengths, identify areas of growth, and examine their predisposition to work with young children with and without disabilities. They will discuss the nature of teaching, the moral and philosophic underpinnings that influenced their decision to enter into the teaching professions, as well as the roles and responsibilities of teachers and the characteristics and qualities for effective teachers (teaching styles and teacher's primary role in the classroom).

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD221 Aggression and Violence in Everyday Life: Can Violence Be Prevented? (3 Credits)

History of aggression and violence in the world and in the United States. Examines the extent to which various forms are prevalent today and scientifically supported prevention strategies. Methods of studying aggression are reviewed, as are theories and methods of preventing aggression and violence.

EDHD228 Research Experiences in Human Development (3 Credits)

Provides students with hands-on participation in faculty-supervised laboratory research activities in the Department of Human Development & Quantitative Methodology. Students will learn about the purpose of scientific research and engage in activities that advance their knowledge and skills with regard to its ethical practice.

Restriction: Permission of instructor.

Repeatable to: 6 credits.

EDHD230 Human Development and Societal Institutions (3 Credits)

Development of the individual in the context of relationships with the formal and informal institutions of society. An examination of various aspects of development from the broad perspective of the social sciences.

EDHD231 Inside 21st Century Creativity: How Creative Ideas, Concepts, and Products are Generated (3 Credits)

Mechanisms of the creative mind. Psychological, social, sociological, developmental, cultural, educational, genetic and neural based roots of creativity.

EDHD241 Are Two Languages Better than One: The Science and Controversy of Bilingualism (3 Credits)

Examines the big question: Are two languages better than one? We will study the science of bilingualism: contemporary theories; research; controversies surrounding bilingual education; nature vs. nurture; first language acquisition. Additional studies cover: who is bilingual, how children become bilingual, factors that influence bilingual development, bilingual benefits and impact on brain development; bilingual education policy.

EDHD306 Research Methods in Human Development (3 Credits)

Addresses the scientific concepts and principles central to the study of human behavior and development. Students will learn about basic research methods in studying human behavior in developmental context and will participate in experiential activities, such as conducting observations and collecting self-report data. Major themes: goals of developmental research, fundamental research designs, types of measurement, elements of good scientific writing, and ethical issues in the study of human development.

EDHD310 Your Brain on Education: The Neuroscience of Learning and Development (3 Credits)

Investigation linking research in the brain science of learning and development, including the neural basis of academic skills, to achievement, disability, and broader applications to classroom learning. This course will focus on areas of education including language (spoken and written), conceptual change, numerical/quantitative processing, and social cognition as well as burgeoning areas of neuroscientific research in general cognitive processes such as attention, memory, and executive processing. These topics will be discussed with respect to typical and atypical development with some focus on developmental disabilities including autism, specific language impairment, reading and math impairment, and attention deficit disorders among others. This course will focus on both the theoretical perspectives and pragmatic issues of how evidence regarding brain development can or may be translated into useful or misleading information for educators, professionals, and parents/guardians of our children.

Prerequisite: PSYC100.

EDHD313 Creative Experiences for Young Children (3 Credits)

Provides preservice teachers with an understanding of the current research on the development of creativity and integration of the arts into an early childhood classroom.

Restriction: Must be in Early Childhood Education program.

Credit Only Granted for: EDHD313 or EDCI313.

Formerly: EDCI313.

EDHD314 Reading in the Early Childhood Classroom (3 Credits)

Early childhood students introduced to current research/methods on teaching language arts. Focus on development of linguistic and cognitive processes in emergent literacy and beginning reading and writing.

Application to models for the instruction and assessment of reading/writing in preschool-aged children. Also includes material on classroom-based interventions for young children at risk of reading failure due to learning difficulties. Includes Field Experiences.

Prerequisite: EDHD210, EDHD220, and EDSP211.

Corequisite: EDHD425; and corequisite: EDHD419 or EDSP420.

Restriction: Must be enrolled in Professional Early Childhood/Early Childhood Special Education Program; and minimum cumulative GPA of 2.75.

EDHD315 Reading in Early Childhood Classroom: Instruction and Materials Part II (3 Credits)

This course builds on the theories and teaching strategies of EDHD314. Students will focus on teaching of reading and writing to primary grade students.

Prerequisite: EDHD314.

Restriction: Must be in Early Childhood Education program.

EDHD319 Selected Topics in Human Development (3 Credits)

Selected topics in human development in relation to contemporary culture.

Repeatable to: 6 credits if content differs.

EDHD320 Human Development Through the Life Span (3 Credits)

Central concepts related to parameters of human development, individual and social, which arise throughout the life span. Continuity and change within the developing individual.

EDHD321 The Young Child as Scientist (2 Credits)

Provides theoretical and practical knowledge for teaching science in early childhood classrooms. Appropriate teaching strategies and materials of instruction are presented for diverse settings. Includes field experience.

Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.

Corequisite: EDHD323, EDHD322, EDHD315, EDHD435, and EDHD427.

Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD322 The Young Child as Mathematician (3 Credits)

Provides a theoretical and instructional framework for mathematics instruction in early childhood classrooms. Development of understanding of early childhood mathematics that emphasizes how and in what environment young children learn mathematics. Current thinking about both content and instructional strategies for mathematics curriculum, including identification and review of standards and expectations for learning outcomes for all children. Assessment strategies for evaluating all children will be addressed. Includes Phase 1 Field Experience.

Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP 430, EDSP 433; OR Track 2: Must have completed EDHD415, EDHD 424.

Corequisite: EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD323 Children Study their World (3 Credits)

Provides theoretical and instructional framework for social studies instruction in inclusive early childhood classrooms. Course will reflect current thinking about content and instructional strategies for social studies curriculum; identification and review of standards/expectations for learning outcomes for all children; assessment strategies for evaluating of social studies objectives; use of data driven instruction to support all children; observation of children's understanding of their social world in field placements; opportunities to explore these understandings through interviews with children and the implementation of activities. Includes Phase 1 Field Experience.

Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430, EDSP433; or Track 2: Must have completed EDHD415, EDHD424.

Corequisite: EDHD322, EDSP417, EDHD441, EDHD443, EDHD442, EDHD444, and EDSP321.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and senior standing or higher; and minimum cumulative GPA of 2.75.

EDHD386 Experiential Learning (3-6 Credits)

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department; and junior standing or higher.

EDHD390 Career Paths and Internship Preparation in Human Development (1 Credit)

Prepares degree candidates in Human Development for career paths in the field including initial job seeking skills, knowledge necessary for entry into various professions and preparation for the program internship requirement

Restriction: Must be in the Human Development major.

EDHD398 Internship in Human Development (3 Credits)

A supervised internship providing opportunities to integrate theory and practice to get hands-on applied or research experience in the field of human development.

Prerequisite: EDHD200, EDHD201, EDHD320, and EDHD390.

Restriction: Must be in the Human Development Major.

Repeatable to: 6 credits.

EDHD400 Introduction to Gerontology (3 Credits)

Multidisciplinary survey of the processes of aging. Physiological changes, cultural forces, and self-processes that bear on quality of life in later years. Field study of programs, institutions for elderly, individual elders, their families and care providers.

EDHD402 Social Development (3 Credits)

Social Development. Critical concepts and ideas of the study of child and adolescent social development. Focus on changes in interpersonal relationships, emotions, achievement-related behavior and competence, and functioning within the broader social context.

Recommended: EDHD411.

EDHD405 Information Weaponization: Thinking Critically in a Changing World (3 Credits)

Contemporary challenges--such as climate change, food, energy and water security, and deadly virus transmission--demand that people think critically. While many societal challenges are seriously impacting local, regional and global communities, an increasing availability of information has contributed to what many call a "Post-Truth Era." We will consider the institutional use of post-truth a form of information weaponization. This course asks how information weaponization impacts the evaluation of valid lines of evidence and explanations. How do we evaluate and what is needed to improve individuals' evaluations of claims? This course will focus on mythological and unproductive thinking, increased digital literacy, enhanced reasoning, evaluation skills, and critical thinking.

Credit Only Granted for: HNUH238Y or EDHD405.

Formerly: HNUH238Y.

EDHD411 Child Growth and Development (3 Credits)

Theoretical approaches to and empirical studies of physical, psychological and social development from conception to puberty. Implications for home, school and community.

EDHD412 Infant Development (3 Credits)

Infant development across domains, including perceptual, motor, cognitive, language, social and emotional functioning from pre-natal through third year of life.

EDHD413 Adolescent Development (3 Credits)

Adolescent development, including special problems encountered in contemporary culture. Observational component and individual case study.

EDHD414 Development of the Scientific Mind Across the Lifespan (3 Credits)

Study of the educational, cognitive, social, and cultural factors that underlie the development of the scientific mind across the lifespan.

Recommended: EDHD320.

EDHD415 Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms (3 Credits)

Teachers must have knowledge and skill regarding how to appropriately manage the classroom so that all children, those with and without disabilities, will be able to learn from their school experiences. Classroom management extends beyond responding to student misbehavior to include a comprehensive approach to addressing the social/emotional competence of typically and atypically developing children. The goal of this course is to prepare early childhood teachers who are able to sensitively, responsively, and effectively manage a classroom of young students who are typically developing and those who have disabilities. Includes Field Experience.

Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).

Corequisite: EDSP423, EDSP424, and EDHD431.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD420 Cognitive Development and Learning (3 Credits)

Current developmental theories of cognitive processes such as language, memory, and intelligence and how differences in cognitive level (infancy through adolescence) mediate learning of educational subject matters.

Prerequisite: EDHD320, EDHD411, PSYC341, or PSYC355; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD421 Developmental Perspectives on Peer Interactions, Relationships, and Groups (3 Credits)

Explores the historical and theoretical foundations of contemporary research on peer interactions, relationships, and groups. It examines the interplay between individual characteristics, social behaviors, and relationships, and familial and extra-familial factors with an emphasis on diversity in the peer experience across various cultural, ethnic, gender, ability, and socioeconomic contexts.

Recommended: EDHD411 and EDHD306.

EDHD424 Culture, School & Community: Contexts for Learning (PreK-3rd) (3 Credits)

Explores the development of the young child (with and without disabilities, as well as those at environmental risk) in the context of the family and community, with emphasis on the impact of state, federal and school system policy on the child's world. Course will consider issues within the family, and the wider socio-cultural ecology that relate to the child's ability to develop and learn. In addition, students will develop strategies for respectful and culturally responses approaches to actively engage families in their children's development and learning. Includes Field Experience.

Prerequisite: EDHD425 and EDHD314; and (EDHD419 or EDSP420).

Corequisite: EDSP315, EDHD431, EDHD415, and EDSP423.

Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD425 Language Development and Reading Acquisition (3 Credits)

This course focuses on young children's language development and the relationship between language and reading acquisition. Students will learn: concepts central to language development; language achievements at different ages; concepts of emergent literacy; models of reading acquisition and skilled reading.

EDHD426 Cognitive and Motivational Literacy Content (3 Credits)

Students preparing for secondary teaching will learn about the cognitive and motivational aspects of literacy and learning from text for the content areas of literature, science, history and mathematics. Different evidenced-based literacy approaches appropriate for content learning are presented. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

EDHD427 Constructing and Integrating the Early Childhood Curriculum (3 Credits)

Explores the world from the child's perspective and constructs curriculum based on cognition, learning, and children's experiences. The integrated curriculum is the overarching framework for this course. Includes field experience.

Prerequisite: EDHD314, EDHD313, EDHD424, and EDSP470.

Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD435.

Restriction: Must be in Early Childhood Education program; and senior standing.

EDHD431 Child Development and Learning, Three to Eight Years (3 Credits)

Provides a basic understanding of child development theory and research, as well as specific knowledge about the development of children during the early and middle childhood "stages," specifically from ages 3 years to 8 years. A major emphasis will be the application of theory and research from the field of educational psychology to an understanding of how young children learn and achieve academically. Because the course will address the developmental and academic functioning of children with and without disabilities, a particular focus will be on individualization.

Prerequisite: Minimum grade of C- in EDHD314 and EDHD425; and 1 course with a minimum grade of C- from (EDHD419, EDSP420).

Corequisite: EDSP423 and EDSP315; and TRACK I: Must be concurrently enrolled in EDSP430, EDSP433; or TRACK 2: Must be concurrently enrolled in EDHD415, EDHD424.

EDHD432 Internship in EC/ECSE (12 Credits)

Interns spend five days per week in the classroom/home-based setting (under the mentorship of a certified teacher) where they gradually assume full responsibility for the planning, delivery and assessment of instruction or an intervention. Track I students will have an Infant/Toddler placement with special educator, Track II students will be in a Pre-K/K or Grade 1,2,3 classroom with general or special educator (must be opposite grade level and mentor from Phase I/fall of the senior year).

Prerequisite: EDHD323, EDHD322, EDSP417, EDHD441, EDHD442, EDHD443, EDHD444, and EDSP321.

Corequisite: EDHD437.

Restriction: Must be in Early Childhood and Early Childhood Special Education program; and senior standing or higher.

EDHD434 Child Development, Birth to Three Years (3 Credits)

Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.

Prerequisite: EDHD210, EDHD220, and EDSP211.

Corequisite: EDHD314 and EDHD425.

Cross-listed with: EDSP420.

Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

Formerly: EDHD419A.

EDHD435 Effective Components of the Early Childhood Classroom (3 Credits)

Explores three topics integral to effective, child-centered early childhood classrooms: assessment, classroom management and parent involvement. Includes field experience.

Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.

Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD427.

Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD436 Cognition and Motivation in Content Area Literacy for Middle-School Students (3 Credits)

Cognitive and motivational processes of literacy and learning from texts across subjects. Structured approaches to using reading, writing, and speaking for content learning based on approaches to knowledge, motivation, and strategies. Classroom contexts that enable middle-school students to engage with diverse texts and Internet resources are provided

EDHD437 EC/ECSE Teachers as Researchers and Reflective Practitioners (3 Credits)

Students use action research to improve instructional delivery or familial interactions in an effort to enhance the overall educational experiences/outcomes of children in classrooms or home-based contexts. Students will design and implement an action research project in an effort to meet a goal articulated in an applicable Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP) as the basis of their project.

Prerequisite: Minimum grade of C- in EDHD322, EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

Corequisite: EDHD432.

EDHD440 Adult Development (3 Credits)

Major conceptual approaches to the study of adult development including physical, cognitive, social, emotional and self processes that take place within individuals as they progress from emerging adulthood through middle age.

Prerequisite: EDHD320; or permission of EDUC-Human Development and Quantitative Methodology department.

Recommended: EDHD413.

EDHD441 Data Driven Decision Making in EC/ECSE (1 Credit)

Students will be exposed to formative (e.g., classroom based, ongoing) and summative (e.g., standardized testing) assessments. Students will collect and analyze formative assessment data from their internship classrooms as the bases of planning and delivering instruction to meet the diverse needs of all learners. They will also analyze standardized assessment data to gain an understanding of measures used to determine cross-school and cross-teacher effectiveness. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP433 or TRACK 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDSP321, EDSP417, EDHD442, EDHD443, and EDHD444.

EDHD442 Interventions for Children with Behavioral Challenges (1 Credit)

Students will expand knowledge of and develop skills to address challenging behaviors in inclusive early childhood classrooms. Students examine the causes underlying challenging behaviors during the early childhood years, and identify appropriate resources and support services for working with families to develop a unified approach when responding to behavioral challenges. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.

Corequisite: EDSP321, EDSP417, EDHD322, EDHD323, EDHD441, EDHD443, and EDHD444.

EDHD443 Interventions for Children with Social and Communication Challenges (1 Credit)

Students will learn about the characteristics of children with autism spectrum disorder, pervasive developmental disorder, social communication disorder, and other related challenges and will be equipped to meet the needs of this group of children in the early childhood classroom. The utilization of Universal Design for Learning (UDL), Response to Intervention (RTI) and other early childhood special education approaches, as they apply to this specific group of children, will be addressed. Interventions designed to improve the functioning of children with autism spectrum disorders and related disorders will be reviewed. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.

Corequisite: EDHD322, EDSP321, EDSP417, EDHD323, EDHD441, EDHD442, and EDHD444.

EDHD444 Action Research in EC/ECSE (1 Credit)

Students will become familiar with the EC/ECSE research process, literature and how teachers use action research to improve pedagogy and the experiences of children in classrooms or home-based contexts. Students will utilize this knowledge, as well as either a goal in an Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP), to develop an action research study commenced during the following semester. Includes Phase I field experience.

Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDHD441, EDHD442, EDHD443, EDSP417, and EDSP321.

EDHD460 Educational Psychology (3 Credits)

Application of psychology to learning processes and theories. Individual differences, measurement, motivation, emotions, intelligence, attitudes, problem solving, thinking and communicating in educational settings.

Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD474 Human Development Honors Seminar (3 Credits)

This seminar will have three overarching goals: (1) expose students to fundamental research questions in human development; (2) create professional development opportunities through invited speakers and (3) communicate an understanding of diversity, equity, and inclusion in all aspects of the research process.

Restriction: Must be in the Human Development Honors program.

EDHD475 Human Development Honors Thesis Preparation Course (3 Credits)

This is an individual instruction course with the thesis faculty advisor. In this course, students will work towards writing and completing their honors thesis, which will include a review of relevant literature, the rationale for the research project, research questions, methods for data collection, analysis plan, results, and a discussion of the findings. Faculty advisors will communicate the goals of the major surrounding issues of diversity, equity, and inclusion.

Prerequisite: EDHD474.

Restriction: Must be in the Human Development Honors program.

EDHD476 Human Development Honors Thesis Research (3 Credits)

This is an individual instruction course with the thesis advisor, culminating in the presentation and defense of the student's thesis. Students will address the aspects of their research that reflect diversity, equity, and inclusion.

Prerequisite: EDHD475.

Restriction: Must be in the Human Development Honors program.

EDHD488 Special Topics in Human Development (3 Credits)

Special and intensive treatment of current topics and issues in human development.

Prerequisite: EDHD320.

Recommended: PSYC100.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits if content differs.

EDHD489 Field Experiences in Human Development (3-6 Credits)

Planned field experience (internship or research-based activities) related to Human Development. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDHD498 Special Research Problems in Human Development (1-4 Credits)

Exploration of current research problems in the study of human development. Available only to students who have definite plans for individual study of approved research problems. Credit according to extent of work.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDHD499 Workshops, Clinics, and Institutes (1-6 Credits)

The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits.

EDHI - Education Leadership, Higher Ed and International Ed

EDHI288 Special Problems in Education (1-6 Credits)

Available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore students who have definite plans for individual study of approved problems relative to their preparation for teaching.

Formerly: EDPL288.

EDHI338 Teaching and Learning about Cultural Diversity through Intergroup Dialogue (1-3 Credits)

Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on difficult topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.

Prerequisite: Completion of on-line registration form.

Repeatable to: 6 credits if content differs.

Formerly: EDPL288.

EDHI488 Special Topics in Education Policy and Administration (1-3 Credits)

Special and intensive treatment of current topics and issues in education policy and administration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits.

Formerly: EDPL488.

EDHI489 Field Experiences in Education (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL489.

EDHI498 Special Problems in Education (1-3 Credits)

Available only to students who have definite plans for individual study of approved problems.

Prerequisite: Available only to students who have definite plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Formerly: EDPL498.

EDHI499 Workshops, Clinics, and Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.

Repeatable to: 6 credits.

Formerly: EDPA499.

EDMS - Measurement, Statistics, and Evaluation**EDMS410 Classroom Assessment (3 Credits)**

Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.

Restriction: Junior standing or higher.

EDMS451 Introduction to Educational Statistics (3 Credits)

Introduction to statistical reasoning; location and dispersion measures; computer applications; regression and correlation; formation of hypotheses tests; t-test; one-way analysis of variance; analysis of contingency tables.

Restriction: Sophomore standing or higher.

EDMS489 Field Experiences in Measurement and Statistics (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 4 credits.

EDMS498 Special Problems in Measurement and Statistics (1-3 Credits)

Available only to education majors who have formal plans for individual study of approved problems.

Prerequisite: Available only to education majors who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

Repeatable to: 6 credits.

EDPS - Education Policy Studies**EDPS310 Foundations of Education (3 Credits)**

Social context of education and conflicts over philosophies, values, and goals that are reflected in educational institutions in our pluralistic society. Helps teachers become reflective, critical thinkers about the social and philosophical issues they face and the choices they make.

Credit Only Granted for: EDPL301 or EDPS301.

Formerly: EDPL301.

EDPS401 Educational Policy, and Social Change (3 Credits)

An examination of education policy in relation to the social environment and change. Contemporary education and social issues are examined, including technology as a complex force which influences social change. This is a Social Foundations course.

Credit Only Granted for: EDPL401 or EDPS401.

Formerly: EDPL401.

EDSP - Education, Special**EDSP210 Foundations of Special Education: Inclusive Practices (3 Credits)**

Students examine historical foundations of special education, including legislation; review components necessary for effective service delivery; and develop an understanding of the role of collaboration and consultation with parents, school personnel and other professionals.

Restriction: Sophomore standing or lower.

Credit Only Granted for: EDSP210, EDSP211 or EDSP470.

EDSP211 Foundations of Special Education: Inclusive Practices (3 Credits)

Students examine historical foundations of special education, including legislation; review components necessary for effective service delivery; and develop an understanding of the role of collaboration and consultation with parents, school personnel and other professionals.

Restriction: Sophomore standing or lower; and permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP210, EDSP211 or EDSP470.

EDSP220 Disability in Community: Access, Accommodation, and Adaptation (3 Credits)

Examines the concept of disability in a variety of community settings. Drawing on classic and contemporary readings in psychology, sociology and special education, the course will couple conceptual and historical understanding of disability with first-hand service-learning experiences in the community. Students will develop a plan in several phases that encompasses principles of Universal Design for Living/Learning (UDL) to study and participate in community-based activities.

EDSP288 Special Topics in Teacher Education (1-3 Credits)

Restriction: Must be in a major in EDUC-College of Education; or permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits if content differs.

EDSP298 Special Problems in Teacher Education (1-6 Credits)

Available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching. Credit according to extent of work.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and available only to freshmen and sophomore education majors who have definite plans for individual study of approved problems relative to their preparation for teaching.

EDSP310 International Perspective on Educational Access for People with Disabilities (3 Credits)

A deep dive into the intersectionality of disability, culture, social norms, policy and more that impacts educational access for people with disabilities in a global context.

EDSP311 Peer Mentor Training and Certification (3 Credits)

Opportunity for peer mentor training and field experience for national CRLA certification (crla.net) to become a certified peer mentor by learning about and providing inclusive support for students with intellectual disabilities (ID) in the inclusive post-secondary TerpsEXCEED program at UMD. Students will develop an understanding of disability inclusion and ways to support students and build friendships through a mentoring relationship. Direct application of content instruction with weekly field experience allows students to maximize peer mentoring scholarship-to-practice understanding and application. The course trains peer mentors who provide same-age academic, social, and career mentoring supports for TerpsEXCEED students with intellectual disabilities on campus.

EDSP315 Inclusive Instruction: Reading Methods II (3 Credits)

Focus on current research and methods of teaching reading in the primary grades. Examination of development of a balanced literacy program of children of all reading levels in inclusive early childhood classrooms. Students will learn to select and use a variety of evidence-based reading strategies and assessment tools for reading and writing instruction. Includes field experiences.

Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).

Corequisite: EDSP423 and EDHD431; and track 1: Must be concurrently enrolled in EDSP430 and EDSP433; OR Track 2: Must be concurrently enrolled in EDHD415 and EDHD424.

EDSP321 The Young Child As Scientist (3 Credits)

A theoretical and pedagogical framework for evidence-based inclusive science instruction in inclusive early childhood classrooms. Examination of principles of inquiry-based science learning and develop strategies for helping children acquire fundamental problem-solving skills that may be applied to understanding a wide array of science content. Assessment strategies for evaluating the achievement of science objectives, and the achievement for all children will be addressed. Includes field experience.

Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP376 Fundamentals of Sign Language (3 Credits)

Receptive and expressive skills in American Sign Language. Examination of the causes of deafness, characteristics of deaf education, and aspects of the culture of the deaf community.

Credit Only Granted for: EDSP376 or CHSE376.

Formerly: EDSP376.

EDSP386 Experiential Learning (3-6 Credits)

Prerequisite: Learning proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

EDSP400 Instruction of Students with Severe Disabilities I (3 Credits)

Functional assessment procedures and instructional methods for students with severe disabilities.

Restriction: Must be in Special Education program. Jointly offered with EDSP602.

Credit Only Granted for: EDSP400 or EDSP602.

EDSP401 Teaching Students with Disabilities in Elementary Classrooms (3 Credits)

This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.

Restriction: Permission of EDUC-Special Education department.

Credit Only Granted for: EDSP401 or EDSP499F.

Formerly: EDSP499F.

EDSP402 Field Placement: Severe Disabilities I (1 Credit)

Practicum experience in settings serving students with severe disabilities.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP403 Supporting Access for Students with Multiple Disabilities Across Settings (3 Credits)

Knowledge and practices in characteristics of multiple disabilities, assessment, individualized educational programming, universal design processes for instruction, assistive technology, environmental accessibility, and collaboration.

Prerequisite: EDSP400 or EDSP602.

Jointly offered with: EDSP603.

Credit Only Granted for: EDSP403 or EDSP603.

EDSP404 Methods of Teaching Autistic Students (3 Credits)

Characteristics of children and youth diagnosed with an autism spectrum disorder (ASD), assessment, and evidence-based instructional methods in teaching autistic students who come from diverse ethnic, cultural, and socio-economic backgrounds.

Jointly offered with: EDSP604.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDSP404 or EDSP604.

EDSP410 Instruction of Students with Severe Disabilities II (3 Credits)

Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.

Restriction: Must be in Special Education program. Jointly offered with EDSP614.

Credit Only Granted for: EDSP410 or EDSP614.

EDSP411 Foundations of Technology Integration for Curriculum Access (3 Credits)

Addresses ways to integrate technology and Assistive Technology (AT) into content area instruction, use Accessible Educational Materials (AEM), and the Universal Design for Learning (UDL) framework to evaluate, analyze, and develop responsive instruction.

Prerequisite: EDSP210 or EDSP470.

Restriction: Must be in Special Education program.

EDSP413 Principles and Practices in Positive Behavior Interventions and Classroom Supports (3 Credits)

Use of positive behavior supports to promote both classwide and individual student behavior skills through function-based behavior assessment, establishing classroom expectations, and examining common misbehaviors that often result in learning loss.

Jointly offered with: EDSP613.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP413 or EDSP613.

EDSP415 Assessment Techniques and Practices in Special Education (3 Credits)

Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and intervention planning within a Multi-Tiered System of Supports (MTSS).

Recommended: STAT100; or SOCY201.

Jointly offered with: EDSP615.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP415 or EDSP615.

EDSP416 Reading and Writing Instruction in Special Education I (3 Credits)

Assessment and instruction of reading and writing skills for students in special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP616.

Credit Only Granted for: EDSP416 or EDSP616.

EDSP417 Reading Diagnosis and Assessment (3 Credits)

Reading Diagnosis and Assessment prepares teacher candidates to assess children in general and special early childhood education settings in the areas of reading and writing in order to plan for instruction. The course will focus on diagnostic, screening, progress monitoring, and outcome assessments in early and beginning literacy. The course is designed to provide participants with the knowledge and skills necessary to collect and use a wide range of assessment data in general education and special education settings. Includes field experience.

Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.

Corequisite: EDHD322, EDHD323, EDSP321, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP420 Child Development, Birth to Three Years (3 Credits)

Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.

Prerequisite: EDHD210, EDHD220, and EDSP211.

Corequisite: EDHD314 and EDHD425.

Cross-listed with: EDHD434.

Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.

Formerly: EDHD419A.

EDSP422 Curriculum and Instruction: Early Childhood Special Education (3 Credits)

Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades.

Restriction: Must be in Special Education program. Jointly offered with EDSP627.

Credit Only Granted for: EDSP422 or EDSP627.

EDSP423 Assessment in Early Childhood Special Education (3 Credits)

Assessment procedures for infants and young children with disabilities, birth through grade 3.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP423 or EDSP624.

EDSP424 Field Placement in Special Education: Early Childhood II (2-4 Credits)

Field experience in early childhood special education.

Restriction: Must be in Special Education program.

EDSP425 Pre-Internship I (1 Credit)

This required EDSP field placement is a 3-hour per week seminar and field placement that meets across 15 weeks. Opportunities are provided to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in a four-week experience in a high incidence placement AND a four-week experience in a low incidence (LI) placement. The purpose is to provide each special education teacher candidate (TC) with practical experience to complete field-based requirements and begin to meet the CEC Initial Preparation Standards (2012). Furthermore, since EDSP 425 is the first internship experience in the Special Education Program in the College of Education at University of Maryland, teacher candidates will become familiar with the Special Education Program, College of Education, Maryland State Department of Education (MSDE), Counsel for Accreditation of Educator Preparation (CAEP), and Council for Exceptional Children (CEC) expectations and requirements for graduation and teacher licensure.

Corequisite: EDSP451 and EDSP400.

Restriction: Must be in the Special Education major.

EDSP426 Pre-Internship II (1 Credit)

A 3-hour per week seminar and field placement that meets across 15 weeks. Teacher candidates will assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.

Corequisite: EDSP415 and EDSP416.

Restriction: Must be in the Special Education major.

EDSP430 Early Intervention: Early Childhood Special Education (3 Credits)

Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP430 or EDSP631.

EDSP433 Families and Culture in Early Intervention (Birth-5) (3 Credits)

Provides students with the skills and information they need to work effectively with families of young children (birth to age 5) who have or are at risk for disabilities in early childhood or early intervention programs. Students will review current local, state and federal policies establishing the rights of families of infants and young children with disabilities to participate in decision making for their child. We will discuss relevant theoretical and research literature as well as the cultural and contextual issues involved in working with families of very young children. Includes field experiences.

Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).

Corequisite: EDSP430, EDSP315, and EDHD431.

EDSP434 Field Placement in Special Education: Secondary Middle I (2-4 Credits)

Field experience in secondary middle special education.

Restriction: Must be in Special Education program.

EDSP435 Field Placement in Special Education: Secondary Middle II (2-4 Credits)

Field experience in secondary middle special education.

Restriction: Must be in Special Education program.

EDSP443 Language and Literacy Acquisition in Children with Disabilities (3 Credits)

Language and literacy acquisition and characteristics of typical and atypical language development in supporting students with reading and writing disabilities.

Restriction: Must be in Special Education program.

Additional Information: This course is the first of four reading courses required by the Maryland State Department of Education for teacher certification in Special Education.

EDSP451 Curriculum and Instruction: Elementary/Middle Special Education (3 Credits)

Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.

Restriction: Must be in Special Education program. Jointly offered with EDSP652.

Credit Only Granted for: EDSP451 or EDSP652.

EDSP452 Internship I: Elementary/Middle Special Education (2-4 Credits)

Field experience in elementary/middle school special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP692.

Credit Only Granted for: EDSP452 or EDSP692.

EDSP453 Methods and Models of Instruction: Elementary Special Education (3 Credits)

Focus on models and methods of instruction responsive to the cognitive, linguistic, and cultural characteristics of elementary students in special education.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP453 or EDSP653.

EDSP454 Field Placement in Special Education: Elementary II (2-4 Credits)

Field experience in elementary special education.

Restriction: Must be in Special Education program.

EDSP455 Assessment in Elementary Special Education (3 Credits)

Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.

Restriction: Must be in Special Education program. Jointly offered with EDSP654.

Credit Only Granted for: EDSP455 or EDSP654.

EDSP466 Issues and Models of Instruction: Middle/Secondary Special Education (3 Credits)

Issues, legislation, and service models in middle/secondary special education. Emphasis on career and vocational education, self-determination, and transition.

Restriction: Must be in Special Education program. Jointly offered with EDSP664.

Credit Only Granted for: EDSP466 or EDSP664.

EDSP470 Introduction to Special Education (3 Credits)

Designed to give an understanding of the needs of all types of exceptional children.

Restriction: Must not have completed EDSP210.

Credit Only Granted for: EDSP210, EDSP211 or EDSP470.

EDSP484 Reading and Writing Instruction in Special Education II (3 Credits)

Focus on the development of reading and writing programs for students in special education. Builds on foundations established in EDSP416.

Prerequisite: EDSP416.

Restriction: Must be in Special Education program. Jointly offered with EDSP684.

Credit Only Granted for: EDSP484 or EDSP684.

EDSP485 Assessment and Instruction in Mathematics in Special Education (3 Credits)

Instructional methods and assessment in mathematics in special education.

Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP683.

Credit Only Granted for: EDSP485 or EDSP683.

EDSP486 Promoting Prosocial Behavior in Special Education (3 Credits)

Focus on social development among students with and without disabilities, the relationship between pedagogy and student behavior, and classroom, school, and community approaches for developing prosocial behavior.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP486 or EDSP686.

EDSP487 Collaborative Partnerships in Special Education (3 Credits)

Strategies for positively collaborating with families, practitioners, and community stakeholders to implement Specially Designed Instruction (SDI) for students with disabilities.

Jointly offered with: EDSP687.

Restriction: Must be in Special Education program.

Credit Only Granted for: EDSP487 or EDSP687.

EDSP488 Selected Topics in Teacher Education (1-3 Credits)

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; or must be in a major in EDUC-College of Education.

Repeatable to: 6 credits if content differs.

EDSP489 Field Experiences in Special Education (1-4 Credits)

Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP490 Teacher Candidate Research Seminar in Special Education (3 Credits)

Study of current issues and research concerning the education of students in special education.

Restriction: Must be in Special Education program.

EDSP495 Internship II: Elementary/Middle Special Education (6-12 Credits)

Internship II is a full-time 15 week field-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their field placement experience.

Corequisite: EDSP490.

Jointly offered with: EDSP695.

Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)).

Credit Only Granted for: EDSP495 or EDSP695.

EDSP498 Special Problems in Special Education (1-6 Credits)

Available only to education majors who have definite plans for individual study of approved problems. Credit according to extent of work.

Prerequisite: Available only to education majors who have definite plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP499 Workshops, Clinics, and Institutes in Special Education (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the special education department (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing. Laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.

Repeatable to: 6 credits if content differs.

EDUC - Education

EDUC386 Experiential Learning (3-6 Credits)

Restriction: Permission of EDUC-College of Education; and junior standing or higher.

EDUC388 Special Topics in Education (3 Credits)

Restriction: Permission of EDUC-College of Education.

Repeatable to: 6 credits if content differs.

EDUC401 International and Multicultural Perspectives in Education (3 Credits)

Comparison of historical changes and current challenges, and how culture, diversity and tolerance in the US and Netherlands impacts education systems. Experiential visits to historical sites, educational institutions and notable landmarks, with a critical reflection on similarities, differences and intersections of culture, diversity, tolerance and change.

Restriction: By permission of the College of Education and the Education Abroad Office .

Credit Only Granted for: EDUC498I or EDUC401.

Formerly: EDUC498I.

Additional Information: This is a 3-week living-learning study abroad experience in the Netherlands, Germany and Belgium. The course is offered through the Education Abroad office. Prospective students must complete the MYEA application. Myea.umd.edu.

EDUC478 Using Information Technology in Schools (1-3 Credits)

Strategies, resources, tools and organizational concepts for using technology to facilitate classroom learning and school administrative functions.

Restriction: Permission of EDUC-College of Education; and junior standing or higher.

Repeatable to: 6 credits if content differs.

EDUC498 Selected Topics in Education (1-3 Credits)

Current topics and issues in education.

Restriction: Permission of EDUC-College of Education.

Repeatable to: 9 credits if content differs.

EDUC499 Honors Thesis (1-6 Credits)

Individual thesis work under supervision of faculty advisors; includes periodic seminar meetings with other honors students engaged in thesis work.

Prerequisite: Admission to College Honors Program.

Restriction: Permission of EDUC-College of Education.

ENAE - Engineering, Aerospace

ENAE100 The Aerospace Engineering Profession (1 Credit)

Overview of salient aspects of professional practice of Aerospace Engineering. Introduction to the range of technical expertise needed to succeed in the profession and the objectives of the various parts of the Aerospace Engineering program at UMCP in supporting students' efforts in gaining the required knowledge and skills. Familiarization with departmental faculty and their areas of research, creation of links with other students, professional society student chapters, and available resources. Discussion of ethical issues, business requirements, and their interactions with technical developments.

Recommended: ENES100 and MATH140.

ENAE200 Aerospace Engineering Profession II (1 Credit)

Overview of the engineering profession as it pertains to the role of the engineer in society, professional practice and ethical standards, career development, opportunities and need for lifelong learning, importance of safety and standards, effective written, visual, and oral communications, and the impact of the engineering profession on global issues.

Recommended: ENAE100.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE202 Computing Fundamentals for Engineers (3 Credits)

Introduction to computational tools for the solution of engineering problems. C++ & MATLAB programming including branching and loops, functions, file handling, arrays, and data structures. Students will be introduced to object-oriented programming, basic computing, algorithms, and principles of software engineering.

Corequisite: MATH141.

Credit Only Granted for: ENAE202 or ENME202.

ENAE283 Introduction to Aerospace Systems (3 Credits)

Introduction to airplanes and space vehicles as aerospace systems. Fundamentals that describe these systems. Elements of aerodynamics, airfoils and wings. Airplane performance, stability and control. Aircraft and rocket propulsion. Fundamentals of orbital motion. Aspects of vehicle conceptual design.

Prerequisite: PHYS161, MATH141, and ENES102.

Corequisite: PHYS261 and PHYS260.

Restriction: Must be in Engineering: Aerospace program.

Credit Only Granted for: (ENAE281 and ENAE282) or ENAE283.

Formerly: ENAE281 and ENAE282.

ENAE288 Topics in Aerospace Engineering (1-3 Credits)

Introductory topics in the field of aerospace engineering.

Restriction: Permission of ENGR-Aerospace Engineering Department.

Repeatable to: 6 credits if content differs.

ENAE301 Dynamics of Aerospace Systems (3 Credits)

Kinematics and dynamics of three dimensional motion of point masses and rigid bodies with introduction to more general systems. Primary emphasis on Newtonian methods. Practice in numerical solutions and computer animation of equations of motion using MATLAB.

Prerequisite: PHYS271, MATH461, PHYS270, MATH246, ENAE283, ENAE202, ENES102, and MATH241.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE311 Compressible Aerodynamics (3 Credits)

Fundamentals of aerodynamics. Elements of compressible flow. Normal and oblique shock waves. Flows through nozzles, diffusers and wind tunnels. Elements of the method of characteristics and finite difference solutions for compressible flows. Aspects of hypersonic flow.

Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE324 Aerospace Structures (4 Credits)

Analysis of torsion, beam bending, plate bending, buckling and their application to aerospace.

Prerequisite: ENES220.

Restriction: Must be in Engineering: Aerospace program.

ENAE362 Aerospace Instrumentation and Experimentation (3 Credits)

Basic instrumentation electronics including DC electronics, AC electronics, semiconductors, electro-optics and digital electronics. Sensing devices used to carry out experiments in Aerospace Engineering includes metrology, machine tool measurements, bridge circuits, optical devices, and introduction to computer based data acquisition. Topics chosen to support measurements in aerodynamics, flight structures and flight control.

Prerequisite: MATH246 and ENAE283.

Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE380 Flight Software Systems (3 Credits)

Avionics using advanced sensor and computing technologies are at the heart of every modern Aerospace vehicle. Advanced software systems to improve cockpit safety and enable unmanned and deep-space missions. Object-oriented programming and software engineering concepts required to design and build complex flight software systems. Software validation, verification and real-time performance analysis to assess flight software system reliability and robustness. Human-machine interface design for piloted systems. Automatic onboard data acquisition and decision-making for unmanned air and space vehicles.

Prerequisite: ENAE283 and ENAE202.

Restriction: Must be in Engineering: Aerospace program; and junior standing or higher.

ENAE398 Honors Research Project (1-3 Credits)

Planned sequence of steps in aerospace honors research in which students take three (3) consecutive semesters of this course in partial fulfillment of aerospace engineering honors program requirements. The first semester consists of a series of seminars and meetings with faculty mentors on honors research; two semesters consist of undergraduate honors research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference.

Prerequisite: Must be accepted into Aerospace Honors Program.

Restriction: Must be in Engineering: Aerospace program.

Repeatable to: 3 credits if content differs.

ENAE403 Aircraft Flight Dynamics (3 Credits)

Study of motion of aircraft, equations of motion, aerodynamic force representation, longitudinal and lateral motions, response to controls and to atmospheric disturbances, handling qualities criteria and other figures of merit.

Prerequisite: ENAE414 and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE404 Space Flight Dynamics (3 Credits)

Three-dimensional motion under central fields. Solutions to orbital motion, orbital elements, time elements. Kepler's laws. Orbital maneuvering, rendezvous and station-keeping. Rigid-body attitude dynamics, spacecraft attitude dynamics.

Prerequisite: ENAE301.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE414 Incompressible Aerodynamics (3 Credits)

Aerodynamics of inviscid incompressible flows. Aerodynamic forces and moments. Fluid statics/buoyancy force. Vorticity, circulation, the stream function and the velocity potential. Bernoulli's and Laplace's equations. Flows in low speed wind tunnels and airspeed measurement. Potential flows involving sources and sinks, doublets, and vortices. Development of the theory of airfoils and wings.

Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE415 Helicopter Theory (3 Credits)

Elementary exposition on the theory and practice of aerodynamics applied to helicopters and other rotary wing aircraft.

Prerequisite: ENAE414.

Restriction: Must be in Engineering: Aerospace program.

ENAE420 Computational Structural Mechanics (3 Credits)

Introductory of finite element methods for aerospace engineering modeling and analysis; equips students with ability to understand manuals of commercial finite element analysis software.

Prerequisite: ENES220 and MATH241; and must have completed a course in linear algebra.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE423 Vibration and Aeroelasticity (3 Credits)

Dynamic response of single and multiple degrees of freedom systems, finite element modeling, wing divergence, aileron reversal, wing and panel flutter.

Prerequisite: ENAE324.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE425 Mechanics of Composite Structures (3 Credits)

Introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.

Prerequisite: MATH246, ENAE324, ENES220, and MATH241.

ENAE432 Control of Aerospace Systems (3 Credits)

An introduction to the feedback control of dynamic systems. Laplace transforms and transfer function techniques; frequency response and Bode diagrams. Stability analysis via root locus and Nyquist techniques. Performance specifications in time and frequency domains, and design of compensation strategies to meet performance goals.

Prerequisite: Minimum grade of C- in ENAE301 and ENAE283.

Restriction: Junior standing or higher; and must be in Engineering: Aerospace program.

ENAE441 Space Navigation and Guidance (3 Credits)

Principles of navigation. Celestial, radio, and inertial navigation schemes. Navigational and guidance requirements for orbital, planetary, and atmospheric entry missions. Fundamentals of communications and information theory. Link budgets, antennas and telemetry systems.

Prerequisite: ENAE404 and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE450 Robotics Programming (3 Credits)

Introduces students to the Robot Operating System (ROS) as well as to many of the available tools commonly used in robotics. Lectures focus on theory and structure, whereas laboratory sections will focus on applications and implementations. Students learn how to create software and simulations, interface to sensors and actuators, and integrate control algorithms. The course works through exercises involving a number of autonomous robots (i.e., ground and air vehicles) that students will eventually use in their subsequent RAS minor courses. Topics include: ROS architecture, console commands, ROS packages, simulation environments, visualizations, autonomous navigation, manipulation, and robot vision.

Prerequisite: ENME480 or ENAE380.

Restriction: Must be in the Robotics and Autonomous Systems (RAS) minor; or permission of department.

Additional Information: Students in the Robotics and Autonomous Systems minor should take ENME480 as a prerequisite; Aerospace Engineering students not in the minor should take ENAE380.

ENAE455 Aircraft Propulsion and Power (3 Credits)

Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of piston, turbojet, fanjet, and other variations of airbreathing aircraft power units.

Prerequisite: ENES232, ENAE414, and ENAE311.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE457 Space Propulsion and Power (3 Credits)

Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.

Prerequisite: PHYS271, ENES232, PHYS270, and ENAE311.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And senior standing.

ENAE464 Aerospace Engineering Laboratory (3 Credits)

Application of fundamental measuring techniques to measurements in aerospace engineering. Includes experiments in aerodynamics, structures, propulsion, flight dynamics and astrodynamics. Correlation of theory with experimental results.

Prerequisite: ENAE324, ENAE362, ENAE311, and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE467 Advanced Space Propulsion and Power (3 Credits)

Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.

Prerequisite: ENAE457.

Jointly offered with: ENAE667.

Restriction: Permission of Instructor.

Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.

Formerly: ENAE488I.

ENAE471 Aircraft Flight Testing (3 Credits)

Provides basic instruction to aircraft flight testing and demonstrates need for systematic, well-proven technique to allow for accurate airplane performance. Concepts of aerodynamics, airplane performance, and stability and control. Emphasis on single-engine general aviation type aircraft.

Prerequisite: ENAE414.

Corequisite: ENAE403.

Restriction: Must be in Engineering: Aerospace program.

ENAE472 Introduction to Hypersonics (3 Credits)

Introduces students to the various key aspects of flight at hypersonic speeds. Critical aerodynamic phenomena to be covered includes the qualitative behavior of flow fields in the high-Mach-number limit, approximate methods for quantifying surface pressure, and estimates of viscous drag and heating. High-speed air-breathing propulsion systems will be discussed, including cycle analysis and performance metrics for propulsion, with a main emphasis on the fundamentals of ramjet and scramjet engines. Key Guidance, Navigation and Control (GNC) concepts for various hypersonic vehicle types will also be introduced, including the design of appropriate flight trajectories and control algorithms to achieve mission goals. Finally, students will be provided with an overview of high-temperature materials, structures, and thermal protection systems.

Prerequisite: ENAE311 or enrolled in hypersonics graduate certificate program.

Corequisite: ENAE481 or ENAE483 (if not enrolled in hypersonics graduate certificate program).

Restriction: Students must be in the Hypersonic Graduate Certificate Program (code: Z165) or receive permission from the department.

Credit Only Granted for: ENAE488N or ENAE472.

Formerly: ENAE488N.

ENAE481 Principles of Aircraft Design (3 Credits)

Aircraft design principles blending both synthesis and analysis. The iterative nature of the design process. Applied aerodynamics. Elements of aircraft performance calculation and optimization. Design of aircraft including payload, crew and avionics provisions, propulsion selection and sizing, aerodynamic configuration optimization, mass properties, stability and control characteristics, and vehicle subsystems. Individual student projects in aircraft design.

Prerequisite: ENAE324, ENAE362, and ENAE432.

Corequisite: ENAE414.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE482 Aeronautical Systems Design (3 Credits)

Senior capstone design course in the aeronautics track. Introduction of computerized methods for sizing and performance analysis. More comprehensive methods to predict weight, aerodynamics and propulsion system characteristics. Consideration in design disciplines such as vulnerability, maintainability, produceability, etc. Groups of students will complete, brief and report on a major design study to specific requirements.

Prerequisite: ENAE455, ENAE423, ENAE403, and ENAE481.

Restriction: Must be in Engineering: Aerospace program; and senior standing or higher.

ENAE483 Principles of Space Systems Design (3 Credits)

Principles of space systems analysis and vehicle design. Launch vehicle performance analysis and optimization. Design of vehicle systems including avionics, power, propulsion, life support, human factors, structures, actuator and mechanisms, and thermal control. Design processes and design synthesis. Individual student projects in vehicle design.

Prerequisite: ENAE404, ENAE324, ENAE362, and ENAE432.

Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE484 Space Systems Design (3 Credits)

Senior capstone design course in the space track. Group preliminary design of a space system, including system and subsystem design, configuration control, costing, risk analysis, and programmatic development. Course also emphasizes written and oral engineering communications.

Prerequisite: ENAE423, ENAE483, ENAE441, and ENAE457.

Restriction: Must be in Engineering: Aerospace program.

ENAE488 Topics in Aerospace Engineering (1-4 Credits)

Technical elective taken with the permission of the student's advisor and instructor. Lecture and conference courses designed to extend the student's understanding of aerospace engineering. Current topics are emphasized.

Prerequisite: Permission of student's advisor required.

Restriction: Permission of instructor.

ENAE499 Elective Research (3 Credits)

Undergraduate research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference or competition.

Prerequisite: Permission from student's advisor required.

Restriction: Senior standing or higher; and must be in Engineering: Aerospace program; and permission of instructor; and permission of ENGR-Aerospace Engineering department.

Repeatable to: 6 credits if content differs.

ENBC - Biocomputational Engineering

ENBC301 Introduction to Biocomputational Engineering (1 Credit)

Provides practical tools to help Biocomputational Engineering majors to think critically about their goals and career paths and to utilize their major to set their career trajectory.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in Biocomputational Engineering major.

ENBC311 Python for Data Analysis (3 Credits)

Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.

Prerequisite: Minimum grade of C- in MATH241; and minimum grade of C- in BIOE241 or approved prior study in Matlab.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE489A, BIOE442 or ENBC311.

ENBC312 Object Oriented Programming in C++ (3 Credits)

Provides a solid foundation for object-oriented programming using the C++ programming language. It introduces fundamental conceptual tools and their implementation of object-oriented design and programming such as: object, type, class, implementation hiding, inheritance, parametric typing, function overloading, polymorphism, source code reusability, and object code reusability. Fundamental principles of object-oriented design and programming are stressed while covering the language details.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC321 Machine Learning for Data Analysis (3 Credits)

Instructs students in the fundamentals of machine learning methods through examples in the biological phenomenon and clinical data analysis. This course is designed to share knowledge of real-world data science and aid to learn complex machine learning theory, algorithms, and coding libraries in a simple way. Students will learn the machine learning theory, but they will also get hands-on practice building their models using programming tools such as Python and R.

Prerequisite: Minimum grade of C- in ENBC311 and ENBC332.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC322 Algorithms (3 Credits)

Presents an introduction to the techniques for designing efficient computer algorithms and analyzing their complexity using the Python programming language. Students will gain insight into principles and data-structures useful in algorithm design. General topics include asymptotics, sorting and searching, hashing, algorithm design techniques, graph algorithms, and dynamic programming.

Prerequisite: Minimum grade of C- in ENBC311.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: ENBC355 or ENBC322.

ENBC331 Applied Linear Systems and Differential Equations (3 Credits)

Applications of linear algebra and differential equations to bioengineering and biomolecular systems. Designed to instruct students to relate mathematical approaches in bioengineering to their physical systems. Examples will emphasize fluid mechanics, mass transfer, and physiological systems.

Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in BIOE241 or approved prior study in Matlab.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE371 or ENBC331.

ENBC332 Statistics, Data Analysis, and Data Visualization (3 Credits)

Instructs students in the fundamentals of probability and statistics through examples in biological phenomenon and clinical data analysis. Data visualization strategies will also be covered.

Prerequisite: Minimum grade of C- in MATH246; and minimum grade of C- in BIOE241 or approved prior study in Matlab.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE372, ENBC332 or STAT464.

ENBC341 Biomolecular Engineering Thermodynamics (3 Credits)

A quantitative introduction to thermodynamic analysis of biomolecular systems. The basic laws of thermodynamics will be introduced and explained through a series of examples related to biomolecular systems.

Prerequisite: Minimum grade of C- in MATH246 and PHYS260.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE232, ENBC341 or CHBE301.

ENBC342 Computational Fluid Dynamics and Mass Transfer (3 Credits)

Principles and applications of fluid mechanics with a focus on bioengineering topics. Content includes conservation of mass, momentum, and energy, as well as the application of these fundamental relations to hydrostatics, control volume analysis, internal and external flow, and boundary layers. Applications to biological and bioengineering problems such as tissue engineering, bioprocessing, imaging, and drug delivery.

Prerequisite: Minimum grade of C- in ENBC341; and minimum grade of C- in BIOE241 or approved prior study in Matlab; and must have earned a minimum grade of C- or be concurrently enrolled in ENBC331.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE331 or ENBC342.

ENBC351 Quantitative Molecular and Cellular Biology (3 Credits)

Provides a quantitative analysis of the behavior of cellular and molecular systems. The focus will be the construction and application of mechanistic models of biomolecular interaction rate processes, which form the foundation of most biological functions. The course will also provide in-depth, practical exploration into data analysis of key bioengineering techniques.

Prerequisite: Minimum grade of C- in BSCI170 or BIOE120.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC352 Molecular Techniques Laboratory (2 Credits)

Provides students with the opportunity to learn how biology and engineering can synergistically contribute to our understanding of biological and biomedical problems. Students will gain hands-on experience through wet lab experiments in basic techniques relevant to bioengineering.

Prerequisite: Minimum grade of C- or concurrently enrolled in ENBC351.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC353 Synthetic Biology (3 Credits)

Introduces students to the scientific foundation and concepts driving the fast-paced field of synthetic biology. This course aims to apply engineering principles, measurement science, and modern molecular biology to increase understanding of complex biological systems and to develop novel applications that address global challenges in health, manufacturing, energy, agriculture, and the environment. Students will explore the principles and applications of the field via in-depth analysis. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.

Prerequisite: Minimum grade of C- in BSCI170 or BIOE120.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

Credit Only Granted for: BIOE461 or ENBC353.

ENBC399 Independent Study in Biocomputational Engineering (1-3 Credits)

Independent Study

Restriction: Permission of the ENGR-Biocomputational Engineering program.

Repeatable to: 12 credits if content differs.

ENBC403 Research Methods in Biological Data Mining (3 Credits)

An introduction to the fundamentals of conducting research projects utilizing a general understanding of quantitative/qualitative research, clinical data analysis, and multiple examples of different research approaches in the biological phenomenon. The course includes an overview of design strategies to implement various data mining technologies.

Prerequisite: Minimum grade of C- or concurrently enrolled in ENBC311.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC423 Applied Computer Vision (3 Credits)

Introduction to the basics and modern deep learning models in the Artificial Intelligence field of computer vision. The course emphasizes applications of computer vision in medical imaging. Computer vision techniques will be demonstrated using software packages implementing bioimage informatics methods.

Prerequisite: Minimum grade of C- in ENBC311 and ENBC312.

ENBC424 AI for Biocomputational Engineering (3 Credits)

Introduces students to the basics and modern deep learning models in the Artificial Intelligence field applied to computer vision problems. The course will teach ResNet for image Classification/Regression, and U-Net for semantic segmentation. The course emphasizes applications of computer vision in medical imaging and cell biology, such as detecting brain tumor using semantic deep learning segmentation network and track dynamic measurements of live 3T3 cells through time using recurrent neural network. Computer vision techniques will be demonstrated using software packages implementing bio-image informatics methods, including ImageJ (FIJI), Python with Keras Tensorflow, Pytorch, and Matlab.

Prerequisite: Minimum grade of C- in ENBC423.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in Biocomputational Engineering major.

ENBC425 Imaging and Image Processing (3 Credits)

Instructs students in the fundamentals of biomedical imaging and image processing methods through the physical principles behind major medical imaging modalities, including X-Ray, Computed Tomography (CT), and magnetic resonance imaging (MRI). This course is designed to instruct students in mathematical tools for extracting information from images. There will be real-world assignments and images, which aid in learning complex theories, applications, and coding libraries in a simple way.

Prerequisite: Minimum grade of C- in ENBC332, ENBC311, and ENBC321.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in Biocomputational Engineering major.

ENBC431 Finite Element Analysis (3 Credits)

An introduction to the theory, programming and application of the finite element method that is used to solve problems in engineering analysis and design. Modeling, analysis, and design using the FEA software SolidWorks. The objective of the course is to teach the fundamentals of the finite element method with emphasis on the underlying theory, assumption, and modeling issues as well as providing hands-on experience using finite element software to model, analyze, and design systems.

Prerequisite: Minimum grade of C- in MATH246.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC441 Computational Systems Biology (3 Credits)

Introduces quantitative principles for studying biological systems using computational modeling and simulations. Topics include continuous modeling of systems using ordinary differential equations, discrete modeling using Boolean networks and Markov chains, probabilistic modeling through Bayesian networks, stochastic modeling via Monte Carlo and Brownian and molecular dynamics, model optimization, and parameter estimation. Simulation algorithms that implement these approaches will be introduced through MATLAB programming.

Prerequisite: ENBC351.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC455 Bioinformatics Engineering (3 Credits)

Introduces students to the core principles of bioinformatics while encouraging students to apply their programming skills to real-world biological problems. Students will learn to utilize Python to process data sets.

Prerequisite: ENBC311.

Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and must be in the Biocomputational Engineering major.

ENBC491 Senior Capstone Design in Biocomputational Engineering (3 Credits)

Senior design project in which students work collaboratively in a Capstone team on a biocomputational topic. Under the guidance of a Capstone mentor, students will set project goal(s), propose project design, identify methodology, implement solutions, evaluate project results, and iterate among these steps if needed. Students will present their completed biocomputational projects to the public in a poster session. To complement the project design and implementation, students will also learn pressing ethics and DEI concerns emerging in artificial intelligence (AI), and recognize ethical responsibilities in biocomputational tasks.

Prerequisite: Must have completed 18 credits in ENBC courses.

ENCE - Engineering, Civil

ENCE100 Introduction to Civil and Environmental Engineering (1 Credit)

An overview of the department of Civil and Environment Engineering. Students are introduced to the undergraduate curriculum and will be exposed to other undergraduate and graduate students at various points in their program. The course blends panel presentations by seniors and graduate students, faculty and practitioners with a project and book review to be performed by the students.

ENCE200 Civil Engineering Graphics for Design and Construction (3 Credits)

Introduction to the basic principles and fundamentals of civil design, plan interpretation, and plan creation. Development of the knowledge and skills to analyze existing sites, environmental features, and characteristics used to develop a site properly. Introduction of the use of Computer-Aided Drafting (CAD) software in the context of civil and environmental engineering design and applications.

Prerequisite: ENES100, MATH141, and ENES102; and permission of ENGR-Civil & Environmental Engineering department.

ENCE201 Engineering Information Processing (3 Credits)

Exploration of algorithms for solving problems in several important areas of numerical computing: roots of equations; matrix algebra and the systems of linear equations; function approximation, numerical differentiation and integration; and ordinary differential equations. Issues of solution accuracy, robustness, and efficiency are also considered. Numerical techniques are presented in the context of engineering applications, and example problems are solved using a variety of computer-based tools (primarily MATLAB).

Prerequisite: ENES220 and MATH241; and permission of ENGR-Civil & Environmental Engineering department.

Corequisite: MATH246.

Credit Only Granted for: ENCE201 or ENCE203.

ENCE204 How Do Cities Work (3 Credits)

Can we improve the way cities work? Are we equitably sharing the benefits and the burdens of living in a city? This course examines how cities work, and importantly, whether they work the same for everyone living in the city. We will explore the ways in which we provide city services and who is included or excluded from these services. We will examine how the city infrastructure serves a neighborhood's residents, with an eye toward how community forms. We will use first person accounts from policymakers, advocates, and community members to learn about the planning process for services and the tensions that can exist around access to healthcare, food and affordable housing. Each week we will study a new facet of the city, drawing on the writings of experts and your own journey through the city to better understand its infrastructure, asking how does it work, how does it connect to other infrastructure and whom does it primarily serve?

ENCE205 Biology for Civil and Environmental Engineers (3 Credits)

Introduction to the functions and interactions of biological systems in civil and environmental engineering systems in the context of societal issues. The course includes an introduction to biotechnological principles from a quantitative perspective, modern experimental techniques in biotechnology and methods of data analysis. Roles for civil and environmental engineers in society seen from a biotechnological perspective, and the role of biotechnology in civil and environmental engineering will be elucidated. The role of biotechnology in other engineering disciplines will also be discussed.

Prerequisite: MATH140 or equivalent.

Restriction: Must be in the Civil Engineering program; or permission of the Civil and Environmental Engineering Department.

Credit Only Granted for: BIOE120 or ENCE205.

ENCE215 Engineering for Sustainability (3 Credits)

Engineers have a key role to play in planning, designing, building, and ensuring a sustainable future. In this class, a problem-based approach is used to examine fundamentally-based analyses and approaches for engineering as sustainable society, with a focus on sustainable use of energy and materials, sustainable infrastructure solutions, atmospheric sustainability and sustainable water supply, and human population growth and resource consumption and its implications for sustainability.

Prerequisite: CHEM135; or students who have taken courses with comparable content may contact the department; and permission of ENGR-Civil & Environmental Engineering Department.

ENCE300 Fundamentals of Engineering Materials (3 Credits)

Behavior, physical, mechanical and chemical properties, design and performance of civil engineering materials, including aggregates, cement, concrete, asphalt binders and mixtures, plastics and geosynthetics, timber, metals and alloys. Modified and advanced highway materials (polymer and rubber modified mixtures, high performance concrete, composites, smart materials). Laboratory testing with hands-on experience on aggregates, Portland cement concrete, asphalt mixtures, timber and metals as per SUPERAVE, ACI design methods, and ASTM standards and specifications.

Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE302 Probability and Statistics for Civil and Environmental Engineers (3 Credits)

Statistics is the science of data. Civil Engineers must often make decisions based on incomplete, variable or uncertain information. In addition, modern methods of design and analysis need to account for variability in natural, engineered and human systems. After successful completion of this class, a student should have facility and familiarity with established basic techniques for managing data, modeling variability and uncertainty, communicating about data and decisions, and supporting or defending a decision or judgment based on uncertain or incomplete data.

Prerequisite: MATH246 and ENCE201; and permission of ENGR-Civil & Environmental Engineering department.

ENCE305 Fundamentals of Engineering Fluids (3 Credits)

The theoretical bases for fluid statics and dynamics, including the conservation of mass, energy and momentum. Modeling of hydraulic systems are introduced. Emphasis on pipe flow and open-channel hydraulics, with real-world applications.

Prerequisite: ENES220, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.

Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENCE310 Introduction to Environmental Engineering (3 Credits)

Introduction to the physical, chemical and biological systems relating to the quality of water, land and air environments. Fundamental principles will be emphasized, current environmental pollution problems will be examined and methods of pollution abatement discussed.

Prerequisite: PHYS260 and ENCE215; and permission of ENGR-Civil & Environmental Engineering department.

ENCE320 Introduction to Project Management (3 Credits)

Principles and techniques of managing engineering projects from the initiation, through planning, execution, monitoring & control, then finally closeout.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A James Clark School of Engineering.

Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST4080 or INST453.

ENCE325 Introduction to Construction Project Management (3 Credits)

Learn the basic topics in sourcing, planning, financing, designing, contracting, constructing and operating buildings and other facilities in the built infrastructure. Topics include construction economics, design constructability reviews, construction process planning, contracts and procurement strategies, project scheduling and resource utilization, site layout planning, project cost and quality controls, temporary structures, environmental sustainability, project handover procedures, facility operation and management, IT-based tools for construction project and resource management.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in a major in ARCH-School of Architecture, Planning, & Preservation; or must be in the Construction Project Management minor. And permission of ENGR-Civil & Environmental Engineering department.

Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST4080 or INST453.

ENCE340 Fundamentals of Geotechnical Engineering (3 Credits)

Introductory study of soils in civil engineering. Soil origin, phase relationships and classification schemes. Soil hydraulics: capillary, effective stress, permeability and seepage considerations. Basic stress distribution theories and soil consolidation-settlement analysis. Integration of shear strength evaluation with slope stability analysis. If time permits, topics such as applications in geoenvironmental engineering will be covered.

Prerequisite: ENES220; and permission of ENGR-Civil & Environmental Engineering department.

ENCE353 Introduction to Structural Analysis (3 Credits)

The basic tools of structural analysis and design. Design loads. Equilibrium of external and internal forces. Shear and moment diagrams in beams and frames. Truss analysis. Influence line diagrams. The slope-deflection method and method of consistent deformation. Matrix stiffness methods for beams, frames and trusses.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department; and (MATH246 and ENES220).

ENCE360 Analysis of Civil Engineering Systems (3 Credits)

Introduction to systems approach and systems analysis in civil and environmental engineering. Introduction to systems analysis tools that facilitate engineering management decision making including optimization and computer simulation. Introduction to linear and nonlinear mathematical optimization including linear and integer programming, elementary nonlinear programming and dynamic programming.

Prerequisite: ENCE201 and MATH140; and permission of ENGR-Civil & Environmental Engineering department.

ENCE370 Introduction to Transportation Engineering and Planning (3 Credits)

Engineering problems of transportation by highways, airways, pipelines, waterways, and railways. Transportation modes and technologies, vehicle dynamics, basic facility design, traffic stream models, capacity analysis, transportation planning, evaluation and choice, and network analysis.

Prerequisite: ENCE201, PHYS260, and PHYS261; and permission of ENGR-Civil & Environmental Engineering department.

ENCE386 Experiential Learning (3-6 Credits)

Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

ENCE398 Honors Research Project (1-3 Credits)**ENCE402 Simulation and Design of Experiments for Engineers (3 Credits)**

Review of statistics and hypothesis testing, sample design and design of experiments, generation of discrete and continuous distributions and their applications. Introduction of simulation languages and simulation of discrete and continuous engineering systems. Output analysis, model validation and sensitivity and reliability analysis.

Prerequisite: ENCE302; and permission of ENGR-Civil & Environmental Engineering department.

ENCE411 Environmental Engineering Science (3 Credits)

Introduces the analytical techniques available to assess performance of engineering processes as they relate to water, soil, and air treatment and quality. The basic principles of environmental management, economics of waste treatment, by-product reutilization, and energy cycles are introduced and discussed. Alternative technologies are introduced and evaluated mostly by assessing their potential to reduce waste, minimize energy use, and promote sustainability. Students' activities include, a weekly lab to provide hands-on experience with environmental quality measurements and treatment techniques; on-site visits to regional industries that undertake sustainable practices; and a final research project where experimental design and laboratory techniques are used to assess interactions between technologies and natural systems and their potential for reducing environmental impacts.

Prerequisite: ENCE205 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE412 Environmental Engineering Unit Operations (3 Credits)

Examination of unit operations and processes encountered in environmental engineering field. Fundamental principles learned from previous classes will be applied into the design and operation of unit operations and processes, particularly in the area of water and wastewater treatment. Similar processes will be applied to air pollution control, solid waste disposal and hazardous waste treatment.

Prerequisite: ENCE305 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE420 Selection and Utilization of Construction Equipment (3 Credits)

Learn to evaluate and select construction equipment with a focus on mechanized equipment for earthwork and building construction. Learn about the parties involved in procurement, operation and maintenance, and how to cost-effectively plan, select, and utilize equipment for earthmoving, paving, formwork, trenching, rock excavation, tunneling, site preparation, and steel and concrete construction. Explore trends in equipment design, construction automation, and robotics.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor.

ENCE421 Legal Aspects of Architectural and Engineering Practice (3 Credits)

Learn the basic structure of the US legal system and court procedures and legal principles relevant to architectural and engineering design and construction contracts including principles of ethical, legal and professional conduct of engineers and architects. Topics include: contracts for design and construction, sales and warranties, torts and product liability, business agency and government agencies, professional liability of architects and engineers, labor laws, expert testimony, mediation and arbitration, tangible property including real estate, intellectual property including trademarks, patents and copyrights, insurance and sureties.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE422 Project Cost Accounting and Economics (3 Credits)

Learn: the fundamentals of accounting; project cost accounting principles as they apply to project management; project cost accounting; and the fundamentals of engineering economics. Topics include: project feasibility analysis; reading and analyzing financial statements; cash management; cash flow analysis; depreciation and taxes; and impact on profitability; the principles of activity based costing; net present value analysis; the framework for project performance measurement, cost performance indices, and earned value analysis.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE423 Project Planning, Estimating & Scheduling (3 Credits)

Learn the fundamentals of project planning, estimating, and scheduling. Understand the concepts of planning; to reduce uncertainty, improve efficiency of the operation, to set and meet objectives, and to provide a basis for monitoring and controlling the work. Be introduced to: the concepts of resource definition, assignment and management, and; the basics of project estimating (pricing) methods including global pricing strategies, types of estimates, pricing processes, overhead and profit, and project financing. Learn the basics of project scheduling including; bar charts, network-based methodologies, and linear scheduling techniques. Emphasis is placed on Critical Path Method (CPM) scheduling, a network based methodology. Be exposed to the use of scheduling software and will actually develop a CPM schedule for an actual construction project as part of a semester project.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE424 Communication for Project Managers (3 Credits)

Learn the fundamentals of communications for project managers. Emphasis is on interpersonal and group communications; through voice, electronic, and written messages; project cycle and reports and presentations during this cycle; and communications for employment.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Jointly offered with: ENCE614.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management minor.

Credit Only Granted for: ENCE424 or ENCE614.

ENCE426 Construction Documentation and BIM Applications in Engineering and Construction (3 Credits)

Learn the basics of construction documentation methods, with particular emphasis on Building Information Modeling (BIM). Topics include: the fundamentals of assembly, coordination, and maintenance of construction documents and implementation of BIM techniques in the design and construction processes, and; a review of Autodesk, Revit, and Navisworks and other leading BIM software. Lectures from project management faculty supplemented by guest lecturers from the construction industry.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE430 Introduction to Infrastructure and Resilience (3 Credits)

Develops system-level skills for the planning, design, maintenance, and operation of resilient infrastructure systems. Through this course, we will discuss a variety of infrastructure systems, both public and private, and their role in communities before and after disasters. The themes of the course will be grounded in the four phases of emergency management (mitigation, preparedness, response, and recovery) and the role that infrastructure plays in each. Through these applications areas, we will study a variety of conceptual, analytical, and computational models that support informed decision-making for these systems under uncertainty.

Prerequisite: ENCE302; or students who have taken courses with comparable content may contact the department.

Corequisite: ENCE360; or students who have taken courses with comparable content may contact the department. Jointly offered with ENCE632.

Credit Only Granted for: ENCE632, ENCE688U, ENCE430 or ENCE489U.

Formerly: ENCE489U.

ENCE431 Hydrologic Engineering (3 Credits)

An introduction to basic principles of hydrologic science including the hydrologic cycle, rainfall, surface runoff and streamflow. Special emphasis is placed on hydrologic engineering design of stormwater management and flood control facilities. Design projects are used to illustrate design practices.

Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE432 Ground Water Hydrology (3 Credits)

Concepts related to the development of the ground water resources, hydrology, hydrodynamics of flow through porous media, hydraulics of wells and basin-wide ground water development. Fundamentals of ground water pollution are introduced.

Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE441 Foundation Design (3 Credits)

Critical review of classical lateral earth pressure theories, analysis of retaining walls and reinforced earth walls, subsurface explorations, bearing capacity and settlement of shallow foundations, design of deep foundations that includes both pile foundations and drilled shafts.

Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE444 Experimental Methods in Geotechnical Structural Engineering (3 Credits)

In the geotechnical engineering part of the course, major soils testing and their interpretation including classification, compaction, strength, and compressibility will be undertaken. The structural engineering part of this course covers test planning, loading apparatus, instrumentation, data acquisition and data analysis, as well as basic aspects of structural testing techniques and shake-table test.

Prerequisite: ENCE353 and ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE447 Pavement Engineering (3 Credits)

Fundamental principles underlying the design, construction, maintenance and repair, and management of highway and airfield pavement systems.

Pavement performance (functional/structural; evaluation); pavement mechanics (multi-layered elastic theory; slab theory); pavement materials (properties and characterization); environmental effects; current rigid and flexible design methods (new/rehabilitation); construction (new construction; maintenance/repair; rehabilitation); economic evaluation; pavement management.

Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE453 Computer-Aided Structural Analysis (3 Credits)

Computer-aided analysis of structural systems. Unified matrix formulation of stiffness and flexibility methods. Slope deflection method. Evaluation of truss, frame, and grid systems. Non-prismatic and curved elements. Error analysis and determination of ill-conditions. Introduction to finite element methods; formulation of simple two-dimensional elements. In laboratory, use and development of CAD software.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE454 Design of Concrete Structures (3 Credits)

Combined bending and compression, development and anchorage of reinforcement, deflections, design of slabs including one-way and two-way, design of footings, retaining walls, introduction to prestressed concrete, design of multi-story buildings.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

Formerly: ENCE451.

ENCE455 Design of Steel Structures (3 Credits)

Behavior and design of members subjected to fatigue, and combined bending and compression; plate girders, composite beams, open-web joists and connections. Methods of allowable stress design, and load and resistance factor design. Elements of plastic analysis and design. Framing systems and loads for industrial buildings and bridges.

Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE465 Civil and Environmental Engineering Design I (1 Credit)

Provides students an opportunity to develop their skills in project scoping and the development of design proposals. The fundamental concepts are taught using analytical and computational methods, which are necessary for designing and analyzing the sustainability of various engineering processes and technologies. The course provides the methods and skills for understanding the human-environment-infrastructure interactions needed to develop a design proposal.

Prerequisite: ENCE201 and ENCE215.

Restriction: Permission of the ENGR-Civil & Environmental Engineering Department.

ENCE466 Design of Civil Engineering Systems (3 Credits)

A major civil engineering design experience that emphasizes development of student creativity, development and use of design methodologies, evaluation of alternate solutions, feasibility considerations, and detailed system descriptions. Realistic design constraints including economic factors, safety, aesthetics, and reliability will be imposed. Students will work in design project groups and be required to exercise oral and written communication skills.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

Additional Information: Must be taken in the semester in which the student graduates.

ENCE467 Civil and Environmental Engineering Design II (2 Credits)

This experiential course provides structured and unstructured time for groupwork as part of the senior capstone design course sequence. The course builds on skills acquired throughout a student's academic career extending a project defined and scoped in ENCE465. The objective of this course is to provide students with hands on experience similar to the experience encountered by new engineers working in professional engineering and construction practice. The course offers students an opportunity to develop the leadership and groupwork skills needed to meet professional expectations.

Prerequisite: ENCE465; and must have completed or be concurrently enrolled in ENCE302 and ENCE305.

Restriction: Permission of the ENGR-Civil & Environmental Engineering Department.

ENCE470 Highway Engineering (3 Credits)

Highway location and design, highway engineering economics, traffic engineering, traffic measurement devices and technologies. Includes discussion of technological advances in traffic flow and capacity, such as signal systems, corridor control, automatic driver information, incident detection and autonomous vehicle operation.

Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE472 Transportation Engineering (3 Credits)

Transportation engineering concepts including transportation systems analysis, airport systems, airline and airport operations, marine transportation and urban public transportation systems.

Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE488 Senior Thesis (3 Credits)

Advanced study in civil engineering problems with special emphasis on mathematical modeling and experimental methods.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

ENCE489 Special Problems in Civil Engineering (1-4 Credits)

A course arranged to meet the needs of exceptionally well prepared students for study in a particular field of civil engineering.

Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.

Restriction: Senior standing.

Repeatable to: 9 credits if content differs.

ENEB - Cyber-Physical Systems Engineering

ENEB302 Analog Circuits (4 Credits)

Foundations of circuits, focusing on applications including signal amplification, power amplification, instrumentation and filters. Fundamental concepts of analog circuits including analysis methods in time and complex domains, with emphasis on circuit topologies relevant in embedded systems. Intensive application of simulations and hands-on laboratory exercises.

Prerequisite: Minimum grade of C- in PHYS260 and PHYS261; and 1 course with a minimum grade of C- from (MATH246, MATH241, MATH240); and permission from the Cyber-Physical Systems Engineering program required.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB304 Microelectronics and Sensors (3 Credits)

An overview of basic Internet of Things (IoT) architecture, core IOT hardware enablers, and IOT sensors and their implementation. This course covers commonly used analog amplifier designs and biasing, as well as characterization in the frequency and time domains. In addition, this course discusses the physical principles in RF communications as it relates to wireless personal and local networks (WPAN/WLAN) and short-range communication systems.

Prerequisite: Minimum grade of C- in ENEB302; and permission from the Cyber-Physical Systems Engineering program required.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB340 Intermediate Programming Concepts and Applications for Embedded Systems (3 Credits)

Principles of programming for embedded systems development. Includes principles of software development in Unix, C and other high level languages, input/output, data types and variables, operators and expressions, program selection, repetition, functions, arrays, strings, introduction to algorithms, software projects, debugging, documentation. Includes hands-on applications in microprocessor environments.

Prerequisite: Completion of approved introductory programming course with a minimum grade of a "C-"; and permission of the Cyber-Physical Systems Engineering program required.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB341 Introduction to Internet of Things (3 Credits)

An introduction to the foundations of Internet of Things (IoT), including IoT devices, communications, connection considerations, back-end services/applications, and business models. This course looks at the IoTs as the general theme of physical/real-world things becoming increasingly visible and actionable via Internet and Web technologies. It also covers networking protocols and gateways, security and privacy, data analytics and cloud computing platforms.

Prerequisite: Permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB344 Digital Logic Design for Embedded Systems (4 Credits)

Hands on approach on foundations of digital logic for embedded systems applications; including input/output, logic gates, Karnaugh maps, latches, flip-flops and state-machines. This course also covers design and analysis of synchronous sequential systems, implementation with PLA's, multiplexers, decoders, encoders, binary arithmetic units such as adders and subtractors, conversions between decimal and arbitrary radix numbers, especially octal, hexadecimal, and binary representations, radix and diminished radix arithmetic, and character codes.

Corequisite: ENEB340; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB345 Probability & Statistical Inference (3 Credits)

This is a foundational course on probability and statistics for data science and connected embedded systems. This covers basic statistics and probability theory, including random variables, standard distributions, moments, law of large numbers and central limit theorem, sampling methods, estimation of parameters, testing of hypotheses. The course also includes the mathematical theory of randomness, and applications to big data analysis and analysis in the presence of uncertainty, and applications to machine learning algorithms.

Prerequisite: MATH141.

Restriction: Must be in the Embedded Systems & Internet of Things program; and must receive permission from the Embedded Systems & Internet of Things program.

ENEB346 Linear Algebra for Machine Learning Applications (3 Credits)

Foundations of linear algebra for machine learning and data science applications with emphasis on implementing machine learning data science algorithms in a computer programming environment with linear algebra software tools and libraries as this course aims to provide a hands-on experience and learning environment for students. Students will learn the fundamental concepts in linear algebra that are directly relevant to machine learning and big data modeling and computations. These include vector and matrix operations, determinants, factorization methods, principal component analysis, eigenvalues, and singular value decomposition.

Prerequisite: MATH140.

Restriction: Must be in the Cyber-Physical Systems Engineering program and must receive permission from the Cyber-Physical Systems Engineering program.

ENEB352 Introduction to Networks and Protocols (3 Credits)

An introduction to the principles of computer networking and covers the architecture and operation of the TCP/IP protocol stack. Topics will include fundamental networking concepts, the layers of the TCP/IP protocol stack, the packet structure and operation of each layer with detailed discussion on reliable data transfer, flow control, congestion control, routing algorithms, error detection, Local Area Networks (LANs), and multiple access protocols. The course will also cover wireless protocols relevant to Internet of Things (IoT) such as WLAN (IEEE 802.11), Zigbee (IEEE 802.15.4), and Bluetooth as well as some popular IoT application-layer and network-layer protocols including CoAP, AMQP, MQTT, XMPP and 6LoWPAN. As a part of the course work, the students will attend lab sessions where they will learn how to capture and analyze network traffic, how to configure networking functions on Linux systems, and how to operate and configure routers using Juniper Networks devices in a real-world lab environment.

Prerequisite: Minimum grade of C- in ENEB341; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB353 Computer Organization for Embedded Systems (3 Credits)

Overview of the basic principles of computer organization and design with emphasis on low resource microcontrollers common in IoT applications. The topics include assembly and machine instructions, data-path and controller design, pipelining and memory hierarchy.

Prerequisite: Minimum grade of C- in ENEB344 and ENEB354; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB354 Discrete Mathematics for Information Technology (3 Credits)

Foundations of discrete mathematics for information technology and embedded computing. Topics include sets, relations, functions and algorithms, proof techniques and induction, number theory, counting and combinatorics, and Graph theory.

Prerequisite: Minimum grade of C- in MATH141.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB355 Algorithms in Python (3 Credits)

A study of fundamental algorithmic problem-solving techniques in Python for today's large-scale computer systems as well as microcontrollers.

Algorithms are instructions for solving problems and data structures are strategies for organizing information on computers. Efficient algorithms require appropriate data structures, and vice versa. Students will learn about the algorithms and data structures that form the building blocks of Python programming language. Student will also learn to analyze the cost of algorithms, according to how their running time or space requirements grows as data size grows.

Prerequisite: Minimum grade of C- in ENEB340 and ENEB354; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

Credit Only Granted for: ENEB355 or ENBC322.

ENEB408 Capstone Design Lab (3 Credits)

This course is the first of a two-semester sequence of capstone design laboratory experiences required for Cyber-Physical Systems Engineering students. Students will learn the principles of design, project planning, and project management. They will develop an ability to apply engineering solutions considering public health, safety, and welfare. Students will develop a consciousness of ethical and professional responsibilities and recognition of global, cultural, social, environmental, and economic factors in the design process. Students will also develop an ability to communicate in written and oral forms and to function effectively on a team. Projects will involve hardware, including a combination of off-the-shelf and custom-made components supported by hardware descriptive language software. The projects meet specific design challenges with applications in industry, healthcare, transportation, environmental sensing, cyber-security, and machine learning.

Prerequisite: Minimum grade of C- in all required 300-level ENEB courses.

Restriction: Must be in the Cyber-Physical Systems Engineering program; and must receive permission from the Cyber-Physical Systems Engineering program.

Repeatable to: 6 credits.

ENEB443 Hardware/Software Security for Embedded Systems (3 Credits)

This course will provide an in-depth understanding of systems level software and hardware in designing industry-standard secured embedded systems. It aims to provide a comprehensive systems view of security, including hardware, platform software such as operating systems and integrated development environments, software development process, data protection protocols, and some aspects of cryptography. To goal is to expose students on how to develop embedded software and properly utilize platform components to ensure the highest levels of security.

Prerequisite: Permission from the Cyber-Physical Systems Engineering program; and minimum grade of C- in ENEB454.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB444 Operating Systems for Embedded Systems (3 Credits)

Theory, design, implementation and analysis of low-resource computer operating systems for IoT applications. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and real-time operating systems. Optional topics may include communications protocols and computer security.

Prerequisite: Minimum grade of C- in ENEB340 and ENEB344; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB451 Network Security (3 Credits)

The foundations of modern cryptography including IoT security aspects, IoT features leading to security issues, as well as design considerations. Various cryptographic algorithms are discussed including the lightweight cryptography used in IoT applications. We will focus on the technology advances, industrial standards, and law enforcement that have been or have to be made to establish trust in four key areas to establish the trust in computing: security, privacy, reliability, and business integrity. Students will implement cryptographic algorithms using industry-standard tools and programming languages. Furthermore, students will analyze various encryption algorithms using cryptanalysis tools.

Prerequisite: Minimum grade of C- in ENEB352.

Restriction: Must be in the Cyber-Physical Systems Engineering program and must receive permission from the Cyber-Physical Systems Engineering program.

ENEB452 Advanced Software for Connected Embedded Systems (3 Credits)

Hardware and software foundations, evaluations and validation, application mapping, optimization and testing of cyber-physical systems, namely, embedded systems and communication technologies.

Prerequisite: Minimum grade of C- in ENEB454; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program; and senior standing.

ENEB453 Web-Based Application Development (3 Credits)

Introduction to cloud computing, computer programming in the context of developing full-featured dynamic websites. Uses a problem-solving approach to teach basics of program design and implementation using JavaScript; relates these skills to the creation of dynamic websites; then explores both the potential and limits of web-based information sources for use in research. This course provides a practical introduction to full-stack web development using PHP and JavaScript. The course will start with HTML/CSS/JavaScript to cover the client-side of applications. Then, it will move on to the server-side with PHP and integrating with a MySQL database to create a complete web application.

Prerequisite: ENEB340 and ENEB341.

Restriction: Must be in the Cyber-Physical Systems Engineering program; and permission of the Cyber-Physical Systems Engineering program.

ENEB454 Embedded Systems (3 Credits)

This course will provide students with the essential knowledge base that will enable them to tackle complex problems encountered in embedded systems design. The course will provide an overview of associated hardware components and software methodologies as well as the tools used in the development of modern embedded systems. Student will be exposed to the theoretical foundations which will be reinforced with carefully selected hands-on laboratory exercises, thereby getting a sense of how the theoretical concepts connect with the real-world embedded systems applications.

Prerequisite: Minimum grade of C- in ENEB353; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB455 Advanced FPGA System Design using Verilog for Embedded Systems (3 Credits)

A project-oriented course on digital system design using Verilog hardware description language (HDL) in an industry-standard design environment appropriate for embedded systems. Students will implement real-world designs in field programmable gate arrays (FPGAs) as well as test and optimize the FPGA. Students will also work in teams on multiple, medium-scale digital system design projects and make oral presentations and written reports.

Prerequisite: Minimum grade of C- in ENEB344 and ENEB340; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB456 Machine Learning Tools (3 Credits)

A broad introduction to machine learning and statistical pattern recognition tools. The course will teach students to model existing data and to forecast future behaviors, outcomes, and trends. It will be taught using the Azure Machine Learning Studio that provides an integrated, end-to-end data science and advanced analytics solution. It will enable students to prepare data, develop experiments, and deploy models at cloud scale. Topics include: supervised learning (Bayesian learning and classifier, parametric/non-parametric learning, discriminant functions, support vector machines, neural networks, deep learning networks); unsupervised learning (clustering, dimensionality reduction, auto-encoders). The course will also discuss recent applications of machine learning, such as computer vision, data mining, autonomous navigation, and speech recognition. Hands-on: implementation of Tensorflow Algorithm on TPU board.

Prerequisite: ENEB345 and ENEB346.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB457 Foundations of Databases for Web Applications (3 Credits)

An introduction to database systems and its applications to the Internet. It develops the database approach as a means to model the real world. The course will cover the fundamentals of the relational model, structured query language (SQL), data modeling, and database administration. This will cover an in-depth coverage of the relational model, logical database design, query languages, and other DB concepts including query optimization, concurrency control, transaction management, and log based crash recovery. In addition, students will be exposed to web-based database processing, data warehouse structures and fundamental concepts of nonrelational structured data storage (Big Data). Concepts will be illustrated with well-known Database Management System (DBMS) products such as MS Access, MS SQL Developer, Oracle Database XE, and MySQL Community Server.

Prerequisite: Minimum grade of C- in ENEB345, ENEB352, and ENEB355; and permission from the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

ENEB499 Senior Research Projects in Embedded Systems & Internet of Things (1-5 Credits)

Provides students in the Cyber-Physical Systems Engineering program with an opportunity to engage in independent research projects on advanced embedded systems topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing an ENEB499 project, the focus is to conduct an independent investigation of a technical theme by the student.

Prerequisite: Permission of the Cyber-Physical Systems Engineering program.

Restriction: Must be in the Cyber-Physical Systems Engineering program.

Repeatable to: 5 credits if content differs.

ENED - Engineering Education

ENED290 Introduction to Design and Quality (4 Credits)

The first QUEST course introduces foundational principles of design and quality, emphasizing their impact on product development and customer satisfaction. Working in multidisciplinary teams, students will explore design thinking, project management techniques, and quality tools, applying these frameworks to real-world product redesigns and innovations.

Cross-listed with: BMGT290.

Restriction: Must be in the Quest program.

Credit Only Granted for: BMGT190, ENES190, ENED290, or BMGT290.

Formerly: BMGT190 and ENES190.

ENED390 Designing Innovative Systems (3 Credits)

The QUEST systems thinking course challenges students to analyze how processes interact in larger systems. Students will learn how to use process improvement tools and a systems thinking approach to solve problems and design innovative solutions. By drawing upon their multidisciplinary backgrounds, students will be able to understand and reframe problems from multiple perspectives to uncover new solutions.

Prerequisite: ENES190, BMGT190, ENED290 or BMGT290.

Cross-listed with: BMGT390.

Restriction: Must be in the QUEST program.

Credit Only Granted for: BMGT390, ENES390 or ENED390.

Formerly: ENES390.

ENED394 Applied Quantitative Analysis (3 Credits)

The QUEST data analysis course takes a human-centered approach to data analysis and focuses on teaching students how to frame the core problem, choose the right data, and uncover deep insights from data to build an understanding of people and expose opportunities for innovation. Students will use visualization and statistical techniques to explore data, generate insights, and share the human stories behind the data to move people to action.

Cross-listed with: BMGT394.

Restriction: Must be in the QUEST Program.

Credit Only Granted for: BMGT394, ENED394, ENES489A or BMGT438A.

Formerly: BMGT438A and ENES489A.

ENEE - Electrical & Computer Engineering

ENEE101 Introduction to Electrical & Computer Engineering (3 Credits)

An exploration of topics within Electrical & Computer Engineering (ECE). Students will be introduced to key elements of both the Electrical Engineering and Computer Engineering curriculum, including: circuits, computing systems and software, communications and controls, electrostatics and waves, microelectronics, signal processing, and power systems.

Corequisite: MATH140. And corequisite: ENEE140 or CMSC131; or a score of 5 on the A Java AP exam; or a score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and students cannot enroll in ENEE101 and ENES100 in the same semester.

ENEE131 Technology Choices (3 Credits)

An exploration of the positive and negative effects of technology on society, via diverse criteria to assess the relative well being of individuals and society; an examination of how society can help shape the future of technology and the tools that can be used to make wise technology choices.

ENEE140 Introduction to Programming Concepts for Engineers (2 Credits)

Introduction to the programming environment: editing, compiling, UNIX, data types and variable scope; program selection, formatted/unformatted input/output, repetition, functions, arrays and strings.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in Engineering: Electrical program; or must be in Engineering: Materials Science program.

ENEE150 Intermediate Programming Concepts for Engineers (3 Credits)

Advanced programming concepts: coding conventions and style; pointers; dynamic memory allocation and data structures; linked lists; graphs; abstract data types; object-oriented design. There will be team-based software projects and group presentations.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department. And ENEE140 or CMSC131; or score of 5 on the A Java AP exam; or score of 4 or 5 on the AB Java AP exam; or satisfactory performance on the department's placement exam.

Corequisite: MATH140.

Restriction: Must be in Engineering: Electrical program.

ENEE200 Technology and Consequences: Engineering, Ethics, and Humanity (3 Credits)

What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.

Credit Only Granted for: ENEE200 or ENES200.

ENEE205 Electric Circuits (4 Credits)

Design, analysis, simulation, construction and evaluation of electric circuits. Terminal Relationships. Kirchoff's laws. DC and AC steady state analysis. Node and mesh methods. Thevenin and Norton equivalent circuits. Transient behavior of first- and second-order circuits. Frequency response and transfer functions. Ideal op-amp circuits. Diode and transistor circuits.

Prerequisite: Minimum grade of C- in PHYS260; and minimum grade of C- in PHYS261; and permission of ENGR-Electrical & Computer Engineering department.

Corequisite: MATH246 or ENEE290.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE222 Elements of Discrete Signal Analysis (4 Credits)

Discrete- and continuous-time signals, sampling of sinusoids. Discrete Fourier transform: properties and applications. Periodic signals and Fourier series. Discrete-time linear filters in time and frequency domains. Numerical applications and implementation of algorithms (using MATLAB).

Prerequisite: Minimum grade of C- in ENEE140; or minimum grade of C- in CMSC131; and permission of ENGR- Electrical & Computer Engineering department.

Corequisite: ENEE290; or coursework approved by the department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE244 Digital Logic Design (3 Credits)

The design and analysis of combinational and synchronous sequential systems comprising digital logic gates and flip-flop memory devices; underlying tools such as switching and Boolean algebras and Karnaugh map simplification of gate networks; design and use of decoders, multiplexers, encoders, adders, registers, counters, sequence recognizers, programmable logic arrays (PLAs), read-only memories (ROMS, PROMS), and similar devices. Arbitrary radix conversion.

Prerequisite: Must have completed or be concurrently enrolled in CMSC132 or ENEE150; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Sophomore standing or higher; and must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE245 Digital Circuits and Systems Laboratory (2 Credits)

Introduction to basic measurement techniques and electrical laboratory equipment (power supplies, oscilloscopes, voltmeters, etc.). Design, construction, and characterization of digital circuits containing logic gates, sequential elements, oscillators, and digital integrated circuits. Introduction to digital design and simulation with the Verilog Hardware Description Language (HDL).

Prerequisite: Minimum grade of C- in ENEE244. And minimum grade of C- in ENEE150; or minimum grade of C- in CMSC132. And permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE290 Introduction to Differential Equations and Linear Algebra for Engineers (4 Credits)

First-order differential equations, matrices and systems of linear equations, finite-dimensional vector spaces, inner product spaces, eigenvalues and eigenvectors, linear differential equations of higher order, and systems of differential equations. This course covers important topics in mathematics for Electrical and Computer Engineers. Specifically, several topics are covered, including first-order differential equations, matrices and systems of linear equations, finite-dimensional vector spaces, inner product spaces, eigenvalues and eigenvectors, linear differential equations of higher order, and systems of differential equations. Theoretical topics presented in the lectures will be reinforced by laboratory exercises.

Prerequisite: Minimum grade of C- in MATH141; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Credit Only Granted for: ENEE290, MATH240, MATH246, or MATH461.

ENEE303 Analog and Digital Electronics (3 Credits)

Conceptual operation of transistors and diodes. Large and small signal operation of BJTs and MOSFETs. Basic transistor configurations. Logic circuits and semiconductor memory. Multi-transistor circuits including differential amplifiers and current mirrors. Frequency response.

Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE304 Introduction to Micro and Nanoelectronics (3 Credits)

Introduction to semiconductor device physics: drift-diffusion model, pn junction properties, BJTs and FETs. Electronic circuits: diode circuits, BJT and MOSFET amplifiers, logic gates and multi-transistor circuits (such as differential amplifiers and current mirrors).

Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Credit Only Granted for: ENEE304 or ENEE303; ENEE304 or ENEE313.

ENEE305 Introduction to Micro and Nanoelectronics Lab (2 Credits)

Introductory laboratory in semiconductors and electronics. Characterization of diodes followed by design and testing of analog and digital circuits at the transistor (FET and BJT) level.

Prerequisite: Minimum grade of C- in ENEE304; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in the following program (Engineering: Electrical).

Credit Only Granted for: ENEE305 or ENEE307.

ENEE307 Electronic Circuits Design Laboratory (2 Credits)

Students will design and test analog and digital circuits at the transistor level. FETs and BJTs will be covered. The laboratory experiments will be tightly coordinated with ENEE303 materials.

Prerequisite: Minimum grade of C- in ENEE303; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE313 Introduction to Device Physics (3 Credits)

Basic physics of devices including fields in solids, crystal structure, properties of electrons and holes. Current flow in Si using drift-diffusion model. Properties of the pn junction. Properties of devices including BJTs, FETs and their physical characteristics.

Prerequisite: Minimum grade of C- in ENEE205; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE322 Signal and System Theory (3 Credits)

Concept of linear systems, state space equations for continuous systems, time and frequency domain analysis of signals and linear systems. Fourier, Laplace and Z transforms. Application of theory to problems in electrical engineering.

Prerequisite: Minimum grade of C- in MATH246 or ENEE290; and minimum grade of C- in ENEE222.

Restriction: Permission of ENGR-Electrical & Computer Engineering department. Must be in the following program (Engineering: Computer).

Credit Only Granted for: ENEE322 or ENEE323.

ENEE323 Signals and Systems: Theory and Applications (4 Credits)

This is a course and laboratory on signals and systems. The course lectures cover concepts in linear systems, and time and frequency domain analysis of signals and linear systems. Signal analysis topics: discrete- and continuous-time Fourier transforms, Laplace and z-transforms. Dynamical system properties: linearity, time-invariance, stability and invertibility. Analysis of linear time-invariant systems in the time domain (impulse response and convolution) and transform domain (transfer function and frequency response). Applications in signal processing, communications and control.

Prerequisite: Minimum grade of C- in MATH246 or ENEE290; and minimum grade of C- in ENEE222; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in the following program (Engineering: Electrical).

Credit Only Granted for: ENEE322 or ENEE323.

ENEE324 Engineering Probability (3 Credits)

Axioms of probability; conditional probability and Bayes' rules; random variables, probability distribution and densities: functions of random variables: weak law of large numbers and central limit theorem. Introduction to random processes; correlation functions, spectral densities, and linear systems. Applications to noise in electrical systems, filtering of signals from noise, estimation, and digital communications.

Prerequisite: Minimum grade of C- in MATH246 and ENEE222; and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: DATA400, STAT400 or ENEE324.

Additional Information: Electrical Engineering majors may NOT substitute STAT400 for ENEE324.

ENEE350 Computer Organization (3 Credits)

Structure and organization of digital computers. Registers, memory, control and I/O. Data and instruction formats, addressing modes, assembly language programming. Elements of system software, subroutines and their linkages.

Prerequisite: Minimum grade of C- in ENEE244; and 1 course with a minimum grade of C- from (ENEE150, CMSC132); and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE351 Algorithms and Data Structures (4 Credits)

Introduction to fundamental concepts in computer engineering, including topics in discrete math, data structures and algorithms. The course will also include a hands-on programming component. This course will provide students with the tools to design modular, time and space-efficient algorithms for real-world problems.

Prerequisite: Minimum grade of C- in ENEE150 and ENEE244.

Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in the Computer Engineering Minor or the Academy of Machine Learning.

Credit Only Granted for: ENEE351 or CMSC351.

ENEE359 Intermediate Topics in Computer Engineering (1-3 Credits)

Selected intermediate level topics in computer engineering.

Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 100- and 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Repeatable to: 6 credits if content differs.

ENEE380 Electromagnetic Theory (3 Credits)

Introduction to electromagnetic fields. Coulomb's law, Gauss's law, electrical potential, dielectric materials capacitance, boundary value problems, Biot-Savart law, Ampere's law, Lorentz force equation, magnetic materials, magnetic circuits, inductance, time varying fields and Maxwell's equations.

Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in MATH241, PHYS270, and PHYS271; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in Engineering: Electrical program.

ENEE381 Electromagnetic Wave Propagation (3 Credits)

The electromagnetic spectrum: Review of Maxwell's equations; the wave equation potentials, Poynting's theorem, relationship between circuit theory and fields; propagation of electromagnetic waves in homogeneous media and at interfaces; transmission line theory, waveguides, radiation and antennas.

Prerequisite: Minimum grade of C- in ENEE380; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in Engineering: Electrical program.

ENEE382 Electromagnetics (4 Credits)

Theory and tools needed to solve electromagnetic problems and understand how electromagnetic waves propagate and interact with materials. Fields and potentials. Maxwell's equations and wave propagation. Reflection and transmission. Transmission lines. Antennas and radiation.

Prerequisite: Minimum of C- or better in ENEE205, MATH241, PHYS270, and PHYS271; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in the Electrical Engineering program.

Credit Only Granted for: ENEE380 or ENEE382; ENEE381 or ENEE382.

ENEE396 Leadership, Creativity and Service Learning (3 Credits)

Introduction to engineering creativity and innovation in engineering. Application of creativity methods to topics in communication, service learning, teaching, research, and leadership. Discussions of leadership style, professional communication, and the handling of ethical dilemmas. Investigation of how experiential learning can enhance leadership and teamwork skills, connect to classroom learning and provide opportunities to gain practical experience.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE407 Design & Testing of RF and Microwave Devices (2 Credits)

An introduction to state of the art design, and testing techniques of RF and microwave devices. Designs, simulations and layout of different devices are performed using the software package ADS (Advanced Design System). The course highlights a wide range of engineering applications including terrestrial microwave links, satellite communications, broadcasting, mobile communications and radar.

Prerequisite: Minimum grade of C- in ENEE381; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE408 Capstone Design Project (3 Credits)

Culmination of prior course work in electrical and computer engineering. Utilization of modern design tools and methodologies for the design of components or systems under realistic constraints, with particular emphasis on teamwork and oral/written communication. Areas in which projects are currently offered include: microprocessor-based systems, digital systems, VLSI design (both digital and mixed-signal), and optical systems.

Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 6 credits if content differs.

ENEE411 Advanced Analog and Digital Electronics (3 Credits)

Examination of analog and digital device models for analysis, design, and simulation of transistor level electronic circuits, emphasizing Metal Oxide Silicon Field Effect Transistors (MOSFETs); fundamental single transistor configurations; frequency response, feedback, and stability of multi-transistor circuits, such as current mirrors, differential amplifiers, voltage references, operational amplifiers and data converters; complementary Metal Oxide Silicon (CMOS) implementations of static and clocked digital as well as mixed signal circuits.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and must have permission of the department.

ENEE413 Advanced Electronic Devices (3 Credits)

Advanced devices and their physical operation, providing a thorough description of those parts not usually covered in introductory electronics courses. These include Schottky and tunnel junctions, negative resistance devices used in wireless communication, homo-structure compound semiconductor transistors, hetero-structure (quantum effect) transistors, non-volatile memory devices, photonic devices such as LEDs and solid-state lasers, solar cells, photo-detectors and camera imagers, as well as bio-related components. Special consideration will be given to achieve an understanding of noise processes that limit electronic device performance. In all cases, system-level applications will be illustrated.

Prerequisite: Minimum grade of C- in ENEE313 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE415 Advanced Manufacturing Laboratory (3 Credits)

An interdisciplinary course designed to provide students with an overview of key processes, technology, and manufacturing techniques involved in fabricating advanced devices and systems. Students will be exposed to state-of-the-art fabrication technologies, including soft lithography, 3D printing, hybrid manufacturing, material functionalization, and systems integration. In addition to developing a theoretical understanding in the classroom, students will gain hands-on fabrication and characterization experience of systems that can interface with complex environments.

Prerequisite: ENEE313 or ENEE304.

Restriction: Must be in the Department of Electrical and Computer Engineering.

Credit Only Granted for: ENEE415, ENEE419M, ENMA489M, or BIOE489J..

Formerly: ENEE419M.

ENEE416 Integrated Circuit Fabrication Laboratory (3 Credits)

Characterization of wafers and fabrication steps. Oxide growth, lithography, dopant diffusion, and metal deposition and patterning will be discussed in the lectures and carried out in the lab in fabricating NMOS transistor circuits. The transistor characteristics will be measured and related to the fabrication parameters.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE417 Microelectronics Design Laboratory (2 Credits)

Students design and build fairly sophisticated circuits, mainly composed of discrete transistors and integrated circuits. Many of the projects are designed to require that students synthesize from what they have learned in many of the disciplines in electrical engineering. Students learn they can actually use their knowledge to build something very practical, which may include a high-fidelity amplifier, a radio, a memory cell, a transmitter, etc.

Prerequisite: Minimum grade of C- in ENEE303; and minimum grade of C- in ENEE307; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE419 Topics in Microelectronics (1-3 Credits)

Selected topics of current importance in microelectronics.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Repeatable to: 99 credits if content differs.

ENEE420 Communication Systems (3 Credits)

Fourier series, Fourier transforms and linear system analysis; random signals, autocorrelation functions and power spectral densities; analog communication systems: amplitude modulation, single-sideband modulation, frequency and phase modulation, sampling theorem and pulse-amplitude modulation; digital communication systems pulse-code modulation, phase-shift keying, differential phase shift keying, frequency shift keying; performance of analog and digital communication systems in the presence of noise.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323; and minimum grade of C- in ENEE324; and completion of all lower-division technical courses in the Electrical Engineering curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE425 Digital Signal Processing (3 Credits)

Sampling as a modulation process; aliasing; the sampling theorem; the Z-transform and discrete-time system analysis; direct and computer-aided design of recursive and nonrecursive digital filters; the Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT); digital filtering using the FFT; analog-to-digital and digital-to analog conversion; effects of quantization and finite-word-length arithmetic.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE426 Communication Networks (3 Credits)

The main design issues associated with computer networks, satellite systems, radio nets, and general communication networks. Application of analytical tools of queuing theory to design problems in such networks. Review of proposed architectures and protocols.

Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in Engineering: Computer or Engineering: Electrical program.

Credit Only Granted for: CMSC417 or ENEE426.

ENEE428 Communications Design Laboratory (2 Credits)

Advanced Laboratory course exploring signal processing and communication systems theoretical concepts and implementing them on actual DSP based hardware in real time.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323; and minimum grade of C- in ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.

Recommended: ENEE420 and ENEE425.

Restriction: Must be in Engineering: Electrical or Engineering: Computer program; and permission of Electrical and Computing Engineering Department.

ENEE429 Topics in Communications (1-3 Credits)

Selected topics of current importance in communications.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

Repeatable to: 99 credits if content differs.

ENEE436 Foundations of Machine Learning (3 Credits)

A broad introduction to the foundations of Machine Learning (ML), as well as hands-on experience in applying ML algorithms to real-world data sets. Topics include various techniques in supervised and unsupervised learning, as well as applications to computer vision, data mining, and speech recognition.

Prerequisite: 1 course with a minimum grade of C- from (ENEE324, STAT400); and 1 course with a minimum grade of C- from (ENEE150, CMSC216); and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Permission of ENGR-Electrical & Computer Engineering department. And must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; or must be in the ECE Department's Machine Learning notation program.

Credit Only Granted for: ENEE436, ENEE439M, or CMSC422.

Formerly: ENEE439M.

ENEE439 Topics in Signal Processing (1-3 Credits)

Selected topics of current importance in signal processing.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE440 Microprocessors (3 Credits)

Microprocessor architectures, instruction sets, and applications. Bus structures, memory, I/O interfacing. Assembly language programming, LSI device configuration, and the embedding of microprocessors in systems.

Prerequisite: ENEE350; and completion of all lower division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE445 Computer Laboratory (2 Credits)

This laboratory course focuses on the hardware/software interface in computer systems. Hands-on experiments are used to teach design, construction, analysis, and measurement of both hardware and software for embedded systems. Projects emphasize using microcontrollers for control, sensing, and communication through various I/O devices.

Prerequisite: Minimum grade of C- in ENEE205 and ENEE350.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical); and permission of ENGR-Electrical & Computer Engineering department.

ENEE446 Digital Computer Design (3 Credits)

Hardware design of digital computers. Arithmetic and logic units, adders, multipliers and dividers. Floating-point arithmetic units. Bus and register structures. Control units, both hardwired and microprogrammed. Index registers, stacks, and other addressing schemes. Interrupts, DMA and interfacing.

Prerequisite: ENEE350; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE446 or CMSC411.

ENEE447 Operating Systems (4 Credits)

The course will present the theory, design, implementation and analysis of computer operating systems. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and protection and security in operating systems. Optional topics may include communications protocols, computer security, and real-time operating systems. The lectures will be complemented with a significant level of programming, bringing up a simple operating system from scratch, concurrently as the topics are discussed in lecture. A weekly recitation section will provide TA support and an informal laboratory atmosphere. Each student will have their own board, so development will be done largely outside the classroom at each student's pace.

Prerequisite: 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457); and permission of ENGR-Electrical & Computer Engineering department; and (ENEE350, CMSC330, and CMSC351).

Restriction: Must be in Engineering: Computer program; and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE447 or CMSC412.

ENEE452 Embedded Systems (3 Credits)

Embedded systems are part of most of the modern technological systems such as Industrial machines, consumer electronics, agricultural and process industry devices, automobiles, medical equipment, cameras, household appliances, airplanes, vending machines and toys, as well as mobile devices. Embedded systems are comprised of hardware, software and firmware. Design Methodologies and platforms for real time modern embedded digital systems have been evolving over time. In order to meet the system specifications, many models, tools, and operating systems exist to automate the design space exploration phase. In this course, students will be introduced to microcontroller-based embedded system design, fundamental concepts of a Real Time Operating System (RTOS), and the design of solutions for the Internet of Things (IOT). Using hands-on experience developed through practical designs, exercises, and projects, we will discuss in detail how to analyze, implement, and synthesize these systems.

Prerequisite: Minimum grade of C- in ENEE350 and ENEE244; and minimum grade of C- in ENEE150 or CMSC216.

Restriction: Permission of the Electrical and Computer Engineering Department; and must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Credit Only Granted for: ENEE452 or ENEE459V.

Formerly: ENEE459V.

ENEE456 Cryptography (3 Credits)

The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.

Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor .

Cross-listed with: MATH456, CMSC456.

Credit Only Granted for: MATH456, CMSC456 or ENEE456.

ENEE457 Computer Systems Security (3 Credits)

Theoretical and practical aspects of computer systems security.

Topics covered include symmetric/asymmetric encryption, message authentication, digital signatures, access control, as well as network security, web security and cloud security. Students acquire tools necessary for designing secure computer systems and programs and for defending against malicious threats (e.g., viruses, worms, denial of service).

Prerequisite: Minimum grade of C- in ENEE350; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: CMSC414 or ENEE457.

ENEE459 Topics in Computer Engineering (1-3 Credits)

Selected topics of current importance in computer engineering.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE460 Control Systems (3 Credits)

Mathematical models for control system components. Transform and time domain methods for linear control systems. Introductory stability theory. Root locus, bode diagrams and Nyquist plots. Design specifications in the time and frequency domains. Compensation design in the time and frequency domain. Introduction to sampled data systems.

Prerequisite: ENEE322; and (ENEE290, MATH240, or MATH461); and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE461 Control Systems Laboratory (3 Credits)

Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control and familiarize them with the characteristics and limitations of real control devices. They will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.

Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical); and permission of ENGR-Electrical & Computer Engineering department.

Credit Only Granted for: ENEE461, ENME461, or ENME489N.

ENEE463 Digital Control Systems (3 Credits)

Introduction to techniques for the analysis and design of linear control systems and implementation of control systems using digital technology. Topics include linearization, solution of linear equations, z-transforms and Laplace transforms, design of linear controllers, optimal control, and digital implementation of control designs. Students will use MATLAB for the solution of problems and the design of control systems.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE464 Introduction to Optimization (3 Credits)

Students will be introduced to linear, nonlinear, unconstrained, constrained optimization. Convex optimization will be highlighted. Applications will be considered, in particular in the area of machine learning. Some optimization algorithms may be discussed, time permitting.

Prerequisite: One of the following: ENEE290, MATH240, MATH341, or MATH461; and must have completed or be concurrently enrolled in ENEE324 or STAT400.

Recommended: Experience in Matlab or Python.

Restriction: Must be in the Department of Electrical and Computer Engineering.

Credit Only Granted for: ENEE464 or ENEE4690.

Formerly: ENEE4690.

ENEE467 Robotics Project Laboratory (3 Credits)

Teaches practical skills to build, control, and deploy robotic systems.

Interdisciplinary groups of students develop real-world robotic systems, with emphasis on making a real robot do what one wants it to do.

Prerequisite: Minimum grade of C- in ENAE450.

Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Department of Electrical and Computer Engineering.

ENEE469 Topics in Controls (1-3 Credits)

Selected topics of current importance in controls.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Repeatable to: 99 credits if content differs.

ENEE473 Electrical Machines Laboratory (2 Credits)

Students will learn theory and measurement methods of passive power components, multi-phase AC power, single and three-phase transformers, single and three-phase induction machines, three-phase synchronous machines, and DC machines. Each of these topics is addressed in one or more laboratory exercises.

Prerequisite: Minimum grade of C- in ENEE205; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses.

Recommended: ENEE322 or ENEE323.

Restriction: Permission of the Electrical and Computer Engineering Department.

ENEE474 Power Systems (3 Credits)

Interconnected power systems, transmission lines, load flow studies, unit commitment and economic dispatch. Three phase networks, machine models. Symmetrical components, fault analysis and unbalanced operation. Power system transients, stability and numerical methods in power system analysis.

Prerequisite: Minimum grade of C- in ENEE322 or ENEE323.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE475 Power Electronics (3 Credits)

This course is suitable for undergraduate and graduate students who want to learn the basic principles of power electronics and its applications. Special emphasis is placed on the interdisciplinary nature of power electronics. Strong and intimate connections between power electronics and circuit theory, electronic circuits, semiconductor devices, electric power, magnetic, motor drives and control are stressed.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer); and permission of ENGR-Electrical & Computer Engineering department.

ENEE476 Renewable Energy (3 Credits)

Solar Energy Conversion Systems: History of Photovoltaic (PV) Systems, PV Cell, Module and Array Models and Equivalent Circuits, Characteristic Resistance, Fill Factor, Effects of Parasitic Resistances, Mismatch Effects, Shading, Bypass Diodes, Sun Tracking Systems, Maximum Power Point Tracking (MPPT) Techniques, Isolated and Non-isolated Switch-mode DC/DC for PV Systems, Inverter Design and Control, Sizing the PV Panel and Battery Pack in PV Applications. Wind Energy Conversion Systems: Introduction to Wind Energy Harvesting, Horizontal and Vertical Wind Systems, Fundamentals of Wind Energy Harvesting Systems, Variable Speed and Fixed Speed Wind Energy Conversion Systems (WECS), Wind Turbines and Different Electrical Machines in Wind Applications, Induction Machine and Dynamic Model of Induction Machines, Synchronous Generators and Dynamic Model of SG, Control of Wind Energy Conversion Systems.

Prerequisite: Minimum grade of C- in ENEE303 or ENEE304.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical), and permission of ENGR-Electrical & Computer Engineering department.

ENEE484 Optoelectronic Devices (3 Credits)

Explores the fundamental physics of optoelectronic devices including lasers, solar cells, LEDs, and photodetectors. We aim at an understanding of the fundamental principles on device physics, material considerations, and significant components of optoelectronic devices. State-of-the-art device configurations and material choices in industry and academia will be discussed.

Recommended: A background in semiconductors and P-N junctions.

Restriction: Permission of the Electrical and Computer Engineering Department.

Credit Only Granted for: ENEE484 or ENEE489I.

Formerly: ENEE489I.

ENEE486 Optoelectronics Lab (2 Credits)

Hands-on experience in performing measurements in optics and electro-optics. Basics of optics, light detectors, Fourier optics, gratings and spectrometers, pulsed dye lasers, fiber optics, electro-optics, and acousto-optics.

Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in PHYS271 and PHYS270; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE488 Independent Study in Electrical and Computer Engineering (1-3 Credits)

The purpose is to provide students with an opportunity for independent study projects on advanced electrical and computer engineering topics. These projects typically involve academic investigations of technical themes that are not addressed in the established elective and special topics courses taught by the department on a regular basis. Study plans are tailored to students educational goals but are approved and supervised by faculty.

Prerequisite: Must have completed and earned a minimum grade of regular (letter) C- in all lower-division EE or CP tech electives; and permission of ENGR-Electrical & Computer Engineering department.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 9 credits if content differs.

Additional Information: A total of 5 credits combined of ENEE488 and ENEE499 can count towards a degree in electrical and computer engineering.

ENEE489 Topics in Electrophysics (1-3 Credits)

Selected topics of current importance in electrophysics.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

Repeatable to: 99 credits if content differs.

ENEE490 Physical Principles of Wireless Communications (3 Credits)

This course is intended to give students an overall understanding of the physical phenomena involved in wireless communications and to allow them to make first-cut designs. Major topics covered include antennas, antenna arrays, radiowave scattering and propagation, noise sources in communications systems, cell phone systems and satcom.

Prerequisite: ENEE381.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE491 Quantum Phenomena in Electrical Engineering (3 Credits)

Wave phenomena, wave-particle duality and laws of quantum mechanics. States, observables, operators and measurement, as applied to simple quantum circuits, information transmission and quantum key distribution. Also, covered: Schrodinger's equation, bound states, tunneling, scattering, periodic potentials, superconductivity and Josephson junctions.

Prerequisite: Minimum grade of C- in PHYS270, ENEE205 and (ENEE290 or MATH461).

Restriction: Permission of Electrical and Computer Engineering Department.

Credit Only Granted for: ENEE491 or ENEE489Q.

Formerly: ENEE489Q.

ENEE492 Introduction to Quantum Technology (3 Credits)

Investigates the basic concepts/building blocks of quantum computers, quantum key distribution, quantum networks, and quantum sensors.

Examines what is needed to form a working qubit and different hardware platforms that implement them (for example, trapped ions, superconducting microwave circuits, color centers, and neutral atoms.) Conceptual and computational familiarity with complex numbers, vector spaces, bases, matrices, eigenvectors, and eigenvalues will be assumed, as well as quantum states/wave functions, and quantum measurement. Familiarity with spin-1/2 systems, and Pauli matrices is highly recommended.

Prerequisite: MATH141 and MATH240 or equivalent; and one of the following: PHYS360, PHYS401, PHYS457, or ENEE491; or permission of instructor.

Cross-listed with: PHYS467.

Credit Only Granted for: PHYS467 or ENEE492.

ENEE496 Lasers and Electro-optic Devices (3 Credits)

Modern physical optics: Gaussian beams, optical resonators, optical waveguides; theory of laser oscillation, rate equations; common laser systems. Selected modern optoelectronic devices like detectors and modulators. Role of lasers and optoelectronics in modern technology.

Prerequisite: ENEE381; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE498 Topics in Electrical Engineering (1-3 Credits)

Selected topics of current importance in electrical engineering.

Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.

Restriction: Must be in Engineering: Electrical program.

Repeatable to: 12 credits if content differs.

ENEE499 Senior Projects in Electrical and Computer Engineering (1-6 Credits)

The purpose is to provide students with an opportunity to engage in independent research projects on advanced electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 499 project, the focus is to conduct an independent investigation of a technical theme by the student. The project may be used to satisfy the advanced lab requirement if it is approved as a primarily experimental research project. In that case, the student will enroll in ENEE499L.

Prerequisite: Completion of all lower-division technical courses in the electrical or computer engineering curriculum.

Restriction: Permission of ENGR-Electrical & Computer Engineering department.

Repeatable to: 6 credits if content differs.

Additional Information: For students in the ECE Honors Program, a total of 6 credits combined of ENEE488 and ENEE499/499L can count toward a degree in electrical or computer engineering. For non-honors ECE students, a total of 5 credits combined of ENEE488 and ENEE499/499L can count toward a degree in electrical or computer engineering.

ENES - Engineering Science

ENES100 Introduction to Engineering Design (3 Credits)

Students work as teams to design and build a product using computer software for word-processing, spreadsheet, CAD, and communication skills.

Prerequisite: Must have math eligibility for MATH140 or higher.

ENES102 Mechanics I (3 Credits)

The equilibrium of stationary bodies under the influence of various kinds of forces. Forces, moments, couples, equilibrium, trusses, frames and machines, centroids, moment of inertia, beams, friction, stress/strain, material properties. Vector and scalar methods are used to solve problems.

Corequisite: MATH140.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

Formerly: ENES110.

ENES106 Achieving Success in Mathematics (3 Credits)

An exploration of the skills and habits needed to successfully complete introductory mathematics courses.

Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES107 Achieving College Excellence (1-3 Credits)

An exploration of the skills and habits needed to successfully complete the introductory chemistry course for engineering students. Course will also include strategies for a successful first year experience.

Restriction: Permission of ENGR-A. James Clark School of Engineering.

ENES108 Achieving College Success: First Year Transition (1 Credit)

An exploration of the skills and habits needed to successfully complete the first year of study for Science, Technology, Engineering, and Mathematics (STEM) majors. This course is an extension of the college success seminars taught during the Summer Bridge Program.

Restriction: Permission of ENGR-A. James Clark School of Engineering.

Repeatable to: 2 credits if content differs.

ENES113 Virtus Living and Learning Community Seminar I (1 Credit)

The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to basic tools, undergraduate research opportunities, and campus and engineering resources.

Restriction: Must be in first year Virtus program.

ENES114 Virtus Seminar II (1 Credit)

Focus on personal and professional development with engineering with a strong emphasis on career development. Learn to employ strategies and skills for academic and professional success.

Prerequisite: ENES113.

Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES115 FLEXUS Living and Learning Community Seminar I (1 Credit)

The seminar focuses on personal and professional development related to the field of engineering with a strong emphasis on clarifying career goals and decisions. Additional topics include an introduction to campus and engineering resources, basic tools, and undergraduate research opportunities. Students will discuss issues of concern through a variety of book readings, self-reflections, and panel discussions with practicing women engineers.

Restriction: Must be a first year FLEXUS Participant.

ENES116 FLEXUS Living and Learning Community Seminar II (1 Credit)

The seminar focuses on personal and professional development by enhancing technical ability, understanding educational options through minors and student projects in engineering, identifying and employing strategies and skills for academic and professional success, and developing career commitment through networking and mentoring. Students develop professional portfolios in preparation for a future internship or job.

Prerequisite: ENES115.

ENES138 Equity and Inclusion in Engineering Design (1 Credit)

Through deliberate reflections on the past and current patterns of exclusion and inclusion within engineering, you will develop skills for engaging in equitable and inclusive processes and practices that can transform your collaborations and approach to engineering and the design process. This course engages students, from multiple social identity groups, in facilitated dialogue that focus on the tensions, similarities, and differences of experience that exist within, between, and/or across groups.

Restriction: Must be a student in the A. James Clark School of Engineering or in the Global Engineering Leadership minor.

Credit Only Granted for: ENES338K, CHSE338K, or ENES138.

Formerly: ENES338K.

ENES140 Discovering New Ventures (3 Credits)

Students explore dynamic company startup topics by working in teams to design a new venture. This multi-disciplinary course helps students to learn the basic business, strategy, and leadership skills needed to launch new ventures. Topics include learning how to assess the feasibility of a startup venture, as well as how to apply best practices for planning, launching, and managing new companies. Students discuss a wide range of issues of importance and concern to entrepreneurs and learn to recognize opportunities, assess the skills and talents of successful entrepreneurs, and learn models that help them navigate uncertainty.

Additional Information: This course may count as an elective for a student at the University of Maryland, depending on the student's specific degree program. It cannot be counted towards the requirements for the Smith School of Business Entrepreneurship Fellow Program.

ENES150 Transfer LEAD Seminar I (2 Credits)

This seminar focuses on personal and professional development for transfer students in the A. James Clark School of Engineering. Transfer LEAD is a program for Engineering transfer students with four main outcomes: Learn, Educate, Adapt, Direct. Topics covered in this course include campus resources, student identity development, leadership development, and student outreach. Students will learn educational theory in order to develop a sense of leadership as students in the Clark School of Engineering.

Restriction: Eligible external transfer students in the A. James Clark School of Engineering; and permission of instructor.

ENES152 Transfer LEAD Seminar II (1 Credit)

This is a continuation of ENES150: Transfer LEAD Seminar I. Transfer LEAD is a program for Engineering transfer students with four main outcomes: Learn, Educate, Adapt, Direct. In this course, students will apply the concepts they learned in ENES150 in a practical setting. Students will focus on engagement, communication, and peer education.

Prerequisite: ENES150.

Restriction: Must be an eligible external transfer student in the A. James Clark School of Engineering; and permission of instructor.

ENES181 Engineering & The Grand Challenges (1 Credit)

Introduction to the various fields of engineering and the necessary context for students to fully engage in selected National Academy of Engineering's Grand Challenges such as economical solar energy, carbon sequestration, access to clean water, engineering better medicines, restoring urban infrastructure and personalized learning. The lectures and activities will provide an introduction to the engineering disciplines, NAE Grand Challenges, STEM cultures, and research.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must be a new freshman or transfer student.

ENES192 Engineering For Us All (3 Credits)

Students are challenged to uncover hidden valuable connections among a variety of disciplines, while creatively seeking and solving problems as a team. Students learn and practice skills for how groups function and identify innovation while addressing the tensions between our inherent drives to seek and solve, to share, and to sell.

Prerequisite: MATH107.

Additional Information: Recommended for non-engineering majors.

ENES197 The Fault in Our Data: What Counts and Who's Counting (3 Credits)

Quantitative data and analysis are key to understanding the shape of the world. In this course, we will use the tools of computational analysis to load, interrogate, visualize, and model datasets from dozens of data points to hundreds of thousands. We'll look at how computational methods can tell us when a movie is sexist, how wealth inequality can form, and how rumors spread like diseases. Then, you will find datasets of interest, write code to make sense of them, and share your findings with the world. No prior programming experience is required.

Prerequisite: MATH113 or equivalent.

Recommended: MATH115.

ENES200 Technology and Consequences: Engineering, Ethics and Humanity (3 Credits)

What makes a technology socially responsible? At UMD, the Fearless Ideas campaign asks us to aim our enthusiasm for technology at big real problems. At the same time, we are coming to appreciate the increasingly complex nature of technological systems as they become integrated into all forms of infrastructure, we realize they may be unpredictable, interdependent on social and biological systems, and have unintended consequences. In this midst of this complexity, people make decisions with far reaching impacts. How then do we follow our passion for technology and innovation but also stay skeptical in a way that allows us to consider the potential and shortcomings of technology? Designed for both engineering and non-engineering students wishing to explore and assess the impact of engineering technology on society and the role of society in generating that technology.

Credit Only Granted for: ENEE200 or ENES200.

ENES210 Entrepreneurial Opportunity Analysis and Decision-Making in 21st Century Technology Ventures (3 Credits)

This multi-disciplinary course helps students learn the principles of entrepreneurial opportunity analysis and decision-making in an increasingly dynamic and technically-inclined society. Emphasis is placed on how aspiring technology entrepreneurs can develop their entrepreneurial perspectives to develop winning entrepreneurial plans for their future ventures.

Credit Only Granted for: ENES210 or ENES461.

ENES211 Introduction to Global Entrepreneurship (1 Credit)

Examines the opportunities and challenges of entrepreneurship and innovation from an international perspective through lectures, case studies, instructors, and guest speakers with international experiences and other relevant activities. Focuses on the benefit for every entrepreneur and innovator to understand the cultural, strategic and operational aspects related to conducting entrepreneurial ventures in an international context.

ENES213 Virtus Living and Learning Community Seminar III (1 Credit)

The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking and mentoring and developing awareness of diversity issues.

Prerequisite: ENES113.

Restriction: Must be a participant in the second year of the Virtus program.

ENES214 Virtus Seminar IV (1 Credit)

Students continue to develop their leadership and mentoring skills, participate in networking opportunities and explore their interest in special engineering topics.

Prerequisite: Students must have completed ENES213.

Restriction: Students must be participants in the Virtus Living and Learning Community.

ENES215 FLEXUS Living and Learning Community Seminar III (1 Credit)

The seminar focuses on personal, academic and professional success by cultivating leadership skills, developing self-confidence and self-efficacy in academic and technical ability and encouraging self awareness, identifying and employing strategies for academic and professional success, further enhancing career development through networking, mentoring and role modeling, and developing awareness of diversity issues, specifically gender diversity.

Prerequisite: ENES115 and ENES116.

Restriction: Must be a second year FLEXUS participant.

ENES216 FLEXUS Living and Learning Community Seminar IV (1 Credit)

The seminar focuses on gender diversity and its cross-sections with culture. Students continue to enhance their leadership and mentoring skills, participate in networking opportunities with women in leadership roles and careers in engineering, and engage in opportunities for outreach and service-learning. Students will also complete a culminating semester project.

Prerequisite: ENES115, ENES116, and ENES215.

Restriction: Restricted to second year FLEXUS participants.

ENES220 Mechanics II (3 Credits)

Stress and deformation of solids-rods, beams, shafts, columns, tanks, and other structural, machine and vehicle members. Topics include stress transformation using Mohr's circle; shear and moment diagrams; derivation of elastic curves; and Euler's buckling formula. Design problems related to this material are given in lab.

Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; and must not be in Engineering: Electrical program.

ENES221 Dynamics (3 Credits)

Systems of heavy particles and rigid bodies at rest and in motion. Force-acceleration, work-energy and impulse-momentum relationships. Motion of one body relative to another in a plane and in space.

Prerequisite: Minimum grade of C- in ENES102; and (MATH141 and PHYS161).

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENES232 Thermodynamics (3 Credits)

Introduction to thermodynamics. Thermodynamic properties of matter. First and second laws of thermodynamics, cycles, reactions, and mixtures.

Prerequisite: PHYS261 and PHYS260.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

Credit Only Granted for: BIOE232, CHBE301, ENCH300, ENES232, ENME320, or ENME232.

Formerly: ENME232 and ENME320.

ENES240 Ethical, Policy and Social Implications of Science and Technology (3 Credits)

Asks students to think about how society should manage complexity, transformation, and uncertainty with an eye on developing a broader sense of ethics and social responsibility. Introduces analytical frameworks, concepts, and data collection techniques that interdisciplinary scholars use to map relationships among science, technology and society and generate important questions about the future of society.

Cross-listed with: PLCY240.

Restriction: Must be in the Science, Technology, Ethics and Policy minor.

Credit Only Granted for: ENES240 or PLCY240.

ENES250 Why Do Things Fail? (3 Credits)

Why did the Silver Bridge between Ohio and West Virginia collapse on Christmas Eve, 1967? What caused the top of an Aloha Airlines flight to rupture, creating a convertible airplane? How do these kinds of massive structural damage occur, and how might we prevent them? This course will introduce students to topics of stress and strain and their importance in determining the safety and reliability of engineering structures. Some of the major structural failures worldwide will be identified and researched as to the circumstances leading up to the failures. Reasons for failures will be investigated and are expected to include engineering, social, political, ethical, and economic explanations. Other possible failures to be researched and analyzed would be the collapse of a walkway in Kansas City, the failure of the Tacoma Narrows Bridge in Washington, the collapse of a bridge on Interstate 95 in Connecticut, and the collapse of the Twin Towers in New York after 9/11.

Credit Only Granted for: HONR2880 or ENES250.

Formerly: HONR2880.

ENES259 Study Abroad Special Topics in Engineering II (1-6 Credits)

Special topics course in engineering science taken as part of an approved study abroad program.

Repeatable to: 6 credits if content differs.

ENES260 AI4ALL: Introduction to Machine Learning for All Engineers (3 Credits)

This introductory course covers a wide range of topics, from the fundamentals of linear algebra and programming to advanced topics such as backpropagation in neural networks and hardware considerations for Large Language Models. This course will explore how professionals use Machine Learning (ML) to solve real-world engineering problems and even implement models in a team-based project. This course also delves into unsupervised algorithms for dimensionality reduction, defensive strategies against adversarial attacks on ML, ethical considerations of the open internet, and copyright.

Prerequisite: Minimum grade of C- in MATH140.

Recommended: Some programming experience is recommended, especially in Python.

Restriction: Permission of Department (Keystone).

ENES269 Topics in Grand Challenges for Engineering in a Global Context (3 Credits)

Special topics course that explores the grand engineering challenges facing the world from a technical, cultural, political, and economic perspective, as well as solutions developed through innovation and technology. Topics can include energy, environment, urban infrastructure, health, safety and security, and engineering the tools of discovery.

Repeatable to: 6 credits if content differs.

Additional Information: Course includes a study abroad component. No engineering background is required.

ENES275 How Do You Navigate Leadership in Times of Crisis? (3 Credits)

Students take part in immersive opportunities to learn from industry professionals about crisis prevention and response. The course introduces students to the study and practice of leadership with promising practices in disaster preparedness and data informed decision-making. Global communities need those who can lead during times of crisis and understand when and how to use data to inform decisions in times of crisis. This course will examine how leadership has been enacted to help local, national, and global communities navigate through pandemics, disasters, and other humanitarian crises. Students will develop capacities for informed leadership in times of crisis and develop an understanding for applying these skills in a variety of settings.

Credit Only Granted for: ENES275 or ENES475.

ENES288 Engineering Leadership Seminar (1-4 Credits)

Engineering leadership will be examined at the individual, team and organizational levels.

Corequisite: ENES100; or permission of instructor.

ENES304 RISE Seminar (1 Credit)

This is the first semester of a two semester sequence taken by RISE students in their first semester in the program. The purpose of ENES 304 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.

Restriction: Must be in the Engineering RISE Leadership Program; and permission of ENGR-A. James Clark School of Engineering.

ENES305 RISE Leadership Seminar (1 Credit)

This is the second semester of a two semester sequence taken by RISE students in their final semester in the program. The purpose of ENES 305 is for RISE students to learn about leadership, acquire leadership skills, and understand how to integrate leadership theories and concepts in engineering practice. There will be a mix of formal lectures by course faculty and lectures by distinguished speakers who can provide their own experience of what leadership means and how it is acquired. Students will explore their own leadership philosophy and leadership capacities in the context of group practice. Students will make meaning of general leadership theories and concepts and understand how to apply them to engineering industry. Students will also gain understanding of leadership through the stories shared by distinguished speakers with industrial, governmental and academic experience.

Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and ENES304.

ENES316 Global Leadership in Engineering, Business, & Technology (3 Credits)

An introduction to global leadership research, theories, and practice with an emphasis on applied dimensions of global leadership in the engineering, business, and technology sectors. This course prepares students to further their knowledge and capacities for global leadership to be successful in industry.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or permission of instructor.

Additional Information: Students will be required to participate in off-campus industry visits outside of the formal class meeting time.

ENES317 Introduction to Leadership in Engineering, Science, and Technology (3 Credits)

Develop a comprehensive overview and introduction to leadership and organizational development. Students will reflect on their own leadership experiences, develop a strong foundational knowledge of leadership theory, and advance their capacities in effectively leading teams. Students will connect leadership theory to practice by engaging in case study analysis and critique leadership practices enacted within engineering and technology settings. Students will complete self-assessments to better understand their own leadership strengths and refine their approaches to leadership by incorporating theories covered in this course.

Restriction: Must be in the Minor in Global Engineering Leadership(#EN09).

Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES338 Navigating Social Identity Difference through Intergroup Dialogue (1 Credit)

Engages students, from one or more cultural identity groups, in facilitated dialogue about the similarities and differences of experience that exist within a group and/or between and across groups. The goal of intergroup dialogue is for students to develop comfort with, and skill for, discourse on identity-based topics toward the end of fostering positive, meaningful, and sustained cross-group relationships. Whereas in debate, students learn to listen to gain advantage, in intergroup dialogue, students learn to listen to gain understanding. In so doing, students develop increased multicultural interaction facility, heightened intergroup awareness and sensitivity, and greater commitment to civic engagement.

Prerequisite: Completion of on-line enrollment form.

Cross-listed with: WEID139.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: CHSE338, EDHI338, ENES338 or WEID139.

Formerly: CHSE338.

ENES340 Engineering and Social Justice (3 Credits)

Students will explore the relationships between engineering and social justice through personal reflection and historical and contemporary case studies. Students will explore their own social locations, privileges, alliances, and resistances to social justice through critical engagement of interdisciplinary readings that challenge engineering mindsets and ideologies. Students will work to understand what constitutes social justice in different areas of social life and the role that engineers, and engineering might play. Students will gain an understanding of why and how engineering has been aligned and divergent from social justice issues and causes.

Prerequisite: ENEE200.

ENES359T Education, Technology and Society: Ecuador in Context (3 Credits)

Set in the UNESCO World Heritage site of Cuenca, Ecuador, students in this short-term study abroad course use theory from Science and Technology Studies (STS) to explore, discuss and critique the design, development and implementation of technology-based social programs in Ecuador. The program looks at education and technology throughout multiple lenses and contexts. Collaboration with the University of Cuenca, participating students have the opportunity for both university and field-based research and practice. UMD students work alongside students and faculty from the leaders and practitioners from UCuenca, government agencies, nongovernmental organizations, small business and local communities.

Recommended: 1 course from (ENES240, ENES200, or ENEE200).

Cross-listed with: CPSS370, LACS370.

Restriction: Minimum cumulative GPA of 2.5.

Credit Only Granted for: ENES259T, ENES359T, CPSP279T, LASC269T, CPSS370, or LACS370.

Formerly: ENES259T.

ENES388 Engineering Honors Seminar (1 Credit)**ENES389 Selected Topics (3 Credits)**

Repeatable to: 6 credits if content differs.

ENES390 Designing Innovative Systems (3 Credits)

The QUEST systems thinking course challenges students to analyze how processes interact in larger systems. Students will learn how to use process improvement tools and a systems thinking approach to solve problems and design innovative solutions. By drawing upon their multidisciplinary backgrounds, students will be able to understand and reframe problems from multiple perspectives to uncover new solutions.

Prerequisite: ENES190, BMGT190, ENED290 or BMGT290.

Cross-listed with: ENED390.

Restriction: Must be in the QUEST program.

Credit Only Granted for: BMGT390, ENES390 or ENED390.

Formerly: ENES390.

ENES397 Mentoring Multidisciplinary Teams (3 Credits)

QUEST students practice essential skills for mentoring and coaching multidisciplinary teams. These include effective communications, facilitation, conflict resolution, and the ability to motivate. Students will practice these skills as mentors for student teams from BMGT/ENES 190H. In the process, they will strengthen their knowledge of design and quality techniques.

Cross-listed with: BMGT397.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT397 or ENES397.

ENES401 Entrepreneurial Design Realization (3 Credits)

The vision for this course, and an aspect that makes it unique, is to expose students to the opportunities and challenges of bringing a product design to reality (entrepreneurship). The emphasis is on environmentally and socially sustainable projects. The end-product of this course will be full-scale implementations or complete design "packages" that can be taken to potential stakeholders.

Cross-listed with: ENME401.

Restriction: Must have senior standing and permission of instructor.

Credit Only Granted for: ENME401, ENME489B or ENES401.

Formerly: ENME489B.

ENES424 Engineering Leadership Capstone: Inclusive Leadership in Addressing Organizational & Societal Challenges (3 Credits)

The Minor in Global Engineering Leadership is designed to bring together one's understanding of leadership, organizations, culture, and global studies and apply this synthesized learning to a capstone project. The project will provide real-world application of global leadership principles to address an organizational or societal need. Students will utilize an inclusive leadership and global mindset to propose a big idea which brings about a positive organizational or societal change.

Prerequisite: ENES472 and ENES317.

Restriction: Must be in the Global Engineering Leadership minor (#EN09).

ENES428 Engineering Research for Exchange Students (3-12 Credits)

Directed research within the Clark School of Engineering for international exchange students.

Restriction: Available only to visiting exchange students taking part in an Engineering exchange program.

Repeatable to: 24 credits.

ENES440 Science, Technology, Ethics, and Policy: Minor Program Capstone (3 Credits)

Capstone research seminar for students in the Science, Technology, Ethics, and Policy Minor program.

Prerequisite: ENES240 and 2 courses from the STEP minor elective list.

Restriction: Must be in the Science, Technology, Ethics, and Policy minor.

Additional Information: This is the culminating course the STEP minor program.

ENES442 Creating Historic Woodwinds (3 Credits)

In this class, students will learn the art of woodworking and blend techniques of modern and historic instrument-making methods. Using wood lathes, metalworking tools, 3d scanners and selective laser sintering 3d printers. Student teams will first train to acquire the skills needed to use fabrication equipment. Each mixed team will then share their individual discipline's skills to help contribute to the creation of a completed musical instrument. Along the way, we'll explore the historical and cultural context of instrument making and the musical period.

Cross-listed with: MUSC442.

Credit Only Granted for: MUSC442 or ENES442.

ENES458 Topics in International Engineering (1-4 Credits)

A variety of topics related to engineering in a global context are discussed including cultural aspects, cross-cultural communication, international standards and law, and engineering and technology issues, business behavior, attitudes and values of selected countries and regions.

Prerequisite: ENES100.

Repeatable to: 12 credits if content differs.

ENES459 Study Abroad Special Topics in Engineering IV (1-6 Credits)

Special topics course in engineering science taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ENES460 Fundamentals of Technology Start-Up Ventures (3 Credits)

Fundamental aspects of creating, organizing, funding, managing, and growing a technology startup venture. This multidisciplinary course will draw on management, business, legal, financial, as well as technical, concepts. Students form teams and develop a business plan for a technology company, based on each team's own business idea and then present the plan to a panel of outside experts.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES460, BMGT461, SMLP470 or HLMN470.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES461 Advanced Entrepreneurial Opportunity Analysis in Technology Ventures (3 Credits)

Explores the factors that influence entrepreneurial opportunity analysis in technology-based ventures. Uses a cognitive theoretical framework to examine the integration of motivation, emotions and information processing modes to make complex entrepreneurial decisions in technology venture environments.

Credit Only Granted for: ENES210 or ENES461.

ENES462 Marketing High-Technology Products and Innovations (3 Credits)

Examines the opportunities and challenges of marketing high-technology products in turbulent environments requiring rapid decision making with incomplete information. Explores how innovations are introduced at frequent intervals, research-and-development spending is vital, and there are high mortality rates for both products and businesses.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES463 Strategies for Managing Innovation (3 Credits)

Emphasizes how the technology entrepreneur can use strategic management of innovation and technology to enhance firm performance. Examines the process of technological change, the ways that firms come up with innovations, the strategies that firms use to benefit from innovation, and the process of formulating technology strategy. Provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES463, BMGT467, SMLP473 or HLMN472.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES464 International Entrepreneurship and Innovation (3 Credits)

Focuses on the need for every entrepreneur and innovator to understand the global market in today's hypercompetitive world, and to appreciate how to compete effectively in domestic markets by managing international competitors, suppliers, and influences. Explore how the distinction between foreign and domestic markets is becoming less pronounced. Develop skills to identify and manage opportunities on a global basis.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES466 Leading and Financing the Technology Venture (3 Credits)

Focuses on the challenges of leading and financing new technology ventures. Leadership topics include team selection and formation, aligning rewards with relative contributions of team members, and how early decisions can enable or prevent founders from achieving results that align with their individual motivations for becoming an entrepreneur. Essential tools and methods for building a strong financial foundation for a new technology venture are examined. Includes important accounting principles as well as methods for keeping financial control of the technology venture. Insights are shared on navigating the multitude of financial barriers that may block your entrepreneurial success, as well as how to grow the technology venture from concept through launch.

Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.

Credit Only Granted for: ENES466, BMGT365, SMLP471 or HLMN471.

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES467 Engineering for Social Change (3 Credits)

Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.

Cross-listed with: ENME467.

Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering.

Credit Only Granted for: ENES467 or ENME467.

ENES471 Legal Aspects of Entrepreneurship (3 Credits)

Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.

Restriction: Must be in the Minor in Technology Entrepreneurship & Corporate Innovation (#EN06).

Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES472 Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology (3 Credits)

Develop global leadership capacities and an understanding of the cultural aspects pertaining to industry and international business. In a globalized world, the ability to work, lead and communicate in culturally diverse settings has become a core component to leadership. Through real-world examples, research, and simulations, students will increase their self-awareness and understanding of culture and how culture influences attitudes, behaviors, and practices at the individual, organizational, or societal levels. Students will develop the skills necessary to navigate, negotiate, and lead cross-cultural engagements and teams. The course content is relevant and applicable to anyone interested in developing cross-cultural leadership competencies and cultivating a global mindset.

Restriction: Sophomore standing or higher; must be a minor in Global Engineering Leadership (#EN09), Global Poverty (#AG06), Global Terrorism Studies (#BS07), or International Development and Conflict Management (#BS02).

Credit Only Granted for: ENES472, SLLC471, or SLLC473.

Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES474 Global Perspectives of Engineering (3 Credits)

Faculty supervised research on aspects of engineering in a foreign country including leading fields of research, key world markets, and the culture of the engineering workplace. Students will produce a comprehensive report exhibiting their expertise in their chosen country and the field of engineering within.

Prerequisite: ENES100; or permission of ENGR-A. James Clark School of Engineering.

Restriction: Must be in the International Engineering Minor.

Credit Only Granted for: ENES458M or ENES474.

Formerly: ENES458M.

ENES475 Leadership in Times of Crisis: Pandemics, Disasters, and Humanitarian Crises (3 Credits)

Students are provided with immersive opportunities to learn from industry professionals about crisis prevention and response by examining leadership throughout the crisis cycle: from identification, prevention, and preparation, to response, recovery, and rebuilding. The course brings together the study and practice of leadership with promising practices in disaster preparedness and data informed decision-making. This course will examine how leadership has been enacted to help local, national, and global communities navigate through pandemics, disasters, and other humanitarian crises. Students will develop capacities for informed leadership in times of crisis and develop an understanding for applying these skills in a variety of settings.

Restriction: Must have earned a minimum of 60 credits.

Credit Only Granted for: ENES275 or ENES475.

ENES478 Topics in Engineering Education (1 Credit)

Topics related to teaching engineering courses, particularly project-based courses. Topics can include learning styles, student development theory, multicultural issues in teaching, facilitating team experiences, assessment, and academic integrity.

Restriction: Must be in the Engineering Teaching Fellow program.

Repeatable to: 3 credits if content differs.

ENES480 Engineering Honors Seminar I (1 Credit)

Introduction to engineering leadership, professionalism, and ethics. Discussions of leadership style, elements of success, professional communication, codes of ethics, handling of ethical dilemmas, and the characteristics of a professional.

Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES481 Engineering Honors Seminar II (1 Credit)

Introduction to engineering creativity and innovation in engineering. Application of methods of creativity to topics in communication, conducting research, and leadership.

Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES489 Special Topics in Engineering (3-6 Credits)

Special topics in engineering.

Prerequisite: Permission of ENGR-A. James Clark School of Engineering.

Repeatable to: 6 credits if content differs.

ENES490 QUEST Capstone Professional Practicum (4 Credits)

The capstone QUEST course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.

Prerequisite: ENES390 or BMGT390.

Cross-listed with: BMGT490.

Credit Only Granted for: BMGT490 or ENES490.

ENES491 Scoping Experiential Learning Projects (3 Credits)

QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.

Prerequisite: BMGT190 or ENES190.

Cross-listed with: BMGT491.

Restriction: Restricted to QUEST Program (TQMP) students.

Credit Only Granted for: BMGT491 or ENES491.

ENES498 Special Topics in Entrepreneurship (3 Credits)

This entrepreneurship seminar and case study-based course will explore technology entrepreneurship with a focus on leadership, marketing, team-building, and management of new technology ventures and assumes baseline knowledge of entrepreneurship. Students will learn skills needed to succeed as a technology entrepreneur and how to apply best practices for planning, launching, and growing new companies. This course is a requirement of the Hinman CEOs program.

Restriction: Must be in Hinman CEOs Program.

Repeatable to: 12 credits if content differs.

ENES499 Senior Projects in Engineering (3 Credits)

Students will work in large teams to solve a multidisciplinary research/design problem. The course will begin with students identifying opportunities, brainstorming project concepts to address these opportunities, applying lean startup and design thinking strategies, and then selecting/proposing a project for the semester. Acceptable projects will require the multidisciplinary design, construction and testing of a project within limited budget and time constraints.

Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and completion of all 1XX and 2xx level (lower-division) technical courses in engineering major with a C- or better.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

Repeatable to: 6 credits if content differs.

ENFP - Engineering, Fire Protection

ENFP101 Introduction to Fire Protection Engineering (1 Credit)

This course will introduce students to the impact of fire on people, property and the environment and methods to mitigate the threat of fire. Student teams will apply the principles of fire behavior and fire safety systems covered in the first half of the course to design, build and test a fire safe, small-scale apartment. A final experiment will be conducted to provide an assessment of the complete designs of each team.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP108 or ENFP101.

Formerly: ENFP108.

ENFP201 Numerical Methods with MatLab (3 Credits)

A broad range of numerical methods are illustrated and applications related to engineering problems are implemented using Mat Lab thus providing a working knowledge of this computational tool. The topics covered in the course include: finding roots of equations with bracketing and open methods; solving linear systems of equations with matrices, Gauss elimination, LU decomposition, and iterative methods; linear regression, polynomial interpolation; numerical integration and numerical differentiation; ordinary and partial differential equations. Additional topics such as optimization, eigenvalues, Fourier analysis, splines, and Romberg integration may be included as time allows.

Prerequisite: MATH141.

Restriction: Must be in Engineering: Fire Protection program.

ENFP250 Introduction to Life Safety Analysis (3 Credits)

Introduction to fire protection engineering and building regulation focusing on building safety systems, egress system design and evacuation modeling.

Prerequisite: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP250 or ENFP251.

Formerly: ENFP251.

ENFP300 Fire Protection Fluid Mechanics (3 Credits)

Presents students with the fundamental properties of fluids and fluid movement. Both static and dynamic fluid problems will be considered with an emphasis on fire protection systems.

Prerequisite: MATH246 and ENFP201; and must have completed or be concurrently enrolled in PHYS260, PHYS261.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENFP310 Water Based Fire Protection Systems Design (3 Credits)

Introduction to aqueous fire suppression. Discussion of key fluid dynamics and heat transfer processes in aqueous fire suppression. System design and performance analysis based on national standards, hydraulic theory and elementary fluid dynamics and heat transfer.

Prerequisite: ENFP300.

Corequisite: ENFP312.

Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP312 Heat and Mass Transfer (3 Credits)

Fundamentals of heat and mass transfer. Conduction, convection, and radiation modes of heat transfer. Diffusion concepts and evaporation phenomena. Problem solving techniques with application to fire problems.

Prerequisite: ENES232 and ENFP300.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP312 or ENME332.

ENFP350 Professional Development Seminar (1 Credit)

An integrative, upper level professional development seminar covering topics such as engineering ethics, professional licensing, codes and standards, intellectual property, career selection and various contemporary issues in fire protection engineering.

Prerequisite: Permission of ENGR-Fire Protection Engineering department.

Restriction: Junior standing or higher.

ENFP405 Structural Fire Protection (3 Credits)

Effects of elevated temperature on structural materials; steel, concrete, wood, gypsum, glass and reinforced plastics. Experimental evaluation of fire resistance of building assemblies. Analytical methods to evaluate fire resistance of structural members.

Prerequisite: ENES220.

Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP405 or ENFP621.

ENFP410 Special Hazard Suppression Systems (3 Credits)

Analysis of application and theory of fire suppression systems. The key elements of fire suppression systems will be discussed along with how they interact for effective fire suppression design. Physical mechanisms for a variety of fire suppression approaches will be discussed including hose streams, sprinklers, water mist, foam, clean agents, and chemical agents.

Prerequisite: ENFP310 and ENFP312.

Jointly offered with: ENFP610.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP410, ENFP610 or ENFP653.

ENFP411 Risk-Informed Performance Based Design (3 Credits)

Appraisal and measurement of fire safety. Application of systems analysis, probability theory, engineering economy and risk management in the identification and synthesis of components of fire protection engineering. Methods for the development of criteria for the design, evaluation and assessment of fire safety or component hazards.

Restriction: Senior standing; or permission of ENGR-Fire Protection Engineering department.

ENFP413 Human Response to Fire (3 Credits)

Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety calculations. Physiology and toxicology of the fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.

Prerequisite: ENFP250.

Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP613.

Credit Only Granted for: ENFP413 or ENFP613.

ENFP415 Fire Dynamics (3 Credits)

Designed to give students a quantitative understanding of fire behavior. The fundamentals of physics and chemistry of combustion are presented and used to derive key analytical relationships that describe fire growth. Application of these relationships to the analysis of common fire scenarios is emphasized.

Prerequisite: ENFP312.

Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP651.

Credit Only Granted for: ENFP415 or ENFP651.

ENFP420 Fire Assessment Methods and Laboratory (4 Credits)

Experimental evaluation of ignition, flame spread, rate of heat release and smoke production of flammable gases, liquids, solids, and interior finish materials. Analytical and computer methods for the design, performance, and analysis of fire experiments. Preparation of laboratory reports.

Prerequisite: Student must have senior standing; and minimum grade of C- in ENFP312.

Restriction: Must be in Engineering: Fire Protection program.

Credit Only Granted for: ENFP320 or ENFP420.

Formerly: ENFP320.

ENFP425 Enclosure Fire Modeling (3 Credits)

An introduction to enclosure fire dynamics through the development of fire modeling algorithms and the application of computer-based fire modeling techniques. The objectives of the course are: to provide a basic understanding of enclosure fire dynamics with an emphasis on a system-level viewpoint (i.e., a global description of the coupling between combustion dynamics, smoke filling, vent flows and heat transfer); and to provide an introduction to the zone modeling approach. Topics covered include a review of the mathematical formulation of zone models, a discussion of numerical integration of the zone modeling equations (using MATLAB), and an introduction to zone modeling software used by professional engineers (e.g., CFAST).

Prerequisite: ENES232, ENFP300, and ENFP312.

Restriction: Must be in Engineering: Fire Protection program; and senior standing; and permission of ENGR-Fire Protection Engineering department.

ENFP426 Computational Methods in Fire Protection (3 Credits)

Introduction to computer-based fire modeling: zone modeling and Computational Fluid Dynamics (CFD); documentation of input data, validation and verification tests.

Recommended: ENFP425.

Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP429 Independent Studies (1-3 Credits)

For students who have definite plans for individual study of approved problems, or study of an advanced topic selected in conjunction with the faculty.

Prerequisite: Permission of ENGR-Fire Protection Engineering department.

Restriction: Must be in Engineering: Fire Protection program.

Repeatable to: 6 credits if content differs.

ENFP440 Smoke Management and Fire Alarm Systems (3 Credits)

Analysis of hazard posed by smoke in buildings. Performance characteristics of smoke management systems. Review of analytical design aids. Functional analysis and design of fire detection and alerting systems. Examination and evaluation of code criteria, performance specifications and research.

Prerequisite: Must have completed with a C- or better or concurrently be enrolled in ENFP300.

Jointly offered with: ENFP627.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP440 or ENFP627.

ENFP461 Think Tank (3 Credits)

Designed to have the student apply critical thinking in both engineering and business terms through a unique combination of student-driven, competition-based, long-term, targeted learning.

Recommended: Junior standing in fire protection engineering.

ENFP464 Industrial Fire Safety (3 Credits)

Designed to introduce students to the basics of process safety with a focus on the methods and techniques that may be utilized when evaluating the existing or proposed safety protection solutions in industrial facilities. An emphasis is placed on properly identifying the hazards that are present, the risk exposure, and how best to address the risk. The foundation is laid by presenting the necessary background information on industrial processes and integrating this information with applicable fire/explosion safety science.

Prerequisite: Students must be of senior standing.

Restriction: Permission of ENGR-Fire Protection Engineering department. Also offered as: ENFP664.

Credit Only Granted for: ENFP464, ENFP489I, ENFP629I OR ENFP664.

Formerly: ENFP489I.

Additional Information: The course will be taught as a dual senior-level undergraduate course and graduate course.

ENFP465 Fire and Explosion Investigations (3 Credits)

This course covers many aspects of fire and explosion investigation and reconstruction. Information on field techniques, applicable standards, and best practices are presented with an emphasis on how fire science and fire dynamics can be applied to forensic analysis. Experiments are performed and analyzed to demonstrate the concepts.

Prerequisite: Student should have senior standing.

Restriction: Permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP489N, ENFP629N OR ENFP665.

Formerly: ENFP489N.

Additional Information: The course will be taught as a shared senior-level undergraduate course and graduate course.

ENFP467 Wildland Fires: Science and Applications (3 Credits)

Introduction to the global problem of wildland fires with an overview of the social, political and environmental issues posed as well as detailed coverage of the science, technology and applications used to predict, prevent and suppress wildland fires.

Prerequisite: ENFP312.

Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.

Credit Only Granted for: ENFP489W, ENFP629W, or ENFP667.

Formerly: ENFP489W.

ENFP489 Special Topics (3 Credits)

Selected topics of current importance to fire protection.

Prerequisite: Permission of ENGR-Fire Protection Engineering department.

Repeatable to: 6 credits.

ENGL - English

ENGL101 Academic Writing (3 Credits)

An introductory course in expository writing.

Additional Information: Students must complete this course with a minimum grade of C- in order to fulfill the General Education Fundamental Studies Academic Writing requirement.

ENGL120 Acting Human: Shakespeare and the Drama of Identity (3 Credits)

Shakespeare's ideas of dramatic realism studied through close examination of literary and dramatic techniques. How Shakespeare generates the fiction of a living, thinking person in the space of five acts, and how readers participate in the making of that fiction. Some attention to Shakespeare on film and what the playwright can teach us about different media.

ENGL121 The Power of Song: Renaissance Lyric and Its Afterlives (3 Credits)

Examines the power that song has over its audiences. Drawing on literary, performance, and sound studies, we will investigate how song takes hold of its listeners in uniquely moving ways. We will examine the special appeal of song in early modern England, including works by William Shakespeare, John Milton, and William Byrd. And we will compare the song culture of the English Renaissance to the power of song in contemporary life, from Kendrick Lamar to CocoRosie.

ENGL125 Why Poetry Matters (3 Credits)

Poetry is most often understood as self-expression; it's also communal expression, and cultural expression; it's also a particular kind of construction made out of language. Explore the art form called poetry, including its formal properties, its conventions, and its legacy of experimentation. What role does poetry play in how we think about the human condition; what constitutes knowledge and wisdom, interior subjectivity and collective identity; and how shall this knowledge be used in confronting new challenges and the perennial questions: how to live with oneself, and as oneself; in time, and with others; here, where we reside; and elsewhere, where we imagine ourselves going. This is a hands-on course in reading and practicing the art of poetry, including short critical and creative writing exercises.

ENGL126 Why Fiction Matters (3 Credits)

Consider how short stories, novellas, and novels are vital to understanding our world and ourselves. Read and analyze a diverse range of twentieth- and twenty-first-century fiction, and apply the techniques of form and craft to your own experiments in fiction writing. Use critical analysis and hands-on creative experimentation to explore how fiction helps us understand the past, engage in the present, and build a better future.

ENGL130 Race and the Cultural Politics of Blood: A Historical Perspective (3 Credits)

Exploration of race, as term and concept, at three different historical times and from three different perspectives, through the reading of three stories: William Shakespeare's drama *Othello*, Aphra Behn's novella *Oroonoko*, and the short story *Benito Cereno* by Herman Melville. Exploration of the importance of context in interpretation. Study of how a concept for rationalizing human difference appears and adapts, fuses and fades away, relocates and is repurposed. How understanding of the particular situation of the concept, its context, changes our reading of the story.

ENGL132 Aliens, Exiles, and Immigrants (3 Credits)

Exploration of ideas, beliefs, and aspirations that immigrants carry from one nation to another. Different ways of understanding national and cultural identities, and ways the experiences of immigration have changed significantly over time. Readings examine historical and contemporary immigrant writing, including post-9/11 poetry and fiction; memoirs of nineteenth-century British emigrants to South Africa, Australia, and Canada; literature by emigrants from Asia, the Middle East, and Latin America now living in the United States; and writing by individuals displaced by war, famine, and political conflict. Politics of immigration and citizenship; historical and contemporary arguments for and against immigration and assimilation.

ENGL133 Imagining Nature (3 Credits)

Who gets to speak for nature? This course explores the long history of environmental writing in the context of the complex relationship between European and Indigenous North American traditions. We will not just survey environmental literature; we will inquire into the pressures under which contemporary ideas of nature evolved from a colonial past. Students will learn about the history of representing other-than-human actors in the world—including Indigenous ways of knowing—and how this history can help us envision new, shared relationships with the natural world.

ENGL134 The Rites of Discovery: Science, Law, and Literature, 1492-1992 (3 Credits)

History of idea of "discovery" from sixteenth-century debate about European "rights of discovery" to 500th anniversary, in 1992, of Columbus' landfall in New World. Evolution of modern concept of discovery, both as part of history of science and in legal context of history of European colonialism and cultural encounter with Native peoples of Americas, Africa, and Asia. Exploration of primary and secondary sources relating to international law, science, and literature.

ENGL140 American Fictions: U.S. Literature, History, Politics, and Constitutional Law (3 Credits)

Works of American literature explored in the context of major texts and developments of U.S. history, culture, politics, and constitutional law. We begin with the Declaration of Independence and the U.S. Constitution, and survey the course of American literature and history, from 1776 to the present, in relation to defining political and constitutional issues. Readings of canonical works like "Huckleberry Finn" and "The Grapes of Wrath" coupled with special attention to minority authors and issues, and horizons of constitutional contemplation opened up by minority, immigrant, and women's voices and experiences. Key historical and political issues include human rights; equal protection; religious tolerance; democratic principles; republican structures of government; independence; revolution; slavery; removal; immigration; free speech; labor rights; civil rights; feminism; environmentalism; international law and flows of people; economic globalization; technology and digital innovation; and the role that literature and the humanities play in fostering various forms of civil society, multiculturalism, and a globally accountable citizenship.

ENGL142 Literary Maryland (3 Credits)

What does the literature of Maryland teach us about our state's past, present, and future? "Literary Maryland" explores this question by taking students on a tour of our state's prose, poetry, and drama from colonization to the present. In addition to reading fascinating writing and visiting interesting places, you'll learn how the Chesapeake was formed; why nobody sings the entire national anthem; and what led Baltimore to name its football team after a poem written by a Virginian.

Credit Only Granted for: ENGL142 or ENGL289M.

Formerly: ENGL289M.

ENGL143 Visualizing Knowledge: From Data to Images (3 Credits)

Explores how technology and people shape our current age of information through the various forms of visually representing information. Visualizations do not show us things that are evident—visualizations make things evident. We will thus examine the history of visualization practices, the theories of image-making that guide their production, and the current state of the art. Students will engage critically with a wide range of information visualization practices to gain an understanding of the work involved in producing them and their histories. Students will also seek out contemporary visualizations, interact with the practitioners who produce them, and produce their own visualization as a response or critique.

ENGL146 Seeing the Present: Graphic Storytelling in the Age of Social Media (3 Credits)

We increasingly live in a world dominated by digital images: graphic narratives, data visualizations, tweets, GIFs, and computer animation. Students will learn how to critically analyze this digital visual rhetoric and how to become a skilled user of visual discourse. By examining a range of science fiction, graphic novels, photography, and films, we will develop a critical vocabulary for understanding the possibilities and perils of our digital image culture. We will apply this vocabulary to analyzing visual representations of contemporary political questions including: climate change, criminal justice, bio-technological transformations of the human, and the incorporation of algorithm-based platforms into everyday life.

ENGL152 What is Justice?: Literature and the Invention of Ethical Imagination (3 Credits)

Exploration of literature's unique ability to animate human passions underlying ethical dilemmas. How literary texts shape understanding of justice; how plays, novels, and films define, critique, challenge, and even alter society's comprehension of equity and inequity, crime and punishment, pardon and torture, and ideas about civil liberties and human rights. Attention to how writers have described just and unjust within their historical moment; crucial role of imagination in formation of ethical citizens across time.

ENGL154 Race, Children's Television, and the Legacies of Jim Henson (3 Credits)

How do children form ideas about race from television? We will approach this question by studying representations of race in children's television from the founding of the animation industry in the 1910s to educational programming epitomized by Sesame Street and the work of Jim Henson. We will also explore representations of race in the "Saturday Morning Cartoon Lineup" and in the subsequent proliferation of computer-generated images, gifs, and memes. Students will visit archives on campus pertaining to Jim Henson's work and reflect on what they find. Assignments will include a paper focused on critical analysis and self-reflection, and students will have the option of completing a multimedia project featuring video production, puppet making, or another creative means of producing a lesson for children.

Credit Only Granted for: ENGL154 or ENGL439J.

Formerly: ENGL439J.

ENGL181 English Grammar (1 Credit)

The basic structure of formal written English, including parts of speech, sentence patterns, standard punctuation, diction, and usage.

Restriction: Must not have completed JOUR181 or ENGL181.

Credit Only Granted for: ENGL181 or JOUR181.

ENGL201 The Medieval Imagination (3 Credits)

How and why do the Middle Ages resonate with us now? Explore a wide range of narratives, poems, artworks, and songs from ancient, medieval, and Renaissance cultures. Study popular culture, manuscript and print technologies, and the relationship between the sacred and the profane over a millenium. Learn about modern and contemporary medievalist revivals that might include authors such as J.R.R. Tolkien and N.K. Jemisin, television series such as Game of Thrones, and more.

ENGL222 American Literature(s) (3 Credits)

Explore American literary traditions in a variety of poetic and narrative forms and in diverse historical contexts, ranging from colonization to the Civil Rights Movement and beyond. Genres examined in this course might include lyric poems, travel narratives, gothic short fiction, slave narratives, and science fiction. Emphasis on developing skills of literary interpretation and critical writing, while attending to the place of race, class, gender, and sexuality in American literary culture. Authors may include Phillis Wheatley, Herman Melville, Walt Whitman, Emily Dickinson, Frederick Douglass, Gertrude Stein, F. Scott Fitzgerald, James Baldwin, and Toni Morrison, among others.

ENGL233 Asian American Literature and Culture (3 Credits)

What is the role of literature in the lives of contemporary Asian Americans? How do Asian American authors imagine identity, violence, and social justice? Consider the role of Asian American literature in forming our understanding of past and present Asian America, and explore Asian American cultures and experiences.

Cross-listed with: AAST233.

Credit Only Granted for: ENGL233 or AAST233.

ENGL234 African-American Literature and Culture (3 Credits)

An exploration of the stories black authors tell about themselves, their communities, and the nation as informed by time and place, gender, sexuality, and class. African American perspective themes such as art, childhood, sexuality, marriage, alienation and mortality, as well as representations of slavery, Reconstruction, racial violence and the Nadir, legalized racism and segregation, black patriotism and black ex-patriots, the optimism of integration, and the prospects of a post-racial America.

Cross-listed with: AAAS234.

Credit Only Granted for: ENGL234, AAAS234 or AASP298L.

ENGL235 U.S. Latinx Literature and Culture (3 Credits)

Examines the poetry, prose, and theater of Latinx communities in the United States from their origins in the Spanish colonization of North America to their ongoing development in the 21st century. Considers how authors use literary form to gain insight into human experience, including mortality, religious belief, gender and sexuality, war and peace, family, language use, scientific inquiry, cultural tradition, ecology, and labor. Also studies how Latinx literary traditions have shaped and been shaped by broader currents in American literature, as well as what connections exist between Latinx literature and social and artistic developments in other parts of the world, particularly Latin America and the Caribbean. Authors may include Alvar Nunez Cabeza de Vaca, Eulalia Perez, Juan Nepomuceno Seguin, Maria Amparo Ruiz de Burton, Jose Marti, Arthur A. Schomburg, Jesus Colon, Julia de Burgos, Cesar Chavez, Ariel Dorfman, Gloria Anzaldua, Junot Diaz, and Cristina Garcia.

Cross-listed with: AMST298Q.

Credit Only Granted for: ENGL235 or AMST298Q.

ENGL241 What Novels Do (3 Credits)

Novels offer spaces for realist expression, and they also push the boundaries of fiction and imagination. Explore consciousness, community, belonging, philosophy, and human difference in a range of national and cultural traditions. Study how novels present thought in radically different ways, crossing lines of class, gender, chronology, and locale.

ENGL243 What is Poetry? (3 Credits)

An exploration of arguably the most complex, profound, and ubiquitous expression of human experience. Study through close reading of significant forms and conventions of Western poetic tradition. Poetry's roots in oral and folk traditions and connections to popular song forms.

ENGL244 Drama, Performance, and Spectacle (3 Credits)

Exploration of drama through a consideration of plot, narrative flow, analytical flow, staging, performance, manuscript and printing history, text and textual change over time, and interpretation. Plays will be approached as public attempts to understand what it means to be alive.

ENGL245 Film Form and Culture (3 Credits)

Introduction to film as art form and how films create meaning. Basic film terminology; fundamental principles of film form, film narrative, and film history. Examination of film technique and style over past one hundred years. Social and economic functions of film within broader institutional, economic, and cultural contexts.

Cross-listed with: CINE245.

Credit Only Granted for: ENGL245, CINE245 or FILM245.

Formerly: FILM245.

ENGL246 The Short Story (3 Credits)

Explore how short stories quickly take hold of the imagination. Topics may include historical developments in the genre of the short story, popular trends in short fiction, short stories in diverse cultures, the short story collection as a unique form, and how the short story differs from the novel, the novella, and flash fiction.

ENGL250 Reading Women Writing (3 Credits)

Explores literary and cultural expressions by women and their receptions within a range of historical periods and genres. Topics such as what does a woman need in order to write, what role does gender play in the production, consumption, and interpretation of texts, and to what extent do women comprise a distinct literary subculture. Interpretation of texts will be guided by feminist and gender theory, ways of reading that have emerged as important to literary studies over the last four decades.

Cross-listed with: WGSS255.

Credit Only Granted for: ENGL250, WMST255 or WGSS255.

Formerly: WMST255.

ENGL251 Detective Fiction (3 Credits)

Explore "whodunnit" fiction from its nineteenth-century beginnings to the contemporary moment. Why are readers intrigued by the methodical discovery of the exact circumstances of a mysterious event? How does the figure of the eccentric, intelligent, often unofficial investigator take prominence? How does detective fiction emerge from and react to global imperialism, the modern metropolis, forensic science, and the modern legal system? How does the genre represent and respond to gender, class, and racial inequities? Texts may range from the works of Edgar Allan Poe and Arthur Conan Doyle, to the "Golden Age of Detective Fiction" in the 1920s and 30s by writers such as Agatha Christie, to late-twentieth century and contemporary novelists such as Chester Himes, P.D. James, and Mia P. Manansala, to film and television adaptations such as Enola Holmes, See How They Run, and Kenneth Branagh's Hercule Poirot films.

ENGL254 Introduction to Humanities, Health, and Medicine (3 Credits)

An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.

Cross-listed with: ARHU230, HIST219N, WGSS230.

Restriction: Permission of ARHU-English Department.

Credit Only Granted for: ARHU230, ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

ENGL255 Literature, Science, and Technology (3 Credits)

Consider the relationship between fiction and science. How does science as we know it depend on certain fictions or narratives? How do we come to know science through the fictions we encounter? How do literary works represent the ethics of science and technology? What role does science play in the oppression of peoples? What alternative, more liberatory ways of using science are possible?

ENGL256 Fantasy Literature (3 Credits)

How fantasy employs alternate forms of representation, such as the fantastical, estranging, or impossible, which other genres would not allow. Through novels, short stories, graphic novels, and film, traces fantasy's roots in mythology and folklore, then explores how modern texts build upon or challenge these origins. Examination of literary strategies texts use to represent the world through speculative modes. How to distinguish fantasy from, and relate it to, other genres such as horror, fairy tales, and magical realism. Fantasy's investment in world-building, history, tradition, and categories of identity such as race, class, and gender. How fantasy, as a genre, form, and world-view, is well-suited to our contemporary reality.

ENGL257 Children's Literature (3 Credits)

Literature of the nineteenth through the twenty-first century concerned with, and written for, children and young adults. How such narratives speak to themes of changing social, religious, political, and personal identity. Through poetry, novels, graphic novels, and film, explores how children's tales encapsulate and reflect on human existence, while pushing boundaries of what constitutes "children's literature" and what exactly defines the "child." Considers questions of literary classification through investigation of political and religious issues, gender politics, animal rights, social justice, race, war, and what it means to "grow up."

ENGL262 Introduction to the Hebrew Bible/Old Testament (3 Credits)

Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.

Cross-listed with: JWST262, HEBR298B.

Credit Only Granted for: JWST262, HEBR298B, or ENGL262.

ENGL264 What Are the Liberal Arts? (3 Credits)

Explore what we call "the liberal arts" and "the humanities," which have historically formed the foundations of higher education. What is the role of learning in human life, and what are the ultimate ends of education? How does the idea of a liberal arts education take shape—from ancient Greece, to the medieval world, to the post-Enlightenment explosion of the sciences, to the modern disciplines of the humanities? What can you expect from the humanities curriculum at the University of Maryland, as opposed to a liberal arts college such as St. Johns College in Annapolis?

ENGL265 LGBTQ+ Literatures and Media (3 Credits)

A study of literary and cultural expressions of queer and trans identities, positionalities, and analytics through an exploration of literature, art, and media. We will examine historical and political power relations by considering the intersections of sexuality and gender with race, class, nation, and disability. Topics include the social construction and regulation of sexuality and gender, performance and performativity, intersectionality, and the relationship between aesthetic forms and queer/trans subjectivity. Our interpretations will be informed by queer and trans theories.

Cross-listed with: LGBT265.

Restriction: Must not have completed LGBT265.

Credit Only Granted for: ENGL265 or LGBT265.

ENGL269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ENGL269M Morocco: In the Footsteps of the Beat Generation (3 Credits)

Educates students about the history, culture and socio-political situation in Morocco through the reading of fiction related to this country. The focus will be on the intersection of American and Moroccan culture and will cover film, music and literature. The American perception of the "orient" has historically been channeled through the French characterization of Arab societies in North Africa. This course aims to disentangle this western mythology from reality in Morocco. Some of the themes addressed will be globalization, colonialism, racism, orientalism, and women's oppression

Cross-listed with: ARHU269A.

Credit Only Granted for: ARHU269A or ENGL269M.

ENGL271 Writing Poems and Stories: An Introductory Workshop (3 Credits)

Introduction to theory and practice of writing fiction and poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL272 Writing Fiction: An Introductory Workshop (3 Credits)

Introduction to theory and practice of writing fiction. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL273 Writing Poetry: An Introductory Workshop (3 Credits)

Introduction to theory and practice of writing poetry. Emphasis on critical reading of literary models. Exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

ENGL274 Creative Writing Through The Eyes of African Americans: A Beginning Workshop (3 Credits)

Introduction to theory and practice of writing fiction, drama and poetry, with an emphasis on African American literary models. Critical reading, exercises and workshop discussions with continual reference to modeling, drafting, and revising as necessary stages in a creative process.

Restriction: Must not have completed ENGL271, ENGL274, ENGL294, or AASP274. Cross-listed with AASP274.

Credit Only Granted for: ENGL274 or AASP274.

ENGL275 Writing for the Stage and Screen: An Introductory Workshop (3 Credits)

Introduction to the theory and practice of scriptwriting with an opportunity to read, view, evaluate, write, and revise texts meant to be performed. Students will practice writing for the stage, film, and television and also examine selected scripts, performances, and film and television clips as models for their own creative work. Students will complete frequent writing exercises, participate in workshops, and learn to apply scholarship to the analysis and critique of scripts.

Cross-listed with: ARHU275.

Credit Only Granted for: ENGL275 or ARHU275.

ENGL278 Special Topics in Literature (3 Credits)

Repeatable to: 9 credits if content differs.

ENGL280 The English Language: Histories, Diversity, and Change (3 Credits)

Explore the many structures and historical developments of the English language, with a focus on techniques of linguistic analysis. Major topics include the sound systems of English and its patterns of word formation and sentence structure, and the ways these have changed over time and vary around the world.

ENGL281 Standard English Grammar, Usage, and Diction (3 Credits)

Study of the structures and patterns of English grammar. The focus is on the standard dialect and contemporary usage, but we will also explore variation over time and across dialects. Includes word formation, sentence elements and structures, and conventions of punctuation, as well as the social aspects of grammatical choices.

ENGL282 How Rhetoric Works: Persuasive Power and Strategies (3 Credits)

Examines how persuasion functions and influences our lives and perception, focusing on a variety of contexts: business, politics, media, law, and entertainment. Students learn persuasive and argumentative principles to understand what rhetoric is, how it works, and what it does, and to apply the knowledge to produce effective communication appropriate for their purpose, audience, and context. A wide range of persuasive media, genres, and forms will be studied to help students sharpen how they interpret and practice persuasion.

ENGL289 Special Topics in English (3 Credits)

Introduces students to notable themes and approaches in English studies. Topics vary by section and semester.

Repeatable to: 12 credits if content differs.

ENGL289I Gender and Science in Film and Media (3 Credits)

Isaac Azimov once said of science fiction that it is the genre that "deals with the reaction of human beings to changes in science and technology." With this definition in mind, we will embark on a critical exploration of sci-fi film and other media, using it as a lens for analyzing society's deepest fears and most furtive hopes. Our investigation will center on the liminal space between hegemonic culture and its prescribed excesses. These liminal spaces—between self and other, disability and enhancement, cultural hybridization, and gender crossing—shift in response to real-world sociopolitical tensions. We will consider feminist and anti-racist media scholars' concerns over representation, authorship and ideology alongside questions of technological change. Students will use analytical and creative assignments to explore not only how the scientific imaginary serves as fertile ground for feminist, disability, and anti-racist critique, but also provides a locus for alternative futures.

Cross-listed with: WGSS280.

Credit Only Granted for: ENGL289I or WGSS280.

ENGL289J Monsters and Racism: Black Horror and Speculative Fiction (3 Credits)

The previous decade has been considered a renaissance for Black Horror. From *Get Out* to *Lovecraft Country*, the genre has enjoyed unprecedented mainstream media buzz and accolades. This course looks at contemporary Black horror and speculative fiction as cultural texts which put into question our notions of human(e) and inhuman(e) through critiques of white supremacy and accompanying oppressions. Students will learn a host of critical skills through close reading and analysis of literature and film by Black creators such as Jordan Peele, Misha Green, Toni Morrison, Jewelle Gomez, and Octavia Butler. With the ability to interpret cultural texts using literary criticism, film analysis, history, cultural studies, ethnic studies, feminist theory, and the social sciences, students will connect these texts to continuing historical and contemporary issues of racial and cultural oppression such as medical discrimination, policing and criminalization, misogynoir, and racialized capitalism.

Cross-listed with: WGSS271, AAAS271.

Credit Only Granted for: AAAS271, ENGL289J, HONR299Y, HNUH238W, WGSS271 or WGSS298W.

Formerly: HNUH238W.

ENGL290 Introduction to Digital Studies (3 Credits)

Introductory course in digital studies. Surveys contemporary humanities work in digital technologies, including the web and social media and their historical antecedents. Explores design and making as analytical tools alongside reading and writing. Situates digital media within power and politics and develops critical awareness of how media shape society and ethics. Interdisciplinary approaches to creativity, analysis, and technology. While the course will include hands-on practice, no prior experience of programming, designing, or making required other than a willingness to experiment and play.

ENGL291 Writing, Revising, Persuading (3 Credits)

Intermediate-level, writing-intensive course for students who have successfully satisfied the Fundamental Studies Academic Writing requirement but wish to hone skills in analyzing and producing rhetorically attuned, well-styled prose. Deeper study of rhetorical theory and its application to a wide variety of arguments and situations. Additional writing practice, techniques of revision, study of effect of stylistic choices. Topics may include argumentation theory, visual rhetoric, stylistic theory, and writing theory.

Prerequisite: Must have satisfied Fundamental Studies Academic Writing requirement.

ENGL292 Writing for Change (3 Credits)

Service learning in collaboration with students at area high schools. Explores how writing can be a tool for social change. Participants serve as mentors, create a performance event concerning a pressing social issue, and compose reflections, literacy narratives, publicity materials, and a multimodal project. Focus on developing critical self-awareness.

Prerequisite: Permission of ARHU-English department.

Recommended: ENGL101.

Jointly offered with: ENGL388C.

Restriction: Requires application and references.

Credit Only Granted for: ENGL292 or ENGL388C.

ENGL293 Digital Writing and Content Creation (3 Credits)

A hands-on exploration of rhetoric, technology, and digital expression. Study a variety of digital writing and content creation platforms, and learn about theories and practices in digital communication. Learn to analyze and create the kinds of multimodal documents (websites, podcasts, videos) that constitute communication in a digital world.

Recommended: ENGL101.

ENGL294 Persuasion through Social Media (3 Credits)

Why are influencers canceled? What role does social media play in the spread of (mis)information? What is possible through social media activism? How does advertising work in online spaces? How do people use social media to discover and craft identity? What role do social media play in user wellbeing? Explore questions like these using ideas from rhetoric to develop critical awareness about power, ideology, and digital content. Learn to create effective, ethical social media content. Become a more informed reader and writer on social media across public, personal, and professional contexts.

Recommended: Fundamental Studies Academic Writing requirement.

ENGL295 Introduction to Digital Storytelling and Poetics (3 Credits)

What is the thread weaving through an animated visualization of economic data in a popular newspaper, an indie text-based videogame, a saucy twitter bot spitting out haikus, and an interactive digital essay? Storytelling—using whatever is at hand to communicate with audiences in evocative and connected ways. Combining technical and textual analysis with their own experiments in digital composition, students will learn to use new media techniques for the interpretation, creation, and dissemination of both critical and imaginative writing. From branching narratives to hypertext media and video games, to more recent developments in machine-generated poetry, XR, and embodied and location-based narrative, the methods and materials in this introductory course link creative expression and analysis of texts to contemporary conversations about social difference, representation, interface, and computation.

ENGL296 Reading and Writing Disability: Rights and Representation (3 Credits)

Locate and analyze disability in various settings, modes, and texts. Investigate the material and cultural effects of the language, stories, and myths of disability. Explore the many definitions and frameworks of disability: as dynamic lived experiences, as a political identity, as a rich culture, as socially constructed barriers, and as an oppressed minority group. Examine how disability is portrayed, controlled, stereotyped, and celebrated across social, medical, political, cultural, and personal networks.

ENGL297 Research and Writing in the Workplace (3 Credits)

Introduction to the rhetorical principles and professional practices of professional writing, particularly the research, writing, communication, analytical, and technological skills needed for the Professional Writing minor. How culture and technology relate to the work of professional writing; design principles and rhetorical moves; digital tools, research skills, and writing strategies of professional writers. Develops skills needed to publish a writing portfolio that showcases students' professional writing competencies and projects their professional writer identities.

Prerequisite: ENGL101.

ENGL301 This is English: Fields and Methods (3 Credits)

"English" means a lot of things. Are you looking for literature, or linguistics? For writing—creative, critical, or professional? For theater, or debate? For film, or even videogames? This gateway course for the English major introduces you to all of these areas and more, as well as to our discipline's unique resources for studying and enjoying them. The English discipline includes three main interpretive fields: Literary and Cultural Studies; Language, Writing, and Rhetoric; and Media Studies. This course brings together the fundamental concepts and methods for reading, viewing, and researching practiced in these fields, launching you into English studies and helping you to choose the major track that is right for you.

Restriction: Must be in English Language and Literature program; or must be in Secondary Educ: English Language Arts program.

ENGL302 Medieval Literature in Translation (3 Credits)

Surveys major works of English and continental Middle Ages. Readings may include romance, lyric and drama, Germanic epic, works of Dante, Chretien de Troyes, Jean de Meun, Christine de Pisan, Malory, English and continental mystics.

ENGL305 Early Drama (3 Credits)

Explore medieval and Renaissance drama and performance, placing the Shakespearean stage in its cultural and historical contexts.

ENGL308 Special Topics in Shakespeare (3 Credits)

A topical exploration of William Shakespeare's plays and poems as well as their cultural contexts, performance history, and the roles they play in modern and contemporary culture.

Repeatable to: 12 credits if content differs.

ENGL310 Medieval and Renaissance British Literature and Culture (3 Credits)

Explore medieval and Renaissance literary cultures from Beowulf to Mary and Philip Sidney. Read poetry, drama, and narrative from the 10th to the 16th centuries, by authors such as Chaucer, Spenser, Donne, Marlowe, and Lanier. Learn about the history of gender and sexuality, race and class, feudalism and capitalism, philosophies of science and the natural world, manuscript and print cultures, religion, piracy, and witchcraft.

ENGL311 17th- and 18th-Century British Literature and Culture (3 Credits)

Explore 17th- and 18th-century British literary cultures. Read novels, political writing, poetry and drama by authors such as Milton, Behn, Swift, Equiano, and Wollstonecraft. Learn about the history of empire, colonialism, coffee house culture, female performance, science, philosophy, sexuality, and revolution.

ENGL312 Romantic to Modern British Literature and Culture (3 Credits)

Explore 19th- and 20th-century British and Anglophone literary cultures, including Romanticism, Victorianism, and Modernism. We will read poetry, prose, and drama by authors such as Mary and Percy Shelley to Austen, Dickens, Eliot, Tagore, and Woolf. Learn about the history of empire and resistance, the industrial revolution, capitalism, communism, feminism, race, and new forms of literary and artistic creation.

ENGL313 American Literature (3 Credits)

A detailed study of selected major texts of American literature from the 17th century to the 20th century. Issues such as race, gender, and regionalism. Authors such as Franklin, Hawthorne, Dickinson, Hemingway, and Morrison.

ENGL316 Native American Literature (3 Credits)

Examines literature that explores the experiences and cultures of America's Indigenous peoples from the sixteenth century to the contemporary moment. We will analyze poetry, historical accounts, oral narratives, short stories, and novels by Native American writers in order to explore key concerns in Native American Studies, such as dilemmas of Indigenous sovereignty, settler colonialism, the settler state, stolen land, and the natural environment.

ENGL317 African American Literature (3 Credits)

Consideration of key texts in African American literature that explore the experiences of people of African descent in America from the mid-nineteenth century to the contemporary moment. Relationship between literary texts, historical events and cultural formations. Examines a range of texts and genres (autobiography, slave narrative, travel narrative, poetry, essays, fiction), and their contribution to national literary tradition.

ENGL318 Special Topics in Digital and New Media Studies (3 Credits)

Explore digital and new media culture, narrative, poetics, and rhetoric. Topics may include creative expression in new media platforms and analytical approaches to electronic literature, social media, interactive fiction, literary datasets, digital writing, and artificial intelligence.

Repeatable to: 9 credits if content differs.

ENGL319 Special Topics in Science, Literature, and Media (3 Credits)

A topical investigation of the ways that science, art, and technology provoke ideas and innovation across their disciplinary boundaries within specific historical moments and locations.

Repeatable to: 12 credits if content differs.

ENGL321 Comics and the Graphic Novel (3 Credits)

Comics has become one of the most globally popular art forms of the twenty-first century, but it also has a rich history that stretches back to the eighteenth century, and arguably much earlier. This course will introduce students to the unique formal properties of comics and will survey the history of comics across national traditions, including texts drawn from the American, Franco-Belgian, and Japanese traditions. We will read across a range of genres and cultural registers—including newspaper strips, superhero comics, Underground comix, manga, the graphic memoir, and alternative comics. You will learn to analyze and write about the form and history of the medium.

ENGL327 The Suburbs in American Literature and Film (3 Credits)

Explores through written expression and through cinema the diverse and changing world of US suburbia. Premised on two arguments: (1) the suburbs embody many of the contours and contradictions of American life; and (2) the suburbs are far more racially, ethnically, culturally, sexually, economically diverse than mass media suggests. Investigation via prose, poetry, drama, and cinema, as well as secondary sources in sociology, women's studies, ethnic studies, history, cultural studies, psychology, anthropology, and the history of science and technology.

ENGL329 Special Topics in Film Studies (3 Credits)

Studies in various periods and genres of film.

Prerequisite: ENGL245, FILM245, FILM283, or SLLC283; or permission of ARHU-English department.

Repeatable to: 9 credits if content differs.

ENGL331 American Jewish Literature (3 Credits)

An exploration of the role played by literature in the development of American Jewish ethnic identity. Primary materials include essays, poetry, plays, short stories, novels, films and music. Cross-listed with JWST341.

Credit Only Granted for: ENGL331 or JWST341.

ENGL334 The Bible as Literature (3 Credits)

The Bible as a major source of contemporary Western religious symbolism and culture. Exploration of how this literary legacy appears in our own cultural experience. Historical critical and literary critical method and theory introduced and applied to the texts.

ENGL338 Special Topics in Literary and Cultural Studies (3 Credits)

Explore new topic areas in English literary and cultural studies.

Repeatable to: 12 credits if content differs.

ENGL344 The Novel in the 19th-Century World (3 Credits)

Explore 19th-century English-language novels drawn from around the world: England, Australia, India, South Africa, and the United States. Readings may include canonical novels (Charlotte Brontë's *Jane Eyre* and George Eliot's *Middlemarch*) as well as lesser known but extraordinary novels by authors such as Bankimchandra Chattopadhyay and Frances Harper. Topics to be addressed include realism, romance, nationalism, race and racial identity, feminism, sexuality, emigration, empire, and the function of the novel itself.

ENGL345 Poetry, Lyric, and Song (3 Credits)

Explore the forms, sounds, images, and experiences of poetry and song. How does poetic language grapple with human complexity and difference? What is the relationship between writing, orality, and music in the history of poetry? How do poets express and represent gender, sexuality, race, power, resistance, revolution, and cultural change? Reading and listening assignments might include balladry, sonnets, metaphysical poetry, free verse, hip-hop, popular music, and more.

ENGL346 Twentieth Century Fiction (3 Credits)

Major British, American, and other fiction writers of the twentieth century studied in the context of the broad global, intellectual, and artistic interests of the century.

ENGL348 Literary Works by Women (3 Credits)

The context, form, style and meaning of literary works by women.

Prerequisite: Must have completed at least one lower-level English literature course and one other lower-level English course; or Permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: WGSS348.

Repeatable to: 6 credits if content differs.

Formerly: WMST348.

ENGL349 Asian American Literatures (3 Credits)

Study of selected writers, particular themes, or genres in Asian American literatures.

Repeatable to: 9 credits if content differs.

ENGL352 Intermediate Fiction Workshop (3 Credits)

A class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and the fiction of colleagues, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.

Prerequisite: Minimum grade of A- in ENGL271 or ENGL272; or permission of ARHU-English department.

ENGL353 Intermediate Poetry Workshop (3 Credits)

A class in the making of poetry. Intensive discussion of students' own poems. Readings in both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, memorization, and attendance at poetry readings.

Prerequisite: Minimum grade of A- in ENGL271 or ENGL273; or permission of ARHU-English department.

ENGL354 Intermediate Scriptwriting for Theater, Film, and Television (3 Credits)

Demystifies the art of dramatic writing. Students will come to understand that a play or screenplay is never a lecture, and that we write scripts to find out something about ourselves and the subjects we tackle. Students will analyze plays and screenplays, as well as workshop each others' scripts, to help them produce their own successful plays and screenplays written for the stage, screen, or box.

Prerequisite: 1 course with a minimum grade of A- from (ENGL275, ARHU375, THET340).

ENGL355 Digital Fictions (3 Credits)

Explores literary fiction composed and delivered in digital forms from the origins of computers in the mid-twentieth century to the present day. The course places equal emphasis on a historical survey of the intersection between the digital and the literary; on the enterprise of digital fiction as a dynamic and living form with new work appearing online almost every day; and on offering students the opportunity to experiment with digital platforms for fiction writing of their own. No technical expertise (or experience in creative writing) is expected or assumed.

Credit Only Granted for: ENGL355 or ENGL378C.

Formerly: ENGL378C.

ENGL358 Special Topics in U.S. Latinx Literature (3 Credits)

Topical study of selected works by U.S. Latinx writers.

Repeatable to: 9 credits if content differs.

ENGL359 Special Topics in LGBTQ+ Literatures and Media (3 Credits)

Selected study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.

Cross-listed with: LGBT359.

Repeatable to: 9 credits if content differs.

ENGL359F Lesbian, Gay, Bisexual, and Transgender Film and Video (3 Credits)

Comparative analysis of forms, themes, and the politics of representation in film and video by and/or about LGBT people.

Cross-listed with: LGBT327.

Restriction: Junior standing or higher.

Credit Only Granted for: LGBT327 or ENGL359F.

ENGL360 African, Indian and Caribbean Writers (3 Credits)

Selected writers from countries formerly colonies of Britain, France, Denmark, etc. Attention to ways regions have developed distinctive political and aesthetic values resulting from indigenous traditions and foreign influences.

ENGL361 Recovering Oral Histories (3 Credits)

Service-learning course that gives students an opportunity to develop writing, interviewing, and communication skills as they contribute to the work of a community organization. In the classroom, students will reflect on the process and do background research to understand the particular context of the organization's work. In the field, students will interview (or have informal discussions with) young people helped by the organization in order to construct a narrative about their lives, their perceptions of themselves, and their experiences.

Prerequisite: Students must have completed one course in English, Latin American Studies, or Education.

ENGL362 Caribbean Literature in English (3 Credits)

Political and literary traditions that intersect in the fiction, poetry, and drama written in English by Caribbean writers, primarily during the 20th century.

Cross-listed with: LACS348E.

Credit Only Granted for: ENGL362, LASC348E, or LACS348E.

ENGL368 Special Topics in African American, African, and African Diaspora Literatures (3 Credits)

Topical study of selected literature by African American and Black Diaspora writers from Africa, the Caribbean, North and South America, and beyond.

Repeatable to: 9 credits if content differs.

ENGL369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ENGL369D Australian Literature and Culture (3 Credits)

An immersion into Australian culture and history, this course will explore the literature, music, theater, and arts of Indigenous and contemporary Australia. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day Australians and the skills needed to navigate those issues. Along the way, we will look back to the colonial founding of Australia as a British outpost and consider how modern Australia has emerged from a mixing of Western and Indigenous cultures.

Additional Information: This is an Education Abroad course.

ENGL369N New Zealand Literature and Culture (3 Credits)

An immersion into the literature, history, and culture of New Zealand, this course will look back to the colonial founding of New Zealand as a British outpost, and to the strong Maori culture the British encountered when they arrived. Students will engage directly with matters of political and social concern, developing both awareness of cultural issues important to modern-day New Zealanders and the skills needed to navigate those issues. Along the way, we will consider how modern New Zealand has emerged from a mixing of Western and Indigenous cultures.

Additional Information: This is an Education Abroad course.

ENGL370 Junior Honors Conference (1 Credit)

Preparation for writing the senior honors project.

Restriction: Candidacy for honors in English.

ENGL373 Senior Honors Project (2 Credits)

Research and writing of senior honors project. Strongly recommended for students planning graduate work.

Prerequisite: ENGL370.

Restriction: Must be in English Language and Literature program.

ENGL375 J.R.R. Tolkien: Middle-earth and Beyond (3 Credits)

An in-depth look at major themes and ideas spanning Tolkien's well-known and lesser-known works across a variety of genres and styles. We will study "The Hobbit" and "The Lord of the Rings" in connection with Tolkien's back-story mythology expressed in "The Silmarillion." We will also consider film adaptations and other popular fantasy influenced by Tolkien. And we will explore lesser-known works such as "Farmer Giles of Ham," and Tolkien's essays on fairy stories and on "Beowulf."

ENGL376 The Speculative Imagination: Science Fiction on Page and Screen (3 Credits)

Examines a global cross-section of science fiction in literature, film, television, comics, and other media. Studies the unique formal qualities of science fiction and traces its history from its origin in the eighteenth century to the present. Explores how the twenty-first century has brought new prominence to science fiction by creators of color, women creators, and queer creators, as well as intersections of these. Considers how science fiction addresses a range of phenomena—from environmental destruction to surveillance to imperialism and militarism. Students learn how to analyze and write about the formal and historical dimensions of the genre.

Credit Only Granted for: ENGL379Y or ENGL376.

Formerly: ENGL379Y.

ENGL377 Medieval Myth and Modern Narrative (3 Credits)

Literary patterns characteristic of medieval myth, epic, and romance; their continuing vitality in modern works; and links between Medieval works like "The Prose Edda", "Beowulf", "The Morte D'Arthur", "The Volsunga Saga", and "Grettis Saga" and modern narratives like Tolkien's "The Lord of the Rings".

ENGL378 Special Topics in English (3 Credits)

Offers sustained attention to notable current themes and approaches in English studies. Topics vary by section and semester.

Repeatable to: 12 credits if content differs.

ENGL379 Special Topics in Literature (3 Credits)

Repeatable to: 12 credits if content differs.

ENGL381 MGA Legislative Seminar (3 Credits)

Prepares students to intern for the Maryland General Assembly. Introduces standard legislative genres and assigns extended practice in researching legislative issues.

Prerequisite: Students who have taken courses with comparable content may contact the department; or ENGL101.

Cross-listed with: HONR368A.

Restriction: Permission of ARHU-English department.

Credit Only Granted for: HONR368A or ENGL381.

Additional Information: Application required. Contact english@umd.edu for more information.

ENGL383 Language in Its Social Contexts (3 Credits)

Exploration of the social and political aspects of language use, including interactional behavior, the structure of conversation, persuasive uses of language, social dialects, language use within speech communities, and language and identity. We will examine and compare analytical approaches to pragmatics and discourse analysis.

ENGL384 Concepts of Grammar (3 Credits)

Explore the nature of grammar from a variety of perspectives, developing the vocabulary and technical skills needed to identify and describe the basic grammatical structures of English words and sentences. Understand the structures used in all varieties of Present Day English, including formal and colloquial, spoken and written, and standard and non-standard dialects, with a focus on standard British and American varieties. Topics include grammatical categories, syntactic roles, phrase structure, and inflection. Consider why it is that languages should include such structures in the first place and how awareness of these structures might or might not help you become a more effective reader and writer. Emerge with a deeper understanding of the human mind and a new appreciation for the prodigious complexity of even the most trivial acts of language use.

ENGL385 English Semantics (3 Credits)

We use language all the time to share our thoughts and understand others, but how do we do this? Where does language get its meanings, and how do speakers know how to use them? Study a view of meaning grounded in human cognition and social interaction, emphasizing the relations between linguistic structures and the conceptual structures employed in understanding language. Topics include the relation between lexical and constructional meaning, the role of metaphor in language and thought, and the complex relations between language, culture and cognition.

ENGL386 Experiential Learning (3-6 Credits)

Prerequisite: Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

ENGL387 Visual Rhetoric (3 Credits)

Investigation of the persuasive power of visuals based on how they construct and communicate their content and predispose viewers to an interpretation or attitude. "Iconic" images and other modes of visual representation including diagrams, graphs, and page or screen design. Most attention given to a grammar and rhetoric of visuals. Also the elements of images and their arrangement and consideration of historical and generic contexts and the "affordances" of various media. Not a course in "high art" or in video, TV, or film. Emphasis on visuals that accompany or replace verbal texts.

ENGL388 Writing, Research, and Media Internships (1-6 Credits)

Explore career-facing opportunities on campus, in the D.C. metro area, and beyond. English internships can be individualized, working with businesses, not-for-profit organizations, state and federal governments, high schools, and incarcerated students. We also offer structured internship pathways with the Maryland General Assembly Program, the Emily Dickinson Electronic Archives, the Writing Center, our Undergraduate Teaching Assistant Program, and BookLab, our makerspace and letterpress printing studio.

Restriction: Permission of ARHU-English department.

Repeatable to: 18 credits if content differs.

ENGL388C Writing for Change (3 Credits)

Service learning in collaboration with students at area high schools. Explores how writing can be a tool for social change. Participants serve as mentors, create a performance event concerning a pressing social issue, and compose reflections, literacy narratives, and publicity materials. Students also design individual projects that link course content and students' own professional interests.

Prerequisite: Permission of ARHU-English Department .

Recommended: ENGL101.

Jointly offered with: ENGL292.

Restriction: Requires application and references.

Credit Only Granted for: ENGL292 or ENGL388C.

ENGL388M Maryland General Assembly Writing Internship (6 Credits)

Experiential learning at the Maryland General Assembly (early January through early April). Interns participate in standard office tasks, research legislative issues, and draft legislative texts such as constituent letters, notes on bills, newsletters, policy memos, and testimony. Specific assignments vary according to the host legislator's needs and the intern's schedule.

Prerequisite: ENGL381 or HONR368A.

Cross-listed with: HONR379W.

Restriction: Minimum cumulative GPA of 3.0; and must have earned a minimum of 60 credits; and must be admitted to the MGA program.

Credit Only Granted for: ENGL388M or HONR379W.

ENGL388P English Careers Internship (1-6 Credits)

Students receive credit for an internship of their choice that focuses at least half of its work on core English skills such as writing, editing, and research. Students secure their own internship placements. Course assignments include, for instance, an activity log, reflection papers, a supervisor evaluation, and a final portfolio of work.

Prerequisite: Permission of ARHU-English department.

Repeatable to: 12 credits if content differs.

Additional Information: Each enrolled credit equals 45 hours of on-site internship work.

ENGL388V Undergraduate Teaching Assistants in English (1-6 Credits)

A weekly teaching practicum and concurrent internship as an undergraduate teaching assistant in an English course. Students will explore the theories and best practices of teaching and learning in the various fields of the English discipline, particularly writing and literary studies. The emphasis is on creating inclusive classrooms and working with diverse learners and is grounded in theories of critical pedagogy. Students will apply principles of learning theory to develop and facilitate learner-centered lessons and discussions. They will also study composition pedagogy in preparation for responding to student writing in the course for which they are an assistant.

Prerequisite: Permission of the ARHU-English department.

Repeatable to: 12 credits.

Additional Information: Students should consult with the UTA Coordinator to determine the number of enrollment credits.

ENGL388W Writing Center Internship (1-6 Credits)

Examines face-to-face and online writing center theory and practice through readings, exercises, and supervised tutoring. Students investigate the writing process and help other writers to negotiate it.

Prerequisite: Permission of the Writing Center (1205 Tawes Hall).

Cross-listed with: SPAN388W.

Repeatable to: 12 credits.

Credit Only Granted for: ENGL388W or SPAN388W.

ENGL390 Science Writing (3 Credits)

Specifically designed for students interested in further study in the physical and biological sciences. Exposes students to the conventions of scientific prose in the genres of research articles and proposals. Students also learn to accommodate scientific information to general audiences.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.

Credit Only Granted for: ENGL390 or ENGL393S.

Formerly: ENGL393S.

ENGL391 Advanced Composition (3 Credits)

An advanced composition course which emphasizes constructing written arguments accommodated to real audiences.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL392 Legal Writing (3 Credits)

Conventions of legal writing and research. Students learn how to read and write about cases, statutes, or other legislation; how to apply legal principles to fact scenarios; and how to present a written analysis for readers in the legal profession. Assignments may include the law-school application essay, case briefs, legal memos, and client letters.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL393 Technical Writing (3 Credits)

Focuses on the writing of technical papers and reports.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL394 Business Writing (3 Credits)

Intensive practice in the forms of written communication common in the business world: letters, memos, short reports, and proposals. Focus on the principles of rhetoric and effective style.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL395 Writing for Health Professions (3 Credits)

Focus on accommodating health-related technical material and empirical studies to lay audiences, and helping writers to achieve stylistic flexibility and correctness.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398 Topics in Professional Writing (3 Credits)

Professional writing courses that focus on the audiences, conventions, and genres of particular disciplines, professions, or organizations.

Examples include writing for the arts, writing case studies and investigative reports, writing about economics, and writing for non-profit organizations.

Prerequisite: ENGL101; or students who have taken courses with comparable content may contact the department.

Restriction: Must have earned a minimum of 60 credits; and junior standing or higher.

Repeatable to: 6 credits if content differs.

ENGL398A Writing for the Arts (3 Credits)

Examines the situations and genres in which working professionals (practitioners, advocates, administrators, and educators) write about art, culture, and artists. The course covers the complex process that writers need to learn, including how to accommodate information to specific audiences, how to use stylistic and visual devices to make information more accessible, and how to edit their own work as well as that of their peers. Assignments parallel the writing demands that students will face in the workplace, including analyzing and composing artist statements, an arts manifesto, art education guides, press releases about artists and their work, critical reviews of exhibits and performances, and proposals to funding agencies and foundations.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398B Writing for Social Entrepreneurship (3 Credits)

Designed for students who want to develop the skills needed to start a successful social venture—a start-up business with a social mission or a new nonprofit program. The course centers on a major writing project such as a business plan, a website design plan, a fundraising proposal, or a concept paper for a new nonprofit organization. Students produce other communication projects that social entrepreneurs use to develop their businesses and nonprofits, such as presentations or pitches to prospective investors/donors, marketing materials, and a job announcement. Students will learn from local social entrepreneurs who share their experiences of using writing to succeed in the field.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398C Writing Case Studies and Investigative Reports (3 Credits)

Designed for students interested in becoming police investigators, educators, case workers, insurance adjusters, nurses, or program evaluators, or in entering branches of the social sciences that investigate cases and value reports based on accurate descriptions and compelling narratives. Such reports must be factual and yet useful to decision makers, unbiased and yet focused. Students study genres and language skills from careful summarizing to convincing storytelling.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398E Writing About Economics (3 Credits)

Examines the characteristic genres of writing in modern economics, including theoretical and empirically based journal articles, reports for government and commercial clients, and economic information presented to a variety of non-professional audiences, such as citizen-oriented and public policy organizations. Students learn how to analyze these documents rhetorically and how to communicate economic information using the content, arrangement, style, and visual graphics best suited to the purposes and standards of particular audiences. Core assignments include a genre-based journal and document analysis, presentations on economics-related topics for both economists and non-professional audiences, and a major research-based writing project for an audience outside of the classroom.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398L Scholarly Writing in the Humanities (3 Credits)

Examines scholarship in the humanities as a genre of professional writing and investigates the norms and procedures of advanced academic writing. Assignments parallel the writing demands that students will face in the academic workplace, including a graduate school application essay, a genre review, an annotated bibliography, a journal article, and an oral presentation of article subject matter.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398N Writing for Non-Profit Organizations (3 Credits)

Examines professional writing and communication work in the non-profit sector. Students will analyze the audiences and document genres that they may encounter in real-world non-profit work and will learn how to compose many of these documents, from press releases and other public relations material to position papers, reports, and grant proposals. Students may also have the opportunity to add a service-learning component to the course by working with and for an area non-profit.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398R Writing Non-Fictional Narratives (3 Credits)

Approaches nonfiction narrative—a kind of writing influenced by fiction, magazine journalism, memoir, and personal essay—as a form of professional writing used in publishing and a range of careers involving proposal writing, work documentation, lobbying, social marketing, and political commentary, among others. Students learn to use many of the same tools as fiction writers, such as dialogue, vivid description, developing characters, nonlinear structure, and shifts in tense, time, and points of view. They also learn how to edit their own work as well as that of their peers, doing multiple revisions of the major assignments for a final portfolio. Major assignments include essays targeted to specific publications, query letters, audience analysis, and a publisher analysis.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL398V Writing About the Environment (3 Credits)

Designed for those aspiring to work in a variety of fields that influence and are influenced by environmental science, including public policy, advocacy, science, and industry. Students learn to apply principles of technical writing to a range of scenarios and issues particular to the intersection of scientific knowledge and environmental policy. Writing audiences range from the public to decision-makers. The course emphasizes writing both within and across disciplines to enlist research for practical contexts.

Prerequisite: Must have fulfilled the Academic Writing (FSAW) requirement.

Restriction: Must have earned a minimum of 60 credits.

ENGL402 Chaucer (3 Credits)

Explore the works of Geoffrey Chaucer in their literary and cultural environment. Texts read in Middle English. Readings may include Canterbury Tales, Troilus and Criseyde, dream visions, and lyric poems.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL403 Shakespeare: The Early Works (3 Credits)

Close study of selected works from the first half of Shakespeare's career. Generic issues of early histories, comedies, tragedies. Language, theme, dramatic technique, sources, and early modern English social-historical context.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL404 Shakespeare: The Later Works (3 Credits)

Close study of selected plays from the second half of Shakespeare's career. Generic issues of later tragedies, later comedies, romances. Language, theme, dramatic technique, sources, and early modern English social-historical context.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL408 Literature by Women Before 1800 (3 Credits)

Selected writings by women in the medieval and early modern era.

Prerequisite: Must have completed two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: WGSS408.

Repeatable to: 9 credits if content differs.

Formerly: WMST408.

ENGL409 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ENGL410 Edmund Spenser (3 Credits)

Explore the works of Edmund Spenser in their literary and cultural environment. Special attention to *The Faerie Queene*; also sonnets and lyric poetry.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL412 The Idea of Change in 17th-Century British Literature (3 Credits)

Explore the idea of change—from small adjustments in perspective to political revolutions—in the seventeenth century. We will take up literary experiments such as Edmund Spenser's terrifying vision of cosmic mutability in *The Faerie Queene*, John Donne's awareness of his vulnerable body as he endures the various stages of an illness, and Margaret Cavendish's embrace of science fiction to imagine new configurations of social life. Topics might include the Reformation and its aftermath; the scientific revolution; the English civil wars; the experience of religious conversion; shifting ideas of race and ethnicity; transatlantic travel and colonial expansion; the idea of "progress" and resistance to it; the agency of women in literary culture and political struggle; changing norms around sexual behavior and identity; and the unstable idea of literature itself. Authors may include Montaigne, Shakespeare, Jonson, Donne, Herbert, Galileo, Marvell, Hooke, Cavendish, Behn, and Milton.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL414 Milton (3 Credits)

Explore the works of John Milton in their literary and cultural environment. Poetry and major prose, with special attention to *Paradise Lost*. Other works may include *Samson Agonistes* and shorter poems.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL416 18th-Century British Literature and Culture (3 Credits)

The literatures of the Enlightenment grappled with a sea change in the understanding of humans, commodities, the planet, non-human animals, the body, newly-encountered "others," and God. Once called the "Age of Reason," novels, plays, and philosophy from this period in fact plumb passions, emotions, and sentiments through plots about love, exploitation, envy, crime, desire, and ambition. Satirists mocked everything from colonialism to virtue claims to satire itself. Read works that transformed what it meant to love, resist, exploit, and desire. Paradoxically, this "Age of Passions" elevated sympathy in the crucible of capitalism, invented human rights in the context of Empire; and formulated racial categories on the road to abolition and religious toleration. Authors might include Daniel Defoe, Eliza Haywood, Lady Mary Wortley Montagu, Bernard Mandeville, Jonathan Swift, Alexander Pope, Aphra Behn, William Congreve, Olaudah Equiano, and others.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL420 British Romantic Literature and Culture (3 Credits)

Explore a time (roughly 1780-1830) of great change, political revolution, empire-building, changing economic and sexual relations, and philosophical innovation. Arguably, many of our contemporary notions about literature and what an author is were created during this period. Consider the influence of these changes in such authors as Blake, Wordsworth, Coleridge, Shelley, Keats, Byron, Godwin, Wollstonecraft, Austen, and more.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL422 Empire, Urbanization, Aesthetics: Literature of the Global Victorian Era (3 Credits)

An age of cultural, political, and aesthetic upheaval, the Victorian period was a time of enormous social change: working-class agitation, struggles for women's rights, industrialization, imperial aggression, scientific discovery, and shifting ideas about race and colonialism. Through the study of novels, poems, and non-fiction prose, this course will consider how literature of the British nineteenth century engages with the disordered age in which it was composed. Authors may include Charles Dickens, Elizabeth Gaskell, Elizabeth Barrett Browning, George Eliot, Alfred Tennyson, and Mary Seacole, among others.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL425 Identity, Acceleration, Revolt: British and Postcolonial Literatures Since 1900 (3 Credits)

Examine the innovations of modern and contemporary Anglophone literature in the midst of war and globalization, gender and sexual revolution, decolonization and shifting nationalisms, and technological and economic transformation. Authors might include Virginia Woolf, James Joyce, Derek Walcott, Salman Rushdie, Jeanette Winterson, and Chimamanda Ngozi Adichie.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL428 Seminar in Language and Literature (3 Credits)

Topics will vary each semester. The course will provide a seminar experience in material or methodologies not otherwise available to the major.

Restriction: Junior standing or higher; and must be in the English Honors program or gain permission from the department.

Repeatable to: 12 credits if content differs.

ENGL429 Independent Research in English (1-6 Credits)

An advanced independent research project for qualified students, supervised by an English faculty member, on a topic not ordinarily covered in available courses.

Prerequisite: ENGL301; and two English courses (excluding fundamental studies requirement); and permission of ARHU-English department.

Restriction: Sophomore standing or higher.

Repeatable to: 9 credits if content differs.

ENGL430 Literature of the Americas from First Contact to Revolution (3 Credits)

Examines the literature of the cultural encounters, colonialisms, empires, and independence movements in the early Americas from 1492 through the eighteenth century. Writers typically include Christopher Columbus, John Smith, Anne Bradstreet, Jonathan Edwards, William Byrd, Olaudah Equiano, Phillis Wheatley, and Benjamin Franklin.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL431 American Literature: Revolution to Civil War (3 Credits)

An examination of nationalism, sentimentalism, and romanticism, with writings focusing on such topics as slavery and democracy during the 1770s to 1860s. Authors typically include Ralph Waldo Emerson, Margaret Fuller, Emily Dickinson, Walt Whitman, Frederick Douglass, Harriet Beecher Stowe, Edgar Allan Poe, Nathaniel Hawthorne, and Herman Melville.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL432 American Literature: 1865 to 1914, Realism and Naturalism (3 Credits)

Reconstruction, Realism, Naturalism. Representative writers such as Dickinson, James, Dreiser.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL433 American Literature: 1914 to the Present, the Modern Period (3 Credits)

Modernism, Postmodernism. Writers such as Stevens, Stein, Ellison.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL435 American Poetry: Beginning to the Present (3 Credits)

Selections of American poetry, from Bradstreet to contemporary free verse. Authors such as Whitman, Dickinson, Bishop, Hughes, Rich, and Frost.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL437 Contemporary American Literature (3 Credits)

Prose, poetry, drama of living American writers. Current cultural and social issues.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL438 Selected Topics in Media Studies (3 Credits)

Advanced study of a topic pertinent to how the material production, technologies, and cultural practices of diverse types of media shape meaning.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.

Recommended: At least one prior course in Media Studies.

Repeatable to: 9 credits if content differs.

ENGL439 Spotlight on Major Writers (3 Credits)

An intensive study of a single writer, or a handful of writers, to understand the shifts in the writer's craft and cultural influence, both past and present.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

ENGL440 The Novel in America to 1914 (3 Credits)

Survey of the American novel to World War I. Cultural and philosophical contexts; technical developments in the genre. Authors such as Melville, Wells Brown, James, Sedgwick, Chopin.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL444 Feminist Critical Theory (3 Credits)

Issues in contemporary feminist thought that have particular relevance to textual studies, such as theories of language, literature, culture, interpretation, and identity.

Prerequisite: WMST200, WGSS200, WMST250, WGSS250, or ENGL250.

Cross-listed with: WGSS444.

Credit Only Granted for: ENGL444, WMST444 or WGSS444.

Formerly: WMST444.

ENGL446 Post-Modern British and American Poetry (3 Credits)

British and American poets from the 1930s to the present. Such poets as Auden, Williams, Plath, Brooks, Lowell, Wolcott, Ted Hughes, Bishop, Larkin, Jarrell, and Berryman.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL448 Literature by Women of Color (3 Credits)

Literature by women of color in the United States, Britain, and in colonial and post-colonial countries.

Prerequisite: Must complete two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: WGSS448.

Repeatable to: 9 credits if content differs.

Formerly: WMST448.

ENGL449 Selected Topics in U.S. Latinx Literature (3 Credits)

Advanced study of selected works by U.S. Latinx writers.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

ENGL452 Restoration and 18th-Century British Drama (3 Credits)

Explore Restoration and 18th-century British drama, with attention to the history of gender, sexuality, capitalism, empire, philosophy, and race. Learn about tragedy, comedy, farce, parody, and burlesque, as well as dramatic and verbal wit.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL453 Critical Theory in English Studies (3 Credits)

Examines our assumptions about literature, language, media, and culture by exploring how people have theorized key concepts and relations like language, materiality, meaning, representation, identity, and power. We will focus both on learning the history, arguments, and vocabularies of these theories and on evaluating their usefulness for helping us to understand the many kinds of texts (visual, aural, etc.) we study in English. Theoretical thinking will aid us in analyzing the forms texts take; the ideas texts record, challenge, or reinvent; and how texts make us think or feel about ourselves, others, and the world in which we live.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL454 Modern Drama (3 Credits)

The history of modern British drama, from its roots in Chekhov and Ibsen, through the modernisms of Samuel Beckett and Bertolt Brecht, through the Angry Young Men of the 1950s, and right up to the present. Most plays will be from the last 40 years, by writers such as David Hare, Tom Stoppard, Lucy Kirkwood, Caryl Churchill, Roy Williams, Lucy Prebble, Alan Bennett, Brian Friel, Terrence Rattigan, Kwame Kwei-Armah, Sarah Kane, and Alice Birch. We will also look at how class, money, immigration, and the end of the Empire changed British plays over time. And we will consider modern theater architecture and production design as well as the directing instincts of, for instance, Peter Brook, Katie Mitchell, Marianne Elliott, and Nicholas Hytner.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL455 The 18th-Century British Novel (3 Credits)

Explore the beginnings of the novel in the late seventeenth and eighteenth centuries. Whether set in exotic locales, rural English homes, or the metropolis of London, novels represented reputedly "ordinary" people—often adolescents—and their daily lives. But what constituted a novel and how it influenced readers was debated throughout the century, and even its name ("novel," "romance," "history," "moral tale") was fluid. The novels we will consider are experimental, adventurous, and metafictional, and they will provoke us to evaluate what we expect of the genre, how it functions, and its aesthetic and cultural stakes. Authors may include Aphra Behn, Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Laurence Sterne, Frances Burney, and Sarah Scott.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL457 The Modern Novel (3 Credits)

Explore the remarkable development and transformation of the novel in the twentieth century. Learn about the development of the novel through realism, modernism, and postmodernism, from the transformations made by major modernists like Joseph Conrad, James Joyce, Virginia Woolf, Jean Toomer, William Faulkner, and Katherine Ann Porter to playful, unusual and fascinating postmodern and contemporary fiction by Ralph Ellison, Kathy Acker, Salman Rushdie, Toni Morrison, and others.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL458 Literature by Women After 1800 (3 Credits)

Selected writings by women after 1800.

Prerequisite: Must have completed two English courses in literature; or permission of Harriet Tubman Department of Women, Gender, and Sexuality Studies.

Cross-listed with: WGSS458.

Repeatable to: 9 credits if content differs.

Formerly: WMST458.

ENGL459 Selected Topics in LGBTQ+ Literatures and Media (3 Credits)

Advanced study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

ENGL460 Archival Research Methods in English Studies (3 Credits)

Introduces approaches for doing archival research in English studies, exploring how researchers develop their scope and practices of study and how they access and use archival materials electronically and on site to further their research questions. Investigates a historical period, genre, or theme through the lens of manuscripts, ephemera, and other artifacts. Case studies vary by semester.

Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.

ENGL461 Researching Literacy and Language (3 Credits)

Gain practical research experience as you learn to do qualitative research in literacy, writing, and language studies. Study reading, writing, and composing in a variety of contexts (for example, social media and other digital spaces, classrooms, writing centers, churches, workplaces or other community sites). Learn to design and conduct ethical, responsible research studies. Learn to collect data through methods such as interview, observation, and survey and to analyze that data through a variety of methods. Finally, learn to present your research through genres such as reports, posters, and/or presentations.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

Credit Only Granted for: ENGL488R or ENGL461.

Formerly: ENGL488R.

ENGL462 Folksong and Ballad (3 Credits)

Explore America's diverse folksong heritage and its impact on world culture. Learn about such regional, ethnic, and popular music forms as ballad, country, bluegrass, blues, rock, gospel, soul, rap, and zydeco within their specific cultural contexts and as commercial products commodified by a voracious music industry. While we will consider the European and African roots of many of these musical traditions, our focus will be on American contributions in the twentieth century. Reading and listening will focus on genres such as blues or bluegrass; particular artists such as Bessie Smith, Robert Johnson, Bill Monroe, and Louis Jordan; and major figures in the recording industry or fieldworker collectors such as Alan Lomax.

ENGL463 Narrative Analysis Methods in English Studies (3 Credits)

Approaches to literary narrative analysis. Explores narrative theory as a research method for studying the fundamental categories of literary narrative—such as the narrator, character, plot, closure, and frames, as well as the nature of fictionality and the role of the reader—and for interpreting their deployment in individual literary works. We will use this method to examine particularly unusual and even radical fiction, so we can understand the meaning-making work accomplished by narrative form.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.

ENGL466 Arthurian Legend (3 Credits)

Development of Arthurian legend in English and continental literature from Middle Ages to twentieth century. All readings in modern English.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL467 Creative Approaches to Digital Textuality (3 Credits)

Examines electronic literature and other aspects of the literary world online with a focus on experimental writing with computers. Topics may include digital fiction and storytelling, bots, book hacking, flash fiction, narrative in games, and artificial-intelligence-generated fiction, poetry, and art. No programming experience required.

Prerequisite: One English course beyond Fundamental Studies; or permission of ARHU-English department.

ENGL468 Selected Topics in Film Studies (3-9 Credits)

Advanced studies in various periods and genres of film.

Prerequisite: ENGL245, FILM245, CINE245, FILM283, or SLLC283; or permission of ARHU-English department.

Recommended: ENGL329, CMLT280, and ENGL245.

Repeatable to: 9 credits if content differs.

ENGL469 The Craft of Literature: Creative Form and Theory (3 Credits)

Examines various forms of poetry and/or fiction, emphasizing the practice of making literary art and the aesthetic and theoretical approaches that define it. Students will practice the elements of literary craft, producing and experimenting with a wide range of forms and conventions in poetry and/or fiction. They will also produce critical work that articulates and contextualizes theoretical approaches to the making of literary art.

Prerequisite: 2 ENGL courses in literature or creative writing; and have completed a 200-level creative writing workshop in ENGL. Or permission of ARHU-English department.

Repeatable to: 9 credits if content differs.

ENGL470 African-American Literature: From Slavery to Freedom (3 Credits)

Examines African-American literature from its beginnings to the early twentieth century, including genres ranging from slave narratives, pamphlets, essays, and oratory, to poetry and fiction. Our emphasis is on the interaction between literature and literary forms, on the one hand, and historical and political developments in the push toward emancipation, on the other.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL471 African-American Literature: 1910-1945 (3 Credits)

Emergence of modernism in African-American writing including debates over the definition of unique African-American aesthetics, with emphasis on conditions surrounding the production of African-American literatures.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL472 African-American Literature: 1945 to Present (3 Credits)

Transformation of African-American literatures into modern and postmodern forms. Influenced by World War II and the Civil Rights and Black Power movements, this literature is characterized by conscious attempts to reconnect literary and folk forms, the emergence of women writers, and highly experimental fiction.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL475 Postmodern Literature (3 Credits)

Explore the origins and ongoing development of postmodern literature. Learn about the "postmodern condition," such as the collapse of identity, the erasure of cultural and aesthetic boundaries, and the dissolution of life into textuality. Explore art that has come in the wake of postmodernism and has attempted to move beyond it. Readings might include novels and other genres in varied media by Samuel Beckett, Art Spiegelman, Julian Barnes, Colson Whitehead, Ruth Ozeki, Zadie Smith, and others.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

ENGL477 BookLab (3 Credits)

Historical, imaginative, and experiential introduction to different elements of books and bookmaking, including letterpress printing with traditional lead and wood (movable) type, different techniques for bindings, 3D printing, zines, making altered and treated books, and so on. Class-time will be a mix of discussion and hands-on activity. The course will culminate in each student designing and creating their own book object, which might take the form of an artist's book, chapbook, zine, an altered or treated book, or something else entirely. Taught with the resources and facilities available in the English department's BookLab.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Credit Only Granted for: ENGL428M, ENGL438P, ENGL479P, or ENGL477.

Formerly: ENGL428M, ENGL438P, ENGL479P.

ENGL478 Selected Topics in Literature before 1800 (3 Credits)

Advanced study of key topics in literary works from earlier historical periods.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

ENGL479 Selected Topics in Literature after 1800 (3 Credits)

Advanced study of key topics in literary works from later historical periods.

Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English Department.

Repeatable to: 9 credits if content differs.

ENGL482 History of the English Language (3 Credits)

Examines the origins and development of the English language.

Prerequisite: ENGL280, LING200, or HESP120; or permission of ARHU-English department.

ENGL483 American English(es) (3 Credits)

Examines the diversity of dialects, registers, and jargons of English found in the United States, as well as their origins, structures, and functions in society.

Prerequisite: LING200, ENGL280, or HESP120; or permission of ARHU-English department.

ENGL484 Style and Grammar in Written English (3 Credits)

The linguistic analysis of written texts. Examines grammatical and discursive constructions above the level of the sentence and their functions in literary and non-literary texts. We will study narrative structure, authorial voice, genre, register, stance, viewpoint, empathy, surprise, and humor in language.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL487 Principles and Practices of Rhetoric (3 Credits)

A seminar examining foundational concepts and approaches in the theory and practice of rhetoric in civic, professional, academic, and interpersonal settings; focusing on key issues in persuasion, argumentation, and eloquence in historical and contemporary contexts.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL488 Topics in Advanced Writing (3 Credits)

Different genres of technical and professional writing including proposal writing, computer documentation, technical report writing, instruction manuals, etc. Students will analyze models of a genre, produce their own versions, test, edit and revise them.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

Repeatable to: 9 credits if content differs.

ENGL489 Special Topics in Language and Rhetoric (3 Credits)

Special topics in language and rhetoric, such as discourse analysis, semantics, or cognitive linguistics; comparative rhetoric and rhetorical theory, digital rhetorics, women's and minority rhetorics, or the history of rhetoric.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

Repeatable to: 9 credits if content differs.

ENGL491 Digital Rhetoric (3 Credits)

Examines the social significance of the ways digital texts are composed and circulated. Explores why it matters how the web is written and who does the writing, understanding the Internet as rhetorical from its content and communities to the code, protocols, and policies that control digital distribution. Includes active experimentation with digital tools so students can expand their theoretical understanding through critical making.

Prerequisite: Students must have satisfied the Fundamental Studies Academic Writing requirement.

Credit Only Granted for: ENGL489J, or ENGL491.

Formerly: ENGL489J.

ENGL492 Graphic Design and Rhetoric (3 Credits)

An exploration of the visual dimensions of texts and the skills involved in designing them well. Considers graphic design theory and history from a rhetorical perspective, working to understand and practice the use of symbol systems to express, inform, and advocate. Includes direct experimentation with the principles and techniques of graphic design.

Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL493 Writing Genres as Social Action (3 Credits)

A rhetorical genre studies approach to understanding the work that texts do in the world. Examines issues of identity, power, and medium as they relate to writing in various contexts. Students analyze the texts, context(s), and social significance of a public, professional, digital, and/or advanced academic genre and produce writing that meets, modifies, and subverts expectations.

Recommended: Satisfactory completion of the professional writing requirement (FSPW).

Restriction: Must have earned a minimum of 60 credits.

ENGL494 Editing and Document Design (3 Credits)

Principles of general editing for clarity, precision and correctness. Applications of the conventions of grammar, spelling, punctuation and usage, and organization for logic and accuracy. Working knowledge of the professional vocabulary of editing applied throughout the course.

Prerequisite: One course in Fundamental Studies Professional Writing; or permission of ARHU-English Department.

ENGL495 Independent Study in Honors (1-3 Credits)

Completion and presentation of the senior honors project.

Prerequisite: ENGL373 and ENGL370.

Restriction: Must be in English Language and Literature program; and candidacy for honors in English.

ENGL497 English at Work (3 Credits)

Examines how English majors put their academic knowledge and skills to work in professional workplaces after graduation. Students learn strategies to research careers, and they shadow a person in a career of interest for a day. Students learn to compose different professional genres to write and speak about and for professional development and advancement, including inquiry letters, technical descriptions, professional portfolios, and elevator pitches. Students will critically examine the learning they have done in their undergraduate coursework and compose a vision for bringing that learning to life in their future work.

Prerequisite: ENGL301; and an ENGL course at the 300-level or higher.

Restriction: Must have earned a minimum of 60 credits.

ENGL498 Advanced Fiction Workshop (3 Credits)

An advanced class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and to colleagues' fiction, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.

Prerequisite: ENGL352; or permission of ARHU-English department.

Repeatable to: 9 credits if content differs.

ENGL499 Advanced Poetry Workshop (3 Credits)

An advanced class in the making of poetry. Intensive discussion of students' own poems. Readings include both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, and attendance at poetry readings.

Prerequisite: ENGL353; or permission of ARHU-English department.

Repeatable to: 9 credits.

ENGX - English Education Abroad

ENGX200 Writing From Research (3 Credits)

Prepares students to plan, research, and write academic-level research papers autonomously. Students are guided through all writing stages, from preparing an articulated research proposal, to collecting sources and arranging them in an annotated bibliography, to outlining, drafting, and, finally, completing the paper in accordance with current MLA guidelines.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

ENGX202 Fiction: Genre, Techniques, and Structure (3 Credits)

Designed to help students acquire the skills for reading, appreciating, writing, and critically analyzing fiction. This course intends to introduce the students to basic concepts about literary technique, elements of fiction, and innovation while honing their critical thinking skills.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

ENGX204 Writing Rome (3 Credits)

Explores the city of Rome through writing. On-site classes provide an interdisciplinary, studio-art approach to the generation of written work. Through the studied practice of descriptive writing and the examination of setting as a vital literary component, students will create their own textual map of the Eternal City.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX205 Creative Writing: Prose Fiction (3 Credits)

Introduces students to writing prose fiction through practice-based workshops and seminars. Students will explore the methodologies of writing fiction from a writer's perspective, and focus on form, structure, and narrative technique.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX206 Travel Writing (3 Credits)

Explores the genre of travel writing through the analysis of a wide range of works, including articles about food, art, nature, and culture. Takes students outside of the classroom and into the city of Florence and considers the principles of concise, clear, and entertaining prose that make travel writing worth reading.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX207 Creative Writing (3 Credits)

Examines and explores the different genres of creative writing through the study of prose and poetry by British, American, French and Russian authors from the Romantics to the present. Introduces the various elements of creative writing including plot, point of view, character, dialogue, voice and theme.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX210 Writing Italian Food (3 Credits)

Explores the history and customs of food, olive oil, and wine in Perugia and the surrounding region through food writing and visits to local restaurants, cheese makers, vineyards, and olive groves. Examines combinations of historical moment and type of food, such as the question of pizza, the origin of the aperitivo, and the arrival of coffee in Italy, while focusing on what makes a compelling article, techniques and skills related to food writing, and approaches to publication in online and print platforms.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11294>. Education Abroad processes registrations for this course on behalf of students.

ENGX211 Introduction to Creative Writing: Travel Writing (3 Credits)

Introduces students to this rich inheritance of travel writing, while guiding them through their own writing process, from scribbling down notes to polishing their final submission. Along the way, students will learn to identify the key elements of compelling narrative nonfiction (such as voice, narrative structure, setting and the use of figurative language) and begin to develop these qualities in their own writing. Since travel writing must be factual as well as creative, students will also learn how to add nuance to their writing through research. Writing workshops will be a place to test out ideas and receive feedback from peers and the instructor.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX212 What's So Funny? (3 Credits)

Investigates how political and religious satire can reflect cultural norms, open new perspectives, challenge common sense, offend authorities, stigmatize groups, and empower others. Students analyze a number of historical and contemporary works of satire and produce a number of works themselves in the form of cartoons, satirical news articles, and memes. Combines a historical and theoretical examination of satire with a practical understanding of how to use satirical means to evoke laughter, incite critical thought, or provoke indignation in an audience.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX213 Writing the Mediterranean (3 Credits)

Aims to introduce students to Mediterranean landscapes and cityscapes, and serves as a map for possible journeys, inspiring works—poetry, fiction and nonfiction—by students. As a starting historical point, the course explores the idea of Mediterraneanness, and its contemporary politics, society, culture, identities and languages. By reading the most exciting and best-known literary works inspired by major Mediterranean cities (Marseilles, Venice, Dubrovnik, Alexandria, Thessaloniki, Istanbul etc.) students will attain an awareness of the richness and complexity of the region, while exploring their voice and vision, and becoming active and engaged writers.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX300 The Image of Barcelona in Literature (3 Credits)

After the Olympic Games of 1992, Barcelona became an international tourist destination; but a short visit cannot account for the cultural complexities of the Catalan capital. In order to know any city, to "dwell" in it, we need to become familiar with its oral history, paintings, architecture, sculpture, and literary texts.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

ENGX302 From Literature to Social Media: Reading and Writing Italian Food (3 Credits)

Focuses on one important aspect (present in both fiction and nonfiction writing): the expression and description of sensory experiences through words. Examining literature as well as nonfictional food writings, students will discover that the art of writing about food and drink involves not only an interest in the gustatory experience, but also an ability to translate sensory experiences into words.

Formerly: ENGL379I.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG325. More information at ter.ps/UMPerugia.

ENGX303 Italian Tales and Stories: Creative Writing Through Literary Models (3 Credits)

Explores the process of transforming sensory impressions, individual feelings, personal experiences, and factual information into engaging and effective works of creative fiction and non-fiction. Students will read from a cross-section of Italian authors dealing with a wide range of topics and issues. They will also generate their own writing through a series of exercises designed to help the writer tap into new levels of awareness and creative energy. Students will also be involved in a series of 'literary walks' aimed at enhancing their ability to gather information from the exploration of Italian natural and urban landscapes.

Formerly: ENGL379W.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Umbria Institute Course Code: ENG 340. More information at ter.ps/UMPerugia.

ENGX305 Scandinavian Crime Fiction (3 Credits)

In Scandinavian crime fiction, the most fantastic murders take place, families fall apart, their dark secrets are exposed, and the validity of the Scandinavian countries' welfare system is questioned - all of this described in a distinctly Scandinavian tone and style.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

ENGX306 Creative Writing (3 Credits)

Explores the creative process, giving students concrete ways to enhance their creative thought and writing. Through writing assignments and numerous inventive classroom exercises, students learn how to write more interesting characters, fascinating plots and colorful stories.

Credit Only Granted for: ENGX203 or ENGX306.

Formerly: ENGX203.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX307 Advanced Video Production and Post-Production (3 Credits)

Brings students' fluency of cinematic language to a more advanced stage by expanding upon and synthesizing the shooting and editing techniques. The class introduces the conceptual and technical framework necessary to shoot and edit dual-system sound films, block and shoot dialogue scenes, perform dramatic analysis to scripts, and apply that analysis to a more sophisticated use of camera work and complex editing strategies.

Additional Information: This course is offered as part of the Maryland-in-Romestudy abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX310 Mafia, Murder, and Mystery: Crime in Italian and American Cinema (3 Credits)

Studies how mafia and organized crime are presented in Italian and American cinematic texts. The course will examine the different expressions of the crime film genre, which dates back to the beginnings of filmmaking, focusing on the technical, visual, and aesthetic aspects of crime films.

Cross-listed with: CINX310.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

ENGX311 European Storytelling: From Homer to Harry Potter (3 Credits)

An introduction to European oral tradition, as expressed in European myth-cycles, legends and fairytales, from the earliest known sources up to and including modern uses of this tradition.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX312 Live, Love or Die in Italy: Major Italian Writers in English Translation II (3 Credits)

As a sequel to Major Italian Writers I, this course explores modern and contemporary Italian literature through the reading, analysis, and discussion of late eighteenth, nineteenth, and twentieth century Italian novels in translation, by authors such as Foscolo, Verga, Camillo Boito, D'Annunzio, Svevo, Carlo Levi, and Morante. Students are encouraged to compare and contrast authors and books and to identify and discuss major literary periods and genres (such as Romanticism, Realism, Modernism and Neo-realism).

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX313 Creative Non-Fiction Writing (3 Credits)

Nonfiction is a genre that has grown more diverse and creative than ever, embracing all styles from serious to whimsical and encompassing every topic imaginable. This course will focus on the creative process and the generation of several different forms of writing within the nonfiction genre, including the personal essay, the memoir, biography, and the journalistic or magazine profile. Through the examination of professional examples of creative nonfiction, discussion, and critiques, students will become acquainted with the techniques and tools used to build a strong portfolio of literary and journalistic pieces.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX314 The Mafia in Italian Society, Literature and Film (3 Credits)

Explores representations of the Italian Mafia in literature and cinema, with reference also to the Italian-American context. Students will be introduced to the history of the mafia, starting from its beginnings in Sicily, and follow its historical and geographical evolution within, and also outside, Italy. The course will make reference to Italian literary texts as well as Italian and Italian-American cinematic representations of the phenomenon.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX315 Travel Writing Workshop (3 Credits)

Students will learn the fundamentals of travel and destination-based writing, with the opportunity to practice the craft in various formats, from personal narratives to feature writing to service journalism. They will develop the necessary skills to write compellingly and sensitively about travel, avoiding clichés and cultural faux pas. Occasional guest lecturers working in the field will shed further light on these topics. Interested students will have the chance, with guidance from their instructor, to pitch or to send finished pieces on spec to local or special Italy-interest publications.

Credit Only Granted for: ENGL369M or ENGX315.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX316 Rome on Screen and in Print (3 Credits)

Focuses on the city of Rome and explores past and present representations of the eternal city in Italian literature and film. Focuses on late 19th- and 20th-century Rome from the point of view of selected works of Italian literature and cinema in which the city plays a prominent role. Students identify and analyze the connections between texts, ideas, or cultural artifacts and the human experience and/or perception of the world.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX321 A Sense of Place in European Literature (3 Credits)

Explores and identifies the interrelation between place and text. Discovers comparative perspectives on European literature through in-depth analysis and close readings of texts written by modern and classical European writers.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX400 Fashion, Media and Communication (3 Credits)

Fashion Writing is an extremely important aspect of cultural and creative nonfiction prose. With the rise of internet and mass journalism worldwide, the fashion and accessories industry has become increasingly focused on getting across the messages to audiences of all ages and backgrounds.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

ENGX401 Shakespeare's Italian Plays (3 Credits)

The intensive study of five or six of Shakespeare's comedies and tragedies set in Italy, ancient and early modern, with attention to English attitudes toward Italy and Shakespeare's use of Italy, the nature of comedy and tragedy, and the shape of Shakespeare's career.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. American University of Rome Course code: ENG 301 / ENG 309. More information at ter.ps/UMRome.

ENGX404 Travel Writing (3 Credits)

The world is full of fascinating people and places - and stories waiting to be told. Travel writers capture these stories and pass them on to their readers. Good travel writers make us care. In this class, you will learn how to identify relevant stories, how to gather material and how to release all of this in well-written pieces. Our main focus is narrative journalism - the kind of stories you would normally see as features in travel magazines.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX405 Hans Christian Andersen and the Danish Golden Age (3 Credits)

Hans Christian Andersen (1805-1875) is internationally known as the writer of fairy tales. Children all over the world know *The Ugly Duckling*, *The Emperor's New Clothes*, *The Little Mermaid*, *The Princess and the Pea* and other tales. But Andersen also wrote plays, novels, poems, travelogues and songs. This course will be a study of approximately 30 fairy tales by Hans Christian Andersen (1805-75) as well as extracts from his travelogues, poems, diaries and his autobiography, *The Fairy Tale of My Life*.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. More information at ter.ps/UMCopenhagen.

ENGX406 The Literature of War - Europe and WWI (3 Credits)

Examines the various literary responses to war and the ways in which artists and writers have negotiated power, violence, and resistance within the context of military conflict.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX407 Italian Women Writers (3 Credits)

This course presents an overview of women's fiction in Italy from the turn-of-the-century context, with writers such as Neera and Sibilla Aleramo, to the present day, with Elena Ferrante and Dacia Maraini. The course will examine women's changing role within Italian society and issues such as sexual violence, motherhood, the search for self-determination and autonomy and paths to political awareness.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX410 Literary Editing and Publishing (3 Credits)

Designed to be an overview in literary editing for publication and will explore in-depth the publishing industry—the history, current trends, future possibilities—for both writers and editors. Students will develop many skills related to the publishing industry, such as copyediting, revision, query letters, literary critique and analysis, and submitting and reviewing work.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX411 Major American Authors: Hemingway (3 Credits)

Examines the life and expatriate writings of Ernest Hemingway, exploring his themes, style, and narrative technique. We will examine not only issues of style and technique but also how Hemingway's expatriate experience influenced his writing. Our major objective in this class will be to acquaint ourselves with the contributions of Hemingway to American literature through close reading and careful discussion of much of his works.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ENGX412 Sense of Place in European Literature (3 Credits)

Explores and identifies the interrelation between place and text. We discover comparative perspectives on European literature through in-depth analysis and close readings of texts written by modern and classical European writers. Our geographic focus is primarily Denmark, Germany, the Baltic region, and Russia. The European Humanities core course includes a total of 18 classes, a core course week with a short study tour to the island of Fano, and a six day long study tour to Berlin, Germany.

Additional Information: This course is offered as part of the Maryland-in-Copenhagen study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMCopenhagen. Education Abroad processes registrations for this course on behalf of students.

ENGX413 Colonial Literatures, Postcolonial Perspectives (3 Credits)

Introduces students to a selection of novels and short fiction written within the context of the European colonization of South Asia, South East Asia, Africa, the Middle East and the Americas. Focuses on non-European authors and the experience of colonialism from a non-European perspective. Explores postcolonial theory and its relevance to the discipline of Comparative Literature.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX414 Presentations of London in Modern European Literature and Film (3 Credits)

London has been the largest European city for the last two-and-a-half centuries and has played a dominant role in European culture since that time. This course explores the ways in which this idea is presented in examples of literature and film from the late nineteenth century to the present day.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX415 Terror, Transgression and Astonishment: the Gothic in the Long Nineteenth Century (3 Credits)

Explores why writers seem compelled to write about the gruesome, sordid, creepy, or just terrifying aspects of humanity through analyzing Gothic fiction in the late eighteenth century to the nineteenth century. Students will explore genres such as ghost stories or the supernatural, while also looking at a few texts that are considered "unclassifiably weird," to see how the Gothic and related genres emerge in relation to cultural and social trends.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX416 James Baldwin and American Civil Rights (3 Credits)

The movement for Civil Rights and Black Power in the US marked a decisive phase in the making of our contemporary world. This course uses the novels, short stories, and autobiographical reportage of James Baldwin as a framework for exploring the Civil Rights movement and Black Power, the relationship of race and sexuality, the "Americanness" of American literature, and Baldwin's own relationship with the Civil Rights movement as an openly homosexual man.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX417 Time, Narrative and Culture (3 Credits)

Examines how an understanding of narrative informs a wider concept of culture with a focus on strange temporal structures and time-experiments in contemporary fiction and their effect on how we experience time. Students will analyze texts that exhibit a variety of temporal structures including backwards narration, flashforward, trans-historical jumps, and fuzzy temporality, as well as explore philosophical and social theories of time.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX421 In an Ideal World: Utopias from Plato to the Present (3 Credits)

Delves into the idea of the Utopia as both its own literary genre and as a means of thinking about political ideals and practice. This course will look at the development of the Utopia genre across time, ways in which fiction serves as a way to debate and comment on political practice and how political arguments are portrayed through fictional and metaphorical devices.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX422 American Money: Novels 1793-1930 (3 Credits)

Explores the great American subject of money from the foundations of the Republic to the Jazz Age. Students will study works of fiction that focus on capital, thrift, production, high finance, self-sufficiency, and fraud, and consider the effects of the recent banking crisis and history and psychology of financial behavior, and of money itself.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX423 After Postcolonialism (3 Credits)

Explores the limits and boundaries of postcolonial literature. Offers a contemporary focus (including the War on Terror and Islamophobia) and takes into account regions that are not strictly postcolonial (including China and the U.S.) Uses critical theory to extend the idea of the "postcolonial" and study how we conceptualize the present moment.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX425 How Are We Feeling?: Affect and/in Contemporary Literature and Culture (3 Credits)

Explores how the social, psychological, and philosophical understandings of the way we feel, and represent or evoke feeling, influence how authors use aesthetics, audience, and ethics in relation to affective states such as remorse, boredom, nostalgia, fascination, rebellion, and expectation. This course examines a selection of fiction, poetry, creative nonfiction, life writing, television, and film to understand how cultural texts represent the affective experiences of contemporary life.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX426 The Politics of Irish Literature, from the Eighteenth to the Twentieth Century (3 Credits)

Irish writing in the English language has re-shaped cultural history through the interventions of great originals such as Yeats, Joyce, and Beckett. This course looks at Irish literature through a political lens through the study of texts by a variety of authors and relates these works to historical contexts such as the Union with Britain, the Famine of the 1840s, the cultural revival at the turn of the twentieth century, the Irish revolution, and the Northern Irish crisis.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students.

ENGX427 Poetry and Poetics of Resistance (6 Credits)

Provides students with a global viewpoint of poetry and poetics of resistance, tracing similarities and finding differences in the various poetic approaches used by authors who live in nations without a State, exiled writers, and dissident voices within mainstream cultural politics. Students will examine different works on exile, both physical and internal, by poets such as Homi Bhabha, Julia Kristeva, Arjun Appadurai, Salman Rushdie, George Lamming, and Edward Said.

Additional Information: This course is offered as part of the Arts & Humanities-in-London study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11854>. Education Abroad processes registrations for this course on behalf of students. Please note this course spans two semesters (one academic year).

ENGX430 The Crisis of Culture: Literature and Politics 1918-1948 (3 Credits)

Explores the ways in which the writers of the period following the First and Second World Wars engaged with the turbulent politics and dramatically changing social life in Great Britain. Explores the paradigm shift of a post-war Europe as a darker, more complex, and less certain epoch began.

Additional Information: This course is offered as part of the ARHU-in-London study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/ARHULondon. Education Abroad processes registrations for this course on behalf of students.

ENMA - Engineering, Materials

ENMA150 Materials of Civilization (3 Credits)

The discovery of new materials has shaped history and built civilizations. The utilization, properties and production techniques of materials from the Bronze Age up through modern times and into the future will be traced. These materials are explained by considering their atomic structure, the binding forces between atoms and their arrangement, and how controlling the structure controls the materials properties.

ENMA165 Introduction to Programming with Python (3 Credits)

Introduces concepts of computer programming using Python from the point-of-view of engineers and scientists (as opposed to computer science). Students will learn the fundamentals of writing and implementing code, and exposed to practical aspects of programming as may be relevant to their studies and careers in the materials field. Topics/activities of note include data management and analysis, laboratory-related scripting, simple automation, and introduction to computational materials concepts.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENEE140 or ENMA165.

ENMA180 Materials Science and Engineering: The Field and the Future (1 Credit)

Overview of the profession and the components of the Materials Science and Engineering program. Students will become familiar with the departmental faculty, areas of specialization within MSE, professional society student chapter, research opportunities and other resources available to students.

Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENMA201 Bigger, Faster, Better: The Quest for Absolute Technology (3 Credits)

Can one prevent the transformation of technology from a friend to foe? Constant technological change characterizes our current lives and future, but ambivalence marks our relationships with technology. Students will be introduced to concepts necessary to understand scientific, engineering and societal driving forces of selected technological transformations, and the conflicts inherent in introduction of new technologies. We investigate approaches to judicious implementation of technology to prevent it changing from friend to foe.

Credit Only Granted for: ENMA201 or ENMA289A.

Formerly: ENMA289A.

ENMA300 Introduction to Materials Engineering (3 Credits)

Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.

Prerequisite: ENES100; and permission of ENGR-Materials Science & Engineering department.

Corequisite: MATH241.

Recommended: PHYS261 and PHYS260.

Restriction: Permission of ENGR-Mechanical Engineering department. Cross-listed with ENME382.

Credit Only Granted for: ENMA300 or ENME382.

ENMA301 Modern Materials Engineering (3 Credits)

Five topical areas will be presented, each leading up to specific applications that have recently come to market or are currently experiencing heavy research and development. The goal of each module will be to introduce the basic materials science principles necessary to understand these new areas.

Prerequisite: ENMA180; or students who have taken courses with comparable content may contact the department. And ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA312 Experimental Methods in Materials Science (3 Credits)

Introduction to experimental methods in materials characterization; synthesis of colloidal nanoparticles; X-ray diffraction and light scattering; optical microscopy; thermal conductivity and expansion; electrical measurements; heat capacity; computational materials design.

Prerequisite: ENMA300.

Corequisite: ENMA460.

Restriction: Junior standing or higher.

ENMA362 Mechanical Properties (3 Credits)

Overview of Mechanical Behavior, Elastic Behavior, Dislocations, Plastic Deformation, Strengthening of Crystalline Materials, Composite Materials, High Temperature Deformation of Crystalline Materials, Permanent Deformation of Noncrystalline Materials, Tensile Fracture at Low Temperatures, Engineering Aspects of Fracture, High Temperature Fracture, Fatigue, and Experimental determination of Mechanical Properties including Hardness of Metals and Strength of Metals, Polymers, Ceramics and Composites.

Prerequisite: ENMA300.

Restriction: Junior standing or higher; and permission of ENGR-Materials Science & Engineering department.

ENMA386 Experiential Learning (3-6 Credits)

Prerequisite: Must have Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

ENMA400 Introduction to Atomistic Modeling in Materials (3 Credits)

This is an introductory course designed to study atomistic modeling and simulation techniques used in materials research. This course covers the theories, methods, and applications of atomistic-scale modeling techniques in simulating, understanding, and predicting the properties of materials. Specific topics include: molecular statics using empirical force fields; quantum mechanical methods including density functional theory; molecular dynamics simulations; and Monte Carlo and kinetic Monte Carlo modeling.

Prerequisite: ENMA300, MATH206, and ENMA460.

Recommended: Basic knowledge in quantum mechanics (preferred but not required); basic knowledge in statistical mechanics (preferred but not required). Also offered as: ENMA600.

Credit Only Granted for: ENMA489A, ENMA400, ENMA698A, or ENMA600.

Formerly: ENMA489A.

ENMA401 Continuum Modeling of Materials (3 Credits)

Introduces continuum modeling techniques in materials science and engineering. This course covers and emphasizes the applications of continuum modeling techniques using COMSOL software package in simulating a range of materials phenomena and properties. Specific topics of continuum modeling include: The construction and analyses of continuum models using COMSOL software package; Structural mechanics; Heat transfer; Electrical current; Chemical species transport; Fluid flow; Multi-physics models coupling above phenomena.

Prerequisite: ENMA362, PHYS270, PHYS271, and MATH246; or equivalent; and ENMA165 or MATH206.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA401 or ENMA489C.

Formerly: ENMA489C.

ENMA410 Materials for Energy I (3 Credits)

The goal is to demonstrate the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. There will be a discussion of U.S. and global energy and related environmental issues. Topics covered include: fuel cells and batteries (electrochemical energy conversion and storage); catalysts and membrane separations (fossil fuel and biomass energy conversion); and nuclear fuels.

Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA410 or ENMA489H.

Formerly: ENMA489H.

ENMA411 Materials for Energy II (3 Credits)

Demonstrates the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. Materials for Energy is a two-part course based on material functionality; however, they are independent and neither is a prerequisite for the other. Materials for Energy II will focus on electrical, optical, thermal, and mechanically functional materials for energy devices. Solar cells, solar fuel, solar thermal, energy efficient lighting, building energy, thermoelectric and wind energy will be covered.

Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA411 or ENMA489I.

Formerly: ENMA489I.

ENMA412 Fundamentals of Photovoltaics (3 Credits)

Overview of the fundamentals of photovoltaic devices, including principles of operation, with emphasis on the materials science aspects of the different technologies available.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA414 Introduction to Solid State Ionics (3 Credits)

Solid State Ionics is the study of point defects in crystalline and non-crystalline solids; defect equilibria and transport; the influence of chemical and electric potentials, interfaces, and association; and the application of ionically conducting solids in solid-state electrochemical transducer systems and devices.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA414 or ENMA489W.

Formerly: ENMA489W.

ENMA421 Design of Composites (3 Credits)

Fundamentals of design, processing and selection composite materials for structural applications will be covered. The topics include a review of all classes of materials, an in-depth analysis of micro and macro mechanical behavior including interactions at the two-phase interfaces, modeling of composite morphologies for optimal microstructures, material aspects, cost considerations, processing methods including consideration of chemical reactions and stability of the interfaces, and materials selection considerations.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA421 or ENMA489A.

Formerly: ENMA489A.

ENMA422 Radiation Effects of Materials (3 Credits)

Ionizing radiation, radiation dosimetry and sensors, radiation processing, radiation effects on: polymers, metals, semiconductors, liquids, and gases. Radiation in advanced manufacturing, radiation-physical technology.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA422 or ENMA489E.

Formerly: ENMA489E.

ENMA425 Introduction to Biomaterials (3 Credits)

Examination of materials used in humans and other biological systems in terms of the relationships between structure, fundamental properties and functional behavior. Replacement materials such as implants, assistive devices such as insulin pumps and pacemakers, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds, and biocompatibility will be covered.

Recommended: ENMA300.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

ENMA426 Reliability of Materials (3 Credits)

Students are taught the basic degradation mechanisms of materials, through the understanding of the physics, chemistry, mechanics of such mechanisms. Mechanical failure mechanisms concentrate on fatigue, and creep. Chemical failure mechanisms emphasize corrosion and oxidation. Physical mechanisms such as diffusion, electromigration, defects and defect migration, surface trapping mechanisms, charge creation and migration are also included.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA426 or ENMA489R.

Formerly: ENMA489R.

ENMA431 Nanomechanics of Biomaterials (3 Credits)

Focuses on the latest scientific developments and discoveries in the nanoscale structure and properties of biological materials. The course begins with introductory lectures on the various nanostructures of biomaterials, and their physiological roles under mechanical forces. General aspects of biopolymers, protein folding, and self-assembly are also covered. Next, a series of in-depth lectures are presented on the characterization methods of nanomechanical properties using single molecule techniques. Finally, current applications of nanobiomaterials in the area of molecular machines, molecular self-assembly, and nanoscaffold are discussed.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA431 or ENMA489B.

Formerly: ENMA489B.

ENMA434 Quantum Mechanics for Engineers (3 Credits)

Provides engineering students with a foundational understanding of quantum mechanics and its practical applications in the field of materials science. This course will equip students with the essential knowledge and skills required to harness the principles of quantum mechanics in their pursuit of innovative solutions in materials science and engineering.

Prerequisite: MATH241 and PHYS270.

Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA435 Wide Bandgap Materials and Devices (3 Credits)

Presents the materials science of wide bandgap materials and analyzes the defects present in such materials from a device performance point of view.

Prerequisite: ENMA300 and ENMA465.

Corequisite: ENMA460.

Jointly offered with: ENMA635.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA435 or ENMA635.

ENMA436 Introduction to Quantum Materials and Devices (3 Credits)

Quantum materials and devices are an emerging field in materials engineering and physics which offer new approaches to electronics and photonics. This course serves as an introduction to quantum materials and their applications in quantum technologies. It will teach concepts needed to understand the quantum mechanical properties of materials and connect their fundamental properties to quantum device applications. Topics will include low-dimensional materials, strongly correlated electron systems, topology in solids, and light-matter interactions

Prerequisite: ENMA460 and ENMA461 .

Jointly offered with: ENMA636.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA436 or ENMA636.

ENMA437 Machine Learning for Materials Science (3 Credits)

Familiarizes students with basic as well as state of the art knowledge of machine learning and its applications to materials science and engineering. Covers the range of machine learning topics with applications including feature identification and extraction, determining predictive descriptors, uncertainty analysis, and identifying the most informative experiment to perform next. One focus of the class is to build the skills necessary for developing an autonomous materials research system, where machine learning controls experiment design, execution, and analysis in a closed-loop.

Prerequisite: MATH206, ENMA300, and MATH461.

Jointly offered with: ENMA637.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA489L, ENMA437 or ENMA637.

Formerly: ENMA489L.

ENMA440 Nano Plasma Processing of Materials (3 Credits)

Sustaining mechanisms of plasmas are covered, especially low-pressure electrical gas discharges, fundamental plasma physics, sheath formation, electric and magnetic field effects, plasma-surface interactions in chemically reactive systems, plasma diagnostic techniques and selected industrial applications of low pressure plasmas.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA440, ENMA489P, ENMA640, or ENMA698P.

Formerly: ENMA489P.

ENMA441 Characterization of Materials (3 Credits)

Techniques to characterize the properties of materials whose characteristic dimensions range from nanometers to macroscopic. These include conventional crystalline and noncrystalline materials, with a special attention to materials of current technological interest. The course will include recent results from the scientific literature.

Prerequisite: ENMA300, ENMA165 or MATH206.

Restriction: Permission of ENGR-Materials Science & Engineering department; and senior standing.

Credit Only Granted for: ENMA489T or ENMA441.

Formerly: ENMA489T.

ENMA442 Nanomaterials (3 Credits)

An exploration of materials whose structure places them at the boundary between small objects and large molecules. Having characteristic dimensions in the range of 1-100 nanometers, these materials are difficult to synthesize and characterize but are nevertheless at the forefront of science and technology in many fields. Also, the methods for creating, manipulating and measuring these materials with an emphasis on the current scientific literature will be covered. The novel properties and potential applications will also be addressed.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA442 or ENMA489N.

Formerly: ENMA489N.

ENMA443 Phontonic Materials, Devices and Reliability (3 Credits)

The course focuses on the understanding of the basic optical processes in semiconductors, dielectrics and organic materials. The application of such materials in systems composed of waveguides, light emitting diodes and lasers, as well as modulators is developed.

Restriction: Permission of ENGR-Materials Science & Engineering department; and junior standing or higher.

Credit Only Granted for: ENMA443 or ENMA489Z.

Formerly: ENMA489Z.

ENMA445 Liquid Crystals and Structured Soft Materials (3 Credits)

Elective course on the properties and behavior of liquid crystals and related soft materials, and their relationship to biomaterials and to applications.

Prerequisite: MATH246, PHYS270, and PHYS271.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA445 or ENMA489L.

Formerly: ENMA489L.

ENMA460 Introduction to Solid State Physics (3 Credits)

Classes of materials; introduction to basic ideal and real materials' behavior including mechanical, electrical, thermal, magnetic and optical responses of materials; importance of microstructure in behavior. One application of each property will be discussed in detail.

Prerequisite: PHYS271, PHYS270, and MATH241.

Cross-listed with: PHYS431.

Restriction: Junior standing or higher; and must be in the Engineering: Materials Science program or Physics program.

Credit Only Granted for: ENMA460 or PHYS431.

Additional Information: Materials Engineering students take ENMA460 and Physics students take PHYS431.

ENMA461 Thermodynamics of Materials (3 Credits)

Thermodynamic aspects of materials; basic concepts and their application in design and processing of materials and systems. Topics include: energy, entropy, adiabatic and isothermal processes, internal and free energy, heat capacity, phase equilibria and surfaces and interfaces.

Prerequisite: ENMA300.

Restriction: Junior standing or higher.

ENMA463 Macroprocessing of Materials (3 Credits)

Processing of modern, bulk engineering materials. Raw materials, forming, firing, finishing and joining. More emphasis on metals and ceramics than polymers.

Prerequisite: ENMA300.

Restriction: Junior standing or higher.

ENMA464 Environmental Effects on Engineering Materials (3 Credits)

Introduction to the phenomena associated with the resistance of materials to damage under severe environmental conditions. Oxidation, corrosion, stress corrosion, corrosion fatigue and radiation damage are examined from the point of view of mechanism and influence on the properties of materials. Methods of corrosion protection and criteria for selection of materials for use in radiation environments.

Prerequisite: ENMA300. Or permission of ENGR-Materials Science & Engineering department; and permission of instructor.

ENMA465 Microprocessing Materials (3 Credits)

Micro and nanoscale processing of materials. Emphasis on thin film processing for advanced technologies.

Prerequisite: ENMA300.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA363, ENMA489B, or ENMA465.

Formerly: ENMA363.

ENMA466 Advanced Materials Fabrication Laboratory (3 Credits)

This course allows students an opportunity to study advanced materials systems in depth through a combination of lectures and hands-on laboratory experiments. Students will be trained in materials processing and characterization techniques. Each student will fabricate materials and devices in our state-of-the-art nanofabrication clean room facility (Fablab), as well as evaluate them using a variety of characterization techniques.

Prerequisite: ENMA465; and permission of ENGR-Materials Science & Engineering department.

ENMA470 Materials Selection for Engineering Design (3 Credits)

Students will learn about materials classes, properties, limitations and applications and the methodology of materials selection in engineering design.

Prerequisite: Permission of ENGR-Materials Science & Engineering department.

Restriction: Junior standing or higher.

Credit Only Granted for: ENMA 470 or ENMA 489O.

Formerly: ENMA 489O.

ENMA471 Kinetics, Diffusion and Phase Transformations (3 Credits)

Fundamentals of diffusion, the kinetics of reactions including nucleation and growth and phase transformations in materials.

Prerequisite: Must have completed or be concurrently enrolled in ENMA461.

Restriction: Junior standing or higher; or permission of ENGR-Materials Science & Engineering department.

ENMA472 Additive Manufacturing of Materials (3 Credits)

Additive manufacturing approaches for metals, ceramics and polymers will be explored in terms of manufacturability and how processing parameters affect microstructure and properties. The course will include projects, including a Terrapin Works project to design and build a part, to develop an understanding of the current state of additive manufacturing, its future promise and its limitations.

Prerequisite: ENMA300.

Restriction: Must be in Engineering: Materials Science program.

Credit Only Granted for: ENMA472 or ENMA672.

ENMA473 Engineering Using High Strength Metals and Alloys (3 Credits)

This is a class focused on the materials engineering challenges of applying high strength metals and alloys to solutions. The extraordinary properties of these alloys derive from (1) highly metastable microstructures, (2) high strengths and melting points of the base metals, (3) complicated processing and fabrication procedures, and (4) their resulting complex behavior in extreme environments. This course will give you the knowledge base you need to select, apply and troubleshoot the performance of high strength metals and alloys in a variety of applications.

Prerequisite: ENMA300, ENMA362, and ENMA461; and permission of ENGR-Materials Science & Engineering department.

ENMA474 Introduction to Computational Materials Science (3 Credits)

This is an introductory course aiming for junior and senior undergraduate students to study atomistic modeling and simulation techniques that are used in materials science. This course covers the theories and applications of atomistic scale modeling techniques to simulate, understand, and predict the properties of materials. Topics include: molecular statics, quantum mechanical methods, molecular dynamics simulations and Monte Carlo simulations.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA474 or ENMA489A.

Formerly: ENMA489A.

ENMA475 Fundamentals of Diffraction Techniques in Materials Science (3 Credits)

This course looks at the advanced methods of x-ray scattering/diffraction available thanks to the more powerful sources available to us. The availability of these sources enables us to study liquid crystals, polymers, nanomaterials, quasiorganized materials (including nano) and disordered materials.

Prerequisite: MATH246, PHYS270, and PHYS271.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA475 or ENMA489M.

Formerly: ENMA489M.

ENMA476 NanoManufacturing: Materials Design and Systems Integration (3 Credits)

The fundamentals of nanomanufacturing based on state-of-the-art and future prospects in materials design and systems integration. The course examines functional nanomaterials design and synthesis, structural assembly from nanoscale to macroscale, and device fabrication. Distinct from the current curricular paradigm in many nanotechnology programs that focus on underlying science, this course emphasizes the immediate need for scale-up, process robustness, and system integration issues. Featuring case studies from industry, end of chapter problems, and study questions, the course is for upper-level undergraduate and graduate students, who are interested in the future of manufacturing innovation and technology.

Restriction: Must be in Engineering: Materials Science program.

ENMA481 Introduction to Electronic and Optical Materials (3 Credits)

Electronic, optical and magnetic properties of materials. Emphasis on materials for advanced optoelectronic and magnetic devices and the relationship between properties and the processing/fabrication conditions.

Prerequisite: ENMA300; or students who have taken courses with comparable content may contact the department.

ENMA482 Introduction to Electron Microscopy (3 Credits)

An introduction of the basic principles of operation for modern electron microscopes. Details will be given on the construction of microscopes, their basic operation, and the types of questions that can be addressed with an electron microscope. Emphasis will be placed on a conceptual understanding of the underlying theories. Where appropriate, mathematical descriptions will be utilized. Upon completion of this course, students will be expected to have a basic understanding sufficient to give interpretations of microscopy images and to suggest the correct tool or approach for certain research studies.

Prerequisite: PHYS142, PHYS122, or PHYS260.

Credit Only Granted for: ENMA482 or ENMA489J.

Formerly: ENMA489J.

ENMA484 Fundamentals of Finite Element Modeling (3 Credits)

A brief review of mechanical behavior of materials, introduction to Finite Element Modeling (FEM), and procedures for predicting mechanical behavior of materials by FEM using computer software (at present ANSYS). The FEM procedures include, setting up the model, mesh generation, data input and interpretation of the results.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Credit Only Granted for: ENMA484 or ENMA489F.

Formerly: ENMA489F.

ENMA486 Seminar in Materials Science and Engineering (1 Credit)

Current research in materials science and engineering and related fields. The lectures are presented by scientists and engineers from academia, national laboratory, US government, etc., in the format of seminars.

Restriction: Must be in Engineering: Materials Science program.

ENMA487 Capstone Preparation (1 Credit)

In preparation for the senior level design course, students will do background research and develop white papers from which teams will form around short listed design projects. The projects should focus on a society, industry, military or technological based problem in Materials Science and Engineering leading to a design and strategy to address the problem in the following course, ENMA 490. The course will include written and oral presentations of the white papers and team proposals.

Restriction: Must be in Engineering: Materials Science program; and senior standing; and permission of ENGR-Materials Science & Engineering department.

ENMA489 Selected Topics in Engineering Materials (3 Credits)

Selected topics of current importance in materials science and engineering.

Restriction: Permission of ENGR-Materials Science & Engineering department.

Repeatable to: 12 credits if content differs.

ENMA490 Materials Design (3 Credits)

Capstone design course. Students work in teams on projects evaluating a society or industry based materials problem and then design and evaluate a strategy to minimize or eliminate the problem; includes written and oral presentations.

Prerequisite: Minimum grade of C- in ENMA487.

Restriction: Senior standing.

ENMA495 Polymeric Engineering Materials I (3 Credits)

Study of polymeric engineering materials and the relationship to structural type. Elasticity, viscoelasticity, anelasticity and plasticity of single and multiphase materials. Emphasis is on polymeric materials.

Prerequisite: ENMA300.

Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA496 Polymeric Materials: Structure, Property, and Processing (3 Credits)

An intermediate level treatment of structures of polymers. An introduction to mechanical properties and processing of polymeric materials. Emphasis will be on how to establish the structure-property relationship and on how to achieve such understanding via different characterization methods.

Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

Cross-listed with: CHBE496.

Credit Only Granted for: ENMA496 or CHBE496.

ENMA499 Senior Laboratory Project (1-3 Credits)

Students work with a faculty member on an individual laboratory project in one or more of the areas of engineering materials. Students will design and carry out experiments, interpret data and prepare a comprehensive laboratory report.

Restriction: Permission of ENGR-Materials Science & Engineering department; and senior standing.

ENME - Engineering, Mechanical

ENME201 Careers in Mechanical Engineering (1 Credit)

The Mechanical Engineering Curriculum, Career Paths. Research areas in the Mechanical Engineering Department. The Mechanical Engineering Profession.

ENME202 Computing Fundamentals for Engineers (3 Credits)

Introduction to computer programming for the solution of engineering problems. Python & MATLAB languages including flow control, functions, file handling, arrays, and data structures. Students will be introduced to computing fundamentals, principles of software engineering, object-oriented programming, and algorithms.

Corequisite: Must be concurrently enrolled in MATH141.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENAE202 or ENME202.

ENME207 Fabrication and Machine Tool Practices for Engineering (2 Credits)

In order to make the best decisions in product design and development, it is important to understand the capabilities and limitations of different fabrication techniques. Students will learn to identify machine parts and functions, define machine shop terminology, calculate shop formulas and theories, execute machine operations, and apply proper measuring tools.

Prerequisite: PHYS161. And ENME272; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME208 Introduction to Automotive Engineering and Design (2 Credits)

Selected concepts in automotive engineering and design at the introductory level utilizing the Terps Racing Baja SAE student project as a learning instrument. This class compliments ENME408, Automotive Design, which focuses on the Terps Racing Formula SAE car.

Prerequisite: ENES100.

Recommended: ENES220; and ENES221.

Restriction: Permission of ENGR-Mechanical Engineering department.

Repeatable to: 4 credits if content differs.

ENME272 Introduction to Computer Aided Design (2 Credits)

Fundamentals of CAD, using solid modeling packages (Pro/E, SolidWorks, and Autodesk Inventor). Two and three dimensional drawing. Dimensioning and specifications. Introduction of CAD based analysis tools. Students will complete a design project.

Prerequisite: Must have completed or be concurrently enrolled in MATH141.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME414 or ENME272.

ENME289 Exploring Topics in Mechanical Engineering (2 Credits)

Introductory Design Topics in the Field of Mechanical Engineering.

Repeatable to: 4 credits if content differs.

ENME299 Topics in Mechanical Engineering (1-3 Credits)

Introductory topics in the field of mechanical engineering.

Restriction: Permission of ENGR-Mechanical Engineering department.

Repeatable to: 6 credits if content differs.

ENME299Q Quantum Steampunk Science-Fiction Workshop (3 Credits)

Steampunk is a science-fiction genre in which futuristic technologies populate Victorian-era settings. Recently, steampunk has come to life in the scientific field of quantum thermodynamics. Thermodynamics, the study of energy, grew out of the Industrial Revolution. Two centuries later, quantum physics is transforming computing and cryptography. Quantum science is now revolutionizing 19th-century thermodynamics in quantum thermodynamics, which features quantum engines, automata, and more. Quantum thermodynamics inspired the growing subgenre of quantum steampunk. In this course, you will read science fiction, write quantum steampunk short stories, receive feedback, and critique classmates' writing. In parallel, you will learn about quantum physics, technologies, and thermodynamics.

Cross-listed with: ARHU270, CMSC298Q, PHYS299Q.

Credit Only Granted for: ARHU270, CMSC298Q, ENME299Q or PHYS299Q.

ENME331 Fluid Mechanics (3 Credits)

Principles of fluid mechanics. Mass, momentum and energy conservation. Hydrostatics. Control volume analysis. Internal and external flow. Boundary layers. Modern measurement techniques. Computer analysis. Laboratory experiments.

Prerequisite: ENES232 and ENES221.

Credit Only Granted for: BIOE331, ENCE305, ENFP300, or ENME331.

ENME332 Transfer Processes (3 Credits)

The principles of heat transfer. Conduction in solids. Convection. Radiation. Modern measurement techniques. Computer analysis.

Prerequisite: ENME331.

Credit Only Granted for: ENME332 or ENFP312.

ENME350 Electronics and Instrumentation I (3 Credits)

Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.

Prerequisite: PHYS271 and PHYS270.

ENME351 Electronics and Instrumentation II (3 Credits)

Continuation of ENME 350. Modern instrumentation. Basic circuit design, standard microelectronic circuits. Digital data acquisition and control. Signal conditioning. Instrumentation interfacing. Designing and testing of analog circuits. Laboratory experiments.

Prerequisite: PHYS271, ENME350, and PHYS270.

ENME361 Vibration, Controls and Optimization I (3 Credits)

Fundamentals of vibration, controls and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical description of system response, system stability, control and optimization. Optimal design of mechanical systems.

Prerequisite: ENES220, ENES221, and MATH246; and (MATH206 or ENME202).

Restriction: Must be in Engineering: Mechanical program.

ENME371 Product Engineering and Manufacturing (3 Credits)

Business aspects of engineering product development. Relationship of design and manufacturing. Product specification. Statistical process control. Design team development. The development process.

Prerequisite: ENES221; and (ENME392 or STAT400).

Restriction: Must be in Engineering: Mechanical program.

ENME382 Introduction to Materials Engineering (3 Credits)

Structure of materials, chemical composition, phase transformations, corrosion and mechanical properties of metals, ceramics, polymers and related materials. Materials selection in engineering applications.

Prerequisite: ENES100; and permission of ENGR-Mechanical Engineering department.

Corequisite: MATH241.

Recommended: PHYS261 and PHYS260.

Restriction: Permission of ENGR-Mechanical Engineering department.

Cross-listed with ENMA300.

Credit Only Granted for: ENMA300 or ENME382.

ENME392 Statistical Methods for Product and Processes Development (3 Credits)

Integrated statistical methodology for the improvement of products and processes in terms of performance, quality and cost. Designed experimentation. Statistical process control. Software application. Laboratory activities.

Prerequisite: MATH241.

ENME400 Machine Design (3 Credits)

Design of mechanical elements and planar machines. Failure theories. Design of pressure vessels, joints, rotating elements, and transmission elements. Kinematic structures, graphical, analytical, and numerical analysis and synthesis of linkages, gear trains, and flywheels are covered.

Prerequisite: Must have completed or be concurrently enrolled in ENME361.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME401 Entrepreneurial Design Realization (3 Credits)

The vision for this course, and an aspect that makes it unique, is to expose students to the opportunities and challenges of bringing a product design to reality (entrepreneurship). The emphasis is on environmentally and socially sustainable projects. The end-product of this course will be full-scale implementations or complete design "packages" that can be taken to potential stakeholders.

Cross-listed with: ENES401.

Restriction: Must have senior standing and permission of instructor.

Credit Only Granted for: ENME401, ENME489B or ENES401.

Formerly: ENME489B.

ENME406 Roller Coaster Engineering (3 Credits)

Engineering of roller coasters including: specifications, concept creation, structural design, car design, and safety. Course covers biomechanics and rider kinematics as well as manufacturing aspects.

Prerequisite: ENES220, ENES221, and ENME272. And ENME202; or MATH206.

Corequisite: ENME400.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME407 Sustainability, Climate Change and Renewable Energy Systems (3 Credits)

Countries around the world are developing innovative and sustainable solutions that not only help to protect the environment from the threats of global climate change, but that also can improve human health and quality of life. In this course students will explore solutions to climate change, as well as geothermal and hydroelectric energy systems and their applications.

Prerequisite: PHYS260; or permission of ENGR-Mechanical Engineering department.

Restriction: Students must have completed a minimum of 60 credits by the time they will enroll in this course.

ENME408 Selected Topics in Engineering Design (3 Credits)

Creativity and innovation in design. Generalized performance analysis, reliability and optimization as applied to the design of components and engineering systems. Use of computers in design of multivariable systems.

Restriction: Must be in Engineering: Mechanical program; and senior standing. Or permission of ENGR-Mechanical Engineering department.

Repeatable to: 6 credits if content differs.

ENME410 Design Optimization (3 Credits)

Introduction to the formal process of design optimization, including analytical and computational methods. Step by step design optimization techniques. Design optimization concepts, necessary and sufficient optimality conditions and solution techniques. Solution evaluation and tradeoff exploration.

Prerequisite: ENME271; or MATH206.

Restriction: Permission of ENGR-Mechanical Engineering department; and junior or senior standing.

ENME413 Bio-Inspired Robotics (3 Credits)

Fundamentals and applications of biologically inspired robots, traditional robots, and design and fabrication of biologically inspired robots.

Prerequisite: Must have completed or be concurrently enrolled in ENME351.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME413 or ENME489L.

Formerly: ENME489L.

ENME416 Additive Manufacturing (3 Credits)

Develop a comprehensive understanding of fundamental additive manufacturing, 3D printing approaches, including: extrusion-based deposition, stereolithography, powder bed-based melting, and inkjet-based deposition. Cultivate a design for-additive manufacturing skillset for CAD and CAM methodologies to produce successful 3D prints. Fabricate 3D mechanical objects using a variety of 3D printing technologies on campus. Execute a design project that demonstrates how additive manufacturing technologies can overcome critical limitations of traditional manufacturing processes.

Prerequisite: ENME331. And ENME272; or ENME414.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME417 Numerical Methods in Engineering (3 Credits)

Covers the fundamental aspects of how to apply analytical mathematical concepts to discrete data. The course is aimed at graduate students and senior undergraduate students in any area of engineering, and treats the material in a general manner that is not specific to any application or field of specialization.

Recommended: Senior standing.

Jointly offered with: ENME745.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME745, ENME808B, ENME417 or ENME489J.

Formerly: ENME489J.

ENME420 Energy Audit for Decarbonization and Sustainability Enhancement (3 Credits)

Provides students with fundamentals and applications of decarbonization of building systems for energy sustainability through energy audit and efficiency measures, renewable energy, and electrification. Topics covered include societal and economic motivations for de-carbonization of buildings; building energy auditing and energy consumption analysis; lighting systems and controls; heating/cooling and ventilation systems; integrated building automation systems; fundamentals of renewable energy for building applications; fundamentals of building electrification and energy storage devices; emerging technologies for building energy sustainability.

Prerequisite: ENES232 .

Corequisite: ENME332.

Restriction: Permission of the department.

Credit Only Granted for: ENME420 or ENME489I.

Formerly: ENME489I.

ENME421 Engineering Design Ideation (3 Credits)

Engineering Design Methods is a technical elective for engineering students who wish to improve their ability to produce design ideas (i.e., the ideation process) for further development into conceptual ideas. Ideation is the creative, idea generation activity that happens at the beginning of the conceptual design process. Ideation methods are often built around creativity improving strategies and are often designed for individual use prior to presenting the results in a team setting.

Prerequisite: Must have completed or be concurrently enrolled in ENME371.

Restriction: Junior standing or higher.

Additional Information: Ideally, this course should be taken prior to capstone design.

ENME422 Indoor Environment and Mechanical Systems (3 Credits)

Fundamentals of indoor air quality and its measurements. Exploration of air cleaning technologies for gaseous, particulate and infectious agent contaminants. Simulations of air flow and contaminants with multi-zone models to allow testing of both contaminant dispersion in buildings and effectiveness of air cleaning technologies.

Prerequisite: ENES232 and ENME332.

Jointly offered with: ENME753.

Credit Only Granted for: ENME422 or ENME753.

ENME423 Modern Climate Control and Building Energy Design/Analysis (3 Credits)

Fundamentals and design calculations of heat and moisture transfer in buildings; evaluation of cooling, heating and power requirements of buildings; building energy consumption simulations, use of alternative energy and energy conservation measures in buildings; fundamentals of fans/pumps and air/water distribution in buildings; introduction to refrigeration and energy systems for data centers and other mission-critical facilities.

Prerequisite: ENES232.

Corequisite: ENME332.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME424 Urban Microclimate and Energy (3 Credits)

Urban microclimate from the perspective of transient heat and mass transfer using building energy simulations for building clusters as well as LEED building certification criteria. The focus is on understanding building energy consumption and environmental impacts from the individual building scale to a neighborhood scale.

Prerequisite: ENES232; and must have completed or be concurrently enrolled in ENME332.

Jointly offered with: ENME742.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME424 or ENME742.

ENME425 Energy Conversion Systems for Sustainability (3 Credits)

Focus on energy sustainability with view on changing global energy availability and use. Addresses the objective of greatly reducing our dependence on the finite amounts of fossil energy sources available for our quest to achieve environmentally benign sustainable energy for green environment. The emphasis will be on sustainability issues, discussion on supply, demand and storage, energy transmission, global warming and carbon management, biomass-resources, uses and production of biofuels, national energy policy discussion, carbon emission, energy security and economics to ensure future energy needs can be met without compromising the ability of future generation to meet their own needs with due considerations to increase in global temperatures.

Prerequisite: ENES232.

Restriction: Permission of the Mechanical Engineering Department.

Credit Only Granted for: ENME489X or ENME425.

Formerly: ENME489X.

ENME426 Production Management (3 Credits)

The basic concepts and models needed to understand and design manufacturing systems, including the history of manufacturing, performance measures, queuing systems, variability, production planning and scheduling, lean manufacturing, and pull production control.

Credit Only Granted for: BMGT385 or ENME426.

ENME427 CSI Mechanical: Finding Reasons for Compromised Structural Integrity (3 Credits)

Understanding the causes of product failures including the political, societal, economic, environmental, and ethical impact of these failures, and the strategies to avoid, postpone, or mitigate them. Students will be encouraged to combine concepts from engineering, natural sciences, social sciences, and the humanities to address these complex issues. Basics of failure analysis, forensics, and reliability engineering and the scientific fundamentals underlying the most common types of failure. Issues of legal liability. Methods for monitoring the existing condition of a structure.

Prerequisite: ENES220 and ENME382.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME430 Fundamentals of Nuclear Reactor Engineering (3 Credits)

Fundamental aspects of nuclear physics and nuclear engineering, including nuclear interactions; various types of radiation and their effects on materials and humans; and basic reactor physics topics, including simplified theory of reactor critically.

Prerequisite: MATH246.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME431 Nuclear Reactor Systems and Safety (3 Credits)

Engineering, material and thermal aspects of light water reactors, fast reactors, high temperature gas reactors, heavy water moderated reactors, breeder reactors, advanced reactors including GEN IV designs. Evolution of light water reactor safety and regulation in the US that has culminated in the current body of regulations.

Prerequisite: MATH246.

Recommended: ENME430.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME432 Reactor and Radiation Measurements Laboratory (3 Credits)

Basics concepts of nuclear radiation and radiation detectors including types of radiation, radioactive decay, and interactions of radiation with matter.

Prerequisite: ENME430 and MATH246.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME433 Nuclear Reactor Design (3 Credits)

Principles of nuclear reactor engineering including nuclear reactor system design, materials, thermal-hydraulics, shielding, mechanical design, and safety analysis.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME433 or ENME489T.

Formerly: ENME489T.

ENME434 Engineering Quantum Systems and Sensors (3 Credits)

Designed for students interested in learning quantum mechanics from a technological perspective, illustrated through specific examples from quantum engineering at the nanoscale and from discrete quantum systems. The focus is not on textbook examples such as hydrogen atom solutions and angular momentum algebra. Instead, focus areas would be quantum sensors and systems, description and control of quantum noise, which should elicit particular appeal across many areas of engineering and physical sciences. The course will prepare students for emerging quantum technologies besides computing and cryptography that are part of the Quantum 2.0 revolution.

Prerequisite: PHYS270 and MATH141.

Recommended: Any MATH 240, MATH 461, MATH341, or ENEE290 or equivalent courses covering linear algebra, eigenvalues, and eigenvectors.

Jointly offered with: ENME692.

Restriction: Permission of Mechanical Engineering department.

Credit Only Granted for: ENME434 or ENME692.

ENME435 Remote Sensing Instrumentation (3 Credits)

Explores the fundamentals of remote sensing techniques including light detection and ranging (lidar), radar, and computer vision in the context of emerging technologies such as autonomous navigation, terrain modeling, and embedded smart devices.

Prerequisite: ENME351.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME435 or ENME489Y.

Formerly: ENME489Y.

ENME436 Renewable Energy (3 Credits)

Fundamentals, design/analysis tools, and state of the art renewable energy technologies. Energy resources and global perspectives of current and future energy demand/consumption trends, followed by prime renewable energy technologies, including wind, solar, hydro, geothermal, and ocean thermal energy conversion. Economics of renewable energy, energy conservation opportunities, CO2 capture and storage, and thermal energy storage.

Prerequisite: ENME331.

Restriction: Must be in a major within the ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME489K or ENME436.

Formerly: ENME489K.

ENME440 Applied Machine Learning for Engineering and Design (3 Credits)

Learn how to apply techniques from Artificial Intelligence and Machine Learning to solve engineering problems and design new products or systems. Design and build a personal or research project that demonstrates how computational learning algorithms can solve difficult tasks in areas you are interested in. Master how to interpret and transfer state-of-the-art techniques from computer science to practical engineering situations and make smart implementation decisions.

Prerequisite: ENME392; or permission of instructor.

Jointly offered with: ENME743.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME440 or ENME743.

ENME441 Mechatronics and the Internet of Things (3 Credits)

Mechatronics and the Internet of Things combines sensors, actuators, computation, and communication to realize integrated objects capable of robust Internet-based interfacing. Students will gain experience with circuit development, mechatronic systems, MicroPython coding, and Internet communication protocols using the ESP32 microcontroller platform. The project-focused course combines lectures and hands-on labs to drive learning at the convergence of mechanics, electronics, and software domains for IoT smart object development.

Prerequisite: ENME351.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME489B or ENME441.

Formerly: ENME489B.

ENME442 Information Security (3 Credits)

The materials presented are divided into three major components: overview, detailed concepts and implementation techniques. The topics to be covered are: general security concerns and concepts from both a technical and management point of view, principles of security, architectures, access control and multi-level security, trojan horses, covert channels, trap doors, hardware security mechanism, security models, security kernels, formal specifications and verification, networks and distribution systems and risk analysis.

Restriction: Must have Senior standing in engineering; and permission of ENGR-Mechanical Engineering department. Jointly offered with ENRE684 .

Credit Only Granted for: ENRE648J, ENME442, ENRE684, or ENPM808E.

ENME444 Assistive Robotics (3 Credits)

Fundamentals of assistive robots used in a wide variety of ways to help humans with disabilities. Three application areas will be covered: (1) Rehabilitation robotics to recover motor function from neurologic injuries such as stroke, (2) Prosthetics to enable mobility function in amputees, and (3) Social robotics for cognitive impairment and developmental disorders such as autism. Theory behind different control systems employed by assistive robotics, as well as the mechanical design, sensors & actuators, and user interfaces behind representative robots in the respective areas. Guidelines for designing assistive robots. Ethical and regulatory considerations in the design of assistive robots.

Prerequisite: ENME351; and must have completed or be concurrently enrolled in ENME462.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME445 Design for Reliability (3 Credits)

Failure prevention, accident prevention, design requirements analysis, designing right the first time, high system reliability, software reliability, manufacturing defect prevention, life cycle costs reduction, design reviews, managing the design for reliability, design trustworthiness, product durability, and writing good specifications are covered.

Restriction: Junior standing or higher.

ENME446 Medical Robotics (3 Credits)

The fundamentals of robot design, control and different areas of research regarding development are explored. Student will engage in a course project where they will learn to develop, build, and control a medical robot. Surgical robotics development and modeling of robotic systems, safety in medical robotics, haptics, ergonomics and surgery. Fundamentals of robot design and control. Kinematics. This proposal was approved through the Testudo Curriculum Management system.

Prerequisite: Must have completed or be concurrently enrolled in ENME361.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME489C, ENME808M or ENME446.

Formerly: ENME489C.

ENME454 Vehicle Dynamics (3 Credits)

The fundamentals of passenger vehicle and light truck design and vehicle dynamics are covered. The engineering principles associated with acceleration, braking, handling, ride quality, aerodynamics, and tire mechanics are discussed, as well as suspension and steering design.

Corequisite: ENME361 .

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME461 Control Systems Laboratory (3 Credits)

Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control familiarize them with the characteristics and limitations of real control devices. Students will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.

Prerequisite: ENME351 and ENME361.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENEE461 or ENME461.

ENME462 Vibrations, Controls, and Optimization II (3 Credits)

Continuation of ENME361 . Fundamentals of vibration, controls, and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical descriptions of system response, system stability, control and optimization. Optimal design of mechanical systems.

Prerequisite: ENME361.

Restriction: Permission of the Mechanical Engineering Department.

ENME464 Cost Analysis for Engineers (3 Credits)

An introduction to the financial and cost analysis aspects of product engineering. Introduces key elements of traditional engineering economics including interest, present worth, depreciation, taxes, inflation, financial statement analysis, and return on investment. Provides an introduction to cost modeling as it applies to product manufacturing and support. Cost modeling topics will include: manufacturing cost analysis, life-cycle cost modeling (reliability and warranty), and cost of ownership.

Prerequisite: ENME392; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME465 Probability-Based Design (3 Credits)

Review of probabilistic distributions, introduction to pseudo-random number generation, and algorithms to produce probability distributions using Monte Carlo simulation via Matlab and other approaches to best design probabilistic engineering problems.

Prerequisite: MATH206 and ENME392.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME466 Lean Six Sigma (3 Credits)

This course intends to provide in-depth understanding of Lean Six Sigma and its Define - Measure - Analyze - Improve - Control (DMAIC) Breakthrough Improvement Strategy. The emphasis is placed on the DMAIC process which is reinforced via application of semester long corporate projects and case study analysis.

Corequisite: ENME392; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of ENGR-Mechanical Engineering department.

ENME467 Engineering for Social Change (3 Credits)

Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.

Cross-listed with: ENES467.

Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering.

Credit Only Granted for: ENES467 or ENME467.

ENME470 Finite Element Analysis (3 Credits)

Basic concepts of the theory of the finite element method. Applications in solid mechanics and heat transfer.

Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME472 Integrated Product and Process Development (3 Credits)

Integration of product development with the development process. Design strategies. Product architecture. Design for manufacturing. Selection of materials. Design for assembly.

Prerequisite: ENME331, ENME361, ENME351, and ENME371; and must have completed or be concurrently enrolled in ENME332.

Restriction: Permission of the Department of Mechanical Engineering.

ENME473 Mechanical Fundamentals of Electronic Systems (3 Credits)

An understanding of the fundamental mechanical principles used in design of electronic devices and their integration into electronic systems will be provided. Focus will be placed on the effect of materials compatibility, thermal stress, mechanical stress, and environmental exposure on product performance, durability and cost. Both electronic devices and package assemblies will be considered. Analysis of package assemblies to understand thermal and mechanical stress effects will be emphasized through student projects.

Prerequisite: ENME351.

Jointly offered with: ENME690.

Restriction: Permission of the Department of Mechanical Engineering.

Credit Only Granted for: ENME473 or ENME690.

ENME476 Microelectromechanical Systems (MEMS) I (3 Credits)

Fundamentals of microelectromechanical systems (MEMS). Introduction to transducers and markets. MEMS fabrication processes and materials, including bulk micromachining, wet etching, dry etching, surface micromachining, sacrificial layers, film deposition, bonding, and non-traditional micromachining. Introduction to the relevant solid state physics, including crystal lattices, band structure, semiconductors, and doping. The laboratory covers safety, photolithography, profilometry, wet etching.

Restriction: Senior standing.

Credit Only Granted for: ENME476 or ENME489F.

Formerly: ENME489F.

ENME477 Microelectromechanical Systems (MEMS) II (3 Credits)

Fabrication of devices designed in MEMS I, including everything from mask printing through training on state-of-the-art fabrication equipment through device testing. In-depth understanding of MEMS devices and technologies, such as mechanical and electromagnetic transducers, microfluidics, and chemical sensors.

Prerequisite: ENME476.

ENME479 Selected Topics in Mechanical Engineering (1-3 Credits)

Covers current topics in mechanical engineering and related fields.

Restriction: Permission of the Department of Mechanical Engineering.

Repeatable to: 6 credits if content differs.

ENME480 Introduction to Robotics (3 Credits)

An introductory course in robotics that will educate students in the elementary concepts of robotics. The course will encompass both theory and experiments.

Prerequisite: MATH246 or ENES221; and (CMSC131, ENME202, ENAE202 or ENEE150).

Restriction: Must be in the Robotics and Autonomous Systems minor; or Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME480 or ENMT380.

ENME483 Physics of Turbulent Flow (3 Credits)

Specific problems of turbulent flow including automobile and truck aerodynamics and canonical flows including pipes, jets and boundary layers that are measured and simulated to gain basic understanding of turbulence. A goal of the course is to impart the necessary background for students to be able to critically assess and most effectively employ the turbulent flow prediction codes (e.g. Fluent) that are a mainstay of how turbulence is analyzed in modern industries.

Prerequisite: ENME331.

Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with ENME656. Credit only granted for: ENME483 or ENME656.

ENME484 Analysis of Turbulent Flow (3 Credits)

Relentless growth in the speed and size of supercomputers has encouraged the ever expanding use of numerical simulation in the practice of fluids engineering. For the flow past ground vehicles, in the urban grid, re-entering rockets, helicopters landing on ships at sea and countless other examples, the flow is turbulent, and simulation is becoming or will one day become the methodology of choice in analyzing and designing such technologies. The goal of this course is to give an introduction to the analysis of turbulent flow via simulation and the modeling that is used in its development. Among the questions to be considered: What can one hope to learn from flow simulation? What are the strengths of the approach and what obstacles inhibit its application? What kind of physical considerations are required in setting up simulations? How does one analyze the results of a simulation?

Prerequisite: ENME331.

Jointly offered with: ENME657.

Restriction: Permission of ENGR-Mechanical Engineering department.

Credit Only Granted for: ENME484 or ENME657.

ENME486 Computational Modeling, Simulation, and Interactive Visualization (3 Credits)

Creation of interactive graphic displays from the numerical simulation of mechanical engineering models. Brief description of each model provided, along with varied parameters to explore models' characteristics. Conclusions drawn from use of each interactive graphic. Mathematica language introduced and interwoven with the numerical simulation of the models, which will include: robotics and mechanisms, static response of beams, control systems, measurement systems, fluid flow, vibrations, geometric modeling, finite element analysis, and nonlinear phenomena.

Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME488 Special Problems (3 Credits)

Advanced problems in mechanical engineering with special emphasis on mathematical and experimental methods.

Restriction: Permission of ENGR-Mechanical Engineering department.

Repeatable to: 6 credits if content differs.

ENME489 Special Topics in Mechanical Engineering (3 Credits)

Selected topics of current importance in mechanical engineering.

Restriction: Permission of ENGR-Mechanical Engineering department.

Repeatable to: 6 credits.

ENMT - Mechatronics Engineering

ENMT301 Structural Dynamics (3 Credits)

An introduction to modeling and structural analysis of mechatronic structures subject to dynamic loading. It deals with preliminary analysis of primary structure for mechatronics components, including such topics as load determination, torsion, bending, shear, buckling, fatigue and thermal analysis of thin-walled structures. Emphasis is placed on solving problems by finding the differential equations of motion of model systems and solving these equations analytically or numerically in Matlab.

Prerequisite: Minimum grade of C- in ENES220.

Restriction: Must be in the Mechatronics Engineering program.

ENMT322 Discrete Signal Analysis (3 Credits)

Analysis techniques for simulating resonances and impedances in systems that couple physical interactions electrical, mechanical, magnetic and piezoelectric domains. Analysis applied to modeling the electro-magneto-mechano-acoustic domain interactions in traditional loudspeaker designs, and can be extended to the design of sensors, energy harvesters and actuators.

Prerequisite: Minimum grade of C- in MATH246.

Restriction: Must be in the Mechatronics Engineering program.

ENMT361 Mechatronics and Controls I (3 Credits)

Basic instrumentation electronics including DC electronics, AC electronics, semiconductors, electro-optics and digital electronics. Sensing devices used to carry out experiments including meteorology, machine tool measurements, bridge circuits, optical devices, and introduction to computer based data acquisition.

Prerequisite: Minimum grade of C- in PHYS270 and PHYS271.

Restriction: Must be in the Mechatronics Engineering program.

ENMT380 Intro to Robotics (3 Credits)

Introduces basic concepts for deployment of robotic systems in mechatronics. This course will introduce students to the elementary concepts in robotics, with emphasis on robotic manipulators. It will encompass both theory and laboratory components with programming on real manipulators.

Prerequisite: Minimum grade of C- in ENME202 or ENAE202; and minimum grade of C- in ENES221 and MATH246.

Restriction: Must be in the Mechatronics Engineering program.

Credit Only Granted for: ENMT380 or ENME480.

ENRE - Reliability Engineering

ENRE447 Fundamentals of Reliability Engineering (3 Credits)

Provides a general survey of the techniques of reliability engineering with a focus on theoretical basis and quantitative methods, with frequent examples of application. Topics include mathematical definition of reliability, probabilistic models to represent failure phenomena, statistical life models for non-repairable components, reliability data analysis, failure modes and effects analysis, risk analysis, and system reliability models including fault trees, event trees. Students will learn how to apply these techniques to problems related to engineering systems, with example cases for process plants, energy systems and infrastructure.

Prerequisite: Minimum grade of C- in MATH141 and MATH246.

Restriction: Must be in Mechanical Engineering, Aerospace Engineering, Civil Engineering, or Fire Protection Engineering; or must be in the Nuclear Engineering minor; or permission of department.

ENRE489 Special Topics in Reliability Engineering (3 Credits)

Selected topics of current importance in reliability engineering.

Prerequisite: Permission of ENGR-Mechanical Engineering department.

Repeatable to: 6 credits if content differs.

ENSP - Environmental Science and Policy

ENSP101 Introduction to Environmental Science (3 Credits)

One of two required courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on scientific ways of knowing; the systems, cycles, flows, and interfaces that characterize the atmosphere, lithosphere, hydrosphere, and biosphere; the analysis of human impacts on these systems; and the nature of scientific uncertainty and methods of quantifying environmental processes.

ENSP102 Introduction to Environmental Policy (3 Credits)

Second of two courses that introduce students to the topics studied and methods employed in environmental science and policy. Emphasis on the process of formulating, implementing, and evaluating policy responses to environmental problems, with particular attention to policy controversies related to scientific uncertainty, risk assessment, the valuation of nature, and distributional equity. May be taken before or after ENSP101.

Additional Information: May be taken before or after ENSP101.

ENSP250 Lawns in the Landscape: Environmental Hero or Villain? (3 Credits)

Examination of the lawn as an element in the anthropogenic landscape and its influence on global warming, regional air and water quality, ecological diversity, mammalian pesticide exposure and consumptive water use. Demographic and socioeconomic factors are examined in the context of being predictors of landscape aesthetic desires and lawn management behaviors. Policies that incentivize lawn alternatives or changes in lawn management behavior are discussed. Cross-listed with PLSC250.

Credit Only Granted for: ENSP250 or PLSC250.

ENSP305 Applied Spatial Analysis in Environmental Science and Policy (3 Credits)

Intended for students interested in pursuing career or graduate research opportunities that will include identifying/querying/processing environmental datasets, detailed spatial analysis of environmental data, and applications of predictive environmental modeling. Students will learn necessary skills to analyze and process environmental data through hands-on training in commonly used software and a series of topical case studies. Data analysis and data processing will be taught using publicly available real-world environmental data sets.

Prerequisite: GEOG373; or permission of Environmental Science and Policy Program.

Recommended: ENSP101 and ENSP102.

Restriction: Must have earned a minimum of 60 credits; and permission of Environmental Science and Policy program.

ENSP306 Fundamentals of Qualitative Research Methods for Environmental Studies (3 Credits)

An introduction to research design and methods, with an in-depth focus on qualitative research methods and application to environmental studies. Topics include: writing an appropriate research question, identifying relevant methods, submitting a proposal to the Institutional Review Board, choosing appropriate sampling approaches, conducting interviews, focus groups, ethnographies, analyzing textual data, and presenting qualitative results.

Recommended: ENSP101 and ENSP102.

Restriction: Junior standing or higher; and must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP330 Introduction to Environmental Law (3 Credits)

An overview of environmental law, from its common law roots to its role in the modern regulatory state, including an examination of major federal environment statutes and the policy debates inherent in them. Other areas covered include civil and criminal enforcement, standing to sue, land use control, and regulatory takings.

Recommended: ENSP101 and ENSP102.

Restriction: Junior standing or higher. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP340 Water: Science, Ethics, and Policy (3 Credits)

Exploration of the science, policy, and ethical aspects of water resource protection and management. Focus on water pollution, water availability, ecosystems, and sustainability

Recommended: ENSP101 and ENSP102.

Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP342 Environmental Threats to Oceans and Coasts: Towards an Integrated Policy Response (3 Credits)

An interdisciplinary study of the challenges of maintaining the health and vitality of oceans and coasts in the face of climate change, extreme weather, and other threats including pollution, and oil and gas development. Exploration of four broad themes: resource management, conservation and stewardship, pollution, and coastal zone management. Also, an analysis of current efforts to integrate these themes through ecosystem-based management; marine spatial planning; and related policy responses.

Recommended: ENSP101 and ENSP102.

Restriction: Must have earned a minimum of 60 credits. And must be a major in the Environmental Science and Policy program; or permission of Environmental Science and Policy program.

ENSP350 Energy Resources: Science and Policy in the 21st Century (3 Credits)

Energy resource production and consumption, including historical context, current trends in the U.S. and globally, and social and environmental implications. Includes fuel-source formation, history of use, modern trends in consumption, production, pricing and trade, reserves and resources, environmental and social impacts, future outlook and potential new technologies related to energy efficiency and conservation.

Prerequisite: ENSP101 and ENSP102.

Restriction: Must have earned a minimum of 60 credits; and permission of AGNR-Dean-Environmental Science & Policy Program.

Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENSP360 Every Drop Counts: Water, Food and Global Public Health (3 Credits)

In-depth interdisciplinary study of the public health issues related to water use for global food production. Topics will include accessibility and availability of safe water for agriculture worldwide, potential microbiological and chemical hazards in agricultural water, alternative water sources such as reclaimed wastewater and return flows, food safety approaches to managing agricultural water, and agricultural influences on surface and groundwater quality. Political, social, and economic factors relating to agricultural water will be addressed, with special focus on regions that are leaders in innovative water management and regions where access to clean water for agriculture is a major challenge.

Prerequisite: ENSP101 or MIEH300; or permission of department.

Cross-listed with: MIEH333.

Credit Only Granted for: MIEH333 or ENSP360.

ENSP370 Principles of Environmental Justice: Theory and Practice (3 Credits)

Explores the issue of environmental justice from the social science, policy, and legal perspectives. The course will begin with a theoretical foundation of environmental justice, and the historical, social and economic roots of environmental injustices and environmental racism. We will explore the different contexts within which environmental injustice manifests itself including domestic and international examples such as injustices in the food system, climate justice, environmental privilege, and urban environmental justice and pollution. We will study the ways in which people and communities have combated environmental injustices by looking at the history of the environmental justice movement, which was created to address the increasingly disproportionate impacts of environmental harms on low income populations and communities of color.

Recommended: ENSP101 and ENSP102.

Restriction: Junior standing or higher. Must be a major in the Environmental Science and Policy program; permission of Environmental Science and Policy program.

ENSP386 Internship (3-6 Credits)

Restriction: Must have internship proposal approved by the concentration advisor, the director of ENSP and the student's internship sponsor.

ENSP399 Special Topics in Environmental Science and Policy (1-3 Credits)

A substantive and specialized examination of contemporary issues in environmental science or policy.

Restriction: Must be in Environmental Science and Policy program; or permission of AGNR-Dean-Environmental Science & Policy Program.

Repeatable to: 12 credits if content differs.

ENSP400 Capstone in Environmental Science and Policy (3 Credits)

Integration of physical, biological, and social sciences with applications to environmental science and policy. Problem-solving and multi-disciplinary case study evaluations pertinent to contemporary and future issues related to the environment.

Prerequisite: ENSP101; and ENSP102.

Restriction: Must be in Environmental Science and Policy program; and senior standing; and permission of the Environmental Science and Policy Program.

ENSP489 Special Topics in Environmental Science and Policy (1-3 Credits)

A lecture and or laboratory series organized to study a selected phase of Environmental Science and Policy not covered by existing courses. Credit according to time scheduled and organization of the course.

Repeatable to: 6 credits if content differs.

ENSP499 Honors Thesis Research (1-6 Credits)

Individual research, thesis, and oral defense. The research project will be conducted under the supervision of a faculty member.

Restriction: Must be in the ENSP Honors program; and permission of AGNR-Dean-Environmental Science & Policy Program.

Repeatable to: 6 credits.

ENST - Environmental Science and Technology

ENST100 International Crop Production-Issues and Challenges in the 21st Century (3 Credits)

Examines the role of crop production in elevating humans out of poverty in developing countries. It will introduce students to the basic principles of plant and soil science underlying the international production of food crops and world food security. The role of multinational agencies such as the World Bank in the promotion of sustainable crop production using environmentally-sound technologies will also be discussed.

ENST101 Ecological Discovery and Natural Solutions (1 Credit)

The UMD Environmental Science and Technology (ENST) Department seeks to develop and apply scientific tools and processes to advance solutions to some of society's greatest environmental challenges. This seminar provides a unique and exciting opportunity to learn directly from faculty and researchers in the Department about what they study, teach, and share with society. Students will learn about the wide variety of research being conducted in the Department and how it relates to potential solutions to current environmental challenges. The course will cover research in the following areas: urban green spaces, aquaponics, bioenergy, wildlife management, aquatic toxicology, urban green spaces, wetland restoration, water resources, ecosystem health, soil chemistry, and more. It is anticipated that the course will include short visits to ENST laboratories and facilities. The course will also include information about academic, internship, and career opportunities related to ENST.

Credit Only Granted for: ENST499K or ENST101.

Formerly: ENST499K.

ENST115 Bats in Society: Human-Wildlife Relationships, Conflicts, & Solutions (3 Credits)

How might an understanding of human-wildlife conflicts shape our approach to disease, ecology, and conservation? Should we care that we are losing wildlife, like bats? Across the globe, human societies have significantly harmed bat populations both intentionally and unintentionally. This course will delve into different bat population crisis causes as well as current and potential solutions, while addressing complex human-wildlife conflicts that need to be considered while solving them. During the course, students will get hands-on experience using highly sophisticated bat acoustic technology to identify bats to species-level. Lecture and discussion sections will focus on bat ecology, management techniques, newest bat identification techniques, data interpretation, and scientific presentation skills.

Credit Only Granted for: ENST115 or ENST215.

Formerly: ENST215.

Additional Information: Students should expect to spend 1-3 hours across multiple nights deploying bat detectors (which will be provided by the instructor) at a location of their choosing. Safety protocols will be discussed and implemented.

ENST200 Fundamentals of Soil Science (4 Credits)

Study and management of soils as natural bodies, media for plant growth, and ecosystem components. Morphology, composition, formation, and conservation of soils. Chemical, biological, and physical properties are discussed in relation to the production of plants, the functioning of hydrologic and nutrient cycles, the protection of environmental quality, and engineering uses of soils.

Corequisite: CHEM131 and CHEM132; or permission of AGNR-Environmental Science & Technology department.

Credit Only Granted for: ENST200 or NRSC200.

Formerly: NRSC200.

ENST214 Introduction to Natural Resources Management (3 Credits)

Lectures, discussion, and readings in social, biological, and human dimension issues facing natural resource managers in the United States. Coverage will include history and philosophical discussions of fishery, wildlife, and forestry sciences; conservation and management; principles of community, habitat, and animal ecology and management; and interrelations of wildlife, fish, and forestry.

Prerequisite: BSCI160 and BSCI161; or permission of instructor.

Restriction: Must be in the ENST Natural Resources Management or ENSP Wildlife Ecology & Management programs; and must have completed less than 90 credits; or permission of instructor.

ENST233 Introduction to Environmental Health (4 Credits)

Examines how humans are affected by the quality of our air, water, soil and food supply as well as how human activities alter these survival necessities. Students will learn how the evolution and prosperity of human populations have resulted in degradation of our environment and the impact of environmental degradation on the health of people. The implications of individual and collective choices for sustainable food production, population management, and resource utilization will be explored.

ENST281 Computer Aided Design in Ecology (2 Credits)

Basics of Computer Aided Drawing (CAD) applied to design of constructed ecosystems. Use of campus stormwater wetland as case study.

ENST282 Ecological Innovation and Entrepreneurship (3 Credits)

Ecotechnology innovation is taught with design thinking, which uses an iterative cycle of developing customer empathy, learning ecological technology, appreciating environmental stewardship, brainstorming, rapid prototyping, user experience, testing and redesign. Environment entrepreneurship is based on the Lean Startup process, which uses customer discovery, encourages quick product development, reduces start-up costs, tests ideas quickly, and employs designed experiments. A multidisciplinary academic setting embraces designing, building, testing and marketing novel technologies that enhance the environmental needs of humans. Students will learn in an active environment that requires working creatively, collaboratively, diligently, and precisely to create a business model and tangible prototype for a new commercial product.

ENST301 Field Soil Morphology I (1 Credit)

This is a field-oriented course that introduces students to the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.

Restriction: Permission of AGNR-Environmental Science & Technology department.

Formerly: ENST308.

ENST302 Field Soil Morphology II (1 Credit)

This is the second field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.

Prerequisite: ENST301.

Restriction: Permission of AGNR-Environmental Science & Technology department.

ENST303 Field Soil Morphology III (1 Credit)

This is the third field-oriented course in a three course sequence that provides intermediate training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the Regional Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field.

Prerequisite: ENST302.

Restriction: Permission of AGNR-Environmental Science & Technology department.

ENST309 Advanced Field Soil Morphology (1 Credit)

This is a field-oriented course that provides advanced training for students in the techniques used to (1) describe soil morphology, and site and profile characteristics, (2) make land use interpretations based on soil characteristics, and (3) classify soils. This class is designed to prepare students for the National Collegiate Soil Judging Contest and for students to gain experience in the description and interpretation of soils in the field. Students will be exposed to a variety of soil landscapes and geology from outside of the northeastern U.S.

Prerequisite: ENST301.

Restriction: Permission of AGNR-Environmental Science & Technology department.

Repeatable to: 3 credits if content differs.

ENST333 Ecosystem Health and Protection (3 Credits)

Discussion of the philosophies, principles, and practices for assessing ecosystem health with emphasis on an ecosystem perspective rather than a human health perspective. Degradation associated with human activities will be emphasized. Topics will range from local to regional to global issues, including a discussion on global warming and its possible impacts on ecosystems. Concepts will be clarified using case histories from the Chesapeake Bay watershed.

Prerequisite: ENST233 or permission of instructor.

ENST334 Environmental Toxicology (3 Credits)

Concepts and case histories in ecotoxicology. Emphasis on origin and variety of environmental pollutants, routes of biological exposure, modes of toxicological action and effects on individual organisms, populations and ecosystems. Ecotoxicological issues in the Chesapeake Bay will be used as examples.

Prerequisite: CHEM131, CHEM132, and BSCI207; or permission of AGNR-Environmental Science & Technology department.

ENST360 Ecosystem Ecology (4 Credits)

The study of ecology has a long and interesting history, from early society's efforts to understand and alter their environment as a matter of survival to the challenges the modern world is facing that are global in scale. Through the course text, distributed supplemental chapter readings and an understanding of the scientific literature, this course will cover the essential concepts and principles of ecosystem ecology as well as its history and past and present controversies. Several of the basic methods and tools of field research and the applied management of ecosystems will be discussed and demonstrated with several field excursions in the natural environs of the DC area. Central to this course will be the understanding that modern human society is an integral part of nature, with the power to impact and influence elements of the natural world at multiple scales. An analysis of policy implications for the biosphere will be discussed.

Prerequisite: BSCI160 and BSCI161; or BSCI106.

Restriction: Must be in the Environmental Science and Technology major; or permission of instructor.

ENST373 Natural History of the Chesapeake Bay (3 Credits)

Consideration of the major groups of organisms associated with the Chesapeake Bay and current issues that determine humans' present and future uses for the Chesapeake and its biota.

Cross-listed with: BSCI373.

Credit Only Granted for: BSCI373 or ENST373.

ENST388 Honors Thesis Research (3-6 Credits)

Undergraduate honors thesis research conducted under the direction of an AGNR faculty member in partial fulfillment of the requirements of the College of AGNR Honors Program. The thesis will be defended to a faculty committee.

Restriction: Permission of AGNR-Environmental Science & Technology department.

Repeatable to: 6 credits if content differs.

ENST389 Internship (3 Credits)

Credit will be granted for practical work carried out by students placed in work environment related to their stated career goals. Students must do an in-depth study in some portion of the work experience and produce a special project or report related to this study. A student work log is also recommended. An evaluation from the external supervisor of the project will be required. Credit arranged with supervising faculty member.

Restriction: Must be in Environmental Sci & Tech program.

Repeatable to: 6 credits if content differs.

ENST403 Invasive Species Ecology (3 Credits)

We will examine ecological, evolutionary, and anthropogenic processes facilitating or resisting biological invasions, and consider their environmental, economic, and human health impacts. We will consider various management strategies to mitigate invasions and identify areas of future research. Field trips and detailed discussion of recent findings and controversies in the literature will help illustrate fundamental concepts of invasions among various ecosystems.

Credit Only Granted for: ENST403, ENST603, or ENST689R.

ENST404 Ecological and Natural Resources Ethics (3 Credits)

Bridges science and management with ethical theory and concepts to help scientists, regulators, and managers understand how to deal with potential ethical dilemmas that arise in natural resource and environmental management implementation and policy development.

Prerequisite: ENST214 and ENST360.

Recommended: ENST314, ENST410, and ENST460.

Restriction: Senior standing or higher. Jointly offered with ENST604.

Credit Only Granted for: ENST604 or ENST404.

ENST405 Energy and Environment (3 Credits)

Introduction to the role of energy in environmental and human-dominated systems. Discussion of the historical and modern production and consumption of energy. Introduction to energy systems computer simulation and energy auditing.

Prerequisite: MATH140 or MATH120; or must have completed MATH220.

Restriction: Junior standing or higher. And must be in Environmental Sci & Tech program; or must be in Environmental Sci & Tech: Ecological Tech Design program; or must be in Environmental Sci & Tech: Environmental Health program; or must be in Environmental Sci & Tech: Soil & Watershed Science program; or must be in Environmental Sci & Tech: Natural Resources Mgmt program. Jointly offered with ENST605.

Credit Only Granted for: ENST405, ENSP350, ENST605, or MEES698Z.

ENST410 Ecosystem Services: An Integrated Analysis (3 Credits)

The importance of our ecosystems and the services they provide will be discussed. Basic principles used to analyze ecosystem services will be discussed and applied using case studies & field exercises. Forestland, wetlands and our marine resources are increasingly recognized for their ecosystem services provided to society, to include clean air and water, wildlife habitat, biodiversity, carbon storage and pollination services. This course will prepare students to deal with the complex issues involved in understanding those and other ecosystem services and their importance to society and environmental sustainability. Slowly, new markets are emerging for these services. Students will analyze the ecological, policy and financial dimensions of enhancing, restoring, and sustaining ecosystem services. New and on-going government programs and private business ventures will be discussed.

Prerequisite: ENST360 or BSCI361; or permission of instructor.

Restriction: Must be in one of the following programs (Environmental Sci & Tech: Ecological Tech Design; Environmental Sci & Tech; Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci & Tech: Soil & Watershed Science; Environmental Sci & Tech: Environmental Health).

ENST411 Principles of Soil Fertility (3 Credits)

Soil factors affecting plant growth and quality with emphasis on the bio-availability of mineral nutrients. The management of soil systems to enhance plant growth by means of crop rotations, microbial activities, and use of organic and inorganic amendments.

Prerequisite: ENST200; or students who have taken courses with comparable content may contact the department. Jointly offered with ENS T611.

Credit Only Granted for: ENST411 or NRSC411.

Formerly: NRS C411.

ENST414 Soil Morphology, Genesis and Classification (4 Credits)

Processes and factors of soil genesis. Taxonomy of soils of the world by U.S. System. Soil morphological characteristics, composition, classification, survey and field trips to examine and describe soils.

Prerequisite: Must have completed or be concurrently enrolled in ENST200.

ENST415 Renewable Energy (3 Credits)

An overview of renewable energy technologies and their current applications. Emphasis will be placed on technological readiness, efficiency and sustainability of renewable energy alternatives.

Technologies include solar thermal, photovoltaics, biodiesel, ethanol, anaerobic digestion, wind, hydroelectric, and microbial fuel cells.

Prerequisite: CHEM131, PHYS121, and MATH113; or permission of AGNR-Environmental Science & Technology department.

ENST417 Soil Hydrology and Physics (3 Credits)

A study of soil water interactions: the hydrologic cycle; the unique properties of water and soil; the soil components and their interactions; the field water cycle; transport processes involving water, heat and solutes; human effects on soil and groundwater; as well as the measurement, prediction, and control of the physical processes taking place in and through the soil.

Prerequisite: ENST200; and (MATH113 or MATH115).

ENST421 Soil Chemistry (4 Credits)

The chemistry and composition of mineral and organic colloids in soils, including ion exchange, oxidation-reduction, acidity, surface charge, and solution chemistry. Lectures and readings pertain to plant nutrition, waste disposal, and groundwater quality.

Prerequisite: ENST200.

ENST422 Soil Microbial Ecology (3 Credits)

The interdisciplinary study of soil microorganisms and their interactions with the mineral matrix; resulting in processes such as nutrient cycling, decontamination, and natural product production. We will focus on the diversity of soil communities, their survival strategies, and the new strategies used to study these communities.

Prerequisite: ENST200; or 1 course in BCHM; or must have completed a course in microbiology; or students who have taken courses with comparable content may contact the department.

Jointly offered with: ENST622.

ENST423 Soil-Water Pollution (3 Credits)

Reaction and fate of pesticides, agricultural fertilizers, industrial and animal wastes in soil and water with emphasis on their relation to the environment.

Prerequisite: ENST200.

ENST430 Wetland Soils (3 Credits)

The soils of wetlands including hydrology, chemistry, and genesis are discussed. Federal and regional guidelines for wetland soils are covered with an emphasis on validating interpretations through field observations.

Prerequisite: ENST200.

Credit Only Granted for: ENST430 or ENST630.

ENST432 Environmental Microbiology (3 Credits)

Microorganisms are everywhere and mediate many of the processes that we observe everyday. These organisms are the unseen catalysts for numerous industrial processes and are critical to many emerging technologies and novel products. Environmental microbiologists ask: How do microorganisms in the environment benefit society? This course will answer this question by examining microbes in bioremediation, food safety, climate change, and biotechnology.

Prerequisite: CHEM131 and CHEM132.

ENST434 Toxic Contaminants: Sources, Fate, and Effects (3 Credits)

Study of the release to the environment, transport through natural compartments, persistence and ultimate fate of various classes of contaminants produced as a result of human activities. Topics will culminate in discussions of impacts to wildlife and human health. Students should emerge with a practical appreciation of the actual risks from exposure to a variety of environmental contaminants and an understanding of the environmental and human health implications of continuing the contaminating activities.

Prerequisite: ENST333 and ENST334.

ENST436 Emerging Environmental Threats (3 Credits)

Examine new and potential environmental concerns in the air, water, soil, space, and the built environment. Emphasis on studying the intrinsic links between ecosystem and human health. Topics will include climate change, resource consumption, biodiversity change, infectious disease, non-traditional pollutants, and other complex and significant environmental concerns.

Prerequisite: ENST233; or permission of AGNR-Environmental Science & Technology department.

ENST441 Sustainable Agriculture (3 Credits)

Environmental, social and economic needs for alternatives to the conventional, high-input farming systems which currently predominate in industrial countries. Strategies and practices that minimize the use of non-renewable resources.

ENST445 Ecological Risk Assessment (3 Credits)

Assessment of ecological impacts of perturbations on natural systems. Course will describe methods for estimating environmental impacts including extrapolating from laboratory and field data. The role of regulatory agencies and implications of scientific uncertainty on risk management will be covered.

Prerequisite: ENST360 or BSCI361; and (BIOM301 and ENST334). Or permission of AGNR-Environmental Science & Technology department.

ENST450 Wetland Ecology (3 Credits)

Plant and animal communities, biogeochemistry, and ecosystem properties of wetlands. Lectures are supplemented by field trips and in-class labs. Hands-on activities include identification of wetland plant species, wetland delineation, and collection and analysis of field data on wetland vegetation, soil, and hydrology. Wading boots (at least hip length) are strongly recommended.

Prerequisite: BIOM301 and ENST360, or equivalent courses in data analysis and ecology; or permission of AGNR-Environmental Science & Technology department.

Jointly offered with: ENST650.

Credit Only Granted for: ENST450, ENST650, or MEES650.

ENST452 Wetland Restoration (3 Credits)

Design, construction, and evaluation of wetlands restored or created to provide ecosystem services or to mitigate losses due to development. Topics include fundamental properties of wetlands, ecological restoration theory, site selection and goal-setting, design plans, practices for establishing wetland hydrology, substrate, and vegetation, and restored ecosystem monitoring.

Prerequisite: (BSCI160 and BSCI161; or BSCI106); and (BSCI362, ENST450, ENST360, or BSCI361).

ENST453 Watershed Science: Water Balance, Open Channel Flow, and Near Surface Hydrology (3 Credits)

Definition and delineation of watersheds based on the stream orders. Discussion of the principle of conservation of mass in the context of life cycles (water cycle, carbon cycle, photosynthesis, aerobic cycle, anaerobic cycle, and nitrogen cycle) as it relates to our Biosystem. Conceptual study of hydrologic cycle components and their prediction using empirical and physical-based models is covered. Role of water as the dynamic force within the context of its interaction with landscapes of diverse geology and land cover will be discussed. Elements of watershed management is discussed.

Prerequisite: MATH120, ENST200, GEOG306 or BIOM301.

Recommended: PHYS121.

Credit Only Granted for: ENST453 or ENST653.

ENST456 Spatial Analysis and Ecological Sampling (3 Credits)

Teaches ENST students ecological sampling methods and applied spatial analysis skills. Students will work in small groups on research projects they develop and test during the semester. Students will develop a research hypothesis, test their hypothesis, display it visually in QGIS, and analyze it with appropriate statistical methods in QGIS and R Studio culminating in a final presentation.

Recommended: GEOG306 and GEOG373.

Restriction: Senior standing or higher; and permission of instructor.

Additional Information: Students will need to provide an 8GB (or larger) thumb drive for data storage.

ENST460 Principles of Wildlife Management (3 Credits)

Ecological principles and requirements of wildlife as basis for management, and introduction to the scientific literature. Conflicts in wildlife management, government administration of wildlife resources, legislation, and history of the wildlife management profession.

Prerequisite: Must have completed two semesters of biology laboratory; and (ENST360; or BSCI361). Or permission of AGNR-Environmental Science & Technology department.

ENST461 Urban Wildlife Management (3 Credits)

Ecology and management of wildlife in urban areas. For students in biological sciences, geography, landscape design, natural resources management, recreation and urban studies. Planning, design, and wildlife conservation in landscape ecology. Public attitudes, preferences, and values, review of private conservation organizations.

ENST462 Field Techniques in Wildlife Management (3 Credits)

Hands-on experience with field techniques in wildlife management focusing on various methods of conducting indices, estimates, and censuses of wildlife populations. Includes capture and handling of amphibians, reptiles, birds, and mammals by use of drift fences, cover boards, mist nets, box traps, and dart guns.

Prerequisite: ENST460. And BSCI160 and BSCI161; or BSCI106. And BSCI170 and BSCI171; or BSCI105.

Recommended: ENST461.

Restriction: Permission of AGNR-College of Agriculture & Natural Resources.

ENST470 Ideas into Impact (3 Credits)

This will be a capstone-type course based around developing proposals for projects emphasizing research, monitoring, design, restoration, management, entrepreneurship, or other approaches to ecological or environmental questions, issues, or problems.

Restriction: Junior or Senior standing only; Permission of AGNR-Environmental Science & Technology department.

ENST472 Capstone (3 Credits)

This capstone course focuses on professional project preparation, presentation, and critical evaluation on environmental science research. Students will develop and present original projects and critique projects presented by others.

Restriction: Must be in a major within AGNR-Environmental Science & Technology department; and permission of AGNR-Environmental Science & Technology department.

Additional Information: This is the pinnacle course for students majoring in ENST and is therefore recommended in one of the students' final semesters.

ENST481 Ecological Design (4 Credits)

An advanced survey course on the field of ecological design. Principles of design are illustrated with case studies from biologically-based waste treatment systems, ecosystem management and sustainable development. Concepts covered include ecology, ecological engineering, nutrient cycling, energy, lifecycle analysis, and design process.

Technologies include treatment wetlands, living machines, anaerobic digestion, rain gardens, bioswales, bioremediation, algal turf scrubbers, and green building design.

Prerequisite: (MATH120 or MATH140; or must have completed MATH220); and (PHYS121 and CHEM131); and (BSCI361; or students who have taken courses with comparable content may contact the department). Or permission of instructor.

Jointly offered with: MEES681.

Restriction: Permission of AGNR-Environmental Science & Technology department.

Credit Only Granted for: ENST481, ENST681, or MEES681.

ENST485 Water Management in Urban Environment (3 Credits)

Historically, with the exception of certain locations, water has been available in sufficient quantities, and providing supporting infrastructure has been relatively straightforward. In urban areas, the concentration of people and the drastic changes in land use, have altered the fluxes of water, sediments, chemicals, and microorganisms. As the population increases and the number of large urban areas keeps growing (both in U.S. and internationally), managing water in urban areas is becoming more challenging. Water must be supplied for domestic, commercial, and industrial use, as well as irrigation and maintaining and enhancing local environments (e.g., urban streams). In addition, stormwater must be managed to prevent flooding and environmental damage, and used water, which contains organic matter, nutrients, and other constituents that can be extracted and reused, must be collected and managed. In this course we take a systems approach to urban water hydrology, engineering, planning and management. We will explore urban water cycle, urban runoff and drainage characteristics, urban water supply and demand, stormwater collection and treatment and designing best management practices. Additionally, we look at the climate impacts on the urban water cycle.

Prerequisite: MATH120, MATH130, MATH136, or MATH140.

ENST486 Senior Professional Experience (3 Credits)

Students will arrange an off-campus professional-level work experience related to Environmental Science and Technology (ENST) to develop expertise in a specific area of their ENST concentration curriculum. Classroom sessions will frame student experiences within the broader discipline of Environmental Science and Technology. This course will tie together current practices in the ENST career industry, proposal writing, critical analysis, and culminate in a final paper and presentation.

Prerequisite: ENST389.

Restriction: Must be in the Environmental Science and Technology program; and permission of AGNR-Environmental Science & Technology department.

Additional Information: The course has two types of activities: lecture and experiential learning. Students are expected to work on their professional-level experience for 90 hours and participate in a 2-hour lecture every other week, during the semester to develop their Senior Integrative Experience (SIE) project. Each student's research question, proposal methodology, analysis, paper, and presentation will follow learning outcomes of all ENST SIE course options.

ENST487 Environmental Conflicts and Decision Making (2 Credits)

Study major cases which focus on environmental science with concentration on the role and techniques of negotiation, collaborative decision making, and adaptive resource management as an environmental conflict resolution process.

Restriction: Senior standing. And must be in one of the following programs (Environmental Sci & Tech: Natural Resources Mgmt; Environmental Sci&Pol-Wildlife Ecology & Mgmt) ; or permission of AGNR-Environmental Science & Technology department.

ENST489 Research Experience (3 Credits)

An advanced research-based course in the field of environmental science and technology.

Restriction: Permission of AGNR-Environmental Science & Technology department.

Repeatable to: 6 credits.

ENST499 Special Topics in Environmental Science and Technology (1-4 Credits)

An independent study, and/or lecture, and/or laboratory series organized to study a selected phase of Environmental Science and Technology not covered by existing courses. Credit arranged with supervising faculty member.

Restriction: Permission of AGNR-Environmental Science & Technology department.

EPIB - Epidemiology and Biostatistics

EPIB300 Biostatistics for Public Health Practice (3 Credits)

An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.

Prerequisite: Minimum grade of C- in CHEM131 and CHEM132.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.

Credit Only Granted for: EPIB300, EPIB315 or HLTH300.

EPIB301 Epidemiology for Public Health Practice (3 Credits)

An examination of the discipline of epidemiology and its application to public health issues and practices, covering current epidemiological concepts and methods.

Restriction: Must be in Public Health Science program; or must be in Community Health program. And must have earned a minimum of 45 credits.

EPIB315 Biostatistics for Public Health Practice (3 Credits)

An examination of biostatistical concepts and procedures as they relate to contemporary issues in public health. Focus on applications, hands-on-experience, and interpretations of statistical findings in public health research.

Prerequisite: Minimum grade of C- in EPIB301; or must have completed or be concurrently enrolled in HLTH200.

Restriction: Must be in one of the following programs (Public Health Science; Community Health).

Credit Only Granted for: EPIB300 or EPIB315.

Formerly: EPIB300.

Additional Information: Course is cross-listed; students should check program advising information to determine which counts for their major. Note that EPIB300 (old number) is still offered for students under previous curriculum.

EPIB330 Introduction to Infectious Disease Epidemiology (3 Credits)

Introduces students to the study of infectious disease through the application of epidemiologic methods. Students will review how infectious diseases impact global health, and examine epidemiological concepts related to infectious disease. These concepts include infectious disease transmission, prevention and control; study design; and outbreak and epidemic investigations. Infectious disease topics of concern to public health professionals will be covered including the COVID-19 pandemic, sexually transmitted infections, foodborne infections, healthcare-acquired infections and neglected tropical diseases, and future trends in the field of infectious diseases.

Prerequisite: EPIB301.

EPIB399 Epidemiology and Biostatistics Independent Study (1-3 Credits)

The EPIB undergraduate independent study is an opportunity for undergraduates from other departments in the SPH or the university to work with an Epidemiology and Biostatistics faculty member on research or special projects that are based out of EPIB.

Restriction: Must have earned a minimum of 60 credits; and minimum cumulative GPA of 3.0.

Repeatable to: 6 credits if content differs.

EPIB400 Obesity: An Epidemiologic Perspective (3 Credits)

The epidemic of obesity, its causes and consequences, and issues related to energy balance will be covered. Students will characterize the obesity epidemic both nationally and internationally, compare and contrast the metrics of obesity, understand the biological consequences of different obesity phenotypes, and describe characteristics of the obesogenic environment. Throughout the course students will be introduced to the application of epidemiological methods to studies of obesity.

Prerequisite: 1 course with a minimum grade of C- from (EPIB301, HLTH301).

EPIB463 Introduction to Programming in R (3 Credits)

An introduction to basic programming in R; including principles, data analysis tasks such as the calculation of summary statistics and the creation of graphs; and the implementation of statistical analysis concepts such as T-tests, ANOVA and correlation.

Prerequisite: EPIB315.

Jointly offered with: EPIB695.

Credit Only Granted for: EPIB463 or EPIB695.

EPIB489 Special Topics in Epidemiology or Biostatistics (1-6 Credits)

Special topics in epidemiology or biostatistics.

Repeatable to: 6 credits if content differs.

FGSM - Federal and Global Fellows

FGSM310 Political Engagement and Advocacy (3 Credits)

An examination of questions and issues in the practice of political engagement and advocacy. Guest lecturers drawn from political, civic engagement, and advocacy arenas will visit class and participate in discussions.

Cross-listed with: HNUH318T.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH318T or FGSM310.

FGSM320 Public Health Policy (3 Credits)

An exploration of the major questions and issues facing the U.S. health care system as well as the formulation and implementation of health policy.

Cross-listed with: HNUH328T.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348P, HNUH328T or FGSM320.

Formerly: UNIV348P.

FGSM330 Homeland and National Security Policy (3 Credits)

An examination of the concept of U.S. homeland and national security, threats, and major vulnerabilities in the context of recent history.

Cross-listed with: HNUH338T.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348T, HNUH338T or FGSM330.

Formerly: UNIV348T.

FGSM340 Energy and Environmental Policy (3 Credits)

An examination of issues of energy and environmental sustainability through an investigation of policy-making in energy, climate change, and sustainable development.

Cross-listed with: HNUH348T.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348E, HNUH348T or FGSM340.

Formerly: UNIV348E.

FGSM350 Critical Regions and International Relations (3 Credits)

An examination of international relations and foreign policy challenges in critical regions.

Cross-listed with: HNUH358T.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH358T or FGSM350.

FGSM355 U.S. Intelligence and Policymaking (3 Credits)

Examines the role of intelligence in supporting U.S. security strategy and policy. Students will learn how the U.S. Intelligence Community (IC) is structured and organized, and will explore how intelligence is deployed to support the warfighter, diplomats, and senior-level decisionmakers.

The course emphasizes the development of critical thinking and analytic skills, as well as professional writing and oral presentation abilities that are necessary for successful work in national security organizations.

The course will feature guest lecturers from real-world practitioners to supplement course readings.

Cross-listed with: HNUH359T.

Restriction: Must be in the Global Fellows Program; and Permission of Department.

Credit Only Granted for: HNUH359T or FGSM355.

FGSM360 U.S. Diplomacy and Policymaking (3 Credits)

An examination of questions and issues in the practice of contemporary diplomacy and policy-making. Guest lecturers drawn from Washington policy-making and foreign service communities will visit class and participate in discussion.

Cross-listed with: HNUH368T.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH368T or FGSM360.

FGSM370 Science Diplomacy: Foreign Policy & Science, Technology, and Innovation (3 Credits)

An exploration of the critical roles scientific knowledge and technological innovation play in the formation and implementation of foreign policy issues, including energy and climate change, public health, space and innovation, and economic development.

Cross-listed with: HNUH378T.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV389F, HNUH378T or FGSM370.

Formerly: UNIV389F.

FGSM380 Responses to Global Challenges (3 Credits)

An examination of global issues and responses primarily from the perspective of the practitioner. The focus will be on social, humanitarian, and human rights issues in different global contexts.

Cross-listed with: HNUH388T.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV389B, HNUH388T or FGSM380.

Formerly: UNIV389B.

FGSM390 Global Health Challenges and Water Security (3 Credits)

An examination of questions and issues of global health and water security. Expert practitioners will also visit class and participate in discussions.

Cross-listed with: HNUH398T.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH398T, HONR378M, or FGSM390.

FGSM398 Federal and Global Experiential Learning (3-9 Credits)

This is the experiential course component of the Federal Fellows Program and Global Fellows Program.

Cross-listed with: HNUH398P.

Restriction: Permission of instructor.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: FGSM398 or HNUH398P.

FIRE - First-Year Innovation & Research Experience

FIRE120 FIRE SEMESTER 1 (3 Credits)

Engages the research process through the design, research, collaborative authorship and iterative review-based refinement of research proposals.

Students find and analyze primary literature, think creatively, author and communicate research proposals in a scholarly fashion and work collaboratively to solve scientific and societal problems using technology, delegation and productive team communication.

Additional Information: This is the first course in the FIRE (First-Year Innovation & Research Experience) program sequence.

FIRE198 FIRE SEMESTER 2 (2 Credits)

This is the second course in the FIRE (First-Year Innovation & Research Experience) program sequence. Students in this course join a research stream and gain discipline-specific training in that lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.

Recommended: FIRE120.

FIRE298 FIRE Semester 3 (3 Credits)

Capstone course in the FIRE (First-Year Innovation & Research Experience) program sequence. Students in this course transition from trainee to practitioner in their lab. This course focuses on the concepts related to the process of independent research including collaboration with peers, communication of ideas, troubleshooting unexpected outcomes, and discipline-specific methodologies.

Prerequisite: FIRE198.

Repeatable to: 3 credits.

FIRE398 FIRE Research Leadership (1-3 Credits)

Earn academic credit for the time spent supporting, mentoring, and leading students in FIRE Research streams.

Prerequisite: FIRE298.

Repeatable to: 12 credits.

FMSC - Family Science

FMSC110 Families and Global Health (3 Credits)

Students will explore, define, and study global health, social determinants of health, health inequalities, gender inequality, family violence, and maternal and child health using a global perspective.

FMSC111 Credit Cards and College Students (1 Credit)

Provides college students with factual information about basic money management skills, emphasizing the responsible use of credit, specifically credit cards. Topics will include financial goals, spending plan, wise use of credit, debt management, consumer credit protection, and ID Theft. Online lessons will include video clips and interactive class activities. Students will learn the basics to build a strong financial future.

Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.

Credit Only Granted for: FMSC111, FMSC341 or FMSC498D.

Formerly: FMSC498D.

FMSC123 Personal Financial Literacy: From Distress to Success (3 Credits)

Exploring strategic thinking, career, education, financial planning during college years as the foundation for success in living a meaningful life. While introducing relevant institutions and tools techniques that are critical for financial planning, this course applies value-based goal setting and strategic planning that inform individuals' paths for a successful career, educational attainment, and optimum (mental, physical and financial) wellbeing throughout their life cycle. The course particularly emphasizes the individual's responsibility of living in an institution rich society, where, continuous learning, understanding institutions, rational decision-making, valuing relationships and networking, early career development, record keeping, budgeting, generating income and wealth, purposeful spending, saving and investing, tax planning, appropriate use of loans, risk taking and insurance, and retirement planning are well rewarded and ensure the optimum use of college years and the rest of life-course.

FMSC170 Modern Families (3 Credits)

What is a Family? Engage in examination of the current trends and controversial issues in family life, including issues of marriage, reproductive technologies, adoption, child custody, remarriage, and marital violence.

Credit Only Granted for: FMSC170 or FMSC298F.

Formerly: FMSC298F.

FMSC177 U SAD? Coping with Stress, Anxiety, and Depression (1 Credit)

Students on UMD campus experience new challenges to their mental health and well-being every semester, and there are limited resources to help students manage their own health or to support their peers. This experiential skill development workshop course is designed to assist students in developing their knowledge in ways to recognize, manage, and cope with symptoms of stress, anxiety, and depression. There is a focus on coping with pandemic-related and course-related concerns, relationship issues, and a range of other student concerns.

FMSC186 Family Law and Ethics in Assisted Reproduction (1 Credit)

For students interested in studying the law, public health and/or family science, this course examines the cutting-edge law and ethics of assisted reproduction including the technologies of sperm and egg donation, in vitro fertilization, surrogacy, and reproductive organ transplants, and the impact on families.

FMSC190 Man Up! Where Are The Fathers? (3 Credits)

An examination of changing fatherhood roles, health, and inequality in diverse families. Focus will be on masculinities and disparities among men by race and class; provider role expectations; and trauma and violence faced by men in contemporary society.

FMSC215 Foster Care and Adoption; Law, Policy, and Family (1 Credit)

In this Student Initiated Course, students will examine their preconceived notions of foster care and adoption as they work to become agents for change in the systems. Regular guest speakers will share their experiences. Along with your student instructor you'll explore various outcomes of the systems including trauma, mental health and later-life outcomes. Your faculty instructor will encourage you to critically think about legal and policy issues, both in Maryland and internationally, like the foster to prison pipeline and adopting from other cultures. Students will examine contentious issues like legal interventions, LGBTQ, Native American Indian, transracial, religious and others relating to the systems and the socioeconomic impacts on families. Classes are student-driven and discussion-based, allowing students to explore ethical considerations and possible life paths.

FMSC260 Couples, Marriage, and Families: Intimate Relationship Across the Life Course (3 Credits)

Covers the different aspects of couple relationships and family life. This includes common problems in couple relationships, and resources to strengthen couple and family relationships. You will also learn about stages of relationships, theories of love and family, policy related to couples and family formation, and how research is conducted with couples and families. Together, we will discuss and explore issues that couples and families face in modern times and will consider how many of these issues have changed due to policy, technology, attitudes, and a variety of other societal factors that impact relationships in the 21st century. You will also learn important methods of strengthening current and future relationships.

FMSC265 Teaching Menstrual Health: Dispelling Myths and Misconceptions (3 Credits)

Provides a platform to teach UMD undergraduate students and BHU Bachelor of Education students about the intersections of gender, culture, and health. We will explore how menstruation is addressed in different cultures and uncover myths and misconceptions that impact individuals, their families and communities. Furthermore, the course emphasizes the health cost (physical and mental) of not educating youth about this vital process and discusses the need for an intervention. The course provides essential skills to participating students for the development of an intervention. Key concepts include: theoretical understanding of menstrual health and its impact on girls and women's lives from cross cultural perspectives, the importance of deconstructing myths and misconceptions and the importance of educating both girls and boys; cultural taboos and patriarchal power relations that contribute to myths, misconceptions and practices; public health interventions addressing the cost of ignoring adolescent health issues including menstrual health; the impact of providing agency to young girls and boys to challenge the status-quo; and links between knowledge about menstruation, human rights, gender equality and the SDGs.

FMSC270 Sex, Drugs, and Social Media: Adolescent Health and Development (3 Credits)

This course will ask: How can families, schools, communities, and society help adolescents to navigate contemporary stressors and develop into physically and mentally healthy adults? To do this, we will use research, and an understanding of adolescent development, to explore and analyze issues affecting the health and behavior of American adolescents. Such issues include (but are not limited to) sex education, the role of social media in mental health, substance use, policing in schools, dating violence, suicide prevention, access to sexual and reproductive health care, and school start times. We will consider how adolescent well-being is shaped by social contexts, including the role of parents and family members, peers, schools, communities, social media, and culture. We will examine policies and programs that affect adolescents, how effective they are at promoting adolescent health, and how they might be improved to better support healthy adolescent development.

FMSC280 Global, Child & Family Health: Getting There Via E-Communications (3 Credits)

Students will learn about global maternal, child and family health issues and how these issues may affect their lives. Interdisciplinary teams of students will collaborate to develop programs aimed at improving global family health through the use of information and communications technologies.

Credit Only Granted for: FMSC280 or FMSC289G.

Formerly: FMSC289G.

FMSC286 Assisted Reproduction Law and Policy in the US and Brazil (3 Credits)

In this Global Classroom, U.S. students will work synchronously online with their international partners in Brazil to critically think about cutting-edge ethical, legal, policy and scientific issues in the field of Assisted Reproduction Technologies (ART) in the two countries. This course looks at conventional families created in unconventional ways to examine such topics as sperm and egg donation, in vitro fertilization, surrogacy, reproductive organ transplants and more - while considering the social, cultural, racial, religious, economic, or socioeconomic contexts that influence each. Students will work with their foreign peers in small groups to compare ART in each country and then create proposed legislation for either the U.S. or Brazil which their international group will present online to their colleges and submit to the country's legislators. In so doing, students will be challenged to think critically and see their place in creating actionable change in a global society.

Credit Only Granted for: FMSC186 or FMSC286.

Additional Information: This is a global classroom course where students will learn online, meet once a week in a synchronous class on Webex with their Brazilian classmates, and work individually via Webex in small international groups.

FMSC289 Special Topics in Family Science (3 Credits)

Topics of special interest under the general guidance of the Department of Family Science.

Repeatable to: 9 credits if content differs.

FMSC290 Family Economics (3 Credits)

Application of economic methodology to study families under various economic situations. Examination of how decisions about marriage, divorce, fertility, consumption and time use are influenced by labor/housing markets, tax structure, social welfare benefits and other economic considerations.

Credit Only Granted for: FMSC290 or FMST290.

Formerly: FMST290.

FMSC298 Special Topics in Family Science (1-3 Credits)

Topics of special interest under the general guidance of the Department of Family Studies.

Repeatable to: 12 credits if content differs.

Formerly: FMST298.

FMSC302 Research Methods in Family Science (3 Credits)

Introduction to the methods of the social and behavioral sciences employed in family science. The role of theory, the development of hypotheses, measurement, design, and data analysis.

Prerequisite: Must have completed an introductory statistics course.

Restriction: Must be in a major within SPHL-Family Science department.

Credit Only Granted for: FMSC302 or FMST302.

Formerly: FMST302.

FMSC310 Maternal, Child and Family Health (3 Credits)

Overview of the major issues in Maternal, Child, and Family Health in the U.S. and the world. The course will cover the social, political, environmental, and economic factors that shape the health of women, children, and families throughout the life course. It will employ the core disciplines of public health – 1) epidemiology/biostatistics, 2) environmental health, 3) health policy and administration, and 4) social and behavioral health – to examine these factors. The course introduces specific issues and interventions and places these issues and interventions within their broad sociohistorical context.

Credit Only Granted for: FMSC310, FMSC410 or FMSC498A.

Formerly: FMSC498A and FMSC410.

Additional Information: A comprehensive understanding of maternal, child, and family health, with additional emphasis on environmental health, needs assessment and evaluation, enabling students to more effectively address issues in the workplace.

FMSC330 Family Health: Health Happens in Families (3 Credits)

The objective of this gateway course is to help you understand and apply basic theories and empirical data on family health. The course is designed to provide you with skills to think critically about theories including: Life Course Theory, the Bio-Ecological and Social-Ecological Models, and Systems Theory. We will ask questions about the distinct qualities and intersections of contexts and characteristics that impact the functioning of families. We will apply theory and research to topical issues in family health that are impacted by social structures such as conflict, crisis, migration, incarceration and inequalities.

Restriction: Junior standing or higher.

FMSC332 Children in Families (3 Credits)

A family life education approach to the study of children and families. Emphasis on the interaction of children with parents, siblings, extended kin, and the community.

Prerequisite: PSYC100 or FMSC105.

Credit Only Granted for: FMSC332 or FMST332.

Formerly: FMST332.

FMSC340 Mental Health and Healing in Families (3 Credits)

Using an interdisciplinary approach to study mental health, mental wellness, and substance use, we will answer questions such as: How has our understanding and treatment of mental health changed throughout history? What are the current prevalence patterns and risk factors associated with mental health conditions? What is the prevention to postvention continuum? What is the role of relationships, families, and communities in addressing mental health? How do we diagnose and treat various mental health disorders using the best available research? And, what are the various mental health disciplines and how do they differ? This course is designed to examine mental health issues across the life course. We will explore the influence of social contexts, including racism and additional forms of othering, on mental health and wellness, and introduce the health systems that support mental health prevention and treatment.

FMSC341 Personal and Family Finance (3 Credits)

Individual and family financial strategies with emphasis on financial planning, savings, investments, insurance, income taxes, housing, and use of credit. Planning, analyzing, and controlling financial resources to resolve personal/family financial problems and to attain financial security.

Credit Only Granted for: FMSC341 or FMST341.

Formerly: FMST341.

FMSC374 Working with Diverse Families in Public Health Services (3 Credits)

Focuses on the "doing" and modeling of skills required in navigating diverse social environments with families. These skills are necessary to engage in authentic work as family scientists, public health professionals, and family health practitioners. Using an intersectional framework, we will examine cultural, ethnic, and linguistic diversity for families impacted by challenges to equity and privilege. The course material emphasizes deep knowledge and skill building towards cultural sensitivity, including history, values, language, religion, and communication with families across multiple racial and ethnic backgrounds. Students will also explore differences emerging from experiences of poverty, sexual orientation and gender identity, and disability. The goal of the course is to support students in developing a family/professional alliance for health and well-being.

Prerequisite: FMSC110.

FMSC381 Family Inequality (3 Credits)

Social, political, cultural and economic factors influencing income and wealth in American families.

Prerequisite: SOCY100 or SOCY105.

Restriction: Must be in a major within SPHL-Family Science department.

FMSC382 Family Mediation and Negotiation (3 Credits)

Investigates mediation as a forum of peaceful intervention. It is designed to provide students with an introduction and basic understanding of the essential principles of mediation and opportunities to put those principles to work. In so doing, students will obtain an in-depth knowledge of a practical "hands on" approach to divorce mediation as the conduct mediation skill builders and facilitate a successful mediation. Students will learn major mediation interventions and how such interventions may help establish a new dynamic among family members in their communications and relationships. To assist in understanding, we will discuss family law issues and ethics. The course also includes a focus on negotiation theory and skills and students will conduct a negotiation. We will use multi-media presentations, real life mediation observation, lecture and class discussion, role-play, and academic review and critic to reach the course goals and objectives.

Recommended: FMSC487 and FMSC341.

Credit Only Granted for: FMSC498M or FMSC382.

Formerly: FMSC498M.

FMSC383 Health and Human Services Delivery and Evaluation (3 Credits)

Processes of service delivery with special emphasis upon relationships among managers, service providers and clients. The impact of human service systems on families.

Prerequisite: FMSC330.

Restriction: Must be in a major within SPHL-Family Science department.

FMSC386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of SPHL-Family Science department.

Restriction: Junior standing or higher.

Credit Only Granted for: FMSC386 or FMST386.

Formerly: FMST386.

FMSC399 Independent Study (1-6 Credits)

Prerequisite: Permission of SPHL-Family Science department.

Repeatable to: 12 credits.

Formerly: FMST399.

FMSC420 African American Families (3 Credits)

Examination of the history, structure, cultural foundation, and diversity of African American family life is the focus of this class. Presentations and discussions enable students to identify, analyze, and assess: (1) the major theoretical perspectives used in the study of African American families; (2) the impact of social policy on African American families; and (3) specific areas of family life (e.g., marriage and divorce, parenting, child development, health disparities).

Recommended: FMSC330.

Credit Only Granted for: FMSC420 or FMSC498F.

Formerly: FMSC498F.

FMSC430 Gender Issues in Families (3 Credits)

The development of historical, cultural, developmental, and psychosocial aspects of masculinity and femininity within the context of contemporary families and the implications for interpersonal relations.

Prerequisite: SOCY100, SOCY105, or PSYC100.

FMSC431 Family Crises, Emergencies and Interventions (3 Credits)

Examines the stressors in life that may lead families into a state of crisis or emergency and what can be done to help families when the need arises. Both internal stressors, such as substance abuse, finances, divorce, illness or parent-child conflict, and external stressors, such as community violence and natural disasters, are examined. Using theories and techniques for intervention and enhancement, the course examines factors involved in stressors turning into a family crisis and how factors such as emergency preparedness, social support and public policy can be a source of family resilience or protect families from negative outcomes.

Prerequisite: PSYC100.

FMSC432 Adult Development and Aging in Families (3 Credits)

Theory, research, history, and programming related to adult development and aging in the intergenerational context of family.

Prerequisite: PSYC100; and (SOCY100 or SOCY105). And FMSC332; or must have completed a comparable development course.

Restriction: Must be in a major within SPHL-Family Science department.

Credit Only Granted for: FMSC432 or FMST432.

Formerly: FMST432.

FMSC440 Death and Loss in Family Life (3 Credits)

Examination of how families experience grief and loss resulting from the death of a family member, including health and financial consequences. Overview of historical, social, psychological, cultural, medical, and legal dimensions of death in families from diverse backgrounds. Exploration of how the health care system and funeral home industry assist families in managing death and loss.

Recommended: Moderate level of computer literacy, especially Internet and ELMS. Reliable computer and Internet access.

Credit Only Granted for: FMSC440 or FMSC498B.

Formerly: FMSC498B.

FMSC445 Sexuality: Issues in Family Therapy and Service Delivery (3 Credits)

Typical, dysfunctional, and pathological sexual functioning, including effects on individuals, couples, and family systems. Sensitizes students to sexual issues, explores how perceptions of such issues affect work with people, and emphasizes implications for marriage and family therapy.

Prerequisite: A basic course in human sexuality; and permission of instructor. Jointly offered with FMSC645.

Credit Only Granted for: FMSC445 or FMSC645.

FMSC460 Violence in Families (3 Credits)

Theories of child, spouse, and elder abuse in the family setting. Emphasis on historical, psychological, sociological and legal trends relating to physical, emotional, and sexual abuse. Introduction to methods for prevention and remediation.

Prerequisite: SOCY100, SOCY105, or PSYC100.

Credit Only Granted for: FMSC460 or FMST460.

Formerly: FMST460.

FMSC477 Internship and Analysis in Family Science (3 Credits)

A supervised internship and a seminar requiring analysis. Opportunities to integrate theory and practice including 120 hours of contracted field experience. Summer or fall internship contracts due May 1; Spring contracts due December 1. See department for application procedures.

Prerequisite: FMSC383; and 9 credits in FMSC courses; and permission of SPHL-Family Science department.

Restriction: Must be in a major within SPHL-Family Science department.

Credit Only Granted for: FMSC477, FMST347, or FMST477.

Formerly: FMST477.

FMSC485 Introduction to Family Therapy (3 Credits)

The fundamental theoretical concepts and clinical procedures of marital and family therapy including premarital and divorce therapy issues.

Prerequisite: FMSC330; or 1 course from PSYC300-499 course range.

Credit Only Granted for: FMSC485 or FMST485.

Formerly: FMST485.

FMSC486 Law, Public Health and the Cuban Family (4 Credits)

A short-term summer study abroad course that is a comparative law and public health course. Students travel to Havana, Cuba to compare family problems in a capitalist versus socialist society within the context of legal, public health, social, cultural and economic changes.

Recommended: FMSC487.

Jointly offered with: FMSC686.

Credit Only Granted for: FMSC486, FMSC686 or MIEH698B.

Additional Information: This is a study abroad course which will primarily occur in Cuba. Additionally, the course involves an online component prior to and following the trip.

FMSC487 Family Law (3 Credits)

Designed for students interested in studying the law, public health, and family science, this course provides students with a general overview of family law and the impact on healthy families. The course also includes the study of cutting-edge issues such as marriage equality, assisted reproduction and ethical issues that may arise.

FMSC498 Special Topics: Family Science (1-3 Credits)

Special course topics in family studies.

Prerequisite: Permission of SPHL-Family Science department.

Repeatable to: 6 credits if content differs.

Formerly: FMST498.

FREN - French

FREN103 Intensive Elementary French (4 Credits)

Covers speaking, reading, writing, listening, and culture of French-speaking world.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not have completed FREN102; and must not be a native/fluent speaker of French.

Credit Only Granted for: FREN102 or FREN103.

FREN169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

FREN203 Intensive Intermediate French (4 Credits)

Covers speaking, reading, writing, listening, and culture of French-speaking world.

Prerequisite: FREN103; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a native/fluent speaker of French.

Credit Only Granted for: FREN201 or FREN203.

FREN204 French Grammar and Composition (3 Credits)

Intensive study of French grammar and composition.

Prerequisite: FREN201 or FREN203; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Not open to native/fluent speakers of French.

FREN211 French Reading and Conversation (3 Credits)

Practice in spoken French at intermediate level based on readings in a variety of genres. Written homework and exams.

Prerequisite: FREN201 or FREN203.

Restriction: Must not be a native/fluent speaker of French.

FREN241 Women Writers of French Expression in Translation (3 Credits)

Works and ideas of 20th century women writers of French in Canada, Africa, the Caribbean and France. Taught in English.

FREN242 Francophone Writers of Africa and the African Diaspora (3 Credits)

An analysis of the works and ideas of 20th and 21st century Francophone writers (Africa, the Caribbeans, France). Taught in English.

FREN243 Masterpieces in French and Francophone Cinemas (3 Credits)

This course, taught in English, will present a large array of films directed by famous French directors (Jean Renoir, Robert Bresson, Jean-Luc Godard, Agnes Varda, etc.) and Francophone filmmakers (Arcand, Sembene) who were internationally known in their time and have had a considerable influence on today's filmmakers in the U.S. (Tarantino, Lynch, Lee, etc.) and abroad (Sissoko, Angelopoulos, VonTrier, etc.).

FREN250 Introduction to Cultural and Textual Analysis (3 Credits)

Introduction to cultural and textual analysis of selected readings from various genres in French literature. Taught in French.

Prerequisite: FREN204; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a native/fluent speaker of French.

Credit Only Granted for: FREN250 or FREN250H.

FREN269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

FREN298 Aspects of French Civilization (3 Credits)

Topic to be determined each semester. Historical or thematic approaches to French art, literature, and culture. Taught in English.

Repeatable to: 6 credits if content differs.

Additional Information: Credit may not be applied to French major.

FREN301 Composition and Style (3 Credits)

Grammatical analysis, elements of style; range of written genres.

Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a native/fluent speaker of French.

FREN302 Introduction to Translation (3 Credits)

Hands-on practice in translation to include a variety of formats and texts (for example, advertising, legal, technical, literary, journalistic, media...) into French and/or English. Includes an extensive overview of translation techniques, theories and approaches. Taught mainly in French.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN303 Translation: English to French (3 Credits)

Practicum in translation primarily from English to French; contrastive analysis.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN306 Commercial French I (3 Credits)

Introduction to commercial French including correspondence and business terminology. Emphasis on cross-cultural concepts needed for successful interaction within business settings. Taught in French.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN311 Advanced Oral Expression (3 Credits)

Linguistic and thematic analysis of written, audio, and visual texts. Focus on aural and oral skills. Some written assignments and evaluation.

Prerequisite: FREN250; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a native/fluent speaker of French.

FREN312 France Today (3 Credits)

Analysis and discussion of current events and institutions using various French media resources.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a native/fluent speaker of French.

FREN313 Current Issues in the French-Speaking World (3 Credits)

Analysis and discussion of current events and institutions in the French-speaking world using various French-language media resources with an emphasis on countries and regions outside of France.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN351 From Romanticism to the Age of Modernism and Beyond (3 Credits)

A survey of the chief authors and major movements of French literature from Pre-Romanticism to the present.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN352 From the Age of Epic and Romance to the Enlightenment (3 Credits)

A survey of the chief authors and major movements of French literature from the Middle Ages to the end of the 18th century.

Prerequisite: FREN301; or students who have taken courses with comparable content may contact the department.

FREN369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

FREN386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Junior standing or higher.

FREN387 Critical Writing on France and the French-Speaking World (3 Credits)

Intensive writing course based on focused study of issues and concerns drawn from French and Francophone literatures, films, and cultures.

Elements of style, review of grammar. Taught in French.

Prerequisite: FREN301.

Restriction: Not open to Native speakers.

FREN388 Language House Colloquium (1 Credit)

The Language House Colloquium is a one-credit course for students residing in the Language House Immersion Program. The course focuses on the further development of skills in the target language and the acquiring of cultural knowledge of the countries that speak the target language. The course is designed to supplement the learning that takes place on a daily basis in the Language House program.

Restriction: Must be a resident of Language House.

Repeatable to: 4 credits.

FREN399 Directed Study in French (1-3 Credits)

Advanced undergraduates develop syllabus, reading list, and course requirements with interested faculty member. Designed for in-depth study of material not offered in regular courses or as expansion of course material. To be planned during semester preceding registration.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 3 credits.

FREN407 History of the French Language (3 Credits)

Evolution of the French language from Latin to modern French. Taught in French.

Prerequisite: FREN351 or FREN352; or permission of ARHU-French & Italian Languages & Literatures department.

FREN414 French for International Relations (3 Credits)

Historically, French has played a key role in the development and organization of International Relations. It remains an important tool for diplomats and an official working language of major international organizations. Students will be introduced to the French vocabulary and terminology specific to diplomatic discourse and the field of International Relations. Through French-speaking media analysis and simulated work-related situations in an international context, students will learn how to pitch a project, present a country situation, give a thematic presentation, and engage in successful negotiations. Students will also acquire the skills and proficiency to understand and produce professional documents used in the International Relations field. Taught in French.

Prerequisite: FREN387.

FREN421 Francophone African Film (3 Credits)

Imaginary and Memory in the reality of Francophone African Film from 1960-present. Taught in English.

Cross-listed with: CINE421.

Credit Only Granted for: FREN421, CINE421 or FILM421.

Formerly: FILM421.

FREN423 Women and French Cinema (3 Credits)

Cultural identity, social boundaries and gender roles in French film as well as introduction to film textual analysis and diverse film theories (semiotics, film and psychoanalysis, feminist film theory, structuralism, narratology, spectatorship and cultural studies). Taught in English.

Cross-listed with: CINE423.

Credit Only Granted for: FREN423, CINE423 or FILM423.

Formerly: FILM423.

FREN429 Studies in French Literature and Culture of the Renaissance (3 Credits)

Selected topics in French literature of the Renaissance.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN439 Studies in 17th Century French Literature and Culture (3 Credits)

Selected topics in seventeenth-century French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN449 Studies in 18th Century French Literature and Culture (3 Credits)

Selected topics in eighteenth-century French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN459 Studies in 19th Century French Literature and Culture (3 Credits)

Selected topics in nineteenth-century French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN469 Studies in 20th Century French Literature and Culture (3 Credits)

Selected topics in twentieth-century French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN472 The Construction of French Identity II: From the Revolution to the Early Twentieth Century (3 Credits)

French life, customs, culture, traditions (1750 to the early twentieth century).

Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

FREN474 Contemporary France: A Sociocritical Approach (3 Credits)

A sociocritical approach to understanding modern French society through the study of print and non-print media documents (autobiography, film, and paraliterature), with reference to the Francophone world. Taught in French.

Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

Recommended: FREN473.

FREN478 Themes and Movements of French Literature in Translation (3 Credits)

Studies treatments of thematic problems or literary or historical movements in French literature. Topic to be determined each semester. Taught in English.

FREN479 Masterworks of French Literature in Translation (3 Credits)

Treats the works of one or more major French writers. Topic to be determined each semester. Taught in English.

FREN480 French Cinema: A Cultural Approach (in Translation) (3 Credits)

A study of French culture, civilization, and literature through the medium of film. Taught in English.

Cross-listed with: CINE420.

Credit Only Granted for: FREN480, CINE420 or FILM420.

Formerly: FILM420.

FREN482 Gender and Ethnicity in Modern French Literature (3 Credits)

Literature by women writers of France and other French speaking areas with a focus on the relationship between gender, ethnicity and writing. Taught in English.

FREN488 Special Topics in Francophone Studies (3 Credits)

Topic and language of instruction to be announced when offered.

Repeatable to: 9 credits if content differs.

FREN489 Seminar in Themes or Movements of French Literature (3 Credits)

Seminar on selected themes or movements of French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN495 Honors Thesis Research (3 Credits)

The writing of a paper under the direction of a professor in this department and an oral examination. Required to fulfill the departmental honors requirement.

Restriction: Must be admitted to the departmental honors program.

FREN498 Special Topics in French Literature (3 Credits)

Selected topics in French literature.

Prerequisite: FREN387; and (FREN351 or FREN352). Or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

FREN499 Special Topics in French Studies (3 Credits)

An aspect of French studies, the specific topic to be announced each time the course is offered.

Prerequisite: FREN387; or permission of ARHU-French & Italian Languages & Literatures department.

Repeatable to: 6 credits if content differs.

GEMS - Gemstone

GEMS100 Freshman Honors Colloquium: Introduction to Gemstone (1 Credit)

Orienting new Gemstone students to the university and to the program through a variety of team building activities, resources, and skill exploration exercises. Students will also examine and discuss areas such as liberal education, diversity, service, arts, current events, academic integrity, and leadership style.

Restriction: Must be in the Gemstone program.

GEMS101 Introduction to Team Research (3 Credits)

An introduction to the basic concepts and tools needed to evaluate and conduct research. It sets the stage for the research lifecycle and teaches students what they need to know and do before embarking on research endeavors. Students will engage in the early stages of the research process and navigate the consumption and analysis of primary literature while working on interdisciplinary teams. They will undergo the iterative process of identifying gaps in the literature and think creatively about how a team of undergraduates could contribute to solving the world's grand challenges while recognizing constraints such as feasibility, timelines, budgets, novelty, and more. Students will learn skills for collaboration and navigating interdisciplinary teams and together will author and communicate components of a preliminary research proposal.

Restriction: Must be in the Gemstone program.

GEMS102 Research Topic Exploration and Team Formation (1 Credit)

Under the guidance of staff and visiting speakers, students will develop research topics that they will pursue for the remainder of their participation in the Gemstone program, and form into interdisciplinary teams around these topics.

Restriction: Must be in the Gemstone program.

GEMS104 Topics in Science, Technology and Society (STS) (3 Credits)

An examination of how cultural, economic, political and social forces shape scientific and technological systems and, conversely, how scientific and technological systems have affected the culture, economies, organization and politics of societies. Students in the course will form small teams to carry out semester-long research on socio/technical topics related to the course theme chosen for that specific semester.

Prerequisite: GEMS100.

Restriction: Must be in the Gemstone program.

GEMS202 Team Dynamics and Research Methodology (2 Credits)

This experiential course is designed to foster an understanding of effective team dynamics and basic research methodology. It will teach skills applicable to Gemstone team research and the writing of a team thesis. Upperclass Gemstone students serve as discussion facilitators. Students participate in their Gemstone teams and develop a draft of their team thesis proposal.

Prerequisite: GEMS100, GEMS102, and GEMS104.

Corequisite: GEMS296.

Restriction: Must be in the Gemstone program; and sophomore standing or higher.

GEMS208 Special Topics in Leadership and Team Development (1-3 Credits)

Principles, methods and types of leadership and team development with an emphasis on group discussion and decision making. Reading, discussion and exploration of the basic team concept, communications for winning scenarios, goal setting, problem solving, conflict resolution and research methods.

Restriction: Must be in the Gemstone program.

GEMS296 Team Project Seminar I (1 Credit)

This is the first of six seminars during which Gemstone students carry out multidisciplinary research with the guidance of a faculty mentor. The teams develop their working relationship, start their literature search, define their research question, and set short & long term goals.

Prerequisite: GEMS100, GEMS102, and GEMS104.

Corequisite: GEMS202.

Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS297 Team Project Seminar II (2 Credits)

This is the second of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team develops its website, prepares and presents its research proposal and begins its research project.

Restriction: Must be in the Gemstone program with sophomore standing in a research team.

GEMS396 Team Project Seminar III (2 Credits)

This is the third of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team presents its progress at the Gemstone Colloquia.

Prerequisite: GEMS297.

Restriction: Must be in the Gemstone program with junior standing in a research team.

GEMS397 Team Project Seminar IV (2 Credits)

This is the fourth of six seminars during which Gemstone students carry out interdisciplinary research with the guidance of a faculty mentor. The team further develops its website. Also they will prepare and present the team project in the poster session of Undergraduate Research Day.

Prerequisite: GEMS396.

Restriction: Must be in the Gemstone program with junior standing in a research team.

GEMS496 Project Writing Seminar (2 Credits)

This is the fifth of six seminars during which Gemstone students carry out research with the guidance of a faculty mentor. The team finishes the analysis of their data and writes and edits its team thesis.

Prerequisite: GEMS397.

Restriction: Must be in the Gemstone program.

GEMS497 Team Thesis Defense (2 Credits)

Gemstone teams will complete the team research project and thesis. The team will formally present the thesis to experts in the area of interest at a Team Thesis Conference before final submission.

Prerequisite: GEMS396.

Restriction: Must be in the Gemstone program.

GEOG - Geographical Sciences

GEOG100 Introduction to Geography (3 Credits)

An introduction to the broad field of geography as it is applicable to the general education student. The course presents the basic rationale of variations in human occupancy of the earth and stresses geographic concepts relevant to understanding world, regional and local issues.

GEOG110 The World Today: Global Perspectives (3 Credits)

The most critical issue facing the world today is the sustainability of both human and physical systems in the 21st century. This class uses the context of regions of the world to explore the 21st century issues of climate change, development, politics, economy, and demography. Each region will be used to highlight aspects of sustainability.

GEOG130 Development Geography: Environmental & Social Justice (3 Credits)

The geography of economic, social, and environmental well-being and inequality. The course will provide an integrated perspective on the causes, interconnections, and consequences across time and space of, among others, globalization, climate change, poverty, employment, migration and urban growth, agricultural productivity, rural development, policies and international trade. Portraits of selected countries and regions will be developed.

GEOG140 Natural Disasters: Earthquakes, Floods, and Fires (3 Credits)

Catastrophic Environmental Events (CEE) that are becoming more common in this time of global environmental change and it is essential that today's students be equipped with the knowledge and skills to be leaders as we, as a society, understand the upheaval that these CEEs are causing. Students will examine how CEEs shape human society and ecosystem from the interdisciplinary perspective afforded by the field of Geography. Students will use the latest geographic science concepts and techniques in exploring these events. Using satellite imagery they will gain a multi-scale perspective of the ecological and societal aspects of the events.

GEOG156 How NASA Sees the Earth (3 Credits)

The world of Earth science data is complex and can be overwhelming with a wide range of data sources and formats, hefty downloads and the need for complicated analytical tools. To make use of enormous volumes of available data and geoinformation products, one has to know where and how to search and obtain the data, how to analyze the data, and how to extract useful information and knowledge. In this course, you will learn about the state-of-the-art Web-based tools that allow you to efficiently display and analyze a large number of datasets in a way many professionals working in the Earth science domain would. You will learn how to visualize multiple Earth science datasets produced by NASA in a variety of ways directly on the Internet, without the need to download, manage and store them. Students will be introduced to comprehensive functions to analyze the data and generate customized maps, animations, multi-variable correlations, regional subsetting, etc.

Cross-listed with: INST156.

Credit Only Granted for: GEOG156 or INST156.

GEOG158 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GEOG170 Mapping our Digital World (3 Credits)

Introduction to technical methods used in gathering, analyzing, and mapping geospatial information for applications such as urban mobility, environmental monitoring, situational awareness, and disaster management. Topics include Geographic Information Systems (GIS), cartography, map projections, satellite and airborne remote sensing, the global positioning system (GPS), and introductory statistics and probability. The course is a gateway to more advanced technical classes in geospatial science.

GEOG172 Earth From Space (3 Credits)

Earth observations from space enable the mapping and monitoring of our changing planet. This survey course reviews current observational capabilities and examines scientific applications in quantifying global environmental change. Drivers and outcomes of key dynamics will be illustrated and discussed, including sea and continental ice loss, deforestation, ocean warming, urbanization, agricultural expansion and intensification, and vegetation response to climate change.

GEOG198 Selected Topics in Geography (1-3 Credits)

Readings and discussion on selected topics in the field of geography or GIS

Repeatable to: 12 credits if content differs.

GEOG201 Geography of Environmental Systems (3 Credits)

A systematic introduction to the processes and associated forms of the atmosphere and earth's surfaces emphasizing the interaction between climatology, hydrology and geomorphology.

GEOG202 Introduction to Human Geography (3 Credits)

Introduction to what geographers do and how they do it. Systematic study of issues regarding social and cultural systems from a global to a local scale. Looks at the distribution of these variables and answers the question "Why here, and not there?"

GEOG211 Geography of Environmental Systems Laboratory (1 Credit)

A laboratory course to accompany GEOG 201. Analysis of the components of the earth's energy balance using basic instrumentation; weather map interpretation; soil analysis; the application of map and air photo interpretation techniques to landform analysis.

Prerequisite: Must have completed or be concurrently enrolled in GEOL120, GEOL100, or GEOG201.

GEOG212 Career Planning for Geographical Sciences, GIS, and ENSP Majors (1 Credit)

Increase student knowledge of professional development opportunities in Geographical Sciences through classroom activities and invited speakers, and to build awareness of career development tools and strategies.

Restriction: Must be in one of the following programs (Geography; GEOG-GIS & Computer Cartography).

GEOG258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GEOG272 Introduction to Earth Observation Science (3 Credits)

Concepts and principles of Earth observation and remote sensing in relation to photographic, thermal infrared and radar imaging. Methods of obtaining quantitative information from remotely-sensed images. Interpretation of remotely-sensed images emphasizing the study of spatial and environmental relationships.

Credit Only Granted for: GEOG272 or GEOG372.

Formerly: GEOG372.

GEOG276 Principles of Python Programming and Geocomputing (3 Credits)

Introduces conceptual and practical aspects of scientific computing using the Python programming language. The main focus is on developing proficiency for the basic elements of the development environment, foundational syntax including variables, logical operators, looping, conditional statements, nesting, and common programming patterns for mathematical and textual computing. In addition, essential data structures and functionality for scientific computing, such as arrays, dataframes, and data visualization will be introduced. Throughout the course, students will also become exposed to various applications in the domain of the social and environmental sciences.

GEOG298 Special Topics in Geography (3 Credits)

An introductory course dealing with special topics in geography.

Repeatable to: 6 credits if content differs.

GEOG301 Advanced Geographical Environmental Systems (3 Credits)

This course will provide the students with an overview of the key elements of physical geography, including biogeography (factors and processes that control the geographical distributions of plants and animals, climatology (processes associated with controlling variations in weather and climate), and geomorphology (factors and processes that control changes to the physical structure of the earth surface in relation to geological structures).

Prerequisite: GEOG201 and GEOG211.

Credit Only Granted for: GEOG398B or GEOG301.

Formerly: GEOG398B.

GEOG306 Introduction to Quantitative Methods for the Geographical Environmental Sciences (3 Credits)

Essentials in the quantitative analysis of spatial and other data, with a particular emphasis on statistics and programming. Topics include data display, data description and summary, statistical inference and significance tests, analysis of variance, correlation, regression, and some advanced concepts, such as matrix methods, principal component analysis, and spatial statistics. Students will develop expertise in data analysis using advanced statistical software.

GEOG328 Topics in Regional Geography (3 Credits)

Selected topics in regional geography.

Repeatable to: 6 credits if content differs.

GEOG330 As the World Turns: Society and Sustainability in a Time of Great Change (3 Credits)

Cultural geography course on society and sustainability. Culture is the basic building block that is key to sustainability of societies. Course will cover sustainability of societies on different scales, examining local, regional, and worldwide issues. Sustainability will be examined as a key element of environmental sustainability. How societies adjust to rapid world change will be examined as a positive and/or negative factor in sustainability.

Credit Only Granted for: GEOG330, GEOG360, or GEOG362.

Formerly: GEOG362.

GEOG331 Introduction to Human Dimensions of Global Change (3 Credits)

Introduction to global-scale interrelationship between human beings and the environment. The development of global issues including but not limited to the environment, food, energy, technology, population, and policy.

Prerequisite: ANTH220, ANTH260, GEOG202, or GEOG201; or permission of BSOS-Geography department.

Credit Only Granted for: GEOG331 or GEOG361.

Formerly: GEOG361.

GEOG332 Economic Geography (3 Credits)

Principles of managing scarce resources in a world where everyone faces tradeoffs across both time and space. Focuses on the relationship between globalization processes and changing patterns of locational advantages, production, trade, population, socioeconomic and environmental grace and sustainability.

Credit Only Granted for: GEOG203, GEOG303, or GEOG332.

Formerly: GEOG303.

GEOG333 The Social Geography of Metropolitan Areas in Global Perspective (3 Credits)

A socio-spatial approach to human interaction within the urban environments: ways people perceive, define, behave in, and structure world cities and metropolitan areas. Cultural and social differences define spatial patterns of social activities which further define distinctions in distribution and interaction of people and their social institutions.

Prerequisite: GEOG201 and GEOG202; or permission of BSOS-Geography department.

Credit Only Granted for: GEOG456 or GEOG333.

Formerly: GEOG456.

GEOG340 Geomorphology (3 Credits)

Survey of landform types and role of processes in their generation.

Frequency of occurrence and implications for land utilization. Emphasis on coastal, fluvial, and glacial landforms in different environmental settings. Landform regions of Maryland.

GEOG346 Cycles in the Earth System (3 Credits)

The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.

Prerequisite: GEOG123, AOSC123, GEOL123, or MATH140; or permission of CMNS-Geology department.

Recommended: PHYS171, PHYS141, PHYS161, or MATH141. Cross-listed with GEOL346.

Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOG358 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GEOG371 Programming for Image Analysis (3 Credits)

Introduces application programming interface (API) functions and image processing techniques for efficient processing of satellite images. The main programming language of the course is Python. The course will use a Geospatial Data Abstraction Library (GDAL) which provides a unified way of manipulating images incorporating geospatial information. For image processing, the course will use Python-based libraries such as scikit-image and OpenCV.

Prerequisite: GEOG276, GEOG306, and GEOG272.

GEOG373 Geographic Information Systems (3 Credits)

Characteristics and organization of geographic data; creation and use of digital geospatial databases; metadata; spatial data models for thematic mapping and map analysis; use of geographic information system in society, government, and business. Practical training with use of advanced software and geographic databases.

GEOG376 Programming for Geospatial Analysis (3 Credits)

Covers conceptual and practical aspects of geospatial data modeling and analysis techniques using the Python programming language. The main focus is on developing a solid understanding of the programmatic conventions needed to create, manipulate, and process geospatial data types, such as point, line, & polygon vectors, networks, trajectories, and space-time extensions. In addition, students will develop a proficiency in applying these data structures to perform automated geospatial analysis, such as GIS operations, agent-based models, and spatial statistics.

Prerequisite: GEOG276 and GEOG373; Must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140; or must have completed MATH220.

Recommended: GEOG306.

GEOG384 Internship in Geography I (3 Credits)

Supervised field training to provide career experience. Introduction to professional level activities, demands, opportunities. Placement at a public agency, non-profit organization, or private firm. Participation requires application to the internship advisor in preceding semester.

Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and (ENGL393 or ENGL390).

Restriction: Must be in Geography program.

GEOG385 Internship in Geography II (3 Credits)

Supervised field training to provide career experience. Introduction to professional-level activities, demands, opportunities. Placement at a public agency, nonprofit organization, or private firm. Participation requires application to the internship advisor in preceding semester.

Prerequisite: GEOG211, GEOG306, GEOG212, and GEOG201; and must have completed a Junior (Professional) English course.

Restriction: Must be in Geography program.

GEOG396 Honors Research (3 Credits)

First course in the departmental honors sequence. Student development of a potential research topic under the guidance of a faculty advisor, culminating in a written and oral presentation of a research proposal.

Restriction: Permission of BSOS-Geography department; and senior standing or higher; and must be in Geography program.

Formerly: GEOG397.

GEOG397 Honors Thesis (3 Credits)

Second course in the departmental honors sequence. Student research under the auspices of a faculty advisor, culminating in a research paper to be defended orally before the geography honors committee.

Prerequisite: GEOG396.

Restriction: Must be in Geography program; and senior standing or higher.

Formerly: GEOG399.

GEOG398 Special Topics in Geography (1-3 Credits)

An introductory course dealing with special topics in geography.

Restriction: Permission of BSOS-Geography department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: GEOG298 or GEOG398.

Formerly: GEOG298.

GEOG413 Migration: Latin America and the United States (3 Credits)

Develops an understanding of the push and pull factors that have contributed to human mobility (migration) that has transformed the Americas. The class is divided in two parts: immigration and emigration from Latin American and Latin America migration to the United States. We will be interested in studying the migration shifts that have occurred in Latin America and the theories that help explain them. The themes that will be addressed are the history of migration with Latin America and to North America, the impact of this migration on both sending and receiving countries, and the various policy strategies and issues concerning migration.

Prerequisite: GEOG313; or permission of BSOS-Geography department.

Recommended: HIST250; or USLT201; or LASC234.

Credit Only Granted for: GEOG413, or GEOG498M.

Formerly: GEOG498M.

GEOG415 Land Use, Climate Change, and Sustainability (3 Credits)

The issues of climate change and land use change as two interlinked global and regional environmental issues and their implications for society and resource use are explored.

Prerequisite: GEOG306; or permission of BSOS-Geography department.

Recommended: GEOG340; or GEOG342; or GEOG331. Or GEOG201; and GEOG211.

Credit Only Granted for: GEOG415 or GEOG498D.

Formerly: GEOG498D.

GEOG416 Conceptualizing and Modeling Human-Environmental Interactions (3 Credits)

Develops skills to carry out research that integrates environmental and economic aspects of sustainability by introducing extensively used quantitative tools for analyzing human-environmental interactions in the field of ecological economics. These include, e.g., index number calculations and decomposition analysis, Environmental Kuznets Curve (EKC), environmental input-output analysis and life-cycle analysis, and multi-criteria decisions aid (MCDA). Students will need laptops to run models during class.

Prerequisite: Permission of BSOS-Geography department.

Corequisite: MATH130, MATH140, or MATH120; or MATH220.

GEOG417 Land Cover Characterization Using Multi-Spectral Remotely Sensed Data Sets (3 Credits)

Students will be introduced to the image processing steps required for characterizing land cover extent and change. Key components of land cover characterization, including image interpretation, algorithm implementation, feature space selection, thematic output definition, and scripting will be discussed and implemented.

Prerequisite: GEOG272 and GEOG306; or permission of BSOS-Geography department.

Jointly offered with: GEOG617.

Credit Only Granted for: GEOG417 or GEOG617.

GEOG418 Field and Laboratory Techniques in Environmental Science (1-3 Credits)

Lecture and laboratory learning each week. A variable credit course that introduces field and laboratory analyses in environmental science. Individual learning contract are developed with instructor.

Restriction: Permission of BSOS-Geography department.

Credit Only Granted for: GEOG418 or GEOG448.

Formerly: GEOG448.

GEOG421 Changing Geographies of China (3 Credits)

Covers physical geography, history, and economic and political systems of the world's most populous country. The major focus will be on geographical issues in China's contemporary development: agriculture, population, urbanization, resource and energy, and environment.

Prerequisite: Permission of BSOS-Geography department. Or GEOG202; and GEOG201; and (GEOG435, GEOG333, or GEOG332).

Recommended: GEOG130; or GEOG140.

Credit Only Granted for: GEOG328B or GEOG421.

Formerly: GEOG328B.

GEOG422 Changing Geographies of Sub-Saharan Africa (3 Credits)

Students will develop an understanding of the geographic contexts of Sub-Saharan Africa, including an overview of the physical, bioclimatic, historical, cultural, political, demographic, health and economic geographies of Sub-Saharan Africa. Students will fill in the map of Africa by studying the spatial distribution within each of these geographic domains. In addition to an overview of geography South of the Sahara, the Congo will be taken as a more intensive case study through additional readings, lectures and discussions.

Prerequisite: Permission of BSOS-Geography department. Or GEOG201; and GEOG202; and (GEOG335 or GEOG333).

Recommended: GEOG130 or GEOG110.

Credit Only Granted for: GEOG328C, GEOG422.

Formerly: GEOG328C.

GEOG423 Latin America (3 Credits)

A geography of Latin America and the Caribbean in the contemporary world: political and cultural regions, population and natural resource distribution, economic and social development, poverty, crime, urbanization, migration trends, and natural disasters.

Prerequisite: Permission of BSOS-Geography department. Or GEOG201 and GEOG202; and (GEOG332, GEOG435, or GEOG333).

Recommended: GEOG130 and GEOG110.

Credit Only Granted for: GEOG313 or GEOG423.

Formerly: GEOG313.

GEOG431 Culture and Natural Resource Management (3 Credits)

Basic issues concerning the natural history of humans from the perspective of the geographer. Basic components of selected behavioral and natural systems, their evolution and adaptation, and survival strategies.

Credit Only Granted for: GEOG421 or GEOG431.

Formerly: GEOG421.

GEOG432 Spatial Econometrics (3 Credits)

An introduction to modern econometric techniques in general and spatial econometrics in particular, using the popular open source statistical computer language R. A focus on using statistical computing to produce analytical reports for real-world applications, research papers, and dissertations.

Prerequisite: Permission of BSOS-Geography department.

Jointly offered with: GEOG732.

Credit Only Granted for: GEOG432 or GEOG732.

GEOG438 Seminar in Human Geography (3 Credits)

Selected topics in human geography.

Recommended: GEOG201; or GEOG211.

Restriction: Permission of BSOS-Geography department.

Repeatable to: 6 credits if content differs.

GEOG440 Polar Remote Sensing (3 Credits)

The harsh environment of the vast polar regions makes them some of the most inaccessible places on Earth. With widespread environmental change already underway, satellite remote sensing provides the only means by which to obtain year-round observations of the polar climate system. The objective of this course is to provide students with an overview of polar remote sensing techniques, including the physical principles of active and passive sensors, orbits, electromagnetic radiation, atmospheric transmission, calibration and validation. We will focus on measurements of the polar oceans, sea ice, glaciers, ice sheets, snow and permafrost, and examine the response of the cryosphere to climate change.

Prerequisite: PHYS171 or PHYS161; and AOSC401 or GEOG301; or with permission of instructor.

Cross-listed with: AOSC440.

Jointly offered with: AOSC642.

Credit Only Granted for: AOSC440, GEOG440, AOSC642, or GEOG640.

GEOG441 The Coastal Ocean (3 Credits)

Introduction to coastal oceanography, focusing on the physical, biological, and geological aspects of ocean areas on the inner continental shelves. Wave, currents, and tidal dynamics of bays, open coast, estuaries, and deltas. Sedimentary environments of major coastal types. Ecology and biogeochemical relationships, including benthic and planktonic characteristics. Coastal evolution with sea level rise. Human impacts: eutrophication, modification of sedimentation. The coastal future: rising sea level, hypoxia, and increased storminess.

Prerequisite: GEOG140; or students who have taken courses with comparable content may contact the department; or permission of BSOS-Geography department.

Credit Only Granted for: GEOG441 or GEOG498C.

Formerly: GEOG498C.

GEOG442 Biogeography and Environmental Change (3 Credits)

Biogeographical topics of global significance, including a consideration of measurement techniques, and both descriptive and mechanistic modeling. Topics may include: scale in biogeography, biodiversity, carbon geography, climate and vegetation, interannual variability in the biosphere, land cover, global biospheric responses to climate change, NASA's Mission to Planet Earth and Earth Observation System. The class focuses on both natural and anthropogenic controls, impacts of biogeography on climate and ecosystem services and different methods in biogeography.

Prerequisite: GEOG301. And GEOG201 and GEOG211; or permission of BSOS-Geography department. Jointly offered with GEOG642.

Credit Only Granted for: GEOG642, GEOG442, GEOG447, or GEOG484.

Formerly: GEOG447.

GEOG458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GEOG461 Machine Learning for Computational Earth Observation Science (CEOS) (3 Credits)

Provides an introduction to machine learning methods and models with an emphasis on Earth observation. Topics will include supervised (decision trees, random forest, neural networks, support vector machine, Gaussian process and ensemble techniques), and unsupervised techniques (clustering/segmentation, dimension reduction, multi-dimensional data visualization). The course will highlight the state-of-the-art deep learning models; object-based versus pixel-based image classification; how to deal with missing data and non-uniform coverage of data; and large scale land cover land use mapping from heterogeneous satellite data. Practical part will include satellite image classification by applying classification models and biophysical parameters retrieval by applying regression models.

Prerequisite: GEOG371.

GEOG470 Algorithms for Geospatial Computing (3 Credits)

An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.

Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.

Cross-listed with: CMSC401.

Jointly offered with: GEOG770.

Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.

Formerly: GEOG498I.

GEOG471 Technologies for Computational Earth Observations (3 Credits)

An introduction and exploration of cutting-edge novel remote sensing datasets and their associated science uses and applications. We present several modules focused on different technologies (multispectral, lidar, radar, thermal), and for each have both hands-on lab assignments, lectures, and applications case studies. Data fusion techniques, and common analysis and processing pitfalls are presented and discussed. Hands-on computer labs allow students to explore each dataset via online tutorials. After all datasets are presented, students download their own datasets in an area of interest to them, and work toward a unique student-driven project for presentation to the class. The sky is literally the limit in this interactive course which provides a research experience opportunity for students in a supportive atmosphere.

Prerequisite: GEOG371 or permission of instructor.

GEOG472 Remote Sensing: Digital Processing and Analysis (3 Credits)

Digital image processing and analysis applied to satellite and aircraft land remote sensing data. Consideration is given to image preprocessing techniques including radiometric calibration, geometric registration as well as atmospheric correction. Analysis methods include digital image exploration, feature extraction, thematic classification, change detection, and biophysical characterization. An application-oriented course project will be completed through the self-guided computer labs.

Prerequisite: GEOG272 and GEOG306; or students who have taken courses with comparable content may contact the department.

GEOG473 Geographic Information Systems and Spatial Analysis (3 Credits)

Analytical uses of geographic information systems; data models for building geographic data bases; types of geographic data and spatial problems; practical experience using advanced software for thematic domains such as terrain analysis, land suitability modeling, demographic analysis, and transportation studies.

Prerequisite: GEOG306 and GEOG373; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GEOG473 or GEOG482.

Formerly: GEOG482.

GEOG475 Geographic Visualization and Digital Mapping (3 Credits)

An overview of the basic concepts and techniques that underlie digital map making and the broader field of geographic visualization for intermediate GIS users. This includes the use of color, map symbolization, map layout, and also the contribution to geographic visualization from the fields of scientific visualization, information visualization, and cognition. Fundamentals of dynamic map design and web mapping will be introduced through the use of animated and interactive maps.

Prerequisite: GEOG373 and GEOG306.

GEOG476 Object-Oriented Computer Programming for GIS (3 Credits)

Expands on conceptual and practical aspects of programming for geographic applications. The main focus of this course is to provide students more advanced programming in object oriented programming languages (i.e. Python). In addition, students will develop a proficiency in applying these advanced programming principles to manipulating spatial data sources within the Geographic Information Systems (GIS).

Prerequisite: GEOG373 and GEOG376; or permission of BSOS-Geography department. And must have completed MATH220; or must have completed or be concurrently enrolled in MATH120, MATH130, or MATH140.

Restriction: Must be in Geography program; or must be in GIS minor.

GEOG498 Topical Investigations (1-3 Credits)

Independent study under individual guidance.

Prerequisite: Restricted to advanced undergraduate students; and 24 credits in GEOG courses. Or restricted to graduate students.

Repeatable to: 6 credits if content differs.

GEOL - Geology

GEOL100 Physical Geology (3 Credits)

A general survey of the rocks and minerals composing the earth, its surface features and the agents that form them, and the dynamic forces of plate tectonics.

Credit Only Granted for: GEOL100 or GEOL120.

Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 110.

GEOL102 Historical Geology (4 Credits)

Earth's history as revealed through the principles of stratigraphy and the processes of physical geology. Emphasis on formations and geologic development of the North American continent.

Prerequisite: GEOL120 or GEOL100; and GEOL110. Or permission of CMNS-Geology department.

GEOL104 Dinosaurs: A Natural History (3 Credits)

Dinosaurs, their evolution, and our understanding of their fossil record. Students will examine the geologic record and the tools used by paleontologists to determine: geologic ages and ancient environments; evolutionary history and extinctions; dinosaurian biology and behavior; and their survival as birds. Mechanisms of global change ranging from plate tectonics to asteroid impact will be discussed.

GEOL110 Physical Geology Laboratory (1 Credit)

The basic materials and tools of physical geology stressing familiarization with rocks and minerals and the use of maps in geologic interpretations.

Prerequisite: Must have completed or be concurrently enrolled in GEOL120 or GEOL100.

Additional Information: CORE Distributive Studies Physical Science Laboratory Course only when taken concurrently with GEOL 100.

GEOL120 Environmental Geology (3 Credits)

A review of geologic factors underlying many environmental problems and the interactions between population and physical environment: geologic hazards, land-use planning, conservation, mineral resources, waste disposal, land reclamation, and the geologic aspects of health and disease. The course is aimed at lower division students in education and liberal arts, and should be useful to any student concerned with geologic perspectives of environmental problems.

Credit Only Granted for: GEOL100 or GEOL120.

GEOL123 Causes and Consequences of Global Change (3 Credits)

Study of the major components of Earth's climate system and climate change history. Discussion of 21st century climate change prediction, mitigation and adaptation efforts.

Cross-listed with: AOSC123.

Credit Only Granted for: AOSC123, GEOG123, or GEOL123.

GEOL124 Evolution of Life and Environment on Planet Earth (3 Credits)

An exploration of how life has shaped Earth's physical environments, both in the contemporary Earth and over the long course of Earth history. Topics range from evidence for the origin and diversification of life and its impact on Earth environments to the mind-set and methods of the scientists who interpret it, and what those methods tell us about future interactions between life and the environment, both on Earth and in the Solar System.

GEOL200 Earth's Fury: Earthquakes, Volcanoes, and Tsunami (3 Credits)

Earthquakes, volcanic eruptions, and tsunami frequently remind us of the dangers associated with living on a constantly changing planet. How do people prepare for these rare but dramatic events? Student will study the science behind earthquakes and volcanoes, how it guides monitoring, forecasting, prevention, and response, and the cultural and ethical aspects of these events.

GEOL204 Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past (3 Credits)

What good is the fossil record? What relevance or insights might the remains of ancient living things have for our modern world? This course examines how the record of ancient life was made, and how we use diverse scientific techniques to reveal the information it contains. We will look at how the various inhabitants of our planet changed through time, and how different ecosystems such as reefs, forests, and grasslands were assembled. We will see how our own species came to be, and of our spread across the world from our ancestral home in Africa. We'll examine how the fossil record contains evidence of climate changes and extinction events far exceeding what we are currently experiencing, and how we can use these as warnings for our future. We'll address who are the owners and stakeholders in the evidence of the fossil world. Students will learn how to read and interpret the primary scientific literature, and how to present scientific information to others through various media.

GEOL212 Planetary Geology (3 Credits)

An examination of the geologic and geochemical processes at work in the solar system from the perspectives supplied by space age exploration of the planets and other solar system bodies.

Credit Only Granted for: ASTR330 or GEOL212.

GEOL224 Observations and Measurements of the Natural World (3 Credits)

A scientific research team experience focused on evaluating environmental controls on water quality in urbanized streams of College Park. Training in field, laboratory, and digital visualization techniques to gain hands on knowledge of the scientific method through detailed observations, measurements, manipulations, and interpretations of data gathered during the course.

GEOL288 Field Studies I (1 Credit)

Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves fieldwork of one week or longer duration, which work normally includes both observation and data collection. Particular programs may require certain prerequisites. Permission of Instructor is required. Special fees may be necessary.

Repeatable to: 3 credits if content differs.

GEOL322 Mineralogy (4 Credits)

Basic mineralogy for geology majors. The principles of morphologic crystallography, crystal chemistry, and determinative mineralogy.

Prerequisite: GEOL120 or GEOL100; and GEOL110. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.

Restriction: Permission of instructor is required for non-degree seeking students.

GEOL329 Instructional Assistance Practicum (1-2 Credits)

Undergraduate teaching assistantship in Geosciences. Individual instruction course. Contact department or instructor to obtain section number.

GEOL331 Principles of Paleontology (4 Credits)

A review of the theory, principles, and applications of Paleontology. A systematic overview of the morphology, evolution, and relationships of the major fossil-producing taxa.

Prerequisite: GEOL102; or (BSCI207 or BSCI392); or permission of CMNS-Geology department.

Cross-listed with: BSCI333.

Restriction: Permission of instructor is required of non-degree seeking students.

Credit Only Granted for: GEOL331 or BSCI333.

GEOL340 Geomorphology (4 Credits)

Analysis of landforms, organized on the basis of the geologic processes that have operated during the late Cenozoic. Constructional and erosional landforms related to physical systems operating on geologic structures through time.

Prerequisite: GEOL120 or GEOL100.

Restriction: Permission of instructor is required of non-degree seeking students.

GEOL341 Structural Geology (4 Credits)

Study of the deformation of Earth's lithosphere, especially stress, rheology, strain, and the origin and significance of structural features. Development of 3-dimensional thinking through drafting and drawing of structures, construction of geologic maps and cross-sections, and stereographic and orthographic representation of structures. Improvement of scientific writing. Two weekend field trips.

Prerequisite: GEOL120 or GEOL100; and GEOL102; and GEOL110. Or permission of CMNS-Geology department.

Restriction: Permission of instructor is required of non-degree seeking students.

GEOL342 Sedimentation and Stratigraphy (4 Credits)

Description, origin, and distribution of sediments and sedimentary rocks.

Prerequisite: GEOL120 or GEOL100; and GEOL110; and GEOL322. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).

Restriction: Permission of instructor is required of non-degree-seeking students.

GEOL346 Cycles in the Earth System (3 Credits)

The Earth System operates through some fundamental cycles such as water, energy, and the Carbon Cycle. This course will build on GEOL/GEOG/AOSC123 starting with concept of feedbacks within the Earth System, global energy balance and the Greenhouse Effect. A brief introduction to the atmospheric and oceanic circulation will lead to the water cycle connecting the land, ocean, and atmosphere to the Earth System. Introduction to the Global carbon, nitrogen, and sulfur cycles will be followed by the concept of long-term climate regulation and short-term climate variability. The concepts of cycles, feedbacks, forcings, and responses in the Earth System will be applied to Global Warming and Ozone Depletion.

Prerequisite: MATH140; and (GEOG123, AOSC123, or GEOL123). Or permission of CMNS-Geology department.

Recommended: PHYS171, PHYS141, PHYS161, or MATH141.

Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with GEOG346.

Credit Only Granted for: AOSC346, GEOG346, or GEOL346.

GEOL351 Statistics for Geoscientists (3 Credits)

Practical approach to basic statistics applied in the geosciences. Experimental design, elementary statistics and probability, sequence analysis, spatial analysis, linear regression, nonparametric statistics, bivariate, multivariate and principal components analysis of variance, hypothesis testing. Problem sets and participatory discussion of statistical applications in the current literature.

Prerequisite: MATH115.

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL375 Introduction to the Blue Ocean (3 Credits)

The global ocean is a major component of the Earth System that shapes life on earth, including our weather and climate. We explore the observation-based interdisciplinary science of oceanography, identifying its strong connections to related sciences like meteorology, and geography. We apply this developing understanding to environmental issues such as marine pollution, fish and fisheries, as well as to climate variability and to the changes to the marine environment that are resulting from steadily rising levels of atmospheric greenhouse gasses. Focusses include the biogeochemical and physical changes we can observe in the nearby Chesapeake Bay and the coastal waters of Eastern Shore, Maryland.

Prerequisite: MATH120 or higher.

Recommended: MATH121, MATH141, PHYS161, or PHYS171.

Cross-listed with: AOSC375.

Credit Only Granted for: AOSC375 or GEOL375.

GEOL386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of CMNS-Geology department.

Restriction: Junior standing or higher.

GEOL388 Field Studies II (3 Credits)

Examination and investigation of Earth Science phenomena in the field, particularly geology. Involves field work of one week or a longer duration, which would normally involve both observations and data collection, with associated classroom lectures and/or laboratory study, normally including additional analysis of collected observations and data. Particular programs may require certain prerequisites. Permission of instructor required. Special fees may be necessary.

Restriction: Non-degree-seeking students require the permission of the instructor.

Repeatable to: 6 credits if content differs.

GEOL391 Biology of Extinct Animals (3 Credits)

A survey of extinct animals that have few, if any, direct living descendants. The principles governing the functional design of animals will be used to infer life styles for extinct, and frequently bizarre, organisms.

Prerequisite: BSCI160 and BSCI161; or BSCI106.

Cross-listed with: BSCI392.

Credit Only Granted for: GEOL391 or BSCI392.

GEOL392 Biology of Extinct Animals Laboratory (1 Credit)

An overview of the techniques used in paleobiological reconstructions of extinct animals.

Prerequisite: Must have completed or be concurrently enrolled in BSCI392.

Cross-listed with: BSCI393.

Credit Only Granted for: GEOL392 or BSCI393.

GEOL393 Geology Senior Thesis I: Proposal (3 Credits)

The first semester of the two-semester Geology Senior Thesis. Emphasis is on developing a plan for original research in the geosciences and presenting that plan both in writing and in public presentations that adhere to geosciences professional standards.

Prerequisite: PHYS141 or (PHYS161 and PHYS174); and MATH141; and (CHEM131 and CHEM132) or (CHEM135 and CHEM136); and must have completed at least two upper-level geology courses and be concurrently enrolled in a third.

Restriction: Junior standing or higher; and must be in Geology program.

GEOL394 Geology Senior Thesis II: Research (3 Credits)

The second semester of the two-semester Geology Senior Thesis. Investigation of specific original research question in geosciences. Emphasis is on completion of original research proposed in GEOL393 and presentation of results both in writing and in public presentations that adhere to geosciences professional standards.

Prerequisite: GEOL393; and must have completed at least three upper level GEOL courses.

Restriction: Must be in Geology program; and junior standing or higher.

GEOL412 Geology of the Terrestrial Planets (3 Credits)

Geological features of Mercury, Venus, Mars and the Moon with an emphasis on results from recent NASA planetary mission. Topics include interior structure, impact cratering, tectonic and volcanic history, surface conditions, climate change, and habitability.

Prerequisite: GEOL341 or GEOL340.

Credit Only Granted for: GEOL489A or GEOL412.

Formerly: GEOL489A.

GEOL413 Geoscientific Modeling (3 Credits)

A model is a simplified representation of reality. Modeling is implicit or explicit in almost everything we do as geoscientists. Model construction, coding, and the concepts of parsimony vs complexity, robustness, validation, uncertainty, and the scientific interpretation of simulation results. Problem sets, independent study and participatory discussion of modeling applications in the current literature.

Prerequisite: MATH115; and two 400-level GEOL courses.

Recommended: Some experience in computer programming.

Jointly offered with: GEOL613.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL413, GEOL489G, GEOL613 or GEOL789G.

Formerly: GEOL489G.

GEOL423 Optical Mineralogy (4 Credits)

The optical behavior of crystals with emphasis on the theory and application of the petrographic microscope.

Prerequisite: GEOL100 or GEOL120; and GEOL110; and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL431 Vertebrate Paleobiology (4 Credits)

A survey of the evolution of the vertebrates, encompassing information from the diversity of living members, but concentrating on the contribution of the fossil record. Emphasis is on the phylogenetic systematics, comparative and functional anatomy, developmental biology, and stratigraphic distribution of major extinct and extant groups.

Prerequisite: BSCI207, BSCI392, GEOL104, GEOL204, or GEOL331; or permission of CMNS-Geology department.

GEOL435 Environmental Geochemistry (3 Credits)

An understanding of geochemical cycles of Earth's surface systems including soils, rivers, lakes, and estuaries and causes and implications of alteration of geochemical cycles. Topics include chemical weathering, soils, chemical composition of inland waters, hydrologic tracers, salinization, eutrophication, nutrient and metal pollution, and global geochemical cycles.

Prerequisite: MATH115; and (GEOL100 or GEOL120); and (GEOL436 or GEOL444). And CHEM131 and CHEM132; or (CHEM135 and CHEM136).

Restriction: Nondegree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL489W or GEOL435.

Formerly: GEOL489W.

GEOL436 Principles of Biogeochemistry (3 Credits)

An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.

Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).

Cross-listed with: AOSC436.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL436 or AOSC436.

GEOL437 Global Climate Change: Past and Present (3 Credits)

Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.

Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136).

Cross-listed with: AOSC437.

Credit Only Granted for: AOSC437 or GEOL437.

GEOL443 Petrology (4 Credits)

Study of igneous and metamorphic rocks: petrogenesis, distributions, chemical and mineralogical relations, macroscopic and microscopic descriptions, geologic significance.

Prerequisite: GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103. And must have completed or be concurrently enrolled in GEOL423; and (GEOL100 or GEOL120); and GEOL110.

Corequisite: Permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL444 Low Temperature Geochemistry (4 Credits)

Basic chemical principles, thermodynamics, and kinetics of low-temperature inorganic and organic geochemical reactions in a wide range of surface environments. These geochemical tools will be used to provide a context for understanding elemental cycling and climate change.

Laboratories will include problem sets as well as wet chemical and mass spectrometric techniques used in low temperature geochemistry.

Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM103; or (CHEM131 and CHEM132); or (CHEM135 and CHEM136).

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL445 High Temperature Geochemistry (4 Credits)

Review of chemical principles and their use in understanding processes of Earth, and solar system formation and differentiation. Topics include nucleosynthesis and cosmochemical abundances of elements, bonding and element partitioning, equilibrium thermodynamics and phase stabilities, radiogenic isotopes and geochronology, kinetics, and diffusion.

Prerequisite: GEOL322, GEOL100, and MATH115. And CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103.

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL446 Geophysics (3 Credits)

An introduction to modern geophysics. Topics include: global plate tectonics, plate motion, triple junctions, geomagnetism, earthquakes and faulting, reflection and refraction seismology, gravity and isostasy, heat flow and mantle dynamics, deep interior of the Earth, geophysical observations and measurements.

Prerequisite: PHYS141, MATH141, and MATH140; and (GEOL100 or GEOL120).

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL447 Observational Geophysics (3 Credits)

An introduction to practical signal processing, data analysis, and inverse theory in geophysics.

Prerequisite: MATH140 and MATH141; and (PHYS141, PHYS161, or PHYS171).

GEOL451 Groundwater (3 Credits)

An introduction to the basic geologic parameters associated with the hydrologic cycle. Problems in the accumulation, distribution, and movement of groundwater will be analyzed.

Prerequisite: GEOL110 and MATH140; and (GEOL120 or GEOL100); and (CHEM131 and CHEM132; or (CHEM135 and CHEM136); or CHEM103). Or permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor; and junior standing or higher.

GEOL452 Watershed and Wetland Hydrology (3 Credits)

Physical processes by which water moves in watershed and wetland systems. Topics include: precipitation, infiltration, flow in the unsaturated zone, streamflow generation processes, and groundwater flow.

Restriction: Junior standing or higher; and all other students require the permission of the instructor.

GEOL453 Ecosystem Restoration (3 Credits)

Overview of ecosystem functions across biomes/geologic settings, and considerations and tradeoffs in ecosystem restoration strategies. Specific case studies and discussions will be aimed at understanding how structure can influence biophysical and biogeochemical processes supporting ecosystems, and then describes how rates, timing, and location of physical, chemical, and ecosystem processes can be altered by different restoration strategies to enhance ecosystem services.

Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (CHEM131 or CHEM135); and (CHEM132 or CHEM136); and (GEOL100, GEOL120, or ENST200).

Restriction: Junior standing or higher; and permission of instructor is required of non-degree-seeking students.

Credit Only Granted for: GEOL453 or GEOL489L.

Formerly: GEOL489L.

GEOL455 Marine Geophysics (3 Credits)

Plate tectonics, earthquakes and faulting, isostasy and gravity, heat and mantle dynamics, ocean ridges and transform faults, hydrothermal vents, trenches and oceanic islands, subduction zones, accretionary and erosion wedges, sedimentary basins and continental rifts. Exploration of the oceans using geophysical methods.

Prerequisite: MATH141 and MATH140; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL455 or GEOL489E.

Formerly: GEOL489E.

GEOL456 Engineering Geology (3 Credits)

An overview of engineering geology with an emphasis on physical understanding of natural hazards and natural resources. General theories of stress and strain, failure criteria, frictional stability, fluid flow in porous media and poroelasticity are introduced. Quantitative approaches on earthquakes, landslides, land subsidence, and geotechnical aspects of oil/gas exploration are discussed.

Prerequisite: PHYS141 and MATH141; and (GEOL120 or GEOL100). Or permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL456 or GEOL489Z.

Formerly: GEOL489Z.

GEOL457 Seismology (3 Credits)

General overview of the basics of seismology, starting with wave propagation, seismic reflection and refraction. Applications to the determination of the seismic velocity and anisotropy structure of the Earth. Earthquake generation, postseismic deformation and creep events, relation to faulting and plate tectonics.

Prerequisite: GEOL120 or GEOL100; and (MATH141, GEOL110, and MATH140). Or permission of CMNS-Geology department.

Recommended: PHYS171, PHYS141, or PHYS161.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL457 or GEOL489A.

Formerly: GEOL489A.

GEOL460 Field Geophysics (4 Credits)

Students will become familiar with geophysical instrumentation used for both scientific and industrial applications. Students will be given an introduction to the use of geophysical instrumentation for data collection, processing, and analysis, design of field experiments for investigating field geophysical problems, and an introduction to the theory of instrument design and use. Instruments that will be covered include (but are not limited to): broadband seismometers, geophones, ground-penetrating radar, magnetotellurics, and Global Positioning Satellites.

Prerequisite: GEOL100 or GEOL120, MATH140, MATH141, and (PHYS141, PHYS161, or PHYS171).

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL472 Tectonics (3 Credits)

Study of the development of the lithosphere on Earth and other rocky planets and moons. Emphasis on student-led discussions. Improvement of scientific writing.

Prerequisite: GEOL120 or GEOL100; and (GEOL102, GEOL341, and GEOL110).

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL473 Origin and Evolution of the Continents (3 Credits)

Introduction to current theories regarding the origin and evolution of the continents. Emphasis on development of critical reading and reasoning skills, and improvement of verbal and written communication.

Prerequisite: GEOL445 and GEOL443; or permission of instructor.

Restriction: Non-degree-seeking students require the permission of the instructor.

Formerly: GEOL489I.

GEOL488 Geology Colloquium (1 Credit)

Contemporary research topics and issues in geosciences are explored through the weekly Geology departmental colloquium and discussion of its contents.

Prerequisite: At least one 300 or 400-level Geology course of at least 3 credits.

Restriction: May not be taken concurrently with GEOL497 or GEOL497H.

Repeatable to: 4 credits.

GEOL489 Special Topics (3 Credits)

Recent advances in geology.

Prerequisite: Must have completed at least 2 upper-level GEOL courses plus one additional GEOL course.

Corequisite: GEOL393.

Restriction: Must be in Geology program; and junior standing or higher.

GEOL490 Geology Field Camp (6 Credits)

Intense field geology course taught off campus during the summer. Students describe and compile maps of formations and structures from outcrops, subsurface, and remotely sensed data. Special fees required.

Prerequisite: GEOL341 and GEOL443.

Restriction: Non-degree-seeking students require the permission of the instructor.

GEOL491 Environmental Geology Field Camp (3-6 Credits)

Intensive field course designed for students of environmental geology. Students will learn to make maps, to describe soil profiles and site characteristics, to monitor hydrologic and groundwater conditions, and to measure geologic structures and stratigraphic sections.

Prerequisite: GEOL341, GEOL342, and GEOL451; or permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor.

Credit Only Granted for: GEOL490 or GEOL491.

GEOL497 Recent Advances: Geology (3 Credits)

A survey of important recent advances in geological sciences in the context of the methods and practices of scientific research.

Prerequisite: Must have completed at least 2 upper-level GEOL courses.

Corequisite: GEOL393; and a third upper-level geology course.

Restriction: Must be in Geology program; and GPA of 3.0 or better in both overall and in all courses required for the major; and senior standing; and to be taken as late as possible in the program.

Credit Only Granted for: GEOL497 or GEOL489H.

Formerly: GEOL489H.

GEOL499 Special Problems in Geology (1-3 Credits)

Intensive study of a special geologic subject or technique selected after consultation with instructor. Intended to provide training or instruction not available in other courses which will aid the student's development in his or her field of major interest.

Prerequisite: (GEOL120 or GEOL100; and (GEOL102 and GEOL110)); or students who have taken courses with comparable content may contact the department. And permission of CMNS-Geology department.

Restriction: Non-degree-seeking students require the permission of the instructor.

GERM - Germanic Studies

GERM331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)

Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of *The Trial*, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's 'Kafka', 1991).

Cross-listed with: CINE331.

Credit Only Granted for: GERM331, CINE331, FILM331, or HONR348K.

Formerly: FILM331.

GERM385 German Cinema (3 Credits)

A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.

Cross-listed with: CINE385.

Credit Only Granted for: GERM385, CINE385 or FILM385.

Formerly: FILM385.

GERS - German Studies

GERS103 Intensive Elementary German (4 Credits)

Covers speaking, reading, writing, listening, and culture of German-speaking world.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a fluent/native speaker of German.

Credit Only Granted for: GERS103 or GERM103.

Formerly: GERM103.

GERS141 Yiddish I (3 Credits)

Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.

Cross-listed with: JWST281.

Credit Only Granted for: JWST281, GERM148Y or GERS141.

GERS142 Yiddish II (3 Credits)

Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.

Prerequisite: JWST281; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Cross-listed with: JWST282.

Credit Only Granted for: GERM149Z, GERS142 or JWST282.

GERS148 Germanic Languages - Elementary I (3 Credits)

Basic instruction in a Germanic language other than German; Yiddish and Swedish are offered regularly, Danish, Netherlandic, and Norwegian when demand is sufficient. Subtitle will reflect the language. May be repeated in a different language.

Repeatable to: 6 credits if content differs.

Formerly: GERM148.

GERS149 Germanic Languages - Elementary II (3 Credits)

Continuation of GERM148. May be repeated in a different language. Subtitle will reflect the language.

Prerequisite: GERM148.

Repeatable to: 6 credits.

Formerly: GERM149.

GERS169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: GERM169.

GERS203 Intensive Intermediate German (4 Credits)

Covers speaking, reading, writing, listening, and culture of German-speaking world.

Prerequisite: GERS103; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a fluent/native speaker of German.

Credit Only Granted for: GERM203 or GERS203.

Formerly: GERM203.

GERS204 German Grammar Review (3 Credits)

An in-depth study and analysis of selected grammatical topics in a contextualized framework.

Prerequisite: GERS203; or Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a fluent/native speaker of German.

Credit Only Granted for: GERM204 or GERS204.

Formerly: GERM204.

GERS248 Germanic Languages Intermediate - I (3 Credits)

Intermediate instruction in a Germanic language other than German. May be repeated in a different language. Subtitle will reflect the language.

Prerequisite: GERM149.

Repeatable to: 6 credits.

Formerly: GERM248.

GERS249 Germanic Languages - Intermediate II (3 Credits)

Continuation of GERM248. May be repeated in a different language. Subtitle will reflect the language.

Prerequisite: GERM248.

Repeatable to: 6 credits.

Formerly: GERM249.

GERS255 Once Upon a Time: Fairy Tales of the Brothers Grimm (3 Credits)

A critical examination of how fairy tales and folklore pervade and influence diverse facets of Western culture, ranging from issues of politics and national identity, ethics and morality, violence and fear, education and pedagogy, to gender and sexuality in the establishment and regulation of social norms. Taking the German tales collected by Jacob and Wilhelm Grimm as its focal point, the magical and often terrifying world of fairy tales within the German, European, and American cultural traditions from Romanticism to today will be explored. Taught in English.

Credit Only Granted for: GERM255 or GERS255.

Formerly: GERM255.

GERS269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: GERM269.

GERS289 Selected Topics in the Cultures of the German-Speaking Countries (3 Credits)

Topics in the cultures of the German-speaking countries.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

Formerly: GERM289.

GERS299 Special Topics in German Studies (3 Credits)

Selected topics on language, literature, or culture of the German-speaking world.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 9 credits if content differs.

GERS301 Conversation and Composition I: The German-Speaking World (3 Credits)

Practice in contemporary spoken and written German. Systematic review of grammar, and exercises in composition. Emphasis on cultural contrasts in the German-speaking world.

Prerequisite: GERS204; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GERM301 or GERS301.

Formerly: GERM301.

GERS302 Conversation and Composition II: Current Topics in German-Speaking Society (3 Credits)

Further practice in contemporary spoken and written German. Contemporary social, political, and cultural themes.

Prerequisite: GERS301; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GERM302 or GERS302.

Formerly: GERM302.

GERS315 Practicum in Translation I (3 Credits)

Problems and strategies of translation from German to English.

Prerequisite: GERS301; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GERM315 or GERS315.

Formerly: GERM315.

GERS319 Selected Topics in German Language Studies (1-3 Credits)

The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.

Prerequisite: GERS203; or students who have taken courses with comparable content may contact the department.

Repeatable to: 6 credits if content differs.

GERS320 Survey of German Studies (3 Credits)

Approaches to analysis of German cultural products such as literature, film, poetry, architecture and works of art. Taught in German.

Prerequisite: GERS301; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GERM320 or GERS320.

Formerly: GERM320.

GERS322 Highlights of German Literature and Culture (3 Credits)

Selected literary masterworks, social and cultural issues, and historical events in German-speaking countries from the Enlightenment, Romanticism, Junges Deutschland, Realism, Naturalism and its counter currents, Expressionism to the present. Taught in German.

Prerequisite: GERS302; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: GERM322 or GERS322.

Formerly: GERM322.

GERS331 Kafka and Film: The Uncanny in Literature and Film (3 Credits)

Analysis of major works by Franz Kafka (1883-1924), his affinity to the cinema and use of cinematic means and techniques (e.g. the gaze, flashback, parallel action, gesture and body language, etc.) in his writings, as well as examination of adaptations of Kafka narratives (e.g. the Orson Welles and David Jones adaptations of *The Trial*, 1961, 1992) and other films that use Kafkaian themes (e.g. Steven Soderbergh's *'Kafka'*, 1991).

Cross-listed with: CINE331.

Credit Only Granted for: GERM331, GERS331, or CINE331.

GERS339 German Literature In Translation (3 Credits)

Selected movements, genres or other special topics in German literature. Readings and instruction in English. May not be counted in the fulfillment of German major requirements in German literature.

Repeatable to: 6 credits if content differs.

Formerly: GERM339.

GERS349 Germanic Literatures in Translation (3 Credits)

Study of an important author, period or theme in a Germanic literature other than German: Yiddish, Netherlandic or Scandinavian. Taught in English.

Repeatable to: 6 credits if content differs.

Formerly: GERM349.

GERS356 German for the Professions (3 Credits)

An examination of the structures and work conditions of various industries in the German-speaking world including understanding and navigating company culture, professional development, and preparation for an internship or job where German is spoken.

Prerequisite: GERS301.

Credit Only Granted for: GERM319B, GERM356 or GERS356.

Formerly: GERM356.

GERS367 Literature in the Climate Crisis (3 Credits)

An investigation of the relationship between climate and art & literature. Introduction to ecological thinking followed by study of artistic and literary works thematically grouped by the four elements: Earth, Water, Air, and Fire. Readings from the German literary tradition (Goethe, Tieck, Stifter, Kafka, Frisch, Wolf) and contemporary research in the environmental humanities, with additional readings and viewings from elsewhere on the planet. Taught in English.

Recommended: 200-level General Education and/or humanities course; and sophomore standing.

Cross-listed with: CMLT399E.

Credit Only Granted for: GERM399E, CMLT399E, or GERS367.

Formerly: GERM399E.

Additional Information: Priority in enrollment will be given to German majors.

GERS369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

Formerly: GERS369.

GERS383 The 'Warrior' in German Culture: From Valiant Knights to Brazen Terrorists (3 Credits)

Acknowledging the nexus between acts of military aggression and political apparatuses, this course examines the semiotic significance of literary and cinematic manifestations of the warrior at critical junctures in German history. Taking the warrior as its focal point, this course explores the intricate web connecting various forms of military conflict, political systems of power, and social conventions within Western civilization from Antiquity to today. Taught in English.

GERS385 German Cinema (3 Credits)

A history of German cinema from the golden age of silent films to the flourishing film culture of the 21st Century. Focuses on changing ideas of the role and purpose of national cinema, as well as the cinematic representation of nation and national identity. Taught in English.

Cross-listed with: CINE385.

Credit Only Granted for: GERM385, GERS385, CINE385 or FILM385.

Formerly: FILM385.

GERS386 Experiential Learning (1-6 Credits)

Internship and practicum.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Junior standing or higher.

Credit Only Granted for: GERM386 or GERS386.

Formerly: GERM386.

GERS388 Language House Spring Colloquium (1 Credit)

For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.

Restriction: Must be a resident of Language House.

Repeatable to: 8 credits.

Formerly: GERM388.

GERS389 Topics in German Culture (3 Credits)

Topics in the cultures of the German-speaking peoples. Taught in English.

Repeatable to: 6 credits if content differs.

GERS397 Honors Reading (Independent Study) (3 Credits)

Supervised reading to be taken normally only by students admitted into honors program.

Credit Only Granted for: GERM397 or GERS397.

Formerly: GERM397.

GERS398 Honors Research (3 Credits)

Prepares students to write an honors thesis. Under the direction of a German department faculty member, the student will select a thesis topic and conduct the necessary research.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: GERM398 or GERS398.

Formerly: GERM398.

GERS399 Selected Topics in German Studies (3 Credits)

Selected topics on the language, literature, and culture of the German-speaking world.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 9 credits if content differs.

GERS402 Advanced Conversation and Composition (3 Credits)

Advanced instruction in and acquisition of written and oral communication skills in German

Prerequisite: GERS302; or students who have taken courses with comparable content may contact the department.

Restriction: Must not have completed GERS401 or GERS403.

Credit Only Granted for: (GERM401 and GERM403), GERM402, or GERS402.

Formerly: GERM402.

GERS411 German for International Business I (3 Credits)

Advanced skills in German for international business, including understanding and writing correspondence, reports, graphics, ads, etc., according to current German commercial style.

Credit Only Granted for: GERM411 or GERS411.

Formerly: GERM411.

GERS415 German/English Translation I (3 Credits)

An intensive presentation of German grammar limited exclusively to reading skill; graded readings in the arts and sciences. Instruction in English; cannot be used to satisfy the arts and humanities foreign language requirement.

Restriction: Must not have completed GERS103, GERS203, GERS204, GERS301, or GERS302.

GERS419 Selected Topics in German Language Studies (3 Credits)

The analysis of the German language as a reflection of cultural, functional, and social practice in the German-speaking world.

Prerequisite: GERS302; and permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: GERM419 or GERS419.

Formerly: GERM419.

GERS436 The Usual Suspects: Criminals in German Literature and Film (3 Credits)

An examination of how historical, cultural and political discourses in German-speaking countries influence social norms and criteria for judging what is considered socially acceptable or "deviant". Texts and films span from the 18th to 21st centuries. Taught in German.

Prerequisite: GERS320 or GERS322; or permission of instructor.

Credit Only Granted for: GERM436 or GERS436.

Formerly: GERM436.

GERS439 Selected Topics in German Literature (3 Credits)

Special study of an author, school, genre, or theme. Taught in German.

Prerequisite: GERS320, GERS321, or GERS322; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Formerly: GERM439.

GERS441 Border Crossings and Cultural Transfers (3 Credits)

Border Crossings and Cultural Transfers emphasizes the transnational and global dimensions of German culture, analyzing the interrelationship of dominant and minority cultures within Germany and/or the impact of German cultures abroad. Topics include migration, exile, (post)colonialism, and globalization. Taught in German.

Prerequisite: GERS320 or GERS322.

Credit Only Granted for: GERM441 or GERS441.

Formerly: GERM441.

GERS442 Gender and Sexuality in German Literature and Society (3 Credits)

Gender and Sexuality in German Literature and Society analyzes gender and sexuality as key discourses for understanding German-speaking literatures, cultures, and societies. Topics include the history of sexuality; death and desire; and representations of gender in German literature. Taught in German.

Prerequisite: GERS320 or GERS322.

Credit Only Granted for: GERM442 or GERS442.

Formerly: GERM442.

GERS443 Literature as Cultural Discourse (3 Credits)

Investigates literature as cultural discourse in the construction of knowledge, emphasizing a discursive approach to analyzing a range of literary texts. Taught in German.

Prerequisite: GERS320 or GERS322.

GERS444 The German-Jewish Experience (3 Credits)

Focuses on the German-Jewish experience as a key dimension of European history, literature, and culture. Topics include Heinrich Heine, German-Jewish authors and texts, and the Holocaust in literature and film.

Prerequisite: GERS320 or GERS322.

Credit Only Granted for: GERM444 or GERS444.

Formerly: GERM444.

Additional Information: Taught in German.

GERS449 Selected Topics in German Studies (3 Credits)

Study of a linguistic, literary or cultural topic in Yiddish, Netherlandic, or Scandinavian studies.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Formerly: GERM449.

GERS457 Germany: Energy Transition, Climate Change, and Sustainability (3 Credits)

Interdisciplinary examination of Germany as a leading model in dealing with contemporary issues of sustainability as well as the economic, social, and political impacts of climate change in a global world. Students will learn the basics of climate change, examine policy tools (e.g. carbon taxes, regulations, incentives, etc.) and technological innovations to curb the causes of climate change and promote sustainable practices. Students will also learn how cultural values and traditions inform policy making by examining the history of the environmental movement in German cultural artifacts (e.g., art, literature, grass-roots social movements, etc.). Designed to appeal to students with a variety of backgrounds (technical, policy and government, and humanities), the course blends site visits (e.g. coal mines, government offices, technical universities, artist studios, grass-roots collectives, museums, parks, etc.) with academic lectures by experts in pertinent fields and faculty-led discussion groups. Students will receive an overarching and holistic overview of the economic, political, and cultural costs of climate change as well as current efforts to offset the negative impacts through greater sustainability. Taught in English.

Cross-listed with: AREC357.

Credit Only Granted for: AREC357 or GERS457.

GERS458 Literary or Media Genres (3 Credits)

Literary or Media Genres studies the formal and stylistic dimensions of specific genres, emphasizing genre as a social, political, and aesthetic category. Topics include pop literature; the history of German drama; and German film genres among others.

Prerequisite: GERS320 or GERS322.

Repeatable to: 6 credits if content differs.

Formerly: GERM458.

Additional Information: Taught in German.

GERS473 Variation in Contemporary German Language (3 Credits)

Examines the unique, multilingual society that is modern Germany, exploring issues such as regional varieties, gendered language, language reform (and resistance to it), public and media speech, the influence of American English on colloquial speech and in specific fields, and the problems of immigrant communities acquiring both dialect and standard German.

Prerequisite: GERS302; or permission of instructor.

Credit Only Granted for: GERM473, GERS473, GERM673, or GERS673.

Formerly: GERM473.

GERS489 Social Issues in German Culture (3 Credits)

Special topics course examining the cultural constructions and representations of important social, political, and linguistic issues, investigating their connection to German values and institutions. Taught in German.

Prerequisite: GERS320 or GERS322.

Repeatable to: 6 credits if content differs.

Formerly: GERM489.

GERS498 Honors Thesis Writing (3 Credits)

Required for students pursuing departmental honors in German languages and literatures. Under the direction of a German department faculty member, students write their honors theses.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Formerly: GERM498.

GERS499 Directed Study (1-3 Credits)

Student-driven, independent study of a specialized topic in coordination with a faculty advisor.

Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 6 credits if content differs.

Formerly: GERM499.

GREK - Greek

GREK101 Elementary Ancient Greek I (4 Credits)

Study of basic grammar, development of reading facility, and introduction to Athenian life and culture in the fifth century B.C.

Restriction: A student who has had two units of Greek in high school may register for GREK101 for purposes of review but not for credit.

GREK102 Elementary Ancient Greek II (4 Credits)

Continuing development of basic grammar and reading skills; study and discussion of central aspects of Greek culture.

Prerequisite: GREK101; or students who have taken courses with comparable content may contact the department.

GREK111 Elementary Modern Greek I (3 Credits)

An introduction to the language and culture of modern Greece. Students begin to acquire the basic tools of the language and to communicate, in simple everyday situations. This is the first of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.

Restriction: Must not be a native speaker of Greek.

GREK112 Elementary Modern Greek II (3 Credits)

It is designed for students who have already completed the first semester course (GREK111) and/or those whose level of proficiency in Greek is not advanced enough for the intermediate level. Like GREK111, an introduction is provided to the language and culture of modern Greece. Students acquire the basic tools of the language and learn to communicate in simple, everyday situations. This is the second of our two-semester sequence in Elementary Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.

Prerequisite: GREK111; or permission of instructor.

GREK201 Intermediate Ancient Greek (4 Credits)

Advancing beyond the basic skills developed in GREK 101 and GREK 102; review of selected grammatical concepts; continuous reading of passages from Greek literature.

Prerequisite: GREK102; or students who have taken courses with comparable content may contact the department.

GREK211 Intermediate Modern Greek I (3 Credits)

A continuation of the study of basic structures and the development of fluency in functional, spoken and written communication. This is the first of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.

Prerequisite: GREK112; or permission of instructor.

GREK212 Intermediate Modern Greek II (3 Credits)

A continuation in the development of fluency in spoken and written communication along with the exploration of syntactic and grammatical structures. Comprehension and vocabulary enrichment are further developed through selected readings from Modern Greek prose and poetry. This is the second of our two-semester sequence in Intermediate Modern Greek and contributes to the fulfillment of the Global Engagement requirement of the College of Arts and Humanities.

Prerequisite: GREK211; or permission of instructor.

GREK269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GREK301 Scenes from Athenian Life (3 Credits)

Makes the transition from study of Greek grammar to reading. Focus on selected aspects of life in Athens: marriage, friendship, the courts, festival, theatre. Reading short works by three authors: Lysias, Plato, and a playwright (e.g., Menander). Readings are in ancient Greek.

Credit Only Granted for: GREK301 or GREK351.

Formerly: GREK351.

GREK369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GREK386 Experiential Learning (3-6 Credits)

Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

GREK388 Intermediate Ancient Greek Readings (3 Credits)

The reading of one or more selected Greek authors from the archaic period through late antiquity. Appropriate for those at an intermediate level in the study of ancient Greek.

Prerequisite: GREK201; or students who have taken courses with comparable content may contact the department.

GREK398 Advanced Modern Greek (3 Credits)

Develops advanced communication skills in the modern Greek language: speaking, listening, reading, and writing.

Prerequisite: GREK212; or permission of ARHU-Classics department.

Repeatable to: 6 credits.

GREK399 Topics in Advanced Modern Greek Language & Culture (3 Credits)

Development of communicative skills in advanced Modern Greek. Topics will be drawn from the social and folk life of modern Greece.

Prerequisite: GREK212; or permission of ARHU-Classics department.

Repeatable to: 6 credits.

GREK411 Modern Greek Literature and History (3 Credits)

Students will study historical and political events in Greece during the 19th and 20th centuries through the viewpoint of the man of letters. Poetry, prose, plays, and essays reflect national emancipation, social reconstruction, and political struggles. Readings and discussion are in Modern Greek.

Prerequisite: Students must have earned a grade of C- or better in a 300-level Modern Greek course.

Restriction: Permission of instructor.

Credit Only Granted for: GREK311 or GREK411.

Formerly: GREK311.

GREK415 Homer (3 Credits)

Extensive readings in Greek from the Iliad or the Odyssey, with special attention to the features of Homeric style and the relationship between the two epics.

Prerequisite: Permission of ARHU-Classics department.

GREK472 History and Development of the Greek Language (3 Credits)

Mastery of ancient Greek through grammar review, prose composition, and analysis of historical developments in Greek writers' modes of expression.

Restriction: Permission of instructor.

GREK488 Greek Readings (3 Credits)

The reading of one or more selected Greek authors. Reports.

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

Additional Information: Readings are in ancient Greek.

GREK499 Independent Study in Greek Language and Literature (1-3 Credits)

Prerequisite: Permission of ARHU-Classics department.

Repeatable to: 6 credits if content differs.

GVPT - Government and Politics

GVPT101 Introduction to Political Science (3 Credits)

A study of the basic principles and concepts of political science.

GVPT105 Introduction to Political Ethics (3 Credits)

An examination of major theories of political life and politics as they pertain to international politics, conflict, and culture. Emphasis will be given to theories of ethics and morality that pertain to international studies, such as human rights.

Restriction: Must be in the College Park Scholars program; and must be in International Studies program or Public Leadership program.

GVPT158 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GVPT170 American Government (3 Credits)

A comprehensive study of national government in the United States.

GVPT200 International Political Relations (3 Credits)

A study of the major factors underlying international relations, the causes of conflict and cooperation among international actors, the role of international institutions, the interactions of domestic and foreign policies, and major issues in security, economy and the environment.

GVPT201 Scope and Methods for Political Science Research (3 Credits)

An introduction to empirical research in political science.

Credit Only Granted for: GVPT100 or GVPT201.

Formerly: GVPT100.

GVPT202 Law or Politics? The U.S. Supreme Court and Individual Rights (3 Credits)

A thorough examination of the state of individual rights before the U.S. Supreme Court. The course will consider how recent cases the Court has decided and current pending cases have shaped the meaning of the U.S. Constitution. A critical component will involve peer deliberation over the proper roles of law and politics and their impacts on the current state of individual rights in the United States. Students will examine constitutional case studies throughout the semester and contribute to group and classroom discussions of issues being considered by the sitting Court. Students will also learn the foundational concepts of how the Court operates as both a legal and political institution, as well as its place in the larger political system. Special emphasis will be given to the social scientific study of the Supreme Court.

GVPT203 The Challenge of Authoritarianism (3 Credits)

An introduction to the persistent challenge of authoritarianism. The course explores the nature of authoritarianism and its evolution from ancient through modern times. Students will study how authoritarian regimes vary, why citizens sometimes comply with them, and when and how citizens rebel. The course concludes with a review of contemporary authoritarianism, focusing on its resilience in the Middle East and East Asia and its potential for a resurgence in the US and Europe.

GVPT204 Uncertain Partners: US and China in a Changing World (3 Credits)

The rapid ascent of the People's Republic of China (PRC) as a major political and economic power has meant that its relationship with the United States has become central in contemporary international politics. To an increasing extent, some of the biggest global challenges—ranging from nuclear proliferation, to climate change, to economic growth—require U.S.-China cooperation if they are to be managed effectively. Yet the U.S.-China relationship is at times turbulent, and its future remains highly uncertain. Will the U.S. and China be able to forge a closer partnership that will enable them to cooperate in dealing with some of the vexing challenges facing the international community? Or are they more likely to drift toward a more adversarial relationship, as China's growing power—and the US reaction—generate a vicious cycle of mutual mistrust? In this class, students will grapple with these questions as they learn about the history of U.S.-China relations, and about many of the current issues facing the relationship.

Credit Only Granted for: GVPT204 or GVPT289J.

Formerly: GVPT289J.

GVPT205 Special Topics in International Ethics, Conflict, and Immigration (3 Credits)

An examination of issues in international ethics, conflict generated at the international level, and problems in immigration policy and law, including theories of rights and immigration, and ideological sources of international violence.

Prerequisite: GVPT105.

Recommended: GVPT241.

Restriction: Must be in College Park Scholars program; and must be in GVPT international Studies program.

GVPT206 Appetite for Change: Politics and the Globalization of Food (3 Credits)

An overview of the major forces transforming the food system—political, economic, technological, environmental—and the political debates surrounding them.

Credit Only Granted for: GVPT206 or GVPT289A.

Formerly: GVPT289A.

GVPT207 Racial and Ethnic Politics in the Obama Era (3 Credits)

This course seeks to understand the meaning and significance of Barack Obama as the first African American president. The course examines the extent to which the United States of America has entered into a post-racial society. We also examine the policy challenges Obama has faced as the first African American president. One example is the passing of comprehensive health care reform. We discuss whether opposition to health care is driven by people's racial attitudes or their different views about the role of government. Other topics that the course will examine are: how Obama became the first African American president; the strategies his campaign used to motivate citizens to the voting booth; the public's reaction to Obama's election; racial group identity during the Obama era; Trump's victory as a response to Obama.

Credit Only Granted for: GVPT207 or GVPT289O.

Formerly: GVPT289O.

GVPT208 Political Science Topics in Study Abroad (3 Credits)

The study of topics in political science taken as part of an approved study abroad program.

Repeatable to: 9 credits if content differs.

GVPT210 Religions, Beliefs, and World Affairs (3 Credits)

Introduces students to an increasingly important question: what is the relationship between religion and politics around the world? For a long period in the 20th Century, religion seemed to be decreasing in importance. Eventually, it was thought, religion would simply go away and secularism, development, and rationality would rule the day. In the last generation, however, events like the Iranian Revolution, the rise of the Christian Right, 9/11, the Tibetan monks protest, the spread of Truth and Reconciliation Commissions, and numerous wars fought in the name of God have brought religion back to prominence in world affairs. In this course, we will explore the contemporary impact of religions on politics around the world, through four broad themes: how to understand religion in politics, the relationship between religion and the state, religious groups as sources of conflict and peace, and contemporary religio-political challenges.

Credit Only Granted for: GVPT210 or GVPT289L.

Formerly: GVPT289L.

GVPT211 Peace in our time? Conflict and Conflict Resolution in International Politics (3 Credits)

Is the world getting more peaceful? Wars rage in much of the world, leading millions of people to flee as refugees or internally displaced persons. Terrorist attacks kill thousands, and can occur in any corner of the planet. At the same time many actors use strategies such as peacekeeping, mediation, and human rights promotion to resolve conflicts and build peace. In this course, we examine conflict, peace, and conflict resolution in contemporary international politics. We interrogate concepts such as peace, conflict, and violence and the different forms they take. We discuss theoretical explanations for why individuals and groups have disputes and why they choose to use violence (or not) in these disputes. We analyze conflict resolution strategies such as mediation and peacekeeping theoretically and empirically. This discussion prepares students to develop an argument for whether the world is getting more peaceful and what this could mean about the future of violence and peace.

Credit Only Granted for: HNUH228A or GVPT211.

Formerly: HNUH228A.

GVPT217 Mock Trial (3 Credits)

Experience the excitement and reward of arguing, and perhaps winning your client's case in court. Mock Trial is designed for students who are interested in learning practical techniques for shaping the evidence, using the law, and exploiting the courtroom to create a coherent and convincing case theory.

Cross-listed with: MLAW217.

Credit Only Granted for: MLAW217, GVPT217, or GVPT319A.

Formerly: GVPT319A.

GVPT221 Introduction to Formal Theories of Political Behavior and Politics (3 Credits)

An introduction to the theories of rational choice including theories of negotiation and bargaining, elections and voting in democracies, community organizing and the contrast between the roles and performances of government and market.

Prerequisite: GVPT170.

GVPT228 The Craft of Political Science Research (4 Credits)

An introduction to research design and statistics applicable to political science.

Prerequisite: GVPT100 and GVPT170.

Restriction: Must be in a major in BSOS-College of Behavioral & Social Sciences; and sophomore standing or higher.

Repeatable to: 8 credits if content differs.

Formerly: GVPT227.

GVPT241 The Study of Political Philosophy: Ancient and Modern (3 Credits)

Examines some of the salient continuities and breaks between the ancient and modern traditions in Western political philosophy.

GVPT258 Introduction to Political Science Topics in Study Abroad (3 Credits)

The study of topics in political science taken as part of an approved study abroad program.

Repeatable to: 9 credits if content differs.

GVPT273 Introduction to Environmental Politics (3 Credits)

An overview of modern environmental philosophy, politics, and policy, exploring environmental politics in the US by way of comparison with other developed and developing countries.

GVPT280 The Study of Comparative Politics (3 Credits)

An introduction to the comparative study of politics and governance, including the analytical concepts for studies of politics and a survey of the major types of regimes, including democratic and authoritarian/communist regimes.

GVPT282 The Politics of Global Development (3 Credits)

A study of the domestic governmental institutions; processes and problems such as conflict and economic development; and the socio-economic environments that are common to lower-income countries around the world.

GVPT289 Special Topics in Government and Politics (1-6 Credits)

Substantive issues of and theoretical approaches to political phenomenon. Topics and credit vary.

Repeatable to: 6 credits if content differs.

GVPT289D How to Make Better Decisions (3 Credits)

The problem with decisions is that we rarely, if ever, find out if our decisions were good or bad. Was choosing your major, for instance, a good decision or could you have made a better one? I don't think most of us would ever know the answer to this question. So, is it possible that we regularly make bad decisions but don't know that we do? And, if so, how can we fix something if we don't know it is broken? In fact, we do regularly make bad decisions. This has been shown in many experimental studies some of which will be covered in this class. What is more, for some types of decision problems we are hardwired to make mistakes. This means that we are bound to go wrong regardless of how much we know or how smart we are. So, what can we do to remedy this problem? Quite a bit, as it turns out.

GVPT301 Identity and Conflict (3 Credits)

An examination of identity as a source of civil conflict. The course explores how identity is embedded in context, how identity is manipulated for political ends, and how identity conflict may be resolved.

GVPT306 Global Environmental Politics (3 Credits)

Focus on three processes of international environmental policy development- identifying problems, negotiating solutions, and implementing agreements- through a range of case studies, including global climate change.

Prerequisite: GVPT200.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations) ; or permission of BSOS-Government & Politics department.

GVPT308 Political Science Topics in Study Abroad II (3 Credits)

The study of topics in political science taken as part of an approved study abroad program.

Repeatable to: 9 credits if content differs.

GVPT309 Topics in International Relations (3 Credits)

The study of topics in international relations.

Repeatable to: 6 credits if content differs.

GVPT317 Mock Trial II: Advanced Trial Advocacy (3 Credits)

Development of trial advocacy skills through participation in practice trials and intercollegiate mock trial competitions. Student may have an opportunity to represent the university in intercollegiate mock trial tournaments, including the National Mock Trial Championships.

Prerequisite: GVPT217.

Credit Only Granted for: GVPT317 or GVPT319B.

Formerly: GVPT319B.

GVPT318 Classroom to Careers (1 Credit)

Embarking on a career post-college is both an exhilarating and a challenging journey. This course is designed to demystify the transition from university to professional life for GVPT students. Throughout the course, students will engage in a structured process to identify their professional interests and navigate through potential career avenues. Additionally, weekly sessions will feature in-person meetings with GVPT alumni from diverse sectors, offering students a unique opportunity to gain insights from several real-world professional trajectories. By the course's conclusion, students will not only have a framework for career planning but also gain firsthand narratives that bridge the gap between academic study and professional endeavor.

Restriction: Must be in Government and Politics program.

Repeatable to: 2 credits if content differs.

GVPT319 Topics in Social Advocacy (1-3 Credits)

Reading, research and discussion of variety of topics related to social advocacy.

Repeatable to: 6 credits if content differs.

GVPT320 Advanced Empirical Research (3 Credits)

Allows students to build on the knowledge of statistical inference they gained from GVPT201. Topics include data collection, data cleaning, data analysis, and data visualization. By the time students complete this class, they will be able to do basic statistical modeling using OLS regression independently.

Prerequisite: GVPT201.

Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

GVPT331 Courts, Law and Justice (3 Credits)

An introductory course to the study of law with emphasis on how lawyers and judges think and argue. Topics include, contract law, property, family law, torts, and criminal procedure.

Prerequisite: GVPT170.

GVPT339 Topics in Public Law (3 Credits)

The study of topics in public law.

Repeatable to: 6 credits if content differs.

GVPT349 Topics in Political Philosophy (3 Credits)

The study of topics in political philosophy.

Repeatable to: 6 credits if content differs.

GVPT354 International Development and Conflict Management (3 Credits)

Serves as the gateway course for the Minor in International Development and Conflict Management. Provides an introductory foundation in the theory and practice of international development and conflict management. Introduces the structures, key players, intersections, and main trends in the evolution of the fields. Explores causal factors that drive economic growth, poverty, inequality, and conflict, as well as the resources, methods, and tools available to track and address these issues.

Restriction: Sophomore standing or higher; and must be in one of the following minor programs (International Development and Conflict Management; Global Engineering Leadership; Global Poverty, Global Terrorism Studies) or have permission of the Center for International Development, or must be in the Government and Politics major with permission of the Government and Politics department.

Additional Information: Students enrolled in MIDCM are expected to take the course during the Fall semester after admission to the program.

GVPT355 Capstone in International Conflict Management (3 Credits)

Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international conflict management and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.

Prerequisite: GVPT354.

Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT356 Capstone in International Development (3 Credits)

Serves as one of the two capstone courses for the Minor in International Development and Conflict Management. Focuses on advanced theory and the practice and profession of international development and is designed to provide students an introduction to, and a chance to engage with, a core set of practical skills relevant to the field.

Prerequisite: GVPT354.

Restriction: Enrollment is restricted to students in the Minor in International Development and Conflict Management; and sophomore standing or higher; and permission of BSOS-Government & Politics department.

GVPT357 IDCM Practicum Course (1 Credit)

Fulfills the practicum requirement for students who are completing the International Development and Conflict Management (IDCM) minor program. A main purpose of the course is to amplify the value of each student's practical experiences - typically an internship - by reflecting on, consolidating, and translating that background in preparation for pursuing post-graduation paths that relate to the fields of international development and conflict management. It is taken in conjunction with the student's practicum experience, either concurrently or afterward.

Prerequisite: GVPT354.

Restriction: Must be in the International Development and Conflict Management minor; and permission of the Program Director for International Development and Conflict Management.

Credit Only Granted for: BSOS388E or GVPT357.

Formerly: BSOS388E.

Additional Information: Students must have requested and received approval for their practicum experience prior to enrollment.

GVPT358 Study Abroad Seminar in Political Science (3 Credits)

The study of topics in political science.

Repeatable to: 9 credits if content differs.

GVPT359 Topics in Comparative Politics (3 Credits)

The study of topics in comparative politics.

Repeatable to: 6 credits if content differs.

GVPT360 International Negotiations (3 Credits)

A study of the complexities of international negotiation and cross-cultural decision-making. Students will apply advanced computer technology in an interactive simulation involving actual negotiations.

Prerequisite: GVPT200.

GVPT368 Special Topics in Government and Politics (3 Credits)

The study of topics in government and politics.

Repeatable to: 6 credits if content differs.

GVPT368C Asian American Politics (3 Credits)

Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics.

Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.

Cross-listed with: AAST443, AMST498J.

Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.

Formerly: AAST498T.

GVPT368P Political Psychology, Israel, and the Middle East (3 Credits)

What is the role of perceptions and misperceptions in international politics? How do emotions impact policy-making processes? Does social psychology matter when analyzing domestic politics or foreign policy? Political psychology is an interdisciplinary academic field dedicated to the analysis of the nexus between psychological and political processes. This course will identify and employ multiple pertinent political psychology theories to account for Israeli domestic politics and foreign policy as well as other major political events throughout the Middle East including nuclear proliferation, terrorism, and territorial expansionism

Cross-listed with: ISRL383.

Credit Only Granted for: ISRL329Q, ISRL383 or GVPT368P.

Formerly: ISRL329Q.

GVPT373 Geographic Information Systems for Redistricting (3 Credits)

Local, state and federal governments must periodically draw and redraw political boundaries to account for shifts in the population. This course will be an introduction and overview of district drawing and redistricting as an important application of GIS research in political science and public policy. This class will equip students to use convenient GIS tools to create and consider alternative district scenarios to find the best possible solution. After finishing this class students will be able to draw districts to define police beats, sales territories, congressional and state legislative districts, school and fire protection districts, and numerous other boundaries. Recommended: at least one course in statistics.

Prerequisite: GVPT392.

Recommended: at least one course in statistics.

GVPT376 Applied Field Research in Government and Politics (3-6 Credits)

Students in this course participate as interns in an agency of government or in some other appropriate political organization. Assignments are arranged to provide students with insights into both theoretical and practical aspects of politics. Under the tutelage of the host agency and an academic advisor, students conduct a major research project of mutual interest to the student and his or her host agency in the field of government and politics.

Prerequisite: GVPT170.

Corequisite: GVPT377.

GVPT377 Experiential Learning: Government and Politics Internship Program (3 Credits)

The application of major concepts of political science to the realities of the political process. The course connects internship experiences with larger themes of political science. Students must be admitted to the GVPT Internship Program.

Prerequisite: GVPT170.

Credit Only Granted for: GVPT377 or GVPT388W.

Formerly: GVPT388W.

GVPT379 Topics in American Politics (3 Credits)

The study of topics in American politics.

Repeatable to: 6 credits if content differs.

GVPT386 Experiential Learning (3-6 Credits)

Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.

GVPT388 Topical Investigations (1-3 Credits)

Independent research and writing on selected topics in government and politics.

Prerequisite: 1 course from GVPT200-299 course range.

Repeatable to: 6 credits if content differs.

GVPT389 Experiential Learning II (3-6 Credits)

Experiential credit for working in government & politics related internships, research, and teaching opportunities.

Restriction: Permission of BSOS-Government & Politics department; and junior standing or higher.

Repeatable to: 6 credits.

GVPT390 Game Theory (3 Credits)

Introduction to game theory with applications to political science, economics and sociology. Topics include preference theory, expected utility theory, Nash equilibria, subgame perfection, repeated games, folk theorems, and evolutionary stability.

Restriction: Must not have completed ECON414.

Credit Only Granted for: GVPT399A, GVPT390, CMSC474 or ECON414.

Formerly: GVPT399A.

GVPT392 Introduction to Geographic Information Systems for Social Science Research (3 Credits)

Introduction to the use of Geographic Information Systems for conducting research in the social sciences. Overview of spatially embedded nature of many social science phenomena and content of theories common to spatial thinking. Students will obtain hands-on experience with various GIS tools and methods most frequently employed by social scientists.

Credit Only Granted for: GVPT392, GVPT429A, or GVPT729D.

Formerly: GVPT429A, GVPT729D.

GVPT393 Intermediate Geographic Information Systems (3 Credits)

Part II of a two-semester course that integrates Geographic Information Systems with social science research. Lectures and readings will motivate the use of GIS by exposure to research applications in international relations; political and non-profit fundraising; environmental justice; public health; race relations; business and economics.

Prerequisite: Must have completed one GIS course and at least one course in statistics.

Credit Only Granted for: GVPT368I, GVPT393 or GEOG498W.

Formerly: GVPT368I.

GVPT396 Introduction to Honors Research (3 Credits)

A required course for all honors students designed to emphasize library research, methodology, and writing skills in political science and political philosophy. A written proposal, bibliography and research design for an honors paper required of all students as a final project.

Restriction: Must be in Government & Politics Honors Program; and must have permission of the Government & Politics Honors Program.

GVPT397 Honors Research (3 Credits)

Individual reading and research. Preparation of an original paper.

Prerequisite: GVPT396.

Restriction: Must be in Government & Politics Honors Program.

GVPT399 Seminar in Government and Politics (3 Credits)

Reading, research, discussion, analysis, and writing in the area of politics. Both substantive issues and methodological approaches will be considered. Primarily for government and politics undergraduate majors.

Prerequisite: 1 course from GVPT200-299 course range.

GVPT402 International Law (3 Credits)

A study of the basic character, general principles and specific rules of international law, with emphasis on recent and contemporary trends in the field and its relation to other aspects of international affairs.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT404 Political Economy of Foreign Aid (3 Credits)

The world spends hundreds of billions of dollars on foreign aid every year. The effects of this aid spending are controversial. Research supports both pessimistic and optimistic views of foreign aid's effectiveness, with little consensus. Where does aid money go? What are the motivations of aid donors? Is foreign aid effective at achieving its goals? Why or why not? This course is designed to survey the promise and the challenges of foreign aid as a policy tool. The first half of the course will focus on the motivations and goals of foreign aid. We will consider various foreign aid donors, such as countries, institutions, and individuals, to understand the motivations behind and effects of foreign aid. We will create a typology of foreign aid agendas, motivations, and donors. The second half of the course will consider the challenges specific to foreign aid. This includes both technical challenges and political challenges. We will consider the strategies that aid donors and organizations have taken to try to overcome these challenges.

Recommended: GVPT200.

Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

Credit Only Granted for: GVPT409R or GVPT404.

Formerly: GVPT409R.

GVPT406 International Organizations (3 Credits)

A basic introduction to the full range of international organizations that have come into being over the past century and one-half, including those that aspire to be universal or global, those with a geopolitical or regional focus, and those that address specific structural or functional areas of human endeavor or issue areas.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT407 International Political Economy (3 Credits)

Introduces the field of international political economy, which analyzes the ways in which economic and political changes produce both economic and political reactions.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT409 Seminar in International Relations and World Politics (3 Credits)

Reading, writing, and research on topics in international relations and world politics. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT200.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations); and junior standing or higher.

Repeatable to: 9 credits if content differs.

GVPT410 Politics of Nationalist and Ethnic Conflict (3 Credits)

An examination of the major causes and consequences of ethnic, nationalist, and separatist conflict. The course will focus on both theories of ethnicity and nationalism, as well as theories of conflict related to these issues. The course will also explore empirical trends in ethnic and nationalist politics.

Prerequisite: GVPT200.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

Credit Only Granted for: GVPT409M or GVPT410.

Formerly: GVPT409M.

GVPT411 Conflict in the International System (3 Credits)

In this course, we will examine conflict, peace, and conflict resolution in contemporary international politics. We will interrogate what we mean by concepts such as peace, conflict, and violence, the different forms that these phenomena can take, and how we can measure their occurrence. We will discuss theoretical explanations for why individuals and groups have disputes, why these actors choose to use violence (or not) in these disputes, and ways in which violent disputes can be resolved peacefully. We will examine these arguments in a detailed study of conflicts in the Middle East, as well as by evaluating published articles that examine the effectiveness of conflict management strategies such as peacekeeping.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

Credit Only Granted for: GVPT409P or GVPT411.

Formerly: GVPT409P.

GVPT413 Peace, Justice, and Conflict Resolution (3 Credits)

An examination of classic and contemporary perspectives on peace, justice, and conflict resolution after armed conflict. The goal of this course is to expose students to the advantages, risks, and challenges of the most prominent methods of conflict mitigation and resolution, including mediation and arbitration; peacekeeping, peacemaking, and peacebuilding; the protection of civilians, Responsibility to Protect, and humanitarian assistance; elections, democratization, and power-sharing; and transitional reconciliation and justice. We will do this by reading, discussing, and synthesizing classic and cutting-edge Political Science research on these topics.

Recommended: GVPT200.

Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

Credit Only Granted for: GVPT409A or GVPT413.

Formerly: GVPT409A.

GVPT414 International Relations of East Asia (3 Credits)

An examination of international relations in East Asia, focusing mostly on Northeast Asia. The course will provide some background on the evolution of international politics in the region over the past several decades, and will examine several contemporary issues—including the North Korean nuclear issue, the relationship across the Taiwan Strait, and maritime disputes in the East and South China Seas—in depth.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics or Government & Politics: International Relations program.

Credit Only Granted for: GVPT409E or GVPT414.

Formerly: GVPT409E.

GVPT417 Seminar in Advanced Topics in Environmental Policy Analysis (3 Credits)

A series of critical tools and methods used to analyze environmental policy. This class should be of interest to students who are either considering a career or graduate studies in environmental protection.

Prerequisite: GVPT273.

Restriction: Must be in one of the following programs (Government & Politics; Environmental Sci&Policy-Env Politics & Policy).

Credit Only Granted for: GVPT419B or GVPT417.

Formerly: GVPT419B.

GVPT419 Seminar in Public Policy (3 Credits)

Reading, writing, and research on topics in public policy. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT241 and GVPT170.

Recommended: GVPT270.

Restriction: Must be in Government & Politics program.

Repeatable to: 6 credits if content differs.

GVPT420 The Logic and Practice of Measuring Political Behavior (3 Credits)

Introduction to concepts and practices used for measuring political behavior. Political analysis is an increasingly quantitative field. It is crucial for students of political behavior to learn how to define concepts in concrete ways, examine different methods of measuring concepts, learn how to test the quality of chosen measures, learn how to construct richer measures out of multiple questions, and finally how to examine the relationship between multiple measures of similar concepts. Common pitfalls, errors, bias, and ethics will be examined along the way.

Prerequisite: GVPT201.

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT421 Advanced Quantitative Methods (3 Credits)

Advanced quantitative methods for political science research.

Prerequisite: GVPT201.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT422 Quantitative Political Analysis (3 Credits)

Introduction to quantitative methods of data analysis, including selected statistical methods, block analysis, content analysis, and scale construction.

Prerequisite: GVPT241 and GVPT170.

Recommended: GVPT220.

Restriction: Must be in Government & Politics program.

GVPT423 Elections and Electoral Behavior (3 Credits)

An examination of various topics relating to elections; the focus includes the legal structure under which elections are conducted, the selection and nomination process, the conduct of election campaigns, and patterns of political participation and voting choice in different types of elections.

Prerequisite: GVPT241 and GVPT170.

Restriction: Must be in Government & Politics program.

GVPT424 Quantitative Study of International Relations (3 Credits)

A comprehensive introduction to the quantitative study of international conflict. Students will perform statistical analysis of international conflict data using the R software platform.

Prerequisite: GVPT201.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

Credit Only Granted for: GVPT409H (Fall 2015 and Fall 2016) or GVPT424.

Formerly: GVPT409H (Fall 2015 and Fall 2016).

GVPT428 Topics in Formal Theories of Political Behavior and Politics (3 Credits)

An evaluation of theories of political behavior such as game, social choice and voting theory, and their applications to problems of distribution and social justice, community organizing, responsive public policy, institutional design, and alliance and coalition formation.

Prerequisite: GVPT241 and GVPT221.

Restriction: Must be in Government & Politics program.

Repeatable to: 6 credits if content differs.

GVPT429 Problems in Political Behavior (3 Credits)

The problem approach to political behavior with emphasis on theoretical and empirical studies on selected aspects of the political process.

Prerequisite: GVPT241.

Recommended: GVPT220.

Restriction: Must be in Government & Politics program.

GVPT431 Introduction to Constitutional Law (3 Credits)

A systematic inquiry into the general principles of the American constitutional system, with special reference to the role of the judiciary in the interpretation and enforcement of the federal constitution.

Prerequisite: GVPT170 and GVPT331.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations); and junior standing or higher.

GVPT432 Civil Rights and the Constitution (3 Credits)

A study of civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and the rights of defendants.

Prerequisite: GVPT170 and GVPT331.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT439 Seminar in Public Law (3 Credits)

Reading, writing, and research on topics in public law. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT241 and GVPT170.

Recommended: GVPT331.

Restriction: Must be in Government & Politics program; and junior standing or higher.

Repeatable to: 6 credits if content differs.

GVPT442 History of Political Theory--Medieval to Recent (3 Credits)

A survey of the principal theories set forth in the works of writers from Machiavelli to Nietzsche.

Prerequisite: GVPT241.

Restriction: Must be in Government & Politics program.

GVPT443 Contemporary Political Theory (3 Credits)

A survey of the principal political theories and ideologies set forth in the works of writers from Karl Marx to the present.

Prerequisite: GVPT241.

Restriction: Must be in Government & Politics program.

GVPT445 Marxism and Postmarxism (3 Credits)

The study of Marxist thought and an assessment of the critical transformations and reassessments of the theory and practice of Marxism.

Restriction: Must be in a major within BSOS-Government & Politics department.

GVPT448 Non-Western Political Thought (3 Credits)

Examination of works by major authors and general themes of political thought originating in Asia, the Middle East, and Africa. This is not a survey of all non-Western political thought, but a course to be limited by the professor with each offering.

Prerequisite: GVPT241.

Restriction: Must be in Government & Politics program.

Additional Information: Permission of department required for repeat.

GVPT449 Seminar in Political Philosophy (3 Credits)

Reading, writing, and research on topics in political philosophy. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT241.

Restriction: Must be in Government & Politics program.

Repeatable to: 6 credits if content differs.

GVPT454 Seminar in the International Relations of China (3 Credits)

Explores the foreign relations behavior of the People's Republic of China, with focus on the contemporary era.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; and junior standing or higher. Or must be in Government & Politics: International Relations program; and junior standing or higher.

GVPT456 The Politics of Terrorism (3 Credits)

Examination of the definition, causes and organization of terrorist activity, along with key domestic and international counter- and anti-terrorism responses. Special emphasis on challenges and opportunities to the scientific study of terrorism.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

Credit Only Granted for: GVPT456 or GVPT459T.

Formerly: GVPT459T.

GVPT457 American Foreign Relations (3 Credits)

The principles and machinery of the conduct of American foreign relations and an analysis of the major foreign policies of the United States.

Prerequisite: GVPT200.

Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT458 Special Topics in Study Abroad IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

GVPT459 Seminar in Comparative Politics (3 Credits)

Reading, writing, and research on topics in comparative politics. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT200; and (GVPT282 or GVPT280).

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

Repeatable to: 6 credits if content differs.

GVPT460 State Politics and Government (3 Credits)

A study of the structure, procedures and policies of state governments with special emphasis on intergovernmental relationships, and with illustrations from Maryland governmental arrangements.

Prerequisite: GVPT241 and GVPT170.

Recommended: GVPT260.

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT461 Local Politics and Government (3 Credits)

An introduction to local government and politics in the U.S. context. The course explores the evolution of local jurisdictions, particularly cities, and the politics of local level decision making.

Prerequisite: GVPT170.

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

Credit Only Granted for: GVPT461 or GVPT479L.

Formerly: GVPT479L.

GVPT473 The U.S. Congress (3 Credits)

A detailed survey of lawmaking and the legislative process, emphasizing the U.S. Congress, and its members.

Prerequisite: GVPT241 and GVPT170.

Restriction: Junior standing or higher. And must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT474 Political Parties (3 Credits)

A descriptive and analytical examination of American political parties, nominations, elections, and political leadership.

Prerequisite: GVPT241 and GVPT170.

Restriction: Must be in Government & Politics program.

GVPT475 The Presidency and the Executive Branch (3 Credits)

An examination of the U.S. presidency in historical and contemporary perspective: nomination and electoral politics and the president's place in policy-making, administration, and public opinion.

Prerequisite: GVPT241 and GVPT170.

Restriction: Must be in Government & Politics program; and junior standing or higher.

GVPT476 The Business Government Relationship (3 Credits)

Examines the structures, process, and outcomes of business and government and the politics and products of their cooperative-adversarial relationships in the United States. The design integrates interest group and administrative politics and the public policy process.

Prerequisite: GVPT241 and GVPT170.

Recommended: GVPT270.

Restriction: Must be in Government & Politics program.

GVPT477 Voting and Participation (3 Credits)

A study of the factors that influence individual vote choice and voter participation in the U.S. The course will introduce political science research pertaining to both topics and will engage current controversies over such things as political campaign laws and the various state and federal rules that govern election administration.

Prerequisite: GVPT170 and GVPT241.

Restriction: Must be in Government & Politics program.

GVPT479 Seminar in American Politics (3 Credits)

Reading, writing, and research on topics in American politics. Both substantive issues and methodological approaches will be considered.

Prerequisite: GVPT241 and GVPT170.

Restriction: Must be in Government & Politics program; and junior standing or higher.

Repeatable to: 6 credits if content differs.

GVPT481 Government and Administration of Russia and the States of the Former Soviet Union (3 Credits)

A comparative study of the governmental systems and political processes of the states of the former Soviet Union.

Prerequisite: GVPT200; and (GVPT282 or GVPT280).

Restriction: Must be in Government & Politics program.

GVPT482 Government and Politics of Latin America (3 Credits)

A comparative study of the governmental systems and political processes of the Latin American countries.

Restriction: Must be in Government & Politics program; or must be in Government & Politics: International Relations program.

GVPT484 Government and Politics of Africa (3 Credits)

A comparative study of the governmental systems and political processes of the African countries, with special emphasis on the problems of nation-building in emergent countries.

Prerequisite: GVPT282 or GVPT280.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations).

GVPT485 Government and Politics of the Middle East (3 Credits)

A comparative study of the governmental systems and political processes of Middle Eastern countries, with special emphasis on the problems of nation-building in emergent countries.

Prerequisite: GVPT200; and (GVPT282 or GVPT280).

Restriction: Must be in Government & Politics program.

Credit Only Granted for: GVPT485 or GVPT459E.

Formerly: GVPT459E.

GVPT487 Government and Politics of China (3 Credits)

Discussion of major issues in the study of the domestic politics of the People's Republic of China.

Restriction: Must be in one of the following programs (Government & Politics; Government & Politics: International Relations); and junior standing or higher.

Credit Only Granted for: GVPT359A or GVPT487.

Formerly: GVPT359A.

HACS - ACES-Cybersecurity

HACS100 Foundations in Cybersecurity I (2 Credits)

Interdisciplinary foundational course of the ACES program. Through lectures, lab activities, and discussions, students will learn and practice various aspects of cybersecurity. Weekly technical lectures will introduce students to the operating system UNIX. Students will partner with the Division of Information Technology in a project to engage the University of Maryland community in a cyber-hygiene and cyber-ethics campaign based on the concepts learned in class.

Restriction: Must be a first-semester student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS101 Applied Cybersecurity Foundations (2 Credits)

Prepares students for team research that will be conducted in HACS 200. Students gain an understanding across the breadth of cybersecurity including system monitoring, networking basics and penetration testing. An applied approach to statistics is also included to prepare students to assess the data collected for their research projects. The course is conducted with a hands-on approach applying virtual environments to practice the concepts learned in the technical lectures each week.

Prerequisite: Minimum grade of C- in HACS100.

Restriction: Must be a second-semester student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS200 Applied Cybersecurity Foundations II (2 Credits)

Students will apply the skills learned in HACS 100 and 101 to practice cybersecurity research through team led projects employing honeypots, carrying that project through all stages - proposal, implementation, and analysis. Weekly lectures will supplement project work by addressing trends observed in honeypot attacks and protections needed, along with data collection and analysis tools, and other foundational cybersecurity concepts.

Prerequisite: Minimum grade of C- in HACS101.

Restriction: Must be a third-semester student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS201 Introduction to UNIX (1 Credit)

Introduction to the operating system UNIX through lectures and hands-on assignments.

Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

Credit Only Granted for: HACS201 or CMSC216.

Additional Information: Required course for students who have not completed the ACES Living-Learning Program or taken CMSC216.

HACS202 Group Project in Cybersecurity (3 Credits)

The group project in this course will combine technical, analytical, and communication skills, further engaging students in the practice of cybersecurity. Students will learn about design concepts and data analysis as they engage in a team project designing, deploying, and collecting and analyzing data from a honeypot. The hands-on nature of the course will give students experiential insight about how and why attackers attack and how to engage in protective measures to prevent attacks.

Restriction: Must be a first-year student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and cannot have been an ACES Living-Learning Program student (i.e., have taken HACS100, HACS101 and HACS200).

HACS208 Seminar in Cybersecurity (3 Credits)

Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

Repeatable to: 6 credits if content differs.

HACS208A Accounting and Economic Aspects of Cybersecurity (3 Credits)

In today's interconnected digital world, cybersecurity has become one of the most important issues confronting organizations in both the private and public sectors of an economy. Indeed, cybersecurity is a national and economic security priority in countries throughout the world. This is an interdisciplinary Honors Seminar offered as part of UMD's ACES program. The primary objective of this course is to discuss the relationships among accounting, economics and cybersecurity, with a focus on the important roles of accounting and economics in understanding the issues related to cybersecurity. A basic framework for assessing the interactions among accounting, economics, and cybersecurity will be developed and discussed. A secondary objective of the course is to assist ACES students in developing their ability to conduct original and applied research on topics related to "accounting and economic aspects of cybersecurity."

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208E Introduction to Reverse Engineering (3 Credits)

An introduction to software reverse engineering tools and methodologies. Fundamental topics will be introduced: compilers, linkers, loaders, assembly language, as well as static and dynamic analysis tools. We will motivate some reasons for software reverse engineering and examine the background material necessary for an understanding of the subject. This will include computer architecture and low-level systems programming, as well as an introduction to x86_64 assembly language. We will apply this newly acquired knowledge while learning about static and dynamic analysis tools used by practitioners of software reverse engineering.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208I Security Incident Handling and Management (3 Credits)

Examines the many roles, capabilities, organizations, and objectives involved in security incident handling and management. Core course content includes three major components: learning about the skill sets that people use, participating in role playing exercises that increasingly build upon this knowledge, and finally conducting exercises in a lab environment simulating security incident discovery, handling, and management.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208M Project Management Techniques for IT Professionals (3 Credits)

This course aims to build an in-depth understanding of project management methodologies for IT professionals. The course explores the application of Project Management Institute (PMI) guidelines for managing projects and PMP certification. Topics include an overview of PMI standards and project management, various roles in managing technical projects, work breakdown structures, security considerations, risk assessment, testing, and implementation. The students will have an opportunity to learn how to apply PMI guidelines in a real world software development project.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208N Digital Forensics (3 Credits)

Explores the various fields of digital forensics, such as memory, hard drive, and network traffic analysis. This course covers the legalities involved with forensic investigations and the wide variety of digital forensics tools, including both open source and proprietary. This course includes the different types of forensic artifacts that can be acquired and analyzed and review the careers and certifications relevant to the field.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208P Beyond Technology, the Policy Implications of Cyberspace (3 Credits)

Explores the key issues facing policy makers attempting to manage the problem of cybersecurity from its technical foundations to the domestic and international policy considerations surrounding governance, response, and critical infrastructure risk management. The course is designed for students with little to no background in information technology, and will provide the principles to understand the current debates shaping a rapidly evolving security landscape.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS208Z Methods for Solving (And not Solving) Puzzles (3 Credits)

Surveys modern problems from different domains in computer science and cybersecurity to train our minds to appropriately approach puzzles we encounter in the future. This course covers graph theory, including what a graph is and the kinds of objects it can model, connectivity types, and vertex/edge covers algorithms. This course covers computer networks, including the models used for network stacks and what algorithms are used to solve difficult problems present in our current networks. This course covers algorithm analysis, including greedy algorithms, big O complexity, and how to analyze the capabilities and limitations of an algorithm. This course introduces cryptography, including the difference between public-key and symmetric-key cryptography, how RSA works, and the cryptanalysis of well-known cryptosystems.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program.

HACS279 Undergraduate Research in Cybersecurity (1-3 Credits)

The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

Repeatable to: 6 credits if content differs.

HACS287 Undergraduate Research in Cybersecurity (3 Credits)

The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS297 Cybersecurity Experience Reflection (3 Credits)

Cybersecurity experience is defined as an experiential learning activity either with a University of Maryland entity (such as the Division of Information Technology, the ACES competition team or in an ACES outreach program), or with an external organization that will provide valuable, hands-on experience to supplement the knowledge learned in the other ACES coursework.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Living-Learning Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS318 Cybersecurity Professionals Colloquium Series (1 Credit)

The Cybersecurity Professionals Colloquium Series explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. The colloquium series consists of guest lectures of cybersecurity professionals. In written assignments, students will not only summarize the lecture content but also reflect on the significance of the lecture content for the field of cybersecurity.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

Repeatable to: 2 credits.

HACS402 Applied Security Analysis and Visualization (3 Credits)

Focuses on exploratory and statistical data analysis, data and information visualization, and the presentation and communication of analysis results. These topics will be presented and explored in the context of and with applications to cybersecurity related data.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408 Advanced Seminar in Cybersecurity (3 Credits)

Explores various lenses of cybersecurity in order to promote an interdisciplinary understanding of the field. Although each section may focus on a different topic, each integrates active student engagement, communication, critical communication, critical thinking, and teamwork.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

Repeatable to: 9 credits if content differs.

HACS408C Interpersonal Cyber Communications (3 Credits)

Designed to prepare students to participate in culturally responsible and environmentally appropriate communication in the workforce. Students will explore the industry standards for writing technical reports, as well as the variances between persuasive, team, written, and oral communication styles.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408L Analytical and Forensic Techniques for Cybersecurity (3 Credits)

Explores forensic artifacts contained in digital devices, security mechanisms available to protect digital devices and mechanisms available to cybersecurity professionals for analysis of digital devices. Topics include file structure and recovery of IoT and cell phone forensic data, network data capture and analysis, enterprise mobile device management analysis and forensic investigation of digital devices (IoT, telematics systems, etc.) that interact with cell phone and other devices. Incident response, timeline analysis, and detection and analysis of artifacts will be explored in a hands-on and lab-centric course using a variety of open-source tools and commercial cloud services.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408M Introduction to Cyber Threats and Risk Management (3 Credits)

Provides an exploration of cyber risk management and present-day cyber threats, their impacts, and their mitigations. Students will take a multi-disciplinary approach to understanding threats and risks including the technical, policy, and social aspects. This course is guided by real-world cyber threats and examples.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408O Internet of Things Security (3 Credits)

This increasingly interconnected world brings a need for understanding cybersecurity challenges associated with embedded devices and systems. This course will expose students to topics in Internet of Things (IoT) and Cyber Physical System (CPS) device types, IoT/CPS threat categories, security services, distributed networking, activity privacy, and intrusion detection for embedded environments. In addition to individual homework assignments, students will participate in a semester long group project involving research, design, and implementation.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408T Penetration Testing (3 Credits)

A hands-on, technically rigorous experience that prepares students for real-world work in penetration testing and offensive security. This course will allow students to gain proficiency and become comfortable using the tools, techniques, and methodologies that represent the state of the art in penetration testing today. Students should be comfortable on the command line, and a technical exposure to networking and basic proficiency in some scripting language (Bash, Ruby, or Python) is expected.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS408V Data Analysis and Visualization for Cybersecurity (3 Credits)

Focuses on exploratory and statistical data analysis, data and information visualization, and the presentation and communication of analysis results. These topics will be presented and explored in the context of and with applications to cyber security related data. Examples and illustrations will often involve the R programming language, but prior experience with R is not required and submitted work may involve the use of other languages and tools at times.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program.

HACS479 Undergraduate Research in Cybersecurity (1-3 Credits)

The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in research in order to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and to prepare for graduate school and the workforce.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

Repeatable to: 6 credits if content differs.

HACS487 Undergraduate Research in Cybersecurity (3 Credits)

A semester-long, individualized academic research project. Students work with a faculty supervisor to design and research an original topic. Students engage in research to gain greater insight into a specific area within cybersecurity, obtain an appreciation for the subtleties and difficulties associated with the production of knowledge and fundamental new applications, and prepare for graduate school and/or the workforce.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

HACS497 Cybersecurity Experience Reflection (3 Credits)

Cybersecurity experience is defined as an experiential learning activity either with a University of Maryland entity or with an external organization that will provide valuable, hands-on experience to supplement the knowledge learned in other ACES coursework. This course is intended to help students reflect on their cybersecurity experience and to learn from others' cybersecurity experiences. It is also intended to help students gain professional skills that will aid in their future career.

Prerequisite: Students may enroll concurrently with or after completing a cybersecurity related internship experience of at least 135 hours.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and must not have taken HACS297.

Credit Only Granted for: HACS297 or HACS497.

HACS498 Cybersecurity Group Problem Solving (3 Credits)

The Advanced Cybersecurity Experience for Students (ACES) program encourages its students to engage in team problem solving activities in order to gain greater insight into a specific area within cybersecurity and to obtain an appreciation for the subtleties and difficulties associated with these activities in order to prepare students for graduate school and the workforce. Students engage in a semester long problem solving or development project under the mentorship of a industry specialist and with the guidance of university faculty. Through the exercise the students will develop teamwork experience and professional communication skills in addition to experience of the project itself. The project might be evaluation, creation, testing or analysis of some area of cybersecurity as needed by the mentor-sponsor. A contract of what will be accomplished is required must be agreed upon by the mentor, the student and the ACES leadership before the project can begin.

Restriction: Must be a student in the ACES (Advanced Cybersecurity Experience for Students) Minor Program; and permission of UGST-HCOL-ACES Cybersecurity Program.

Repeatable to: 6 credits.

HBUS - Interdisciplinary Business Honors

HBUS100 The Future of Work: Interdisciplinary Foundations and Horizons of Business (3 Credits)

What should the future of work look like? Traditional hierarchies have come under increased scrutiny today for many reasons especially because it may not promote diversity, equity, and inclusion in the workplace. Moreover, they may not encourage experimentation, innovation, and business success. Not surprisingly then, companies are redefining what the future of work should look like. What are the shared responsibilities of an employer and employee? How can technology improve productivity and promote equity? What culture should businesses promote to welcome all employees and ensuring accountability? This course will address these and related questions.

HBUS105 The Future of Analysis: Making Data Driven Decisions in Business (3 Credits)

Students will address questions regarding how business is being shaped by the increased use of data. The course draws from various quantitative, computation, and technical fields to develop a big picture understanding of data science in business. Through examples and applications, students will address the challenging questions related to artificial intelligence, data science bias, and privacy.

Prerequisite: HBUS100.

HBUS200 Business and Deliberation: Innovation and Equity in Conditions of Uncertainty and Diversity (3 Credits)

How can managers better promote a diversity of thought within their organization? When business leaders tap into the plurality of perspectives among their employees, they can improve on many dimensions. Unfortunately, many businesses fail to create a culture of inclusion that puts them at a disadvantage when managing uncertainty. How can managers better listen to internal and external stakeholders? How can these diverse perspectives better inform business decision making? How can businesses with multiple objectives - such as triple bottom line companies - better engage with their employees, customers, and corporate partners? This course will address these and related questions.

Prerequisite: HBUS100 and HBUS105.

HBUS205 Capstone in Interdisciplinary Business (3 Credits)

As the capstone course in the Interdisciplinary Business Honors (IBH) Program, this course will give students the opportunity to apply what they have learned in the IBH program to a real-world company. This company will help present students with an opportunity to address a pressing challenge

Prerequisite: HBUS100, HBUS105, and HBUS200.

Restriction: Must be in the Interdisciplinary Business Honors Program.

HBUS307 Business Experience Reflection (3 Credits)

This course includes reflection on a completed business experience and preparation for future professional experiences. A business experience is defined as an experiential learning activity either with an external organization, i.e. an internship, or with a University of Maryland organization, that will provide valuable, hands-on experiences to supplement the knowledge learned in the IBH curriculum.

Restriction: Must be a student in the Interdisciplinary Business Honors Program; and permission of the IBH Program.

HDCC - Design Cultures and Creativity

HDCC105 Introduction to Design Cultures and Creativity I (3 Credits)

History, concepts, and technologies of creative design expression, coupled with an introduction to development for particular platforms and devices.

Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC106 Seminar in Design Cultures & Creativity (3 Credits)

Introduction to the methods and theory of design production, with emphasis on creative and expressive platforms.

Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC201 Capstone Proposal Through Design Thinking (1 Credit)

Engages principles of design thinking to prepare second-year students in the Design Cultures and Creativity (DCC) program to create a proposal for their spring Capstone Project.

Prerequisite: HDCC105 and HDCC106.

Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

HDCC208 Seminar in Digital Cultures and Creativity (3 Credits)

An advanced seminar in specific aspects of digital culture and creativity, designed to keep students abreast of the latest developments in new media and the online world. Possible topics include mobile gaming, digital storytelling, and electronic music.

Prerequisite: HDCC106 and HDCC105.

Restriction: Must be in the Digital Cultures and Creativity Honors College Living/Learning program.

Repeatable to: 6 credits if content differs.

HDCC209 Capstone in Design Cultures and Creativity (3 Credits)

Capstone for Design Cultures and Creativity in which students will develop their program capstone projects under the supervision of a faculty mentor, with regular checkpoints and presentations to track progress.

Prerequisite: HDCC208.

Restriction: Must be in the Design Cultures and Creativity Honors College Living/Learning program.

Repeatable to: 6 credits if content differs.

HDCC379 Design Cultures and Creativity Independent Study (1-3 Credits)

Involves research and/or creative scholarship directed by individual DCC faculty outside of the formal classroom structure.

Prerequisite: HDCC105.

Restriction: Must be enrolled in the Design Cultures and Creativity Honors College living-learning program; and permission of UGST-HCOL-Design Cultures & Creativity Program.

Repeatable to: 6 credits if content differs.

HEBR - Hebrew

HEBR102 Elementary Hebrew I-B (3 Credits)

Continues HEBR101. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing and reading ability. Corresponds to the second half of HEBR111.

Prerequisite: HEBR101; or must have placement by the Hebrew coordinator.

Restriction: Must not have completed HEBR111.

Credit Only Granted for: (HEBR101 and HEBR102) or HEBR111.

HEBR103 Elementary Hebrew II-A (3 Credits)

Continuation of HEBR102 and HEBR111. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the first half of HEBR112.

Prerequisite: HEBR111 or HEBR102; or must have placement by the Hebrew coordinator.

Restriction: Must not have completed HEBR112.

Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR104 Elementary Hebrew II-B (3 Credits)

Continuation of HEBR103. Modern Israeli Hebrew. Emphasis on conversation. Study of linguistic structure and development of audio-lingual, writing, and reading ability. Corresponds to the second half of HEBR112.

Prerequisite: HEBR103; or must have placement by the Hebrew coordinator.

Restriction: Must not have completed HEBR112.

Credit Only Granted for: (HEBR103 and HEBR104) or HEBR112.

HEBR106 Intensive Elementary Hebrew I (4 Credits)

An intensive study of fundamentals of Hebrew reading, writing, listening and Israeli culture. Covers present tense in all verb categories, basic syntax and builds vocabulary.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Credit Only Granted for: HEBR111 or HEBR106.

HEBR107 Intensive Elementary Hebrew II (4 Credits)

A continuation of intensive study of fundamentals of Hebrew reading, writing, listening, speaking and Israeli culture. Covers past tense in all verb categories, basic syntax and builds vocabulary.

Prerequisite: HEBR106 or HEBR111; or must have appropriate score on World Language Placement Test; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: HEBR107 or HEBR112.

HEBR199 Special Topics in Hebrew (3 Credits)

Topics in language, literature, and culture. Varies by semester and instructor.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 9 credits if content differs.

HEBR203 Intermediate Hebrew II-A (3 Credits)

Continuation of HEBR211 or HEBR202. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the first half of HEBR212.

Prerequisite: HEBR212 or HEBR202; or must have placement by the Hebrew coordinator.

Restriction: Must not have completed HEBR212.

Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR204 Intermediate Hebrew II-B (3 Credits)

Continuation of HEBR203. Study of linguistic structure, further development of audio-lingual, reading, writing, and speaking skills. Reading of texts and newspapers designed to give some knowledge of Hebrew life, thought and culture. Corresponds to the second half of HEBR212.

Prerequisite: HEBR203; or must have placement by the Hebrew coordinator.

Restriction: Must not have completed HEBR212.

Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR206 Intermediate Intensive Hebrew I (4 Credits)

Provides a comprehensive review of the fundamentals of Hebrew grammar and oral skills, and introduces new skills in future tense verb conjugation, and communication in reading, writing, listening and speaking.

Prerequisite: Must have completed HEBR107 OR HEBR112; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not be a fluent/native speaker of Hebrew.

Credit Only Granted for: HEBR206 or HEBR211.

HEBR207 Intensive Intermediate Hebrew II (4 Credits)

A review of the fundamentals of Hebrew grammar, reading, writing, listening and speaking.

Prerequisite: Must have completed HEBR206 OR HEBR211; or have the appropriate Score on the World Language Placement Test; or students who have taken courses with comparable content may contact the department.

Credit Only Granted for: HEBR207 or HEBR212.

HEBR212 Intermediate Hebrew II (6 Credits)

Continuation of HEBR211.

Prerequisite: HEBR211; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not have completed HEBR203; and must not have completed HEBR204.

Credit Only Granted for: (HEBR203 and HEBR204) or HEBR212.

HEBR249 Special Topics in Hebrew Studies (1-3 Credits)

A broad range of cultural and societal topics pertaining to the communication of Hebrew.

Prerequisite: Must have completed HEBR206; or HEBR211; or must have appropriate score on Foreign Language Placement Assessment; or students who have taken courses with comparable content may contact the department.

Repeatable to: 9 credits if content differs.

HEBR269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HEBR298 Special Topics in Jewish Studies (3 Credits)

Repeatable to: 6 credits if content differs.

HEBR298B Introduction to the Hebrew Bible/Old Testament (3 Credits)

Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.

Cross-listed with: JWST262, ENGL262.

Credit Only Granted for: JWST262, HEBR298B, or ENGL262.

HEBR298O Jewish Languages in America (3 Credits)

With a particular focus on language minority intra-group relationships – the convergences, divergences, feelings of solidarity and tensions of difference within the group–this course will examine the history, current functional use and identity implications of Jewish languages in the United States.

Cross-listed with: JWST285.

Credit Only Granted for: JWST285, JWST2190 or HEBR298O.

Formerly: JWST2190.

HEBR313 Conversation and Composition I (3 Credits)

A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.

Prerequisite: HEBR212; or students who have taken courses with comparable content may contact the department.

HEBR314 Conversation and Composition II (3 Credits)

A practical language course recommended for all students continuing with Hebrew. Review of grammar and composition. Selected readings. Oral and written exercises.

Prerequisite: HEBR313; or students who have taken courses with comparable content may contact the department.

HEBR369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HEBR381 Introduction to Hebrew Cultural Studies (3 Credits)

Critical study of Israeli culture with emphasis on literature, film, and art as sites of struggle over political and social meaning during times of cultural transformation. Focus on the historical development of Israeli identity and gender, in particular within the military and Zionist youth movements. Taught in Hebrew.

Prerequisite: HEBR314; or permission of instructor.

HEBR386 Experiential Learning (3-6 Credits)

Restriction: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor; and junior standing or higher.

HEBR388 Language House Colloquium (1 Credit)

For students residing in the Language House Immersion Program. Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.

Restriction: Must be a resident in the Language House Immersion program.

Repeatable to: 8 credits.

HEBR430 Critical Issues in Israeli Cinema (3 Credits)

Critical investigation of Zionist and Israeli culture and politics through film.

Cross-listed with: CINE430.

Credit Only Granted for: HEBR430, CINE430 or FILM430.

Formerly: FILM430.

HEBR498 Special Topics in Hebrew (3 Credits)

Repeatable to: 6 credits if content differs.

HEBR499 Independent Study in Hebrew (1-3 Credits)

Independent study under faculty supervision.

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

HEIP - Entrepreneurship and Innovation

HEIP143 Foundations of Entrepreneurship and Innovation (1 Credit)

Foundational ideas and terms in entrepreneurship and innovation are introduced, with attention to developing students understanding of cultivating a business in diverse, global environments; leading and collaborating in a competitive world; developing an entrepreneurial mind for an entrepreneurial world; and industry dynamics of technological innovation.

Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP144 Contemporary Issues in Entrepreneurship and Innovation (3 Credits)

Inspires entrepreneurial innovation and creativity through interactive lectures, workshops, and case studies on contemporary issues to include energy, life sciences, healthcare, and technology. Explores entrepreneurial innovation sources, structures and dynamics. Helps students develop skills for generating ideas and addressing current issues and problems.

Prerequisite: HEIP143.

Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HEIP240 Exploring International Entrepreneurship and Innovation (3 Credits)

An introduction to the opportunities and challenges of entrepreneurship and innovation from an international perspective.

Restriction: Must be an EIP student in good-standing.

HEIP241 EIP Capstone: Creating Enterprise with Social Impact (2 Credits)

Addresses the global necessity to develop and implement solutions to critical social and environmental concerns in ways that are both technologically viable and economically sustainable. Through group exercises, guest speakers, discussions, and experiential learning activities, students will develop the skills to create businesses that achieve the double bottom line of both profitability and social benefit.

Restriction: Must be in the Entrepreneurship and Innovation Program (EIP).

HESI - Higher Ed, Student Affairs, and International Ed Policy

HESI202 Race and Diversity in Higher Education (3 Credits)

Will discuss contemporary and controversial issues on race and diversity in higher education. Addresses the question: How should race influence college admissions and campus climate? Will expose students to different viewpoints on the role of race in higher education settings.

HESI220 Adaptive Strategies for Multicultural Leadership and Dialogue (3 Credits)

As U.S. society becomes increasingly complex along multiple and continually evolving dimensions of individual and group identities, successful leaders will benefit from learning adaptive strategies and practices that will help them to navigate this complexity and adapt effectively in a climate of constant change. This class will focus on specific strategies, concepts, and insights for successful leadership and dialogue in twenty-first century U.S. multicultural society.

Restriction: Must not have completed BSCV301; and junior standing or lower.

Credit Only Granted for: EDCP318L or HESI220.

Formerly: EDCP318L.

HESI221 Leadership, Power and Privilege (3 Credits)

Critical analysis of social issues, contemplative practice, and dialogue are used to examine how power and privilege operate at individual, institutional, and societal levels to impact leadership perceptions and behaviors.

HESI298 Special Problems in Higher Education, Student Affairs, and International Education Policy (1-6 Credits)

Individual instruction in special problems related to higher education, student affairs and international education policy.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI310 Transfer2Terp Learning Community: Applying Your Strengths at the University of Maryland and Beyond (3 Credits)

Students will identify their strengths and learn how to apply them both in and outside of the classroom. Students will work side by side with the faculty and staff in the Adele H. Stamp Student Union to learn about their strengths while applying them to leadership positions.

Restriction: Priority will be given to students transferring from Maryland Community Colleges; or permission of EDUC-Counseling, Higher Education and Special Education department.

HESI318 Applied Contextual Leadership (3 Credits)

Course will utilize experiential learning opportunities to develop and apply the knowledge and skills of leadership into specific contexts of leadership practice.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: HESI318 or EDCP318.

Formerly: EDCP318.

HESI418 Special Topics in Leadership (3 Credits)

The special topics and leadership course will address a single topic related to leadership through the semester. In-depth study and analysis on the topic will be the basis for the course. Topics include gender and leadership, ethics and leadership, and culture and leadership. Leadership will serve as the foundation in the course.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: HESI418 or EDCP418.

Formerly: EDCP418.

HESI421 Leadership and the Black Community (3 Credits)

Examines leadership from the perspective of the African American experience. Specifically, we will explore the concept and differing meanings of "leader and leadership" within the African-American community in the United States. Issues of leaders and leadership will be examined as influenced by political, cultural, and historic events. The course will place particular emphasis on colleges and universities as a microcosm of the larger society and as a cultural site for exploring and assessing issues of African American leadership.

Credit Only Granted for: HESI418B or HESI421.

Formerly: HESI 418B.

HESI422 Women and Leadership (3 Credits)

The primary goal of this course is for students to develop an understanding of women's leadership and women's ways of influencing organizations. The course will rely heavily on the idea that you must know yourself first before you explore how "you" fit into the organization and how that organization fits into a broader context such as nation, culture, or community. We will talk about the social constructs of leadership and gender, including systems and structures, and the role media, television, movies, and sports play in defining women and their leadership in a cultural context. The exploration of women leaders will be broad based including the role that gender identity and expression, race, sexual orientation, country of origin, and ethnicity/culture play in women's definition and the expression of their leadership.

Credit Only Granted for: HESI418G or HESI422.

Formerly: HESI418G.

HESI423 Leadership and Ethnicity (3 Credits)

Examines the concept of leadership from the standpoint of race, ethnicity, and culture. Specifically, we will explore the concept and differing meanings of leader and leadership within racial/ethnic communities in the United States. Issues of leaders and leadership will be examined as influenced by political, cultural, and historic events. The course will place particular emphasis on colleges and universities as a microcosm of the larger society and as a cultural site for exploring and assessing issues of race, ethnicity, diversity and leadership.

Credit Only Granted for: HESI418D or HESI423.

Formerly: HESI418D.

HESI424 Leadership and the Jewish Community (3 Credits)

Offers students the opportunity to critically examine leadership and leadership identity development in relation to Jewish culture and identity. Explores how Jewish culture and ethnicity influence leadership styles and the role that leadership has played within Jewish history. Students will explore general leadership theories as well as personal leadership identity development in both an overall sense and as a member of the Jewish community. Examines leaders within the Jewish movement and how their leadership has influenced Jewish communities and explores issues facing the Jewish community both on college campuses and in the world and prepare student leaders to act as advocates for the Jewish community.

Credit Only Granted for: HESI418F or HESI424.

Formerly: HESI418F.

HESI470 Introduction to Student Personnel (3 Credits)

A systematic analysis of research and theoretical literature on a variety of major problems in the organization and administration of student personnel services in higher education. Included will be discussion of such topics as the student personnel philosophy in education, counseling services, discipline, housing, student activities, financial aid, health, remedial services, etc.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

Credit Only Granted for: EDCP470 or HESI470.

Formerly: EDCP470.

HESI489 Field Experiences in Higher Education, Student Affairs, and International Education Poli (1-4 Credits)

Planned field experience in education and community related activities.

Credit not to be granted for experiences accrued prior to registration.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI498 Special Problems in Higher Education, Student Affairs, and International Education Policy (1-3 Credits)

Available only to HESI students who have formal plans for individual study of approved problems.

Prerequisite: Available only to HISA, HIED, and HIEP students who have formal plans for individual study of approved problems.

Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

HESI499 Workshops, Clinics, Institutes (1-6 Credits)

The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Higher Education, Student Affairs, and International Education Policy program (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listings.

Repeatable to: 6 credits.

HESP - Hearing and Speech Sciences

HESP120 Introduction to Linguistics (3 Credits)

An introduction to the scientific study of natural language with focus on the basic concepts of phonology, syntax, semantics and pragmatics, with subsequent attention to the applied aspects of linguistic principles.

Additional Information: HESP120 is required for HESP majors. HESP majors may not substitute LING200.

HESP150 Introduction to Language Science (3 Credits)

Language science is the scientific study of how humans acquire, use, comprehend, and produce language. Most people in all societies learn and use their native language or languages with apparent ease - but don't be fooled: languages are highly complex, and speaking and understanding language requires some amazing feats of mental acrobatics. Thus there are many opportunities for difficulties with language, which is the focus of our field. Understanding difficulties with speech, language, and hearing require first understanding how processing works when language is successful - the psychological (behavioral) and neurobiological (brain) factors that enable people to learn and use language despite its intricacies, the structure and properties of language itself, and how knowledge of language is acquired, represented, and processed in the mind and brain.

HESP202 Introduction to Hearing and Speech Sciences (3 Credits)

An introduction to communication sciences and disorders; a survey of the bases of normal speech, language and hearing ability, major forms of communicative disorders and their treatment.

HESP204 Multicultural Issues in Communication Disorders (3 Credits)

Enables students to understand cultural influences on communication, communication disorders, language, and society. Exploration of (self and others') perceptions, stereotypes, media influences and identity will be used to understand how society shapes and responds to language usage. We will also examine the legal and ethical implications of serving culturally and linguistically diverse populations.

HESP214 The Research Behind Headlines on Words, Thought, and Behavior (3 Credits)

How does the human mind use language? Type "Language Science News" into your Google search bar. Among the more than 3 billion hits, headlines like "What is love? It depends what language you speak" and "Science's English dominance hinders diversity" invite you to think about the impact of words on thought and behavior. These are stories about how humans acquire and use language, but they ultimately address big questions about how we experience knowledge itself. In a world of unprecedented access to science journalism, did you ever read a headline about human behavior and wonder. How do we know? This class takes up the elegant ways cognitive scientists design experiments to answer crucial questions about language and thought, brain and behavior, that have no intuitive answers. Students will dive deep into the media coverage of their favorite claims about what we know, debate the psychological science behind these claims, and develop transferable critical-thinking skills in the process.

Cross-listed with: HNUH278A.

Credit Only Granted for: HNUH278A or HESP214.

HESP258 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HESP300 Introduction to Psycholinguistics (3 Credits)

An introduction to current theories of language and an investigation of their relationship to human communication behavior. Survey of the experimental literature relating to this question.

Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.

Recommended: HESP120.

HESP303 Phonetic transcription (2 Credits)

An introduction to broad and narrow phonetic transcription, and to physiology of speech production. The primary goal of the course is to provide knowledge about phonetics and the ability to use this knowledge in an applied setting.

Prerequisite: Permission of instructor.

HESP305 Anatomy and Physiology of the Speech Mechanism (3 Credits)

Anatomy, physiology, and neurology of speech mechanism.

Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.

HESP306 Anatomy and Physiology of Speech & Hearing (4 Credits)

This is a 4-credit course focusing on the biological and neurological bases of human speech production and human hearing, namely the anatomy, physiology, and neurology of the vocal/speech mechanism and the hearing mechanism. Specifically, respiration, phonation, resonance, articulation, swallowing, and hearing will be highlighted. A strong understanding of normal anatomy and physiology is essential for the successful evaluation and treatment of patients with speech, language, swallowing and hearing disorders.

Prerequisite: Permission of instructor.

HESP307 Speech & Hearing Science (4 Credits)

Human hearing is exquisitely sensitive, allowing us to hear extremely faint sounds, to follow the sounds of a friend's voice in a loud party, and to appreciate subtle differences between words in the language. This course provides an introduction to the basic physics of sound, the acoustic properties of the sounds of speech, and the mechanisms by which those sounds are perceived by the listener.

Prerequisite: HESP303.

HESP311 Anatomy, Pathology and Physiology of the Auditory System (3 Credits)

Gross anatomy of the ear and pathways for transmission of sound energy through the peripheral and central auditory system. Causes, development and effects of pathological conditions contributing to temporary or chronic hearing impairments.

Prerequisite: Minimum grade of C- in HESP202; or permission of BSOS-Hearing & Speech Sciences department.

HESP313 Neurobiology for Speech and Hearing (2 Credits)

This course is designed to provide an understanding of normal neuroanatomy and neurophysiology of speech and language. It will also provide preliminary information regarding pathologic processes, especially those affecting speech and language

HESP359 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HESP386 Experiential Learning (1-3 Credits)

Students will have the opportunity observe and/or participate in therapy activities provided by a speech-language pathologist or audiologist in this experiential learning course.

Restriction: Junior standing or higher; and permission of BSOS-Hearing & Speech Sciences department.

HESP389 LEAP Classroom Internship (1-3 Credits)

Participation in a language-based, literacy-rich preschool classroom for children with speech-language disorders. Students will learn behavior management techniques, curriculum planning and implementation, facilitation of play among children, data collection and teaching strategies.

Prerequisite: HESP202; or students who have taken courses with comparable content may contact the department.

Restriction: Permission of BSOS-Hearing & Speech Sciences department.

HESP396 SIGMA Undergraduate Peer Mentor Clinical Practicum (2 Credits)

Students are paired with neurodivergent UMD students to support mentoring in social communication and executive functioning skills. Peer mentors are selected based on a rigorous application process for fall and spring semesters. Selected peer mentors will engage in an orientation process which includes in depth information on neurodiversity and the intersectionality of DEI; attend a weekly lecture and group sessions to acquire up-to-date knowledge and application of knowledge with neurodiverse populations; and manage meetings with neurodivergent students one-to-one on a weekly basis to support carryover of social coaching and executive functioning strategies.

Prerequisite: HESP202.

Recommended: Coursework in PSYC, EDUC, Human Development, Disability Studies.

Restriction: Sophomore standing or higher; and permission by instructor .

HESP397 SIGNA Undergraduate Peer Coach Clinical Practicum (3 Credits)

Students co-lead weekly groups for neurodivergent college students, coaching on topics and strategies pertaining to social communication and executive functioning skills. Peer coaches create outlines for weekly groups which are individualized by needs and interests. Peer coaches plan monthly social outings for SIGNA personnel to support generalization of executive functioning and social communication skills. Peer coaches are selected based on a rigorous application process for fall and spring semesters. Students who previously served in a peer mentor role in SIGNA are given priority consideration as peer coaches. Peer coaches will engage in an orientation process which includes in depth information on neurodiversity; attend weekly lectures to acquire up-to-date knowledge of neurodiverse populations; and attend group debrief meetings with the course instructor on a weekly basis to support implementation of social coaching and executive functioning feedback from groups.

Prerequisite: HESP202.

Recommended: Coursework in PSYC, EDUC, Human Development, Disability Studies, HESP396.

Restriction: Junior standing or higher; and permission of instructor.

HESP400 Speech and Language Development in Children (3 Credits)

Analysis of the normal processes of speech and language development in children.

Prerequisite: Minimum grade of C- in HESP300; or permission of BSOS-Hearing & Speech Sciences department.

Recommended: LING200 or HESP120.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP402 Language and Phonological Disorders in Children (3 Credits)

Etiology, assessment and treatment of language and phonological disorders in children.

Prerequisite: Minimum grade of C- in HESP400; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program.

HESP403 Introduction to Phonetic Science (3 Credits)

An introduction to physiological, acoustic and perceptual phonetics; broad and narrow phonetic transcription; current models of speech production and perception.

Prerequisite: Minimum grade of C- in HESP305; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP406 Acquired Neurogenic Communication Disorders in Adults (3 Credits)

Survey of the dysarthrias and aphasias in adults from an interdisciplinary point of view.

Prerequisite: Minimum grade of C- in HESP300 and HESP305; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP407 Bases of Hearing Science (3 Credits)

Fundamentals of hearing, including the physics of sound, anatomy and physiology of peripheral and central auditory nervous system, psychophysical procedures used in measurement of auditory sensation and perception, and topics in psychological acoustics.

Prerequisite: Minimum grade of C- in HESP311; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP411 Introduction to Audiology (3 Credits)

An introduction to the field of audiology. Evaluation and remediation of hearing handicaps.

Prerequisite: Minimum grade of C- in HESP311; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP413 Aural Rehabilitation/Habilitation (3 Credits)

The fundamental aspects of aural rehabilitation therapy for both adults and children are introduced to students. Class time will consist of lectures, discussions, and hands-on activities.

Prerequisite: HESP411.

Restriction: Sophomore standing or higher.

HESP415 Principles and Methods in Speech-Language Pathology (2 Credits)

The principles and methods required to provide treatment of speech and language disorders to children and adults. Topics include writing goals and objectives, programming, teaching strategies, session design, data collection, behavior modification and counseling.

Prerequisite: HESP400.

Restriction: Must be in Hearing and Speech Sciences program.

HESP416 Principles and Methods in Audiology (2 Credits)

Relate previous knowledge of anatomy/physiology and pathologies of the auditory system and integrate this information into clinical application.

Prerequisite: Minimum grade of C- in HESP411.

Restriction: Must be in Hearing and Speech Sciences program; and permission of BSOS-Hearing & Speech Sciences department.

HESP417 Principles and Methods in Speech-Language Pathology and Audiology (3 Credits)

The principles underlying the treatment of speech, language and hearing disorders in children and adults.

Prerequisite: HESP400 and HESP411; or permission of BSOS-Hearing & Speech Sciences department.

Restriction: Must be in Hearing and Speech Sciences program; or permission of BSOS-Hearing & Speech Sciences department.

HESP418 Clinical Practice in Speech-Language Pathology and Audiology (3 Credits)

Supervised observation with some direct participation in clinical methods for the treatment of disorders of articulation, fluency, child and adult language; evaluation and habilitation/rehabilitation of hearing impaired children and adults.

Prerequisite: Minimum grade of C- in HESP417.

Restriction: Permission of BSOS-Hearing & Speech Sciences department.
Repeatable to: 6 credits.

HESP420 Deaf Culture and ASL for the CSD Professional (3 Credits)

Studying Deaf Culture and American Sign Language (ASL) is crucial in enhancing the culturally competent practice of allied health/Communication Sciences and Disorders (CSD) professionals. This course explores the politics of (dis)ability through the lens of the experience of d/Deafness and the emergence of the Deaf community as a linguistic and cultural group in the United States, as well as issues that impact the provision of services to this population.

Prerequisite: HESP202 and EDSP220.

Credit Only Granted for: HESP498A or HESP420.

Formerly: HESP498A.

HESP422 Neurological Bases of Human Communication (3 Credits)

Basic neurology as it pertains to anatomy and physiology substrates of speech and language.

Prerequisite: HESP305; or permission of instructor.

Credit Only Granted for: HESP498 or HESP422.

HESP458 Global Perspectives in Communication Sciences and Disorders (3 Credits)

Provides students with a supervised and multidisciplinary international service learning (ISL) opportunity for the reciprocal exchange of cultural perspectives, knowledge, and skills. Through interactions with Ghana health and educational professionals as well as patients/clients and their families, students will gain perspective on broader health issues such as determinants of health, health disparities, and the global burden of disease. Students will have learning opportunities in governmental and non-governmental organizations (NGOs) to gain knowledge of and experience with varied healthcare and educational systems in under-resourced communities. In addition to observing and working with Ghana Speech-Language Therapists (SLT) and other rehabilitative professionals, students will assist faculty in the provision of educational workshops for professionals and/or outreach activities for the community.

Prerequisite: HESP202, HESP300, HESP311, and HESP400; and one course from (HESP406, HESP411, or HESP402).

Jointly offered with: HESP659.

Restriction: Must be a major in Hearing and Speech Sciences .

Repeatable to: 6 credits.

Credit Only Granted for: HESP659 or HESP458.

Additional Information: This course will require students to travel out of the country.

HESP468 Professional Development in Research and Academia (1 Credit)

The purpose of this seminar is to complement your honors project with practical advice on how to navigate successful careers in research and academia. As you progress through your undergraduate years (especially if you work in a lab), you will likely make several unofficial observations about life as a graduate student, postdoc, or professor, and overhear conversations that include new terminology that may be confusing (e.g., research mentorship, grants, conference abstract, tenure). This can create a mysterious aura around what it is like to obtain your PhD and work in academia generally. In this class, we will cover tips and skills that are often passed along informally in the lab; but here, we will discuss these issues overtly from a range of perspectives, experiences, and best practices.

Restriction: Must be in the Hearing and Speech Sciences Honors program; or permission of Hearing and Speech Sciences department.

Repeatable to: 3 credits if content differs.

Additional Information: This course would be taken for three semesters.

HESP469 Honor Thesis Research (1-3 Credits)

Student will develop thesis proposal, conduct research, analyze results, develop and defend final written document.

Prerequisite: Permission of honors thesis advisor required.

Repeatable to: 6 credits if content differs.

HESP489 Undergraduate Research Experience (1-3 Credits)

Undergraduate research experience working under HESP faculty or outside affiliates.

Prerequisite: HESP202.

Restriction: Permission of BSOS-Hearing & Speech Sciences department; and sophomore standing or higher.

Repeatable to: 6 credits.

Formerly: HESP388.

HESP498 Seminar (3 Credits)

Selected topics in human communication and its disorders.

Restriction: Permission of BSOS-Hearing & Speech Sciences department.

Repeatable to: 6 credits if content differs.

HESP499 Independent Study (1-3 Credits)

A directed study of selected topics pertaining to human communication and its disorders.

Restriction: Permission of BSOS-Hearing & Speech Sciences department.

Repeatable to: 6 credits if content differs.

HGLO - Honors Global Communities

HGLO100 The Student in the University: Global Communities (1 Credit)

Students will develop a sense of community within the program, become familiar with campus resources, gain skills and information to prepare for the Global Experience Semester, and explore the surrounding international community.

Restriction: Must be enrolled in Honors Global Communities Living-Learning Program.

Credit Only Granted for: BSGC100 or HGLO100.

Formerly: BSGC100.

HGLO101 Saving the World With Data (3 Credits)

The world is grappling with many intractable issues, like climate change, pandemics, democratic backsliding, and inequality. How can we use data analysis to help us better understand and work to solve these problems? In this class students will engage with a wide range of issues affecting the entire globe. In addition, they will also gain valuable data science skills by learning the basics of coding in R. No previous programming experience is required.

Restriction: Must be in Honors Global Communities Living-Learning program.

Credit Only Granted for: HGLO101 or BSGC101.

Formerly: BSGC101.

HGLO208 Using Data to Answer Hard Questions (3 Credits)

In this class, students will learn more advanced data science techniques and gain an understanding of hypothesis formation and general research design.

Prerequisite: GVPT201.

Restriction: Must be enrolled in Honors Global Communities Living-Learning Program.

Repeatable to: 6 credits if content differs.

HHUM - Honors Humanities

HHUM105 Honors Humanities: Introduction to the Arts and Humanities (3 Credits)

Introduction to the university, the different fields of the arts and humanities, and the history of how the university and the humanities have evolved across the world from ancient times to the present. Primary emphasis on reading and discussion of literary artifacts to assess the meaning and social status of the arts and humanities in the past and their personal and social value for the future.

Restriction: Must be an entering freshmen in the Honors Humanities Program.

Credit Only Granted for: ARHU105 or HHUM105.

Formerly: ARHU105.

HHUM106 Honors Humanities: The Humanities in Practice (3 Credits)

The application of the disciplines, methods and traditions of the Humanities to contemporary problems and issues such as social injustice, immigration, income inequality, and the role of social media. Students will apply to such issues the tools of the Humanities: research and historical analysis, critical reasoning, communication and persuasion, ethical debate, and imagination. The course will utilize the institutions of Washington, D.C. to explore contemporary problems and will guide students in the creation of their individual proposals for the capstone project that is the culmination of the curriculum in Honors Humanities.

Recommended: HHUM105.

Restriction: Must be in the Honors Humanities Program.

Additional Information: Priority enrollment will be given to students in Honors Humanities.

HHUM205 Second Year Seminar in Honors Humanities (3 Credits)

Seminar on basic issues and methodologies in the humanities and arts.

Credit Only Granted for: ARHU205 or HHUM205.

Formerly: ARHU205.

HHUM206 Honors Humanities Keystone Project (3 Credits)

Design, execution and completion of students' chosen Keystone Projects in the form of research, creativity, or service. Students will have formulated tentative plans for their projects in HHUM106; in this course they will revise and augment those proposals, articulate their connections with the traditions and methods of the humanities, formulate a work plan for completing the project within one semester, and work with their fellow students to workshop their materials as they develop. The course will culminate in a presentation of the project at the annual Keystone Symposium and with the submission of the project in its final form.

HHUM288 Seminar: Selected Issues in Honors Humanities (3 Credits)

Seminar on important topics in Arts and Humanities for students in the Honors Humanities Program.

Restriction: Must be in the Honors Humanities Program.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: ARHU288 or HHUM288.

Formerly: ARHU288.

HHUM328 Internship in Honors Humanities (1-3 Credits)

Supervised service-learning in Honors Humanities.

Prerequisite: HHUM105; and permission of the Honors Humanities Director.

Restriction: Sophomore standing or higher.

Repeatable to: 3 credits.

Credit Only Granted for: ARHU328 or HHUM328.

Formerly: ARHU328.

HHUM329 Undergraduate Teaching Assistantship (1-3 Credits)

Supervised pedagogical service-learning in the Honors Humanities curriculum.

Prerequisite: HHUM106, HHUM205, and HHUM105; and permission of the Honors Humanities Director.

Credit Only Granted for: ARHU329 or HHUM329.

Formerly: ARHU329.

HISP - Historic Preservation

HISP200 The Everyday and the American Environment (3 Credits)

An introduction to the theories of the everyday within the context of the American built environment. Focuses primarily on the American experience of underrepresented, minority, and/or immigrant communities; both historical and contemporary. Attempts to challenge what is meant by American in describing the American everyday built environment. Jointly offered with HISP615.

HISP319 Special Topics in Historic Preservation (1-6 Credits)

Students will explore technical aspects of preservation taught by practitioners whose expertise are of special benefit to undergraduate students.

Repeatable to: 12 credits.

HIST - History

HIST106 American Jewish Experience (3 Credits)

History of the Jews in America from Colonial times to the present.

Emphasis on the waves of migration from Germany and Eastern Europe; the changing nature of the American Jewish community and its participation in American social, economic, and political life.

Cross-listed with: JWST141.

Credit Only Granted for: HIST106 or JWST141.

HIST108 Freshman/Sophomore Seminar in History (3 Credits)

Seminar for freshmen and sophomores on a specific historical case study and historical "problem," taught by a professor who specializes in the field. Participants will learn about the subject by doing the work of historians: carefully considering primary and secondary sources, discussing them in a seminar format, and preparing original written work drawn upon these materials. Seminar topics will range widely and the offerings will vary each semester; these are "special topics" courses.

Repeatable to: 6 credits if content differs.

HIST108B Freshman/Sophomore Seminar in History; Gandhi: The Individual in History (3 Credits)

Uses the life and legacy of Mohandas K. Gandhi, in modern India and beyond, as a starting point to explore the relationship between individuals in world history and the social contexts that produced them. Topics include non-violence, diet, sexuality, politics, law, technology, the environment, and representations in film and other media.

HIST108C Martin Luther King Jr. (3 Credits)

Examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual, who articulated a moral compass of the nation, to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community", the Social Gospel, liberalism, "socially conscious democracy", militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.

Cross-listed with: AAAS298M, AMST189C.

Credit Only Granted for: HIST108C, AASP298M, AAAS298M, or AMST189C.

HIST110 The Ancient World (3 Credits)

Interpretation of select literature and art of the ancient Mediterranean world with a view to illuminating the antecedents of modern culture; religion and myth in the ancient Near East; Greek philosophical, scientific, and literary invention; and the Roman tradition in politics and administration.

HIST111 The Medieval World (3 Credits)

The development of Europe in the Middle Ages; the role of religious values in shaping new social, economic, and political institutions; medieval literature, art and architecture.

HIST113 The Making of Modern Europe (3 Credits)

Evolution of modern nation states since late medieval times. Industrial-economic structure and demography. Emergence of modern secular society.

HIST120 Islamic Civilization (3 Credits)

Introduction to society and culture in the Middle East since the advent of Islam: as a personal and communal faith; as artistic and literary highlights of intellectual and cultural life; and as the interplay between politics and religion under the major Islamic regimes.

Cross-listed with: RELS120.

Credit Only Granted for: HIST120 or RELS120.

HIST122 African Civilization to 1800 (3 Credits)

History of Africa from earliest times to 1800. Topics of study include origins of African societies, Nile Valley civilization, medieval African states and societies, Islam, oral traditions, African slavery and the slave trade, and early African-European interactions.

HIST123 Sub-Saharan Africa Since 1800 (3 Credits)

Overviews early mid-19th-century changes in African societies, European conquest and African resistances in the late 19th-century, colonial states and societies, African nationalisms and decolonization and the independence era. Struggles over social, economic, and political changes are emphasized.

HIST131 The History of the American Dream (3 Credits)

An introduction to the way Americans thought of themselves in the past, and their often conflicting visions of what constituted the American Dream. Central questions will include whether or not Americans have always envisioned their country as a land of equality, opportunity, democracy, and freedom and whether or not their ideas of what these values meant changed or remained the same over time.

Credit Only Granted for: HIST131 or HIST289J.

Formerly: HIST289J.

HIST132 Fighting Slavery (3 Credits)

An examination of the different tools and tactics, means and methods that Americans have used to escape slavery or try to eliminate it.

HIST133 God Wills It! The Crusades in Medieval and Modern Perspectives (3 Credits)

An examination of the identities and convictions both of the Western Europeans who participated in the Crusades and of the Easterners (Muslim, Christian, and Jewish) whom they encountered in the Holy Land. Focuses on the era of the first four great Crusades, from about 1095 to 1215. Consideration of the cultural impact of these movements on both Western Europe and the Middle East.

Cross-listed with: RELS133.

Credit Only Granted for: HIST133, RELS133 or RELS289D.

Formerly: RELS289D.

HIST134 Spies, Assassins, Martyrs, and Witches: Famous Trials in American History (3 Credits)

Examination of some of the most famous trials in American history and their enduring hold on the imagination.

HIST135 Civil Discourse or Urban Riot: Why Cities Don't (Often) Explode (3 Credits)

An examination of the mechanisms that promote peaceful co-existence in urban societies and a discussion of how and why city streets sometimes become violent.

Cross-listed with: JWST289E.

Credit Only Granted for: HIST135 or JWST289E.

HIST136 Moneyland: Business in American Culture (3 Credits)

An exploration of American business culture and institutions from colonial times to the present with emphasis on how inherited and acquired identities (social capital) have shaped Americans' experiences as entrepreneurs, managers, workers, and consumers.

HIST137 Pursuits of Happiness: Ordinary Lives in the American Revolution (3 Credits)

Investigates the search for personal fulfillment unleashed by the American Revolution; explores the many different meanings ascribed to the notion of the "pursuit of happiness" by Americans in the early national period.

Credit Only Granted for: HIST137 or HNUH218A.

HIST142 Looking at America through a Global Lens (3 Credits)

Looking at America will focus on a thematic approach to the study of foreign – negative and positive – perceptions of America in the 20th century.

Credit Only Granted for: HIST289I or HIST142.

Formerly: HIST289I.

HIST143 Power, Ritual, and Society in Western History (3 Credits)

Introduces students to influential works of political thinking, in the Western tradition from classical Antiquity to the present, that treat the relationship between power, ritual, and society. Investigates ritual and its relationships to power, both in reality and the imagination of political thinkers.

Credit Only Granted for: HIST289F or HIST143.

Formerly: HIST289F.

HIST146 Comparative History of Crime and Punishment (3 Credits)

Explores the transformation of crime and punishment in England, France, and America over five centuries. Focus is on the connections between forms of government, cultural norms, and punishment. How do ideas about government and its rightful exercise connect to which actions are deemed crimes, who is punished, and how they are punished? "Crimes" covered in this course will range from high crimes such as murder, theft, witchcraft, heresy, sedition, and treason to crimes of property and morals crimes such as non-attendance at church and drunkenness.

Credit Only Granted for: HIST289L or HIST146.

Formerly: HIST289L.

HIST147 History of Satan: Conceptions of Ultimate Evil from Antiquity to the Present (3 Credits)

Traces the concept of Satan in the Jewish and Christian traditions from the Hebrew Bible, through the early modern witch crazes, to the "Satanic Panic" of the '80s and modern conspiracy theories. We'll examine both how our darkest fears have changed over the centuries, and which elements have stayed remarkably consistent across time. In the process, we'll seek to answer our Big Question: How do ideas about the devil reflect the norms and anxieties of the cultures that produce them?

HIST187 God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience (3 Credits)

Examines the complicated relationship between theology, nationalism, sovereignty, and the ethical exercise of social control using case studies drawn from the Jewish historical experience. The universal and age-old issues implicit in the exercise of power have gained special moral force for Jews with the creation of the State of Israel, a Jewish and a democratic state with substantial non-Jewish minorities and hundreds of thousands of non-citizen subjects. Can these be reconciled? Jewish efforts over the ages and in recent times to define justice provide concrete examples through which to examine and discuss crucial abstract principles.

Cross-listed with: ISRL187, JWST187.

Credit Only Granted for: HIST187, JWST187 or ISRL187.

HIST189 Topics in History (1-3 Credits)

Thematic exploration of a topic in history at an introductory level with emphasis on understanding what historians do and how history is relevant in the contemporary world.

Repeatable to: 6 credits if content differs.

HIST200 Interpreting American History: Beginnings to 1877 (3 Credits)

The United States from colonial times to the end of the Civil War. Establishment and development of American institutions.

Credit Only Granted for: HIST156 or HIST200.

Formerly: HIST156.

HIST201 Interpreting American History: From 1865 to the Present (3 Credits)

The United States from the end of the Civil War to the present. Economic, social, intellectual, and political developments. Rise of industry and emergence of the United States as a world power.

Credit Only Granted for: HIST157 or HIST201.

Formerly: HIST157.

HIST204 Introduction to the History of Science (3 Credits)

An exploration of the roots of modern science from the ancient Greeks through the medieval and early modern periods. Focus on the men and women who helped to create the sciences and to change public perceptions of their disciplines.

Credit Only Granted for: HIST174 or HIST204.

Formerly: HIST174.

HIST205 Environmental History (3 Credits)

An exploration of the way different societies have used, imagined, and managed nature. Includes examination of questions of land use, pollution, conservation, and the ideology of nature, especially but not exclusively in Europe and North America.

HIST206 Introduction to the History of Technology (3 Credits)

Introduction to the history of major technological changes and innovations; examination of the revolutionizing potential of technology.

Credit Only Granted for: HIST175 or HIST206.

Formerly: HIST175.

HIST208 Historical Research and Methods Seminar (3 Credits)

Reading and research skills and methods. Research papers will be based on the topic of the seminar.

Restriction: Must be in History program.

Repeatable to: 6 credits if content differs.

Credit Only Granted for: HIST208 or HIST220.

Formerly: HIST220.

HIST210 Love, Labor, and Citizenship: Women in America to 1880 (3 Credits)

An examination of the economic, family, and political roles of colonial slave, immigrant and frontier women in America from the pre-industrial colonial period through the early stages of 19th-century industrialization and urbanization.

Cross-listed with: WGSS210.

Credit Only Granted for: HIST210, WMST210 or WGSS210.

Formerly: WMST210.

HIST211 Women in America Since 1880 (3 Credits)

An examination of women's changing roles in working class and middle class families, the effects of industrialization on women's economic activities and status, and women's involvement in political and social struggles, including those for women's rights, birth control, and civil rights.

Cross-listed with: WGSS211.

Credit Only Granted for: HIST211, WMST211 or WGSS211.

Formerly: WMST211.

HIST212 Women in Western Europe 1750-Present (3 Credits)

An analysis of the economic, family, and political roles of European women from 1750 to the present. The effects of industrialization on women's work and status, the demographic parameters of women's lives, and women's participation in political events from market riots to suffrage struggles.

Cross-listed with: WGSS212.

Credit Only Granted for: HIST212, WMST212 or WGSS212.

Formerly: WMST212.

HIST213 History of Sexuality in America (3 Credits)

Explores the social construction of sexualities from the first colonial settlement to the modern era in the United States. Analyzes the implications of these understandings for power relations in U.S. history.

Cross-listed with: WGSS298L.

Credit Only Granted for: HIST213, WMST298L or WGSS298L.

HIST215 Women in Western Europe to 1750 (3 Credits)

An exploration of the theories and rhetoric about the nature and existence of women in the West, focusing on the experience of women from the hegemony of Classical Greece to the French Revolution, an era that marks the beginning of a continuous process of change. Emphasis will be on the period between 1250 and 1750, when the Western European world was fundamentally altered in every aspect and in every level of society, culture, and government.

Credit Only Granted for: HIST215 or HIST219A.

Formerly: HIST219A.

HIST217 From Mary Wollstonecraft's Vindication to Bridget Jones's Diary: Women and Gender in Modern Britain: 1790-Present (3 Credits)

Starting with Britain's first feminist writer in the 1790s, Mary Wollstonecraft, and ending with the post-feminist fictional Bridget Jones, this course will examine the economic, social, political, and cultural lives of women in Britain since the late 18th century. We will meet famous British women (Queens Victoria and Elizabeth II, Virginia Woolf, Margaret Thatcher, etc) as well as ordinary women (industrial workers, Victorian prostitutes, war nurses and munitions workers, feminist activists, mothers, among others) to understand how class, gender, race, and history intersect. The course aims to provide an introduction to debates about gender and history and employs a variety of primary sources (including novels, autobiography, political pamphlets and social investigations, film) supplemented by secondary sources, to explore women's engagement in public life over the last 230 years.

HIST219 Special Topics in History (3 Credits)**HIST219I Religions of the Ancient Near East (3 Credits)**

Introduction to ancient Near Eastern religious systems and mythology, from the third millennium BCE through the fourth century BCE. Particular emphasis on Mesopotamia and ancient Israel.

Cross-listed with: RELS225, JWST225.

Credit Only Granted for: JWST225, HIST219I, RELS225, or RELS219A.

Formerly: RELS219A.

HIST219N Introduction to Humanities, Health, and Medicine (3 Credits)

An overview of the historical, cultural, ethical, and spiritual dimensions of medicine, human health, disease, and death from the points of view of various humanistic disciplines.

Cross-listed with: ARHU230, ENGL254, WGSS230.

Restriction: Permission of ARHU-English Department.

Credit Only Granted for: ARHU230, ENGL289C, ENGL254, ARHU298A, HIST219N, or WGSS230.

HIST219T Discovering the World of Ancient Rome (3 Credits)

An exploration of the cultural traits and developments of ancient Roman civilization from its roots in Etruscan culture, through the rise of the Roman Republic, to the expansion of Roman cultural influence in the ancient world and the emergence of the Roman Empire. Drawing upon the evidence of the archaeological remains as well as ancient historical and literary documents, students gain a basic familiarity with the principal monuments and artifacts of ancient Roman civilization, the various institutions and values that characterized the Romans, and the significant historical events that transformed the culture over the course of antiquity.

Cross-listed with: CLAS190.

Credit Only Granted for: CLAS190 or HIST219T.

HIST219X Modern Iran (3 Credits)

General sociopolitical introduction to modern Iran from establishment of the Qajar dynasty in the late 18th century to the present day. Taught in English.

Cross-listed with: PERS251.

Credit Only Granted for: PERS251 or HIST219X.

HIST220 The Atlantic World in the Age of Exploration, Conquest, and Settlement (3 Credits)

Study of encounters, exchanges, and clashes between Native Americans, Europeans, and Africans in the early modern Atlantic World. Examines conquest and colonial systems; movement of men and women and mixing of peoples, and the persistence of native folkways.

Credit Only Granted for: HIST219V or HIST220.

Formerly: HIST219V.

HIST221 Asian American History (3 Credits)

Introduction to the history of Asian Americans and Asians in the United States and the Americas and to the field of Asian American Studies, from an interdisciplinary perspective. Topics include theories of race and ethnicity; Asian migration and diaspora to the Americas; Asian American work and labor issues; gender, family, and communities; nationalism and nativism, and anti-Asian movements; Asian Americans in World War II, the Cold War, and the issues in the civil rights & post-civil rights era.

Cross-listed with: AAST201.

Credit Only Granted for: AAST201 or HIST221.

HIST222 Immigration and Ethnicity in America (3 Credits)

The history of immigration and the development of diverse populations in the United States are examined. Topics include related political controversies, the social experiences of immigrants, ethnicity, generations, migration, inter-group relations, race, and diversity in American culture.

Credit Only Granted for: AAST222, HIST222, or SOCY222.

HIST223 Globalizing the American Revolution (3 Credits)

How is the American Revolution a creation story in the making of our multi-cultural and interconnected modern world? Consider the Declaration of Independence. When first published on July 5, 1776, it was printed by an immigrant Irishman on Dutch paper that had been brought over from England. This was the first such declaration of independence ever issued, but its ideas and forms traveled far and wide. More than 100 other declarations of independence have been issued since then. The people that declaration mobilized are similarly diverse: the American Revolution is as much the story of Creek farmers, Spanish soldiers, French slaves, Canadian fugitives, Indian tea-growers, and African statesmen as it is of the Minutemen and Sons of Liberty. In this globe-trotting class, students will be positioned to debate how the familiar story of the American Revolution changes when we place it in transnational context.

Cross-listed with: HNUH218C.

Credit Only Granted for: HNUH218C or HIST223.

HIST224 Modern Military History, 1494-1815 (3 Credits)

Survey of global military history from the European "discovery" of the Americas to the end of the Napoleonic Wars. Explores how the creation of professional armies, advancement of weapons technology, and evolution of military-civilian relations in Europe during these three centuries sparked the "Rise of the West".

HIST225 Modern Military History, 1815-Present (3 Credits)

The military history of Europe through an examination of the economic, financial, strategic, tactical, and technological aspects of the development of military institutions and warfare from the Congress of Vienna in 1815 to the present.

HIST226 Revolution, Regret, and Reform: The People and Principles in American Political History (3 Credits)

Explores American political history from Independence through the present day. Interrogates the roots of American political ideas, the dynamics of partisan competition, the interaction of class, ethnicity, race, and politics, the evolution of policy preferences, the growth of the state, and the transformation of grassroots expectations and ambitions, among other important themes. By exploring the writings of major figures as well as the preferences of anonymous voters—and everyone in between, this course will help students identify the overarching themes and the important forgotten moments in our nation's political development.

Students will end the semester armed with a mastery of this history, an understanding of the methods of political historians and scholars in related fields, and a contextualization of our contemporary political world.

Credit Only Granted for: HONR299G or HIST226.

Formerly: HONR299G.

HIST227 Frederick Douglass's America (3 Credits)

What does it mean to be free in the United States? The concept of freedom was embedded in the nation's political culture in the Declaration of Independence, and it has remained a cherished and contested ideal. We can interrogate this concept through the life and times of Frederick Douglass (1818-1895), who dreamed eloquently of freedom, thought carefully about its limits, and worked ardently to build a firmer freedom for a broader population. With Douglass as our guide, we will examine the survival of slavery in a nation built on freedom, images of the expanding United States as a land of opportunity, and the complex meanings and tremendous costs of freedom struggles during the nineteenth century. This history will push you to think critically about the contested concepts that shape our lives, and to consider the values and the perils of a society that positions freedom as its highest ideal.

Credit Only Granted for: HNUH218B or HIST227.

Formerly: HNUH218B.

HIST231 London and the British Empire (3 Credits)

Focuses on the people, places, and policies that shaped the development of the British Empire, the single largest trans-cultural phenomenon in the world since 1500. Students examine how ideology, migration, technology and resistance shaped the expansion and eventual retrenchment of British imperial power in the Atlantic world and the Indian sub-continent. With the nation's capital as our classroom, students explore the complex workings and legacies of the British Empire from the perspective of its nerve center. The curriculum illuminates the experience of empire for subjects both in the colonies and the metropole and will pay particular attention to the maritime origins of empire, the lives of black Britons and the abolition of slavery, and the rise and fall of the British in India.

Cross-listed with: HONR231.

Credit Only Granted for: HIST219K, HONR249B, HONR231, or HIST231.

Formerly: HIST219K.

HIST232 The Historical Development of London (3 Credits)

Study Abroad in London, England. The history of London, beginning with its foundation by the Romans, continuing with the city's progressive political and cultural domination of England, the British Isles and the British Empire, and concluding with a look at the city in the 20th century. Students look at London through the eyes of contemporaries and historians while forming their own impressions of the city during course-based walking tours of the city.

Restriction: Permission of Study Abroad Office required.

Credit Only Granted for: GNED288 and HIST232.

Formerly: GNED288.

HIST233 Empire! The British Imperial Experience 1558-1997 (3 Credits)

Britain's empire from the mid-sixteenth century to the late twentieth century, focusing on the encounter between Britain and indigenous peoples. Topics include the origins of British imperialism in Ireland and North America, the slave trade, the East India Company and India, women in empire, transportation and the making of Australia, sex in empire, missionaries, racial theories, and decolonization.

Credit Only Granted for: HIST219P or HIST233.

Formerly: HIST219P.

HIST234 Invaders, Conquerors, Usurpers: A History of Pre-Modern Britain to 1485 (3 Credits)

British history from Roman times to the 15th century. The Anglo-Saxon, Scandinavian, and Norman invasions; the coming of Christianity; Magna Carta, the development of Parliament, legal institutions, and the Common Law; the decline of medieval kingship.

HIST235 Divorced, Beheaded, Deposed: England and Britain 1485-1689 (3 Credits)

British history from the War of the Roses to the Hanoverian succession; Yorkist and Tudor society and politics; the Renaissance and Reformation in England, Henry VIII through Elizabeth I; 17th-century crises and revolutions; intellectual and cultural changes; the beginnings of empire; the achievement of political and intellectual order.

HIST236 From Peacocks to Punks: Modern Britain from 1688 to Today (3 Credits)

British history from the Glorious Revolution of 1688 to the present. The revolution of 1688; the structure of 18th-century society and politics; economic and social change in the Industrial Revolution; 19th- and 20th-century political and social reform; imperialism; the impact of the First and Second World Wars on British society.

HIST237 Russian Civilization (3 Credits)

An overview of Russian history stressing the main lines of development of the Russian state and the evolution of Russian culture to the present day.

HIST240 Europe in the Twentieth Century (3 Credits)

Political, cultural, and economic developments in 20th-century Europe.

Credit Only Granted for: HIST240 or HIST337.

Formerly: HIST337.

HIST241 The Soviet Century (3 Credits)

The twentieth century was the "Soviet Century," or a twentieth century defined by the Soviet Union's birth, growth and demise. Beginning with this premise, the course starts with the revolutionary seeds of Soviet rule, the Russian empire and the revolution of 1905, and concludes with an examination of the former Soviet space in the aftermath of the Soviet collapse in 1991. Key topics include: 1) The origins, timing and intent of state-sponsored violence and terror 2) Agricultural and industrial modernization and 3) The Soviet Union as a new type of multi-ethnic state or empire. The last theme will get particular emphasis, and the course seeks to dismantle the long-standing notion that "Russian" and "Soviet" are the same thing. Instead, it emphasizes the Soviet Union as a multi-ethnic, multi-confessional society, one in which Russians interacted with myriad other ethnic groups, including Ukrainians, Kazakhs, Tatars, Armenians, Lithuanians, Tatars and others.

HIST245 Reformers, Radicals, and Revolutionaries: The Middle East in the Twentieth Century (3 Credits)

The 20th century was a period of dramatic changes in the Middle East. Within the global context of the two World Wars and the Cold War, countries in the region struggled with the effects of colonialism and painful processes of decolonization. The course offers a thematic-comparative approach to issues such as social and political reform, nationalism, the colonial experience, independence struggles, models of governance, political violence, and Islamism. Course lectures and the analysis and discussion of primary sources will lead students to understand that the peoples of the Middle East found answers to the challenges posed by Western dominance based on their specific historical, cultural and socio-economic circumstances.

Cross-listed with: RELS219K.

Credit Only Granted for: RELS219K or HIST245.

HIST247 Modern India and South Asia (3 Credits)

Surveys the making of modern India, as well as Pakistan and Bangladesh, from the onset of colonialism in the 18th century to the present day.

Focuses on three key themes: state formation and the persistence of regional identities; the negotiation of religious, ethnic, caste, and gender differences; and economic development and inequality.

Credit Only Granted for: HIST219J or HIST247.

Formerly: HIST219J.

HIST250 History of Colonial Latin America (3 Credits)

Introductory survey of the history of Latin America from pre-Columbian Indian cultures to the beginning of the wars for independence (ca. 1810), covering cultural, political, social, and economic developments. Major themes include conquest, colonialism, indigenous culture, African slavery, religion, race and ethnicity, and gender ideologies.

Cross-listed with: LASC250.

Credit Only Granted for: LASC250, HIST250, OR LASC250.

Formerly: LASC250.

HIST251 Latin America Since Independence (3 Credits)

Introductory survey of the history of Latin America from the era of independence (c. 1810-1825) through the early 1980s. Major themes include independence and sovereignty, postcolonialism and neocolonialism, nation- and state-building, liberalism, citizenship, economic development and modernization, social organization and stratification, race and ethnicity, gender relations, identity politics, reform and revolution, authoritarianism and democratization, and inter-American relations.

Cross-listed with: LASC251.

Credit Only Granted for: HIST251, LASC251, or LASC251.

Formerly: LASC251.

HIST254 African-American History to 1865 (3 Credits)

Survey of the principal developments in the history and culture of the peoples of African descent in colonial North America and the United States to 1865. Examines the African past, the Atlantic slave trade, variation in slavery, the growth of free black communities, the transformations of families and cultural forms, and patterns of resistance.

Cross-listed with: AAAS254.

Credit Only Granted for: HIST254, AAAS254 or AASP298C.

HIST255 African-American History, 1865 - Present (3 Credits)

An introductory course in the African-American experience in the United States from 1865 to the present. Topics include the aftermath of the Civil War on US race relations, the rise of segregation, northern migration, World War I and II, Civil Rights Movements, and the Black Power Movement.

Cross-listed with: AAAS255.

Credit Only Granted for: HIST255, AASP255, AAAS255 or AASP298A.

HIST261 Medicine in an Age of Empires, 1500-1800 (3 Credits)

An introduction to the broad shifts in European medicine of early modern period, a period that saw the extension of overseas empires and the emergence of medicine as a profession. The course offers a thematic and comparative look at the intertwined experiences of disease, empire, and global commerce that reshaped expectations of what medicine could or should do, for whom, and at what cost.

HIST266 The United States in World Affairs (3 Credits)

A study of the United States as an emerging world power and the American response to changing status in world affairs. Emphasis on the relationship between internal and external development of the nation.

HIST269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HIST270 Science Fiction, Afrofuturism, and Colonialism (3 Credits)

Explores the history of science fiction writing in the context of genuine historical events and issues in the background of authors and in the narratives they create. There is a deep intersection with colonialism and racism – one which was then traduced by two generations of sci-fi authors, and via Afrofuturism and dystopian Scifi, who turned around the genre to create a new set of plots and social messages. Students will leave the class with an appreciation of the difference between historical methodology and narrative, whether under the guise of fiction or speculative nonfiction. Students will encounter and understand cinematic and visual vocabularies as well as textual tropes.

HIST281 Inventing Traditions: The Making of Rabbinic Judaism (3 Credits)

Introduces the dramatic literary and cultural (as well as political and demographic) innovations that reshaped Judaism in late antiquity. Examines the fundamental works and genres of rabbinic literature and the religious movement that produced them. Special emphasis on the rabbinic uses of "tradition" to enhance authority and legitimacy, and to foster group identity.

Cross-listed with: JWST230, RELS230.

Credit Only Granted for: HIST281, JWST230, RELS219C or RELS230.

Formerly: RELS219C.

HIST283 History of the Jewish People II (3 Credits)

Political, economic, social, and cultural development within Jewish history from the end of Middle Ages to the present. Special attention to twentieth-century developments including the Nazi holocaust and its aftermath, the Zionist movement and the creation of the State of Israel; rise of the contemporary American Jewish community.

Credit Only Granted for: HIST283, HIST283H, JWST235, or JWST235H.

HIST284 East Asian Civilization I (3 Credits)

An interdisciplinary survey of the development of East Asian cultures. An historical approach drawing on all facets of East Asian traditional life, to gain an appreciation of the different and complex cultures of the area.

HIST285 East Asian Civilization II (3 Credits)

A survey of the historical development of modern Asia since 1700. Primarily concerned with the efforts of East Asians to preserve their traditional cultures in the face of Western expansion in the 18th and 19th centuries, and their attempts to survive as nations in the 20th century.

HIST286 Urban Dreams and Nightmares: The Jewish Experience of Cities (3 Credits)

Cities give expression to man's power while they highlight human limitations. It is urban social diversity that makes great wealth and thriving culture possible, but it also fixes discrimination behind walls constructed from paper and stone. Nations make cities symbols of the sacred and the glorious, while they ignore the poverty and social alienation that city life breeds. Jews, intensively urbanized for millennia, provide a special vantage point from which to study the beauty and the tragedy implicit in city-building. Our sources will include the Bible, poems, plays and novels but also US Supreme Court rulings and news of riots in Israel. We will survey how Jews have shaped, and been shaped by, the urban challenge over time and space.

Cross-listed with: JWST275.

Credit Only Granted for: HIST286 or JWST275.

HIST287 Why the Jews? Historical and Cultural Investigations (3 Credits)

Examines the history and culture of the Jews from the thirteenth century BCE/BC to the present through an examination of significant themes or problems (such as "religion" or "diaspora") that shape our understanding of the Jewish people. A primary focus in the course will be on texts, artifacts, and other cultural products by Jews and others that illustrate the history of the Jews help understand their cultural heritage.

Restriction: Must not have completed HIST282, HIST283, JWST234, or JWST235. Cross-listed with JWST233.

Credit Only Granted for: HIST287 or JWST233.

HIST289A Jews, Christians, and Muslims in Medieval Spain: Tolerance, Oppression, and the Problematic Past (3 Credits)

For 800 years, medieval Spain was home to one of the most religiously diverse societies in European history. Despite frequent hostilities, the interactions of Spanish Jews, Christians, and Muslims produced a flowering of science, theology, and literature in an often remarkably tolerant climate. Students will learn how medieval Spanish people themselves experienced interreligious contact and conflict. They will also discover the modern pressures, prejudices, and ideals that have shaped historians' interpretations of medieval Spain.

Cross-listed with: RELS289C.

Credit Only Granted for: HIST289A or RELS289C.

HIST289N The Politics of Sexuality in America: A Historical Approach (3 Credits)

Why do particular issues about sexuality hold such an important place in American political debates? What animates these controversies and what can a historical perspective on these issues add to our understanding of modern sexual politics? This class explores the historical sexual politics that undergird contemporary debates concerning sexuality in America. It focuses on topics that garner significant public attention - Reproductive rights - LGBTQ rights - Sexting - and explores the histories that undergird Americans' disagreements.

Cross-listed with: WGSS298N.

Credit Only Granted for: HIST289N or WGSS298N.

HIST289O Lawlessness: From Pirates to Body-snatchers, Exploring the Legitimacy of Illicit Activity (3 Credits)

Explores motives of and responses to the lawless behavior of pirates, body snatchers, bandits, vigilantes, smugglers and others worldwide from the 1500s to today.

HIST289R Pocketbook Politics: A History of American Buying and Selling (3 Credits)

Provides a thematic approach to consumerism as it emerged in the United States over the course of three centuries. The history of consumption is a prism through which many aspects of social and political life may be viewed. How does what we wear, what we listen to, or what we eat shape our identities?

HIST289T Jesus, Mani, and Muhammad: The Dynamics of New Religious Movements (3 Credits)

We examine three significant ancient religious figures: Jesus (d. 30s CE), Mani (d. 276 CE), and Muhammad (d. 632). All three were founders of long-lasting religions that were part of a dramatic change in the society and religion of the ancient world. Special areas of focus: the biographies of these founding figures, and how we know them; a historical approach to religious founders; and the sociology of new religious movements.

Cross-listed with: RELS273.

Credit Only Granted for: RELS273 or RELS289M or HIST289T.

Formerly: RELS289M.

HIST289V What Does It Mean to be An American? (3 Credits)

This course seeks to understand the on-going crisis over national identity and purpose by examining the many factors that go into the big stew known as America.

HIST289Y Zombies, Fear, and Contagion: A Cultural History of Public Health, Medicine, and Technology (3 Credits)

Historically examines how our fear of zombies reflects changing fears about the body, and anxieties about western medical and technological advancements.

HIST290 Can Jews be Arabs? Identity and Crisis for the Jews of Arab Lands in Modern Times (3 Credits)

For centuries, Jews inhabited the Islamic lands of the Middle East and North Africa. Their population has dropped from nearly one million a century ago to several tens of thousands today, mostly in Turkey and Iran. The vibrant and ancient Jewish communities of Iraq, Egypt, Syria, Morocco, Algeria, Libya, and several other countries were practically gone by 1970. One popular explanation for this exodus is that an "age-old schism between Jews and Muslims," in the words of the prominent historian Martin Gilbert, drove Jewish men and women to leave their historic homelands in the years following the first Arab-Israeli war of 1948. However, recent research into these communities offers a more complex picture of their lives in Islamic lands in the 19th and 20th centuries and subsequent departure.

Cross-listed with: JWST290.

Credit Only Granted for: JWST289A, HIST219C or HIST290.

HIST291 Jewish Texts and Cultures of the Second Temple Period (3 Credits)

An introduction to the literature, history, and culture of Jews in the period between the sixth century BCE and the second century CE. Special topics may include the rise of the formation of the biblical canon, scriptural interpretation, sectarian and revolutionary movements, and growth of the diaspora.

Cross-listed with: JWST231.

Credit Only Granted for: HIST291 or JWST231.

HIST299 Directed Research (1-3 Credits)

Closely guided research in primary sources for students currently enrolled in selected 100- or 200-level surveys in the Department of History.

Restriction: Permission of ARHU-History department.

Repeatable to: 9 credits if content differs.

HIST304 The Baddest Decade: The 1970s in American Film and American History (3 Credits)

The history of the United States and of its cinema in the 1970s.

Cross-listed with: CINE352.

Credit Only Granted for: CINE352, FILM352 or HIST304.

Formerly: FILM352.

HIST306 History of Religion in America (3 Credits)

A history of religion, religious movements, and churches in America from the early Colonial period to the present, with special attention to the relation between church and society.

Cross-listed with: RELS346.

Credit Only Granted for: HIST306 or RELS346.

HIST307 The Holocaust of European Jewry (3 Credits)

Roots of Nazi Jewish policy in the 1930's and during World War II: the process of destruction and the implementation of the "final solution of the Jewish problem" in Europe, and the responses made by the Jews to their concentration and annihilation.

Cross-listed with: JWST345.

Credit Only Granted for: HIST307 or JWST345.

HIST310 History of South Africa (3 Credits)

Explores the roots of Apartheid and the anti-Apartheid movement from precolonial times to the present: the social history of work and identity, the rise of kingdoms (Zulu, Sotho), conquest and colonial administration, urban and rural mass politics, gender relations, and the transition to democracy.

Formerly: HIST419E.

HIST319 Special Topics in History (3 Credits)

Repeatable to: 6 credits if content differs.

HIST320 Early Christianity: Jesus to Constantine (3 Credits)

Social and religious history of early Christianity from its origin in the first century to the reign of Constantine.

Cross-listed with: JWST331.

Credit Only Granted for: HIST320 or JWST331.

HIST321 Archaeology and the Quest for Ancient Israel (3 Credits)

The Hebrew Bible/Old Testament tells the story of "Biblical Israel" in ways that overlap with but are not identical to the evidence for "ancient Israel" provided by archaeological sources. Close attention to archaeology and inscriptional evidence allows for an understanding of biblical literature in light of its ancient Near Eastern context. Primary focus is on the Iron Age (ca. 1200-540 BCE), whose archaeology and inscriptions will be explored alongside biblical texts set during the this period but often written much later. Class discussion will address modern controversies regarding ancient Israel, including questions of origins (what does proto-Israelite mean?), problems of historiography (minimalist vs. maximalist), and archaeological dating (low chronology vs. high chronology).

Cross-listed with: JWST324.

Credit Only Granted for: HIST321 or JWST324.

HIST324 Classical Greece (3 Credits)

The ancient Greeks from Homer to Socrates, 800-400 B.C. Society and religion of the city-state, the art and literature of Periclean Athens, the Peloponnesian War, and the intellectual circle of Socrates.

HIST325 Alexander the Great and the Hellenistic Age (3 Credits)

History of the Greeks 400-30 B.C.: Alexander and the changes he wrought in the Mediterranean world; the rise of monarchies and leagues; new directions in religion, art, literature, and science; and Hellenization of the Near East, including the Jews.

HIST326 The Roman Republic (3 Credits)

Ancient Rome 753-44 B.C., from its founding to the assassination of Julius Caesar. Rome's conquest of the Mediterranean world, the social and political forces that brought it about, and the consequent transformation and decline of the Republic.

HIST327 The Roman Empire (3 Credits)

Roman history from Augustus to Heraclius, 44BC-641AD: The Imperial court and government; the diversity of culture in provinces and cities and the progress of Romanization; Roman religion and its transformation in late antiquity; the Roman army and defense of the frontiers.

HIST328 Selected Topics in History (3 Credits)

Repeatable to: 9 credits.

HIST328D Inventing Ancient Greek Culture (3 Credits)

Who were the ancient Greeks, and were they the founders of Western civilization? The course examines the foundations of ancient Greece. Through an analysis of the historical, archaeological, and linguistic evidence, it sheds light on the so-called Black Athena Controversy, which raised doubts about the ancient Greek contribution to Western culture. The course also focuses on the impact of modern identity politics on scholarly discussions of antiquity and the ways in which the Culture Wars of the 1980s and 1990s have influenced analyses of the ancient Greek world.

Cross-listed with: CLAS311.

Credit Only Granted for: CLAS311 or HIST328D.

HIST328W Women in Classical Antiquity (3 Credits)

A study of women's image and reality in ancient Greek and Roman societies through an examination of literary, linguistic, historical, legal, and artistic evidence; special emphasis in women's role in the family, views of female sexuality, and the place of women in creative art. Readings in primary sources in translation and modern critical writings.

Cross-listed with: CLAS320, WGSS320.

Credit Only Granted for: CLAS320, WMST320, WGSS320 or HIST328W.

HIST329 Special Topics in History (1-3 Credits)

Repeatable to: 9 credits.

HIST330 Europe in the Making: The Early Medieval West (A.D. 300-1000) (3 Credits)

From one empire to another: Rome to Charlemagne. This period is approached as a crucible in which classical, Christian, and Germanic elements merged, yielding new experimental syntheses. This course will deal with issues of authority, cultural trends, and the formation of group solidarity.

Cross-listed with: RELS340.

Credit Only Granted for: HIST330 or RELS340.

HIST331 Europe in the High Middle Ages: 1000-1500 (3 Credits)

Medieval civilization in the 11th through 15th centuries. Emphasis on cultural and political developments of the high Middle Ages with study of the principal sources of medieval thought and learning, art and architecture, and political theory prior to the Renaissance.

Cross-listed with: RELS341.

Credit Only Granted for: HIST331 or RELS341.

HIST332 Renaissance Europe (3 Credits)

Intellectual developments in Italy and Northern Europe from 1300 to 1550 and their influence on the arts and religion; social and economic trends, including the rise of the commercial economy in cities; the family and the role of women in society; expansion of Europe overseas and the beginnings of colonization; emergence of the state and consequent changes in political theory.

Cross-listed with: RELS342.

Credit Only Granted for: HIST332 or RELS342.

HIST333 The European Reformations (3 Credits)

Examination of developments in European religion between 1450 and 1700; the late-medieval Church and its critics; rise of Protestant thought in Germany and its spread throughout Europe; reform efforts in the Catholic Church; religious wars and violence and their impact on state and society; consequences of religious reform in society and its impact on the family and women.

Cross-listed with: RELS343.

Credit Only Granted for: HIST333 or RELS343.

HIST338 Special Topics in History (3 Credits)

Thematic exploration of a topic in history.

Repeatable to: 9 credits if content differs.

HIST339 Special Topics in History (3 Credits)

Thematic exploration of a topic in history.

Repeatable to: 9 credits if content differs.

HIST339G Greek and Roman Athletics (3 Credits)

The origin and evolution of athletics in ancient Greece and Rome studied as recreation, as play, as education, as a profession and as mass entertainment.

Cross-listed with: CLAS315.

Credit Only Granted for: CLAS315 or HIST339G.

HIST339J Ancient Slavery and its American Impacts (3 Credits)

Interrogates how slavery permeated the ancient Mediterranean societies of Greece and Rome. We will pay particular attention to how hierarchical inequalities are institutionalized, experienced, and represented and to how different marginalized and dominant groups interacted. Enslaved persons performed necessary labor in Greece and Rome and their work was essential for the formation of ancient society in agriculture, mining, domestic spaces, literature, finance, and government. Studying ancient slavery offers a chance to examine Greece and Rome from the bottom up, parsing the scant literary and material evidence for the lives and struggles of enslaved persons. We will practice several different approaches in order to tease out the systematic, economic, political, and personal effects of slavery in the ancient world. The United States of America was also founded as a slave society, and discussions of slavery in the Americas often look back to the ancient Mediterranean. The course will therefore conclude with a unit on how enslavers and abolitionists in the United States utilized and responded to slavery in antiquity.

Cross-listed with: CLAS340.

Credit Only Granted for: CLAS340 or HIST339J.

HIST343 Empires, Revolutions, and Cold Wars: Modern Central and Eastern Europe (3 Credits)

We live in an international system upended by Russia's full-scale invasion of Ukraine in 2022. Central and Eastern Europe -- a region largely taken for granted since the end of the Cold War -- is now once again the key battleground for the future of the rules-based global order. This course will offer a broad overview of that region's history since the late 1700s -- through empires, revolutions, and cold wars -- and provide students with the critical tools to develop their own views on that history.

Credit Only Granted for: HIST328L or HIST343.

Formerly: HIST328L.

HIST345 From Body Snatchers to Jack the Ripper: Scandal and Crime in Victorian Britain (3 Credits)

Rumors of the Queen's affairs, grave robbers feeding the medical profession's study of anatomy, female poisoners terrifying the nation's husbands, white slave traders at train stations, and a serial killer targeting London's poorest prostitutes: These are just some of the cases we will use to explore the larger social, legal, moral, and political context of 19th Century Britain and the role of the media in creating sensation and scandal. This course will answer such questions as: Why was the Victorian public fascinated by murder, whether done by an unhappy wife or a Jekyll-Hyde figure lurking at night in London's slums? What do certain crimes and scandals tell us about what it meant to be "Victorian," and how certain stereotypes we may have about Victorians today are not true at all? How did these scandals/crimes become part of popular culture at the time and how/why do they continue to be part of the entertainment we enjoy today?

Credit Only Granted for: HIST329P or HIST345.

Formerly: HIST329P.

HIST352 America in the Colonial Era, 1600-1763 (3 Credits)

The founding of the English colonies in America and their European backgrounds, the reasons for the instability of colonial society to 1689 and the emergence of stable societies after 1689; the development of colonial regionalism, political institutions, social divisions, the economy, religion, education, urban and frontier problems in the eighteenth century.

Prerequisite: HIST200, HIST210, HIST213, or HIST254; or must have completed HIST156; or permission of instructor.

HIST353 America in the Revolutionary Era, 1763-1815 (3 Credits)

The background and course of the American Revolution and early nationhood through the War of 1812. Emphasis on how the Revolution shaped American political and social development, the creation of a new government under the Constitution, and the challenges facing the new nation.

HIST354 Ante-Bellum America 1815-1861 (3 Credits)

Traces how the strong nationalism after the War of 1812 transformed into the sectionalism that led to Civil War. The course concentrates on the controversies over slavery and other issues contributing to North-South antagonism, including Jacksonian democracy, capitalism, racism, immigration, manifest destiny and religious, social, and intellectual movements, each of which produced its own social tendencies and tensions.

HIST355 Civil War and the Rise of Industrialization, 1860-1900 (3 Credits)

Civil War, sectional and class conflicts and their impact on American life and institutions from the beginning of the Civil War through the Gilded Age; social, economic, and political reconstruction of the Union; industrialization, urbanization, and technological changes.

Credit Only Granted for: HIST355 or HIST364.

HIST356 Emergence of Modern America, 1900-1945 (3 Credits)

The emergence of modern institutions and identities, 1900-1945. These institutions may include corporate enterprises and the welfare state; identities include homosexuality, the New Woman, and the New Negro.

HIST357 Recent America: 1945-Present (3 Credits)

American history from the inauguration of Harry S. Truman to the present with emphasis upon politics and foreign relations, but with consideration of special topics such as radicalism, conservatism, and labor.

HIST360 Women and the Civil Rights Movement (3 Credits)

Twentieth-century U.S. civil rights movement from the vantage point of women, considering both women's involvement in the legal campaigns and political protests and the impact of civil rights struggles on women's condition, status, and identity.

HIST361 Metropolitan Change and Modern America: Cities, Suburbs, Hinterlands (3 Credits)

An exploration of the forces that have transformed metropolitan and rural life since the mid-19th century. What role have politics, policy, economics, and ideology/culture played in creating an urbanized and then a "suburbanized" nation?

Credit Only Granted for: HIST419B or HIST361.

Formerly: HIST419B.

HIST369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HIST370 Jews and Judaism in Antiquity I: Sixth Century BCE through the First Century CE (3 Credits)

Political, social, and religious history of the Jews from the Persian period to the Judean revolt of 66-70 CE. Special attention to the rise of sectarian and revolutionary movements.

Cross-listed with: JWST325.

Credit Only Granted for: HIST370 or JWST325.

HIST371 Jews and Judaism in Antiquity II: First through Seventh Century (3 Credits)

Political, social, and religious history of the Jews from the destruction of the Jerusalem Temple in 70 CE to the Muslim conquests. Special attention to the political transformations in Judaism under late Roman Christianity, and the rise of the Rabbinic movement.

Recommended: HIST370.

Cross-listed with: JWST326.

Credit Only Granted for: HIST371 or JWST326.

HIST373 Martyrs & Merchants, Lawyers & Mystics, Magicians & Messiahs: Jews Between Medieval and Modern Times (3 Credits)

In an era marked by traumatic expulsions, inquisitorial barbarism, and enforced ghettoization, Jews reinvented themselves. Through their international networks of trade, Jews learned how to negotiate with kings and to govern new, large urban communities in new lands. They took advantage of the printing press to reorganize their literary traditions of law, biblical studies and mysticism, and created new hierarchies of religious status. And they flocked to hear new kinds of enthusiast preachers, celebrating the man they saw as the messiah finally come. We will together explore the contradictory forces that ultimately gave birth to the modern Jew.

Recommended: HIST287 or JWST233; HIST 332; .

Cross-listed with: JWST333.

Credit Only Granted for: JWST333 or HIST373.

HIST375 Modern Jewish History II: World Jewry Since 1870 (3 Credits)

Social, political, economic, and cultural change in the Jewish world since 1870. Emphasis on emancipation, assimilation, and new forms of Jewish identity in Western and Eastern European Jewry from the 19th Century to the present. Cross-listed with JWST344.

Credit Only Granted for: HIST375 or JWST344.

HIST376 History of Modern Israel (3 Credits)

History of modern Israel since the beginning of the Zionist settlement in 1882. Attention to different interpretations and narratives of Israel's history, including the historical and ideological roots of Zionism, the establishment of the State of Israel, ideological forces, wars, and the triumphs and crises of democracy. Cross-listed with ISRL342.

Credit Only Granted for: HIST376 or ISRL342.

HIST377 Mizrahi Identity in Israel (3 Credits)

It is impossible to understand Israeli society today without examining the Mizrahi experience. Despite the common misconception that Israel is predominantly made up of Jews from European origin, the fact of the matter is that Jews of Mizrahi origin, whose parents and grandparents immigrated to Israel from the Middle East and North Africa, represent a major part of the Israeli population. Moreover, Ashkenazi-Mizrahi relations continue to be a major source of tension in Israeli politics, and issues of race continue to come up on social media and polarize the Israeli society. This course brings to light narratives of Mizrahi identity in Israel and explores the trajectory of the Mizrahi struggle for equality and against racism through its various milestones: the 1959 Wadi Salib Revolt, the Black Panthers Movement in the 1970s, the emergence of the Israeli Sephardi-Orthodox party Shas, and the new wave of Mizrahi activism in the 21st century.

Cross-listed with: ISRL330, JWST334.

Credit Only Granted for: JWST319D, JWST334, HIST377, HIST329Z, ISRL329M, or ISRL330.

Formerly: ISRL329M.

HIST381 The Israeli Settler Movement: The Road to One State? (3 Credits)

Explores the Israeli settler movement over the last four decades, from its position on the fringes of Israeli society in the 1970s and 1980s to its rise to prominence in Israeli politics today. Topics will include the history of the Israeli settlement project in the West Bank, the emergence of Gush Emunim and its ideological foundations in Jewish messianism, its violent offshoots, and the influence of the settler movement on the Israeli political system. Study of these topics illuminates some of the most important driving forces of modern history such as nationalism, religious fundamentalism, colonialism and the ability of a determined minority to influence a country's policies.

Cross-listed with: JWST332, ISRL344.

Credit Only Granted for: HIST329G, HIST381, ISRL329G, ISRL344, JWST332 or JWST319N.

Formerly: JWST319N.

HIST382 Law and Culture in Late Imperial China (3 Credits)

An exploration of Chinese law and its social/cultural implications in the late imperial period (1550s-1900s). Major interpretations of the conceptions of law and justice, the functioning of the judicial system, and local courts. An introduction to society and culture, politics and the bureaucracy, family and gender relations, and literature and popular religion of China through the lens of law.

HIST383 City God, Dragon Boat, and Monkey King: Popular Culture and Society in Imperial China (3 Credits)

Explores popular culture, society, and religion in China, with a focus on the late imperial periods (1368-1911). Together we will read and discuss a variety of (translated) primary sources and secondary sources, including the famous sixteenth-century popular novel *The Journey to the West*, which features the adventures of the powerful Monkey King in his quest for pleasure, immortality, and salvation. We will raise and address questions about popular culture, vernacular literature, folk religion, ritual operas, and everyday life of ordinary people in late imperial China.

Credit Only Granted for: HIST319A or HIST383.

Formerly: HIST319A.

HIST384 Global History of Capitalism (3 Credits)

Surveys the development of capitalism since the 1500s from a global perspective, focusing on Asia, Africa, and Latin America. Topics include markets, entrepreneurship, commodity flows, labor migration, conflicts between states and empires, and environmental impacts. Engagement with primary sources and key debates, tracking changing ideas and interpretations of capitalism over time.

Credit Only Granted for: HIST329L or HIST384.

Formerly: HIST329L.

HIST386 Experiential Learning (3-6 Credits)

The History Department's Internship program. Pre-professional experience in historical research, analysis, and writing in a variety of work settings.

Restriction: Permission of ARHU-History department; and junior standing or higher.

HIST395 Honors Colloquium I (3 Credits)

History and theory: the conceptual underpinnings of the historical discipline. Students evaluate several contrasting theories of history. Prerequisite for other honors courses.

Restriction: Permission of ARHU-History department; and must be in History program.

HIST396 Honors Colloquium II (3 Credits)

Uses a seminar approach to examine a major problem of historical interpretation across two or more diverse cultures in different periods. Topics vary and include: religion and society, the city in history, gender, slavery and emancipation, and modernization.

Prerequisite: Permission of ARHU-History department; or HIST395.

Restriction: Must be in History program.

HIST398 Honors Thesis I (3 Credits)

Individual research and preparation of History Honors Theses.

Prerequisite: HIST395 and HIST396.

Restriction: Must be in History Honors program.

HIST399 Honors Thesis II (3 Credits)

Individualized research and preparation of History Honors Theses.

Prerequisite: HIST395, HIST396, and HIST398.

Restriction: Must be in the History Honors program.

Formerly: HIST398.

HIST401 Science and Gender (3 Credits)

Examines the role of women and gender in the history of science. Includes consideration of barriers to women's participation in science; women's role as scientific subjects and researchers; and questions about the scientific construction of gender and the gendered construction of science.

Credit Only Granted for: HIST401 or HIST429R.

Formerly: HIST429R.

HIST405 Environmental History (3 Credits)

An introduction to the key issues and methods of environmental history. The scope of the subject is discussed, as well as its relationship with other disciplines, such as ecology, anthropology, and geography. A primary focus is environmental change in history with emphasis on the American experience.

HIST406 History of Technology (3 Credits)

The changing character of technology in modern history, beginning with the Middle Ages. Concentrates on the Industrial Revolution and its aftermath, the nature of technological knowledge and the sources of technological change.

HIST407 Technology and Social Change in History (3 Credits)

Social consequences of technological innovations and the ways in which societies have coped with new technologies.

HIST408 Senior Seminar (3 Credits)

A capstone course for history majors, designed to increase historical knowledge and the ability to analyze texts and arguments. Topics will focus on the literature of a particular field and primary-source research.

Restriction: Must be in History program.

Repeatable to: 6 credits if content differs.

HIST412 History of Women and Gender in Africa (3 Credits)

An examination of socio-economic and cultural change in Africa from the dawn of the colonial era in the 19th century to independence in the mid-twentieth century. Major focus on how African women understood and responded to the expansion of European empires, changes in the colonial economy, and impact of westernization and urbanization.

Credit Only Granted for: HIST412 or HIST428L.

Formerly: HIST428L.

HIST415 Ideas and Politics in Europe Since 1900 (3 Credits)

Examination of intersection of ideas and politics in Europe since 1900.

Focus will be on advocates of liberalism, social democracy, fascism, Nazism, communism, and conservatism and their impact on politics and policy since 1900.

HIST416 History of Slavery and the Slave Trade in Africa (3 Credits)

Examines the history and impact of the slave trade on African states, societies, and economies. Investigates the meaning of slavery in Africa, the local uses of slavery there and Africa's connections to the Trans-Saharan, Red Sea, and Trans-Atlantic slave trades.

Credit Only Granted for: HIST416 or HIST419Y.

Formerly: HIST419Y.

HIST417 Colonial Encounters: Natives, Spaniards, and Africans in the New World (3 Credits)

An exploration of the discourses and practices of the Spanish colonial project in the New World and the ways in which Indians and Blacks were incorporated into or excluded from that project. Also examines native and African resistance and adaptation to Spanish rule, and the process of transformation and hybridization of Spanish, native and African cultures in Spanish America. An analysis of recent historiographical developments that have profoundly changed the understanding of the Spanish conquest and colonization of the New World.

Recommended: HIST220 and HIST250.

Credit Only Granted for: HIST417 or HIST428Y.

Formerly: HIST428Y.

HIST418 Jews and Judaism: Selected Historical Topics (3 Credits)

Prerequisite: HIST281, HIST283, HIST106, HIST286, or HIST282; or permission of instructor.

Repeatable to: 6 credits if content differs.

HIST419 Special Topics in History (3 Credits)

Repeatable to: 9 credits if content differs.

HIST419Q Before the Holocaust: The Golden Age of Eastern European Jewry (3 Credits)

An exploration of the history of the Jews of Eastern Europe from the period of the Polish Lithuanian Commonwealth until the Holocaust. Topics to be covered include religious, political, social, and cultural transformation of Jewish life in Eastern Europe in the context of the general political changes in the area.

Cross-listed with: JWST370.

Credit Only Granted for: JWST419E, JWST370, or HIST419Q.

Formerly: JWST419E.

HIST421 Medieval Heresies (3 Credits)

An examination of twelfth- and thirteenth-century heresies in the medieval West. Consideration of why so many heretics emerged, and how the church attempted to deal with them, and what effect their persecution had on Europe both then and later. Special attention given to groups that stood on the fine line between heresy and orthodox religion.

Credit Only Granted for: HIST408L or HIST421.

Formerly: HIST408L.

HIST425 Imperial Russia (3 Credits)

The rise and fall of the Russian Empire, Peter the Great to the collapse of tsarism in revolution. Emphasis on the evolution of autocracy, social groups, national identities, and cultural change.

HIST428 Selected Topics in History (3 Credits)

Repeatable to: 9 credits.

HIST429 Special Topics in History (3 Credits)

Repeatable to: 9 credits.

HIST429X Tradition and Change: Jewish Religion in the Modern World (3 Credits)

An exploration of the history of the different modern Jewish religious movements that developed in Europe, starting with messianic movements and ending with Reform and Orthodoxy. Emphasis will be placed on the influence of the academic study of Judaism on the development of modern Jewish religious ideologies and practices.

Cross-listed with: JWST347, RELS347.

Credit Only Granted for: RELS347, JWST347, HIST429X, or RELS419R.

Formerly: RELS419R.

HIST430 Reformations in Politics, Religion, and Gender: England 1485-1603 (3 Credits)

An examination of the political, religious, and social forces in English life, 1485-1603, with special emphasis on Tudor government, the English reformation, and the Elizabethan era.

HIST431 Becoming Great Britain, 1603-1704 (3 Credits)

An examination of the political, religious, and social forces in English life, 1603-1714, with special emphasis on Puritanism and the English revolutions.

HIST434 Victoria's Secrets: Sex and Class in Nineteenth Century Britain (3 Credits)

Queen Victoria, Jack the Ripper, Sherlock Holmes, Oscar Wilde, and Charles Darwin—all of them were "Victorians" yet just what did that word mean and what values did it encompass? This course will examine the social and cultural life of Great Britain from 1830 to 1900, and encompass the worlds of the elite upper classes to the slums of London's East End. We will pay particular attention to the various meanings of Victorianism and the myths and practices of progress, morality, reform, and imperial conquest that defined the era. We will focus on the "Two Nations" residing within Britain and how government and moral reformers addressed conditions of social inequality, poverty, and crime. Victorian medicine and science and their intersection with empire will be covered. We will also address Victorian notions of class, race, gender, and sexuality and how they were shaped by and influenced the politics and culture of everyday life.

Credit Only Granted for: HIST419A or HIST434.

Formerly: HIST419A.

HIST436 Napoleon, the French Revolution and the World (3 Credits)

An argument for the broad continuity between the revolutionary and Napoleonic wars.

HIST437 Modern France from Napoleon to DeGaulle (3 Credits)

The changing political and cultural values of French society in response to recurrent crises throughout the 19th and 20th centuries. Students should have had some previous survey of either Western civilization or European history.

HIST441 Germany Since 1900 (3 Credits)

Course places Nazism in context of German and European history. Topics include collapse of German democracy and the establishment of the Nazi dictatorship; the role of Hitler; the response of political, military, economic, diplomatic, legal, media, theological elites and the broader population; the mix of terror, consent and coercion; propaganda and Nazi culture; contours of Nazi racial ideology and anti-Semitism and their impact on domestic and foreign racial policy; the economic history of the Nazi regime; foreign policy from rearmament to launching World War II to expansion and defeat; Jewish policy from the years of persecution to those of extermination; Nazi policy in Eastern and Western Europe, towards the United States, and towards North Africa and the Middle East; why the Allies won World War II and why and how Nazi Germany was defeated; the nature of the Allied occupation after 1945; the Nuremberg war crime trials; aftermath of facing and avoiding the crimes of the Nazi regime in West and East Germany.

HIST442 Twentieth-Century Russia (3 Credits)

Russia and the Soviet Union from the fall of the tsars to the post-communist present. Impact of Leninism, Stalinism, and Soviet Communism on state, society, culture, and nationality.

HIST444 America in the 1960s (3 Credits)

Celebrated and vilified, the years between 1960 and 1970 represented a watershed in twentieth-century American history. Although history rarely falls neatly within 10-year divisions, the 1960s - as both historical era and historical idea - witnessed enormous political, social, and cultural changes. This course will examine the seminal events, actors, and movements that continue to shape our nation.

Credit Only Granted for: HIST319V or HIST444.

Formerly: HIST319V.

HIST450 American Capitalism: 1600-1900 (3 Credits)

This course explores the transformation of economic life in what became the United States from pre-colonial times to 1900, with special emphasis on economic interactions among Native American, Mexican, and European societies; how and why capitalism took root and became dominant; economic dimensions of the Revolutionary and Civil Wars; why the North, South, and West followed distinct economic paths; the revolutions in transportation and communications; slavery as a business system; causes and consequences of industrialization; and trends in the distribution of wealth and income.

HIST451 American Capitalism: 1900 to Present (3 Credits)

An examination of the evolution of American capitalism from 1900 to the present, with special attention on the emergence of the United States as the world's leading economic power; the impact of big business on work and government regulation; causes and consequences of the Great Depression; the role of business in the two world wars; postwar growth followed by the decline of U.S. global competitiveness; why consumerism occupied a central role in U.S. history; the influence of economic theory on policymaking; realities and mythologies of Reaganomics and Clintonomics; and the economic impact of the digital revolution.

HIST452 Diplomatic History of the United States to 1914 (3 Credits)

American foreign relations from the American Revolution to the beginning of World War I. International developments and domestic influences that contributed to American expansion in world affairs. Analyses of significant individuals active in American diplomacy and foreign policy.

HIST453 Diplomatic History of the United States from 1914 (3 Credits)

American foreign relations in the 20th century. World War I, the Great Depression, World War II, the Cold War, the Korean War, and Vietnam. A continuation of HIST452.

HIST454 Constitutional History of the United States: From Colonial Origins to 1865 (3 Credits)

The interaction of government, law, and politics in the constitutional system. The nature and purpose of constitutions and constitutionalism; the relationship between the constitution and social forces and influences, the way in which constitutional principles, rules, ideas, and institutions affect events and are in turn affected by events. The origins of American politics and constitutionalism through the Constitutional Convention of 1787. Major constitutional problems such as the origins of judicial review, democratization of government, slavery in the territories, secession, and civil war.

HIST455 Constitutional History of the United States: Since 1865 (3 Credits)

American public law and government, with emphasis on the interaction of government, law, and politics, and the relationship between the constitution and social forces and influences, the way in which constitutional principles, rules, ideas, and institutions affect events and are in turn affected by events. Major crises in American government and politics such as Reconstruction, the rise of corporate power, civil liberties during wartime, the New Deal era, the civil disorders of the 1960s.

HIST459 Society in America: Historical Topics (3 Credits)

A consideration of selected aspects of American society from colonial times to the present. Special emphasis on regionalism, immigration, nativism, minorities, urbanization, and social responses to technological changes.

Repeatable to: 6 credits if content differs.

HIST460 History of Labor in the United States (3 Credits)

The American working class in terms of its composition; its myths and utopias; its social conditions; and its impact on American institutions.

HIST462 Slavery, Sectionalism, and the U.S. Civil War (3 Credits)

Slavery, sectionalism, and the coming of the Civil War. Resources and strategy of the Confederacy and the Union, the war's changing character, emancipation and its consequences, conditions on the home front, and the wartime origins of Reconstruction.

HIST465 Oral History of Immigration (3 Credits)

Uses oral history to explore experiences of migrants to the Washington, D.C. area since the mid-twentieth century in projects based on engagement with local immigrants.

Credit Only Granted for: HIST428M or HIST465.

Formerly: HIST428M.

HIST466 Immigration and Ethnicity in the U.S. (3 Credits)

Seminar exploring historical problems relating to US immigration, race, and ethnicity since 1848, with emphasis on cultural impacts of migration on immigrants, their children, and U.S. society.

Credit Only Granted for: AAST498L or HIST466.

HIST467 Women and Reform Movements in the Twentieth-Century United States (3 Credits)

Investigation of women's participation in such twentieth-century reform movements as the labor movement, the struggle for racial justice, social welfare reform, and women's movements. Will ask how race, class, and gender were implicated in the ways that women agitated for social political change.

Recommended: HIST201, HIST211, or HIST255.

Credit Only Granted for: HIST467 or HIST429E.

Formerly: HIST429E.

HIST469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

HIST470 Corporations on Trial (3 Credits)

Examines legal challenges to corporations around the world over the past 200 years through selected case studies. Topics include globalization, empires, the world wars, and the emergence of human rights, corporate social responsibility, and environmental justice.

Credit Only Granted for: HIST419X or HIST470.

Formerly: HIST419X.

HIST473 History of the Caribbean (3 Credits)

Offers a concise introduction to the history of the Caribbean regions from the Columbian voyages to the 20th century. Special emphasis is given to the dynamics of local social and cultural formations within the framework of the political and economic history of the Atlantic world.

HIST476 Jews in Medieval Times 1000-1450 (3 Credits)

Social and cultural life of Jewish communities spread throughout Islam and Christendom. Major topics include the Gaonate, kehila organizations, legal, rationalist, and mystical thought, and the context of rising animosity against Jews linked to the Crusades and changing Church doctrines.

Recommended: HIST282, HIST330, HIST331, or JWST234.

Cross-listed with: JWST432.

Credit Only Granted for: HIST476 or JWST432.

HIST481 A History of Modern China (3 Credits)

Modern China from 1644 to the People's Republic of China. Emphasis on the coming of the West to China and the various stages of the Chinese reaction.

HIST482 History of Japan to 1800 (3 Credits)

Traditional Japanese civilization from the age of Shinto mythology and introduction of continental learning down to the rule of military families, the transition to a money economy, and the creation of a townsmen's culture. A survey of political, economic, religious, and cultural history.

HIST483 History of Japan Since 1800 (3 Credits)

Japan's renewed contact with the Western world and emergence as a modern state, industrial society, and world power, 1800-1931; and Japan's road to war, occupation, and recovery, 1931 to the present.

HIST484 Cultural History of the Chinese Revolutions (3 Credits)

Examines the cultural origins, experience, and results of the Cultural Revolution in China.

Recommended: HIST481 or HIST285.

Credit Only Granted for: HIST419G or HIST484.

Formerly: HIST419G.

HIST486 Social Issues in Modern China (3 Credits)

Explores the problems surrounding family, community, and social life in modern China, including a focus on issues that affect groups and subcultures within the population. Examines as well the political system's capacity to regulate this complex society.

Recommended: HIST285; and HIST481.

Credit Only Granted for: HIST419N (Fall2007) or HIST486.

Formerly: HIST419N.

HIST490 Seven Revolutions in Modern Africa (1945-) (3 Credits)

Seven Revolutions samples theoretical, contemporaneously produced, and leading scholarly (secondary) texts about seven revolutionary situations faced by Africans from ca. 1952 through to the 21st century. In past years we have devoted weeks or double weeks to the Mau Mau (Kenya), Ethiopian derg, Zimbabwe's factions and structural racism, Guinea and women's subalternity, Patrice Lumumba's assassination, race vs. settler as a framework, Liberia's intersection with continental history in the 1980s, among other focuses.

Credit Only Granted for: HIST428B or HIST490.

Formerly: HIST428B.

HIST491 History of the Ottoman Empire (3 Credits)

Survey of the Ottoman Turkish Empire from 1300 A.D. to its collapse during World War I. Emphasis on the empire's social and political institutions and its expansion into Europe, the Arab East and North Africa.

HIST492 Women and Society in the Middle East (3 Credits)

Examines the customs, values and institutions that have shaped women's experience in the Middle East in the past and in the contemporary Middle East.

Recommended: Prior coursework in Middle East studies or gender studies.

Cross-listed with: WGSS456.

Credit Only Granted for: HIST492, WMST456 or WGSS456.

Formerly: WMST456.

HIST495 Women in Medieval Culture and Society (3 Credits)

Medieval women's identity and cultural roles: the condition, rank and rights of medieval women; their access to power; a study of women's writings and the constraints of social constructs upon the female authorial voice; and contemporary assumptions about women.

Cross-listed with: WGSS455.

Credit Only Granted for: HIST495, WMST455 or WGSS455.

Formerly: WMST455.

HIST499 Independent Study (1-3 Credits)

Restriction: Permission of ARHU-History department.

Repeatable to: 6 credits.

HISX - History Education Abroad

HISX200 World of the Vikings (3 Credits)

The history and worldview of pre-Christian Scandinavians as reflected in medieval textual sources and in poems and artifacts from the Viking Age (793–1066 CE). We examine Norse society, political structures, gender ideals, religion and mythology. You learn about Viking expansion, colonies and conquests. An essential part of this interdisciplinary course is dedicated to medieval Icelandic sagas and how Vikings are portrayed in modern public history and contemporary popular culture.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

HISX205 Rome: Republic and Empire (3 Credits)

Explores the Roman Republic and Empire, from the development of Italic culture in the Bronze Age through the dissolution of the empire in late antiquity. Via primary sources, students examine the development of political forms and ideas in the Mediterranean and their impact on Rome, the relationship of art and literature to society and politics, and developments in the areas of religion, science, and the economy.

Credit Only Granted for: HISX205 or HIST269Y.

Formerly: HIST269Y.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

HISX206 Mediterranean Culture and History (3 Credits)

Offers a broad introduction to the main stages of evolution of the Mediterranean using as a framework, not History, but its cultures, religions and peoples. The main topics covered are: Judaism, Christianity, Islam, Greece, Rome, Germanics, Byzantines, the Atlantic and the Mediterranean, the Renaissance, the Mediterranean family and the Modernization of Mediterranean Societies.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

HISX207 Roman Civilization and Daily Life (3 Credits)

Explores the daily life of the Roman people including daily habits, duties, pleasures, family life, and belief and value systems. Students will examine remnants of society left at Pompeii to learn about everyday life, and ultimately death, in the context of the ancient Roman world and integrate archaeological, art historical, and primary literary material into a single, coherent intellectual narrative in order to gain a complex understanding of Roman Civilization at its height.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

HISX300 Scandinavia in the Middle Ages: from Viking Warriors to Christian Knights (3 Credits)

Focuses on the development of Denmark, Norway, and Sweden as kingdoms in the Middle Ages, both in terms of internal relations and contact, conflict, and exchanges with continental Europe and the wider world. We examine state building and law-making, Christianization and church organization, feuds, rebellions, and warfare, the Baltic crusades and forced conversion of pagans, literary and cultural developments, as well as migration and border-crossing. The aim of the course is to consider these phenomena in the intersection between cultural adaptation and domestic creativity; to what extent does Scandinavia adapt to wider European trends, and to what extent are they independently formed?

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

HISX301 History of Sweden in Europe and the World (3 Credits)

Sweden's historical relationships to the Baltic Region, Europe and the US. We will look at the Great Power Era, the poverty and mass emigration of the 19th century, the internationally famous inter-war Middle Way; we will then consider Sweden's role in World War II and the Cold War, as well as the current impact of neoliberalism and globalization. Our focus, throughout, will be on Sweden's international profile and power, and the influence of this, in turn, on Sweden's national identity and future.

Additional Information: This course is offered as part of the Maryland-in-Stockholm study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMStockholm. Education Abroad processes registrations for this course on behalf of students.

HISX302 Barcelona: the City and its History (3 Credits)

This is a course that emphasizes the historical development of Barcelona from Pre-Roman times until nowadays. Although this course has a dominant historical approximation, other disciplines will be also taken into account, such as art, literature, architecture and urbanism.

Additional Information: This course is offered as part of the Maryland-in-Barcelona study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMBarcelona. Education Abroad processes registrations for this course on behalf of students.

HISX311 The History & Culture of Italian Food (3 Credits)

Examines the relationship between food, culture and identity in Italy through a variety of readings, discussions, outdoor activities and tasting experiences. Traces the historical evolution of Italian food culture through a multi-disciplinary (historical, anthropological, sociological, geographical) approach, using food workshops to supplement lectures and class discussions.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

HISX317 Medicine and Disease Before Biomedicine (3 Credits)

Explores the origins of medicine as we understand it today with topics such as the consequences of the Black Death and if Western medicine is truly all-Western. Focuses on four themes from Antiquity through the Scientific Revolution and the transformation of theory, changes in practice, birth of medical institutions, and global transfers of knowledge.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMFlorence. Education Abroad processes registrations for this course on behalf of students.

HLSA - Health Services Administration

HLSA300 Introduction to Health Policy and Services (3 Credits)

A multidimensional view of public health policy and services. Through interactive discussion of assigned readings, team-based learning, and supplementary lecture, students will learn about the nature of and development of policy, public health policy, and financing and delivery of health care services. This course will place a significant emphasis on a team-based learning approach to understanding the health care system and health care reform.

Prerequisite: Must have completed or be concurrently enrolled in SPHL100 or PHSC300.

Restriction: Must be in Public Health Science program; and must have earned a minimum of 60 credits.

Credit Only Granted for: SPHL498P or HLSA300.

Formerly: SPHL498P.

HLSA465 Redesigning Mental Health Services (3 Credits)

Students will use Design Thinking to create, reshape, redesign and transform the ways in which mental health and wellness is perceived and addressed on the campus. This course will incorporate students and the UMD community as stakeholders in designing, planning and contributing to developing solutions that leverage existing mental health resources or create new pathways to improve mental health and wellness at UMD. Students will learn and use design thinking skills to enhance public health practice skills in project proposals and grant writing.

Prerequisite: HLTH366.

Recommended: EPIB301.

HLSA484 Redesigning Health Care: Developing a Clinic to Meet Community Needs (3 Credits)

Provides an opportunity for students to learn a key entrepreneurial skill, Human Centered Design Thinking, while helping to build, reshape, redesign and transform delivery of health care in the Mona Center, a new community center and clinic in Prince George's County. This new, modern vision for a health and wellness clinic embraces student involvement in designing, planning and contributing to innovative programs, solutions, and processes to improve the clinic's ability to meet community and patient needs by addressing the social determinants of health as well as traditional clinical health status. Students in the class will develop empathy for patients, providers and other stakeholders, define problems, select a specific problem for intervention, understand problems based on stakeholder input, ideate, reframe and suggest options to solve or address the problem, prototype solutions, test ideas, and make recommendations to inform implementation and ongoing measurement and monitoring of impact.

Restriction: Must have completed a minimum of 60 credits.

Additional Information: Selected class sessions will be on-site at local organizations such as Mona Clinic in Temple Hills, MD, HAIR Network shops in Hyattsville and the Sarvis Empowerment Cafe in Riverdale. The course also requires off-campus work at nearby locations.

HLSC - Integrated Life Sciences

HLSC100 Students in the University: Integrated Life Sciences (1 Credit)

In a small classroom setting, Integrated Life Sciences students learn about academic resources on and off campus.

Restriction: Must be in the Honors College Integrated Life Sciences program.

Credit Only Granted for: EDCP1080, HLSC100, HONR100, or UNIV100H.

HLSC102 Service-Learning in the Life Sciences (1 Credit)

The Integrated Life Sciences (ILS) Honors Program includes a rigorous academic curriculum, a research requirement, a living-learning component, and a service-learning experience. Service has been a tradition since 2012 and was initiated by our students, who wanted service incorporated as part of the ILS mission and values. Our students have contributed more than 6,000 hours of their time and talent to campus and local organizations, and this experiential learning has provided an opportunity to apply classroom studies to the real world. In general, these service experiences are directly relevant to their future careers as life scientists, because they contribute to improved access for all people to quality health care, to engaging STEM education, and/or to sustainable environments. The service-learning experience is introduced in the fall semester of the first year of ILS in HLSC100, and completed with a 1-credit course in the spring.

Prerequisite: HLSC100.

Restriction: Must be in the Honors College Integrated Life Sciences program.

HLSC207 Principles of Biology III Organismal Biology (3 Credits)

The diversity, structure and function of organisms as understood from the perspective of their common physicochemical principles and unique evolutionary histories.

Prerequisite: BSCI160, BSCI161, BSCI170, and BSCI171; Or students who have taken courses with comparable content may contact the department.

Restriction: Must be in the Honors College Integrated Life Sciences program.

Credit Only Granted for: BSCI207, BSCI279D, or HLSC207.

HLSC217 The British Masters of Science (3 Credits)

The British Masters of Science will look at the British Scientists who have been at the forefront of some of history's greatest advances and have shaped science as we know it today. This London study abroad program will explore these scientific masters in the city where they made their great contributions, visiting the places where they lived and worked to experience the historic foundations of science.

Restriction: Must be in the Integrated Life Sciences Honors Program.

HLSC227 Topics in Scientific Integrity and Medical Ethics (1 Credit)

Explores ethical issues related to scientific research and integrity as well as issues surrounding medical ethics such as use of limited resources, euthanasia, and physician-assisted suicide. This is a topics class, so we won't be going into detail of philosophical arguments, but we may bring them up as relevant. Moreover, especially as applied to medical ethics, there may be no "right" answer. Instead, we would like you to be able to think critically about the issue, and make a moral argument (as opposed to a logistical argument).

Restriction: Must be in a major in UGST-HCOL-Integrated Life Sciences Program.

HLSC280 Integrative and Quantitative Concepts in Biology (3 Credits)

Designed for entering students enrolled in the Honors College Integrated Life Sciences (ILS) program, this course uses an active learning approach to emphasize inquiry, critical thinking, quantitative reasoning, and hands-on data analysis. This course will cover a variety of bioinformatic related topics, including genome assembly and scaffolding, sequence alignment algorithms, epigenetics, a bioinformatic examination of the central dogma in molecular biology, gene finding, proteomic analysis, the evolution of molecules, cells and organisms, molecular switches, and biological networks.

Prerequisite: BSCI170.

Restriction: Must be in the Honors College Integrated Life Sciences program.

Credit Only Granted for: HLSC208 or HLSC280.

Formerly: HLSC208.

HLSC322 Principles of Genetics and Genomics (4 Credits)

Principles and mechanisms of heredity and gene expression, with a focus on the application of genomics to contemporary medicine, biotechnology, and societal issues.

Prerequisite: CHEM131, CHEM132, BSCI160, BSCI161, BSCI170, and BSCI171; or must have completed BSCI170, BSCI171 and two semesters of Chemistry.

Restriction: Must be in a major in UGST-HCOL-Integrated Life Sciences Program.

Credit Only Granted for: HLSC322 or BSCI222.

HLSC329 Teaching Practicum in the Life Sciences (1 Credit)

A guide and support for the undergraduate teaching assistants (UTAs) in the Integrated Life Sciences (ILS) honors living-learning program.

UTAs will develop a greater understanding of teaching and learning in the life sciences, with a focus on the academic values of ILS, by exploring education research and theory, discussing learning strategies and techniques, and reflecting on their practice. Students take this course while serving as a undergraduate teaching assistant in the Integrated Life Sciences courses.

Restriction: By departmental permission only.

Repeatable to: 3 credits.

HLSC374 Mathematical Modeling in Biology (4 Credits)

Students will learn empowering mathematical techniques through the understanding of biological models. Models are chosen from a variety of biological disciplines. Mathematical skills that will be developed along the way include: solving non-linear difference equations, eigenvector analysis, and the implementation of these algorithms as computer models.

Prerequisite: MATH131, MATH136, or MATH141.

Cross-listed with: BSCI374.

Credit Only Granted for: BSCI374, BSCI474, or HLSC374.

Formerly: BSCI474.

Additional Information: The HLSC374 version of this course is restricted to students in the Honors College Integrated Life Sciences program.

HLTH - Health

HLTH106 Drug Use and Abuse (3 Credits)

An interdisciplinary analysis of contemporary drug issues and problems. The course will examine physiological, psychological, social, philosophical, historical, legal and health aspects of drug use and abuse. Special attention will be focused on those general motivations for drug use that attend life on the college campus.

HLTH124 Introduction to Behavioral and Community Health (1 Credit)

Required of first semester Community Health majors to expose them to introductory-level concepts within the field of behavioral and community health as well as the Community Health degree program. Includes discussion on the delivery of behavioral and community health at the local, state, national, and global levels; career opportunities in the diverse sectors of the community health field; undergraduate programmatic information; and strategies for student success.

Restriction: Must be in a major within the SPHL-Behavioral & Community Health department.

HLTH130 Introduction to Public and Community Health (3 Credits)

An introduction to the theory and practice of public and community health. The influence of public health professionals on the past, present, and future health status of society through the examination of critical health issues will be described. Programming models, theories and policy development are included.

HLTH140 Personal and Community Health (3 Credits)

Meaning and significance of physical, mental and social health as related to the individual and to society; important phases of national health problems; constructive methods of promoting health of the individual and the community.

HLTH170 The Corporate Footprint: How Industries Influence the Public's Health (3 Credits)

As public health advocates strive to protect, promote and advance the health of our communities, they sometimes find their efforts in conflict with the activities of corporations and their industry associations. This course will provide an overview of how various industries from Big Pharma to Tobacco Corporations have launched successful campaigns to influence policymakers, counter science and at times mislead the public on the harms of products to the health of communities. Students will also contemplate whether the relationship between corporations and public health advocates can ever be collaborative rather than contentious.

HLTH200 Introduction to Research in Community Health (3 Credits)

An overview of specific components and steps involved in the community health research process. Content includes, foundations of research, sampling, measurement design, and analysis in a community context.

Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH230 Introduction to Health Behavior (3 Credits)

Psychological, social psychological, and sociological approaches to the following health areas: development of health attitudes and behavior, patient-provider interaction and the organization of health care.

HLTH234 Global Health Messages: Understanding Exposure & Impact (3 Credits)

Using a global perspective, this course teaches students to be critical consumers of current and historical health communication interventions. It also provides students with the skills to develop media interventions that target specific and general populations. Students will discover the array of diverse media messages that influence the health and well-being of individuals and communities.

Restriction: Must not be in the Community Health program.

HLTH246 The U.S. Tobacco Epidemic (3 Credits)

Tobacco is the leading cause of preventable death in the U.S. Course provides an overview of the tobacco epidemic including history, health effects, economic costs, policy, surveillance, and prevention, in addition to additional products like e-cigarettes, vaping and hookahs. .

HLTH264 Tweets & Likes: Digital Health & Social Media (3 Credits)

Examines the current and potential use of digital health and social media to influence public health. Provides an overview of knowledge, skills and terminology necessary to optimize the effectiveness of these technologies to contribute to the enhancement of individual and community health.

Restriction: Must not be in the Community Health program.

HLTH285 Controlling Stress and Tension (3 Credits)

Health problems related to stress and tension. Analysis of causative psychosocial stressors and intervening physiological mechanisms. Emphasis on prevention and control of stress through techniques such as biofeedback, meditation and neuromuscular relaxation.

HLTH289 Topical Investigations (1-3 Credits)

Independent study by an individual student or an experimental course in special areas of knowledge not covered by regularly scheduled courses.

Repeatable to: 6 credits if content differs.

HLTH292 Community Health Engagement (3 Credits)

An exploration and application of basic community health concepts. An integral part of the course is service learning, that includes evaluating, planning and implementing a community health program with a local community partner.

Restriction: Must not be in Community Health program.

HLTH302 Methods of Community Health Assessment (3 Credits)

Examination of research and evaluation tools that can be applied to community health promotion. Includes the application of qualitative research methods, community needs and strengths assessments, asset mapping, and monitoring and evaluating process, outcome and impact evaluation.

Prerequisite: Minimum grade of C- in HLTH200 and EPIB301.

Restriction: Must be in a major within the SPHL-Community Health Department.

HLTH306 Macro Level Influences on Community Health (3 Credits)

An examination of the effects and influences of policy decisions at the local, state and national levels on community health delivery. Historical and contemporary policy issues will be included with a focus on how the policies have impacted community organizations and the overall health of communities.

Prerequisite: Minimum grade of C- in HLTH124.

Restriction: Must be in a major within the SPHL-Behavioral & Community Health department.

HLTH325 Poor in America: Health and Wellbeing (3 Credits)

Using the ecological framework, students will explore the complicated relationship between poverty and health and well-being in the United States.

Recommended: HLTH130; or HLTH140.

HLTH352 Portrayal of Drug Use and Addiction on Screen: Does Hollywood get it Right? (3 Credits)

Through comparative analysis of public health research evidence with portrayals used in film, the student gains a deep understanding of substance abuse, its consequences, and theoretical foundations of its biopsychosocial etiology and radiating effects on families, communities and society.

HLTH364 Social Media & Digital Tools for Community & Public Health (3 Credits)

Examination of the characteristics and uses of media platforms and digital technologies to expand the capability to identify and reduce community and public health risks at all levels of prevention. Also considered will be the potential threats these new media can play on individual choice, privacy, confidentiality, and social influence – which themselves can pose health threats to community and public health.

Prerequisite: Completion of HLTH230 with a C- or higher.

Restriction: Must be in a major within the SPHL-Behavioral and Community Health department; Restricted to majors who entered the program in Fall 2018 or later.

HLTH366 Behavioral and Community Issues in Public Health (3 Credits)

The exploration of how social and behavioral science theories and public health concepts and methods can be applied to both the health-illness experience and community interventions.

Prerequisite: HLTH130, HLTH230, PSYC100, SOCY100, SOCY105, or ANTH260.

Restriction: Must be in Public Health Science program; or permission of SPHL-Behavioral & Community Health department. And must have earned a minimum of 45 credits.

Additional Information: This course will initially be restricted to Public Health Science (PHSC) majors, but could ultimately be opened to other majors, particularly those in HLTH.

HLTH371 Communicating Safety and Health (3 Credits)

The communication and evaluation of safety and health information. Emphasis on various types of communications and recipient factors which contribute to their success or failure.

Restriction: Must be in a major within SPHL-Behavioral & Community Health department.

HLTH374 Drugged, Drowsy & Distracted Driving: traffic safety issues for the new millennium (3 Credits)

An in-depth examination of the current status of research, historical trends and policies regarding impaired driving. Designed to provide exposure to the research process for understanding the behavioral factors that contribute to impaired driving in our society.

Prerequisite: Minimum grade of C- in HLTH200 and HLTH300.

Restriction: Must be in Community Health program.

HLTH377 Human Sexuality (3 Credits)

The biological and developmental aspects of human sexuality; the psychological and emotional aspects of sexual behavior; sexual identity; the historical, cultural, social, linguistic, legal and moral forces affecting sexual issues; the importance of communication, disclosure and intimacy in interpersonal relationships; and research trends in the area of human sexuality.

HLTH386 Experiential Learning (3-6 Credits)

Prerequisite: Permission of SPHL-Behavioral & Community Health department.

Restriction: Junior standing or higher.

HLTH389 Topical Investigations (1-3 Credits)

Independent study by an individual student or an experimental course in special areas of knowledge not covered by regularly scheduled courses.

Repeatable to: 6 credits if content differs.

HLTH391 Making a Difference: Applying Community Health (3 Credits)

The exploration and application of community health concepts including theoretical models, advocacy, cultural competency, asset mapping, and needs assessment. Includes planning, implementing and evaluating a community health program with a designated community partner.

Prerequisite: SPHL100, HLTH124, HLTH140, HLTH200, HLTH230, EPIB301, EPIB315, BSCI170, BSCI201, and HLTH302. Students must have completed or be concurrently enrolled in HLTH364.

Corequisite: HLTH490.

Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH399 Community Health Field Work (1-6 Credits)

Students will gain practical experience under conditions conducive to educational and professional development. The internship is a supervised period of community/public health activities, carried out in a relevant professional organization, that emphasizes the application of theory and previous coursework.

Prerequisite: Minimum grade of C- in HLTH124, HLTH140, and SPHL100.

Restriction: Must be in Community Health program; and must have earned a minimum of 45 credits.

Repeatable to: 6 credits if content differs.

Additional Information: Students will have the opportunity to be matched with regular DBCH partners who have requested an intern for the designated semester. Most field work experiences will be off-campus.

HLTH402 Disability is Not an Outcome: An Introduction to Understanding Disability (3 Credits)

With an intent to disrupt traditional understandings of disability as a health outcome to be prevented, this course will introduce students to disability as an identity, a community, a population of interest to public health professionals. To change this understanding students will explore historical representations of disability, ableism, and lived experiences of people with disabilities. Disability is a multi-layered concept that broadly describes a wide range of people. Although geared toward public health scholars, the mix of readings, discussions, and assignments will help students reflect and integrate learning into their own fields of study. The course examines factors that led to systemic oppression, and methods and strategies of moving toward a more inclusive society.

HLTH410 Honors Seminar (3 Credits)

Undergraduate majors with a strong academic record are provided the opportunity to engage in challenging educational experiences related to the social and behavioral aspects of public health. Students will learn the skills and knowledge to develop, propose, defend, and complete an honors thesis or honors project.

Prerequisite: HLTH200; and must have completed 2 other courses in HLTH.

Restriction: Minimum cumulative GPA of 3.5; and must have completed 45 credits before applying.

HLTH420 Effective Strategies for Public Health Practice (3 Credits)

The purpose of this course is to present the interrelationships of curriculum planning, methodology and the selection and use of successful public health presentation strategies. Special problems associated with public health presentations are discussed, and students become familiar with a variety of resources as well as with planning for and implementing demonstration presentations.

Prerequisite: Minimum grade of C- in HLTH140 and HLTH230 .

Restriction: Must be in a major within the SPHL-Behavioral and Community Health department.

HLTH424 Lesbian, Gay, Bisexual & Transgender Health (3 Credits)

The preparation of students to be knowledgeable advocates for the health of lesbian, gay, bisexual, and transgender (LGBT) populations. Course focus is defined by the Healthy People 2020 federal health objectives for LGBT populations: data collection for research, culturally competent healthcare, bullying in schools, suicide, homelessness, and sexually transmitted diseases including HIV.

Recommended: Students should have some familiarity with basic psychology, sociology and/or epidemiology.

Restriction: This course is restricted to students who have completed a minimum of 60 credits. Jointly offered with HLTH624.

Credit Only Granted for: HLTH424 or HLTH6 24.

HLTH430 Health Education in the Workplace (3 Credits)

A survey of the role of health education in work settings. Examination of occupational stress, the health effects of shift work, women's health in the workplace, health education approaches to informing workers and management, and health promotion programs in the workplace.

HLTH431 Health Literacy in Action (3 Credits)

This course introduces the concept of health literacy and develops the knowledge and skills to understand the field and engage productively about health literacy with healthcare providers, systems, and policy makers. The class explores diverse perspectives about health information and communication, and different pathways and strategies to help create the conditions for more informed and engaged individuals and communities.

Recommended: HLTH 371; or equivalent.

Repeatable to: 0 credit.

Credit Only Granted for: HLTH431 or HLTH498L.

Formerly: HLTH498L.

HLTH432 Medical Terminology (3 Credits)

Provides the framework for understanding medical language and terminology used by health care professionals. Students will gain an understanding of the rules of building and analyzing medical terms from word origins and will learn correct pronunciation, definitions, and spelling for all of the body systems, major pathological conditions, common disorders, prescribed medications, and more. Whether a student is interested in learning more about the medical field or they want to acquire practical knowledge for future personal use, this course provides the foundation for understanding the language of medicine.

Credit Only Granted for: HLTH432 or HLTH498T.

Formerly: HLTH498T.

HLTH434 Introduction to Public Health Informatics (3 Credits)

Provides an overview of the field of public health informatics and the influence of technology on the public's health and well-being. Emphasizes the application of various technologies and computer/internet applications to support public health research and practice, including strategies to address new and emerging threats.

Restriction: Must be in one of the following programs (Community Health; Public Health Science) ; and must have earned a minimum of 60 credits.

Credit Only Granted for: HLTH434 or HLTH498E.

Formerly: HLTH498E.

HLTH452 Global Health and Social Justice (3 Credits)

Evaluates the relationship between social justice and population health through critical discourse analysis of social determinants of health and applications of community-based methods for reducing population health inequities within and across national borders. The class aims to stimulate students' critical analysis to identify, describe, measure and apply consequences of injustices in population ill-health exposures and practices (policies, interventions and services). Students will apply critical thinking about how social injustices create preventable health disparities, unequal social determinants, poor environmental exposures and diseases among vulnerable populations in much of low-income countries.

Jointly offered with: HLTH602.

Credit Only Granted for: HLTH452 or HLTH602.

HLTH460 Multicultural Population Health (3 Credits)

Health concerns of U.S. ethnic minority groups and factors placing them at elevated risk for disease and injury. Health education concepts and strategies to reduce disparities between their health status and the health status of the general population.

Prerequisite: HLTH140, HLTH230, or HLTH366; or permission of SPHL-Behavioral & Community Health department.

Restriction: Must be in a major within the SPHL-Behavioral & Community Health department; or must be in the Anti-Black Racism Minor.

HLTH471 Women's Health (3 Credits)

The women's health movement from the perspective of consumerism and feminism. The physician-patient relationship in the gynecological and other medical settings. The gynecological exam, gynecological problems, contraception, abortion, pregnancy, breast and cervical cancer and surgical procedures. Psychological aspects of gynecological concerns.

Cross-listed with: WGSS471.

Restriction: Must be in a program in the Harriet Tubman Department of Women, Gender, and Sexuality Studies; or must be in a major within SPHL-Behavioral & Community Health department.

Credit Only Granted for: HLTH471, WMST471, or WGSS471..

Formerly: WMST471.

HLTH489 Field Laboratory Projects and Workshop (1-6 Credits)

A course designed to meet the needs of persons in the field with respect to workshop and research projects in special areas of knowledge not covered by regularly structured courses.

HLTH490 Professional Preparation in Community Health (3 Credits)

The development of skills necessary for joining the public health work force post-graduation, as well as assistance in obtaining an appropriate internship that will serve as a final semester, capstone experience. Students will be exposed to various relevant professional experiences, and will be afforded the opportunity to strengthen their own individual skills by selecting from a menu of skills-based learning modules that best suit their perceived needs.

Prerequisite: Minimum grade of C- in EPIB301, EPIB315, SPHL100, HLTH124, HLTH140, HLTH200, HLTH230, HLTH302, BSCI170, BSCI171, and BSCI201; and students must have completed or be concurrently enrolled in HLTH364.

Corequisite: HLTH391.

Restriction: Must be in a major within the Behavioral and Community Health department.

HLTH491 Community Health Internship (12 Credits)

Integrating theory with practice in a community health setting.

Prerequisite: Minimum grade of C- in HLTH420 and HLTH490.

Restriction: Must have completed all program requirements and be in the last semester of the Community Health degree program.

HLTH492 BS/MPH Community Health Internship (9 Credits)

Integrating theory with practice in a community health setting.

Prerequisite: Minimum grade of C- in HLTH490.

Restriction: Must be a Community Health major who has been admitted to the combined BS/MPH degree program.

HLTH498 Special Topics in Health (3 Credits)

Topics of special interest in areas not covered by regularly scheduled courses.

Repeatable to: 6 credits if content differs.

HNUH - University Honors

HNUH100 Gateway Seminar (1 Credit)

First-semester orientation and exploration seminar required of all UH students.

HNUH218A Pursuits of Happiness: Ordinary Lives in the American Revolution (3 Credits)

Dedicated to telling the stories of ordinary people in the American Revolution, to recovering the voices and experiences of all the founders of this country whose lives and contributions have been obscured by our tendency to worship a dozen or so well-to-do and well-educated men in suits as if they alone conceived and executed the American Revolution and the founding of the United States. So we'll be talking this semester about the marginalized, the downtrodden, the rank and file, the rabble - all the people who never make it onto monuments or money. The point of this is to allow us all to recognize the fundamental fact that fighting a Revolution is a collective act that requires a genuine mass movement. Declaring independence on a piece of parchment on a summer's day in Philadelphia in 1776 doesn't mean anything unless tens of thousands of people are willing to support that cause and fight to make it a reality. To revolt, then, is not an individual act - it's for crowds, for mobs, and for whole communities to do together. Declaring independence is a fundamentally cooperative act.

Credit Only Granted for: HNUH218A or HIST137.

HNUH218C Globalizing the American Revolution (3 Credits)

How is the American Revolution a creation story in the making of our multi-cultural and interconnected modern world? Consider the Declaration of Independence. When first published on July 5, 1776, it was printed by an immigrant Irishman on Dutch paper that had been brought over from England. This was the first such declaration of independence ever issued, but its ideas and forms traveled far and wide. More than 100 other declarations of independence have been issued since then. The people that declaration mobilized are similarly diverse: the American Revolution is as much the story of Creek farmers, Spanish soldiers, French slaves, Canadian fugitives, Indian tea-growers, and African statesmen as it is of the Minutemen and Sons of Liberty. In this globe-trotting class, students will be positioned to debate how the familiar story of the American Revolution changes when we place it in transnational context.

Cross-listed with: HIST223.

Credit Only Granted for: HNUH218C or HIST223.

HNUH218R Stealing from the Poor, Giving to the Rich: The Political Economy of Global Capitalism (3 Credits)

Street names and museum exhibits are being renamed in Europe to erase the ghosts of their colonial history. Yet, this speaks of the colonial "era" as the past, when in fact it is very much our present. The economic principle driving colonialism—capitalism—encouraged an insatiable appetite for territorial acquisition, human bondage, and destruction that stole wealth, life, and joy from racialized "others" to fuel European development. We maintain and further these thefts, oppressions, and exploitations through our purchasing habits and justify them through cultural ideas and ignorance. What would it mean to undo these oppressions? What must we understand to begin this process? This course surveys colonial capitalism and its legacies in Sub-Saharan Africa, the Americas, Asia, the Middle East, and North Africa to explore how history informs the present robbing of the Global South for the Global North's development, as well as pathways towards resistance and reconciliation.

HNUH218U Finding Feminist Freedom (3 Credits)

"I'm the one that'll make you pay." So goes one verse of what has become a Latin American feminist hymn, "Cancion sin miedo" ("Fearless Song," by Vivir Quintana). Transnationally, feminists today—particularly in the Global South—are on fire: militant, unafraid, angry, and, above all, driven by a desire to build a world where the promise of freedom for all is finally fulfilled. But what is freedom? Is freedom an abstract concept or a lived experience? Is it individual or collective? What is the meaning of 'feminist freedom'? These questions will be gauged by discussing, analyzing, and interpreting texts in feminist theory; decolonial and transnational feminist approaches; and feminist film, documentary, performance, and protest. At the end of the course, you will have learned that there is not one feminism, but many, become familiar with feminist theory and practice, and be equipped to live your own version of a feminist life.

HNUH218V Black Bodies and Green Spaces: From 1619 to Today (3 Credits)

From the antebellum plantation slave, who used uncultivated land as a place of deliverance, healing and route to freedom, to the Central Park bird watcher, whose green space presence was perceived as a threat to White physical safety, black bodies have a vexed relationship to green space. This course critically examines how systemic racism has shaped the experience, connection, and relationship to nature among Black Americans. Students will conduct in-depth analysis, critical thinking, and discussion on topics ranging from slavery and nature; The Great Migration; and Jim Crow, segregation, and parks; to green space inequity and "Moving While Black" (Treyvon to Ahmaud). While some environments (built, natural, virtual) within the United States have represented the essence of anti-Black racism and indignity, this course will further explore how many Black Americans still regarded nature as a space of freedom, humanity, and spirituality.

HNUH218W Freedom and Captivity: Prisons, Punishment, and Citizenship (3 Credits)

What does freedom mean if you're incarcerated? How is freedom, citizenship, and social membership mediated through the power of the state? What are the implications of punishment on how freedom is constructed, understood, and experienced? The United States purports to be a beacon of freedom while simultaneously incarcerating more people than any other country in the world. Throughout the course, we will discuss the writings of scholars, theorists, historians, and—most importantly—incarcerated people to interrogate the concept of "freedom" from the vantage point of the prison. Students will use these insights to analyze the complex tensions and relationships between social ideals and practice.

HNUH218X Uprising, Riot, Revolt: Violence in Story and Theory (3 Credits)

How does violence connect to revolution? Is violence the result of lone wolf actors, oppressive social structures, or just blind fate? Is it a side-effect of revolution or its driving force? Is violence a way to fight injustice, or is it a problem of evil? Why is one person's uprising another person's riot? In this seminar, we will explore literature, politics, and religion to debate the meaning and causes of violence. By examining the writings of a prison psychiatrist, historians, activists, theorists, and theologians alongside classic and contemporary literary works, we will disrupt common understandings of violence. In conducting interviews with community members, engaging in classroom debate, and sharing ideas in a project-poster session, we will investigate violence in the UMD community and wider DC area, and propose ways toward revolutionary change.

HNUH218Z Soundtrack to Revolution: Black Protest Music from Slave Ship to Soundcloud (3 Credits)

Invites students to hear a tradition of black protest music that reverberates from the slave ship to Soundcloud and beyond. Together we will ponder how black people have created, performed, broadcast, and mobilized music for protest, self-making, community-building, cultural critique, agitation, venting, healing, and joy. To hear what protest music sounds like, we will listen to Paul Robeson, Mahalia Jackson, Billie Holiday, Abbey Lincoln and Max Roach, Nina Simone, Fela Kuti, Marvin Gaye, Aretha Franklin, Bob Marley, Michael Jackson, Public Enemy, NWA, Lil' Kim, Lauryn Hill, Beyonce, and others. Must protest music set overt political statements to melody? How have black people mobilized music and art to shape their political conditions? What can music accomplish that artforms like literature and visual art cannot? How have various social justice and liberation movements deployed music? How has new media technology transformed protest? How does revolution sound to you?

HNUH219P Transform Maryland: Management Consulting Internship (3 Credits)

This three-credit internship, open to all majors, offers a fully immersive consulting experience that affords undergraduate students the opportunity to engage with a real client. Working in dynamic teams, students learn advanced management consulting strategies, and apply critical thinking and solution design to real world cases, all while developing general professional acumen. The internship innovates real University of Maryland business processes. Managed by senior members of the DIT's Enterprise Planning and Continuous Improvement unit, the internship matches teams with top-tier professionals and a senior university administrator as a project client. Supported by professional coaching from practicing talent managers and management consultants, students research and benchmark against other schools, analyze and synthesize results, and formulate actionable recommendations for the client. The internship culminates in a recommendation pitch to campus leadership.

HNUH219T Transform Maryland: Consulting Practicum (3 Credits)

In this experiential learning opportunity, a team of students undertakes a real-world practicum to develop consulting skills and improve an operational process at the University of Maryland. A new project is selected each semester and the course culminates in a presentation to key members of the UMD leadership team. Through concepts drawn from multiple disciplines, students learn and apply an analytical, systems approach to problem solving. Working with oversight from experts in the industry, students partner with university officials to understand and map a business process that affects students, identify opportunities for process innovation, and apply user-centered design to develop a persuasive narrative to recommend solutions and leverage the potential for technology to streamline the process. This practicum prepares students to consult for real-world change, while practicing competencies they will use in their professional internship experience the following semester (HNUH219P).

HNUH228B Redesigning Life: Prospects and Consequences (3 Credits)

What is at stake for our world as humans seek to redesign biological organisms? Biotechnology advances are enabling us to read, edit and write genomes, including our own. This revolution has been fueled by the quest to understand and cure disease. Yet, these innovations have far-reaching consequences beyond medicine and will reshape our world in ways we can only imagine - or fear. The course will challenge students to confront the risks and rewards for them, their family, their community, and their future, as biotechnology moves out of specialized laboratories and into homes. A demystifying, low-tech approach will introduce them to contemporary genome redesign, clarifying the current limitations and future goals of the field. Students will debate whether redesigning plants and animals will enhance or inhibit momentum in human genome engineering, and formulate their own arguments about who should be able to use these tools and where, who decides, and how much society is willing to risk.

HNUH228C The Fiction of Fact: Race, Science and Storytelling (3 Credits)

What is a fact? Science is often viewed as an unbiased, fact-based, analytical discipline. However, throughout history, science has sometimes been the most potent weapon for creating and supporting political fictions and social hierarchies. Not unlike the discipline of the humanities, the sciences practice interpretation: scientists observe behaviors, of subject or objects, and necessarily provide an interpretation of the data. But it is the recourse to the "real" that has made science so powerful in underwriting cultural constructs. Whether we observe how science is manipulated in the public sphere, or how it is practiced for good or ill, it has been used to naturalize hierarchies of race, class or gender. Through a range of materials—fiction, film, visual arts, scientific articles, public humanities and political theses - this course will explore one of the most potent cases of this phenomenon of "scientific" storytelling: the case of race.

HNUH228R The Picture of Health and Illness: Modern Medicine in Illustration (3 Credits)

From prehistoric carvings, through King Tut's burial mask and Michelangelo's David, to the Lincoln Memorial and Body Worlds, images have long been used to communicate what people can and should be. After the "Scientific Revolution" in Europe, when identity was increasingly tied to biology, medical illustrations communicated theories of the ideal body and how it should, and should not, look. Doctors working in the midst of scientific revolution unequivocally tied health to race, gender, and sexuality by enlisting engravers, photographers, and printers to depict the healthy body as a European man and all others as weak, flawed, or ill. This course takes up questions about science, illustration, and identity. Can science tell us who we really are? Do pictures reveal the truth about our bodies? In this class, students will develop their own theory of how science continues to shape who we think we can be and how we might resist those limitations.

HNUH228U A Life Worth Living: The Legacy of Eugenics in Genetics (3 Credits)

Should parents be able to choose their child's eye color? Or alter their child's genome to eliminate a hereditary disability? While these might seem like different concerns, both are eugenic questions. In this class students will learn about the legacy of eugenics and its role in the development of genetics by analyzing science fiction works through the lens of disability studies. We'll explore the past to identify who has historically been considered "fit" and look to the future to consider what kinds of embodiments, and life experiences, society seems willing to let disappear.

HNUH228V At What Cost? An Examination of the Societal and Ethical Impact of Modern Biological Research (3 Credits)

The results of modern biological research are pervasive - from cutting edge medical treatments, to debates about mandatory vaccination, to genetic engineering breakthroughs. This course will examine the social, ethical, and biological costs of research. The focus will be on the larger issues that surround the biology - questions of ethical research, the perception of science versus reality, the intersection of science and society, and even we may need to reconsider the meanings of "self" and "human". Students will reflect on the lessons learned to propose how research can proceed in a way that balances the demands of discovery with social justice and the ethical use of animals and the environment.

HNUH228W Planetary Protection vs. Planetary Imperialism (3 Credits)

International space agencies, such as NASA, ESA, and CNSA, continue to push the boundaries of deep space exploration, buoyed by public excitement, scientific ambition, and political motivation. However, the invasion of alien environments warrants an ethical consideration. What are the risks of forward contamination? What are the potential consequences of reverse contamination? How do we avoid a "space race" incentivized by imperialism? What happens next if we do discover life on another planetary body? This course equips students to grapple with such questions in light of the current state of planetary science, world affairs, and the near-term prospects for the commercialization of spaceflight.

HNUH228X How to Wage War Without Firing A Single Shot: A History of Soft Power and the Cold War (3 Credits)

If you close your eyes and think about war, the first images that pop into your mind are probably soldiers, battles, and military technology--NOT jeans, kitchens, and hockey! And yet, during the Cold War, it was precisely realms like fashion, sports, and music that, for many people of the time, came to define the conflict between the United States and the USSR. This course will explore soft power, or countries' ability to get what they want through attraction rather than traditional force, in the context of the Cold War.

HNUH228Y Interrogating Issues of Piracy/Pirates amidst the Shadowy Landscapes of War & Peace (3 Credits)

Who are pirates and what constitutes piracy in a given era? To what extent do changing notions of piracy reflect major societal transformations at the national, regional and global levels, as well as reveal the contested and often overlapping boundaries of war and peace? How can we use pirates/piracy as a "tool" to engender an historical, economic, political, social, and cultural understanding of global forces and change? Do the legends and myths surrounding infamous pirates represent the realities and relationships of early and new forms of piracy? Could piracy be conceived as a form of counterculture? To what extent do piracy, rivalry, state building, war-making, peace-making all belong on the same continuum? This course examines pirates/piracy as an integral part of major global processes. We will investigate when and why piracy emerged and flourished, and how lawbreakers and lawmakers relate to one another on the murky terrains of power, then explore alternative ways to (re)configure who is a pirate and what constitutes piracy, especially within the dynamics of today's neo-liberal globalization.

HNUH229P Climate in Crisis: Strategy and Advocacy (3 Credits)

This theory and practice track examines theoretical frameworks for understanding climate change and concrete cases that shed light on the complexity of managing it. In this, the practical component of the Climate in Crisis track, we explore several domestic energy and climate policy case studies, examining the competing roles played by various interest groups that influence legislative and regulatory outcomes, with a focus on differing organizational advocacy strategies. Once we have mastered organizational advocacy strategies, students bring those tools to bear on the most recent US Federal policy mandates and legislation. In 229T, students will complement this work with a deep dive into the nature of public goods and climate change policy, among other crucial considerations.

HNUH229T Climate in Crisis: Socio-Environmental Sustainability (3 Credits)

What does it mean to achieve sustainability and how does use of a socio-environmental lens help move the world in that direction? In this, the theory component of the Climate in Crisis track, students will develop an understanding of socio-environmental systems, what they have in common with other complex adaptive systems and the approaches used to study them. With a focus on why a socio-environmental systems approach can help illuminate the environmental, socio-cultural, economic, and intersectional dimensions of sustainability, we will explore what different disciplines bring to this complex topic and use qualitative and quantitative approaches to grapple with problems of sustainability. How do we work with stakeholders to identify the vulnerable, the equitable paths forward, and the trade-offs? Who are the winners and losers of policy decisions? In HNUH229P, students will complement the work of this course with hands-on engagement at the level of Federal policy and legislation.

HNUH238B Systemic Racism in Public Opinion and Policy Attitudes (3 Credits)

If we believe that racism is bad, why do we still support racist policies? No matter how hard we work to end it, the challenge of racism seems here to stay. Though attitudes toward racial segregation in schools have changed, schools are more racially isolated than ever. There is a disconnect in American public life between support for the idea of equality and resistance to policies aimed at addressing racism, and a deep divide over how to eliminate inequality. This course focuses on public opinion and how these attitudes inform public policy. Can we address systemic inequality through public engagement and by changing the national narrative with the support of evidence? Does change come from shifting views or shifting policies? Students will explore these issues through a case study on racial equity in the Honors College. By developing skills in evidence-based op-ed writing and survey-based experiments, students will add their voices to these pressing public debates of our time.

HNUH238C Surveillant Society, Surveillant Selves (3 Credits)

Do the social and individual benefits of surveillance outweigh its risks? Surveillance is a ubiquitous practice in contemporary society. Governments surveil populations; corporations surveil customers and users; and individuals surveil themselves and others. From red light cameras and doorbell security cameras to geo-tracking apps and smart appliances, surveillant practices shape 21st-century lifestyles. Many take these practices for granted as acceptable trade-offs for individual and collective benefits. Others sound the alarm on the dangers of being tracked and monitored, with concerns over individual liberty, social inequalities, and more. In this course we will debate how surveillance shapes social practices and selves. Students will draw their own conclusions about the role of surveillance in society, and what, if anything, should be done to change it.

HNUH238R Invasive: Feminist Perspectives on Power, Politics, and Ecosurveillance (3 Credits)

Invasive species play a key role in 60% of plant and animal extinctions, constituting a serious threat to global biodiversity and costing over \$423 billion annually. But what is at stake in the impulse to frame a species as "invasive"? What modes of watching, tracking, and surveilling emerge in the context of invasive species management? What are the material and ethical implications of these practices? As the cost of invasive species management has quadrupled every decade since 1970 and is likely to continue to increase, what alternatives exist? Reading through the lens of feminist science studies, this course asks what species movement might teach us about the possibilities and challenges of multispecies environmental ethics. Students will examine theoretical, historical, cultural, and practice-based accounts to better understand how our collective and individual actions continue to unevenly shape the biodiversity of our changing planet.

HNUH238U Unequal Opportunity? Race and the Future of American Education (3 Credits)

America's schools are dynamic microcosms of society at large. They simultaneously reflect, reproduce, and shape what happens outside of the classroom, including the many ways that racism affects us all. The educational mechanisms that operate for the benefit of some and to the detriment of others are often hard to see, often because they are hidden in plain sight. For example, national tests are standardized. When racialized differences in test scores appear, they are called "achievement gaps" and the disparity is attributed to essential differences or cultural deficiency rather than inequitable access and opportunity. In this course students will learn methods to critically examine such commonplace notions as the achievement gap and to document their effects on society. They will also develop strategies for self-reflection that enable them to confront inequity in their own educational experience and work to create change.

HNUH238V Still Separate and Unequal? The Enduring Role of Segregation in American Life (3 Credits)

Racial segregation remains an enduring feature of American life today though many believe segregation is a relic of the past. Using an interdisciplinary approach that incorporates history, sociology, political science, and public policy, this course highlights the complex ways in which legacies of segregation continue to shape life in the US. We will identify how federal, state, and local governments endorsed systemic racism through policies that defined the racial geography and resources of racial groups in the US. Students will engage with policy experts to consider the promise and limits of policies that promote integration within communities and the connection between race, spatial location, and current political divisions.

HNUH238X Learning as Deliberation: The Struggle for the Future of Higher Education (3 Credits)

It has been nearly a millennium since European university students first gathered in halls to listen to lectures. With some technological additions (lights, whiteboards, Powerpoints), introductory courses at U.S. universities look pretty much the same. For the past few decades, financial consultants, educators, and students have questioned whether this model of learning makes sense in the 21st century. In 2020, a pandemic gave this question a new urgency. Nothing about the old way of doing things seems inevitable anymore; everything seems up for debate. Should we get rid of lecture halls? What about dorms? The SATs? Tuition? This seminar invites students to deliberate about the current policies and politics of public higher education in the United States. We will study how ancient ideas about merit, democracy, and equity (or lack thereof) have shaped decisions about what higher education should offer and to whom. We will look to alternative traditions of learning with roots in indigenous worldviews, abolitionist organizing, and feminist collaboration, and study how these traditions have challenged and complemented public higher education. As we explore theories and practices of the past and present, students will learn to articulate and advocate for their own priorities as 21st-century citizens of UMD.

HNUH238Z Learning as Deliberation: The Struggle for the Future of Public Education (3 Credits)

This seminar invites students to deliberate about the historical roots of the policies and politics of public education in the United States. We will study how ideas about merit, democracy, and equity (or lack thereof) have shaped decisions about what public education should offer and to whom. We will look to alternative traditions of learning and study how these traditions have challenged and complemented public education. As we explore theories and practices of the past and present, students will learn to articulate and advocate for their own priorities in public higher education as 21st-century citizens of UMD. This course uses project based pedagogy. Students will create a proposal for teaching a facet of American History (Pedagogical Design Project) and engage in peer critique (presentation QA) to hone their critical skills.

HNUH239I Globalization & Sustainability; How Does the Transformation of Global Value Chains Drive Equity and Sustainability? (3 Credits)

We live in an increasingly interconnected world. This course explores the fundamentals of international trade that form the basis for the complex modern network of global value chains and how these relationships can be adapted to address their vulnerability while also transformed to build a more equitable and sustainable future.

Cross-listed with: BMGT271.

Credit Only Granted for: BMGT271 or HNUH239I.

HNUH239P Geopolitics of Finance: A Simulation of the Roller Coasters of Capitalism (3 Credits)

Explores the intersection of money, markets, politics, and power; and the periodic financial crises that leave a lasting, sometimes devastating impact on the global landscape. Students will examine the detritus of 200 years of crises in the United States, from 19th-century booms and busts, to early 20th-century crashes. They will take the roller coaster ride of the 2008 financial crisis, reliving events that left the world reshaped. Students will be primed to examine the ripple effects of financial crises and the role they have played in changing the global socio-economic landscape over the last two centuries. This course is self-contained but paired with HNUH239T in the Geopolitics of Finance track, which explores how globalization has brought about fundamental changes to our daily lives by making the world more interdependent.

Credit Only Granted for: HONR299F or HNUH239P.

Formerly: HONR299F.

HNUH239T Geopolitics of Finance: Innovation & Cross-Cultural Globalization (3 Credits)

Introduces students to the creative possibilities of the global economy: cross-cultural innovation, collaborative design-driven solutions, and enduring innovation with global purchase. Covers innovations in global business that are transforming the future through an embrace of diverse cultural perspectives. Working with interactive idealized design, out-of-the-box-thinking, and strategic exploration tools, students will explore and experience relevant design to new and cross-cultural value creation. Through rapid prototyping, immersive reflections, and innovative design activities, students will experience how to translate insight into action, and action into tangible results. The evolutionary application of frameworks in this course culminates in a capstone project. This course is self-contained but paired with HNUH239P in the Geopolitics of Finance track, which explores how globalization has brought about fundamental changes to our daily lives by making the world more interdependent.

HNUH248A Identity, Places, & Spaces (3 Credits)

Students in this interdisciplinary course will explore multi-layered issues related to privilege and oppression through their own life experiences via exposure to theory, research, film, memoirs, and current events. Students will evaluate and critique common assumptions about the meaning and experiences of privilege and oppression using Intersectionality theory as a guiding framework. The human experience related to various social identities (i.e., race, gender and gender identity, sexual orientation, social class, religion, age, and ability) will be addressed.

HNUH248B Setting the Table: The Challenges and Opportunities for Sustainable Agriculture (3 Credits)

What will the farm of the future look like? Our current food system is plagued with paradoxes. An estimated 41.2 million Americans are classified as food insecure, but we produce 4,000 calories per person per day. Between 2008 and 2012, 1.6 million acres of long-term grasslands were converted to crop production, yet more than 350,000 acres of farmland were lost to development annually. This course will investigate what determines the food we eat and how we can make changes today that will improve both food access and the environment for future generations. Students will learn agribusiness, as well as alternative food movements and regenerative agriculture. They will meet experts from the USDA and Maryland producers. By growing their own vegetables, tracking food consumption, and exploring family history linked to farming, students will leave the course as conscious consumers empowered to navigate food system reform.

HNUH248C The Societal Impact of Artificial Intelligence (3 Credits)

How will AI change society? AI is changing not only business, but the nature of society itself. This course investigates the nature of those changes and forecasts their future development. With a focus on the implications to business, including the nature of human jobs as AI does an increasing amount of work, students will debate the implications of AI through a variety of lenses. From definitions of consciousness and the potential for robots to claim rights to the gender implications of AI, we will explore its philosophical and political implications. As AI is also capital, we will interrogate what the advance of AI means to capitalists and for labor. Finally, we will enter the debate around whether AI will require more than machine learning to approximate general intelligence and whether it can truly be creative. Through the exploration of the unprecedented pitfalls and opportunities that AI represents, students will learn how best to cope with a world that is dependent on AI.

HNUH248R Artificial Intelligence: Critical Examinations through Science Fiction and Technology (3 Credits)

AI permeates our world, but science fiction (SF) told stories about it centuries before AI became a reality in the 1950s, shaping our understanding and expectations through words and images. In this course, students will trace AI's evolution through SF to critically examine how key SF works have shaped how we think about AI and intelligence. Through an exploration of existing AI, like autonomous weapon systems, generative AI, and AI assistants, as well as a visit to UMD's AI department, students will learn to be critical viewers, readers, and developers as they grapple with AI's moral and social implications. Using the context of SF and technological developments, we will explore what the creation, existence, and evolution of fictional and real AI means for technology and humanity.

HNUH248V How Can We Study Environmental Problems? (3 Credits)

How do we study environmental problems? The course provides an overview of the ways social scientists collect information about environmental issues and environmental change, most of which are driven by society and the social world. The course focuses on learning how to collect data that are reliable and applicable to research questions. Through the lens of specific case studies of environmental efforts currently underway, students will learn how to construct a testable hypothesis, design a small-scale research project, and write up the findings of this work to understand environmental issues. They will develop a critical eye to the structure of social science research: identifying the object of inquiry, noting what is being tested; how it is operationalized; and evaluating the quality of the research conducted. The course requires no background or prerequisites.

Credit Only Granted for: HONR249D or HNUH248V.

Formerly: HONR249D.

HNUH248X My Hometown, Our Wilderness: Ecology of Identity (3 Credits)

What has been the setting of your life? Suburbs? Cities? A farm? We may be used to thinking of environments as equal access across society, since everyone is free to visit our National Parks or spend a day at the beach. But there are striking ways in which identity affects our habitat. Race, class, gender, sexual preference, and other markers have strong influences on where we spend our time, what we eat, and how we work and relax. Suburbs, cities, wilds, and farms are not just physical places, they exhibit histories of social inclusion and exclusion. For example, the money and free time of affluent Americans serves as a portal to leisure spaces that would be inaccessible to working-class Americans who lack the ability to take time off, drive or fly long distances, and pay for it all. We'll profile identity ecology through the poetry of African American urban naturalists, essays of wilderness-loving men like Edward Abbey, the comedy of white environmental outrage, and the racialized class tensions in resorts like Aspen, CO. This survey will support your in-depth personal exploration of identity ecology in a collaborative video media project.

HNUH248Y How Do You "Man Up?": Men, Masculinity, and Mental Health (3 Credits)

In August 2018, the American Psychological Association released guidelines regarding the best practices for researchers and mental health professionals when working with boys and men. Many reacted with the question, "are we treating masculinity as a mental health issue?" This course aims to answer that question by taking a historical perspective on how American society has viewed masculinity from the beginning of psychology as a field of study until present day. An intersectional approach will be taken to better understand how race, ethnicity, sexual orientation, gender identity, and socioeconomic status impact men and masculinity. We will address the questions: How does one prove their manhood? How much of masculinity is biological versus socialized? What experiences are unique to men? And how do psychologists and mental health professionals understand and address mental health concerns among men?

HNUH249P National Security: US Foreign Policy (3 Credits)

Following the terrorist attacks of September 11, 2001, the U.S. launched a major effort to dismantle the Taliban and create a sustainable democracy in Afghanistan. In 2021, the Taliban took control of the country. Was the U.S. effort doomed to fail? To answer this question, UH students will partner with peers at the American University of Afghanistan through a virtual global classroom to examine the lessons learned from the U.S. and international presence in Afghanistan over the past 20 years. Through reading assignments and virtual meetings with former senior U.S. and Afghan officials, students will examine the reasons behind the downfall of the country and analyze whether the outcome could have been changed. Students are not expected to have any prior knowledge about the conflict in Afghanistan. This course is self-contained but paired with HNUH249T in the National Security track, which explores debates around efforts to protect the nation from terrorism while preserving our values.

Credit Only Granted for: HNUH249P or HONR269T.

Formerly: HONR269T.

HNUH249T National Security: Domestic Dilemmas (3 Credits)

The police detain a man thought to be plotting a terrorist attack the next day in a U.S. city that would kill or injure thousands. They want to subject him to "enhanced interrogation," which some consider to be torture. Should the police be permitted to use enhanced interrogation techniques? Who decides? This course will ask key questions raised during the efforts of our national security apparatus to protect the nation. Given the tension between the powers of the government to protect citizens, and the necessary limits on that power, what are the fundamental principles that should govern our efforts to protect the nation while preserving our values? Students will try their hand at finding the delicate balance of these principles in difficult national security dilemmas. This course is self-contained but paired with HNUH249P in the National Security track, which explores post-9/11 policy decisions around the U.S. effort to create a sustainable democracy in Afghanistan.

Credit Only Granted for: HNUH249T or HONR278D.

Formerly: HONR278D.

HNUH258B The Ecology of Childhood Poverty (3 Credits)

How does poverty shape the relationship between humans and their environment? It may seem obvious that being poor in childhood has enduring effects on development. What is less obvious is how experiencing poverty in childhood shapes relationships between children and their surroundings, including family interactions, peer relationships, adult dynamics, and the health of the community. Less clear still is the extent to which positive interactions with caretakers and social supports can protect children from potential harm as they grow up. This course focuses on the complexity of poverty as a social force and community concern. Students will investigate the nature of poverty through an interdisciplinary lens that includes social theory, developmental psychology, and empirical studies. After analyzing various approaches to the study of child poverty, students will be in a position to use research on parenting and poverty to evaluate public policy and social programs in their own backyard.

HNUH258U The Basis of Behavior: Evolution and the Origin of Actions (3 Credits)

Why do some monkeys spend time grooming each other in large groups, while others lose their minds with rage if another monkey comes too close? Complex organisms exhibit behaviors that both fascinate and confound, and the way an animal behaves dictates how it interacts with its environment, with profound consequences. Individual behaviors can have dramatic effects on individual fitness, an individual's groupmates, and even the evolution of species. This leads to a fundamental question in behavioral evolution: why do animals do the things they do? The answer lies in the interaction between individual experiences and eons of natural selection. In this seminar, students investigate what organisms were, what they have become, and why. With a focus on the transitions in behavior that caused single cells to evolve over time into complex societies, students will apply evolutionary principles to individual development and explore how and why individuals choose certain behaviors over others.

HNUH258X Carnal Knowledge: Health, Data, and Power from Enlightenment to WebMD (3 Credits)

"Carnal knowledge" may sound provocative but, in a literal sense, it describes information derived from and about the human body. Consider a ship captain observing the tattoos of sailors to understand their origins, a surgeon examining a cadaver for signs of saintliness, or a natural philosopher ingesting an herb to determine its toxicity. These are instances of carnal knowledge. Historically, such intimate acts turned the body into a site of data collection and a powerful source of information. Both by choice and by force, the instrumentalization of the human body was used to solve scientific problems as well as to justify hierarchies of race and sex. Through a deep engagement with this material, students will connect topics such as the transatlantic slave trade to cell lines as they uncover the embodied relationship between information and power that still shapes our world today.

HNUH258Y The Power of the Writing Voice (3 Credits)

Words have power to ignite political storms, protest movements, and revolutions. Throughout history, writers have used their voices to create stories that have transformed the world. This course will examine powerful voices in history that have inspired social, political, economic, environmental and cultural change. Students will critically examine the power of these voices through the written word, lectures, and various other media. By critically listening to revolutionary speeches and "Soul" music, and by critically reading literature and essays, students will sharpen their own writing voices. As students explore the complex, dynamic relationships between the written word and cultural change, they will gain insight into the nature of power and influence.

HNUH259P Drawn to D.C.: Mapping the City (3 Credits)

Spaces, materials, objects, structures—the building-blocks of cities—index the values of the societies that produce them. By their very nature cities are memory devices. Yet, in an increasingly transient and virtual world, with access to a seemingly infinite amount of memory, what is the status of the spaces we inhabit? This course will explore the relationship among memory, the body and the built environment. Beginning with the role cities play in our individual lives and the construction of personal memories, we will take account of what we forget by remembering and what experiences are missing. Through lectures, seminars and discussions, students will produce short experimental books and pamphlets remapping Washington D.C. and the many invisible - personal - cities it contains. No previous art or design experience required. This course is self-contained but paired with HNUH259T in the Drawn to D.C. track, which explores the created spaces we inhabit, and how they inhabit us.

Restriction: Must have matriculated in University Honors starting in Fall 2020 or later.

HNUH259T Drawn to D.C.: Reading the City (3 Credits)

A movement known as the Metropolitan Revolution has recognized cities as sites of concentrated economic growth and political power. What does that movement have to do with you? Not only does the city change who you are, but the ambitions and fears that you bring to it also alter what is already there. With Washington, D.C. as a case study, this course considers cities in the context of the ambitious plans that developed them and the unbuilt spaces that open us to imagining them anew. From the ideological tensions and competing policies that politicize urban space, to the construction challenges and social implications of choices made, why we build is as important as what we build. We will experience Washington through its history of spaces, stories, music, art; and learn to see ourselves as co-designers of its present. This course is self-contained but paired with HNUH259P in the Drawn to D.C. track, which explores the created spaces we inhabit, and how they inhabit us.

HNUH268A Arbitrating our Bodily Rights: What it Means to Consent (3 Credits)

Both American law and conventional morality support the view that human beings have bodily rights - ones we can waive by giving another person our consent to do what would otherwise be a rights violation. Yet, debate about the sovereignty of an individual's body and the potential rights of others—including the state—over our bodies lies at the core of some of the most contentious issues facing us as a society. This class will investigate the thorny debates that pertain to consent in sexual relations, medicine and research, and bodily markets. What types threats, offers, or cognitive incapacities undermine true consent? How do we evaluate the moral or legal significance of bodily rights when they come into tension with the government's interest? After evaluating arguments, exploring distinctions, and using philosophical tools to arrive at reasoned conclusions about consent, students will learn to apply these conceptual tools to cases from fiction and current events.

HNUH268B Global Heritage (3 Credits)

What traction does the past have in society today? This course explores globally how the past gains traction in society today and becomes remade in the present. That inquiry will be guided by the idea of heritage, as it mobilizes the past within a broad spectrum of social, political, economic, and environmental issues. We will examine western relationships to the past as intimately tied to property and the drive to plunder, collect, and catalogue. Increasingly, conceptions of heritage include landscapes, as well as intangibles such as music, dance, and folklore. This broad definition honors the diversity of present-day relations to the past, even as it strains heritage management models that are organized around definitions and regulations, and bear the weight of historical injustice. Close examination of heritage at work within global crisis and struggle prompts questions on who owns the past, and who owns up to it. What do we owe the past, and will we be good ancestors to the future?

HNUH268H Contested Bodies: Religion, Race, and Narrative (3 Credits)

What does your body express about who you are and what you believe? How do you perceive your body, and what role do public expectations, social values, and cultural norms play in that perception? With Muslim women as our primary case study, this course asks students to engage with the lived experience of bodies perceived as passive, vulnerable, or even violent in the Western context, and to evaluate their construction of agency. Through engagement with politics, religion, race, and transnational feminism, we will explore how bodies are expressed, contested, subjugated, and violated within various configurations of power and governance. We will encounter personal narratives—and create our own—to understand how bodies also resist the persistent forces that seek to shape their image.

HNUH268W Where the Waters Blend: Contemporary Indigenous Perspectives on History, Traditions, and Modern Issues (3 Credits)

In this unique cultural and personal learning experience, students will explore the history, traditions, and contemporary issues faced by Maryland's Indigenous people. The experiential work of the course asks students to consider how the past matters, particularly when it is embodied in the land they live on, and their present obligations to it. On-campus and place-based learning, focused on the precolonial and colonial histories of Maryland's Indigenous people, and their contemporary issues create opportunities for students to reflect upon and interrogate their understanding of Maryland's past, present, and future. Students will emerge from this course with a greater understanding of the Maryland's Indigenous people and an increased capacity to challenge colonial and postcolonial paradigms that marginalize the Indigenous people in our region, nation, and across the globe.

HNUH268X Sex for Sale: Prostitution in Transnational Perspective (3 Credits)

Can sex be sold? Is prostitution work or violence, and who gets to decide if it is legal or illegal? The sex industry has provoked considerable debate in academia, policy circles, and aid organizations globally. This interdisciplinary seminar will engage with these debates through an exploration of histories of prostitution across time and space, and in a variety of theoretical and material contexts. Our main focus will be on the nineteenth- and twentieth-century U.S., Europe, and the Middle East, but we will also explore cases from Asia, Latin America, and Africa. We will use this transnational lens to interrogate social and cultural assumptions about bodies, agency, and social institutions. We will also consider a variety of social movements from anti-prostitution to SlutWalks, and regulatory policies from criminalization to legalization, and how they intersect with race. This course invites students to move beyond the surface and form their own approach to these body politics.

HNUH268Y The Politics of Disability: Life Narratives & Identity (3 Credits)

The politics of disability are fraught and contentious. This course takes up the experience of disability by asking how and why differently-abled bodies are excluded, marginalized, or threatened. Students will examine these questions through the psychosocial and cultural history of disability, as well as through life narratives and real-world exploration. Beginning with the history of disability, students will gain an understanding of how current disability identity and culture has develop in the US. Students will experience and also produce personal life narratives related to bodily politics and gain insights that help them navigate the politics and participate in the change-making advocacy of disability.

Credit Only Granted for: HONR218V or HNUH268Y.

Formerly: HONR218V.

HNUH268Z Body Boundaries: The science behind asexuality, coloniality, and immortality (3 Credits)

Animal bodies have clear boundaries across space and time - or do they? Although the most familiar animals have clearly delimited bodies and persist only for a certain amount of time, evolution has produced many remarkable animals that defy simple definitions of bodies. Some animals shatter their bodies into pieces to reproduce, generating a collection of identical clones. Others remain physically attached to their siblings or offspring - coordinating activities across attached individuals and functioning as a meta-organism. Still others continually renew their bodies and attain immortality. In this seminar, we will explore the naturally-occurring phenomena that challenge our concept of body. As we analyze the complex ways that bodies relate to one another in the world and broaden the definition of body, students will engage in authentic scientific practices with transferable skills.

Credit Only Granted for: HONR258A or HNUH268Z.

Formerly: HONR258A.

HNUH269P Building Community: How to Make Friends (3 Credits)

In 2017, U.S. Surgeon General Vivek Murthy deemed loneliness an "epidemic." While the rise of social media is meant to foster connection, over 23% of adults report being lonely and social networks have been shrinking for decades. Despite increasing rates of loneliness, it is still possible to overcome these trends and find connection. We tend to assume that we should know how to connect with others intuitively, but, as rising rates of loneliness indicate, this is not the case: connection is something we must learn and practice. In this applied course, students will learn the science of connection and engage in practical activities designed to help them make and keep friends. They will leave the course better able to foster meaningful connections. This course is self-contained but paired with HNUH269T in the Building Community track, where you will learn the social value of showing up, for the world and for yourself.

Credit Only Granted for: HNUH248U or HNUH269P.

Formerly: HNUH248U.

HNUH278A The Research Behind Headlines on Words, Thought, and Behavior (3 Credits)

How does the human mind use language? Type "Language Science News" into your Google search bar. Among the more than 3 billion hits, headlines like "What is love? It depends what language you speak" and "Science's English dominance hinders diversity" invite you to think about the impact of words on thought and behavior. These are stories about how humans acquire and use language, but they ultimately address big questions about how we experience knowledge itself. In a world of unprecedented access to science journalism, did you ever read a headline about human behavior and wonder: How do we know? This class takes up the elegant ways cognitive scientists design experiments to answer crucial questions about language and thought, brain and behavior, that have no intuitive answers. Students will dive deep into the media coverage of their favorite claims about what we know, debate the psychological science behind these claims, and develop transferable critical-thinking skills in the process.

Cross-listed with: HESP214.

Credit Only Granted for: HNUH278A or HESP214.

HNUH278B Democratic Habits (3 Credits)

How do ordinary citizens power democracy? At the age of 18, every American citizen is endowed with the right to vote, but what if democracy demands more than voting? With democratic processes seemingly in peril all around us, what can and should ordinary citizens do to safeguard democracy? Looking beyond the basic right to vote, this class will instead explore the complex ecosystem of citizenship practices necessary for collective self-governance. Turning to both philosophy and history, the course material addresses the power and peril of such civic habits as mutual aid, economic participation, tolerance, attention, organizing, protest, and more. We consider what resources these habits require, what virtues they inspire, and what happens when they conflict with each other. Students in this course will acquire the tools to develop and act on their own answer to the pressing question of what it will take to save democracy.

HNUH278U Indigenous Knowledge, Supernatural Remedy, and Collective Action: Lessons from Agrarian Societies (3 Credits)

How were human communities sustained before the rise of capitalism, individualism, and secularism? Where can we look to imagine a world in which modern science, polity, and ethics are not the defining system of civil social? Through an exploration of stories from late medieval Europe, China, Southeast Asia, and other regional communities, with a particular focus on the East, this course aims at de-orientalizing the narratives of the Western world by recovering the collective practices of the global past and present. Interrogating the idea that human history has been a linear process of industrialization and secularization, this course encourages students to reflect on the limits and problems of modernization, and learn from cultures whose practices were displaced or silenced by colonial knowledge production. Students will be empowered to consider, and even envision, alternative versions of modernity and the future of our world.

HNUH278V Climate Change, Infectious Disease, and Civil Society (3 Credits)

Viruses that are lethal to human life have been on earth for centuries. Why are they surging now? And how can we respond to the recent breakneck spread of Coronavirus? This class begins its journey with Homo sapiens, our ancestor that dispersed out of Africa and carried infectious diseases across the planet. Human expansion into new ecosystems also provided opportunities for us to acquire new pathogens. While all of human history is marked by diseases caused by human migration, the Industrial Revolution greatly accelerated human mobility while planting the seeds of the human impact on climate change. Today, the increasingly rapid movement of people and goods, combined with a warming planet and the large-scale disruption of major ecosystems has witnessed an unprecedented spread of infectious diseases. Students will explore how these trends impact our lives and collectively challenge themselves to do what must be done to save our planet and ourselves.

HNUH278X A Way with Words: Order and Knowledge in Enlightenment Europe (3 Credits)

"Without language, things cannot well be expressed or published to the World," wrote Edward Phillips in *The New World of English Words* (1658). In this course, we will interrogate the power of words to communicate and classify, to impose meaning and order in the historical moment that brought about many of our modern institutions and ways of thinking: the European Enlightenment. From the binomial taxonomies with which Linnaeus ordered "chaos and confusion" to the racist taxonomies deployed to reinforce inequities, we will survey how language facilitated the consolidation of European power at home and abroad. We will further develop the visual literacy to decode how images convey knowledge. Looking back to the period that gave shape to many modern languages, institutions, and divisions of knowledge, we will be poised to face today's crises.

HNUH278Y Science in an Age of Truthiness (3 Credits)

Scientific research has the power to advance understanding, create new technologies, and improve our lives. And yet scientific language - which is essential for these achievements - can be appear opaque and untrustworthy to non-scientists. Indeed, the fact that scientific understanding develops over time can even make the knowledge seem capricious. As a result, science is both unfairly maligned and unrealistically praised, sometimes even in the same breath. Through both the philosophy of science and historical scientific literature, we will survey how scientists have done and expressed science. Students will be empowered to critically evaluate current conceptions of science as these are revealed in the debates around climate change and COVID-19.

Credit Only Granted for: HONR299I or HNUH278Y.

Formerly: HONR299I.

HNUH278Z War of Words: Disinformation and Manipulation (3 Credits)

Examines a global phenomenon that has taken on massive proportions in the world: the spread of disinformation. We will explore types of false information, from misinformation to propaganda, that are designed to manipulate public opinion. We will survey the historical origins of these tactics, from conspiracy theory to racist propaganda, and how they have been used by governments, interest groups and businesses. Through a hands-on exploration of deep fakes and the alteration of text and image, this course will give students the practical skills they need to verify information and fact check. Students will leave the course conversant in the basics of digital safety for content producers.

HNUH288A Welcome to the Party: Race, Nightlife, and Identity in America (3 Credits)

How does play shape our humanity and national identity? We often define people by the work that they do, whereas we tend to think of leisure and after work playfulness as a release from that identity. This course takes up a particular form of play—nightlife—to reckon with how it shapes what it means to be human and how it impacts nationhood, particularly around matters of race and oppression. Spanning from slavery to the present, this course examines how nightlife has been used to deny black people's humanity and been a vital site of playfulness, manifest as joy, resistance, self-making, and aesthetic innovation. Using performance studies to make sense of the world, our explorations will range from cakewalk dance competitions on plantations to queer night clubs. Once students better understand how nightlife is vital to the making and the unmaking of black people's humanity, they will grapple with play as a meaning-maker in their own lives and in our democracy.

HNUH288B Race, Reproduction and Rights (3 Credits)

Can humanity thrive without ensuring reproductive freedom? The 2022 US Supreme Court decision that the right to an abortion is unconstitutional has generated impassioned debate about women's rights and access to reproductive health care in the US and globally. This debate opens space to think beyond "pro-choice or pro-life" polarization and create conditions that promote equity, respect for rights, and a healthy society. These conditions would need to address injustices such as the racism, gender inequalities, marginalization, and colonization that produce disparities in reproductive health care and jeopardize the well-being of individuals, families, communities, and countries. Who controls the bodies of marginalized women and men? What is the meaning of reproductive rights for people who have little power? This course challenges students to bring together multiple disciplines, become critical data consumers, and develop innovative ways to use this knowledge to influence policy.

HNUH288U The Body Knows: Creating Healthy Intimacy on College Campuses (3 Credits)

How do we figure out what we physically desire? How do we know where our boundaries are and how do we communicate that to others? What would it look like to create a campus community where young people are confident about their sexuality and their ability to communicate the nuances of their needs to potential partners? This course is designed as a creative workshop to help students put their own embodied knowledge in conversation with theories and practices of healthy intimacy. Core texts explore the history of sexual violence as a tool of colonization, the relationship between feminism and sex-positivity in popular culture, and the consent theories that have become central to college campus responses to sexual violence. With the help of performance-based techniques, students will have the opportunity to research issues specific to UMD, design curricula for their peers, and advocate for an end to sexual violence on campus.

HNUH288X The Human Interface, from Anatomy to Avatar (3 Credits)

Anthropomorphized pets post on Instagram, FitBits transmit biodata, bots influence elections... In the digital world designed by and for human beings, all sorts of actors imitate people, while people are objectified through surveillance and data mining. Despite a frequent distinction between the internet and 'IRL', physical bodies are wrapped up in every aspect of existence online: from the factory workers who build our technology to the postures and gestures those devices require us to adopt. Exploring this range of bodily phenomena, this course considers what constitutes a "human body" online and how digitality and connectivity inform our understanding of personhood. From RPGs and dance challenges to AI and visceral responses to internet content, students will analyze the complex relationships between the technological and the embodied, the social and the political, the past and the future.

HNUH288Y What You Are and Why it Matters (3 Credits)

Who you are is interesting and important, but not the subject of this course. What you are is closer to our topic but not yet specific enough; after all, you are many things: a student, a citizen, a driver, a Terp, and so on. This course asks deeper and more elusive questions: what kind of being are you? What is your fundamental nature—the nature you share with others and that simultaneously grounds your individuality? We will work to answer these questions and investigate the limits of our nature, from the possibilities of time travel and teleportation to the realities of dissociative identity disorder and conjoined twins. The insights we glean will help us grapple with the nature of human existence—from what happens when you die, to our responsibilities toward others, to nothing less than the meaning of life.

HNUH288Z Non-Human Animals in Human Society (3 Credits)

As humans, we share our lives with other animals in diverse and conflicting ways. Non-human animals can be consumed as food, used for scientific research, and treasured as companions. They are commercialized, worshipped, and stereotyped. Our complex relationships with other animals emerge from and fuel debates about what makes "us" different from "them." In this course, we will ask (and attempt to answer) questions such as: What roles do we open to (or force on) non-human animals in American culture and why? Who makes these decisions and what is their effect on animal life? We will explore the evolution of modern human-animal relationships to contextualize major social and scientific debates that have arisen in the last century, including what it means to be human in this context, and why they matter.

HNUH300 Vantage Point Seminar (2 Credits)

Goal-setting and project-design seminar required of all UH students and taken in the second semester of the sophomore year or the first semester of the junior year.

HNUH318T Political Engagement and Advocacy (3 Credits)

An examination of questions and issues in the practice of political engagement and advocacy. Guest lecturers drawn from political, civic engagement, and advocacy arenas will visit class and participate in discussions.

Cross-listed with: FGSM310.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH318T or FGSM310.

HNUH328T Public Health Policy (3 Credits)

An exploration of the major questions and issues facing the U.S. health care system as well as the formulation and implementation of health policy.

Cross-listed with: FGSM320.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348P, HNUH328T or FGSM320.

Formerly: UNIV348P.

HNUH338T Homeland and National Security Policy (3 Credits)

An examination of the concept of U.S. homeland and national security, threats, and major vulnerabilities in the context of recent history.

Cross-listed with: FGSM330.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348T, HNUH338T or FGSM330.

Formerly: UNIV348T.

HNUH348T Energy and Environmental Policy (3 Credits)

An examination of issues of energy and environmental sustainability through an investigation of policy-making in energy, climate change, and sustainable development.

Cross-listed with: FGSM340.

Restriction: Must be in the Federal Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV348E, HNUH348T or FGSM340.

Formerly: UNIV348E.

HNUH358T Critical Regions and International Relations (3 Credits)

An examination of international relations and foreign policy challenges in critical regions.

Cross-listed with: FGSM350.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH358T or FGSM350.

HNUH359T U.S. Intelligence and Policymaking (3 Credits)

Examines the role of intelligence in supporting U.S. security strategy and policy. Students will learn how the U.S. Intelligence Community (IC) is structured and organized, and will explore how intelligence is deployed to support the warfighter, diplomats, and senior-level decisionmakers.

The course emphasizes the development of critical thinking and analytic skills, as well as professional writing and oral presentation abilities that are necessary for successful work in national security organizations. The course will feature guest lecturers from real-world practitioners to supplement course readings.

Cross-listed with: FGSM355.

Restriction: Must be in the Global Fellows Program; and Permission of Department.

Credit Only Granted for: HNUH359T or FGSM355.

HNUH368T U.S. Diplomacy and Policymaking (3 Credits)

An examination of questions and issues in the practice of contemporary diplomacy and policy-making. Guest lecturers drawn from Washington policy-making and foreign service communities will visit class and participate in discussion.

Cross-listed with: FGSM360.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH368T or FGSM360.

HNUH378T Science Diplomacy: Foreign Policy & Science, Technology, and Innovation (3 Credits)

An exploration of the critical roles scientific knowledge and technological innovation play in the formation and implementation of foreign policy issues, including energy and climate change, public health, space and innovation, and economic development.

Cross-listed with: FGSM370.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV389F, HNUH378T or FGSM370.

Formerly: UNIV389F.

HNUH388T Responses to Global Challenges (3 Credits)

An examination of global issues and responses primarily from the perspective of the practitioner. The focus will be on social, humanitarian, and human rights issues in different global contexts.

Cross-listed with: FGSM380.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: UNIV389B, HNUH388T or FGSM380.

Formerly: UNIV389B.

HNUH398P Federal and Global Experiential Learning (3-9 Credits)

This is the experiential course component of the Federal Fellows Program and Global Fellows Program.

Cross-listed with: FGSM398.

Restriction: Permission of instructor.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: FGSM398 or HNUH398P.

HNUH398T Global Health Challenges and Water Security (3 Credits)

An examination of questions and issues of global health and water security. Expert practitioners will also visit class and participate in discussions.

Cross-listed with: FGSM390.

Restriction: Must be in the Global Fellows Program; and permission of instructor.

Credit Only Granted for: HNUH398T, HONR378M, or FGSM390.

HONR - Honors

HONR100 Honors Colloquium (1 Credit)

Attendance at various additional activities and events is required. Reading and discussion on the personal and social value of higher education; development of a coherent general education program; exploration of the educational and cultural resources of the campus and metropolitan area; participation in a community service project; and other activities designed to broaden students' conception of what it means to be an educated person.

Restriction: Permission of University Honors Program.

HONR149 Honors Colloquium (3 Credits)

A colloquium on a variety of topics.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR168 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR169 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR208 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR209 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR218 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR219 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR228 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR231 London and the British Empire (3 Credits)

Focuses on the people, places, and policies that shaped the development of the British Empire, the single largest trans-cultural phenomenon in the world since 1500. Students examine how ideology, migration, technology and resistance shaped the expansion and eventual retrenchment of British imperial power in the Atlantic world and the Indian sub-continent. With the nation's capital as our classroom, students explore the complex workings and legacies of the British Empire from the perspective of its nerve center. The curriculum illuminates the experience of empire for subjects both in the colonies and the metropole and will pay particular attention to the maritime origins of empire, the lives of black Britons and the abolition of slavery, and the rise and fall of the British in India.

Cross-listed with: HIST231.

Credit Only Granted for: HIST219K, HONR249B, HONR231, or HIST231.

Formerly: HIST219K.

HONR259 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR268 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR268G The Science of Birdwatching (3 Credits)

In this course you will learn the skill of birdwatching (or "birding") and will contribute your observations to a world database of sightings that help establish trends in overall bird populations. Birding (and bird feeding) is one of the most popular pastimes in the United States, with tens of billions of dollars spent annually by enthusiasts. Birds also tell us about the health of our natural environment: by noting where birds are, and where they are absent, scientists can learn about harmful changes to our world ecosystem and how to reverse them. We can help out by becoming responsible citizen scientists. This course will feature regular field trips to observe birds in their natural habitats. No prior birding experience is needed.

HONR269 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR288 Honors Seminar (1-3 Credits)

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR298A Impacts of Globalization (3 Credits)

Introduces students to key global concepts, discusses a range of perspectives on globalization and cultural competence, and offers an applied learning experience.

Prerequisite: CPBE100; or by permission.

Cross-listed with: CPBE270.

Restriction: Students must be matriculated into the College Park Scholars Business, Society & the Economy (CPBE) program; or by permission.

Credit Only Granted for: CPBE270 or HONR298A.

HONR300 Intergroup Dialogue Facilitator Development & Practicum (3 Credits)

Facilitation is an artform and a science. This course is designed to introduce students to foundational dialogue facilitation skills and social justice frameworks needed to effectively facilitate group interactions across and within social differences. Students will apply the skills learned by facilitating a multi-session dialogue course with either the Common Ground or the Words of Engagement Intergroup Dialogue Program (WeIDP).

Cross-listed with: EDDI300, CPSP300.

Restriction: Permission of the Counseling, Higher Education, and Special Education department.

Credit Only Granted for: WEID300, CPSP300, HONR300, or EDDI300.

Formerly: WEID300.

Additional Information: Students must be given permission to enroll and be admitted to the intergroup dialogue facilitator program.

HONR318 Advanced Honors Seminar (3 Credits)

A series of seminars, often interdisciplinary in character, and sometimes team taught. The subjects will vary from semester to semester.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR328 Advanced Honors Seminar (3 Credits)

A series of seminars, often interdisciplinary in character, and sometimes team taught. The subjects will vary from semester to semester.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR349 Honors Colloquium (1-3 Credits)

A series of seminars, often interdisciplinary and sometimes team taught. Subjects may vary.

Restriction: University or departmental Honors student. Or permission of instructor; and permission of Director of University Honors.

Repeatable to: 3 credits if content differs.

HONR358 Honors Practicum (3 Credits)

For student section leaders of HONR100 or HONR200.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

Formerly: HONR379.

HONR359 Honors Workshop (1-6 Credits)

Honors workshops are small seminar classes which concentrate on skill development.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR368 Advanced Honors Seminar (3 Credits)

A series of seminars, often interdisciplinary in character and sometimes team-taught. The subjects will vary from semester to semester.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

HONR368A MGA Legislative Seminar (3 Credits)

Prepares students to intern for the Maryland General Assembly. Introduces standard legislative genres and assigns extended practice in researching legislative issues.

Prerequisite: Students who have taken courses with comparable content may contact the department; or ENGL101.

Cross-listed with: ENGL381.

Restriction: Permission of ARHU-English department.

Credit Only Granted for: HONR368A or ENGL381.

Additional Information: Application required. Contact english@umd.edu for more information.

HONR379 Honors Independent Study (1-6 Credits)

Involves reading or research directed by individual faculty, especially in areas outside of the student's major. Open only to University honors students.

Restriction: Permission of University Honors Program.

Repeatable to: 6 credits if content differs.

HONR379W Maryland General Assembly Writing Internship (6 Credits)

Experiential learning at the Maryland General Assembly (early January through early April). Interns participate in standard office tasks, research legislative issues, and draft legislative texts such as constituent letters, notes on bills, newsletters, policy memos, and testimony. Specific assignments vary according to the host legislator's needs and the intern's schedule.

Prerequisite: ENGL381 or HONR368A.

Cross-listed with: ENGL388M.

Restriction: Minimum cumulative GPA of 3.0; and must have earned a minimum of 60 credits; and must be admitted to the MGA program.

Credit Only Granted for: ENGL388M or HONR379W.

HONR386 Experiential Learning (3-6 Credits)

Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

HONR388 Honors Thesis or Project (3-6 Credits)

Repeatable to: 6 credits if content differs.

Formerly: HONR370.

HONR389 Guided Honors Teaching (3 Credits)

For HONR100 and HONR200 section leaders. Guided teaching experience for selected students in the University Honors Program.

Restriction: Permission of University Honors Program.

Repeatable to: 9 credits if content differs.

IDEA - Academy for Innovation & Entrepreneurship

IDEA101 The Carillon Studio: Creative Problem Solving and Designing Your Maryland Experience (1 Credit)

Students learn creative problem solving and collaborative strategies that will drive academic success and empower students to tackle big questions.

Restriction: Must be in the Carillon Communities Program.

Credit Only Granted for: IDEA101 or CRLN101.

Formerly: IDEA101.

IDEA201 Innovation Tools & Mindsets (1 Credit)

Challenges assumptions around what is needed to innovate and who innovators are. Through hands-on activities and reflection, you'll be invited to step out of your comfort zone, think and work in new ways, and gain confidence in your creative abilities.

Credit Only Granted for: IDEA201 or IDEA258A.

Formerly: IDEA258A.

IDEA210 Innovation + Sustainability: Designing your own Sustainable Future (3 Credits)

This hands-on, project-based course tackles the intersection of environment, creativity, and business to develop sustainable solutions to pressing environmental problems. Students work in teams and use design thinking and other human-centered methods to address real-world design challenges. Students will integrate entrepreneurial methods to shape their college and career journey towards a more sustainable future and learn how to motivate and empower others to adopt more sustainable behaviors.

Credit Only Granted for: CPSP249E or IDEA210.

IDEA258 Special Topics in Innovation (1-3 Credits)

Special topics in innovation

Repeatable to: 6 credits if content differs.

IDEA311 Design Your Purpose (1 Credit)

What do you want to do once you graduate? What about with your life? These are the big questions we begin to tackle in this course. Use design methods and mindsets to explore your personal and professional development goals and explore potential career paths. Using empathy, brainstorming, and prototyping techniques, you'll imagine potential futures for yourself and test them to see if they are a good fit for you.

Credit Only Granted for: IDEA311 or IDEA379A.

Formerly: IDEA379A.

IDEA345 Becoming a Design Thinker (1 Credit)

Learn design thinking tools and mindsets to create change in meaningful ways and cultivate your curiosity in this dynamic, hands-on course. Encounter new approaches to learning from others, synthesizing qualitative data, visualizing your ideas, and navigating ambiguity (among others!) while applying the tools and techniques to real-world applications. No prior experience or knowledge of design thinking is needed.

Credit Only Granted for: IDEA247 or IDEA345.

Formerly: IDEA247.

IDEA358 Special Topics in Innovation and Entrepreneurship (1-3 Credits)

Special topics in innovation and entrepreneurship applying concepts in real-world applications

Repeatable to: 4 credits if content differs.

IDEA369 Peer Innovation Coaching (2 Credits)

Deepen your role as an Academy for Innovation and Entrepreneurship Peer Innovation Coach (PIC), where you will be coaching and guiding student teams in the classroom as they learn to use innovation methods. There is both an experiential component and a classroom component. The experiential component involves coaching and teaching innovation class sessions throughout campus, and the classroom component involves discussions, reflection assignments and scenario role-playing to help improve your coaching and teaching. While some of the content in the classroom component will be seeded by a set of course readings, much of it will also be seeded by your own experiences in the experiential component.

Prerequisite: IDEA247; and permission from the Academy for Innovation and Entrepreneurship.

Repeatable to: 6 credits.

Formerly: IDEA358A.

IDEA379 Advanced Topics in Innovation (1-3 Credits)

Advanced topics in innovation

Recommended: IDEA247.

Restriction: Permission of the Academy for Innovation and Entrepreneurship.

Repeatable to: 6 credits if content differs.

IDEA398 Special Topics in Coaching (1-3 Credits)

Special topics in coaching others

Restriction: Permission of the Academy for Innovation and Entrepreneurship.

Repeatable to: 6 credits.

IDEA398C Special Topics in Coaching: Carillon Peer Mentors (2 Credits)

Prepares students to serve as Peer Mentors in the Carillon Studio (IDEA101). Students gain exposure to a variety of design abilities, methods, and mindsets that prepare them to apply human-centered design to their work in and beyond the classroom. Each Peer Mentor is paired with an IDEA101 instructor, and together they teach aspects of design to first-year students in Carillon Communities, leading them through individual and team projects that encourage them to creatively solve problems. Students build upon their prior experiences in Carillon Communities as they develop skills in communication, leadership, mentorship, and design thinking.

Prerequisite: IDEA101.

Restriction: Permission of the Academy for Innovation and Entrepreneurship.

IDEA459 The Innovation Studio (3 Credits)

In this class, we'll use human-centered design practices to develop performance-based and curricular experiments for future implementation at the National Orchestral Institute + Festival (NOI+F) at UMD. Students will have the opportunity to connect the work we do in class to their own interests related to the visual and performing arts. Experience with classical music performance and/or human-centered design practices is optional. The class is highly experiential, collaborative, and reflective. This work is done through a partnership between NOI+F and the Academy for Innovation and Entrepreneurship to create innovation-related experiences at the festival every year.

Jointly offered with: IDEA659.

Restriction: Permission from the Academy for Innovation & Entrepreneurship required.

Repeatable to: 6 credits.

IDEA498 Independent Study: Experiments in Innovation (1-3 Credits)

Apply design thinking and/or lean startup concepts to your own real-world project, which may involve a partner organization. This course requires a high degree of self-direction in all aspects of the project including defining specific milestones and deliverables. There will be regular coaching from an Academy for Innovation and Entrepreneurship team member.

Prerequisite: Permission from the Academy for Innovation and Entrepreneurship.

Repeatable to: 6 credits.

IMDM - Immersive Media Design

IMDM101 Introduction to Immersive Media (3 Credits)

An introduction to the basic practices, concepts and issues in Immersive Media Design. Conducted as a hybrid studio/lecture course, students will work collaboratively in teams to complete both research and practical projects, including surveying current artists and practice in immersive media; completing studio-based interactive projects that fuse computational media into physical objects; and working in teams to ideate and execute large scale, immersive media works.

Restriction: Must not have earned more than 60 credits; or permission of IMDM - Immersive Media Design program.

Credit Only Granted for: CMSC101 or IMDM101.

Formerly: CMSC101.

IMDM127 Creative Coding for Digital Media (3 Credits)

An introduction to the principles of Computer Science supported by exercises in computer programming with an emphasis on creative coding, algorithmic image creation and manipulation, and interactive experiences. Students will make use of both exploratory coding approaches, and problem/solution-driven approaches, to design and implement software with visual and auditory output. The course also includes an introduction to a wide variety of issues relating to computer science and software, including software design and construction, problem-solving, and fundamental questions about the nature, limitations, and ethical use of computers and algorithms. It also explores how creativity tools can be used and as well as providing some insight into how they are implemented. The course is targeted to students with a broad diversity in backgrounds and interests. No prerequisites are assumed beyond high school algebra.

Restriction: Must not have completed any courses from CMSC131-499 course range; and must not be concurrently enrolled in CMSC131.

Credit Only Granted for: IMDM127 or CMSC125.

IMDM150 Digital Media Theory and Culture (3 Credits)

An introduction to the fundamental structures and themes of digital culture in contemporary society. This course will provide you with a theoretical grounding in which to understand the current landscape of digital media culture, design and art. As an introductory course for the Immersive Media Design major, the focus will be on contextualizing immersive digital media such as virtual reality, augmented reality, immersive projection, and electronic art installation through reading, writing and discussion. Students will have opportunities to experience a range of these technologies first hand.

Restriction: Must be in the Immersive Media Design program; or permission of IMDM - Immersive Media Design program.

IMDM227 Introduction to Computational Media (3 Credits)

Comprehensive introduction to programming for visual, auditory and tactile art. Introduction to basic programming constructs, algorithms, data structures, and data transformations for creating and managing multimedia content, and conducting user interaction. Emphasis on programming and software design including the interfaces between hardware and software in multimedia devices, creating graphical user interfaces, and basic graphics and sound rendering.

Prerequisite: Minimum grade of C- in IMDM101 and IMDM150; and minimum grade of C- in CMSC131 or (IMDM127 and CMSC122).

Restriction: Must be in the Immersive Media Design program or Permission of IMDM - Immersive Media Design program.

IMDM290 Collaborative Studio I: Image + Time (3 Credits)

Concept-driven and team-based collaborative studio course in which students work together in groups to create intellectually engaging and technically innovative works of Immersive Media Design. Student teams will combine their skill sets, technical and artistic, to produce creative works that combine image manipulation, generative images, creation, image and animation output technologies, video and audio recording, manipulation and production, and other forms of digital media assets that can be integrated into immersive media pipelines such as virtual reality, augmented reality, and other interactive forms. In working collaboratively, student teams will use team and asset management processes and tools that reflects contemporary practices in the fields of art, design, software, and the creative industries.

Prerequisite: Minimum grade of C- in IMDM227 and ARTT255.

Restriction: Restricted to Immersive Media Design Students.

IMDM298 Selected Topics in Immersive Media (1-3 Credits)

Selected topics in current and emerging areas of immersive media.

Restriction: Permission of IMDM - Immersive Media Design program.

Repeatable to: 6 credits if content differs.

IMDM327 Computational Virtual Reality (3 Credits)

Introduction to mechanisms and programming for virtual reality, augmented reality, and related technologies. Covers elements of a standard VR system, including creating, managing and rendering visual and audio VR content, tracking orientation and positions of head mounted display (HMD) and controller, rendering stereo imagery for VR headsets, and implementing approaches for user interactivity.

Prerequisite: Minimum grade of C- in IMDM227 and CMSC132.

Restriction: Must be in the Immersive Media Design, Computing program; or Permission of IMDM - Immersive Media Design program.

IMDM350 Advanced Digital Media Theory (3 Credits)

Advanced theories and concepts pertinent to the fields of immersive media design, new media art, design, and cultural technology. Also looks at ways in which contemporary societal norms are being shaped by game culture, social and mobile media, AR/VR escapism, network aesthetics, hacktivism, open-source culture, neural networks, artificial intelligence, and machine learning, among others. This course addresses the broad range of ways in which the accelerating pace of technological advances influence how we mediate the world around us and examines the environmental, social, political, and ethical implications of its use.

Prerequisite: Minimum grade of C- in IMDM150.

Restriction: Must be in the Immersive Media Design, Emerging Creatives program; or Permission of IMDM - Immersive Media Design program.

IMDM390 Collaborative Studio II: Experiential Computing (3 Credits)

A concept-driven, team-based collaborative studio course connecting inquiry, knowledge, and practice. Students will work together to create experiential works of immersive media. This course moves beyond the technical applications of software and emphasizes innovative thinking, social engagement, and problem-solving. Student teams will draw upon their unique skills to create works that participants can inhabit in a way that can only be achieved using new and emerging technologies. The process starts with small-scale "sketch" creation and evolves into larger-scale compelling works of immersive media. Teams will need to organize research methods and goals, engage in production, and explore how to communicate, display, and document their work. As projects develop, feedback will be provided through periodic presentations, peer-critique sessions, and instructor reviews.

Prerequisite: Minimum grade of C- in IMDM290.

Restriction: Must be in the Immersive Media Design program or Permission of IMDM - Immersive Media Design program.

IMDM398 Special Topics in Immersive Media Design (1-3 Credits)

Seminar course covering special topics in current and emerging areas of Immersive Media Design.

Restriction: Restricted to Immersive Media Design majors with 60 credit hours completed; and permission of Immersive Media Design program.

Repeatable to: 6 credits if content differs.

IMDM399 Independent Study (1-3 Credits)

A directed study in specific readings or topics selected by a student under faculty supervision.

Prerequisite: 6 credits in IMDM courses.

Restriction: Permission of IMDM-Immersive Media Design.

Repeatable to: 6 credits if content differs.

IMDM490 Senior Capstone I (3 Credits)

The first course in a two-semester senior capstone sequence. During IMDM490 students will research, design and prototype a large-scale immersive media design project, in preparation for fully implementing and exhibiting the project in IMDM491 Capstone II. Students will have the opportunity to apply design and technical skills they have acquired in previous courses as well as focus on the organizational and production skills needed for a substantial, longer term project to achieve an artistic or technical goal.

Prerequisite: Minimum grade of C- in IMDM290.

Restriction: Must be in Immersive Media Design major Computing or Emerging Creatives track; and must have earned a minimum of 86 credits.

IMDM491 Senior Capstone II (3 Credits)

The second course in a two-semester senior capstone sequence. During IMDM491 students will continue to design, prototype and realize a large-scale immersive media design project intended for public exhibition. In doing so, students will adapt and improve their project in response to critical feedback from instructors and peers, to find an exhibition venue, and to market the project through public relations, social networking, and other strategies of promotion.

Prerequisite: Minimum grade of C- in IMDM490.

Restriction: Must be in the Immersive Media Design program.

IMDM498 Special Topics in Immersive Media (1-3 Credits)

Special topics in current and emerging areas of Immersive Media Design.

Restriction: Permission of Immersive Media Design program.

Repeatable to: 9 credits if content differs.

IMDM499 Independent Undergraduate Research (1-3 Credits)

Directed research under the supervision of a faculty member in immersive media. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper on their research.

Restriction: Must be in one of the following programs (Immersive Media Design: Computing, Immersive Media Design: Emerging Creatives); and Permission of IMDM-Immersive Media Design.

Repeatable to: 6 credits.

IMMR - Immigration Studies

IMMR200 Introduction to Immigration and Migration Studies (3 Credits)

Introduces concepts and theoretical interpretations about the causes of international migration; provides an historical overview of the main flows of immigration to the U.S.; analyzes economic, political, social, and cultural aspects that impact the immigrants' settlement process.

IMMR219 Special Topics in Immigration and Migration Studies (3 Credits)

Thematic exploration of a topic in immigration or migration studies history at an introductory level with emphasis on understanding how the movement of people is relevant in the contemporary world.

Repeatable to: 6 credits if content differs.

IMMR219C Immigration Policy, Immigrant Lives (3 Credits)

An examination of the phenomenon of international migration, or immigration. Students develop awareness of how immigration has been framed in the general public and examined by social science disciplines, most prominently anthropology. Examination of case studies of different immigrant groups in distinct geographic contexts will illuminate the varied incorporation experiences of immigrants into U.S. society.

Cross-listed with: ANTH264.

Credit Only Granted for: ANTH264 or IMMR219C.

IMMR319 Special Topics in Immigration and Migration Studies (3 Credits)

Thematic exploration of a topic in immigration or migration studies with emphasis on understanding how the movement of people is relevant in the contemporary world.

Repeatable to: 6 credits if content differs.

IMMR394 Growing Up Asian American: The Asian Immigrant Family and the Second Generation (3 Credits)

An interdisciplinary course examines the experiences of children of Asian immigrants in the U.S., focusing on intergenerational dynamics in the Asian immigrant family, their intersections with race, gender, class, sexuality, and religion, and how these shape second-generation Asian American life. Topics include identity and personhood, the model minority myth and education, work and leisure, language and communication, filiality and disownment, mental health and suicide.

Cross-listed with: AAST394, AMST324.

Credit Only Granted for: AAST394, AAST398E, AMST324, AMST328V, IMMR319G or IMMR394.

Formerly: AAST398E.

IMMR399 Internship in Immigration/Migration Studies (1-6 Credits)

Internship experience with an organization that works with or studies migration or immigrant populations. This experiential learning course provides training that enriches the students' academic field of study and the IMMR transcript notation. Students submit a final written report of how the experience ties into their major field of study.

Prerequisite: HIST222, IMMR200, or IMMR400; and permission of the Center for Global Migration Studies required.

Restriction: Minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits.

Repeatable to: 6.0 credits if content differs.

Additional Information: This course is intended primarily for students seeking the Immigration and Migration Studies transcript notation, but exceptions will be considered for students with educational or career interests that lie in this area. Student internships must be approved by the Executive Director of the Center for Global Migration Studies. Students must secure an appropriate faculty mentor for the internship course. An internship course will be approved only if a faculty supervisor is available.

IMMR400 Vital Voices: Oral Histories of the Immigrant Experience (3 Credits)

An exploration of the dynamic subject of U.S. immigrant experience through the scope of individual immigrant life stories in a global context. Course will include an overview of U.S. and global immigration patterns and an introduction to the practice of oral history.

Recommended: HIST222; or IMMR200.

Credit Only Granted for: HIST428N, IMMR400, THET428I, or THET498V.

Formerly: HIST428N.

IMMR419 Special Topics in Immigration and Migration Studies (3 Credits)

Thematic exploration of a topic in immigration or migration studies history with emphasis on understanding how the movement of people is relevant in the contemporary world.

Repeatable to: 6 credits if content differs.

INAG - Institute of Applied Agriculture

INAG100 Introduction to Plant Science (4 Credits)

A general introduction to plant science designed to provide the students with a working knowledge of the fundamental structures and processes of plants. Content includes plant anatomy, physiology, genetics and environmental relationships.

Restriction: Must be a student in the Institute of Applied Agriculture; or permission of AGNR-Institute of Applied Agriculture department.

Credit Only Granted for: INAG100, PLSC100, PLSC101, PLSC110 or PLSC112.

INAG102 Agricultural Entrepreneurship (3 Credits)

This course introduces fundamental concepts related to launching a profitable agricultural business. Topics include idea generation, opportunity recognition, conducting feasibility studies, assembling the entrepreneurial team, and financing the new venture, among others. Students will learn knowledge and skills relevant to starting a new agricultural business.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. May not count toward any BMGT major or minor requirement.

INAG103 Agricultural Marketing (3 Credits)

Principles of market demand are used to develop a consumer oriented market strategy for agricultural businesses. Topics include market structures, target marketing, market segmentation, niche marketing and direct marketing. Market concepts unique to agriculture products are also covered.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG105 Soils and Fertilizers (3 Credits)

Soils and Fertilizers is an introductory course for students entering careers related to applied agricultural production. The course is divided into three subject areas: soil properties, soil fertility, and environmental concerns of using soils for agricultural production. Emphasis is placed upon the characteristics of Maryland soils which are similar to the soils in the mid-Atlantic region. The importance of nutrient management and non-point source pollution of the Chesapeake Bay are covered in the course.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

INAG106 Pesticide Use and Safety (2 Credits)

An overview of pesticide use and safety. Topics include environmental protection, labeling, personal safety, first aid, formulation and chemistry, equipment, disposal, storage, record-keeping and liability. The course prepares students to take the Maryland State test for a private applicator's license.

Restriction: Must be in a major in AGNR-Institute of Applied Agriculture department; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority enrollment will be given to students in the IAA program or to students in the College of Agriculture and Natural Resources (AGNR).

INAG110 Oral Communication (3 Credits)

A study of how perception, self-concept, and verbal and nonverbal communications affect the communication process as it emerges in the workplace. The course provides skill training in speech writing, public speaking, group communication, interpersonal communication, listening, and responding.

Credit Only Granted for: COMM107, COMM200, INAG110, JOUR130, THET285.

INAG123 People, Planet, and Profit: Digging Into Sustainable Agriculture (3 Credits)

Is it possible for agricultural producers to make a living and feed the world nutritious, culturally inclusive food while protecting—or even restoring—the environment? This course investigates the principles and practices of sustainable agriculture and their relationship to the greater food system. We will explore the social (people), environmental (planet), and economic (profit) impacts of agriculture - from challenges to opportunities. INAG123 applies the principles of sustainability to various agricultural production practices and systems - at a range of different scales - to see what lessons these varied models can offer. Along the way, we will consider domestic issues such as food safety and distribution, food justice, cultural relevance, biodiversity, farming communities, and effects on local economies.

INAG131 Introduction to Agricultural Policy and Communication (3 Credits)

Introduction to Agricultural Policy and Communication equips students with the knowledge and skills needed to engage in real-world communication around timely issues in agriculture. This course covers basics of United States government and the policymaking process, current and historical policy issues in agriculture, advocacy communication strategies and tactics, and careers in policy and advocacy. This course focuses on practical skills application, as well as exposure to government and advocacy work in action, including field trips and guest speakers. Throughout the course, students will learn and practice communication methods both individually and in team-directed agriculture-related projects.

Restriction: Must be a student in the Institute of Applied Agriculture; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

INAG132 Agricultural Leadership and Teamwork (3 Credits)

Introduces fundamental concepts related to leadership and teamwork in agricultural organizations. Topics include leadership practices and skills; relationships between leadership, authority, power, and ethics; team decision-making and management; and organizational culture and change. Students will develop effective leadership skills necessary for leading agricultural organizations.

Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.

INAG201 Agricultural Human Resources Management (3 Credits)

The course introduces students to the study and application of the basic principles of human relations and personnel management. A variety of approaches to recruiting, training, delegating, motivating, and appraising employees are among the topics discussed.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: May not count toward any BMGT major or minor requirement.

INAG203 Agricultural Finance (3 Credits)

This course introduces fundamental concepts related to the financial management of an agricultural business. Topics include financial statement analysis, financial planning, the relationship between risk and return, the time value of money, costs associated with borrowed funds, sources of capital, financial markets and intermediaries in agriculture, and personal finance, among others. Students will gain financial knowledge and skills necessary for managing a profitable agricultural business.

Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.

Additional Information: Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG204 Agricultural Business Management (3 Credits)

This course integrates various concepts related to managing a profitable agricultural business. Topics include business management and decision making, preparing a business plan, financial analysis and budgeting, risk and investment management, and small business taxes, among others. Students will gain relevant knowledge and skills as they complete the comprehensive business plan for successfully managing an agricultural business.

Recommended: INAG102.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture. May not count toward any BMGT major or minor requirement.

INAG205 Analyzing Alternative Enterprises (3 Credits)

This course identifies and analyzes alternative crops, livestock, and other agricultural business enterprises. Students assess sustainability, geographic adaptability and potential profitability of businesses through lectures, class projects, and presentations from farmers, entrepreneurs, and managers engaged in alternative enterprises. Topics may include value added approaches, organic crop production, and recreational agricultural pursuits.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG206 Agricultural Business Law (3 Credits)

This course introduces various legal concepts and their relationships to agricultural business and transactions. Topics include torts, criminal law, contracts, promissory notes, property, partnerships, business entities, employment, and bankruptcy, among others. Students will gain a general understanding of the legal system that will help them manage and/or operate profitable agricultural businesses.

Restriction: Students at the Institute of Applied Agriculture (IAA); or students at the College of Agriculture and Natural Resources (AGNR); or permission may be granted to other students based on available space.

Additional Information: Course cannot be used to fulfill a requirement for a Robert H. Smith School of Business major or minor.

INAG207 Power and Machinery (4 Credits)

The basic principles of compact equipment management, including selection, maintenance, operation, adjustment and troubleshooting of agricultural machinery and power units. Covers methods of power development, measurement, and transmission, through power trains both mechanical and hydraulic. Each student will complete a systematic disassembly, analysis, diagnosis and reassembly of a small engine.

Prerequisite: INAG250 or PLSC204.

Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority will be given to IAA students and permission will be granted to AGNR students and others on a space available basis.

INAG213 Crop Production Practices (3 Credits)

Crop Production Practices covers the applied methods of producing various vegetable and agronomic crops in Maryland. This course focuses on commercial scale production where economics impact production decisions. Topics include crop rotation, cropping systems, nutrient management, and integrated pest control strategies. Throughout the course, economically, socially and ecologically sustainable production practices will be addressed.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG214 Agronomic Principles of Golf Turf Management (3 Credits)

An in-depth study of golf course management practices such as turfgrass selection, fertilization, mowing, irrigation, and cultivation practices. Weed control programs will be discussed in detail for the different playing surfaces on the golf course. Field plot work, laboratory work, and field trips will reinforce lecture material.

Recommended: INAG107; or PLSC305.

Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in one of the following programs (Plant Sciences; Plant Sciences: Horticulture & Crop Production; Plant Sciences: Landscape Management; Plant Sciences: Plant Science; Plant Sciences: Turf & Golf Course Mgmt; Plant Sciences: Urban Forestry) ; or permission of instructor.

Additional Information: Enrollment priority is given to students within the Institute of Applied Agriculture (IAA) and the Plant Science and Landscape Architecture Department.

INAG215 Business Management Principles for Turf Facilities (3 Credits)

An advanced course in turfgrass management with emphasis on development of maintenance operating budgets for labor, fertilization, pest control, and supplemental cultural practices for golf courses and athletic field facilities. An overview of the current trend in golf course design and construction and in athletic field construction practices will be covered. Students will be responsible for a presentation concerning some phase of turfgrass management relating to golf course or athletic field operations.

Recommended: INAG107; or PLSC305.

Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in one of the following programs (Plant Sciences; Plant Sciences: Horticulture & Crop Production; Plant Sciences: Landscape Management; Plant Sciences: Plant Science; Plant Sciences: Turf & Golf Course Mgmt) ; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Enrollment priority is given to students majoring in Turfgrass and Golf Course Management in the Institute of Applied Agriculture and Plant Science and Landscape Architecture.

INAG224 Greenhouse and Plant Production Management (3 Credits)

Principles of managing greenhouses—structures, coverings, lighting, irrigation, heating and cooling systems—and their effects on plant production. Plant propagation methods and environments will be analyzed and practiced.

Restriction: This course is open to students in AGNR. Priority enrollment will be given to students in the Institute of Applied Agriculture. All other majors will be granted permission based on available space.

Credit Only Granted for: INAG 114 or INAG 224.

INAG226 Diseases of Ornamentals and Turf (3 Credits)

The course will cover various topics such as plant pathology, disease control practices, and an in depth coverage of the major diseases of ornamentals and turfgrasses in the Mid-Atlantic region. Emphasis will be placed on identification of disease signs and symptoms. Over 50 diseases will be covered during the semester.

Recommended: Completion of one of the following is recommended: PLSC 253, PLSC 254, INAG 107, PLSC 305.

Additional Information: Priority in enrollment will be given to students within the Institute of Applied Agriculture.

INAG231 Insects of Ornamentals and Turf (3 Credits)

A study of the major insect pests and beneficial insects of ornamental plants and turfgrasses in the Mid-Atlantic region. The student will be responsible for insect identification, life history, and control practices of approximately 100 insects. An insect collection consisting of both insect pests and beneficial insects is required.

Recommended: PLSC253, PLSC254, or PLSC305; or INAG107.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Additional Information: Priority enrollment will be given to students in the IAA program.

INAG235 Irrigation and Drainage (3 Credits)

An overview of U.S. and state water doctrines and plant water use rates. Irrigation systems for residential and athletic field use will be discussed covering such topics as hydraulics, sprinkler spacing, pipe selection and sizing, pumps, controllers, valves, and irrigation trouble shooting. Surface and subsurface drainage for turfgrass sites will also be covered.

Restriction: Permission of instructor.

Credit Only Granted for: INAG235, PLSC235 or PLSC489I.

Formerly: PLSC489I.

Additional Information: Priority enrollment will be given to IAA and PLSC majors. By permission for available seats.

INAG237 GPS & Drone Applications in Surveying (3 Credits)

The principles of land measurement using Global Positioning System (GPS) devices and Unmanned Aerial Vehicles (UAVs—i.e. drones) to collect data and generate maps. Students will use Pix4D and Trimble TerraFlex software to post-process collected data and learn how we can use this data to make informed land management decisions. Students will also be prepared to successfully earn their Part 107 Commercial Drone Pilots License as part of the course.

Restriction: Must be an Institute of Applied Agriculture student; or permission of the Institute of Applied Agriculture.

Additional Information: Course is open to Institute of Applied Agriculture students and permission will be granted to other students based on available seats, with priority given to students from majors in the College of Agriculture and Natural Resources.

INAG242 Golf Course Design and Construction (3 Credits)

An appreciation and understanding of the game of golf is obtained through lectures on the history, organizations, and rules of the game. Golf course design theories, great architects and their courses, and construction specifications are discussed. Students will complete two golf course design projects.

INAG244 Herbaceous Plants (3 Credits)

Herbaceous plants are integral components of residential and commercial landscapes. Students will become familiar with 250 annual and perennial plants. The emphasis will be on plant management requirements and seasonal variation in the landscape.

Restriction: Must be in a major within the AGNR-Institute of Applied Agriculture department; or must be in a major in AGNR-College of Agriculture & Natural Resources; or permission of AGNR-Institute of Applied Agriculture department.

Credit Only Granted for: INAG244 or PLSC244.

INAG248 Topics in Sustainable Agriculture (2 Credits)

Through readings, class discussions, and guest speakers, this seminar course exposes students to current trends, concerns and research in sustainable agriculture and food systems. It allows students to explore various interest areas and discuss a variety of topics as they relate to sustainable practices.

Recommended: INAG123.

Repeatable to: 2 credits if content differs.

Additional Information: The topics covered in this course change every year, guided by student interest, current research, and availability of guest speakers.

INAG250 Fundamentals of Agricultural Mechanics (4 Credits)

Comprehensive coverage of the fundamentals of agriculture-related mechanics. Lecture and lab exercises will cover a broad range of topics including electricity, plumbing, welding processes, and wood and metal working applications. Emphasis will be given to the design and installation of electrical circuits. It will also include project planning and implementation, including development of safety protocols for each area of study.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources, OR Permission of AGNR-Institute of Applied Agriculture Department.

Credit Only Granted for: PLSC204 or INAG250.

Additional Information: Priority given to IAA majors and AGNR students whose major requires this course. Permission will be granted to other students on seats available basis.

INAG251 Landscape Construction (3 Credits)

An introductory course in the basics of hardscape topics in landscape construction. Covers fundamental construction layout using surveying techniques; GPS; elements of construction dealing with wood, concrete, masonry, pavers, and/or electrical amenities used in hardscape construction. Emphasis will be placed on safety, interpretation of construction drawings or plans, specifications for specific structures, materials selection, cost estimations, site preparation and typical construction techniques.

Prerequisite: INAG250 or PLSC204.

Restriction: Must be in a major in AGNR-College of Agriculture & Natural Resources.

Additional Information: Priority enrollment is given to Landscape Management majors in the Institute of Applied Agriculture.

INAG252 Agricultural Public Relations (3 Credits)

Introduces the fundamental concepts and procedures of public relations in agriculture. Topics include understanding external audiences; key practices in agricultural media relations, social media, executive communication, and crisis communication; and managing the research, planning, and evaluation aspects of the public relations process. Students will gain the public relations knowledge and skills necessary for communicating effectively with an organization's external audiences.

Recommended: INAG103.

INAG253 Agricultural Strategic Communication (3 Credits)

Introduces the fundamental concepts and applications of strategic communication in agricultural organizations. Topics include strategic communication planning; communication and culture; communication and change; managing internal and external communication; and corporate responsibility. Students will learn how to use communication to accomplish organizational goals.

Recommended: INAG252.

INAG272 Principles of Arboriculture (3 Credits)

The establishment and maintenance of healthy trees in an urban setting will be studied. Lectures will focus on the environmental constraints to tree development in the city, and the role of physiological processes in regulating tree vigor. Laboratory exercises will cover the unique aspects of urban soils, tree valuation procedures, pruning and training, and supervised climbing.

Cross-listed with: PLSC272.

Credit Only Granted for: INAG272 or PLSC272.

INAG288 Internship (1 Credit)

On-site internship training in the student's major area of study. Students must complete a minimum of 320 working hours at an approved work site. Course work also includes weekly written assignments and a site visit assessment.

Restriction: Must be enrolled in the Institute of Applied Agriculture; or permission of the Institute of Applied Agriculture.

Repeatable to: 2 credits.

INAG289 Internship Experience & Professional Development (3 Credits)

Professional development and reflective analysis of the experience from the Practicum (INAG 288). Based on their 320-hours of internship work experience, students will write an internship report and analysis, deliver an oral presentation, and develop professional skills and materials needed to enter their careers.

Prerequisite: INAG288.

Restriction: Must be enrolled in the Institute of Applied Agriculture students; or permission of the Institute of Applied Agriculture.

INST - Information Studies

INST101 Bits and Bytes of Computer and Information Sciences (1 Credit)

Students are introduced to the fields (and disciplines) of computer science and information science within a small classroom setting. They will learn to make a successful transition from high school to the university, while exploring study skills, student success plans and research opportunities.

Cross-listed with: CMSC100.

Restriction: For first time freshmen and first time transfer students; or permission of CMNS-Computer Science department.

Credit Only Granted for: CMSC100 or INST101.

INST104 Design Across Campus (3 Credits)

What is design, who does it, and how is it done? There is no one answer to this question—it depends on who you ask. The answers to these questions vary across disciplines and across the University campus. This course, designed with modules from contributors in UMD programs including Information Studies, Human-Computer Interaction, Graphic Design, Immersive Media Arts, Journalism, Architecture, Landscape Architecture, Engineering, and Policy, will introduce students to the goals and values, approaches, skills, and practices of diverse fields of design. It will enable students to identify grand challenges in design and serve as a sorting hat to help students find a design practice that matches their own values, approaches, skills and goals.

INST123 Databases for All (3 Credits)

An introduction to relational databases for students with no previous programming experience. Provides a means for students of diverse backgrounds to successfully learn how to store, retrieve, and maintain data in relational databases. Topics include a brief comparison of database systems with an emphasis on relational databases, fundamental relational database concepts, and data types. Includes technical approaches to accessing information stored in relational databases.

Restriction: Must not have completed or be currently taking INST327 or BMGT402.

INST126 Introduction to Programming for Information Science (3 Credits)

An introduction to computer programming for students with very limited or no previous programming experience. Topics include fundamental programming concepts such as variables, data types, assignments, arrays, conditionals, loops, functions, and I/O operations.

Prerequisite: Math placement of STAT100 or higher.

Restriction: Must not have completed INST326; and must be in Information Science, Technology and Information Design, or Social Data Science programs.

INST127 Introduction to Programming for Information Science Lab (1 Credit)

Laboratory component of INST126, Introduction to Programming for Information Professionals, is designed to complement the lecture and provide structured exercises and activities for students to practice and develop programming skills. INST 126 is an introduction to computer programming for students with very limited or no previous programming experience. Topics include fundamental programming concepts such as variables, data types, assignments, arrays, conditionals, loops, functions, and I/O operations.

Corequisite: INST126.

INST151 Becoming A Social Media Influencer (3 Credits)

Teaches students how to create, grow, and manage influential social media accounts. Topics will include tools for content creation, analyzing and strategizing with analytics, building community, and defining their niche and approach.

Credit Only Granted for: INST408N or INST151.

Formerly: INST408N.

INST152 "Fake Checking": Battling Misinformation and Disinformation in the Real World (3 Credits)

Examining the phenomenon of "fake news" using the principles of information literacy, students will develop their skills in locating, analyzing, and evaluating different information sources -- in the classroom, in their personal lives, and in the workplace.

INST153 Records Scandals & Data Vandals: Public & Private Sector Controversies Ripped From The Headlines (3 Credits)

Expressly organized around case studies about well-known individuals and organizations involved in scandals and controversies that have generated headlines around the world. It places these events in a larger historical, legal, technological, ethical and societal context. Drawing upon contemporaneous records in a variety of media, as well as presentations from invited speakers representing the greater archival, historical, and public interest communities, the course seeks to deepen students' appreciation of the role that records and information plays in issues going to the heart of government transparency, corporate accountability, and social justice.

INST154 Apollo at 50 (3 Credits)

Examines Apollo mission, one of the greatest engineering accomplishments of all time, in which Neil Armstrong walked on the moon. Since the mission, people have asked: if we can land on the moon, why can't we eliminate poverty? Why can't we cure cancer? Why can't we prevent global warming? Asks what were the social, political, financial, scientific, engineering, operational, and human aspects of the Apollo program that came together to make the moon landings possible?

INST155 Social Networking (3 Credits)

Introduces methods for analyzing and understanding how people use social media - social networking websites, blogging and microblogging, and other forms of online interaction and content generation - and their societal implications. Introduces students to the science and social science of network analysis. Through real world examples, including analysis of their own social networks, students develop skills for describing and understanding the patterns and usage of services like Facebook, Twitter, YouTube, and others.

Credit Only Granted for: INFM289I or INST155.

Formerly: INFM289I.

INST156 How NASA Sees the Earth (3 Credits)

The world of Earth science data is complex and can be overwhelming with a wide range of data sources and formats, hefty downloads and the need for complicated analytical tools. To make use of enormous volumes of available data and geoinformation products, one has to know where and how to search and obtain the data, how to analyze the data, and how to extract useful information and knowledge. In this course, you will learn about the state-of-the-art Web-based tools that allow you to efficiently display and analyze a large number of datasets in a way many professionals working in the Earth science domain would. You will learn how to visualize multiple Earth science datasets produced by NASA in a variety of ways directly on the Internet, without the need to download, manage and store them. Students will be introduced to comprehensive functions to analyze the data and generate customized maps, animations, multi-variable correlations, regional subsetting, etc.

Cross-listed with: GEOG156.

Credit Only Granted for: GEOG156 or INST156.

INST201 Introduction to Information Science (3 Credits)

Examining the effects of new information technologies on how we conduct business, interact with friends, and go through our daily lives. Understanding how technical and social factors have influenced the evolution of information society. Evaluating the transformative power of information in education, policy, and entertainment, and the dark side of these changes.

Credit Only Granted for: INST201 or INST301.

Formerly: INST301.

INST204 Designing Fair Systems (3 Credits)

Reviews how specific values are built into different automated decision-making systems as an inevitable result of constructing mechanisms meant to produce specific outcomes. These values create differential outcomes for the different people enmeshed in these systems, but both these values and these systems can be changed to support different values and different outcomes. The class serves as an introduction to the emerging field of algorithmic bias that bridges the disciplines of information science, computer science, law, policy, philosophy, sociology, urban planning, and others.

Credit Only Granted for: INST208D or INST204.

Formerly: INST208D.

INST208 Special Topics in Information Studies (1-6 Credits)

Covers special topics in information studies.

Repeatable to: 9 credits if content differs.

INST210 The Nuts & Bolts of Getting Hired (1 Credit)

Have you thought about finding an internship, getting a job, or starting your career? Perhaps you're confused about how to begin. Welcome to The Nuts and Bolts of Getting Hired, where you'll learn the skills necessary to develop your professional tool kit and obtain the internship or job that can help you build the career you want. This course will help you prepare for the next step in your career by exploring the following topics: Identifying your career goals, mastering the skills of crafting a professional resume, effective interviewing, strategic networking, and professional communication.

Restriction: Must be in the Information Science program, Technology and Information Design program, or Social Data Science program.

Credit Only Granted for: INST208C or INST210.

Formerly: INST208C.

INST227 Fundamentals of Academic Peer Mentoring in Information Studies (1 Credit)

Students will be exposed to scholarship of teaching and learning in support of developing applied skills to support active learning as an iSchool academic peer mentor. Students will learn to effectively coach and support the performance of other people. Guided online and face-to-face participation will culminate in a portfolio of teaching activities and professional development.

Restriction: Permission of the College of Information Studies.

INST228 Academic Peer Mentor Experience in Information Science (1-3 Credits)

Students who are participating in instructional activities for undergraduate courses offered by the College of Information Studies, or by faculty members of the College through other units, can take this course to earn course credit for their AMP work.

Prerequisite: Must have completed or be concurrently enrolled in TLTC333.

Restriction: Permission of INFO-College of Information Studies required.

Repeatable to: 6 credits if content differs.

Formerly: INST208M.

INST232 Health Justice: Investigating the Roles of Information in Preventing & Addressing Health Disparities (3 Credits)

How do we ensure that every individual has the information they need to live a long and healthy life? In this course, we explore health justice - the conviction and enactment of the idea that every person is morally entitled to a fair and sufficient capability to be healthy. We especially focus on the ways in which information-related factors, such as people's access to health information, their strategies for seeking (or avoiding) health information, and their health and digital health literacy, contribute to health (in)justice. Our goal in this class is to promote health justice for all by identifying information-related solutions that will help to facilitate people's access to health information and improve their abilities to find, assess, and make use of information to optimize their own and others' health.

Restriction: Must be a student in the Health Justice Carillon Community.

INST301 Introduction to Information Science (3 Credits)

Examining the effects of new information technologies on how we conduct business, interact with friends, and go through our daily lives. Understanding how technical and social factors have influenced the evolution of information society. Evaluating the transformative power of information in education, policy, and entertainment, and the dark side of these changes.

Restriction: Must be in Information Science program; and restricted to students in the Information Science Program on the Universities at Shady Grove campus.

Credit Only Granted for: INST201 or INST301.

INST308 Education Abroad in Information Studies (1-3 Credits)

Covers special topics in information studies in education abroad settings.

Prerequisite: Minimum grade of C- in MATH115 or higher; minimum grade of C- in INST126; and 1 course with a minimum grade of C- from (PSYC100, SOCY105, BSOS233).

Restriction: Must be in the Information Science program, Technology and Information Design program, or Social Data Science program.

Repeatable to: 9 credits if content differs.

INST309 Independent Study in Information Science (1-3 Credits)

Individual independent study of an aspect of information science, selected according to student interest and need in consultation with a member of the iSchool faculty. Repeatable to 6 credits if content differs.

Prerequisite: Must have completed INST301

INST311 Information Organization (3 Credits)

Examines the theories, concepts, and principles of information, information representation and organization, record structures, description, and classification. Topics to be covered in this course include the methods and strategies to develop systems for storage, organization, and retrieval of information in a variety of organizational and institutional settings, as well as policy, ethical, and social implications of these systems.

Prerequisite: Minimum grade of C- in PSYC100 or SOCY105.

Restriction: Must be in the Information Science program.

INST314 Statistics for Information Science (3 Credits)

Basic concepts in statistics including measure construction, data exploration, hypothesis development, hypothesis testing, pattern identification, and statistical analysis. The course also provides an overview of commonly used data manipulation and analytic tools. Through homework assignments, projects, and in-class activities, you will practice working with these techniques and tools to create information resources that can be used in individual and organizational decision-making and problem-solving.

Prerequisite: Minimum grade of C- in INST126 or GEOG276; and minimum grade of C- in STAT100, and MATH115 (or higher).

Restriction: Must be in Information Science or Social Data Science program.

INST320 Leadership in Collaborative Learning Communities for Information Studies (3 Credits)

This course is the experiential learning component for student leaders selected by the College of Information Studies to facilitate Guided Study Sessions. Student leaders plan and facilitate study sessions that supplement courses by providing additional opportunities to engage with the material. In this course, student leaders will explore and apply evidence-based learning strategies while developing an understanding of how we learn. Throughout this course you will apply principles of teaching and learning, group facilitation, and leadership into the design of your guided study session.

Restriction: Must be in the Information Science, Technology and Information Design, or Social Data Science program; and permission of the INFO College.

INST326 Object-Oriented Programming for Information Science (3 Credits)

An introduction to programming, emphasizing understanding and implementation of applications using object-oriented techniques. Topics to be covered include program design and testing as well as implementation of programs.

Prerequisite: Minimum grade of C- in INST126 or GEOG276.

Restriction: Must be in Information Science or Social Data Science program.

INST327 Database Design and Modeling (3 Credits)

Introduction to databases, the relational model, entity-relationship diagrams, user-oriented database design and normalization, and Structured Query Language (SQL). Through labs, tests, and a project, students develop both theoretical and practical knowledge of relational database systems.

Prerequisite: Minimum grade of C- in INST126 or GEOG276.

Restriction: Must be in Information Science or Social Data Science program.

Credit Only Granted for: INST327 or BMGT402.

INST335 Organizations, Management and Teamwork (3 Credits)

Examines principles, methods and types of leadership with an emphasis on goal setting, motivation, problem solving, and conflict resolution.

Examines principles of developing teams and managing team projects through planning and execution, including estimating costs, managing risks, scheduling, staff and resource allocation, communication, tracking, and control. Trains students to recognize and capitalize on opportunities to use information to increase efficiency, improve performance, and support innovation within teams and organizations. Focuses on strategic use of emerging technologies and new information resources to execute information-enabled change.

Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301); and minimum grade of C- in PSYC100.

Restriction: Must be in Information Science program.

INST341 Introduction to Digital Curation (3 Credits)

Explores various dimensions and contexts for digital curation, which includes all activities involving the management, representation and preservation of both born-digital and digitized information. Focuses on opportunities, challenges and demands of every-increasing digital data and networked information infrastructure.

Prerequisite: Must have completed with a C- or higher, or be concurrently enrolled in INST311.

Restriction: Must be in Technology and Information Design or Information Science programs.

INST346 Technologies, Infrastructure and Architecture (3 Credits)

Examines the basic concepts of computer hardware, systems software, networking, client/server architectures, cloud computing, distributed systems, and high performance computing as applied to information rich domains. Technology and architectures will be discussed within the contexts of solving social issues, supporting science, and conducting business operations. Current computing topics such as web environments, IoT, security, management, and policy will also be reviewed.

Prerequisite: Minimum grade of C- from INST201 or INST301; and minimum grade of C- in INST326 and INST327.

Restriction: Must be in the Information Science program; and must have earned a minimum of 60 credits.

Credit Only Granted for: INST346 or BMGT405.

INST347 Cloud Computing for Information Science (3 Credits)

What is cloud computing? Where does cloud computing occur? How can we use cloud computing to solve problems and create opportunities in information science? In this course, the foundations and operation of cloud computing, with a focus on information science applications, will be presented. Key cloud functions such as computing, storage, databases, and networking will be examined. Major cloud providers will be contrasted. The course will conclude with a practical application of cloud services to design and implement a cloud solution to a social, technical, or environmental problem.

Prerequisite: Minimum grade of C- in INST346.

Restriction: Must be in the Information Science major.

INST352 Information User Needs and Assessment (3 Credits)

Focuses on use of information by individuals, including the theories, concepts, and principles of information, information behavior and mental models. Methods for determining information behavior and user needs, including accessibility issues will be examined and strategies for using information technology to support individual users and their specific needs will be explored.

Prerequisite: Minimum grade of C- from INST201 or INST301; and minimum grade of C- in INST311.

Restriction: Must be in Technology and Information Design or Information Science programs.

INST354 Decision-Making for Information Science (3 Credits)

Examines the use of information in organizational and individual decision-making, including the roles of information professionals and information systems in informed decision-making through techniques such as data analysis and regression, optimization, sensitivity analysis, decision trees, risk analysis and business simulation models.

Prerequisite: Minimum grade of C- from INST201 or INST301; and minimum grade of C- in INST314 and PSYC100.

Restriction: Must be in the Information Science program.

INST362 User-Centered Design (3 Credits)

Introduction to human-computer interaction (HCI), with a focus on how HCI connects psychology, information systems, computer science, and human factors. User-centered design and user interface implementation methods discussed include identifying user needs, understanding user behaviors, envisioning interfaces, and utilizing prototyping tools, with an emphasis on incorporating people in the design process from initial field observations to summative usability testing.

Prerequisite: Minimum grade of C- from INST201 or INST301; and minimum grade of C- from PSYC100 or SOCY105; and minimum grade of C- in INST326 and STAT100.

Restriction: Must be in the Information Science program or Technology and Information Design program; and must have earned a minimum of 60 credits.

INST363 Fundamentals of Technology Innovation (3 Credits)

Introduces students to the fundamentals of technology innovation, and how leaders approach innovation in the information science field. The course explores approaches and perspectives on how to develop an individual's capabilities to be better at leading others in an innovative environment. Combining theory and practice, students will be introduced to problem solving and explore ways to become an exceptional innovation leader.

Restriction: Must be in the Technology Innovation Leadership Minor; or permission of INFO-College of Information Studies.

Credit Only Granted for: INST408T or INST363.

Formerly: INST408T.

INST364 Human-Centered Cybersecurity (3 Credits)

Cybersecurity is fundamentally a problem of human interaction with technology, but its technical challenges are better understood than its human challenges. This course is designed to give you an overview of human interactions with cybersecurity technology, from users to system designers. Using the information gleaned in this course, you should be able to make better predictions about how people react to cybersecurity policies and tools, and how those reactions shape organizational behavior. The earlier part of the course focuses on explanations for behavior, while the later parts of the course focus more on the development and evaluation of tools for assisting people in cybersecurity.

Prerequisite: Minimum grade of C- from INST201 or INST301; and minimum grade of C- in INST327, STAT100, MATH115, and PSYC100.

Restriction: Must be in the Information Science program; or must be in the Information Risk Management, Ethics, and Privacy Minor.

INST366 Privacy, Security and Ethics for Big Data (3 Credits)

Evaluates major privacy and security questions raised by big data, Internet of things (IoT), wearables, ubiquitous sensing, social sharing platforms, and other AI-driven systems. Covers history of research ethics and considers how ethical frameworks can and should be applied to digital data.

Prerequisite: Minimum grade of C- from INST126 or GEOG276; and minimum grade of C- in STAT100; and minimum grade of C- in one of the following (AASP101, ANTH210, ANTH260, ECON200, ECON201, GEOG202, GVPT170, PSYC100, SOCY100, or SOCY105).

Restriction: Must be in the Information Science, Technology and Information Design, or Social Data Science programs; or must be in the Information Risk Management, Ethics, and Privacy Minor.

INST367 Prototyping and Development Studio (3 Credits)

Covers interaction design—the process of defining products and the broad services built around them—and user experience research—how you determine what to design and how successful your design is. When interacting with systems, people build expectations and mental models of how things work, based upon their previous experience with similar products or processes, and the successful or unsuccessful nature of their interactions determines the success of your design. This course is about how to design for digital interactions that will resonate with your audiences (how the features and functions of a product get translated into something people find usable, useful, and desirable), and the research that goes on throughout that process (from contextual inquiry to evaluating the final product), with a particular emphasis on prototyping and iteration.

Prerequisite: Minimum grade of C- in INST380.

Restriction: Must be in the Technology and Information Design program.

Credit Only Granted for: INST398A or INST367.

Formerly: INST398A.

INST371 Teaching and Learning in Information Studies (3 Credits)

Introduces students to foundational theories and practices of teaching and learning, with an emphasis on how they intersect with ideas from the Information Sciences. Covers foundational theories related to teaching and learning, social and cultural dimensions of learning, designing for learning, evaluating educational technologies, and ways of creating equitable, effective, and accessible learning experiences. Students will design learning activities for others, analyze educational tools and technologies, and explore ways to help teach others about the big ideas of Information Science.

Prerequisite: Minimum grade of C- in INST201; and minimum grade of C- from PSYC100 or SOCY105.

Restriction: Must be in the Information Science program or Technology and Information Design program.

INST377 Dynamic Web Applications (3 Credits)

An exploration of the basic methods and tools for developing dynamic, database-driven websites, including acquiring, installing, and running web servers, database servers, and connectivity applications.

Prerequisite: 1 course with a minimum grade of C- from (INST201, INST301, or BSOS233); and minimum grade of C- in INST327, STAT100, and MATH115 (or higher).

Restriction: Restricted to Information Science and Social Data Science.

Credit Only Granted for: INST377 or BMGT406.

INST380 Technology and Information Design: Do Good Now (3 Credits)

Climate change. Poverty. Racism. Pressing social issues are big, complex, and difficult. They can feel overwhelming to understand and impossible to address. You might care deeply about an issue, and want to make a difference, but don't know where to start. Sometimes you might not even try. This course will equip and empower you to delve deep into understanding a social issue of your choosing. Through course materials and activities, you'll try out your changemaker muscles and mindsets. Our goal is that this course will empower you to be an informed, engaged citizen who contributes to your community with and beyond your profession. Along the way, we'll address questions like, "What is social change?" and "What happens when our actions have unintended consequences?" We'll talk about the importance of understanding, empathy, agency, and community, and reflect on how these concepts relate to us as individuals.

Prerequisite: Minimum grade of C- in INST201, INST126, STAT100; minimum grade of C- from (PSYC100, SOCY105).

Restriction: Must be in the Technology and Information Design program.

Credit Only Granted for: ARHU380, BSOS388B, PLCY388D, or PLCY380.

INST381 Design Thinking for Visual Communication (3 Credits)

In an age where technology increasingly permeates our daily existence, there remain certain human qualities that machines cannot replicate: creativity, curiosity, and empathy. This course endeavors to delve into the dynamic relationship between the pillars of aesthetics and the core skills of Design Thinking (DT), all with the goal of enhancing the design process. Throughout the course, we will witness instances where DT bolsters Visual Communication (VC), and conversely, where VC lends its support to the DT process. Our exploration will revolve around three pivotal questions: How can we engage users and establish meaningful connections with them? How can we empathize with users' challenges and provide them with effective solutions? How can we embrace a holistic approach to design?

Prerequisite: Minimum grade of C- in PSYC100 or SOCY105; and minimum grade of C- in INST126, INST201, and STAT100; and minimum grade of C- in MATH115 or higher.

Restriction: Must be in the Technology and Information Design major.

Credit Only Granted for: INST398J or INST381.

Formerly: INST398J.

INST388 "Maker Movement" Approach to Computing (1 Credit)

Informed by the "maker movement," this course allows students to merge their personal interests and hobbies with computing. This course is great for students new to computing who want to explore real world applications, or for more advanced students wanting an opportunity to engage in depth with a niche topic.

Recommended: C- or higher in INST126 or comparable introductory programming course.

Repeatable to: 3 credits if content differs.

INST389 Supervised Internship in Information Science (1-3 Credits)

Course will provide students with the knowledge, skills, and experiences that will help shape their goals as they begin their successful high-impact Information Career. It will prepare them to work in an environment in which suitability for high-status positions is not determined by specific skills, but rather by ability to take initiative in complex, dynamic situations. Students must have an internship arranged before enrolling.

Prerequisite: Minimum grade of C- in MATH115 or higher; minimum grade of C- in INST126 or GEOG276; and minimum grade of C- in (PSYC100, SOCY105, or BSOS233).

Restriction: Must be in the Information Science program, Technology and Information Design program, or Social Data Science program.

Repeatable to: 6 credits.

INST398 Special Topics in Information Studies (3 Credits)

Selected topics in information studies.

Prerequisite: Minimum grade of C- in STAT100 or MATH115 or higher; and minimum grade of C- in INST126 or GEOG276; and minimum grade of C- in (PSYC100, SOCY105, or BSOS233).

Restriction: Must be in the Information Science program, Technology and Information Design program, or Social Data Science program.

Repeatable to: 9 credits if content differs.

INST401 Design and Human Disability and Aging (3 Credits)

Focuses on the design of consumer products and information systems to enable their use by persons with a wider range of physical, sensory, and cognitive abilities. Overviews aging and major types of impairment as they relate to resulting problems using consumer products and information systems. Focuses on principles of design of mass market products.

Prerequisite: Minimum grade of C- from INST362 or INST367.

Restriction: Must be in Technology and Information Design or Information Science programs.

Credit Only Granted for: INST408B or INST401.

Formerly: INST408B.

INST402 Designing Patient-Centered Technologies (3 Credits)

Companies have created a vast array of apps and other technologies for understanding managing personal health and wellness, but many of them have been created with little understanding of audience needs or potential ethical issues. Course introduces students to the unique challenges of studying people's health and wellness needs as well as designing and evaluating technologies to meet those needs.

Prerequisite: Minimum grade of C- from INST362 or INST367.

Restriction: Must be in Technology and Information Design or Information Science programs.

INST403 Computational Journalism (3 Credits)

Designed to teach the application of computational methods in journalism and reporting. The methods include natural language processing, visualization, and web data mining. The course will also cover the necessity and impact of journalistic ethics in designing computation solutions.

Prerequisite: Permission of the Philip Merrill College of Journalism.

Cross-listed with: JOUR473.

Jointly offered with: JOUR773.

Credit Only Granted for: JOUR479V, JOUR473, INST408I or INST403.

Formerly: JOUR479V and INST408I.

INST405 Game Design (3 Credits)

Games are a structured form of play that are typically undertaken for recreational—but sometimes also educational and even professional—purposes. But what constitutes a successful game? In this course, you will learn the fundamentals of game design: applying elements and principles of game design, such as goals, rules, and challenges to create games, such as board games, card games, and digital games. You will be introduced to the basic tools and methods of game design: paper and digital prototyping, design iteration, design critique, and user testing. As part of the course, you will be designing several games of different types. You will also learn how to use your skills to deconstruct and critique the components of existing games, as well as gain an understanding of the role of the game designer in real-world game development teams.

Prerequisite: Minimum grade of C- in INST126, STAT100 or INST201; and minimum grade of C- from PSYC100 or SOCY105.

Restriction: Must be in the Information Science program or Technology and Information Design program.

Credit Only Granted for: INST408J or INST405.

Formerly: INST408J.

INST406 Cross Disciplinary Communication Lab (3 Credits)

Explores the world of communicating the ideas behind the things we make. In design, the product tends to be the prize: a manifestation of experience, sensibilities, and observations. But products do not always articulate a complete picture of what they are and how they came to be. Communication—speaking, writing, depicting, presenting to various audiences—is an under-leveraged component of design, connecting the product with emotion, process, context, and most importantly, the audience.

Prerequisite: Minimum grade of C- in INST380; and a minimum grade of C- in Professional Writing General Education requirement.

Restriction: Must be in the Technology and Information Design program.

INST407 Leading and Sustaining a Culture of Innovation (3 Credits)

Successful leaders know that the key to value creation and sustained growth lies in innovation -- continuously seeking opportunities to create value whether by launching new products and services, entering new markets, or rethinking key processes. This course will focus on the most efficient leadership strategies, change management, team motivation, technology team management for information management within organizations. We will examine some of the best ways to foster innovative behaviors within a team and organization. Students will engage with a course-long culture change challenge.

Restriction: Must be in Technology Innovation Leadership minor; or permission of INFO-College of Information Studies.

Credit Only Granted for: INST408L or INST407.

Formerly: INST408L.

INST408 Special Topics in Information Science (1-6 Credits)

Selected topics in information studies.

Prerequisite: Minimum of a C- from (STAT100, MATH115 or higher); minimum of a C- from (INST126 or GEOG276); minimum of a C- from (PSYC100, SOCY105, or BSOS233).

Restriction: Must be in Information Science, Technology and Information Design, or Social Data Science program.

Repeatable to: 9 credits if content differs.

INST410 Managing with Data and Simulations (3 Credits)

General principles of modeling, data analysis, and decision-making methods. Approaches to evaluating and assessing effective concepts, methods, and procedures of modeling and data analysis for decision making in management, advocacy, and communication situations. Ethical considerations in management, advocacy, and communication situations in professional life.

Prerequisite: Minimum grade of C- in INST126 and STAT100; minimum grade of C- in PSYC100 or SOCY105; minimum grade of C- in INST201 or INST301; and minimum grade of C- in MATH115 or higher.

Restriction: Must be in the Information Science or Technology and Information Design programs.

Credit Only Granted for: INST408M or INST410.

Formerly: INST408M.

INST414 Data Science Techniques (3 Credits)

An exploration of how to extract insights from large-scale datasets. The course will cover the complete analytical funnel from data extraction and cleaning to data analysis and insights interpretation and visualization. The data analysis component will focus on techniques in both supervised and unsupervised learning to extract information from datasets. Topics will include clustering, classification, and regression techniques. Through homework assignments, a project, exams and in-class activities, students will practice working with these techniques and tools to extract relevant information from structured and unstructured data.

Prerequisite: Minimum grade of C- in MATH115 (or higher) and STAT100; and a minimum grade of C- from INST126 or GEOG276; and a minimum grade of C- from one of the following (INST201, INST301, or BSOS233); and a minimum grade of C- from one of the following (AASP101, ANTH210, ANTH260, ECON200, ECON201, GEOG202, GVPT170, PSYC100, or SOCY100); and a minimum grade of C- from BSOS233 or INST314.

Recommended: Minimum C- in MATH140 and (INST326, BSOS326, or GEOG376).

Restriction: Must be in Information Science or Social Data Science program.

INST422 Modeling and Simulating Systemic Problems (3 Credits)

General principles of systems thinking and feedback dynamics modeling. Approaches, methods, and tools for identifying, articulating, and addressing non-linear, feedback-driven, systemic problems. Approaches to evaluating and assessing systems thinking and feedback dynamics models. Ethical considerations in systems thinking and feedback dynamics modeling practice.

Prerequisite: Minimum grade of a C- in INST201, STAT100, and INST126; and minimum of a C- in PSYC100 or SOCY105.

Restriction: Must be in the Information Science, Technology and Information Design, or Global Health major.

INST441 Information Ethics and Policy (3 Credits)

Explores via case studies the legal, ethical, and technological challenges in developing and implementing policies for managing digital assets and information. Emphasizes access questions pertinent to managing sensitive information and the roles and responsibilities of information professionals.

Prerequisite: Minimum grade of C- from INST341 or INST380.

Restriction: Must be in the Information Science program or Technology and Information Design program.

INST442 Digital Curation Across Disciplines (3 Credits)

Examines how to apply digital curation principles, tools, and strategies in managing diverse data collections and digital information in different disciplinary settings. Explores differences among data curation principles and practices across diverse settings, ranging from scientific organizations (such as business and academic research laboratories and computational science settings), to humanities-based institutions (such as cultural heritage organizations) to social science-based institutions (such as data-intensive professional environments).

Prerequisite: Must have completed with a C- or higher, or be concurrently enrolled in INST341 or INST380.

Restriction: Must be in the Information Science program or Technology and Information Design program.

INST443 Tools and Methods for Digital Curation (3 Credits)

Introduces students to the application of digital tools and methods in a variety of organizational settings, academic disciplines, and economic sectors.

Prerequisite: Must have completed with a minimum grade of C-, or be concurrently enrolled, in INST341 or INST380.

Restriction: Must be in the Information Science program or Technology and Information Design program.

INST447 Data Sources and Manipulation (3 Credits)

Examines approaches to locating, acquiring, manipulating, and disseminating data. Imperfection, biases, and other problems in data are examined, and methods for identifying and correcting such problems are introduced. The course covers other topics such as automated collection of large data sets, and extracting, transforming, and reformatting a variety of data and file types.

Prerequisite: Minimum grade of C- in STAT100 and INST327; and a minimum grade of C- from one of the following (INST201, INST301, BSOS233); and a minimum grade of C- from one of the following (AASP101, ANTH210, ANTH260, ECON200, ECON201, GEOG202, GVPT170, PSYC100, or SOCY100); and a minimum grade of C- from BSOS233 or INST314; and a minimum grade of C- from one of the following (BSOS331, GEOG273, or INST326).

Restriction: Must be in Information Science or Social Data Science program.

INST450 Introduction to CRM in Salesforce (3 Credits)

Students learn how to configure Salesforce so that they are able to collect, analyze and retrieve all of the vital information associated with their customer base. Moreover, students use Force.com fundamentals to understand Salesforce online application development and the deployment of next-generation cloud apps. The course offers practical hands-on learning that ensures students' job success as well as the theoretical knowledge needed to pass both Salesforce certification exams (ADM201 & Platform App Builder).

Prerequisite: INST327.

Credit Only Granted for: INST408P or INST450.

Formerly: INST408P.

INST451 Consumer Health Informatics (3 Credits)

Explores people's health-related information needs and whether, how, and why people seek out and use (or do not seek out and use) health information and the types of health information they find useful. We will also cover the important and interrelated topics of information avoidance, health behaviors, health literacy, digital health literacy, doctor-patient communication, and patient-to-patient communication through support groups and online communities. Throughout the course, we will also focus on the important concept of health justice - a world in which everyone has an adequate and equitable capability to be healthy.

Prerequisite: Minimum grade of C- in INST126, INST201 or STAT100; and minimum grade of C- from PSYC100 or SOCY105.

Restriction: Must be in the Information Science program or Technology and Information Design program.

Credit Only Granted for: INST408A or INST451.

Formerly: INST408A.

INST452 Health Data Analytics (3 Credits)

Health data analytics involves the extrapolation of actionable insights from patient data, using data sources such as electronic health records (EHRs), claims data, surveillance data, and surveys. Health data is complex, often unstructured and incomplete, and is organized for clinical care rather than to meet analytic needs. This course will involve the use of various analytical methods in order to translate large and complex data, whether structured or unstructured, into insights that improve decision-making from both the patient and provider perspectives.

Healthcare data are rich and hold so much potential, but a challenge is presented to patients, providers, and even government agencies when it comes to figuring out how to leverage these data. Students in this course will learn foundational topics in data analytics focused on health data and will apply this knowledge to real health datasets through hands-on labs integrated into the lectures.

Prerequisite: Minimum grade of C- in INST126 or GEOG276; and minimum grade of C- in PSYC100 or BSOS233; and minimum grade of C- in STAT100 or MATH115 or higher.

Restriction: Must be in the Information Science program or Social Data Science program.

INST453 Project Management for Information Science (3 Credits)

Provides a comprehensive overview of project management, focusing on the needs of information resources (IR). The course covers the concepts and techniques for planning and execution of projects including developing work breakdown structure, estimating costs, managing risks, scheduling, staff and resource allocation, team building, communication, tracking, control, and other aspects of successful project completion.

Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST4080 or INST453.

Formerly: INST4080.

INST454 Project Development Studio (3 Credits)

Allows students to develop a self-selected project or product, such as a game UI system or a task management app, while building advanced design skills. Students bring an initial idea to the class, and through lectures, discussions, weekly critiques, and project milestones, they progress their concepts into tangible, public-facing work. Emphasizing industry-standard methodologies, the course focuses on three core activities: externalizing ideas, engaging in constructive critique, and documenting design decisions and progress. This hands-on approach fosters self-directed learning, collaborative reflection, and a comprehensive understanding of design and development.

Prerequisite: Minimum grade of C- in INST104, INST126, INST204, and INST380; and must have completed or be concurrently enrolled in INST367.

Restriction: Must be in the Technology and Information Design program.

INST455 Information Assurance and Compliance (3 Credits)

Examines the protection of organizational data, personalized information, intellectual property and the associated assurance of the data's transfer, storage and communication. Students will understand how to manage these concerns and respond to both emergent and existing threats within the information domain. We will look at the key principles of Information Assurance, compliance and best practices in the real world.

Credit Only Granted for: INST408U or INST455.

Formerly: INST408U.

INST456 Risk Management Leadership in the Information Age (3 Credits)

Helps students assess and mitigate a range of vulnerabilities within an organization's data networks, allowing them to understand how to protect the integrity, security, and confidentiality of information.

Credit Only Granted for: INST408B or INST456.

Formerly: INST408B.

INST461 Emerging Technologies and Risk Management (3 Credits)

Focuses on how people and companies can achieve various tangible and intangible benefits and assess risk in using and incorporating emerging technologies (i.e. mobile devices, social media, robotic process automation, 3-D printing, cloud computing, blockchain technologies, artificial intelligence, etc.) into the activities and operations of a company.

Credit Only Granted for: INST408Z or INST461.

Formerly: INST408Z.

INST462 Introduction to Data Visualization (3 Credits)

Exploration of the theories, methods, and techniques of visualization of information, including the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography.

Prerequisite: Minimum grade of C- in STAT100; minimum grade of a C- from one of the following (INST201, INST301, or BSOS233); minimum grade of C- in INST126 or GEOG276; a minimum grade of C- from one of the following (AASP101, ANTH210, ANTH260, ECON200, ECON201, GEOG202, GVPT170, PSYC100, SOCY100, or SOCY105); and a minimum grade of C- from BSOS233 or INST314.

Restriction: Must be in Information Science or Social Data Science program.

INST463 Technology Socialpreneur (3 Credits)

Introduces students to the role of technology and entrepreneurship in our society. Students will be able to choose an existing society issue and develop creative entrepreneurial ideas to solve it using innovative technologies. The course allows students to meet industry professionals and learn more about various social problems and projects companies focus on and try to solve in the modern world. Students are also able to contribute to those solutions.

Credit Only Granted for: INST398B or INST463.

Formerly: INST398B.

INST464 Decision Making for Cybersecurity (3 Credits)

Discusses human and organizational decision making from a variety of perspectives. Applies different risk assessment and decision making frameworks that are relevant to personal and organization cybersecurity, with a focus on the quantitative Factor Analysis of Information Risk (FAIR) model. Considers monetary, social and societal costs of cybersecurity decisions. Considers a range of questions relating to cybersecurity, from whether to install a game on a smartphone to how to allocate scarce information security resources in an organization.

Prerequisite: Must have earned a minimum grade of C- in INST201, INST126, MATH115, PSYC100, and INST364.

Restriction: Must be in Information Science program.

Credit Only Granted for: INST408W or INST464.

Formerly: INST408W.

INST466 Technology, Culture, and Society (3 Credits)

Individual, cultural, and societal outcomes associated with development of information & communication technologies (ICTs), including pro- and anti-social factors. Unpacking how gender, race, ethnicity, sexual orientation, disabilities, and political affiliations affect consumption and production of online experiences. Unpacking how structures of dominance, power and privilege manifest at individual, institutional and cultural levels.

Prerequisite: Minimum grade of C- in INST201 or INST301; and minimum grade of C- in PSYC100 or SOCY105.

Restriction: Must be in the Information Science program or Technology and Information Design program.

INST467 Fundamentals of Cybersecurity for Policy Makers (3 Credits)

Explores the key issues facing policy makers attempting to manage the problem of cybersecurity from its technical foundations to the domestic and international policy considerations surrounding governance, response, critical infrastructure risk management, and privacy. Designed for students with little to no background in information technology, and will provide the principles to understand the current debates shaping a rapidly evolving security landscape.

Prerequisite: Must have completed with a C- or be concurrently enrolled in INST364.

Restriction: Must be in Information Science program.

Credit Only Granted for: INST408V, PLCY388C, or INST467.

Formerly: INST408V.

INST470 Competitive Business Intelligence (3 Credits)

Competitive intelligence (CI) is a derivative of governmental intelligence, as well as business marketing, economics, and management, that is defined similarly: the collection, evaluation, analysis, and application of legally available information relevant to the plans, decisions, and operations of one's organization. Topics will include an overview and comparison of the intelligence process in government and in business (i.e., the intelligence cycle), a detailed consideration of the requirements and the analytical segments of that process, a survey of current analytical tools, a survey of information sources and information acquisition activities, a survey of required personnel, physical and information security policies, and the necessary efforts in creating an effective CI unit within any business enterprise.

Credit Only Granted for: INST408K or INST470.

Formerly: INST408K.

INST490 Integrated Capstone for Information Science (3 Credits)

The capstone provides a platform for Information Science students where they can apply a subset of the concepts, methods, and tools they learn as part of the Information Science program to addressing an information problem or fulfilling an information need.

Prerequisite: Minimum grade of C- in INST311, INST314, INST326, INST327, INST335, INST346, INST352, and INST362.

Restriction: Must be in Information Science program; and must have earned a minimum of 90 credits; and permission of INFO-College of Information Studies.

ISRL - Israel Studies

ISRL187 God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience (3 Credits)

Examines the complicated relationship between theology, nationalism, sovereignty, and the ethical exercise of social control using case studies drawn from the Jewish historical experience. The universal and age-old issues implicit in the exercise of power have gained special moral force for Jews with the creation of the State of Israel, a Jewish and a democratic state with substantial non-Jewish minorities and hundreds of thousands of non-citizen subjects. Can these be reconciled? Jewish efforts over the ages and in recent times to define justice provide concrete examples through which to examine and discuss crucial abstract principles.

Cross-listed with: HIST187, JWST187.

Credit Only Granted for: HIST187, JWST187 or ISRL187.

ISRL249 Selected Topics in Israel Studies (3 Credits)

Topics in the study of Zionism and contemporary Israel from the 1880's to the present. Future offerings may address history, politics, or culture.

Recommended: ISRL142.

Repeatable to: 6 credits if content differs.

ISRL256 Zionism and Sexual Revolution (3 Credits)

A study of the changes within European Jewish communities that influenced the development of particular fantasies about and representations of gender, love, and sex in Palestine and Israel. We will investigate the broader intellectual and cultural contexts needed to understand the gender and sexual revolutions of the 19th and 20th centuries, and will examine how European and, later, Israeli Jews adopted and adapted these ideas and cultural forms. We will closely analyze a variety of texts (stories, plays, photographs, and films) and will consider the relationship between ideology and aesthetics.

Cross-listed with: JWST256.

Credit Only Granted for: ISRL249N, JWST219G, ISRL256, or JWST256.

Formerly: ISRL249N or JWST219G.

ISRL269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ISRL283 The Israeli/Palestinian Conflict: Fundamental Questions (3 Credits)

As has become evident virtually every year, the Palestinian-Israeli conflict retains its capacity to mobilize both sides against each other. Why are Palestinian Arabs and Israeli Jews unable to resolve their differences? This course uncovers some of the deeper explanations as to why the conflict persists, even as it changes over the decades.

Credit Only Granted for: ISRL283 or ISRL289I..

Formerly: ISRL289I.

ISRL289 New Explorations in Israel Studies (3 Credits)

Investigation of critical and innovative responses in Israel Studies. Although the topic will vary, the course will encourage intellectual exploration by students of fundamental problems and critical methods.

ISRL299 Independent Study in Israel Studies (1-3 Credits)

This lower-level independent study allows students to work closely with an Israel Studies faculty member of their choice, pending prior approval of the faculty member. In this independent study, students will focus on a topic specific to Israel Studies.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 6 credits.

ISRL329 Special Topics in Israel Studies (3 Credits)

Topics in the study of Zionism and contemporary Israel from the 1880's to the present at an intermediate level. Individual sections may address history, politics, or culture.

Repeatable to: 9 credits if content differs.

ISRL329G The Israeli Settler Movement: The Road to One State? (3 Credits)

Explores the Israeli settler movement over the last four decades, from its position on the fringes of Israeli society in the 1970s and 1980s to its rise to prominence in Israeli politics today. Topics will include the history of the Israeli settlement project in the West Bank, the emergence of Gush Emunim and its ideological foundations in Jewish messianism, its violent offshoots, and the influence of the settler movement on the Israeli political system. Study of these topics illuminates some of the most important driving forces of modern history such as nationalism, religious fundamentalism, colonialism and the ability of a determined minority to influence a country's policies.

Cross-listed with: JWST332, HIST381.

Credit Only Granted for: HIST329G, HIST381, ISRL329G, JWST332 or JWST319N.

Formerly: JWST319N.

ISRL330 Mizrahi Identity in Israel (3 Credits)

It is impossible to understand Israeli society today without examining the Mizrahi experience. Despite the common misconception that Israel is predominantly made up of Jews from European origin, the fact of the matter is that Jews of Mizrahi origin, whose parents and grandparents immigrated to Israel from the Middle East and North Africa, represent a major part of the Israeli population. Moreover, Ashkenazi-Mizrahi relations continue to be a major source of tension in Israeli politics, and issues of race continue to come up on social media and polarize the Israeli society. This course brings to light narratives of Mizrahi identity in Israel and explores the trajectory of the Mizrahi struggle for equality and against racism through its various milestones: the 1959 Wadi Salib Revolt, the Black Panthers Movement in the 1970s, the emergence of the Israeli Sephardi-Orthodox party Shas, and the new wave of Mizrahi activism in the 21st century.

Cross-listed with: HIST377, JWST334.

Credit Only Granted for: JWST319D, JWST334, HIST377, HIST329Z, ISRL329M, or ISRL330.

Formerly: ISRL329M.

ISRL342 History of Modern Israel (3 Credits)

History of modern Israel since the beginning of the Zionist settlement in 1882. Attention to different interpretations and narratives of Israel's history, including the historical and ideological roots of Zionism, the establishment of the State of Israel, ideological forces, wars, and the triumphs and crises of democracy. Cross-listed with HIST376.

Credit Only Granted for: HIST376 or ISRL342.

ISRL343 Global Migration and the Israeli Case Study (3 Credits)

Over 70% of Israel's population is made of first, second or third generation immigrants, who came from over 70 countries, making Israel an ultimate immigrant society. This course will focus on the history of Israel as a case study for the understanding of the historical phenomena of modern immigration.

Cross-listed with: SOCY398G.

Credit Only Granted for: ISRL349K, GVPT368G, SOCY398G, SOCY398I, or ISRL343.

Formerly: ISRL349K.

ISRL344 The Israeli Settler Movement: The Road to One State? (3 Credits)

Explores the Israeli settler movement over the last four decades, from its position on the fringes of Israeli society in the 1970s and 1980s to its rise to prominence in Israeli politics today. Topics will include the history of the Israeli settlement project in the West Bank, the emergence of Gush Emunim and its ideological foundations in Jewish messianism, its violent offshoots, and the influence of the settler movement on the Israeli political system. Study of these topics illuminates some of the most important driving forces of modern history such as nationalism, religious fundamentalism, colonialism and the ability of a determined minority to influence a country's policies.

Cross-listed with: JWST332, HIST381.

Credit Only Granted for: HIST329G, HIST381, ISRL329G, ISRL344, JWST332 or JWST319N.

Formerly: JWST319N.

ISRL349 Investigating Topics in Israel Studies (3-6 Credits)

Topics in the study of Zionism and contemporary Israel from the 1880's to the present at an intermediate level. Individual sections may address history, politics, or culture.

Recommended: ISRL142 and ISRL249.

ISRL350 The End of the Israel-Arab Conflict?? (3 Credits)

Violence between Jews/Israelis and Arabs/Palestinians on both an inter-communal and inter-state level has been pervasive in the Holy Land for over a century. However, in the past few years, Israel has signed treaties with several Arab countries and more are likely in the near future. Is the larger Israel-Arab conflict ended, or nearly so? This course will examine the last 30 years to understand what has changed about these conflicts and what remains, and then explore different scenarios as to how peace may be possible and what it might look like.

ISRL369 Special Topics in Study Abroad (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ISRL372 Jewry of Muscle: Zionism and Jewish Masculinity (3 Credits)

Part of the Zionist cultural project involved creating a new Jewish masculinity that would replace the diasporic "sissy Jew" with a strong, healthy new "Jewry of Muscle." Using literary and cinematic sources, we will analyze how these Zionist and Israeli cultural productions served to build (and sometimes undermine) this new model of Jewish masculinity.

Cross-listed with: JWST372.

Credit Only Granted for: JWST319K, ISRL329K, JWST372 or ISRL372.

Formerly: JWST319K or ISRL329K.

ISRL375 Jews and Representations of Race (3 Credits)

Attention to the evolution of Western concepts of "race" from late medieval to modern times requires addressing the meaning of the term "race." How did constructions of Jewish "racial" identities fit into this broader discussion? As Christian Europe's primary minority for centuries, "the Jews" provide evidence for constructions of race as a means of grouping populations culturally and materially. How did Jews interact with the racial discourse of diverse time periods, and how did they negotiate their political realities by both adopting and challenging aspects of the rhetoric of antisemitism as well as the rhetoric of "whiteness" versus "blackness"?

Cross-listed with: JWST375.

Credit Only Granted for: ISRL375, JWST375, ISRL349Z, or JWST319M.

Formerly: ISRL349Z or JWST319M.

ISRL380 Israel: Politics and Society (3 Credits)

Addresses the main issues in Israeli politics and society by focusing on the role of Zionism in the Jewish state, the institutional foundations of Israeli democracy, the main political parties and blocs and their different ideological principles and visions, as well as the main social groups, movements, and institutions that comprise Israeli civil society.

Credit Only Granted for: ISRL329C, ISRL380, or GVPT368D.

Formerly: ISRL329C .

ISRL381 Israeli Foreign and Security Policy (3 Credits)

An overview of Israeli foreign and security policy from 1948 to the present. We will examine how Israel's foreign and security policies reflect its Jewish origins, Zionist ideology, its relations with its neighbors and world powers, and its regional quest for recognition and legitimacy.

Credit Only Granted for: ISRL381, ISRL329P or GVPT368E.

Formerly: ISRL329P.

ISRL382 U.S. Foreign Policy and the Arab-Israeli Conflict (3 Credits)

What are the United States' interests in the Middle East? Who and/or what determines those interests? How are these interests pursued? This course will provide an overview of American diplomacy in the Middle East as it unfolded since the mid-1940s with an emphasis on the Israeli-Arab/Palestinian conflicts. We will first examine the overarching ideational and institutional factors that shape and guide U.S. foreign policy, and then turn to analyze major issues and challenges American diplomacy faces in the Middle East. The course seeks to integrate U.S. foreign policy and the Arab-Israeli conflict into a broader analytical framework dealing with mediation, conflict resolution and management, alliance and politics, and patron-client relations.

Credit Only Granted for: ISRL382, ISRL349F or GVPT368A.

Formerly: ISRL349F.

ISRL383 Political Psychology, Israel, and the Middle East (3 Credits)

What is the role of perceptions and misperceptions in international politics? How do emotions impact policy-making processes? Does social psychology matter when analyzing domestic politics or foreign policy? Political psychology is an interdisciplinary academic field dedicated to the analysis of the nexus between psychological and political processes. This course will identify and employ multiple pertinent political psychology theories to account for Israeli domestic politics and foreign policy as well as other major political events throughout the Middle East including nuclear proliferation, terrorism, and territorial expansionism

Cross-listed with: GVPT368P.

Credit Only Granted for: ISRL329Q, ISRL383 or GVPT368P.

Formerly: ISRL329Q.

ISRL448 Seminar in Israel Studies (3 Credits)

Intensive study of an Israel Studies topic. Expected work product is a substantial research or analysis paper or appropriate equivalent.

Recommended: ISRL349 and ISRL249.

Restriction: Must be in the Israel Studies Minor.

ISRL449 Advanced Topics in Israel Studies (3 Credits)

Topics in the study of Zionism and contemporary Israel from the 1880s to the present at the advanced level. Individual sections may address history, politics, or culture. Some Sections may have language or course prerequisites.

Recommended: ISRL349 or ISRL249.

Repeatable to: 6 credits if content differs.

ISRL499 Advanced Independent Study in Israel Studies (1-3 Credits)

This upper-level independent study allows students to work closely with an Israel Studies faculty member of their choice, pending prior approval of the faculty member. In this independent study, students will focus on a topic specific to Israel Studies.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 6 credits.

ITAL - Italian

ITAL103 Intensive Elementary Italian (4 Credits)

Covers speaking, reading, writing, listening, and culture of Italian-speaking world.

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

Restriction: Not open to fluent/native speakers of Italian.

Credit Only Granted for: ITAL103 or ITAL121.

ITAL169 Special Topics in Study Abroad I (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ITAL203 Intensive Intermediate Italian (4 Credits)

Covers speaking, reading, writing, listening, and culture of Italian-speaking world.

Prerequisite: ITAL103; or must have appropriate World Language Placement Test (WLPT) score.

Restriction: Must not have completed ITAL122; and must not be a fluent/native speaker of Italian.

Credit Only Granted for: ITAL203 or ITAL122.

ITAL204 Advanced Intermediate Italian (3 Credits)

An intensive study of Italian language and culture. This course completes the sequence of ITAL 103 and 203. After a brief review of important material of Intermediate Italian (ITAL 203), we will cover the last four chapters of *Parliamo italiano* (Unita 9-12). ITAL 204 is designed to reinforce and deepen the students' knowledge of Italian and its idiomatic usage, and to improve their reading and writing skills through a more in-depth study of more complex grammatical forms. Students are encouraged to practice Italian using grammatical concepts in an active manner. There will be oral and written exercises, short readings, and vocabulary expansion. Special attention will be given to readings, oral comprehension and written compositions. To improve their listening and reading comprehension, students will also view and analyze film clips, and read short articles in newspapers and magazines on current events and global issues pertaining to Italy and the European Union.

Prerequisite: ITAL203 or equivalent; or must have appropriate World Language Placement Test (WLPT) score.

ITAL207 Speaking and Writing in Italian (3 Credits)

An intensive upper intermediate language course that focuses on Italian speaking and writing. The course, which is taught entirely in Italian, is designed to reinforce and deepen the students' knowledge of the Italian language and its idiomatic usage, and to improve their speaking ability and listening comprehension. Students will be given practice both in speaking extemporaneously and giving oral reports written on a wide range of topics dealing with contemporary Italy. One of the main objectives of the course is to prepare students to take upper level courses (300-400 levels) in Italian language, literature, and culture

Prerequisite: ITAL204; or students who have taken courses with comparable content may contact the department.

Restriction: Must not be a fluent/native speaker of Italian.

ITAL211 Intermediate Conversation (3 Credits)

Practice in spoken Italian based on reading and listening exercises in a variety of genres. Written assignments and exams.

Prerequisite: ITAL203; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Italian.

ITAL252 Stories of Italy (3 Credits)

Introduction to fictions across time and space in Italy.

Prerequisite: ITAL207; or permission of ARHU-School of Languages, Literatures, and Cultures department.

Restriction: Must not be a fluent/native speaker of Italian.

ITAL261 Cuisine, Culture, and Society in Italy Yesterday and Today (3 Credits)

Exposes students to an important aspect of Italian culture: the art of gastronomy. Provides an in-depth understanding of the close relationship between food and culture, while enriching their knowledge of the Italian language through reading and analysis of various texts which deal with the preparation and adaptation of Italian food in different cultural settings. Taught in Italian.

Prerequisite: ITAL204; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ITAL301 Italian Composition (3 Credits)

Techniques of composition; grammatical analysis; various genres; vocabulary.

Prerequisite: ITAL207; or students who have taken courses with comparable content may contact the department.

ITAL306 Commercial Italian I (3 Credits)

An introduction to Italian Business language and culture. Special emphasis on communicative strategies used in business transactions and applications. Reading and discussion of relevant articles relating to business world from on-line newspapers and magazines.

Prerequisite: ITAL301; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL311 Advanced Oral Expression: Current Events (3 Credits)

Oral expression; development of idiomatic forms and vocabulary to level of the Italian press.

Prerequisite: ITAL207; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL361 Survey of Italian Society and Culture: From Fascism to the Seventies (3 Credits)

Development of Italian society and culture from Fascism to the 1970s. Literature, cinema, economy, popular culture, and daily life. Taught in Italian.

Prerequisite: ITAL207.

ITAL362 Survey of Italian Society and Culture: From the 1980s to the Present Day (3 Credits)

Development of Italian society and culture from the 1980s to the present. Literature, cinema, economy, popular culture, daily life. Taught in Italian.

Prerequisite: ITAL207; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ITAL369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ITAL386 Experiential Learning (3-6 Credits)

Prerequisite: Must have a Learning Proposal approved by the Office of Experiential Learning Programs, faculty sponsor, and student's internship sponsor.

Restriction: Junior standing or higher.

ITAL388 Language House Colloquium (1 Credit)

The Language House Colloquium is a one-credit course for students residing in the Language House Immersion Program. The course focuses on the further development of skills in the target language and the acquiring of cultural knowledge of the countries that speak the target language. The course is designed to supplement the learning that takes place on a daily basis in the Language House program.

Restriction: Must be a resident in Language House.

Repeatable to: 4 credits.

ITAL399 Directed Study in Italian (1-3 Credits)

Intended for undergraduates who wish to work on an individual basis with a professor of their choice.

Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

Repeatable to: 3 credits.

ITAL411 Monsters and Demons: the Faces of Evil in Dante's Inferno (3 Credits)

An interdisciplinary study of Dante's Inferno as represented in the Divine Comedy. Special emphasis on Dante's own portrayal of monsters and demons and their roles in the poet's eschatological vision of Hell. Taught in English.

ITAL421 The Italian Renaissance (3 Credits)

A study of major trends of thought in Renaissance literature, art, and science. Taught in English.

Credit Only Granted for: ITAL421 or ITAL422.

ITAL431 Italian Civilization in Translation (3 Credits)

Political, social, intellectual, literary and artistic forces shaping contemporary Italy from the late Middle Ages to the present. Taught in English.

Credit Only Granted for: ITAL431 or ITAL432.

ITAL433 Holocaust in Italian Literature and Cinema (3 Credits)

Review of literature and theoretical writings of Italy's most famous survivor, Primo Levi, to a sampling of Italian films that focus in vastly different and often extremely controversial ways on the experience of the concentration camp, while addressing a series of central questions from the brutal realities of the camps to the "compromises" made in order to survive, the need to bear witness, and the idea of the survivor's guilt.

Cross-listed with: CINE433.

Credit Only Granted for: CINE433, FILM433 or ITAL433.

Formerly: FILM433.

ITAL436 Italian Cinema I: Neorealism (3 Credits)

Explores representations of Italy in cinema with special focus on identity formation and the movement of Italian neorealism and post neorealism. Taught in English.

Cross-listed with: CINE441.

Credit Only Granted for: CINE441, FILM441 or ITAL436.

Formerly: FILM441.

ITAL441 The Dark Side of the Italian Renaissance (3 Credits)

Examines the dark aspects of the Italian Renaissance, focusing on artistic and literary patronage as a strategy of self-promotion and as a means to achieve and preserve power. From the Northern court of Milan to the Southern Kingdom of Naples, we journey through the Italian peninsula, a land that gave birth to illustrious artists and poets in one of the most troubled periods of Italian history, marked by political conflict, bloody rivalries, family betrayals, and wars. What hides beneath the image of some of these benevolent and enlightened patrons of learning, often praised as "ideal rulers" by artists and writers of the Renaissance, are ambitious and crafty politicians, who sought their own interests and goals in their ruthless pursuit of power

Recommended: Some knowledge of Italian at the elementary or intermediate level.

ITAL469 Study Abroad Special Topics IV (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

ITAL471 Italian Cinema: A Cultural Approach in Translation (3 Credits)

The culture of Italy through the medium of film from the silent days up to the present. Taught in English.

Credit Only Granted for: ITAL471 or ITAL472.

ITAL473 Italian Cinema II (In Translation) (3 Credits)

A study of Italian society and culture through the medium of film from the mid 1970's to the present. Taught in English.

Cross-listed with: CINE431.

Credit Only Granted for: ITAL473, CINE431 or FILM431.

Formerly: FILM431.

ITAL475 The Italian Opera Libretto in English (3 Credits)

History and analysis of Italian opera librettos from Monteverdi through Mozart to Verdi and Puccini. Taught in English.

Prerequisite: Must have completed one course in literature.

Credit Only Granted for: ITAL475 or ITAL476.

ITAL478 Colloquium in Italian (1 Credit)

Colloquium section taught in Italian to accompany 400-level Italian courses taught in English. Discussion, presentations, readings.

Prerequisite: ITAL311; or students who have taken courses with comparable content may contact the department.

Corequisite: ITAL498, ITAL411, ITAL431, ITAL421, ITAL473, ITAL475, ITAL471, or ITAL499.

Repeatable to: 6 credits.

ITAL498 Special Topics in Italian Literature (3 Credits)

Repeatable to: 6 credits if content differs.

ITAL499 Special Topics in Italian Studies (3 Credits)

Repeatable to: 6 credits if content differs.

ITAX - Italian Education Abroad

ITAX100 Introduction to Italian Language and Culture (3 Credits)

Open to students with no previous training in Italian, the course introduces features of the Italian language needed for interaction in everyday practical situations, such as the cafe, restaurant, accommodation and in shops. The course satisfies a limited number of immediate needs necessary for survival in the target language culture. Cultural topics, such as Italian gestures, the Italian family, the working world, religion, and women in Italy, will also be studied in order to familiarize the student with certain aspects of contemporary Italian society and culture.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome.

Education Abroad processes registrations for this course on behalf of students.

ITAX101 Living Perugia: Elementary Language, Culture, and Reflection (4 Credits)

The specific goals of the introductory course is to give students a basic lexicon to interact with everyday life, events and activities of their new host country, while at the same time teaching them the key building blocks of Italian grammar. The central objectives are therefore to provide students with the necessary tools by which they can engage - little by little - with the local community in a meaningful way, and to stimulate students to observe and reflect upon various aspects of the new culture surrounding them.

Credit Only Granted for: ITAL169 or ITAX101.

Formerly: ITAL169.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

ITAX103 The Florence Experience I (4 Credits)

Students will develop basic cultural and linguistic/communicative competences (speaking, writing, reading and understanding) in Italian through an interdisciplinary experience. Introduces students to various aspects of contemporary Florentine life and Italian culture via field trips, interviews with local Florentines, and cultural activities facilitated by professional directors and playwrights.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11293>. Education Abroad processes registrations for this course on behalf of students.

ITAX110 Introduction To Italian Language and Culture (3 Credits)

Introduces features of the Italian language needed for interaction in everyday practical situations, such as the cafe, restaurant, accommodations and in shops. Equips students with necessary skills for survival in the target language culture. Cultural topics, such as Italian gestures, the Italian family, the working world, religion, and women in Italy, are studied in order to familiarize the student with certain aspects of contemporary Italian society and culture.

Credit Only Granted for: ITAL169R or ITAX110.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ITAX201 Cultural Diversity in Italy (3 Credits)

The different practices and experiences of cultural diversity and its challenges in contemporary Italy. The course will analyze the transition of Italy from a country of emigration to a country of both emigration and immigration.

Additional Information: This course is offered as part of the Maryland-in-Rome study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMRome. Education Abroad processes registrations for this course on behalf of students.

ITAX301 Florence: The Story of the City (3 Credits)

Explores how the history of Florence is highly representative of the history of Italy as the cradle of many philosophical, artistic, and political ideas that were key in shaping the Western World. Students in this course will visit both well-known and hidden landscapes of Florence, identify its most celebrated spaces, and understand how the city has changed and how it has been shaped by the character of its people.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11293>. Education Abroad processes registrations for this course on behalf of students.

ITAX302 History of Fashion (3 Credits)

Creativity, a taste for beauty, tradition and imagination have always been part of Italian culture, being key factors in the shaping of its extraordinary artistic heritage, and in the emergence of a specifically Italian style. Students will explore the evolution of Italian Fashion from the fourteenth century through a multi-faceted approach that includes site visits and considers the impact of gender and political structures, Renaissance art, the Florentine silk economy, the emergence of writings on Fashion and style, design experiments connected to the birth of Opera, and Hollywood and Cinecitta industries on clothing, costume, style, and production in our time. Course is taught in English.

Additional Information: This course is offered as part of the Maryland-in-Florence study abroad program. Students must apply for this program through Education Abroad: More information at <https://globalmaryland.umd.edu/offices/education-abroad/program/11293>. Education Abroad processes registrations for this course on behalf of students.

ITAX304 The History and Culture of Food in Italy (3 Credits)

Explores the history of food in Italy as a gateway to understanding present Italian culture. Students will examine the factors that have shaped Italian food, cuisine, and taste, the variations in eating habits of different socio-economic classes, and the essential role played by food in constructing Italian identities to shed light on fundamental patterns in Italian history and society.

Additional Information: This course is offered as part of the Maryland-in-Perugia study abroad program. Students must apply for this program through Education Abroad: More information at ter.ps/UMPerugia. Education Abroad processes registrations for this course on behalf of students.

IVSP - Individual Studies Program

IVSP317 Progress Report (1 Credit)

A written analysis of the program. Students register for IVSP317 only once, the semester before the final term.

Restriction: Must be in Individual Studies program.

IVSP318 Independent Learning Activities (1-6 Credits)

An independent study course which students can use for a variety of out-of-class internship and research opportunities.

Restriction: Must be in Individual Studies program; and permission of faculty sponsor.

Repeatable to: 9 credits if content differs.

JAPN - Japanese

JAPN101 Elementary Japanese I (6 Credits)

Introduction to basic patterns of contemporary spoken Japanese and to the two phonetic syllabaries (Katakana and Hiragana).

Prerequisite: Must have appropriate World Language Placement Test (WLPT) score.

JAPN102 Elementary Japanese II (6 Credits)

Continued introduction to the basic spoken patterns of contemporary Japanese.

Prerequisite: Minimum grade of C- in JAPN101; or appropriate World Language Placement Test (WLPT) score.

JAPN201 Intermediate Japanese I (6 Credits)

Contemporary spoken and written Japanese.

Prerequisite: Minimum grade of C- in JAPN102; or or appropriate World Language Placement Test (WLPT) score.

JAPN202 Intermediate Japanese II (6 Credits)

Contemporary spoken and written Japanese.

Prerequisite: Minimum grade of C- in JAPN201; or appropriate World Language Placement Test (WLPT) score.

JAPN221 Radical Transformations in Japanese Culture (3 Credits)

Since the early modern period, Japanese cultural forms have reflected the innate instability of contemporary social structures. Focusing on Noh drama, Matsuo Basho's haiku travelogue *Oku no hosomichi*, popular fiction by Ihara Saikaku, the movement for vernacular literature in the late 19th century, the rise and fall of Marxists and feminists in early 20th century Japan, a variety of perspectives on WWII and its legacy, as well as Japanese pop culture, we will consider the way cultural works developed as part of Japan's radical transformations in the last four centuries. A major film component increases students' direct exposure to the work of Japan's cultural producers, and students' suggestions and interests will help shape the final unit of the course about Japan today. Taught in English, and all readings are in English translation.

JAPN269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

JAPN298 Special Topics Japanese Literature (3 Credits)

Special topics in Japanese literature.

Repeatable to: 9 credits if content differs.

JAPN301 Advanced Japanese I (6 Credits)

Advanced conversation, oral comprehension, and selected readings.

Prerequisite: Minimum grade of C- in JAPN202; or permission of instructor.

JAPN302 Advanced Japanese II (6 Credits)

Continued readings in varied modern texts and advanced conversation and oral comprehension.

Prerequisite: Minimum grade of C- in JAPN301; or permission of instructor.

JAPN311 Traditional Japanese Language and Culture (3 Credits)

Introduction to classical Japanese language (kobun) through representative texts and genres from the literary traditions of the Heian period (794-1185) to the Early Modern period (1600-1868). Taught in Japanese and English.

Prerequisite: Minimum grade of C- in JAPN202; or permission of instructor.

JAPN316 Women and Japanese Literature: Japanese Literature in Translation (3 Credits)

Close critical reading of a range of Japanese literary texts that deal in some significant manner with gender, sex and sexuality. Taught in English.

JAPN325 Modern Japanese Literature and Film (In Translation) (3 Credits)

Explores and questions the significance of some of modern Japan's most dynamic historical transformations, pressing social issues, and modes of cultural expression. Covers the Meiji period (1868-1912) to the 21st century.

JAPN345 Mapping Premodern Japan (3 Credits)

Mapping Premodern Japan investigates travel in Japan through concentrated study of a key route in the premodern period. We will explore the role travel played in larger social, political, economic, and cultural structures and how stories of travel shaped ideas of identity, place, and national culture. We will analyze scholarship, conduct research, and learn the process for developing authentic scholarship in Cultural Studies. The course will culminate in a digital humanities final project in which students will conduct research on the major site of study and present their findings using digital storytelling. Taught in English.

Credit Only Granted for: JAPN498M, JAPN498T, or JAPN345.

Formerly: JAPN498T and JAPN498M.

JAPN369 Special Topics in Study Abroad (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

JAPN388 Language House Spring Colloquium (1 Credit)

For students residing in the Language House Immersion Program.

Focuses on the development of skills in the target language and acquiring the cultural knowledge of the countries that speak the target language.

Restriction: Must be a resident of Language House.

Repeatable to: 8 credits.

JAPN401 Readings in Modern Japanese Literature (3 Credits)

Development of advanced reading, vocabulary, grammar, and translation skills through selected readings in Japanese drawn primarily from modern literature.

Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN402 Readings in Japanese Cultural Studies (3 Credits)

Development of advanced reading, vocabulary, grammar, and translation skills through selected readings in Japanese drawn from the fields of history, social sciences, cultural studies, film studies, and popular culture.

Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN407 The Art of Translation (3 Credits)

Theory and practice of translation. Variety of genres. Japanese to English.

Prerequisite: 1 course with a minimum grade of C- from (JAPN401, JAPN402); or students who have taken courses with comparable content may contact the department.

JAPN408 Special Topics in Japanese (3 Credits)

Topic in the Study of Japanese, to be announced each time course is offered. Taught in Japanese.

Prerequisite: Minimum grade of C- in JAPN302; or permission of instructor.

JAPN412 Classical Japanese (3 Credits)

Continuation of JAPN 411 with more advanced classical Japanese.

Prerequisite: JAPN411.

JAPN418 Japanese Literature in Translation (3 Credits)

Representative works of Japanese literature in translation.

Repeatable to: 9 credits if content differs.

JAPN421 History of the Japanese Language (3 Credits)

Investigation of the origin of the Japanese language, its relationship with other languages, and its development. Taught in English, but presumes knowledge of Kanji (Chinese characters).

Prerequisite: JAPN102; or permission of ARHU-School of Languages, Literatures, and Cultures department.

JAPN424 Japan From the Margins (3 Credits)

Japan from the Margins takes as its focus the history and representations of various others in Japanese society. They include ethnic Ainu, Okinawans, and Koreans, a historical outcaste group called the Burakumin, and people marginalized for their non-normative gender and sexual practices. Students learn about the historical specificities of each group as well as their common experiences of institutional discrimination as they grapple with larger questions regarding prejudice, nationalism, and social justice. Taught in English.

JAPN425 The Atomic Bomb in Literature and Memory (3 Credits)

Study of declassified documents and commentary on the United States decision to use the bomb in 1945, the many ways Japanese writers have attempted to express their indescribable experiences in Hiroshima and Nagasaki, and the shaping of historical narratives and national identities in post-war Japan and the U.S. Taught in English.

JAPN428 Seminar in Japanese Discourse and Conversation Analysis (3 Credits)

Presentation and discussion of classic and current readings in English and Japanese on theories and actual practice of discourse and conversation analysis. Students will learn transcription techniques and have an opportunity to apply them in a final term paper.

Prerequisite: JAPN302.

Recommended: JAPN422.

Repeatable to: 6 credits if content differs.

JAPN438 Topics in Japanese Pragmatics (3 Credits)

Basic concepts in the field of pragmatics (the study of language in context) such as deixis and indexicality, speech acts, ellipsis, and politeness. Readings in English on English and Japanese examples.

Prerequisite: JAPN201.

Recommended: JAPN422.

Repeatable to: 9 credits if content differs. Jointly offered with JAPN638.

JAPN445 Performance and Sexuality in Early Modern Japan (3 Credits)

Explores the intersections between performance and sexuality in early modern Japan. Our main sites will be the stage, the brothels, and everyday life as we examine how people of the period performed gender and sexuality. We will draw from popular fiction, kabuki, puppet theatre, woodblock prints, guides to the pleasure quarters, and censorship edicts. Taught in English.

Credit Only Granted for: JAPN498J or JAPN445.

Formerly: JAPN498J.

JAPN447 Technologies of Japanese Performance (3 Credits)

Explores technologies of performance in Japan across the centuries. We will focus on concepts of likeness and liveness as they manifest in performance's mythical origins, the traditions of noh drama, the popular, commercial theatres of kabuki, bunraku, and Takarazuka, and contemporary experiments with robotics, Vocaloids, and other new technologies. Taught in English.

Credit Only Granted for: JAPN498P or JAPN447.

Formerly: JAPN498P.

JAPN498 Special Topics in Japanese Studies (3 Credits)

Special topics in Japanese studies. Taught in English.

JAPN499 Directed Study in Japanese (1-3 Credits)

Prerequisite: Permission of instructor.

Repeatable to: 6 credits if content differs.

JOUR - Journalism

JOUR130 Self-Presentation in the Age of YouTube (3 Credits)

Students, as they make use of evolving technologies, need to be able to present themselves effectively in front of any number of different audiences through any number of different outlets. Whether in an interview on radio, a guest presentation at a conference, in comments on a video blog, in commentary on TV, in the lead on a self-produced YouTube video, or as spokesperson in front of investors or management, professionals need strong oral communication skills. This class focuses on strengthening those skills through active individual and group presentations, as well as, through discussion of key techniques and group critique of presentation publicly available in the social media space on sites such as YouTube.

Credit Only Granted for: COMM107, COMM200, ENES143, INAG110, JOUR130 or THET285.

Additional Information: May not count toward the Journalism major.

JOUR150 Introduction to Mass Communication (3 Credits)

Survey of the functions and effects of the mass media in the United States. A consumer's introduction to newspapers, television, radio, film, sound recording, books, magazines, and new media technology.

Additional Information: Not applicable toward journalism major.

JOUR152 Introduction to Storytelling with Code (1 Credit)

An introduction to the ways markup and programming languages and computational thinking are transforming news reporting and storytelling.

Prerequisite: Must have completed or be concurrently enrolled in JOUR200.

JOUR175 Media Literacy (3 Credits)

An analysis of the information, values and underlying messages conveyed via television, newspapers, the internet, magazines, radio and film. Examines the accuracy of those messages and explores how media shape views of politics, culture and society.

Additional Information: Not applicable toward journalism major.

JOUR181 Grammar for Journalists (1 Credit)

The basic grammatical structures of standard American written English and its conventions of punctuation, diction and usage in journalistic writing.

Credit Only Granted for: ENGL181, ENGL281, or JOUR181.

JOUR199 Survey Apprenticeship (1 Credit)

College-monitored experience in approved mass-communications organizations and industries.

Prerequisite: Permission of JOUR-Philip Merrill College of Journalism.

Repeatable to: 6 credits if content differs.

Formerly: JOUR198.

JOUR200 Journalism History, Roles and Structures (3 Credits)

Introduction to the study of journalism from the standpoint of media history and sociology.

JOUR201 News Writing and Reporting I (3 Credits)

Introduction to news for the print and electronic media, development of new concepts: laboratory in news-gathering tools and writing skills.

Students who earned 80% or higher on the JOUR181 diagnostic are exempt from the JOUR181 prerequisite.

Prerequisite: Minimum grade of C- in ENGL101, JOUR181, and JOUR200; and permission of JOUR-Philip Merrill College of Journalism.

Restriction: For students intending to be journalism majors; and permission of JOUR-Philip Merrill College of Journalism.

JOUR202 News Editing (3 Credits)

Copy editing, fact checking, verification and research across media platforms, including social, with consideration of story play and placement, graphic principles, headlines and SEO.

Prerequisite: JOUR201.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR203 Introduction to Multimedia Skills (3 Credits)

Examining the basics of producing and editing digital photos, video, and audio. Topics include: framing, lighting, and other aspects of composition; sequencing, using wide, medium, and tight shots; and ethical considerations when collecting sound and visuals.

Prerequisite: JOUR201.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

Credit Only Granted for: JOUR203 or JOUR328G.

Formerly: JOUR328G.

JOUR267 Introduction to Social Media and Audience Engagement (3 Credits)

Provides students with an overview of how journalists use social media to gather information, tell stories and reach their target audience. Students will develop skills in social content creation, audience engagement and sourcing and verification.

Credit Only Granted for: JOUR268 or JOUR267.

Formerly: JOUR268.

JOUR281 Media Law and Ethics in the Digital Age (3 Credits)

What are our legal rights and ethical responsibilities as citizens of the digital world? That is the big question we will be exploring this semester. Along the way, you will learn the constitutional foundations of free speech and consider their present-day applications to information gathering and sharing by citizens through social media and online platforms. You will come away with a practical working knowledge of the First Amendment, public access laws, libel, privacy, copyright. You'll develop critical thinking skills for recognizing and dealing with common ethical issues in digital communication.

Credit Only Granted for: JOUR289E or JOUR281.

Formerly: JOUR289E.

Additional Information: This course is intended for non-journalism majors.

JOUR282 Beyond Facebook: How Social Media are Transforming Society, Culture, Business and Politics (3 Credits)

How has social media changed the world, and how has the world changed social media? This course explores how social media has influenced relationships, culture, industry, politics, and the information environment, as well as how significant global events and technological advancements have contributed to the evolution of social media. This course gives students a broad contextual understanding of social media that they may apply in their daily lives as well as future academic inquiry.

Credit Only Granted for: JOUR289F or JOUR282.

Formerly: JOUR289F.

JOUR283 Probing War: Investigative Narratives and American Conflicts (3 Credits)

What role should the American news media play when the United States is at war? Students will explore the realities of war through the work of journalists who pushed beyond the daily headlines, some risking life and limb, to challenge official versions and document uncomfortable realities about American conflicts.

Credit Only Granted for: JOUR283 or JOUR289J.

Formerly: JOUR289J.

JOUR284 Scandal: Exposing Corruption, Justice, and Vice in America (3 Credits)

What are the ingredients of a juicy scandal? Money? Sex? Power? How are scandals uncovered? Why does society punish some scoundrels but not others? Come explore both serious and salacious scandals with a professor who's an expert in both—and who once exposed many scandals himself when he was an investigative reporter. This class examines scandals in politics, science, religion, social media, business, government, sports, and higher education; feeding frenzies, tabloid scandal mongering, undercover reporting, apologies, and cancel culture. Learn why even trivial scandals matter—and how scandals reflect what we value and ultimately who we are.

Credit Only Granted for: JOUR289P, JOUR284 or HONR239J.

Formerly: JOUR289P, HONR239J.

JOUR289I Information 3.0: Exploring Technological Tools (3 Credits)

In a mobile social media world with unlimited amounts of digital information available on demand, what does the future hold for a population that spends hours on their devices seeking, selecting, and sharing more entertaining content than critical information about national and world issues? This course explores innovative ways for producing digital content and engaging diverse audiences with important topics, such as those related to every student's major. Students also utilize new metric tools to answer the question asking how today's digital audiences consume various forms of media and content.

JOUR300 Journalism Ethics (3 Credits)

Examination of ethical problems in news writing and reporting.

Prerequisite: JOUR201.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR320 News Writing and Reporting II: Multiplatform (3 Credits)

Principles and practices of news reporting; covering news beats and other news sources, including researching news stories for accuracy, comprehensiveness and interpretation. Due to rigorous publication requirement, plan your schedule accordingly.

Prerequisite: Must have completed or be concurrently enrolled in JOUR152; and minimum grade of C- in JOUR201; and must have completed or be concurrently enrolled in JOUR262 or JOUR370.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR325 Capital News Service Bureau (9 Credits)

Advanced journalism training. Students report as part of college's Capital News Service program.

Prerequisite: JOUR320; and permission of JOUR-Philip Merrill College of Journalism.

JOUR327 Urban Affairs Reporting (3 Credits)

Students are immersed in coverage of issues affecting cities, working on a semester-long multi-platform reporting project based in Baltimore.

Prerequisite: JOUR320; and permission of instructor. Jointly offered with JOUR627.

Credit Only Granted for: JOUR327 or JOUR627.

JOUR328 Special Topics in News Writing and Reporting (1-3 Credits)

Advanced training and practice in writing and reporting news.

Repeatable to: 6 credits if content differs.

JOUR334 Audio and Podcast Reporting (3 Credits)

Students will learn the tools needed to report and produce short- and long-form audio storytelling, including writing, reporting, interviewing, production, editing, hosting and delivery. Field reporting and audio gathering outside of class are required, along with writing and mixing broadcast-quality audio stories. Students will work together to produce a complete radio broadcast on deadline, with live and pre-recorded elements. Various interests in audio reporting are welcome and encouraged.

Prerequisite: JOUR360.

Formerly: JOUR368L.

JOUR343 Investigative Reporting (3 Credits)

Students will learn the essentials of accountability reporting while producing a publishable, in-depth project on an issue with national significance and impact on people's lives. Substantial fieldwork, teamwork and persistence are required.

Prerequisite: JOUR320; or must have completed or be concurrently enrolled in JOUR361. And permission of instructor.

Credit Only Granted for: JOUR328I or JOUR343.

Formerly: JOUR328I.

JOUR347 News Videography (3 Credits)

Introduction to shooting, editing and production of video stories for broadcast and the Web; includes newsgathering in the field.

Prerequisite: Must have completed or be concurrently enrolled in JOUR201.

Jointly offered with: JOUR603.

Restriction: Permission of JOUR-Philip Merrill College of Journalism.

Credit Only Granted for: JOUR262, JOUR347 or JOUR603.

Formerly: JOUR262.

JOUR352 Interactive Design and Development (3 Credits)

Conceptualize, wireframe, design and build responsive Web pages using HTML, style sheets and other coding tools; work with open source interactive tools, JavaScript libraries, multimedia and text to create charts, timelines, maps and other forms of nonfiction storytelling.

Prerequisite: JOUR152; and JOUR201; and must have completed or be concurrently enrolled in JOUR262 or JOUR370. Or permission of JOUR-Philip Merrill College of Journalism.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism. Jointly offered with JOUR652.

Credit Only Granted for: JOUR352 or JOUR652.

JOUR353 News Bureau: Multimedia Reporting (6 Credits)

Advanced reporting and writing in an online environment focusing on multimedia, non-traditional storytelling and investigative reporting.

Prerequisite: JOUR352; and permission of JOUR-Philip Merrill College of Journalism; and (JOUR320 or JOUR360).

JOUR355 News Bureau: Multimedia Editing and Production (6 Credits)

Advanced online journalism training. Students work as multimedia and social media editors and producers, building interactive content and special reports.

Prerequisite: JOUR320 or JOUR360; and JOUR352; and permission of JOUR-Philip Merrill College of Journalism.

JOUR357 Capital News Service Broadcast Immersion (6 Credits)

Advanced broadcast journalism training. Students report as part of the College's Capital News Service program.

Prerequisite: JOUR361; and permission of JOUR-Philip Merrill College of Journalism.

JOUR358 Special Topics in Visual Communication (3 Credits)

Advanced training and practice in visual communication.

Prerequisite: JOUR320 or JOUR360.

Repeatable to: 6 credits if content differs.

JOUR360 News Writing and Reporting II: Broadcast (3 Credits)

Writing and reporting for broadcast media: production of news stories.

Prerequisite: Minimum grade of C- in JOUR201.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR361 Television Reporting and Production (3 Credits)

Writing and editing for the broadcast media. Interpretive and documentary news stories.

Prerequisite: JOUR262 and JOUR360.

JOUR362 Broadcast News Producing (3 Credits)

Producing TV news.

Prerequisite: JOUR347 and JOUR360.

Jointly offered with: JOUR662.

Credit Only Granted for: JOUR362 or JOUR662.

JOUR364 Advanced Audio and Podcast Reporting (3 Credits)

Students will receive professional skills training in the reporting, writing, editing, voicing and production of radio news. Students will be required to do extensive field reporting, along with writing and mixing radio pieces. They will also participate in other aspects of radio news production, including editing, directing, live interviewing and hosting. By the end of the semester, students will have created all the elements of a complete radio broadcast. The class will also delve into the history and evolution of radio news and its future in podcasting and other forms.

Prerequisite: JOUR 334.

Jointly offered with: JOUR664.

JOUR367 Broadcast News Bureau (9 Credits)

Advanced broadcast journalism training. Students report as part of the college's Capital News Service program.

Prerequisite: JOUR361; and permission of JOUR-Philip Merrill College of Journalism.

JOUR368 Topics in Broadcast and Electronic Media (1-3 Credits)

Advanced research, analysis and/or practice of selected topics in broadcast journalism.

Repeatable to: 6 credits if content differs.

JOUR370 Photojournalism (3 Credits)

Examining the basics of shooting, editing and storytelling with still photos taken with 35mm digital cameras. Students shoot portraits, feature photos and action shots. Final project is a photo story/essay.

Prerequisite: Must have completed or be concurrently enrolled in JOUR201.

Restriction: Permission of JOUR-Philip Merrill College of Journalism.

Credit Only Granted for: JOUR370 or JOUR670.

Additional Information: Students are required to borrow, rent or purchase a 35mm digital camera. Contact department for camera specifications.

JOUR371 Feature Writing (3 Credits)

Research and writing feature articles.

Prerequisite: JOUR320.

JOUR382 Sports Reporting and Writing (3 Credits)

Gives students full and wide-ranging instruction in all aspects of sports reporting and writing, including how to report, write, edit and lay out sports stories, incorporating photography and multimedia. We will also discuss ethics, objectivity, fairness and the future of sports journalism.

Prerequisite: JOUR320; and permission of JOUR-Philip Merrill College of Journalism.

Jointly offered with: JOUR682.

Credit Only Granted for: JOUR382 or JOUR682.

JOUR383 Advanced Photojournalism (3 Credits)

Provides a deeper dive into the storytelling medium of photojournalism. Students will learn the skills necessary to tell in-depth, long-term stories through the use of still photography. Topics of discussion will include the history of photojournalism, changing approaches to the photo story/essay, how to approach a variety of potential subjects and situations, finding long-term photo story projects and organizing images for a variety of digital and traditional formats.

Prerequisite: JOUR370.

Restriction: Permission of Philip Merrill College of Journalism.

Credit Only Granted for: JOUR368N or JOUR383 .

Formerly: JOUR368N.

JOUR384 Social Media Content Creation, Audience Engagement and Analytics (3 Credits)

Provides students with an overview of social media best practices for journalists and will work to develop their skills in social content creation, audience engagement, sourcing and verification and analytics. By the end of this course, students will have the practical skills needed to manage a social media account for themselves or to contribute to the management of a news organization's social media presence.

Prerequisite: JOUR320 or JOUR360.

Jointly offered with: JOUR657.

Credit Only Granted for: JOUR368D or JOUR384 .

Formerly: JOUR368D.

JOUR389 News Coverage of Special Topics (1-3 Credits)

Advanced training and practice in writing and reporting news in one specialized field of interest.

Repeatable to: 6 credits.

JOUR396 Supervised Internship (2 Credits)

Students will complete a minimum of 90 hours in a supervised journalism internship over a minimum of 10 weeks in spring and fall, and eight weeks in summer. Emphasis is on relating academic training to professional experience. To enroll, students must do the following: Fill out the internship proposal form, have their internship supervisor fill it out, and meet with the college's internship director to receive permission to register. No requests to register after the Schedule Adjustment Period will be granted.

Prerequisite: Must have earned a grade of C- or better in JOUR201.

Restriction: Must be a major in the JOUR-Philip Merrill College of Journalism.

Credit Only Granted for: JOUR326, JOUR366, or JOUR396.

JOUR398 Independent Study (1-3 Credits)

Individual projects in journalism.

Repeatable to: 3 credits.

JOUR399 Supervised Internship (1 Credit)

Supervised news internship experience; relation of academic training to professional experience.

Prerequisite: Minimum grade of C- in JOUR320 and JOUR360.

Repeatable to: 3 credits if content differs.

Credit Only Granted for: JOUR326, JOUR366, JOUR396, or JOUR399.

JOUR400 Media Law (3 Credits)

Legal rights and constraints of mass media; libel, privacy, copyright, monopoly, contempt, and other aspects of the law applied to mass communication. Previous study of the law not required.

Prerequisite: JOUR320, JOUR360, or JOUR501.

Restriction: Junior standing or higher.

JOUR402 Journalism Law and Ethics (3 Credits)

An examination of the legal rights and ethical problems and constraints of mass media, including libel, privacy, copyright, monopoly and contempt.

Prerequisite: JOUR201.

Credit Only Granted for: JOUR402 OR JOUR400 and JOUR300.

JOUR405 Breaking News With Numbers: Statistics for Journalists (3 Credits)

Common statistical tools, software and data visualization techniques will be used to allow students to analyze data and solve problems relevant to reporting and writing about politics, sports, criminal justice, business and other fields.

Prerequisite: Minimum grade of C- in JOUR201; and (MATH107 or MATH110; or must have completed a higher level math course).

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism.

JOUR434 Salzburg Seminar: Global Media Literacy (3 Credits)

An advanced analysis of the information, values underlying messages conveyed via television, newspapers, the Internet, magazines, radio and film from a cross-cultural perspective. Examines the accuracy of messages and explores how distinctive global media shape views of politics culture and society with nations, across regions and internationally.

Restriction: Must be in Salzburg Academy program. Jointly offered with JOUR734.

Credit Only Granted for: JOUR434 or JOUR734.

JOUR435 Salzburg Seminar: Global Change, Global Cooperation (3 Credits)

Practical and theoretical examination of a global problem (or problems) of contemporary importance from a cross-cultural, perspective. Analytical framework used to examine how media shape global problems, events and/or issues regionally.

Restriction: Must be in Salzburg Academy program. Jointly offered with JOUR735.

Credit Only Granted for: JOUR435 or JOUR735.

JOUR443 Sports, Society, Culture and the Media (3 Credits)

Designed to explore how sports, society, culture and the media critically relate to each other and the vast audiences of fans and interested parties. Students will study how journalists impact change; how sports shape culture; and how sports are seen throughout the world. College sports, children and sports, the business of sports, the history of sports media and the future of sports in society will be studied as well.

Restriction: Junior standing or higher.

Credit Only Granted for: JOUR459G or JOUR443.

Formerly: JOUR459G.

JOUR447 Sports, Protest and the Media (3 Credits)

Addresses why activists, whether athletes or not, have long commanded ceremonial and ritualistic games to promote a cause or take a stand. It examines the important role of media as collectors, editors, interpreters and disseminators of information or news about athletic competitions, athletes and political pronouncements revolving around athletic events and their participants.

Credit Only Granted for: JOUR447 or JOUR458M.

Formerly: JOUR458M.

JOUR451 Advertising and Society (3 Credits)

Advertising as an institution with manifest economic purposes and latent social effects. Influences of advertising on people, and related issues of ethics and social responsibility.

Restriction: Junior standing or higher.

JOUR452 Women in the Media (3 Credits)

Participation and portrayal of women in the mass media from colonial to contemporary times.

Cross-listed with: WGSS452.

Credit Only Granted for: JOUR452, WMST452 or WGSS452.

Formerly: WMST 452.

JOUR453 Media Coverage of Diversity (3 Credits)

Analysis of media coverage of issues relating to diversity in the United States, with special attention to race, ethnicity, class, gender, sexual orientation and religious affiliation.

Restriction: Junior standing or higher.

JOUR455 Media Entrepreneurship (3 Credits)

Basic business and entrepreneurship concepts will be covered and will explore how technology is transforming the business of media. Students develop and pitch ideas for media businesses, learn startup basics, do exercises in Internet advertising and business plan analysis, use social networks and other digital communication tools, and perform other hands-on exercises in business development and presentation.

JOUR456 Literature in Journalism (3 Credits)

From Truman Capote's *In Cold Blood* to Mark Bowden's *Black Hawk Down*, students will examine how literary works can help writers approach a subject in a different way than more traditional forms of journalism, including the advantages and limitations of the style.

Credit Only Granted for: JOUR456 or JOUR673.

JOUR458 Special Topics in Journalism (3 Credits)

Issues of special concerns and current interest.

Repeatable to: 6 credits if content differs.

JOUR459 Special Topics in Journalism (1-3 Credits)

Issues of special concern and current interest. Open to all students.

Repeatable to: 6 credits if content differs.

JOUR471 Follow the Money: Reporting on Business (3 Credits)

Business and economics reporting is one of the strongest sectors of journalism with lucrative employment opportunities. This class, designed for journalism and non-journalism majors, introduces students to the main economic and business themes that dominate news coverage.

Topics will include: corporate money and power in Washington, the ups and downs of the stock market, rising income inequality, the immigration crisis, why we have a trade war with China and technology disruptors. This class will be helpful to students who want to enhance their career opportunities by understanding how the economy works, why globalization is important and how the biggest corporations—including technology companies—have such a big influence on the way we live.

Prerequisite: Must have completed a university statistics course.

Restriction: By permission of the College of Journalism.

Credit Only Granted for: JOUR479C or JOUR471.

Formerly: JOUR479C.

JOUR472 Data Journalism (3 Credits)

A practical, skills-based course in the basics of modern data journalism, data literacy and data storytelling. Students will learn to use data visualization, data analysis and other data-driven reporting techniques.

Prerequisite: JOUR320 or JOUR360.

Jointly offered with: JOUR772.

Credit Only Granted for: JOUR472 or JOUR772.

JOUR473 Computational Journalism (3 Credits)

Designed to teach the application of computational methods in journalism and reporting. The methods include natural language processing, visualization, and web data mining. The course will also cover the necessity and impact of journalistic ethics in designing computation solutions.

Prerequisite: Permission of the Philip Merrill College of Journalism.

Cross-listed with: INST403.

Jointly offered with: JOUR773.

Credit Only Granted for: JOUR479V, JOUR473, INST408I or INST403.

Formerly: JOUR479V and INST408I.

JOUR475 Understanding Audiences and Analytics (3 Credits)

As journalism evolves, it may be more important than ever to understand what were once simply called "audiences" – who they are, how they consume news, and what that engagement means for them and for society. Students will learn to think critically about news audiences and contemporary issues in audience research.

Prerequisite: Student must have completed a university statistics course.

Credit Only Granted for: JOUR4790 or JOUR475.

Formerly: JOUR4790.

JOUR476 Researching Emerging Media in Journalism: Past, Present and Future (3 Credits)

Students will examine developments billed as innovative in the current technology-laden news ecology – such as social media, mobile reporting and virtual reality – and the blurring of lines between hard news, informed opinion and advocacy. While questions about the future cannot be answered with any certainty, an exploration of the past allows us to see what happened when new technologies, information systems and practices appeared as possible tools for use by journalists and the communities they served. Students will learn to use resources for researching emerging media, including UMD library databases and open access sources. The course will include presentations by the instructor, discussions, field trips, in-class exercises and student presentations. Each student will engage in a research project to understand the experience of emerging media in a decade between 1820 and 1980. Students will also write an essay contemplating current trends and the future of emerging media.

Prerequisite: Must have completed a university statistics course.

JOUR479 Special Topics in Data Gathering and Analysis (1-3 Credits)

Special research topics for reporting and writing.

Repeatable to: 3 credits.

JOUR480 Capstone Colloquium: The Business of News (1 Credit)

Students will learn the basic news business concepts and examine how revenue and cost structures for media businesses are evolving in new directions. Topics include basic principles and concepts that drive media businesses in the Internet age, including revenue sources, dynamics of online advertising and subscriptions, mobile media strategies, user metrics, engaging audiences, and market dynamics.

Restriction: Must be in a major in JOUR-Philip Merrill College of Journalism; and junior standing or higher; and permission of JOUR-Philip Merrill College of Journalism.

JWST - Jewish Studies

JWST141 American Jewish Experience (3 Credits)

History of the Jews in America from Colonial times to the present.

Emphasis on the waves of migration from Germany and Eastern Europe; the changing nature of the American Jewish community and its participation in American social, economic, and political life.

Cross-listed with: HIST106.

Credit Only Granted for: HIST106 or JWST141.

JWST171 Is Judaism a Religion? (3 Credits)

Jewish identity can be framed in terms of ethnicity, culture, and religious practice, but also in terms of more contemporary social constructions including social action, political engagement, and intellectual pursuit.

In the context of such diverse social and individual frames, what does it mean to identify Judaism as a religion? Attention to Jewish society in historical and global perspective will provide a backdrop for a particular focus on contemporary Jews in the United States and Israel.

Cross-listed with: RELS171.

Credit Only Granted for: JWST171 or RELS171.

JWST187 God, Land, Power, and the People: Moral Issues in the Jewish Historical Experience (3 Credits)

Examines the complicated relationship between theology, nationalism, sovereignty, and the ethical exercise of social control using case studies drawn from the Jewish historical experience. The universal and age-old issues implicit in the exercise of power have gained special moral force for Jews with the creation of the State of Israel, a Jewish and a democratic state with substantial non-Jewish minorities and hundreds of thousands of non-citizen subjects. Can these be reconciled? Jewish efforts over the ages and in recent times to define justice provide concrete examples through which to examine and discuss crucial abstract principles.

Cross-listed with: HIST187, ISRL187.

Credit Only Granted for: HIST187, JWST187 or ISRL187.

JWST219 Special Topics in Jewish Studies (3 Credits)

Repeatable to: 9 credits if content differs.

JWST225 Religions of the Ancient Near East (3 Credits)

Introduction to ancient Near Eastern religious systems and mythology, from the third millennium BCE through the fourth century BCE. Particular emphasis on Mesopotamia and ancient Israel.

Cross-listed with: RELS225, HIST219I.

Credit Only Granted for: JWST225, HIST219I, RELS225, or RELS219A.

Formerly: RELS219A.

JWST230 Inventing Traditions: The Making of Rabbinic Judaism (3 Credits)

Introduces the dramatic literary and cultural (as well as political and demographic) innovations that reshaped Judaism in late antiquity. Examines the fundamental works and genres of rabbinic literature and the religious movement that produced them. Special emphasis on the rabbinic uses of "tradition" to enhance authority and legitimacy, and to foster group identity.

Cross-listed with: HIST281, RELS230.

Credit Only Granted for: HIST281, JWST230, RELS219C or RELS230.

Formerly: RELS219C.

JWST231 Jewish Texts and Cultures of the Second Temple Period (3 Credits)

An introduction to the literature, history, and culture of Jews in the period between the sixth century BCE and the second century CE. Special topics may include the rise of the formation of the biblical canon, scriptural interpretation, sectarian and revolutionary movements, and growth of the diaspora.

Cross-listed with: HIST291.

Credit Only Granted for: HIST291 or JWST231.

JWST233 Why the Jews? Historical and Cultural Investigations (3 Credits)

Examines the history and culture of the Jews from the thirteenth century BCE/BC to the present through an examination of significant themes or problems (such as "religion" or "diaspora") that shape our understanding of the Jewish people. A primary focus in the course will be on texts, artifacts, and other cultural products by Jews and others that illustrate the history of the Jews help understand their cultural heritage.

Restriction: Must not have completed HIST282, HIST283, JWST234, or JWST235. Cross-listed with HIST287.

Credit Only Granted for: JWST233 or HIST287.

JWST235 History of the Jewish People II (3 Credits)

Political, economic, social and cultural development within Jewish history from the end of the Middle Ages to the present. Special attention to the twentieth century developments including the Nazi Holocaust and its aftermath, the Zionist movement and the creation of the State of Israel, and the rise of the contemporary American-Jewish community.

Credit Only Granted for: HIST283, HIST283H, JWST235, or JWST235H.

JWST250 Fundamental Concepts of Judaism (3 Credits)

A conceptual introduction to Judaism, analyzing its fundamental concepts from both analytical and historical perspectives. Discussion of "normative" Judaism as well as other conceptions of Judaism. Topics include: God, the Jewish people, authority, ethics, the sacred and the profane, particularism and universalism.

Cross-listed with: PHIL234, RELS250.

Credit Only Granted for: JWST250, PHIL234, or RELS250.

JWST256 Zionism and Sexual Revolution (3 Credits)

A study of the changes within European Jewish communities that influenced the development of particular fantasies about and representations of gender, love, and sex in Palestine and Israel. We will investigate the broader intellectual and cultural contexts needed to understand the gender and sexual revolutions of the 19th and 20th centuries, and will examine how European and, later, Israeli Jews adopted and adapted these ideas and cultural forms. We will closely analyze a variety of texts (stories, plays, photographs, and films) and will consider the relationship between ideology and aesthetics.

Cross-listed with: ISRL256.

Credit Only Granted for: ISRL249N, JWST219G, ISRL256, or JWST256.

Formerly: ISRL249N or JWST219G.

JWST262 Introduction to the Hebrew Bible/Old Testament (3 Credits)

Origins of the Hebrew Bible (Old Testament), with attention to literary formations, archaeology, and social-political settings. Explorations of major questions, including who wrote the Bible, and when; relationships of the biblical tradition to the mythology and religious structures of ancient Israel's near eastern neighbors; and dynamics of politics, religious leadership, and law.

Cross-listed with: ENGL262, HEBR298B.

Credit Only Granted for: JWST262, HEBR298B, or ENGL262.

JWST269 Special Topics in Study Abroad II (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

JWST272 Diversify and Multiply: Jewish Culture and the Production of an Identity (3 Credits)

Provides students with a unique exploration of cultural products produced by a diverse array of Jewish creators of literature, comedy and film. The texts, films, and performing arts touch on the central social, economic, and cultural issues of Jews during the ages, and up to the 21st century. This course will explore Jewish creativity throughout history, as well as the Jewish encounter with modernity as a whole. We will be diving into prominent creators such as Tiffany Haddish, Larry David, Sholem Aleichem, Adam Sandler, S. Y. Abramovitsch, Judd Apatow, Philip Roth, Amy Schumer, I. B. Singer, Ben Stiller, Franz Kafka, Dan Levy, and others. Examining their creations will open a window to the diverse methods of construction of modern Jewish identities.

Cross-listed with: CMLT242.

Credit Only Granted for: JWST272, CMLT242, or ISRL249G.

JWST274 Jerusalem in Antiquity: The History of Sacred Space in a Holy City (3 Credits)

Examines the complex history of Jerusalem's status as a holy city, with a focus on constructions of sacred space in Judaism, Christianity, and Islam.

Cross-listed with: RELS274.

Credit Only Granted for: JWST274, RELS274, JWST289J or RELS289J.

Formerly: JWST289J, RELS289J.

JWST275 Urban Dreams and Nightmares: The Jewish Experience of Cities (3 Credits)

Cities give expression to man's power while they highlight human limitations. It is urban social diversity that makes great wealth and thriving culture possible, but it also fixes discrimination behind walls constructed from paper and stone. Nations make cities symbols of the sacred and the glorious, while they ignore the poverty and social alienation that city life breeds. Jews, intensively urbanized for millennia, provide a special vantage point from which to study the beauty and the tragedy implicit in city-building. Our sources will include the Bible, poems, plays and novels but also US Supreme Court rulings and news of riots in Israel. We will survey how Jews have shaped, and been shaped by, the urban challenge over time and space.

Cross-listed with: HIST286.

Credit Only Granted for: HIST286 or JWST275.

JWST281 Yiddish I (3 Credits)

Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.

Cross-listed with: GERS141.

Credit Only Granted for: JWST281, GERM148Y or GERS141.

JWST282 Yiddish II (3 Credits)

Introduction to the Yiddish language, with emphasis on speaking, reading, and writing skills. Students will also learn the history of the language, its significance to Jewish culture, its origins and basic structure.

Prerequisite: JWST281; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Cross-listed with: GERS142.

Credit Only Granted for: GERM149Z, GERS142 or JWST282.

JWST285 Jewish Languages in America (3 Credits)

With a particular focus on language minority intra-group relationships – the convergences, divergences, feelings of solidarity and tensions of difference within the group–this course will examine the history, current functional use and identity implications of Jewish languages in the United States.

Cross-listed with: HEBR298O.

Credit Only Granted for: JWST285, JWST219O or HEBR298O.

Formerly: JWST219O.

JWST289 New Explorations in Jewish Studies (3 Credits)

Investigation of critical and innovative responses in Jewish Studies. Although the topic will vary, the course will encourage intellectual exploration by students of fundamental problems and critical methods.

JWST289E Civil Discourse or Urban Riot: Why Cities Don't (Often) Explode (3 Credits)

An examination of the mechanisms that promote peaceful co-existence in urban societies and a discussion of how and why city streets sometimes become violent.

Cross-listed with: HIST135.

Credit Only Granted for: HIST135 or JWST289E.

JWST290 Can Jews be Arabs? Identity and Crisis for the Jews of Arab Lands in Modern Times (3 Credits)

For centuries, Jews inhabited the Islamic lands of the Middle East and North Africa. Their population has dropped from nearly one million a century ago to several tens of thousands today, mostly in Turkey and Iran. The vibrant and ancient Jewish communities of Iraq, Egypt, Syria, Morocco, Algeria, Libya, and several other countries were practically gone by 1970. One popular explanation for this exodus is that an "age-old schism between Jews and Muslims," in the words of the prominent historian Martin Gilbert, drove Jewish men and women to leave their historic homelands in the years following the first Arab-Israeli war of 1948. However, recent research into these communities offers a more complex picture of their lives in Islamic lands in the 19th and 20th centuries and subsequent departure.

Cross-listed with: HIST290.

Credit Only Granted for: JWST289A, HIST219C or HIST290.

JWST298 Elementary/Introductory Language Module for Jewish Studies (1-3 Credits)

A supplementary language module for students enrolled in designated Jewish Studies classes. Language of instruction English, texts in original language.

Prerequisite: HEBR212 or JWST282; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 9 credits if content differs.

JWST299 Independent Study in Jewish Studies (1-3 Credits)

This lower-level independent study allows students in to work closely with a Jewish Studies faculty member of their choice, pending the prior approval of the faculty member. In this independent study, students will focus on a topic specific to Jewish Studies.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 6 credits if content differs.

JWST304 Critical Approaches to Israeli Culture (3 Credits)

An examination of the intersections of literature, society, philosophy, and politics in the making of modern Israeli culture. Special attention will be paid to the Zionist emphasis on making "new" Jews and its implications when expressed in literature and society.

Formerly: JWST419B and JWST419K.

JWST314 Pedagogy and Instruction in the Hebrew Classroom (3 Credits)

An exploration of applied linguistic theory and issues in Hebrew teaching to current and future Hebrew and Judaic studies teachers. First and second language acquisition theories, past and present language teaching methodologies, effective approaches to teaching and testing in the four skill areas (listening, speaking, reading, and writing), as well as knowledge of the role of identity, context, and affective factors in Hebrew language learning. Taught in English.

Credit Only Granted for: JWST314, JWST419F, or JWST429C.

Formerly: JWST419F and JWST429C.

JWST315 Culture and Identity in Jewish and Hebrew Education (3 Credits)

An in-depth examination of heterogeneous natures of various language learning settings. Social and psychological theories of second language and identity acquisition, anomie and language/identity attrition, and conflicts of class, religion, ethnicity, and power relations that affect Jewish and Hebrew education. Taught in English.

Credit Only Granted for: JWST429P or JWST315.

Formerly: JWST429P.

JWST319 Special Topics in Jewish Studies (1-6 Credits)

Topics in Jewish Studies.

Repeatable to: 12 credits if content differs.

JWST319D Mizrahi Identity in Israel (3 Credits)

It is impossible to understand Israeli society today without examining the Mizrahi experience. Despite the common misconception that Israel is predominantly made up of Jews from European origin, the fact of the matter is that Jews of Mizrahi origin, whose parents and grandparents immigrated to Israel from the Middle East and North Africa, represent a major part of the Israeli population. Moreover, Ashkenazi-Mizrahi relations continue to be a major source of tension in Israeli politics, and issues of race continue to come up on social media and polarize the Israeli society. This course brings to light narratives of Mizrahi identity in Israel and explores the trajectory of the Mizrahi struggle for equality and against racism through its various milestones: the 1959 Wadi Salib Revolt, the Black Panthers Movement in the 1970s, the emergence of the Israeli Sephardi-Orthodox party Shas, and the new wave of Mizrahi activism in the 21st century.

Cross-listed with: ISRL330, HIST377.

Credit Only Granted for: JWST319D, HIST377, HIST329Z, ISRL329M, or ISRL330.

Formerly: ISRL329M.

JWST319P Arts & Humanities in Social Innovation, Change, and Justice: Do Good Now (3 Credits)

The course serves as the core course for the Arts-and-Humanities track in PLCY's minor in "Nonprofit Leadership and Social Innovation." Students will be introduced to the role that the Arts and Humanities can play in social innovation and social change, while exploring various mechanisms for achieving impact with a focus on advancing social justice, equity and systems change. This course deepens understandings of nonprofit leadership, entrepreneurship and social innovation by guiding students through the creation and implementation of social change projects and ventures of their choice.

Cross-listed with: ARHU380.

Credit Only Granted for: ARHU380, BSOS388B, JWST319P, or PLCY388D.

JWST319Y Archaeological Methods and Practice (3 Credits)

A team-taught, interdisciplinary course discussing theories, methods, and ethical issues in the practice of archaeology.

Prerequisite: ANTH240, ARTH200, CLAS180, or CLAS190.

Cross-listed with: ANTH305, ARTH305, CLAS305.

Credit Only Granted for: ANTH305, ARTH305, CLAS305, or JWST319Y.

JWST324 Archaeology and the Quest for Ancient Israel (3 Credits)

The Hebrew Bible/Old Testament tells the story of "Biblical Israel" in ways that overlap with but are not identical to the evidence for "ancient Israel" provided by archaeological sources. Close attention to archaeology and inscriptional evidence allows for an understanding of biblical literature in light of its ancient Near Eastern context. Primary focus is on the Iron Age (ca. 1200-540 BCE), whose archaeology and inscriptions will be explored alongside biblical texts set during the this period but often written much later. Class discussion will address modern controversies regarding ancient Israel, including questions of origins (what does proto-Israelite mean?), problems of historiography (minimalist vs. maximalist), and archaeological dating (low chronology vs. high chronology).

Cross-listed with: HIST321.

Credit Only Granted for: HIST321 or JWST324.

JWST325 Jews and Judaism in Antiquity I: Sixth Century BCE through the First Century CE (3 Credits)

Political, social, and religious history of the Jews from the Persian period to the Judean revolt of 66-70 CE. Special attention to the rise of sectarian and revolutionary movements.

Cross-listed with: HIST370.

Credit Only Granted for: HIST370 or JWST325.

JWST326 Jews and Judaism in Antiquity II: First through Seventh Century (3 Credits)

Political, social, and religious history of the Jews from the destruction of the Jerusalem Temple in 70 CE to the Muslim conquests. Special attention to the political transformations in Judaism under late Roman Christianity, and the rise of the Rabbinic movement.

Recommended: HIST370.

Cross-listed with: HIST371.

Credit Only Granted for: HIST371 or JWST326.

JWST331 Early Christianity: Jesus to Constantine (3 Credits)

Social and religious history of early Christianity from its origin in the first century to the reign of Constantine.

Cross-listed with: HIST320.

Credit Only Granted for: HIST320 or JWST331.

JWST332 The Israeli Settler Movement: The Road to One State? (3 Credits)

Explores the Israeli settler movement over the last four decades, from its position on the fringes of Israeli society in the 1970s and 1980s to its rise to prominence in Israeli politics today. Topics will include the history of the Israeli settlement project in the West Bank, the emergence of Gush Emunim and its ideological foundations in Jewish messianism, its violent offshoots, and the influence of the settler movement on the Israeli political system. Study of these topics illuminates some of the most important driving forces of modern history such as nationalism, religious fundamentalism, colonialism and the ability of a determined minority to influence a country's policies.

Cross-listed with: HIST381, ISRL344.

Credit Only Granted for: HIST329G, HIST381, ISRL329G, ISRL344, JWST332 or JWST319N.

Formerly: JWST319N.

JWST333 Martyrs & Merchants, Lawyers & Mystics, Magicians & Messiahs: Jews Between Medieval and Modern Times (3 Credits)

In an era marked by traumatic expulsions, inquisitorial barbarism, and enforced ghettoization, Jews reinvented themselves. Through their international networks of trade, Jews learned how to negotiate with kings and to govern new, large urban communities in new lands. They took advantage of the printing press to reorganize their literary traditions of law, biblical studies and mysticism, and created new hierarchies of religious status. And they flocked to hear new kinds of enthusiast preachers, celebrating the man they saw as the messiah finally come. We will together explore the contradictory forces that ultimately gave birth to the modern Jew.

Recommended: HIST287 or JWST233; HIST 332; .

Cross-listed with: HIST373.

Credit Only Granted for: JWST333 or HIST373.

JWST334 Mizrahi Identity in Israel (3 Credits)

It is impossible to understand Israeli society today without examining the Mizrahi experience. Despite the common misconception that Israel is predominantly made up of Jews from European origin, the fact of the matter is that Jews of Mizrahi origin, whose parents and grandparents immigrated to Israel from the Middle East and North Africa, represent a major part of the Israeli population. Moreover, Ashkenazi-Mizrahi relations continue to be a major source of tension in Israeli politics, and issues of race continue to come up on social media and polarize the Israeli society. This course brings to light narratives of Mizrahi identity in Israel and explores the trajectory of the Mizrahi struggle for equality and against racism through its various milestones: the 1959 Wadi Salib Revolt, the Black Panthers Movement in the 1970s, the emergence of the Israeli Sephardi-Orthodox party Shas, and the new wave of Mizrahi activism in the 21st century.

Cross-listed with: ISRL330, HIST377.

Credit Only Granted for: JWST319D, JWST334, HIST377, HIST329Z, ISRL329M, or ISRL330.

Formerly: ISRL329M.

JWST341 American Jewish Literature (3 Credits)

An exploration of the role played by literature in the development of American Jewish ethnic identity. Primary materials include essays, poetry, plays, short stories, novels, films and music. Cross-listed with ENGL331.

Credit Only Granted for: ENGL331 or JWST341.

JWST344 Modern Jewish History II: World Jewry Since 1870 (3 Credits)

Social, political, economic, and cultural change in the Jewish world since 1870. Emphasis on emancipation, assimilation, and new forms of Jewish identity in Western and Eastern European Jewry from the 19th Century to the present. Cross-listed with HIST375.

Credit Only Granted for: HIST375 or JWST344.

JWST345 The Holocaust of European Jewry (3 Credits)

Roots of Nazi Jewish policy in the 1930's and during World War II: the process of destruction and the implementation of the "final solution of the Jewish problem" in Europe, and the responses made by the Jews to their concentration and annihilation.

Cross-listed with: HIST307.

Credit Only Granted for: HIST307 or JWST345.

JWST346 Representing the Holocaust (3 Credits)

Different perspectives on how the Holocaust should be represented. Examination of a wide range of texts including fiction, memoirs, critical essays, poems and films in different languages (in translation). Emphasis on the international and comparative nature of Holocaust literary studies and investigation into the propriety of literary representation of historical catastrophe. Consideration of our own role as readers serving as witnesses to an event that has marked itself indelibly in the aesthetic history of the twentieth century.

Credit Only Granted for: ENGL379J, JWST419I, ENGL332, or JWST346.

Formerly: ENGL379J and JWST419I.

JWST347 Tradition and Change: Jewish Religion in the Modern World (3 Credits)

An exploration of the history of the different modern Jewish religious movements that developed in Europe, starting with messianic movements and ending with Reform and Orthodoxy. Emphasis will be placed on the influence of the academic study of Judaism on the development of modern Jewish religious ideologies and practices.

Cross-listed with: HIST429X, RELS347.

Credit Only Granted for: RELS347, JWST347, HIST429X, or RELS419R.

Formerly: RELS419R.

JWST369 Special Topics in Study Abroad III (1-6 Credits)

Special topics course taken as part of an approved study abroad program.

Repeatable to: 15 credits if content differs.

JWST370 Before the Holocaust: The Golden Age of Eastern European Jewry (3 Credits)

An exploration of the history of the Jews of Eastern Europe from the period of the Polish Lithuanian Commonwealth until the Holocaust. Topics to be covered include religious, political, social, and cultural transformation of Jewish life in Eastern Europe in the context of the general political changes in the area.

Cross-listed with: HIST419Q.

Credit Only Granted for: JWST419E, JWST370, or HIST419Q.

Formerly: JWST419E.

JWST372 Jewry of Muscle: Zionism and Jewish Masculinity (3 Credits)

Part of the Zionist cultural project involved creating a new Jewish masculinity that would replace the diasporic "sissy Jew" with a strong, healthy new "Jewry of Muscle." Using literary and cinematic sources, we will analyze how these Zionist and Israeli cultural productions served to build (and sometimes undermine) this new model of Jewish masculinity.

Cross-listed with: ISRL372.

Credit Only Granted for: JWST319K, ISRL329K, JWST372 or ISRL372.

Formerly: JWST319K or ISRL329K.

JWST373 Sexuality in Jewish Literature and Culture (3 Credits)

Provides students with a unique exploration of texts and films created by various Jewish authors and filmmakers, and the way they dealt with questions of gender and sexuality. The texts and films touch on the central social, economic, and cultural issues of European, American, and Israeli Jewry during the middle ages, and up to the 19th, 20th and 21st centuries. It will explore how the categories of gender and sexuality changed and were represented in rich and contrasting ways according to the authors' social norms and ideological convictions. Focusing on sexuality and gender in Jewish culture can help us better understand Jewish social norms, creativity, and history, in particular modern Jewish literatures, visual medias, and the Jewish encounter with modernity as a whole. We will be reading prominent writers and filmmakers such as Sholem Aleichem, Philip Roth, S. Y., Jill Soloway, Abramovitch, Todd Solondz, Celia Dropkin, I. B. Singer, Sholem Ash, Boaz Davidson, Judd Apatow, Tseruyah Shalev, and others. This is a discussion-based course; however, it also emphasizes developing the skills of analytical and abstract thinking and critical writing about texts and other cultural productions. This course does not require proficiency of any foreign language or any specific historical knowledge.

Credit Only Granted for: JWST319L or JWST373.

Formerly: JWST319L.

JWST375 Jews and Representations of Race (3 Credits)

Attention to the evolution of Western concepts of "race" from late medieval to modern times requires addressing the meaning of the term "race." How did constructions of Jewish "racial" identities fit into this broader discussion? As Christian Europe's primary minority for centuries, "the Jews" provide evidence for constructions of race as a means of grouping populations culturally and materially. How did Jews interact with the racial discourse of diverse time periods, and how did they negotiate their political realities by both adopting and challenging aspects of the rhetoric of antisemitism as well as the rhetoric of "whiteness" versus "blackness"?

Cross-listed with: ISRL375.

Credit Only Granted for: ISRL375, JWST375, ISRL349Z, or JWST319M.

Formerly: ISRL349Z or JWST319M.

JWST386 Experiential Learning in Jewish Studies (3 Credits)

The Jewish Studies Program's internship program. Pre-professional experience in research, analysis, and writing related to Jewish Studies in a variety of work settings.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Restriction: Junior standing or higher.

JWST408 Honors Seminar in Jewish Studies (3 Credits)

An in-depth exploration of a theme in Jewish history, literature, culture or thought. Course subject and readings will vary from year to year, but will generally cut across periods, locations, or disciplines. Students are expected to engage the course material critically and to use the seminar as an opportunity to develop an independent research agenda.

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Restriction: Junior standing or higher.

JWST409 Research Seminar in Jewish Studies (3-4 Credits)

A capstone course for Jewish Studies. Guides students through advanced source material and subject matter, research skills, and presentation techniques. A substantive paper based on independent research and analysis is one expected outcome.

Prerequisite: Must have completed two upper-level courses in an appropriate area of Jewish Studies; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 9 credits if content differs.

Formerly: JWST309.

JWST418 Honors Thesis Research in Jewish Studies (3-6 Credits)

Guided research on a thesis under the supervision of the Jewish Studies faculty.

Repeatable to: 6 credits if content differs.

JWST419 Special Topics in Jewish Studies (3 Credits)

Repeatable to: 9 credits if content differs.

JWST427 The Epic of Gilgamesh (3 Credits)

One of the most famous tales from the ancient world, the Epic of Gilgamesh inspires readers with tales of friendship and loss, mortality, and the search for meaning. The story itself grew and changed over time and took on new meanings. Through study of the epic, its development over time, and the sources it drew from, this class will examine the meaning of the Gilgamesh epic and its impact on ancient Mesopotamian culture.

Prerequisite: JWST225, RELS225, HIST219, or permission of the instructor.

Recommended: JWST262, ENGL262, or HEBR298B.

Cross-listed with: RELS427.

Credit Only Granted for: JWST419G, RELS419G, RELS427 or JWST427.

Formerly: JWST419G.

JWST429 Advanced Topics in Jewish Studies (3-4 Credits)

Special topics at an advanced level for Jewish Studies. Primarily intended for majors and graduate students.

Repeatable to: 12 credits if content differs.

JWST430 Dead Sea Scrolls (3 Credits)

A study of the Dead Sea Scrolls in their ancient and modern settings, and in terms of contemporary scholarly interpretations of their meaning. Interpretations of the historical significance of these documents, their connections to ancient Jewish sectarian movements, and their implications for our understanding of Judaism, Christianity, and the history of the Bible.

Prerequisite: Must have completed one JWST course or one RELS course; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies. Cross-listed with RELS430.

Credit Only Granted for: JWST430 or RELS430.

JWST432 Jews in Medieval Times 1000-1450 (3 Credits)

Social and cultural life of Jewish communities spread throughout Islam and Christendom. Major topics include the Gaonate, kehila organizations, legal, rationalist, and mystical thought, and the context of rising animosity against Jews linked to the Crusades and changing Church doctrines.

Recommended: HIST282, HIST330, HIST331, or JWST234.

Cross-listed with: HIST476.

Credit Only Granted for: HIST476 or JWST432.

JWST452 The Golden Age of Jewish Philosophy (3 Credits)

Jewish philosophy from Maimonides in the 12th century to the expulsion of the Jews from Spain at the end of the 15th Century. Topics include the limitations of human knowledge, creation of the world, foreknowledge and free will, and the existence of God.

Prerequisite: 3 credits in PHIL courses; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies; or permission of ARHU-Philosophy department.

Cross-listed with: PHIL417.

Credit Only Granted for: JWST452 or PHIL417.

JWST459 Readings in Medieval Hebrew (3-4 Credits)

Readings and analysis of Hebrew texts and literature from the Middle Ages. Language of instruction in English; all texts in Hebrew.

Repeatable to: 9 credits if content differs.

Credit Only Granted for: JWST459 or JWST466.

Formerly: JWST466.

JWST468 Readings in the Hebrew Bible (3-4 Credits)

Readings in the Hebrew text of the Bible. Emphasis in close reading, grammar analysis, and modern interpretations of the Bible. Language of instruction English; all texts in Hebrew.

Prerequisite: HEBR313; or permission of instructor.

Repeatable to: 9 credits if content differs.

Formerly: HEBR441 and HEBR442.

JWST469 Readings in Rabbinic Hebrew (3-4 Credits)

Readings in classical rabbinic texts and related corpora. Emphasis on grammar and reading skills as well as critical analysis of the material. Language of instruction: English; all texts in original language.

Prerequisite: HEBR313; or permission of instructor.

Repeatable to: 9 credits if content differs.

JWST471 Modern Hebrew Literature in Translation (3 Credits)

An exploration of modern Hebrew prose, poetry, and literary essays written from the 1880s through the present in Europe, Palestine, and Israel. An investigation of the challenges confronting authors such as Mendele Mokher Sforim, Avraham Mapu, Chaim Nahman Bialik, Dvorah Baron, S.Y. Agnon, and David Fogel as they tried to create a contemporary secular literature out of an ancient sacred language. All texts in English translation.

JWST478 Readings in Modern Hebrew (3 Credits)

Variable topics in Modern Hebrew Literature.

Prerequisite: HEBR313; or permission of instructor.

Restriction: Junior standing or higher.

Repeatable to: 12 credits if content differs.

JWST491 Judaism and the Construction of Gender (3 Credits)

The study of Jewish culture, religious practice, communal authority, and literature through the frame of such critical categories of analysis as gender, sexuality, masculinity, power, ethics, and the feminine.

Prerequisite: 1 course in JWST; or 1 course in LGBT; or 1 course in WMST or WGSS.

Cross-listed with: WGSS491.

Credit Only Granted for: JWST491, WMST491 or WGSS491.

Formerly: WMST491.

JWST492 Sex, Gender, and Jewish Identity (3 Credits)

An exploration of Jewish embodiment, including dynamics related to biological sex, culturally-framed gender, and sexuality. Topics of discussion may include transgender and intersex Jews, stereotypes and gender performance, modesty, genetics, and body alteration. Focus is on contemporary Jewish culture, framed within the larger historical and textual tradition.

Prerequisite: 1 course in WGSS; or 1 course in JWST; or 1 course in LGBT; or permission of instructor.

Cross-listed with: LGBT448W, WGSS492.

Credit Only Granted for: JWST492, JWST409G, LGBT448W, WMST498W or WGSS492.

Formerly: WMST498W and JWST409G.

JWST498 Advanced Language Module for Jewish Studies (1-3 Credits)

A supplementary language module for students enrolled in designated Jewish Studies classes. Language of instruction English, texts in original language.

Prerequisite: HEBR212 or JWST282; or permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

JWST499 Independent Study in Jewish Studies (1-3 Credits)

Prerequisite: Permission of ARHU-Meyerhoff Program & Center for Jewish Studies.

Repeatable to: 6 credits if content differs.

KNES - Kinesiology

KNES120A Fitness Walking (1 Credit)

Provides students a comprehensive overview of walking as well as the physical and mental health benefits of engaging in walking. This class will help students better understand the impact walking has on cardiovascular and exercise health across a lifespan, how to create and implement fitness goals, the importance of proper technique and safety, and the intersection of public health and physical activity.

Restriction: Must be in a major within the Kinesiology department.

Credit Only Granted for: KNES120 or KNES120A.

Formerly: KNES120A.

KNES136 Beginning Golf (1 Credit)

Student will learn the game of golf through the development of new skills and improve on existing skills, while expanding knowledge about the game. This is a beginning golf class intended for those who have little or no previous playing experience.

Credit Only Granted for: KNES137N or KNES136.

Formerly: KNES137N.

Additional Information: This course meets at the University of Maryland Golf Course.

KNES151 Professional Lifeguard Training (1 Credit)
